In the course of the judgment in the Appeal Court it was stated that "in principle it seems plain enough that the wages are payable monthly. The fair reading of the contract is that it is a hiring for the season at wages of $55 per month. The defendant seeks to make the question one of construction, the contention being that because the employment is for the season the inference is that the words "at $55 per month" do nothing more than fix the rate of remuneration. I am unable to adopt this view. To accept it means that the contract is an entire one, requiring the completion of the season's work by the labourer if anything is to be payable. In my opinion such a result should be provided for by nothing less than clear language or unequivocal implication. The period of service here has no relation to the payment of the wages periodically. Reasons can be suggested, and were put forward by the judge, why the wages should not be paid before the end of the term. They are founded on the financial convenience of the farmer or on the inexpediency of paying the labourer monthly, lest taking advantage of the higher wages paid at harvesting time he should then, when most needed, quit his master's service. It is solely because the contract was looked at by the judge from the point of view of the farmer's interests alone that a question, which otherwise I would have thought was elementary, was thought to be subject to extrinsic considerations which would not for a moment be given consideration in connection with ordinary hiring contracts."

—(Manitoba—Cowan versus Eisler)

Wage Agreement Proved Valid by Acceptance of Its Terms

The manager of one of the departments of a clothing factory in Manitoba accepted an invitation from the president of the company to take over the superintendence of the whole factory at a weekly remuneration of $50, and 10 per cent of the net profits of the company. He immediately entered upon his new duties on these terms, and continued to discharge them to the satisfaction of his employer for about four years, when he withdrew on his own initiative, but with the consent of the company. The company, however, refused to pay him the full amount of 10 per cent of the profits of the business, on the ground that the arrangement for such payment was made orally and never reduced to writing, and that it had never been sanctioned by resolution or by-law of the company. Action was taken by the employee in the Manitoba Court of King's Bench, which gave judgment for the plaintiff, holding that a company which has accepted the services of an employee, not an officer or shareholder of the company, for a long time and paid him wages and a bonus regularly, should not be allowed to contest the contract of employment on the ground that it was entered into by the president, who was also the manager, without proper authority.

Decisions on Validity of Minimum Wage Laws

The June issue of *Law and Labour* (New York) contained a summary of recent decisions by the United States Supreme Court on the question of the validity of State minimum wage laws. In this controversy the issue is between the Fourteenth Amendment of the constitution of the United States, which asserts the freedom of American citizens to pursue any lawful calling, and lawfully to contract in respect thereto; and on the other hand, the power vested in the several states to protect the health and welfare of their own people.

The first case in respect to this matter came up to the Supreme Court in 1917 from the State of Oregon (Stetler versus O'Hara), where the minimum wage law has been sustained by the highest court of that state. Mr. Justice Brandeis, then on the Supreme Court, was unable to participate because of his pre-

vious connection with the case. The eight justices participating divided evenly, and rendered no opinion, and as the court was evenly divided, the decision below became the law of the case.

In 1923, the Supreme Court was forced to face the issue in the case of Adkins versus Children's Hospital, 261 U.S. 525, which involved the constitutionality of the minimum wage law of the District of Columbia. In that now famous case, the majority opinion by Mr. Justice Sutherland declared that the law violated the fundamental principles of the constitution, while Chief Justice Taft wrote a dissenting opinion upholding the law. Judge Brandeis was again disqualified, but this time the remaining eight members of the court stood five to three in condemning the law as an unconstitutional interference with liberty.

On October 19, 1925, the Supreme Court had before it the constitutionality of the minimum wage law of Arizona in the case of Murphy versus Sardell. With a single dissenting opinion by Mr. Justice Brandeis, it affirmed the judgment of the United States District Court, declaring the law to be unconstitutional and rendering no opinion, except to add the single note: "Mr. Justice Holmes requests that it be stated that his concurrence is solely upon the ground that he regards himself bound by the decision in Adkins versus Children's Hospital."

On January 17, 1927, in the case of Donham versus West-Nelson Manufacturing Company, the court affirmed the judgment of the District Court of the United States declaring the minimum wage law of Arkansas to be unconstitutional. The opinion was *per curiam*, as follows: "Affirmed on the authority of Adkins versus Children's Hospital, of the District of Columbia, 261 U.S. 525, Murphy versus Sardell, 269 U.S. 530. Mr. Justice Brandeis dissents."

Municipality not Liable for Compensation of Injured Workman Hired Without Authority

An addition to a schoolhouse was being built when the contractor took sick and the work ceased. In order to hasten the work one of the school trustees interviewed a certain workman who undertook to finish the work as foreman at a wage rate of $1.25 per hour. This workman began work with the consent of the contractor, who paid the bills for material, etc. Four days after starting work he fell from a scaffold, receiving serious injuries. He claimed compensation from the municipality, contending that where a workman is hired to do work for a corporation, even by a person who has no authority so to hire him, if he does the work the relationship of employer and workman is created, notwithstanding that the corporation never ratified the agreement of hiring. The Saskatchewan Court of Appeal, affirming the decision of a lower court, held that in this case the workman was an employee of the contractor and not of the School Board, the liability of the Board being governed by the section of the School Act of Saskatchewan providing that "no act or proceeding of any Board shall be deemed valid or binding which is not adopted at a regular or special meeting at which a quorum of the Board is present." Judgment was therefore to the effect that a workman who is hired to do work for a corporation by a person who has no authority to hire him, and whose employment is not ratified by the corporation, has no recourse for injuries against the corporation.

—(Saskatchewan—Stuart versus Pennant School District.)

Rules for Determining Accidents "in Course of Employment"

The Supreme Court of the State of Illinois in a recent decision (Dambold versus Industrial Commission) laid down some general principles for determining whether or not an industrial accident has been sustained in the course of the workmen's employment.

General rule as to when workman is in course of employment.—A workman is said to be in the course of his employment when, within the time covered by such employment, he is doing something he might reasonably do while so employed, at a place where he might be while in that employment.

Whether an injury in going to and from work is in course of employment depends on facts.—Whether an employee, when injured in going to or from his work, is in the line of his employment depends upon the facts and circumstances of the particular case, but as a general rule a man's employment does not begin until he reaches the place where he is to work, or the scene of his duties, and does not continue after he has left.

When injury on way to work is not compensable.—An award of compensation for the death of an employee who was struck by a train while on his way to work cannot be sustained where there is no showing that the employer required a particular route to be followed in reaching the place of employment and where the evidence tends to show that the employee chose to take a short cut down the railroad track instead of following the public highway to the place of employment.

THE LABOUR GAZETTE

PREPARED AND EDITED IN
THE DEPARTMENT OF LABOUR, OTTAWA, CANADA

VOLUME 27] AUGUST 1927 [NUMBER 8

NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

Monthly Summary

EMPLOYMENT in industry in Canada at the beginning of July showed a further marked increase, the gains being somewhat more substantial than those noted on the same date in previous years of the record. This statement is based on statistics tabulated by the Dominion Bureau of Statistics from returns received from 6,137 firms, each with a minimum of fifteen employees representing practically every industry except agriculture, fishing and highly specialized business operations. These firms employed 896,956 workers, as compared with 875,090 at the beginning of June. The employment index number (January, 1920=100), computed from these returns stood at 108.4 on July 1, 1927, compared with 105.9 on June 1, 1927, and with 103.7, 96.8, 95.9, 99.5, 91.1 and 87.5 at the beginning of July in 1926, 1925, 1924, 1923, 1922 and 1921, respectively. Thus, the situation continued to be more favourable than at any previous time since 1920. Reports received from the offices of the Employment Service of Canada showed a small decline in the volume of business transacted in June, in comparison with the previous month and also with the corresponding month last year. At the beginning of July the percentage of unemployment among the members of reporting trade unions stood at 3.2 as compared with percentages of 5.2 at the beginning of June and 4.1 at the beginning of July, 1926. The July percentage is based on returns received by the Department of Labour from 1,561 local trade unions with an aggregate membership of 167,711 persons.

The average cost of a weekly family budget of twenty-nine staple foods was $10.92 at the beginning of July as compared with $10.86 for June; $11.07 for July, 1926; $10.49 for July, 1925; $9.91 for July, 1924; $10.17 for July, 1923; $10.27 for July, 1922; $10.96 for July, 1921; $16.84 for July, 1920; $16.92 for June, 1920 (the peak); $13 for July, 1918; and $7.42 for July, 1914. In wholesale prices the index number calculated by the Dominion Bureau of Statistics based upon prices in 1913 as 100, declined to 152.0 for July as compared with 153.5 for June; 156.2 for July, 1926; 158.1 for July, 1925; 153.9 for July, 1924; 153.5 for July, 1923; 154.1 for July, 1922; 163.7 for July, 1921; 256.3 for July, 1920 (the peak); 202.8 for July, 1919; and 199.5 for July, 1918.

The time loss due to industrial disputes in July, 1927, was less than during June, 1927, and less than during July, 1926. Thirteen disputes were in existence at some time during the month, involving 1,923 workpeople, and resulting in a time loss of 8,803 working days. Corresponding figures for June, 1927, were: sixteen disputes, 1,751 workpeople and 16,139 working days; and in July, 1926, eighteen strikes, 10,891 workpeople and 49,058 working days.

Industrial Disputes Investigation Act, 1907

During July no new applications for Boards of Conciliation and Investigation under the Act were received by the Department. In connection with a dispute involving electrical workers in Manitoba, for which a Board had been requested in the previous month, a friendly settlement was effected through the personal intervention of the Minister of Labour. An account of the recent proceedings under the Act is given on page 839.

A British view of "Lemieux Act."

In the discussions of proposed trade union legislation in Great Britain repeated references have been made lately to the Industrial Disputes Investigation Act of 1907. This act, it is pointed out, leaves the workers their ultimate legal "right to strike", but interposes delays in stoppages of work by providing for establishment of conciliation machinery. The *New Statesman*, in its issue of July 2 said that "the chief legal effect of adopting the 'Lemieux Act' in this country would be, in the industries to which it was made to apply, to prohibit sudden strikes and to make conciliation (but not arbitration) compulsory before a stoppage could take place. The chief effect is that, where the Act is involved—

perhaps in a third of the cases to which it nominally applies—no strike may take place until an impartial tribunal has pronounced judgment on the merits of the dispute. That having been done, either party, as in our own Railways Act, is legally free to take what action it pleases; but it is obviously difficult, though not impossible, to declare a strike or lockout in defiance of the tribunal's findings."

The *New Statesman* proceeds to make a comparison between the boards of arbitration established under the Canadian Act, and the Wages Boards established under the British Railways Act, 1921: "Where machinery of this kind can be set up by voluntary agreement between employers and Trade Unions, as it was in the case of our railways, there is a great deal to be said in its favour. But its success depends on its being acceptable to both parties, and on the securing of a tribunal whose decisions both parties are prepared to respect. This is precisely where the British railway scheme has the advantage over the Canadian Act. The British scheme, though it is now incorporated in an Act of Parliament, was adopted and employed voluntarily by both railway companies and railway trade unions before it was given legal sanction. It is essentially an outcome of direct negotiation, and the railway Wages Boards are bodies whose constitution was accepted in advance by both sides." (The agreement here mentioned, between the railway companies and the unions of railway men, was noted in the LABOUR GAZETTE, June, 1921, page 756).

The Railways Act of 1921 provided that 'all questions relating to rates of pay, hours of duty or other conditions of service of employees to whom this Part of this Act applies shall, in default of agreement between the railway companies and the railway trade unions, be referred to the Central Wages Board, or, on appeal, the National Wages Board, as reconstituted under this Act." The Central Wages Board is composed of eight representatives of the railway companies and eight of the employees. The National Wages Board is composed of six representatives of the companies, six of the railway men, elected by their unions; and four of the users of railways, the representatives of the "users" being elected respectively by the Parliamentary Committee of the Trades Union Congress, the Co-operative Union, the Association of British Chambers of Commerce, and the Federation of British Industries.

Organization in industry, commerce and the professions in Canada

The Department of Labour has just issued the sixth report on Organization in Industry, Commerce and the Professions in Canada for the year 1927, a volume which shows the extent of organization among the various classes of employers in the Dominion. The report also contains the names of associations whose members are concerned with co-operative buying and selling, among which is the Canadian Co-operative Wheat Producers, the largest wheat marketing organization in the world, handling over 180,000,000 bushels of wheat annually as well as more than 20,000,000 bushels of coarse grains. Other associations discussed in the volume include those embracing wholesale and retail merchants, as well as organizations comprised of persons engaged in professional, technical and scientific pursuits. The various associations are divided into the following groups: Manufacturing; Building and Construction; Mining; Transportation and Communication; Printing and Publishing; Laundering, Cleaning and Repairing; Personal Service and Amusement; General Manufacturers and Employers; Financial; Agriculture; Dairying; Horse, Live Stock, Sheep breeders, etc.; Co-operative Societies; Wholesale Merchants; Retail Merchants; Real Estate Dealers; Professional; Technical and Scientific; Insurance; Funeral Service.

The report points out that in the first eight of the above mentioned divisions in which are included the associations whose members are engaged in industries in which the employment of help is essential ,there are 374 main and branch associations, with a combined membership of 44,925. Some of the employers included in these groups have agreements with the corresponding organizations of work people covering the conditions of employment in their respective establishments. In the remaining twelve groups the employment of labour is in some cases only incidental, and with the exception of the retail merchants' section there is no corresponding body of organized employees. Although the bulk of the associations whose names appear in the report are purely Canadian, several are affiliated with organizations whose headquarters are in the United States. The figures presented in the report show that there are in the Dominion, exclusive of the co-operative group which numbers 1,155 societies with 474,160 members, 1,300 associations, with a combined membership of 1,024,364. The total number of all classes of associations whose names are given in the report is 2,455, an increase of 514 over those recorded in 1926,

the main addition being to the co-operative group, to which 353 societies have been added. The total combined membership of all classes of associations is 1,498,524, an increase of 259,712 over the number recorded in 1926, when there were 1,941 associations with a combined membership of 1,238,812.

Canada Year Book, 1926

The Dominion Bureau of Statistics announces the publication of the Canada Year Book, 1926, which is now ready for distribution. This volume is the official statistical record of the resources, history, institutions and social and economic conditions of the Dominion containing also comparative information regarding Great Britain and other countries. The present edition extends to over 1,000 pages.

The Canada Year Book is divided into fifteen sections, with an appendix, and deals with the following features:—

1. Physical characteristics of Canada, a description of the geography, geology, climate and natural resources of the Dominion.

2. History and chronology, including a chronological history of Canada from 1497 to 1926.

3. Constitution and Government of Canada, including a résumé of parliamentary representation in Canada.

4. Population, including detailed figures from the census of 1921, vital statistics concerning births, marriages and deaths, and statistics of immigration.

5. Production, including a general survey of Canadian production and sections dealing with agriculture, forestry, furs, fisheries, mines and minerals, water powers, manufactures and construction.

6. Trade and Commerce dealing with Canadian external and internal trade.

7. Transportation and communications, with sub-sections on government control over transportation and communication agencies, steam and electric railways, express companies, roads and highways, motor vehicles, air navigation, canals, shipping and navigation, telegraphs, telephones, and the post offices.

8. Labour and Wages. Under this section an account is given of the occupations of the people, the labour force of Canada both male and female and the occupational distribution of the Canadian people. The constitution and function of the Dominion Department of Labour is explained with an account of the work carried on by the Department in connection with the Industrial Disputes Investigation Act, Fair Wages, The Labour Gazette, labour legislation and joint industrial councils. The various duties of the provincial labour departments and bureaus are also described, Canada's relations to the International Labour Organization are outlined, and a summary is given of Dominion and provincial legislation on the draft conventions and recommendations proposed by the International Labour Organization. A review of organized labour in Canada reveals the number and membership of Canadian trade unions and their activities. Other features of the section include statistics of fatal industrial accidents during the year, and an outline of the work carried on in the various provinces concerning employers' liability and workmen's compensation. Statistics of industrial disputes; employment and unemployment; and the co-operative movement in Canada are also outlined. Statistics of wage rates are given for the several industries and occupations and the minimum wage problem is reviewed.

9. Prices, in which the movement of wholesale and retail prices as well as the price of public services are described.

10. Finance, with a detailed treatment of Dominion, provincial and municipal finance, national wealth and income, currency and banking, and insurance.

11. Education, dealing with recent developments in education, general education, technical education, higher education, and miscellaneous educational activities.

12. Public Health and Benevolence, outlining Dominion and provincial activity.

13. Administration, including the administration of public lands, public defence, public works, Indian affairs, soldiers' civil re-establishment and miscellaneous administration.

14. Sources of official, statistical and other information relative to Canada, including bibliographies of Dominion and provincial government publications.

15. The Annual Register, 1926, with a sketch of recent Dominion and provincial legislation, principal events of the year and important extracts from the *Canada Gazette*.

The appendix, includes detailed figures relative to the general election of September 14, 1926, the census of the Prairie provinces, 1926, and the Labrador Boundary Award.

Numerous maps and diagrams are used to illustrate various topics and to supplement the statistical tables of historical and current data.

New features incorporated to which special attention may be directed include the following:—

An historical account of the Geological Survey of Canada; census statistics of blind and deaf mutes, also of the occupations of the people; a considerable extension of the manufacturers' section, giving in particular the sta-

tistics of the leading industries of each of the provinces; the addition of considerable preliminary matter to the sub-section on external trade, also trade statistics showing by commodities our trade with thirty-three leading countries other than Great Britain and the United States; additional material on prices including the Bureau's new index number of retail prices, rents and costs of services, together with index numbers of street car fares and telephone charges, and of the prices of natural and manufactured gas and of electricity; short descriptions of the Topographical and Geodetic Survey and of the Dominion observatories. Throughout the volume the latest available information is included in each section, tables generally including figures for the fiscal year 1925-26 and the letter-press supplying supplementary figures extending in some cases to the end of the calendar year 1926. This edition of the Year Book has been edited by Mr. S. A. Cudmore, B.A. (Tor.), M.A. (Oxon), S.S., F.R., Econ. Soc., Chief, General Statistics Board.

A charge of $2 is made for the Year Book, which may be obtained from the Department of Public Printing and Stationery, Ottawa.

Farming careers for British boys in Canada

What is expected to be one of the most constructive of modern Land Settlement schemes is embodied in an Agreement for the settlement of British boys on the land in Canada, just concluded between the British and Canadian Governments under the Empire Settlement Act, 1922. The scheme is a further development of the Farm Training Centres for British boys which have already been established under the auspices of several of the Provincial Governments. Under this scheme, the British and Canadian Governments propose jointly to expend a total sum of five million dollars over a period of ten years in the form of recoverable advances to assist suitable British youths to take up farming in Canada on their own account.

It is the desire of the two Governments that British boys between the ages of 14 and 20 who are assisted to proceed to Canada to work on farms should be able to look forward to a definite career on the land. A large number of British boys who come out as farm workers do, of course, become farmers, but so far they have had to rely entirely upon their own efforts for the necessary capital to purchase and equip a farm, and this may take a considerable number of years. The new scheme aims at curtailing this period of waiting, and under it a British youth, at the end of a few years spent in gaining the necessary training and experience in Canada and in accumulating some savings, will have the opportunity of being placed on a farm of his own under Government supervision.

The scheme will apply to boys who have received assisted passages, have passed through the Provincial Training Centres in Canada and who were between 14 and 20 years of age on arrival in the Dominion. On reaching 21 years of age, the boys—provided that they have acquired the necessary training and experience by working for wages on a farm in Canada, and have saved approximately 500 dollars—will be eligible for assistance up to an amount not exceeding 2,500 dollars for the purchase of a farm and for stock and equipment. No advances will be made to young men over 25 years of age. Settlement under this scheme will commence on the 1st April, 1928, and will extend over a period of 10 years.

The scheme provides for the co-operation of the Provincial Governments and the extent of settlement in each Province will depend upon the measure of such co-operation. The Dominion Government will, of course, assume responsibility for actual settlement and the general administration of the scheme.

During the past year, Training Centres have been established in several of the Provinces under Government control and supervision. The British and Canadian Governments make a joint cash contribution towards the operation of these Provincial Training Centres, which are regarded as the basis of this Dominion-wide Boys' Settlement Scheme.

Applicants for settlement under this scheme will be visited from time to time by the Field Supervisors of the Immigration Department who will report on the industry and character of the applicant, and what progress he is making in acquiring the necessary farming experience. The selection of the farms will be a mutual arrangement as between the applicant and the Department of Immigration and Colonization in co-operation with the Provincial Government. The Department will supervise the purchase of stock and equipment and give close supervision until the migrant has shown that he can succeed by the exercise of his own judgment in all matters of cultivation and farm management. The Field Supervisors have not only had practical farming experience, but are generally graduates of Canadian Agricultural Colleges, and have already acquired valuable experience in the settlement of Canadian soldiers on the land and in the more recent settlement of nearly 3,000 British families.

Insurance Companies and compensation in Quebec

A special joint committee of the Canadian Casualty Underwriters' Association in the Insurance Brokers' Association of the Province of Quebec has prepared a brief for the insurance companies condemning the proposal to amend the new Workmen's Compensation Act of Quebec by the establishment of an accident fund administered by a provincial Compensation Board. The committee believes that private insurance on a competitive basis, as provided for under the Act of 1926, is preferable to "monopolistic" government insurance. The text of the Act of 1926, which was to have taken effect on April, 1927, was given in the Labour Gazette, March, 1927, page 272. At the end of March the effective date was postponed for one year, certain difficulties having arisen between the employers and the insurance companies in regard to the probable cost of insurance against industrial accidents. At the same time it was stated that further consideration might be given by the government to a proposal to institute the commission system of administration (Labour Gazette, April, 1927, page 346).

The insurance companies' committee, in their brief, recall the fact that Quebec was the first province in Canada to make statutory provision for the payment of compensation to workmen injured in the course of their employment. "When other provinces", they say, "were struggling with a system of common law and statutory employees liability under which the compensation to an injured workman depended on his proving that his employer had been negligent in providing proper plant and equipment and organization, Quebec had adopted the modern principle that a workman was entitled to compensation for injuries by industrial accidents, irrespective of negligence of either party. Under the old system, the allegation of negligence was always open to dispute and workmen and employers were harassed by disputes and litigation in an effort to determine whether or not negligence on the part of the employer entitled the workman to damages, and whether or not contributory negligence of the workman, or the legal doctrines of 'assumption of risk' and 'common employment' had deprived the workman of his rights to indemnity. Quebec was first to correct all that and do social justice to workmen, victims of industrial accidents. The Workmen's Compensation law of Quebec is not yet perfect. Much may be done to improve it. The scale of benefits to workmen should be reviewed by the legislature and more generous allowances provided. Adequate medical services can be provided for the injured workman. The application and interpretation of the law can be made more certain. The procedure for the determination of claims can be simplified and made more economical. The assessment of indemnity for permanent injuries can be made more definite and consistent. All these things can be done without destroying the principle of private enterprise in workmen's compensation insurance, and without establishing a monopolistic government plan of insurance."

Federal Commission on Maritime fishing industry

Early in August it was announced that the Federal Government had decided to appoint a commission to investigate conditions in the fishing industry in the Maritime Provinces. The commission will ascertain the best methods of obtaining wider markets for the products of the industry, and will make recommendations in regard to its internal economy.

The Minister of Marine and Fisheries recently appointed a fisheries inspector at Canso, whose duty is to see that all fish offered to the market are of standard quality. The federal Department of Fisheries is also taking part in a scheme for transporting the fish caught at different stations along the shore to a point where they may be profitably marketed. It is stated that the appointment of a commission will in no way interrupt the present activities of the Department in carrying on scientific research at the Atlantic Fisheries Station at Halifax, and in communicating the results of these investigations to the men engaged in the fishing industry.

Nova Scotia fishing and lumbering industries and compensation

The Government of Nova Scotia has appointed Mr. Carl D. Dennis, of Amherst, under the Public Inquiries Act, to inquire into the position of the fishing and lumbering industries in relation to workmen's compensation in the province. Special difficulties present themselves in connection with fishing in particular owing to the form of organization of this industry. Practically all the men engaged in fishing are partners, the owners of the vessels taking half the proceeds of the catch, and the crew sharing the other half. The owners claim that they should not be obliged to pay the entire amount of the assessment for compensation, and that the "sharesmen" should bear an equal proportion of the cost.

The subjects referred to the commissioner for investigation and report are as follows:—

1. The matter of whether the rates and assessments levied by the Workmen's Compensation Board upon the fishing industry and lumbering industry respectively unduly affect those industries respectively, and to what extent.

2. The matter of the present method employed by the Workmen's Compensation Board in determining and levying rates and assessments upon owners of fishing vessels in the fishing industry in the County of Lunenburg.

3. Any other matter in reference to the said industry, having any relation to whether any increase in the rates under the Workmen's Compensation Act over those now prevailing, would injuriously affect the said industry, and to what extent.

4. The matter of the rate of assessment that can be paid by the fishing industry in its present state, and if said rate is insufficient to pay compensation for losses in the said industry, what other system of insurance, if any, would be practicable.

5. The matter of the effect of the present rate levied by the Workmen's Compensation Board upon employers engaged in the lumbering industry, whether the same is inequitable, and if so, what remedy, if any, can be applied.

6. Generally, without restricting the generality of the foregoing, any other matter which affects the industries of lumbering and fishing in respect to the Workmen's Compensation Act.

Labour standards in Canada and United States

The *American Labour Legislation Review* contained in its issue for June, 1927, an article by Dr. Bryce M. Stewart, in which he makes a comparison between the labour standards prevailing in Canada and those in the United States. "Canada's labour legislation," he says, "is appreciably in advance of that of the United States both as to the standards established and the proportion of the population affected, and this despite the longer industrial history of the latter country. In some instances the four and one-half million organized workers in the United States may have established, by collective bargaining, standards in advance of those at corresponding points in Canadian laws and industrial agreements, but these gains do not affect the Canadian advantage in the almost nation-wide extent of workmen's compensation, minimum wage legislation and public employment offices. To these may be added the establishment of fair wages, virtually the union rate, on all contracts of the Dominion government and of some of the provinces, an actual beginning on minimum wage legislation for male workers, a minimum age of 14 for admission to employment in the factories of provinces with 90 per cent of the population with higher minima in two provinces, and the fact that both parties in the Dominion parliament are pledged to the early establishment of a nationwide scheme of old age pension (since this was written the Canadian Parliament, in March, 1927, enacted an old-age pension law). The weaker competitor has outdone the stronger in the establishment of labour standards.

To account for the variation between the labour standards in the two countries Dr. Stewart points out that the labour movement in the United States has shown less faith in legislative action than have trade unions in Canada. This difference is explained in part by the constitutional system in the former country, under which American labour leaders have for the most part become convinced, "after long and discouraging experience with unconstitutional and unenforceable labour laws, that only through trade unions can the wage earner secure protection worthy of the name." On the other side the greater influence of British traditions in Canada has fostered belief in the efficacy of legislative action. "There is certainly a greater probability of retaining legislation in force as compared with the United States where the courts have declared so many labour laws unconstitutional. Parliament has deprived Canadian labour of some important legal gains and in the last quarter century the courts have restricted union action in labour disputes by the granting of injunctions. However, the use of the injunction has not become general and the Canadian courts have very little power to nullify legislation."

Settlement of wage claims in the United States

The United States Bureau of Labour Statistics recently published a report showing the number of cases in which employers in the United States failed to pay wages earned by their employees. It is stated that there is, in the United States a widespread exploitation of labour through failure to pay wages. Thus in 1926, in sixteen States for which more complete reports were made, wage claims settled only after the intervention of the State Labour officials numbered over 23,400 and represented in the aggregate a collection of $1,216,000. Some of these undoubtedly arose through misunderstanding on

the part of the employers, but many were cases of intentional fraud. Moreover, there are unquestionably many legitimate wage claims which are never pressed. Although the amount of the average wage claims, about $50, may seem small, the records of hardship and destitution following the workers' failure to collect their earnings include such tragedies as dispossession of lodgings, recourse to charity organizations, and even death from exposure and suicide.

The report shows that a substantial number of State labour offices are rendering valuable service in collecting wages for workers unable to employ a lawyer or ignorant of their legal rights. The wage-adjustment work has increased greatly in several of the labour offices. Such increase was particularly marked in the California, New Jersey, and New York offices, the first-mentioned office reporting the settlement of 16,121 cases in 1926 as compared to 5,362 in 1920, and in New Jersey the number of claims reported paid up in 1926 was almost 60 times the number settled in 1920. Some labour offices, notably California, Massachusetts, Nevada, and Utah, are backed with effective legislation in their wage-collection work, but a number of offices are heavily handicapped in such activities by inadequate legal support. Certain offices, however, despite laws without force or without specific legal authorization are doing effective wage-adjustment work.

It may be noted that in Canada complaints of employees for non-payment of wages are heard by magistrates or justices of the peace under the various provincial "Master and Servant" acts. Thus the Ontario act allows proceedings to be taken within one month after employment has ceased, or within one month after the last instalment of wages under the agreement of hiring has become due. A police magistrate dealing with such cases has powers similar to those of a judge of a divisional court in regard to the enforcement of payment of a debt.

Movement for co-operative management

Among the recommendations made by the recent International Economic Conference was the suggestion that greater efficiency in industry might result from scientific management, including closer co-operation between capital and labour. (Labour Gazette, July, 1927, page 770). Already a movement toward the fulfilment of this recommendation has arisen in England where efforts are being made to secure a more direct connection between labour and management in industry. The new movement was begun on the initiative of Sir William MacKenzie, former chairman of the Industrial Court, Sir Horace Wilson of the Ministry of Labour, and Sir William Clarke, of the Department of Overseas Trade. Mr. Seebohm Rowntree, the well-known authority on social and economic problems, also sponsors the undertaking, which is a direct result of the Geneva Conference.

Forty organizations so far are represented in this attempt to promote co-operative management of industries. Included among the number are the Federation of British Industries, the Imperial Institute, the Association of Scientific Industrial Research, and various associations linked with science, accountancy, and retail distribution. As a result of discussions now taking place, an offer will be made to various labour organizations throughout Great Britain to co-operate in the scheme, and a committee will review the whole industrial, transportation and selling fields in order to discover where more modern methods of management may be applied. It is pointed out that fuller co-operation between capital and labour will stabilize employment and benefit the consumer by checking uneconomic competition and diminishing industrial fluctuations. Efficient management is looked upon as a probable remedy for the acute depression which at present afflicts both mining and agriculture in Great Britain.

Non-contributory Old Age Pensions proposed in South Africa

An Old Age Pension and Social Insurance Commission appointed last year by the South African Government recently completed its first report, making recommendations regarding old age and invalidity pensions. It recommends the establishment of a system of non-contributory pensions for Europeans and coloured persons of both sexes over sixty-five, payable at the rate of ten shillings per week, subject to a reduction based on income. The income limit for persons entitled to pensions would be £52 per annum, those with incomes beyond that amount not being eligible for pensions. The full pension of ten shillings per week will, according to the recommendations of the Commission, be payable where there is no income whatsoever. Pensions are to be granted only to persons who have been British subjects for five years and have been ordinarily resident in the Union fifteen out of the twenty years immediately preceding the date of application. It is recommended that invalidity pensions at the same rate and on the same basis as old age pensions should be granted to persons between 61 and 65 years of age who are totally and permanently disabled and who have been resident in the

Union for at least five years. It is calculated by the Commission that 15,518 Europeans, 12,580 coloured, and 1,557 Asiatics will be eligible for old age pensions, while 8,360 Europeans, 7,386 Coloured, and 1,742 Asiatics will be eligible for invalidity pensions. The first cost of the scheme is estimated at £1,225,718, on the 1926 basis, subject to an annual increase of between £30,000 and £40,000 for every year which elapses before the scheme is introduced.

One of the commissioners, while subscribing to the main feature of the scheme, recommends a pension of £1 per week to be paid to men at the age of sixty-five and to women at sixty. He also makes various reservations on details connected with the working of the proposals.

As regards aged natives, the Commission suggests that they should continue to be assisted from votes for poor relief, but that rations issued to them should be on a more generous scale than at present.

Invalid and Old Age Pensions in Australia

The annual statement of the Commissioner of Pensions for the Commonwealth of Australia for the twelve months ending June 30, 1926, gives the figures relative to the Invalid and Old Age Pensions Act for that year. The Australian Act, passed in 1908, and subsequently amended, provides that a pension shall be paid to indigent men at 65 and to women at 60 years of age. Men totally incapacitated for work receive an invalid pension at 60 years of age. The maximum pension payable under the Act is one pound a week but this amount is reduced if the pensioner is the recipient of any other income. Pensions to war veterans, and any payments from trade unions or benevolent societies, are not treated as income. The value of the pensioner's home is also deducted from the value of accumulated property. Except in the case of a blind person whose total income, including pension, may reach £221, no pension is paid to any person who received an income of more than $411.20 a year. Claims are received, registered, and investigated by magistrates. At each of the state capitals there is a Deputy Commissioner and at the federal capital a commissioner and assistant commissioner is charged with the administration of the Act.

In the year ending June 30, 1926, there were 51,458 men and 75,460 women receiving old age pensions, while 21,795 men and 27,008 women were eligible for invalidity pensions, making a total of 175,721 beneficiaries under the Invalid and Old Age Pensions Act. The number of old age and invalid pensioners in each ten thousand of the population was 293.26. There were 145,108 pensioners receiving the maximum compensation. The total liability for the year was approximately £99,620 including £38,729 paid to other government departments.

A comparison of the Australian Bill and the Old Age Pension Act which passed the Dominion Parliament at the recent session reveals several similarities. The maximum pension in Australia is £1 a week while in Canada it is $240 a year. In Australia as in Canada this pension is reducible by the possession of a private income. Canada's Act differs from that of Australia in so far as one-half the expenditure is borne by the several provincial governments which must also bear the cost of administration. In Canada the age for pension eligibility is 70 years as compared with Australia's 60 years for women and 65 for men. It was estimated that 98,841 eligible pensioners would come under the Canadian Act involving a total liability on the part of the Dominion and the provincial governments of approximately $23,000,000. The census of 1921 gave the population of Australia as 5,436,000. The population of Canada in that year was 8,788,000.

Industrial pension funds and group insurance

A comparison of group insurance and industrial pension funds was made by Sir Joseph Burn in the course of an address at a recent conference of the Industrial Welfare Society (Great Britain) held at London. He stated that in Great Britain the demand for pensions was "increasing at an astounding rate," and expressed surprise that American employees seemed to be satisfied with group insurance. "Group insurance," he said, "is a method of providing an amount of money in the event of an employee dying while in the employment of a firm or at a comparatively early date after employment has ceased. It is really a temporary life insurance and, as such, costs very little to provide, since only a very small proportion of the employees of any one firm die while in the service of that firm. Probably the reason for the success of group insurance in the United States is to be found in the fact that most workers, of whatever grade, feel that they have a very good chance of making good and achieving independence, and that while group insurance is useful to their families in the event of misfortune, they themselves are able to provide for the future without assistance. In a country with great and only partially developed natural resources such an attitude is easily understood. Con-

ditions are very different in our own country, and the demand is for some provision which will benefit the person most nearly interested during his or her own lifetime."

On the other hand, the speaker stated that a pension is simply a form of deferred payment. "The employer should imagine that every week or month, so much is paid in wages and salaries in cash and so much in promissory notes. Whether the pension is provided by the men themselves, or by the employer, or partly by each, it seems plain to me that the pension is a part of the remuneration earned and is paid for as the labour is given."

These "deferred payments" are usually the chief source from which the pension fund is accumulated; but Sir Joseph Burn recommends joint contributions from the employer and the employee as the most effective system, preferably under the management of the firm itself, rather than that of an insurance company. Among the intricate calculations to be made by a company embarking on a penison scheme the speaker referred to the "extraordinary advance" in recent years in the length of life of people in Great Britain." Thus a few years ago there was good reason to believe that if a man in a particular group was provided with a pension of £100 a year at the age of 60, the sum of £950 was required to pay that pension. If now it is found that £1,100 is required to produce the same pension, it is evident that funds in which the calculations have not been arrived at on that basis are insolvent. Women's pensions must be considered quite separately. The expectation of life is greater than in the case of men, and, further, it is my experience that it is of very little value to provide a pension for a woman at as old an age as a man. Women, for various physical reasons, require the pension at an earlier age."

GENERAL REVIEW OF THE INDUSTRIAL SITUATION

THE employment situation at the end of July was reported by the superintendents of the Employment Service of Canada to be as follows:—

Crop prospects in the Province of Nova Scotia were good and the agricultural industry was busy. Fairly good catches were reported by the fishing industry. Pulp wood cutting was proceeding, but men were hesitant about taking work in the woods at this season, preferring other employment. Production at the coal mines remained favourable. Manufacturing industries generally were normally busy, while the iron and steel group was stated to be fair. Halifax was the busiest centre in so far as construction was concerned and some buildings of substantial size were being proceeded with; elsewhere throughout the province this industry was rather quiet. Transportation and trade were both reported as fair.

In New Brunswick crop prospects were fairly promising, although the weather had interfered to some extent with work in the agricultural industry. Fairly good catches were reported by the fishing industry. With logging activity centering chiefly in pulp wood cutting, the same difficulty was being experienced in New Brunswick as in Nova Scotia, namely, men were somewhat averse to taking work in the woods at this time of year. Manufacturing industries, generally speaking, were normal. Building construction seemed to be fairly active, with most building tradesmen engaged. Transportation showed fair activity, while trade was in good volume.

Demands for farm workers at the Quebec employment offices were heavy. It was stated that the prospects for the forthcoming logging season were promising, and rather heavy demands for workers for this industry which had already been registered at the offices, indicated an anticipation of considerable activity. Most of the factories throughout this province seemed to be working on full time, with production satisfactory. Building and road construction showed substantial improvement during the month, with the result that considerable numbers of vacancies for tradesmen and labourers were notified during July. Transportation was very active, while trade was stated to be good. The demand for women domestic workers was brisk and Montreal reported the usual shortage of applicants.

Orders for farm workers in Ontario were heavy and general, with some local shortages of experienced men reported. Manufacturing concerns continued fairly busy, although not many additional workers were being taken on; while some centres reported a midsummer slackening, it would not seem to be of any considerable proportions. Railroad construction throughout the province was fair, while building construction was satisfactorily good, with tradesmen very generally employed at most centres, although no shortage of workers in this industry appeared to exist. This being

the quiet season for the logging industry, orders for workers were light. The metal mining industries in the northern part of Ontario continued with normal activity, and the few orders for workers received at the employment offices were easily filled. Demands for women domestic workers were not so great as formerly, and the shortage of applicants were not so noticeable.

In Manitoba crop prospects were favourable, but as some weeks yet remained before harvesting operations would become general, the demands for workers had not yet become extremely heavy. However, as in other years in the pre-harvest season, the orders for farm hands were becoming more numerous, while applicants showed a disinclination to engage by the month, preferring to await the harvest rates of pay; although placements were hindered to some extent by this feature, they were showing an increase. Road construction was being carried on at many points throughout the province. In the City of Winnipeg building construction was very brisk, permits

for this year to date having amounted to five and one-half million dollars. Demands for casual labour for miscellaneous industries were very light. Orders for domestic workers were increasing in volume, although no pronounced shortages were in evidence.

Demands for farm workers in Saskatchewan likewise were on the increase, and in this province some shortages of experienced men were reported. Activity in the construction industry was fair, with quite a lot of work progressing. While demands for casual labourers for miscellaneous employment were reported to be reasonably numerous, there was no shortage of applicants to accept the jobs. With good demands for women domestics, applicants were again reported as being scarce.

As in Manitoba and Saskatchewan, an increase in farm orders was reported from Alberta, and already some shortages of farm hands were being experienced in the latter province. Railroad and highway construction with a substantial number of workers engaged, were in some instances adding to gangs. Building construction in the larger centres in Alberta appeared to be rather satisfactory, with most tradesmen engaged. While coal mining was dull, signs of renewed activity, especially in the Drumheller district, were noted. The demand for women domestics was on the increase. In other lines of employment, there was not much demand for workers.

The logging industry in the Province of British Columbia continued to be rather quiet. Metal mining showed normal activity, with a few demands for help reported at different centres. No considerable surpluses of workers for the building and construction industry were reported, and this industry appeared to be progressing satisfactorily. Activities in the manufacturing industry remained normal, with canneries reported as particularly busy. Throughout this province conditions generally remained favourable. with unemployment at a rather low ebb.

Employers' Reports

There were further marked increases in employment at the beginning of July, according to statements tabulated by the Dominion Bureau of Statistics from 6,137 firms employing 896,956 workers, or 21,866 more than on June 1. This increase, which slightly exceeded that reported on July 1 of any other year of the record, brought the index number to 108.4, as compared with 105.9 in the preceding month, and with 103.7, 96.8, 95.9, 99.5, 91.1 and 87.5 at the beginning of July in 1926, 1925, 1924, 1923, 1922 and 1921, respectively. The situation continues to be decidedly better than in any other month of the years since 1920.

The trend was favourable in all provinces, the most noteworthy expansion taking place in the Maritime Provinces and Quebec. In the former, construction recorded the most pronounced improvement, but there were also gains in logging, mining, services and some other groups, while manufacturing and transportation were slacker. In Quebec, construction, transportation, manufacturing, services and trade reported the largest additions to staffs; on the other hand, logging was seasonally quiet as river-driving finished. In Ontario, manufacturing and logging registered between-season dullness; but considerable gains were made in construction, transportation, mining and trade. In the Prairie Provinces, the greatest gains were in construction, manufacturing, transportation, services and communications; logging, however, showed a seasonal decline. In British Columbia, manufacturing, particularly canneries and lumber mills, construction and services united to record the most marked gains indicated in that province on July 1, since the record was instituted in 1920, while logging afforded less employment.

Of the eight cities for which separate tabulations are made, only two—Hamilton and Windsor (with the other Border cities)—showed reduced activity, while in Quebec, Montreal, Toronto, Ottawa, Winnipeg and Vancouver, the movement was decidedly favourable. In Montreal, employment continued to advance, particularly in the manufacturing, transportation, construction and trade groups. In Quebec, manufacturing and construction registered practically all the gain. In Toronto, manufacturing, notably in food and printing establishments, construction, and trade reported increased activity. In Ottawa, most of the expansion took place in construction, although manufactures also were busier. In Hamilton, there were minor losses in personnel, but conditions were better than on July 1, 1926; construction was busier, while manufacturing was seasonally dull. In Windsor and other Border cities, further curtailment in automobile plants caused a large reduction in employment. In Winnipeg, manufacturing, construction, transportation and communications registered advances that brought employment to a higher level than at the beginning of July of any other year of the record. In Vancouver, the greatest gains were in manufacturing, but communications and some other industries also reported improvement.

An analysis of the returns by industries shows that within the manufacturing group, there were considerable increases in the food,

lumber, pulp and paper, rubber, building material, electric current, mineral product, boot and shoe and electrical apparatus divisions, while seasonal curtailment was shown in textile and iron and steel plants. Greatly increased employment was noted in communications, transportation, construction and maintenance, services and trade; on the other hand, logging camps registered important seasonal declines, largely owing to the cessation of river driving operations in Quebec.

An article elsewhere in this issue gives in some detail the employment situation as at the beginning of July.

TRADE UNION REPORTS

The upward movement of employment among local trade unions indicated during May continued throughout June with increased impetus as shown by the returns tabulated from 1,561 local organizations with 167,711 persons, 5,410 or a percentage of 3.2 of whom were without work as compared with percentages of 5.2 in May and 4.1 in June last year. The increase in the volume of work afforded in the garment trades in Quebec was mainly responsible for the better conditions prevailing during June than in both the previous month and June last year, although Nova Scotia in lesser degree also contributed to gains.

An article elsewhere in this issue gives in more detail a summary of the conditions among local trade unions at the end of June.

EMPLOYMENT OFFICE REPORTS

During the month of June, 1927, the offices of the Employment Service of Canada referred 32,571 workers to employment and made a total of 31,266 placements. Workers placed in regular employment numbered 21,518, of whom 17,435 were men and 4,083 were women. Placements in casual work numbered 9,748. Employers notified the Service of 33,540 vacancies, of which 23,410 were for men and 10,130 for women. The number of applicants for work was 31,243 men and 11,219 women, a total of 42,462. A slight decline in the volume of business transacted is shown when the figures are compared with those of last month, and also with those of the corresponding period of last year, there being recorded during May, 1927, 35,604 vacancies, 44,052 applications for work and 32,249 placements effected, while the registration in June, 1926, showed 36,060 opportunities for service, 42,191 applications made, and 32,483 placements in regular and casual employment. A report in detail of the work of the offices for the month of June, 1927, and for the quarterly period April to June, 1927, may be found elsewhere in this issue.

PRODUCTION IN CERTAIN INDUSTRIES

Some figures indicating the recent movement of trade and industry are given in the table on page 834.

The Dominion Bureau of Statistics reported that the physical volume of manufacturing in Canada, from March to May, reached a higher level than in any previous period. The monthly index of manufacturers indicates that operations in January and February were maintained at about the level obtaining from October 1925 to December 1926. The advance in the index in March to May was attributable especially to the activity in primary iron and steel plants, although other industries, including the automobile and newsprint industries and lumber and flour milling, showed increased outputs. The average index of the volume of manufactures during the first five months of 1927 was 157, compared with 144 in 1926, an increase of 9 per cent. Employment in manufacturing industries on June 1, 1927, was at a higher level than at any date since 1920.

The remarkable increase in the physical output of Canadian industry in the first five months of the present year, compared with the high level maintained in the corresponding part of 1926, indicates that the country is now enjoying a period of industrial expansion in most lines. Considering forestry, mining, construction and manufactures—the four principal branches of industry, which, with agriculture, are engaged in the production of commodities, the output in the first five months of 1927 was ten per cent in excess of the corresponding period of 1926. This was determined by the maintenance in the Dominion Bureau of Statistics of an index number of the physical volume of production in the four branches in question, weighted according to the net value of production in the period from 1919 to 1924.

The physical volume of business in Canada during the first six months of 1927 was greater than in the corresponding period of the preceding year. The index indicated a gain amounting to nine per cent, the preliminary figure for June being slightly below the high point of the preceding month. In the comparison of the half year, most of the factors upon which the index was based showed important increases. The output of the forestry industry averaged about six per cent greater, while the value of contracts awarded, indicative of the trend of the construction industry, was somewhat below the high level of the first half of 1926. The output of

manufacturing concerns increased nearly eight per cent; which was very satisfactory in view of the high rate of operation during the early months of 1926. The value of imports increased 9.5 per cent, while the exports declined 16.4 per cent, but the external trade statistics would be considerably more favourable if corrected for the difference in prices. The increase in bank debits, after being placed on a physical volume basis by eliminating the price element, was ten per cent.

The production of pig iron in Canada amounted to 69,437 long tons, a decline of 12 per cent from the 78,987 tons of May, and two per cent less than the 70,854 tons produced in June a year ago. Output of foundry and malleable iron showed some gains, but these were more than offset by basic iron dropping to 41,696 tons from 64,085 tons. Foundry iron advanced to 21,387 tons from 14,902 tons, and malleable to 6,354 tons; no malleable iron was made in May. For the first half-year, production totalled 403,713 long tons, a gain of nine per cent over the 370,864 tons produced in the first six months of 1926, and 39 per cent over the 290,892 tons made during the corresponding period of 1925. Furnace charges for the month included 125,140 long tons of imported iron ore, 79,992 short tons of coke and 37,970 short tons of limestone. For the six months' period, furnace charges totalled 723,038 long tons of ore, 448,741 short tons of coke and 221,481 short tons of limestone. Active furnaces in June showed no change from May. On June 30, six furnaces having a daily capacity of 2,375 long tons per day or 47 per cent of the total capacity of all iron blast furnaces in Canada, were in blast at the following points: two at Sydney, N.S.; two at Hamilton, Ont., and two at Sault Ste. Marie, Ont. Production of ferro-alloys fell off slightly in June to 4,418 tons from 4,773 tons in May. Although figures for the year to date are still incomplete, the records show a total output of 26,958 tons for the first half of the year consisting of two grades, one having a high manganese content and the other from ten to 75 per cent silicon. The production of steel ingots and castings amounted to 59,940 tons, a decline of 39 per cent from the 96,711 tons and 27 per cent under the 81,277 tons reported for June last year.

BUILDING PERMITS AND CONTRACTS AWARDED

According to a report prepared by the Dominion Bureau of Statistics, the value of the building permits issued by the municipal authorities in sixty-three cities in Canada during the month of June, 1927, amounted to $18,399,858, as compared with $20,532,147 in the preceding month, and with $18,718,050 in June, 1926.

The *McLean Building Review* estimates the total value of the construction contracts awarded in Canada in July, 1927, at $50,881,200. Of this amount $23,120,100 was for engineering construction; $12,118,600 for residential buildings; $10,831,700 for business buildings and $4,810,800 for industrial construction. The apportionment of contracts awarded by provinces during July, 1927, was: Ontario, $28,205,800; Quebec, $14,172,600; Prairie Provinces, $4,652,900; British Columbia, $3,180,000 and the Maritime Provinces, $669,900.

The "contemplated new construction" in Canada during July, 1927, according to the same *Review*, totalled $37,401,200, $12,342,700 of this amount being for residential buildings; $11,743,900 for business buildings; $2,388,500 for industrial buildings, and $10,926,100 for engineering construction (including bridges, dams, wharves, sewers, watermains, roads, streets and general engineering).

The value of construction contracts awarded throughout the Dominion during the January-June period, 1927, was $191,323,800, as compared with $194,543,600 in 1926 and $125,544,100 in 1925. Of the total contracts awarded this year, $58,688,300 was classed as residential buildings, $73,561,500 as business, $22,889,300 as industrial, and $36,184,700 as engineering. In 1926, the total was divided as follows:—residential $56,415,300, business, $53,760,500, industrial, $43,879,500 and engineering, $40,488,300. There were thus increases during the first half of 1927, as compared with last year in the two classes most heavily represented in the building permits statistics—residential and business building.

EXTERNAL TRADE

The summary of Canadian trade prepared by the Department of Customs and Excise shows that in June, 1927, the merchandise entered for consumption amounted to $101,029,386, as compared with $94,412,439 in May, and $91,513,173 in June, 1926. The domestic merchandise exported amounted to $105,678,453, as compared with $109,782,591 in May, 1927, and $118,188,590 in June, 1926.

The chief imports in June, 1927, were: Iron and its products, $24,385,288, and non-metallic minerals and products, $16,910,584.

The chief exports in the same month were in the group of agricultural and vegetable products, mainly foods, $38,518,972, and wood, wood products and paper, $27,054,383.

In the two months ending June, 1927, exports of egricultural and vegetable products mainly foods, were valued at $124,413,203, and wood, wood products and paper at $67,306,255.

Strikes and Lockouts

The time loss due to industrial disputes in July, 1927, was less than during June, 1927, and less than during July, 1926. There were in existence during the month thirteen disputes, involving 1,923 workpeople, and resulting in a time loss of 8,803 working days, as compared with sixteen disputes in June, involving 1,751 workpeople, and resulting in a time loss of 16,139 working days. In July, 1926, there were on record eighteen strikes, involving 10,891 workpeople and resulting in a time loss of 49,058 working days. One of the strikes and lockouts commencing prior to July terminated during the month, and two of the strikes and lockouts reported as commencing during the month also terminated during July. At the end of July, therefore, there were on record ten strikes and lockouts, affecting 303 workpeople, not including those strikes and lockouts in which employment conditions were reported to be no longer affected but which had not been formally called off.

Prices

The cost per week of a list of twenty-nine staple foods for an average family of five, in terms of the average retail prices in some sixty cities was $10.92 at the beginning of July as compared with $10.86 for June; $11.07 for July, 1926; $10.49 for July, 1925; $9.91 for July, 1924; $10.17 for July, 1923; $10.27 for July, 1922; $10.96 for July, 1921; $16.84 for July, 1920; $16.92 for June, 1920 (the peak); $13.00 for July, 1918; and $7.42 for July, 1914. Potatoes were again substantially higher while less important advances occurred in the prices of eggs, bread, flour, rolled oats, prunes, salt pork and mutton. The prices of butter, beef, veal, fresh pork, bacon, lard, rice and coffee were lower. Including the cost of fuel and rent with that of foods the total budget averaged $21.11 at the beginning of July as compared with $21.04 for June; $21.30 for July, 1926; $20.70 for July, 1925; $20.30 for July, 1924; $20.65 for July, 1923; $20.67 for July, 1922; $21.53 for July, 1921; $26.92 for July, 1920 (the peak); $20.66 for July, 1918; and $14.17 for July, 1914. Fuel and rent showed little change.

In wholesale prices the index number calculated by the Dominion Bureau of Statistics was slightly lower at 152.0 for July as compared with 153.5 for June; 156.2 for July, 1926; 158.1 for July, 1925; 153.9 for July, 1924; 153.5 for July, 1923; 154.1 for July, 1922; 163.7 for July, 1921; 256.3 for July, 1920 (the peak); 202.8 for July, 1919; and 199.5 for July, 1918. In the classification according to chief component material, five of the eight main groups declined, one advanced and two were practically unchanged. The groups which declined were: the Vegetables and their Products group, advances in the prices of grains, mill feed and fruits being more than offset by declines in the prices of potatoes, sugar, rubber, hay, coffee, rosin and turpentine; the Animals and their Products group due to declines in the prices of cattle and meats which more than offset advances in the prices of hogs, eggs, hides, leather, boots and shoes; the Wood, Wood Products and Paper group because of lower prices for groundwood and matches; the Non-Ferrous Metals group due to declines in the prices of lead, silver, tin, spelter and solder and the Chemicals and Allied Products groups due mainly to a decline in the price of white lead. The Fibres, Textiles and Textile Products group advanced due to higher prices for cotton, wool and jute. The Non-Metallic minerals group and the Iron and its Products group were practically unchanged.

The special labour tribunal, set up under the Fascist "Charter of Labour" for Italy to adjust industrial disputes, recently handed down its first judgment. A dispute arose between a group of landowners in Northern Italy and their agricultural workers over the reduction in wages resulting from the revaluation of the lira. The argiculturists attempted to force the workers to accept a 30 per cent cut in wages, pleading that the revaluation of the lira had so increased the gold value of the workers' wages as to render agriculture unprofitable. The workers refused to accept such a large reduction, but offered to take 60 centimes less an hour. The latter offer was refused by the landowners, and the matter was referred to the labour court, where the workers' offer was ratified. The argiculturists were ordered to pay the wages and the arrears due at the rate proposed by the employees. The text of the Fascist "Charter of Labour", under which the labour court was established, was given in the LABOUR GAZETTE for May, 1927, page 524.

A scheme of group insurance for civic employees in the City of Quebec has been recently adopted by the city council. It was first suggested by the firemen and policemen in the city, and occasioned considerable discussion for several months. The scheme as finally adopted covers the whole body of civic employees.

PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907, DURING THE MONTH OF JULY, 1927

DURING the month of July no applications were received for the establishment of Boards of Conciliation and Investigation under the Industrial Disputes Investigation Act. The Honourable Peter Heenan, Minister of Labour, however, visited Winnipeg, and, as a result of his personal intervention, an amicable settlement was effected in the case of differences existing between the Winnipeg Electric Company, Limited, and Manitoba Telephone System and certain of their employees being linemen, cable splicers, troublemen and station wiremen, members of Locals 435 and 1037, International Brotherhood of Electrical Workers.

The receipt in the Department during June of an application for the establishment of a Board to deal with this controversy was mentioned in the July issue of the Labour Gazette. The application stated that the dispute grew out of the employees' request for increased wages. The number of employees directly affected by the difficulty was given as 250 and 500 indirectly. Mr. Heenan held several conferences with the parties concerned and through his mediation an agreement was reached based on a compromise.

Settlements of disputes referred to Boards under the Statute, as noted in previous issues of the Labour Gazette, are described on another page of this issue. These disputes are those involving (1) clerks, freight handlers, etc., employees of the Canadian Pacific Railway Company; (2) the same classes of employees on the Canadian National Railways; and (3) sleeping and dining car employees on the same system.

CANADIAN RAILWAY BOARD OF ADJUSTMENT No. 1

SIX new decisions of the Canadian Railway Board of Adjustment No. 1 have been received by the Department. This Board was established under an Order in Council, dated July 11, 1918, while the war was still in progress, its purpose being to secure uninterrupted service on the railways. The Board consists of six representatives of the railway companies and six representatives of labour, one for each of the railway brotherhoods. Earlier cases were outlined in the Labour Gazette for April, 1927, and in previous issues. The new decisions are as follows:—

Case No. 278—Canadian Pacific Railway, western lines, and Brotherhood of Railroad Trainmen.

A difference of opinion arose between the company and the Brotherhood as to the company's right to vary the hours for starting crews in full-crewed yards, as laid down in article 3 of the Yardmen's Schedule.

The employees contended that all such crews, when worked in continuous service, should be started within the periods named therein, the company contending that extra yard crews were not covered by this article. It was pointed out that the yard service rules were the same as those in effect on railways in the United States, having been adopted in Canada with the understanding that they should be applied in the same manner as on the United States railways. Having therefore inquired as to the practice on the United States railways the Board decided that in yards where yard crews are working regular assignments under article 3, one or more independent assignments working regularly may be started at any time during the twenty-four hour period, excepting between twelve midnight and six-thirty a.m.

Case No. 282—Canadian National Railways, western region, and Order of Railroad Telegraphers.

This case concerned a dispute between the company and staff employees handling trains and performing telegraphic duties on Vancouver Island lines. It was presented to the Board on October 12, 1926, when it developed that additional information was required before the Board could reach a decision in the matter. It was accordingly referred back to the parties. The Board was subsequently informed that a satisfactory settlement had been reached, and a request for withdrawal was approved by the Board.

Case No. 285—Canadian National Railways, Atlantic region, and Brotherhood of Maintenance of Way Employees.

This case consisted of a claim for lost time by a bridge and building foreman. It was presented to the Board on March 8, 1927, when it developed that additional information was required before the Board could reach a decision in the matter. It was accordingly

referred back to the parties. The Board has since been informed that a satisfactory settlement was reached, and the request made for withdrawal was accordingly approved by the Board.

Case No. 290—Canadian National Railways, Atlantic region, and Brotherhood of Maintenance of Way Employees.

This case, relating to a controversy between the company and a bridge and building foreman, was presented to the Board on March 8, 1927, when it developed that additional information would be necessary before the Board could reach a decision in the matter. It was accordingly referred back to the parties. The Board, on being later informed that a satisfactory settlement had been reached, approved a request for withdrawal.

Case No. 291—Canadian National Railways, central region, and Order of Railroad Telegraphers.

A dispute arose between the company and its telegraphers over the employment of an operator to act as relieving agent at a station on a division where there was no regular relief agent employed at the time. The operator worked for eighteen days, being paid at the same rate as the man he relieved ($122.76). The employees claimed that in accordance with the schedule sufficient relief agents should be maintained to meet all reasonable demands and that their minimum wage should be $162.76; and also that when a telegrapher relieved an agent he was to receive the pay of a relief agent. The company claimed that the employment of a relief agent on this particular division was not warranted.

The Board sustained the claim of the employees to the extent that, in this particular case, the relieving agent's rate should be paid because of a previous mutual arrangement between the company and the telegraphers of this district to the effect that a telegrapher relieving an agent on annual vacation should be paid the relieving agent's rate, if at the time, a regular relieving agent is not employed on the territory.

Case No. 292—Canadian National Railways, central region, and Brotherhood of Railroad Trainmen.

A dispute arose between the company and its employees in a certain yard over a bulletin issued by the company to the effect that a ballast pit, about two miles distant from the south switch of the yard, was to be considered within the limits of the yard switch engine. Yardmen in the yard were required to make short trips to the pit for the purpose of switching coal track, etc., and for this service they claimed a minimum day in addition to their yard time. They also protested that the unloading of coal and the handling of ballast at the pit was done almost exclusively by road crews. This work, they claimed, should be done by the yard crew if the pit is within the limits of the yard.

The company claimed that all switching performed at the pit since the issuance of the bulletin had been done by yard crews. It also claimed that the loading of ballast and the unloading of coal was work-train service and as such belonged to the road crew.

The Board denied the claim of the employees. At the same time it did not approve of an arrangement between the company and its employees whereby certain exclusively switching work within the switching limits was handled by road crews.

Nationality of Mine Workers in British Columbia

The *Engineering and Mining Journal* for July 9 contains a sketch of mining in British Columbia by Mr. T. A. Rickard. The writer notes the recent change in the composition of the labour employed in the mines of the Province as in those of other parts of the continent. "Broadly speaking," he says, "the hereditary miner has disappeared; his place has been taken by the mere labourer, whose lack of training has been overcome by the use of increasingly effective machines for drilling, breaking, and moving the ore. In British Columbia the change has not been completed, fortunately the old stock surviving to a notable extent. Thus at the Premier mine 35 per cent of the labour force was British in 1924 (the latest year for which such statistics are available) and eighteen per cent was Canadian. Men from the United States composed a quota of seven and a half per cent and Italians three and a half per cent. Scandinavians and Slavs (chiefly Russian) each contributed ten per cent. The 3.8 per cent of Japs represented cooks and helpers, not real miners or even mine labourers. At the Anyox plant of the Granby Company 27 per cent were British and 24 per cent Canadian; American, four per cent; Swede, 9 per cent; Italian, six per cent, and from two to five per cent of Russian, Finn, German, Norwegian, Ukranian, Polish, and Australian. At the Surf Inlet mine the British represented 46 per cent and the Canadian three per cent with only five per cent American, seven per cent Swede, four per cent Norwegian, four per cent Finn and two per cent Polish. Thus, on average, one may say that fully fifty per cent of the mine workers are British and Canadian. In the coal mines Oriental labour is noteworthy. Thus at the Nanaimo mine, of the Western Fuel Company, 135 Chinese are found among 1,394 workers, or about ten per cent."

STRIKES AND LOCKOUTS IN CANADA DURING JULY, 1927

THE number of strikes and lockouts in existence during July was thirteen as compared with sixteen the preceding month. The time loss for the month was less than during July, 1926, being 8,803 working days as compared with 49,058 working days during the same month last year.

Date	Number of disputes	Number of employees involved	Time loss in working days
July, 1927	13	1,923	8,803
June, 1927	16	1,751	16,139
July, 1926	18	10,891	49,068

The record of the Department includes lockouts as well as strikes, but a lockout, or an industrial condition which is undoubtedly a lockout, is rarely encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout, included as such in the records of the Department, is a cessation of work involving six or more employees at its commencement and lasting at least one working day. Disputes of less than one day's duration, and disputes involving less than six employees, are included in the published record only when ten days' or more time loss is caused, but a separate record of such disputes is maintained in the Department, and the figures are given in the annual review.

The figures printed are inclusive of all disputes which come to the knowledge of the Department, and the methods taken to secure information practically preclude probability of omissions of a serious nature. Information as to a dispute involving a small number of employees, or for a short period of time, is frequently not received until some time after its commencement.

Ten disputes, involving 303 workpeople, were carried over from June, and three disputes commenced during July. One of the strikes and lockouts commencing prior to July terminated during the month, and two of the strikes and lockouts commencing during July also terminated during the month. At the end of July, therefore, there were on record ten strikes and lockouts, as follows: Bakers, Montreal, P.Q.; ladies' clothing factory workers, Toronto, Ont.; cap makers, Toronto, Ont.; men's clothing factory workers, Montreal, P.Q.; electrotypers, Toronto, Ont.; blacksmiths, Saskatoon, Sask.; stonecutters, Montreal; lathers, Montreal, P.Q.; painters, Toronto, Ont.; and electrical workers at Vancouver, B.C.

The record does not include minor disputes such as are described in a previous paragraph, nor does it include disputes as to which information has been received indicating that employment conditions are no longer affected, although the unions or organizations concerned have not yet declared them terminated. Information is available as to five such disputes, namely moulders at Galt, Ont., August 2, 1922; cigarmakers at Montreal, March 24, 1925; men's clothing factory workers, Montreal, P.Q., July 28, 1926; fur workers at Winnipeg, Man., September 25, 1926; and plumbers at Windsor, Ont., April 5, 1927.

A dispute involving 24 restaurant employees in several establishments in Saskatoon, Sask., in a cessation of work from July 22 to July 25 has been reported in the press. The employees demanded an increase in wages and shorter hours including six days work per week instead of seven, and recognition of the union. The conditions of the settlement, it was reported, provided for a minimum rate of fifty dollars per month and meals, nine hours per day for women and ten hours for men, and six days per week; but no recognition of the union.

A dispute of plasterers at Winnipeg, Manitoba, alleged to have been a lockout, commenced on June 20, 1927, but was reported to the Department too late to be included in the July issue of the Labour Gazette. In this dispute the employees concerned claimed that they were shut out by the employer when they refused to work overtime unless paid at the rate of double time for such work. On June 25, 1927, the employer acceded to their demand and the strikers returned to work.

Of the disputes which commenced during the month two were against changes in working conditions, and one was for an increase in wages and for shorter hours. Of the three strikes which terminated during the month two were in favour of the employer and one resulted in a compromise.

The following paragraphs give particulars in regard to certain disputes, in addition to information given in the tabular statement.

Bakers, Montreal, P.Q.—In this dispute, which commenced on May 1, 1927, for an increase in wages, most of the strikers were still out at the end of July, only two of the employers having reached an agreement with their employees.

Hat Workers, Guelph, Ont.—In this dispute, which commenced on June 28, 1927, the employees ceased work when their demand for a working day of less than eight hours was refused. By the end of the week, however, it was agreed between the parties concerned that the work should be done in two shifts of eight hours each; and on July 4, 1927, the men returned to work.

Blacksmiths, Saskatoon, Sask.—This dispute, involving blacksmiths and certain other trades in an establishment in Saskatoon since May 17, 1927, was still unsettled at the end of July. Most of the strikers, however, had se-

cured work with other employers, only four of the men being unemployed at the end of the month.

STONECUTTERS, MONTREAL, P.Q.—In this dispute, work ceased on June 10, 1927, when a demand for an increase in wages from 75 cents to 90 cents per hour was refused by the employers. During July some of the strikers secured work with other employers. As the quarries were picketed by the union the employers provided special conveyances to and from work for employees not on strike.

LATHERS, MONTREAL, P.Q.—In this dispute, which commenced on June 6, 1927, when a demand for an increase in wages was refused, there was little change during July. At the end of the month the strike was still unterminated, although some of the strikers had secured work elsewhere.

PAINTERS, TORONTO, ONT.—In this dispute, which commenced on June 6, 1927, owing to the refusal of the employers to grant an increase in wages, the majority of the firms concerned had signed agreements with the union by the beginning of July. At the end of the month, however, the dispute was still unterminated.

STRIKES AND LOCKOUTS DURING JULY, 1927.

Industry, occupation and locality	Number of employees involved	Time loss in working days	Remarks
(a) Strikes and Lockouts occuring prior to July, 1927.			
MANUFACTURING—			
Vegetable Foods—			
Bakers, Montreal, P.Q.	54	1,350	Commenced May 1, 1927, for increase in wages. Unterminated.
Clothing (including knitted goods)—			
*Ladies' clothing factory workers, Toronto, Ont.	4	100	Alleged lockout, commenced June 30, 1926; enforcement of non-union conditions. Unterminated.
Cap makers, Toronto, Ont.	3	75	Commenced Aug. 27, 1924 for employment of union members only. Unterminated.
Men's clothing factory workers, Montreal, P.Q.	42	1,050	Commenced June 4, 1927, against change to piece rate system and to maintain union conditions. Unterminated.
Hat workers, Guelph, Ont.	35	53	Commenced June 28, 1927, for shorter hours. Ter minated July 4, 1927. Compromise.
Printing and Publishing—			
Electrotypers, Toronto, Ont.	2	50	Commenced Dec. 20, 1926, against discharge of employees for union activity. Unterminated.
Iron, Steel and Products—			
Blacksmiths, etc., Saskatoon, Sask.	8	150	Commenced May 17, 1927, for increase in wages and recognition of union. Unterminated.
Non-Metallic Mineral Products—			
Stonecutters, Montreal, P.Q.	80	2,000	Commenced June 10, 1927, for increase in wages. Unterminated.
CONSTRUCTION—			
Buildings and Structures—			
Lathers, Montreal, P.Q.	50	1,250	Commenced June 6, 1927, for increase in wages. Unterminated.
Painters, Toronto, Ont.	25	475	Commenced June 6, 1927, for increase in wages. Unterminated.
(b) Strikes and Lockouts commencing during July, 1927.			
MINING, NON FERROUS SMELTING AND QUARRYING—			
Coal miners, New Waterford, N.S.	650	650	Commenced July 5, 1927, against changes in working conditions. Terminated July 6, 1927, in favour of employers.
Coal miners, Sydney Mines, N.S.	925	925	Commenced July 6, 1927, against changes in working conditions. Terminated July 7, 1927, in favour of employers.
CONSTRUCTION—			
Buildings and Structures—			
Electrical workers, Vancouver, B.C.	45	675	Commenced July 14, 1927, for increase in wages and shorter hours. Unterminated.

*Reports indicate that the strikers have been replaced but there are still a number of employees out and on the strike benefit list of the union.

Coal Miners, New Waterford, N.S.—In this dispute, which commenced on July 5, 1927, the men went out in sympathy with two of their number who had objected to a change in their working conditions. They returned to work the next day with no change in working conditions.

Coal Miners, Sydney Mines, N.S.—This dispute, which commenced on July 6, 1927, was a protest against the allotment of work to certain miners. The strikers returned to work the next day with no change in working conditions.

Electrical Workers, Vancouver, B.C.—This dispute, which involved a cessation of work from July 14, 1927, occurred owing to the refusal of certain employers to grant an increase in wages of $1 per day, from $8 to $9, and a decrease in hours from 44 hours per week to 40 hours per week. At the end of the month the dispute was still unsettled.

STRIKES AND LOCKOUTS IN GREAT BRITAIN AND OTHER COUNTRIES

THE latest available information as to strikes and lockouts in various countries is given in the Labour Gazette from month to month, bringing down to date that given in the issue for February 1927, as an addendum to the review of strikes and lockouts in Canada during 1926. The latter review included a table summarizing principal statistics as to strikes and lockouts since 1918 in the several countries for which such figures were available. Many countries publish these statistics only once each year the figures being issued in some cases after an interval of as much as two years, so that for such countries the latest figures are not for relatively recent dates.

Great Britain and Northern Ireland

The number of new disputes beginning in June was 16, involving (directly and indirectly) approximately 6,000 workpeople. In addition, 28 disputes involving about 16,000 workpeople which began before June were still in progress in that month, so that there were 44 disputes involving 22,000 workpeople in progress during the month. The time loss for these disputes was 79,000 working days.

Two disputes involving coal miners near Durham, which began during May, were still in progress in June. In both cases the miners refused to work one shift every Saturday rather than two shifts on alternate Saturdays. These disputes involved stoppages of work on Saturdays only. One, involving 7,400 miners was settled in all but one colliery at the end of June on the employers' terms. The other, involving 2,044 coal miners, was still in progress at the end of the month.

At Ebbw Vale, Monmouthshire, 1,800 coal miners went out on strike on May 30, against the dismissal of three workers. An amicable settlement was reached June 4. At Ystradgynlais, Brecon, 1,300 coal miners were involved in a dispute concerning the employment of non-union workers. After one week's stoppage of work, the non-members joined the union and work was resumed.

A strike of rivetters etc. employed in shipyards on the Clyde took place in June. About 1,500 workers were involved. The demand was for an increase in piece rates over the rates set forth in a new price list, and work was resumed under protest after three days stoppage of work: a claim was to be made for an increase in wages of 25 per cent.

The 700 building operatives in Londonderry who went on strike on May 2, against a proposed reduction in wages, had all returned to work on July 9. No reduction in wages was made, and the bricklayers and masons received an increase.

United States

The number of strikes and lockouts beginning in May, according to preliminary figures, was 100, of which 74 involved 20,535 workpeople, making the average number of employees per dispute 278. Revised figures for April show the number of strikes and lockouts beginning in the month as 93, of which 61 involved 222,903 workpeople. Of the 100 disputes beginning in May, 47 were in the building trades, 10 in the clothing industry, 9 in coal mining, 9 in the textile industry and 25 in various other industries.

Bituminous Coal Miners' Dispute: During July there was little change in the situation. In the Central Competitive Field the operation of several mines involved in the dispute on an open shop basis continued, and several others were opened under these conditions. In Ohio, the operators refused to consider the proposal of the union to revive the four-state conference and decided to operate on an open shop basis. A number of disturbances were reported and a number of arrests made in connection with riots.

Labourers, Hartford, Connecticut: A strike of about 1,000 building labourers began on

May 4 for an increase in wages from 55 and 60 cents an hour to 65 cents an hour, but the strike was abandoned by May 14.

Millwork Carpenters, Chicago, Illinois: About 1,200 millwork carpenters went on strike against a reduction in wages from $1.20 to $1.10 per hour. The strike began May 9 and terminated successfully on May 26.

Belgium

During May, 21 strikes began and 24 were carried over from the previous month, making a total of 45 disputes in progress during the month. These disputes involved 14,218 workpeople, and resulted in a time loss of 188,378 working days. Of the 21 disputes which began in the month, 14 were over questions as to wages, 2 against the discharge of workmen and the others over various other questions. Settlements were made in the case of 24 disputes, 6 in favour of workpeople, 9 in favour of employers and 9 ended in compromise.

Finland

During May 1927, 23 disputes were in progress involving 100 establishments and 12,081 workpeople.

France

Revised figures for the year 1924 were recently published. The number of disputes in France, including Alsace-Lorraine, was 1,090, involving 279,633 workpeople and resulting in a time loss of 3,863,182 working days. These disputes include 1,083 strikes involving 274,865 workpeople and 7 lockouts involving 4,768 workpeople. The strikes were classified by industries as follows: in the metal industry there were 185 strikes involving 45,424 workpeople, in construction 153 strikes involving 34,846 workpeople, in transportation and maintenance 135 strikes involving 39,548 workpeople, in textiles 96 strikes involving 45,712 workpeople, in stone and pottery work 82 strikes involving 10,339 workpeople, in wood and toy manufacture 74 strikes involving 8,629 workpeople, in leather and hides, 57 strikes involving 15,813 workpeople, in foods 49 strikes involving 10,250 workpeople, etc.

The causes of the strikes were: 893 for increases in wages, 35 against reduction in wages, 36 for reduction in working hours and the others for various other causes.

The results of the strikes were: 218 in favour of workpeople, 495 in favour of employers and 368 ended in compromise.

Farmers under Compensation Act of California

Farmers are included in the provisions of the Workmen's Compensation Act of California under an amendment passed this year. The *California Safety News* states that the necessity for this legislation is shown by the accident figures in the agricultural industry for the year 1926. During that year there was a total of 6,456 injuries to farm employees in California, of which 51 were fatalities, 66 permanent injuries, and 6,339 were of a temporary nature. This is the largest number of injuries reported for any single classification other than for building construction and commercial enterprises during the year. California and Ohio are the pioneers in this endeavour to extend the benefits of Workmen's Compensation to farm employees.

The amendment lays the responsibility on the farmer of either electing to come under the Act or declining to do so. He is obliged to make a definite choice, and failure to pursue one course or the other may have serious results. The procuring of a compensation insurance policy will constitute an election to come under the Act. The farmer who employs persons other than members of his own family must either reject the Act or provide compensation coverage. If he rejects the Act, his status remains the same as it was before the amendment came into force, an injured employee being able to bring a suit against him for damages in the Superior Court, in which action the failure of an employer to secure the payment of insurance for the compensation to an injured employee is liable to prove costly.

The farmer who does not carry compensation insurance for his employees and who fails to accept or reject the compensation provisions made eligible by the amendment is liable to heavy loss in case of accident to an employee. He will be presumed to have accepted the provisions of the Act and will therefore be subject to all the provisions and penalties of the Workmen's Compensation Act. In case of an employee's death he is liable to pay an award of $5.150. In non-fatal cases the award would be for surgical, medical and hospital treatment. In addition he is liable to a fine of $500 as an uninsured employer even if no injury occurred.

It may be noted that all the Canadian provinces exclude farmers from the provisions of Workmen's Compensation. The Manitoba Act, while it specifically excludes the farmer from its provisions, gives him an elective privilege. The farm employee may become subject to the Act on the application of the employer and the subsequent approval of the Board.

MIMIMUM WAGES FOR FEMALE EMPLOYEES IN SASKATCHEWAN

Regulations Governing Female Employees in Beauty Parlours and Barber Shops

THE Minimum Wage Board of Saskatchewan recently issued an order respecting female employees in beauty parlours and barber shops. The regulations prescribe the usual precautions regarding cleanliness, lighting, ventilation, temperature, drinking water, and toilet rooms. The sections governing hours of labour, wages and registration are as follows:—

Hours of Labour

(a) Subject to the provisions of clause (c), no person, firm or corporation shall employ a female or suffer or permit a female to be employed in any beauty parlour or barber shop for a greater number of hours than fifty in any one week or ten in any one day. At least one full hour shall be allowed for each meal.

(b) When an employee is transferred from one establishment to another during the regular working day, the total number of hours worked by the employee shall not exceed those fixed by these regulations.

(c) Overtime may be worked only by permit to be obtained from the secretary of the board, and shall not exceed three hours in any one day or six hours in any one week. Overtime shall be paid for at not less than the regular rate of wages.

Wages

(a) No person, firm or corporation shall employ an experienced female or suffer or permit an experienced female to be employed in a beauty parlour or barber shop at a rate of wages less than $15 per week. (An experienced female is one who has been employed in the industry for six months).

(b). There may be a probationary period of three months for which no wages are payable, after which the employee shall be paid wages at the rate of not less than $10 per week for a period of three months. Thereafter she shall be considered an experienced worker and shall not be paid less than the minimum rate of $15 per week prescribed for experienced workers.

(c) No reduction for statutory holidays shall be made from the minimum wage.

(d) Where board or lodging or both are provided by the employer there may be deducted from the wage rate a sum not to exceed $2.50 per week for lodging nor $5.25 per week for board.

(e) If uniforms are required to be worn they shall be supplied and laundered at the expense of the employer (Uniform means any special kind of dress, including caps, cuffs and aprons).

(f) An employee when leaving the employment shall be given a certificate showing the length of time and experience in that employment.

Register

Every employer shall keep a register of the names and addresses, the working hours and the actual earnings of all female employees, and shall on request permit any member or representative of the board to inspect and examine the same.

The regulations come into force on the 29th day of August, 1927.

VARIOUS NEW REGULATIONS IN ALBERTA

Factories Act, 1926.—The first two regulations made under the provisions of the Alberta Factories Act, 1926, were published in the *Alberta Gazette* for July 15. The provisions of this Act were outlined in the Labour Gazette for May, 1926, page 446. The new regulations provide as follows:—

1. No person shall be employed in the varnishing of casks or tanks in any case where such employment is likely to produce injuries or explosive gases, unless a watchman is stationed on the outside of any such cask or tank, and there is ample and accessible provision of remedies necessary to restore any person who has been accidentally overpowered by any such gases.

2. The inspector may at any time require, at his uncontrolled discretion, that, in any factory, any floor made of concrete or brick should be covered with matting or partially covered therewith in such a way as to provide sufficient matting covered space for the person employed on such floor to stand upon.

Mines Act.—A new regulation under the Mines Act of Alberta, requiring all miners to present their certificates of competency before commencing work in any mine, was published last month. The new provision will

take effect on October 1. The text of the regulation is as follows:—

14. (*a*) Every person employed as a miner shall produce his certificate of competency as a miner granted under this Act before commencing work in any mine, and such certificate shall during the period of his employment be deposited with the employer, to be kept at the mine office. Such certificate shall be produced whenever requested by an inspector, and same shall be returned to the miner when he severs connection with the employer.

Regulations were recently published in Alberta for the guidance of Boards of Examiners to conduct examinations for coal miners' certificates of competency under the provincial Mines Act. The regulations provide that the Minister appoint District Inspectors of Mines as Chairman of the Boards of Examiners. The chairman of each Board is to preside at all examinations and meetings of the Board; keep the minutes of all proceedings; sign and issue all certificates and forward returns to the Chief Inspector of Mines. Each member of the Board is entitled to vote at each examination. A notice of the date and place of examination must be posted in a conspicuous place for at least three days before the examination is held. Each candidate must pay his fee to the chairman on presenting himself for examination. In addition, candidates must present clear and satisfactory testimonials and produce satisfactory proof of their previous employment. The result of each examination must be certified by at least two examiners on a specified form which is to be forwarded immediately to the Chief Inspector, who must also keep alphabetical lists of all candidates whether successful or not. No certificates of competency may be issued to a miner who cannot satisfy a majority of the Board that he is sufficiently conversant with the English language and with the provisions of the Mines Act to render his employment safe. All fees are to be forwarded to the Chief Inspector of Mines at the end of each month. The fee for the examination is one dollar, for a substituted certificate, fifty cents; and for a provisional certificate, one dollar.

Theatres Act.—New regulations under the Alberta Theatres Act require that every projectionist operating the machine of an itinerant show shall be required to have a third class certificate. In regard to examinations for third class certificates it is provided that any candidate who fails to obtain 50 per cent of the marks awarded at the examination, but secures over 25 per cent of the said marks, may be granted a provisional certificate.

WORKMEN'S COMPENSATION IN BRITISH COLUMBIA IN 1926

THE tenth annual report of the Workmen's Compensation Board of British Columbia covers the operations of the calendar year 1926. At the end of 1926 approximately 7,500 workmen and their dependants were receiving either the whole or a part of their maintenance from the compensation provided under the act. There were on the pension list at that date 631 widows, 1,063 children under 16, 106 dependent mothers, 42 dependent fathers, and 28 other dependants, in addition to 951 permanently disabled workmen, making in all 2,823 beneficiaries in receipt of regular allowances. This total of 7,500 also includes the dependants provided for in the permanent and temporary disability cases. The benefits of the act now apply to 165,000 workmen and their families. During the ten years this legislation has been in effect 219,670 accidents have been dealt with, and as a result of those accidents 2,206 workmen have lost their lives and 4,898 others were left either partially or totally incapacitated for further work in life.

The report sounds a note of industrial progress. The total payrolls of the industries covered under the act were approximately $175,000,000 in the year 1926, as compared with audited payrolls of $164,216,219 for 1925; $155,410,227 for 1924; $153,548,944 for 1923; $130,592,502 for 1922, and $129,518,375 for 1921. Industrial expansion is similarly evidenced by comparing the number of firms actively operating in the province at the end of each calendar year. On December 31, 1926, there were 7,613 employing firms on the record, as compared with 7,197 at the end of 1925; 6,838 in 1924; 6,624 in 1923; 6,524 in 1922, and 6,393 in 1921. During the year 108 employers resumed operations after periods of inactivity, and 1,480 new firms commenced employing labour for the first time. In addition to these, optional protection, made available by an amendment to the act in 1919, was applied for and extended to cover the workmen of 144 employers engaged in occupations not compulsorarily under the act. There were 45 more employers personally availing themselves of optional protection in 1926 than in the previous year. (This phase of workmen's compensation was the subject of a note in the LABOUR GAZETTE, June, 1927, page 594).

Firms to the number of 1,316 ceased to employ labour during the year, and 1,732 others commenced or resumed operations, so that there was a net increase of 416 in the total number operating. The extent to which the requirements of the act are being complied with by employers may be judged from the fact that out of 30,365 accidents reported during the past year only twenty-three occurred prior to the employer recording his operations and being assessed in respect of them.

An amendment to the act passed in 1925 and effective in 1926 allows the payment of time loss compensation from the date of disability in all cases where such disability is of more than 14 days duration, whereas formerly a waiting period of three days was required in such cases. Another amendment provides for the continuance of an existing household if desirable for the benefit of children left dependent by the death of a workman leaving no widow or in a case where the widow subsequently dies. The same monthly payment may now be made to a close relative or suitable person as would have been payable if there had been a widow. The monthly allowance to orphan children was at the same time raised from $12.50 to $15 each.

Method of Administration.—The report explains the purpose and use of the reserve fund as follows:—"Section 32 (1) of the act provides that 'the Board shall each year assess and levy upon and collect from the employers sufficient funds to provide in each year capitalized reserves sufficient to meet the periodical payments of compensation accruing in future years in respect of all accidents which occur during the year.' So far as employers are concerned, when an award is made for a fatal or a permanently disabling accident, the full cost of the same is forthwith taken out of their funds and their financial obligations are ended. Employers commencing operations in future years consequently bear no part of the burden of accidents occurring in the year prior to their engaging in business. Employers each year pay their way as they go just as fully as if they complied with a court decision in a damage action. It is true that widows, children, and other dependents are not paid in a lump sum the full amount of the awards made in their favour. Section 16 of the act sets out the manner in which their awards shall be paid to them—namely, in monthly instalments. Meanwhile the amount of their awards is invested for them in Dominion, provincial or municipal bonds to comply with the Trustee Act and are held in the joint names of the Board and the Minister of Finance pursuant to section 53 of the Workmen's Compensation Act. An illustration will serve to make the procedure more readily understood. A workman meets with a fatal accident on November 1, 1925, leaving a widow and four dependent children under 16. A pension award is computed for the widow, calculated on reliable actuarial tables to be exactly sufficient using both the principal and accruing interest to pay her $35 each and every month during her expectancy of life or widowhood. Additional awards are calculated for the children so as to allow each of them an award of $7.50 till they reach in turn the age of 16 or previously die. Those awards for widow and children are added together and total, say $8,176.11. The sum is forthwith taken out of current funds collected during 1926 and invested for the dependants in securities as above described. During 1926 the members of deceased workmen's family receive two months' pension, $130; the balance of their money is paid to them through the years to come in monthly instalments from their Pension Reserve Fund. This fund is composed entirely of such awards to dependants and permanently disabled workmen. It is created under the act as 'capitalized reserves' and does not contain one cent of 'undivided profits' or 'surplus,' nor are there included in it any moneys set aside to meet anticipated accidents. It contains the unpaid balances falling due to claimants in respect of accidents which have occurred in the past and is in no way a contingency fund."

The accompanying table shows the receipt and expenditure for the several classes of employment for 1926.

Accident Prevention.—The report notes that the experience of each successive year has emphasized the importance of safety organization which has made remarkable progress since the act took effect. Accident prevention regulations, warning placards, and safety literature were contributing causes to a decreasing number of fatalities during the year 1926 and the two preceding years. Many individual companies including the British Columbia Lumber and Shingle Manufacturers, the Shipping Federation of British Columbia, the British Columbia Loggers' Association, and the Shingle Manufacturers' Association of British Columbia have now full time safety inspectors supervising their plants in the hope of reducing the number and severity of their accidents. The success of the innovation is proven by the decreasing number of serious accidents. Co-operation has been introduced as the keynote to the safety movement. Without that common element among the parties concerned no successful safety work can be accomplished.

Accidents in 1926.—There were 198 fatal accidents reported in 1926 as compared with 213 in 1925, and 236 in 1924. There was on the other hand an increase of non-fatal accidents, the figures being 30,167 in 1926; 27,563 in 1925; 25,566 in 1924; and 24,184 in 1923. In addition there were about 3,000 minor injuries in which first aid men rendered the necessary service. The accidents in 1926 averaged 2,530 per month or 107 for each working day in the year. Of a total of 30,365 accidents reported, 12,206 of them resulted in three days' time loss or less. Medical aid only was paid for in those cases. In 15,697 other cases both time loss compensation and medical aid were paid.

The lumber industry in its various branches accounted for 43 per cent of all accidents; the construction class 10 per cent; coal-mining, 7 per cent; general manufacturing 6 per cent; navigation and stevedoring, 5 per cent; metal-mining, 5 per cent; railroading, 5 per cent; and all other classes 19 per cent. The fatal accidents were distributed as follows:—lumbering, 49 per cent; railroading 13 per cent; construction, 8 per cent, metal-mining, 8 per cent; coal-mining, 7 per cent, and all other classes 15 per cent.

Time loss compensation paid to workmen amounted to $1,452,591.52, while the medical aid attention, including specialists, hospital care, artificial appliances and drugs, took $678,231.05. To settle 718 permanent total or permanent partial disability cases an additional $883,673.05 was required. Pension awards made in 1926 to dependents of deceased workmen cost $546,929 and funeral benefits took $16,164.41.

The extent to which workmen rely on the compensation provided by the act to carry them across periods of lay-off due to accident is apparent from the fact that last year only 770 of the 30,365 injured were shown to be in receipt of any other benefits. Seventy-one per cent of those who met with accidents give their allegiance as British or Canadian, and 51 per cent were married.

Rehabilitation.—The report notes that the problem of rehabilitation by which a partially disabled workman is to be enabled to secure suitable employment, is receiving the thoughtful and considerate attention which it deserves from an appreciable number of the larger employers in all classes of industry. Yet it deplores the fact that there are certain other large industries which have not, as yet, followed the example set by their more progressive competitors. At the same time it admits the difficulty which the smaller employer of industry encounters in trying to place a disabled workman in a suitable position.

RECEIPTS AND EXPENDITURES FOR VARIOUS INDUSTRIAL GROUPS IN 1926

Industries	Received from employers 1926 (including int.)	Compensation expense and refunds paid	Transferred to reserve
Lumbering, sawmills, shingle and lath mills, pulp and paper mills, creosoting works and logging, railways	$1,017,168 53	$672,871 65	$375,876 66
Coal mining	170,956 13	107,747 03	57,754 36
Metal mining, reduction ores and smelting, quarrying, brick manufacturing, etc	192,542 24	82,782 53	87,129 19
Iron and steel manufacturing, rolling mills, iron or brass products, machine shops, etc	52,206 52	29,836 91	13,838 81
Lighter forms of manufacture, paint, shoes, flour, power laundries, warehousing, etc	99,577 87	56,648 89	45,422 54
Building and construction generally, wooden or steel shipbuilding, pile-driving, dredging, etc	307,905 66	189,585 10	101,007 26
Electric light and power plants, n.e.s.; steam or electric railways etc., n.e.s.; gunworks, n.e.s.; motion picture machines	47,425 16	25,993 39	15,976 75
Navigation, stevedoring, wharf operations	198,626 63	102,265 49	58,941 33
Canadian Pacific Railways and consolidated M. & S. Co. of Canada and their subsidiary companies	213,875 97	98,289 08	58,213 23
Grand Trunk Railways and their subsidiary companies	29,785 56	8,729 00	10,622 72

Municipalities	80,389 13	30,992 99	25,076 12
Canning or packing fish, fishing, fish oil and fertilizer manufacturing, etc	29,654 98	27,490 00	5,834 74
Explosive manufacturing, fireworks, fuses chemicals, n.e.s	1,710 25	421 47	4,743 87
Retail employees (on request) and delivery	56,514 31	29,471 37	25,294 51
Great Northern Railways and their subsidiary companies	1,884 24	2,345 48	367 62
Dominion Government	11,996 50	14,249 04	.....
Totals	$2,637,372 16	$1,541,728 85	$945,074 46

ANNUAL REPORT OF ALBERTA MINES BRANCH FOR 1926

THE annual report of the chief inspector of mines of the province of Alberta, recently received by the Department, contains full statistics of the mining industry for the calendar year 1926. The report is mainly in the form of tables, giving particulars of the coal production and numbers employed in each mine; the number of accidents, fatal, serious and slight; the number and nature of the prosecutions under the Mines Act; the certificates issued; shots fired and missed; use of electricity, and other information.

Under the schedule of the Coal Sales Act of 1923 (LABOUR GAZETTE, June, 1923, page 619), which was re-enacted at the session of 1925, the province is divided into coal areas as follows:—

Ardley	Carbon	Coalspur
Big Valley	Cascade	Crowsnest
Brooks	Castor	Drumheller
Brulé	Champion	Edmonton
Camrose	Clearwater	Empress
Gleichen	Old Man	Sexsmith
Halcourt	Pakowki	Sherness
Highwood	Panther	Smoky River
Lethbridge	Pekisko	Steveville
Magrath	Pembina	Tofield
Milk River	Pincher	Taber
Morley	Prairie Creek	Walhalla
Mountain Park	Redcliff	Wainwright
Nordegg	Rochester	Wetaskiwin
Pakan	Saunders	Whitecourt

Production in 1926.—There were two shale mines and 341 coal mines in operation during the year 1926, of which 30 were opened, eight reopened and 42 abandoned. In addition to the mines abandoned, 43 were closed temporarily, leaving 287 mines in operation at December 31, 1926.

The total amount of coal produced in the province during the year was 6,508,908 tons, of which 1,325 tons were sold for consumption in the province of Alberta; 2,090,086 tons were sold in other provinces in Canada; 48,216 tons for consumption in the United States; 3,706,440 tons were sold to railway companies; 10,344 tons were used for making briquettes; 227,049 tons were used under colliery boilers; 5,631 tons were used by colliery railroads; 68,718 tons were put to stock and 78,156 tons were put on the waste heap.

During the year 1926 the production of coal was 625,514 tons greater than the production for the year 1925, the greatest increase being in the production from the bituminous coal mines, the largest monthly production being in December when 913,842 tons were produced.

The production of domestic coal amounted to 3,160,029 tons; sub-bituminous, 490,371 tons, and bituminous coal, 2,858,508 tons. No anthracite coal has been produced in Alberta since 1923. In the year 1926, 74,559 tons of coal were shipped from Alberta to Ontario as compared with 28,831 tons shipped during the year 1925.

Per Capita Production.—The average number of tons mined per man employed underground during each year since 1919 was as follows:—

	Tons
1919	958
1920	1,055
1921	824
1922	971
1923	893
1924	983
1925	834
1926	816

It is to be noted that in calculating the total *per capita* production of men employed underground, the tonnage mined from stripping pits was deducted, and only the tonnage produced from mines was used.

Number of Employees.—There were 11,365 persons employed during the month of December, 1926, which was an increase of 189 over the number employed during the month of December, 1925.

The number of men employed in the domestic sub-bituminous, and bituminous mines of the province as at December 31, 1926, by classes, is shown in the accompanying table.

EMPLOYEES IN COAL MINES IN ALBERTA ON DECEMBER 31, 1926

—	Domestic	Sub-Bituminous	Bituminous
Below Ground—			
Officials	250	20	133
Hand-cutters	1,079	144	1,440
Machine-loaders	2,507	151	.....
Machine-cutters	477	34	.....
Horse haulage employees	578	31	176
Mechanical haulage employees	125	24	168
Ventilation employees	42	6	32
Roadmakers	144	3	63
Timbermen	184	14	144
Pumpmen	31	.....	18
Other employees	173	60	418
Total below ground	5,590	487	2,592
Above ground—			
Administration	77	14	21
Foremen and clerks	108	19	105
Screenmen and loaders	489	93	169
Enginemen	113	36	40
Firemen	63	26	51
Machinists	38	12	27
Carpenters and masons	37	10	26
Other mechanics	56	9	54
Surface haulage	42	6	37
All other employees	351	251	316
Total above ground	1,371	476	846
Total above and below ground	6,964	963	3,438

Mining Machinery.—The report mentions the addition of mechanical loading apparatus to the mines of the province. An electrically operated conveyor has been installed in the mine operated by the Bighorn and Saunders Creek Collieries, Limited, at Saunders, also a similar conveyor was installed at the mine operated by the Saunders Ridge Coal Company, Limited, at Mercoal. The use of compressed air operated picks in mines in the Crow's Nest Pass has increased, with the consequent reduction in the use of explosives required for coal production.

Prosecutions.—There were 74 prosecutions instituted for contravention of the provisions of the Mines Act, a conviction being obtained in each case. Of these 25 were officials and 49 workmen.

Certificates.—There were issued during the year 242 provisional certificates giving authority to persons to act as overmen at mines which employed not more than ten men, if the person to whom the certificate was granted was the holder of the third class certificate, and not more than five men to be employed if the person was not the holder of a third class certificate. There is also a proviso that all shots fired in the mine must be fired by the person holding the certificate. In addition to the provisional certificates issued during the year there were 21 third class, nine second class, and three first class certificates issued. There was also one mine surveyor's certificate issued as well as two interchanges of first class certificates.

Accidents.—The report includes a table of accidents for 1926. There were 39 fatal accidents, 67 serious accidents, and 119 slight accidents recorded. The number of tons of coal mined per accident is given as 166,398 tons per fatal accident, 97,148 tons per serious accident, and 54,696 tons per slight accident. A large proportion of the accidents, both fatal and non-fatal, occurred in the smaller mines.

Two accidents occurred during the year which caused the loss of more than one life. Both these accidents were caused by explosions of gas and coal dust. The most frequent cause of accident was haulage operations, and the next largest group accidents resulted from falls of rock.

The report remarks on accident prevention precautions. In addition to the regular inspection of mines, all serious and fatal accidents were investigated and all requests were attended to. Samples of mine air were taken from different mines and tested with the Burrell Gas Detector. These samples were forwarded to the Department of Mines at Ottawa for analysis. Similarly samples of coal dust were screen-tested for fineness and samples of coal were put through combustion tests. Regulations going into effect early in the year 1927 require all bituminous mines to be rock-dusted to prevent propagation of explosions.

Canadian Manufacturers' Association

Some account of the proceedings at the recent annual convention of the Canadian Manufacturers' Association was given in the last issue of the LABOUR GAZETTE. The officers elected for the ensuing year were as follows: W. S. Fallis, of Montreal, formerly first vice-president, was elected president. L. W. Simms, St. John, N.B., second vice-president, was elected first vice-president. Thomas Roden, Toronto, was re-elected honourary treasurer. John Burns, of the P. Burns Company, Calgary, and C. A. Pratt, of Medicine Hat, were among those elected to the executive council.

The members of the various committees were as follows:—

Tariff—J. O. Thorn, Winnipeg; F. M. Hatch, Hamilton; R. J. Hutchings, Calgary.

Transportation—E. A. Mott, Brantford, chairman; William Innes, Calgary.

Insurance—P. E. Joubert, Montreal; chairman; T. M. Belsheim, Calgary.

Legislation—W. S. Morden, K.C., Toronto; C. J. Williams, Calgary.

Industrial Relations—L. L. Anthes, Toronto; John Burns, Calgary.

Education—W. H. Miner, Montreal, chairman; C. E. Carr, Calgary.

Commercial Intelligence—T. F. Monypenny, Toronto; L. W. Caldwell, Calgary.

Publishing Committee—W. C. Coulter, Toronto; Harry Hitchings, Calgary.

A convention has been concluded between the United Kingdom and Denmark respecting compensation to workmen for accidents arising out of their employment. The agreement is of a reciprocal nature, providing that workmen who are British subjects and who meet with accidents arising out of their employment in Denmark, and all dependants of such workmen shall enjoy the benefits of the compensation and guarantees to which Danish subjects are entitled by legislation in force in Denmark in regard to the liability of employers and their insurers in respect of such accidents. Similarly Danish workmen and their dependants in Great Britain or Northern Ireland are entitled to the same compensation and guarantees as are extended to British subjects by the legislation in force regarding accident compensation in Great Britain and Northern Ireland.

FINANCIAL STATISTICS OF PROVINCIAL GOVERNMENTS IN CANADA IN 1925

THE Dominion Bureau of Statistics has recently issued its fourth résumé and analysis of provincial government finance, covering the year 1925.

Part I gives an account of the ordinary receipts of the several governments. The combined revenue of the nine provinces of Canada amounted to $132,398,729 in 1925. The amount received by the provinces for their fiscal years ended in 1925, was less than in 1924 by $743.861, due to a change having been made in the fiscal year of Manitoba whereby the public accounts statements for 1925 represented only eight months transactions.

The provincial governments spend considerable money in maintaining the demonstration farms, exhibits and dairy factories, and in enrolment of pure-bred stock for the assistance of the farming population. The revenue derived from the sale of products in the year 1925 amounted to $398,595.

Crown lands, which, except in the three Prairie Provinces are controlled by the provincial governments, produce certain revenues from the sales or leases. In 1925 this revenue amounted to $733,089.

Considerable revenue is derived from mines and mining, particularly in Ontario, Nova Scotia and British Columbia. These revenues are largely obtained from licenses, mining concessions, royalties and taxes. The revenues from this source totalled $2,241,164 in 1925. Of the total for 1925, $365,283 was received in Nova Scotia, $572,425.18 was received in Ontario, and $671,721 in British Columbia.

The total receipts from forests, timber and woods was $13,837,758 in 1925, an increase of over one million dollars over the year 1924.

Game and fisheries brought in a revenue of $1,701,015 derived from licenses, permits, leases and rentals.

Receipts from court fines and legal fees during the year totalled $6,203,106.

Taxation, including the charges imposed upon financial and various other commercial organizations, insurance companies, licenses and permits, recreations and amusements, and other taxations, brought a revenue of $64,-914,300 for the year 1925.

The sum of $1,410,126 was derived by the combined provinces from fees paid by students in the various educational institutions directly maintained by the provincial governments.

From charities, hospitals, and houses of correction, the receipts amounted to $3,272,375, this sum including receipts from paying patients sent to provincial hospitals for insane, and for tubercular patients, and from the sale of products from reformatory farms and workshops.

The earnings from governmental investments and bank deposits, or from revenues accruing from loans and advances to corporations operating public utilities amounted to $5,521,657 during the year.

Refunds and payments made to the provincial governments totalled $1,578,727.

Receipts from the operation of public utilities such as power systems, telephones, highways, bridges, etc., totalled $14,075,138.

Miscellaneous contributions to the provincial treasuries, including civil service pension contributions, deferred payments, grain elevators rentals, miscellaneous grants, Mothers' Allowance Acts, and other general and casual receipts, amounted to $2,760,949.

Part II gives details of the ordinary expenditure of the several provinces during the year. The total combined expenditure being $136,-648,242 for the year under review.

Civil government and legislation accounted for $10,943,383, an increase of over two million dollars from 1924. Civil government includes all salaries, contingencies, and expenses of the various administrative offices of departments, which are commonly known as "inside service." There is a heavy expenditure for surveys and road cnostruction, entailing salaries and expenses of large staffs of surveyors and other employees whose work usually ends on the completion of the particular highway construction on which they are engaged. Legislation includes expenses of elections, referendum charges, salaries and expenses of the ministers of the Crown, salaries, indemnity and mileage of members of the legislative council and of the legislative assembly, also cost of printing, binding and stationery of the legislatures. The salaries and expenses of the various legislative libraries are also included.

The total combined expenditure on agriculture in 1925 was $3,897,191 marking a slight increase over 1924.

Crown lands involved an expenditure of $1,-059,409 in 1925 which is also an increase over the previous year.

Expenditures in connection with mines and mining amounted to $422,252 in 1925, a slight increase over 1924.

Expenditures in connection with forests, timber and woods totalled $2,701,594, a slight increase over the previous year.

Throughout the year $684,130 were expended on game and fishing protection and supervision.

Legal administration involved an outlay of $7,225,133.

Combined expenditure on health and sanitation and the adjuncts they demand amounted to $923,284.

The construction, maintenance and repair of public buildings cost $3,554,460, and other public works cost $3,195,936.

The responsibility for education is distinctly a provincial matter subject however to federal aid in special cases. The effort made in the past twenty-five years to elevate the educational status of the people has involved an increased expenditure by all governments. Superannuation funds for school teachers and inspectors are in existence in Prince Edward Island, Nova Scotia, New Brunswick, Quebec, and Ontario, the total outlay for the year for this purpose being $901,382. In all, a total of $24,784,844 was expended on educational activity in the year 1925. Vocational and technical education was the object of a considerable proportion of the expenditure. Agricultural and industrial education, coal-mining schools, higher commercial schools, technical schools and institutes, and vocational training branches for returned soldiers, were the principal movements fostered by this branch of education. In addition, in the province of Quebec $183,083 were expended on forestry and paper making instruction schools and on polytechnic schools.

The province expended $10,079,062 in 1925 on hospitals for the care of the feebleminded, and $1,618,057 was spent on correctional institutions of various kinds. The care of delinquents, refugees, the maintenance of orphanages, homes for the aged, incurables and benevolent institutions of various kinds accounted for an expenditure of $1,115,620.

Pensions, gratuities and reliefs, involving the expenditure made with the operation of the Mothers' Pension or Allowance Acts in the provinces of Ontario, Manitoba, Saskatchewan, Alberta, British Columbia and Nova Scotia, accounted for an outlay of $3,975,226.

The expenses connected with the administration of regulations concerning amusements amounted to $267,992.

The Dominion Government assumes control of immigration into the country and maintains a large department to supervise its policies. However provincial money expenditure to encourage the settlement of unoccupied land amounted to $452,020. The expenditure on repayments totalled $452,003.

The payments made annually on their public indebtedness by all the provinces combined represents the greatest of all provincial ordinary expenditures owing to the higher rates of interest and increased borrowings of the past few years. In 1925 the sum expended this way amounted to $35,795,926.

Miscellaneous expenditures amounted to $4,565,576.

The total ordinary receipts of all the provinces for 1925 were $132,398,729 and the combined expenditures amounted to $136,648,242.

"HANDBOOK OF LABOUR STATISTICS, 1924-1926"

New Publication by United States Department of Labour

A "HANDBOOK OF LABOUR STATISTICS" for the United States, covering a wide range of information and extending over the years 1924-26, has just been issued by the United States Bureau of Labour Statistics, Department of Labour. This work is on lines somewhat similar to the British "Abstract of Labour Statistics" which was published annually up to 1915 and resumed in 1926. It presents in convenient form the large body of information on labour subjects collected by the Bureau in recent years. Every year the Bureau publishes from twenty-five to thirty bulletins, each representing an original investigation in the field of labour. In addition, the *Monthly Labour Review* (now in its 24th volume) is issued regularly presenting not only the results of current bureau work, but also abstracts of studies and reports on labour subjects made by other authoritative agencies. After a short time the accumulated material becomes so great as to make reference difficult, particularly for those so situated that they have not available a complete file of the Bureau's publications. The new Handbook meets this difficulty by bringing together in convenient form for reference purposes the original material published by the Bureau where this is of sufficiently recent date to be of present-day interest and value. The subjects included relate for the most part to the years 1924, 1925 and 1926, although there has been no rigid exclusion of earlier data.

While the material presented represents in large part the original work of the Bureau of Labour Statistics, this is by no means entirely

*Bulletin No. 439, price $1 per copy.

the case. For instance, the Bureau does not attempt to cover certain fields of interest to labour which are already adequately covered by other official agencies. It does attempt, however, in its *Monthly Labour Review* to follow such of the activities of these other agencies as have a labour interest, and in the preparation of this volume it has drawn upon their work.

The Handbook points out that there are very definite limitations upon the labour statistics available for the United States. Certain subjects of primary interest are covered with reasonable adequacy either by the Bureau of Labour Statistics or by other official agencies. There remain, however, other subjects of possibly equal interest which either are not covered at all or are covered very inadequately, and upon which the available information is very scanty. The various subjects dealt with in the Handbook are arranged alphabetically. Some of the sections are briefly outlined in the following paragraphs.

Apprenticeship.—The first section of the Report deals with apprenticeship. The present century, and particularly the period since the end of the World War, has seen a great revival of interest in this subject. As a consequence, the trade-unions, the employers' organizations and, to some extent, the general public became interested in fostering apprenticeship, and several movements were started with that end in view. The Report summarizes various types of apprenticeship plans which are in operation in the different industries in the United States.

Arbitration and Conciliation.—The outstanding event of 1926 in the field of railroad labour was the passage by the U.S. Congress of the Railroad Labor Act, to give effect to a collective agreement which had been formulated by representatives of the railway companies and of the employees' unions. The new Act abolished the U.S. Railroad Labour Board, which had been functioning for six years under the Transportation Act of 1920, and substituted a radically different type of adjustment machinery comprising boards of adjustment, a board of mediation, boards of arbitration and emergency boards. A summary of the new Act is given in the section of the "Labour Handbook" dealing with arbitration and conciliation, also a summary of the more important arbitration and conciliation proceedings which occurred in 1926 and the early part of the present year.

Cost of Living.—The surveys made by the U.S. Bureau of Labor Statistics showing changes in the cost of living cover 32 cities, in each of which food prices are secured from 15 to 25 merchants and dealers and fuel and light prices from 10 to 15 firms, including public utilities. All other data are secured by representatives of the Bureau, who visit the various merchants, dealers, and agents and secure the figures in person. Four quotations are secured in each city (except in Greater New York, where five are obtained) on each of a large number of articles of clothing, furniture, and miscellaneous items. Rental figures are secured from 400 to 2,200 houses and apartments in each city, according to its population. In the case of 19 of the cities covered, the studies began in December, 1914, and for the 13 other cities, in December, 1917. Information is also given as to changes in the cost of living for the United States as a whole from 1913 to December, 1926, the index number being based on the year 1913.

Employment.—The summary of the sources and general character of employment statistics in the United States given in the Handbook is taken from the recent report of the committee on governmental labour statistics of the American Statistical Association, published by the Russell Sage Foundation under the title of "Employment Statistics for the United States" (New York, 1926), the statistical measurements of employment being obtained from three main sources: (1) Counts or estimates of the number of unemployed; (2) statistics of demand for labour and applications for work as registered in employment bureaus; and (3) periodic counts of the number of persons employed as shown by pay-rolls. This section of the Handbook also includes data on the trend of employment in manufacturing industries, based on monthly returns from more than 10,000 establishments in 54 of the principal manufacturing industries of the United States, these establishments employing over 3,000,000 wage earners.

Industrial Accidents.—This section summarizes the most important records of industrial accidents on a national scale up to 1925, data being given as to accidents in the different states and in various important industries, together with information as to the development of national safety codes etc. The spread of compensation legislation over the several States has led to a new and insistent demand for accident statistics which would shed light on the various problems of compensation administration, in response to which demand there has been an immense accumulation of the raw material of statistics. Unfortunately the States have adopted procedures sufficiently different to make it difficult, sometimes impossible, to combine these records so as to produce a national compilation which would

be of much interest and utility. The primary reason for this is that the State agencies have found themselves so involved in the multiplied problems of compensation that they have been quite unable to give adequate attention to the really more important problems of accident prevention. It will be necessary for all States ultimately to grapple with the problem of accident prevention.

Industrial Diseases and Poisons.—Summaries are given in this section of the Handbook of the most important articles and bulletins which have been published by the Bureau of Labour Statistics on their studies of special hazards connected with industrial processes and of the effects of poisonous substances used in different industries. Studies of over forty hazards are referred to in the present section.

Insurance and Benefit Plans.—In the United States the protection of the working people against various industrial and physical hazards, such as sickness, accident, unemployment, old age and death, has been made a matter of State legislation in any important degree only in the case of industrial accidents. The protection of the workers against the other contingencies of life and employment, if taken care of at all, is left entirely to voluntary action, either through actual insurance or through benefit plans of various kinds. The Handbook gives a very brief summary of the present status of certain of the more important phases of this subject in the United States.

Labour Organizations.—The basic data in this article are taken from Bureau of Labour Statistics Bulletin No. 420: Handbook of American Trade-unions, which is a compendium of the organization, form of government, and jurisdictional boundaries of existing American trade-unions, and in addition gives, for each union, a brief account of its origin and history, an outline of its benevolent activities, and the most recent and accurate membership figures obtainable. The study covers all bona fide labour organizations functioning nationally, numbering 156. Of these 107 are affiliated to the American Federation of Labour and 49 function entirely outside the Federation.

Minimum Wage.—In the United States legislation fixing a minimum rate below which employers may not go in the payment of wages to their employees has been limited to the employment of women and minors. Minimum wage legislation originated in the United States with the Massachusetts law of 1912 and spread rapidly thereafter. By 1923 legislation of this character had been enacted in Arizona, Arkansas, California, Colorado, District of Columbia, Kansas, Massachusetts, Minnesota, Nebraska, North Dakota, Oregon, Porto Rico, South Dakota, Texas, Utah, Washington and Wisconsin. In two other States—Louisiana and Ohio—constitutional amendments authorizing such legislation were adopted but no legislation was enacted. With the exception of the Massachusetts law, all these laws were compulsory in character, and in consequence all were adversely affected by a series of court decisions, beginning in 1923, when the United States Supreme Court held unconstitutional the minimum wage law of the District of Columbia. A number of decisions are quoted in the Handbook as strongly pointing to the conclusion that all laws of compulsory nature are practically nullified as regards women by the rule laid down by the Supreme Court, at least so far as penal enforcement is concerned. The Handbook states that in Massachusetts, where as already noted the law is not compulsory, minimum wage decrees have been very generally observed by employers. A list is published of the rates in force for women workers in a number of industries.

In addition to the foregoing subjects, many others are included in the Handbook, such as: child labour; convict labour; co-operation; housing; immigration and emigration; inventions by employees; the negro in industry; occupational distribution of population; old-age pensions and relief; prices; productivity of labour; sickness statistics; strikes and lock-outs; labour turnover; unemployment insurance and stabilization of employment; vocational education; women in industry; workers' education; workmen's compensation; wages and hours of labour, etc. The volume will thus be found to be a very valuable work of reference.

The Vancouver City Council recently rescinded a section of the Plumbing by-law which required plumbers to pass an examination in the rudiments of their trade before working at it in the city. The city architect in recommending the deletion of the section explained that many capable workmen were unable to express themselves in writing and became unnerved at an examination. Work of any magnitude is now laid out at the shop under the supervision of the foreman, and the responsibility of fulfilling the plumbing regulations rests on the employer rather than on the employee.

NOTES ON LABOUR UNION ACTIVITIES

Federation of Catholic Workers

THE sixth annual congress of the Federation of Catholic Workers of Canada was held in Lachine, Quebec, July 16-20, 1927, there being present a hundred and thirty delegates, representing ninety-six syndicates. The annual report of the executive board was read and adopted with certain amendments. Approval was given to a tentative political platform to be prepared by the executive board in co-operation with the central bodies. According to the financial report for eleven months the receipts were $8,910, and the expenditure was $7,900; the membership of the Federation was given at 27,000.

Among the resolutions adopted were those following:

Requesting the federal government to amend the Fair Wage Act so that the wage schedules shall be fixed on the basis of the minimum rates established by the syndicates of the districts;

Asking the provincial government to grant no more charters for closed cities, and to amend as soon as possible the charters already existing;

Requesting the Provincial Government to establish a superior labour council in the Province of Quebec;

Asking the provincial government to amend the Firemen and Policemen's Arbitration Act so as to provide for its compulsory application and sanction in the case of all disputes between civic employees engaged in public services and municipal councils;

Recommending the prohibition of paint-spraying machines unless workers are equipped with all necessary apparatus and accessories;

Requesting the provincial government to buy for distribution to school children only books written by Canadian authors and printed in Canada;

Recommending that fees for court witnesses be increased to five dollars per day;

Authorizing the executive board to see that insurance for organized workers is adopted as soon as possible;

Recommending that steps be taken to compel the management of the Roberval & Saguenay Railway to recognize the National and Catholic Syndicate of Bagotville;

Requesting the attorney general of the province to appoint inspectors in industrial centres for the purpose of bringing Sunday work under the scope of the law;

Recommending that the provincial government provide penalties to compel manufacturers to comply with the requests of factory inspectors;

Urging that Catholic workers be allowed "time off" to fulfil their religious duties on Church holidays;

Recommending the double shift system for firemen;

Requesting that all street railway companies operating at least forty miles of track be placed under the jurisdiction of the Railway Commission;

Asking for an allowance of twenty-five dollars for every living child born after the fifth birth in a family;

Urging the provincial government to put into effect the Old Age Pensions Act;

Requesting a speedier application of the Women's Minimum Wage Act;

Calling upon the provincial government to prepare an official list of fair wages for each district, such schedule never to be lower than the one prepared by the officials of the federal government for the same district;

Recommending that no grants be made in connection with any building except where a fair wage clause is in the contract similar to the one inserted by the federal government in its contracts;

Urging the appointment in the textile industry of an inspector familiar with the work;

Requesting that all appeals to the Privy Council be suppressed by law, and that the judgments of the Supreme Court of Canada be made final in all respects;

Asking the Canadian government to grant ship contracts to Canadian companies only;

Recommending the simultaneous publication of the English and French editions of the Annual Report on Labour Organization in Canada;

Instructing the Executive Board to urge the establishment of an unemployment insurance plan in Canada;

Thanking the Federal Government for having provided for the registration of the union labels, and requesting the appointment of a standing committee on union labels;

Asking the provincial government to prevent the establishment of trusts in the province;

Requesting the provincial government to amend the act so as to forbid the inclusion in any lease of a clause by means of which the lessee recognizes as distrainable household articles which are not distrainable by law;

Seeking amendments to articles 3837 and 3837A* of the Revised Statutes of the Province (Quebec Industrial Establishments Act) relating to hours of labour, and the introduction at the next session of a bill for the purpose of adding a paragraph to article 3838 of the Revised Statutes as regards the unjustified dismissal of employees;

Requesting the Canadian government to take all necessary steps to obtain from the Newfoundland government the restitution to Quebec of the Territory of Labrador;

Asking the provincial government to grant family allowances to its employees such as are granted by nearly all European governments;

Thanking the religious authorities for their encouragement of the Catholic syndicates;

Requesting the provincial government to make the necessary grants for the maintenance at Hull of night courses on sewing and cooking for women, as well as for the establishment of an apprenticeship school at Chicoutimi;

Urging upon the federal government the advisability of passing as soon as possible a Family Allowance Act applicable to the whole of Canada;

Requesting the suppression of all motion picture advertisement bills;

Asking all the governments as well as religious and civil authorities to do their utmost to go on with their contracts during the dull season.

Among the resolutions referred to the executive board were those: (1) Requesting stricter regulations on immigration; (2) Asking for the immediate formation of a Federation of Students' Clubs; (3) Recommending that provincial employment offices be brought under the scope of the fair wages clause.

The officers elected were: President, P. Beaulé, Quebec, Que.; first vice-president, O. Filion, Montreal, Que.; second vice-president, A. Brulé, Sherbrooke, Que.; general secretary, F. Laroche, Quebec, Que.; treasurer, J. Comeau, Lachine, Que.

Ontario Provincial Council of the United Brotherhood of Carpenters and Joiners of America

The 16th annual convention of the Ontario Provincial Council of the United Brotherhood of Carpenters and Joiners of America was held in Niagara Falls, Ontario, June 23-25, 1927, with twenty-three delegates present from various parts of the province, together with a number of fraternal delegates who were seated with voice but without the right to vote.

In the report of the executive council reference was made to the apprenticeship problem, and the members were urged to give every assistance and encouragement to the apprentice. The membership was called upon to put forth every effort to obtain a still further increase in their numbers corresponding with the upward tendency in the building industry. Regret was expressed that increases in rates of wages had not been brought about in all localities, but at the same time it was shown that the membership in several localities had been successful in having wages increased ten cents per hour. Mention was also made in the report of the poor state of organization among inside woodworkers, and it was urged that further efforts should be made to bring these men under the banner of organized labour. The report recommended that an agitation should be started to educate the people in general, and especially the membership, on the necessity of having the Ontario legislature adopt the Old Age Pension scheme so that it could be put into operation with the least possible delay.

According to the report of the secretary-treasurer, there are three district councils and forty-one local unions, with a membership of 2,650, under the jurisdiction of the provincial council. The increase in membership for the year was 454.

Mr. Tom Moore, president of the Trades and Labour Congress of Canada, in his address touched on various subjects, such as: (*a*) Old Age Pensions; (*b*) Immigration; (*c*) Union Label; (*d*) All-Canadian Congress of Labour. President Moore also referred to the coming convention of the Trades Congress at Edmonton and urged upon all locals to have representatives present.

* Revised Statutes of the Province of Quebec, 1925 (Chap. 182, sec. 15) provides that no boy of less than eighteen, and no girl or woman shall be employed in manufactories, works, workshops, workyards, and mills of any kind for more than 10 hours in one day or 60 hours in one week. The day is not to start before 6 in the morning and there must be an hour for meals at noon.

Revised Statutes of the Province of Quebec, 1925 (Chap. 182, sec. 16) provides that no boy of less than eighteen and no girl or woman shall be employed in cotton and woollen factories for more than 10 hours in one day or more than 55 hours in one week. An hour must be given at noon for meals, and the day must not begin before seven o'clock in the morning nor end after half-past six o'clock at night.

General Vice-president Lakey gave a general outline of the work carried on by the head office. He informed the delegates that the Brotherhood of Carpenters and Joiners of America was now the largest organization affiliated with the American Federation of Labour, having passed the membership of the United Mine Workers of America some months ago.

The following resolutions were adopted:—

Recommending to the Ontario Workmen's Compensation Board that some one be empowered, preferably the building inspectors in industrial centres, to enforce the Act in relation to the protection of workmen both before and after an accident;

Asking for legislation providing that where a strike exists and the employer advertises in the press for labour he shall be required to set out in the advertisement that there is a strike in progress;

Favouring putting the Home and Pension Scheme into operation as soon as possible, by, if necessary, increasing the monthly *per capita* tax;

Recommending that no paper be accepted by the workers as a labour paper which has not received the endorsation of the Trades and Labour Congress of Canada or of the American Federation of Labour.

The officers elected were: President, Fred. Hawes, Hamilton, Ont.; Vice-presidents, John H. Fisher, Kingston, Ont., J. B. McSween, Niagara Falls, Ont., Thomas Brooks, Windsor, Ont.; Secretary-treasurer, T. Jackson, Toronto, Ont.

Ottawa was selected as the convention city for 1928.

Brotherhood of Locomotive Engineers

The fifth triennial convention of the Brotherhood of Locomotive Engineers was held in Cleveland, Ohio, June 6 to July 21, 1927, with about 900 divisions represented. The bulk of the convention's time was devoted to a consideration of the financial affairs of the Brotherhood. Three times as many resolutions were received at this convention for changes in the laws of the organization, as were ever received at any prior convention. A number of important changes in the laws of the brotherhood's insurance association was decided upon and will become effective as at October 1 of this year. Certain offices of the organization were abolished, while an altogether different set-up of officers were elected to that established in 1924. Alvanley Johnston was elected by acclamation as head of the brotherhood under the title of grand chief engineer. The new chief was born in Ontario but first entered the railway service on the Great Northern at Grand Forks, North Dakota. R. H. Cobb of Kenora, Ont., was re-elected Assistant Grand Chief Engineer.

Dominion Mail Porters and Chauffeurs' Association

The convention of the Dominion Mail Porters and Chauffeurs' Association, which was attended by delegates representing many local branches, was held in Hamilton, Ont., July 18-19, 1927, with past president I. A. Brown presiding.

One of the first subjects to be discussed was salary revision, and it was the general consensus of opinion that the revision was very unsatisfactory. The convention went on record as favouring a distinction being made between mail dispatchers and postal helpers. Efforts are to be made to better working conditions in many post offices, as well as securing better equipment. The delegates strongly favoured a Dominion wide organization of postal workers.

The officers elected for 1927-1928 were: President, William J. Mullen, 418 Preston St., Ottawa, Ont.; Vice-president, James Baird, 11 Head St., Hamilton, Ont.; Secretary, B. B. Davis, 740 Albert St., Ottawa, Ont.

Dominion Railway Mail Clerks' Federation

Delegates from all parts of Canada met in Ottawa on May 31, 1927, to attend the biennial convention of the Dominion Railway Mail Clerks' Federation, which was presided over by President I. V. Dexter, Halifax, N.S. In his address Mr. Dexter referred to the work of the executive during the last two years, giving in detail the work that had been done in connection with the salary question. The president was optimistic over the present situation, stating that "the postmaster general was sympathetic to our position". Each of the vice-presidents and the secretary-treasurer presented reports, each dealing with the work of their respective offices during the past two years. Mr. Collins, president of the United States Railway Mail Association, addressed the opening session of the convention.

Hon. P. J. Veniot, postmaster general, in his address to the delegates referred to the subject of re-classification of the members of the federation and promised early and favourable consideration.

One of a number of amendments to the constitution increased the *per capita* tax from $1.50 to $1.75 per annum.

Among the resolutions adopted were the following:—

Recommending the elimination of memory tests in case examinations;

Favouring the amending of the Superannuation Act to provide for the minimum return to each contributor of the amount of his contribution irrespective of the length of service or the conditions of retirement.

Asking that superannuation be based on the average salary rate for the past three years;

Recommending that one relieving clerk be not asked to relieve more than ten clerks;

Authorizing a referendum vote of the membership to ascertain if a full time paid organizing secretary is desired;

Pressing for the early establishment of Whitley Councils or Civil Service Councils on which the civil service would have adequate representation;

Recommending a maximum salary for railway mail clerks of $2,280.

The officers elected were: President, J. P. O'Farrell, Quebec, P.Q.; First vice-president, W. S. Osborne, Winnipeg, Man.; Second vice-president, W. MacKerracher, London, Ont.; Third vice-president, A. A. Overend, Vancouver, B.C.; Secretary-treasurer, H. Clarke, Calgary, Alta.

Toronto was chosen as the next convention city.

NOTES ON INDUSTRIAL SAFETY AND HEALTH

Proposed British Columbia Safety League

THE formation of a British Columbia branch of the Canadian National Safety League was agreed to by a meeting of representative citizens of Vancouver held in July. A plan of action was formed and directors appointed to carry it through. Mr. E. S. H. Winn, chairman of the Workmen's Compensation Board, after remarking on the province's accident figures, urged the formation of a Branch of the Safety League as an economic necessity. (An account of the activities of the Workmen's Compensation Board in British Columbia in 1926 appears on another page of this issue).

Mr. J. F. H. Wyse, general manager and secretary-treasurer of the Canadian National Safety League, reviewed the work of the League since its inception in 1914. He described its objects as being fourfold, namely: to guard children from automobiles, streetcars and trains; to enlist the aid of schools, churches, and other organizations in the work of teaching safety precautions; to minimize factory accidents; to co-operate wherever possible for the prevention of needless loss of life and property through fire.

The finances of the national organization are obtained by voluntary contribution and by annual grants from the provincial and federal governments. Its purpose is to co-ordinate the work of the various provincial leagues, which at the present time include the Ontario Safety League; the Province of Quebec Safety League; the Maritime Safety League (covering the provinces of Prince Edward Island, Nova Scotia and New Brunswick); and the Manitoba Safety League. The national body carries on general safety work throughout the Dominion, even in those provinces where no provincial league exists, and in so far as they can be reached from general headquarters in Toronto. The annual report of the Canadian National Safety League for 1926 was reviewed in the LABOUR GAZETTE, March, 1927, page 288.

Province of Quebec Safety League

The Province of Quebec Safety League, which up to the present time has been practically a municipal organization with its activities centred in the large communities, has enlarged its scope of action by the formation of an industrial section. The marked success attained by this organization in the elimination of hazards both in certain factories and on the streets ensured its extension into the general industrial field. The advisory board of this industrial section was chosen from prominent manufacturers in Montreal.

The *Pulp and Paper Magazine* regards the formation of the industrial section of the Safety League as a step toward more effective organization of safety work throughout the Province. The writer goes on to say: "It is understood that the League intends to classify the various industries in Quebec into some thirteen or fourteen branches, all of which will eventually be represented on the advisory board. The proposed program of work includes the following seven headings: Interest of executive officials in accident prevention; protection of the known hazards of the industries; careful selection of the working force;

intelligent supervision of every worker; adequate first aid; safety education for all ranks, and good plant housekeeping."

Mr. Arthur Gaboury of Montreal, who will be the manager of the new section of the league, under the supervision of the chairman Allan M. Mitchell states that the committee will conduct its work on the principle that "Prevention is a benefaction, while compensation is but an apology." The committee will offer to employers experienced assistance and will co-operate with them to direct and systematize the matter of accident prevention in their plants.

Suggestions for Accident Prevention Measures

Mr. A. O. Dawson, LL.D., in a paper read before the Safety Convention of the Industrial Accident Prevention Associations of the Province of Ontario, recently held at Toronto, suggested certain methods of accident prevention, which may be summarized as follows:—

1. In each plant there should be a "foreman's school" in which men could be trained in safety methods.
2. In each factory there should be first aid courses and meetings for the purpose of safety instruction.
3. In towns where there are several local industries, sectional meetings should be arranged in order to enable the employees, by mutual discussion, to discover the value of safety instruction.
4. Inter-plant contests should be organized to encourage competition.
5. Monthly news letters should be issued by the safety prevention associations in order to keep the necessity of safety precautions before the employee.
6. The attention of employees should be drawn to the fact, that, since many kinds of machinery are equipped with safety devices, many accidents are due only to the carelessness of operatives.

Accidents in Metallurgical and Coal Mining Industries in the United States

A better safety record in the metallurgical industry (except the steel industry and blast furnaces) in the United States is indicated in a report on accidents in this industry during the calendar year 1925 issued by the United States Bureau of Mines. The death rate from accidents was reduced from 0.87 per thousand 300 day workers in 1924 to 0.66 per thousand in 1925, and the non-fatal injury rate was reduced from 131 to 116 per thousand employees.

The degree of industrial activity as shown by full time and part time employment is mentioned as one of the factors affecting the safety of employees, the injury rates being lower for plants that were active 300 days or more in the year, than for those whose period of operation was 100 days or less. The accident rate for smelters operating eight hours per day was shown to be less than those operating 9 or 10 hours. In the ore dressing industry, on the other hand, the 9-hour plants showed the lowest accident rate. The report suggests however that local conditions such as variation in type of work, character of personnel, and possible incompleteness of some accident reports, may have had an important influence on this favourable record of the 9-hour plants.

A bulletin issued by the Bureau of Mines concerning coal mining fatalities in the United States in 1925 shows that the coal supply was obtained at a lower cost in human life than in the preceding year. The number of deaths in 1925 was 2,230, the death rates for bituminous mines being 4.79 (estimated) as compared with 5.37 for the previous year, and the rate for anthracite mines 3.87 (estimated) as compared with 3.39 in 1924. The death rate per million ton was 3.50 for bituminous mines as compared with 3.93 in 1924, and the corresponding rate for anthracite mines was 6.44 as compared with 5.64.

During 1925 there were 14 major mines disasters; that is, accidents causing the death of five or more persons. One of these was a mine fire causing the death of nine men. The remaining thirteen were explosions of gas or coal dust causing the loss of 261 lives.

Compulsory Sickness Insurance

An article in the *International Labour Review* for June, 1927, throws some light on the present status of compulsory sickness insurance. A brief historical survey reveals the fact that Germany was the first country to make sickness insurance compulsory for industrial workers. This was in the year 1883, and two years afterward, in 1885, the scheme was extended to commerce, and in 1886 to agriculture. The example of Germany was followed rather slowly by a few industrial states. Austria and Hungary in 1888 and 1891 introduced the system of compulsory sickness insurance applying to wage earners in industry, transport and commerce. At the beginning of the twentieth century development became more rapid. Luxemburg in 1901, Norway in 1909, Serbia in 1910, Great Britain in 1911, and Roumania and Russia in 1912, all accepted the principle of compulsion.

The movement of legislation, held up during the war, was resumed with fresh vigour on the conclusion of peace. The European States created by the Peace treaties have endeavoured to perfect the insurance schemes which they have inherited. Czechoslovakia in 1919, Poland in 1920, Austria in 1921, and the Serb-Croat-Slovene Kingdom in 1922 made sickness insurance compulsory for all wage earners. Bulgaria, which had adopted the compulsory principle in 1918, applied it to all classes of workers in 1924. Portugal in 1919 and Greece in 1922 likewise accepted the principle. Finally, France after four years of investigation is on the point of establishing a vast scheme of compulsory insurance against sickness, invalidity, old age, and death. A Social Insurance Bill was drawn up by the French Government in 1920, and was introduced in the Chamber of Deputies early in 1921. After a number of important amendments it was passed by that House in April, 1924, and was then submitted to the Senate and underwent examination and considerable amendment at the hands of the various committees concerned. The Bill is still under discussion in the Senate. The risks covered by the Bill are sickness, maternity, invalidity, old age, death and unemployment, and it applies compulsorily to all wage-earners of both sexes whose total annual remuneration from all sources, excluding family allowances, does not exceed 15,000 francs. Foreign wage-earners genuinely and permanently domiciled in France are insured in the same way as French workers, but do not receive allowances for dependants, or the increases of benefits intended to bring the amount up to the guaranteed minimum rate during the period of transition.

States outside Europe have maintained a waiting attitude with regard to compulsory insurance. After some study Japan in 1922 and Chile in 1924 set up compulsory systems. The governments of Brazil and South Africa have appointed commissions to study schemes of compulsory social insurance, and Brazil is preparing a Labour Code which will include compulsory sickness insurance. North America alone seems to hold aloof from the acceptance of the compulsory principle in its entirety. It seems, however, as though even here there is a growing tendency to embrace it, manifested by legislation which makes certain insurance compulsory. In British Columbia in 1926 the provincial executive of the Trades and Labour Congress of Canada laid before the government the proposal that all automobile owners be compelled to carry insurance against physical or property injury to others. In 1925 the Vancouver Trades and Labour Council proposed a health insurance scheme to the provincial government which seemed to preface another advance towards the acceptance of the compulsory principle.

The article contains an examination of the fundamental aspects of the problem. The writer remarks on the tendency to widen the scope of sickness insurance so as to embrace all wage earners without restrictions as to the nature of the occupation or undertaking, or as to the character and duration of the employment. Along with this extension of compulsory insurance goes a corresponding extension in benefits. Insurance is no longer confined solely to meeting the immediate needs arising from incapacity. Compensation has become the secondary and prevention and restoration the primary function of any insurance system designed to economize human energy. Little by little the idea of compensation has yielded to a wider and more genuinely social conception which makes the restoration of the patient the first consideration. Benefits intended to restore the health of the patient are beginning to overtake cash benefits, consequently drugs, medical aid, hospital and dental treatment have taken their places in the schemes of rehabilitation, and the care of the injured person has replaced the former object of merely saving him from starvation.

The sharing of the cost of sickness insurance furnishes a problem difficult of solution. Numerous theories have been advanced as to who should pay the cost. In practice however the money necessary to work sickness insurance is provided by the insured persons, employers, and public authorities. The impossibility of measuring exactly the share of responsibility for the occurrence of the event insured against explains the difficulty which besets the solution of the problem of distribution of cost.

Compulsory sickness insurance is an endeavour to protect the health of the working class family and to maintain the worker's capacity to produce. As such it is an element both important and necessary in the proper economic and social organization of communities.

Industrial Fatigue Research in Great Britain

The Industrial Fatigue Research Board of Great Britain recently published their seventh annual report, outlining their work in 1926. This board was established in 1919 as a branch of the Medical Research Council, its object being the special study of industrial health problems and the promotion of better knowledge of the relations of hours of labour and of other conditions of employment, in-

cluding methods of work, to functions of the human body, having regard both to the preservation of health among the workers and to industrial efficiency; and to take steps to secure the co-operation of industries in the fullest practical application of the results of this research work to the needs of industry.

Rest Pauses.—Among the general problems studied by the Board in 1926 the question of the relation of hours of labour to the health and efficiency of the employees was one of the most important. The introduction of rest pauses in a working spell of four and a half or five hours was found to be much appreciated by the workers, and also to react in such a way as to bring about a slight but genuine increase in output, notwithstanding the loss of actual working time. A comparative study of shifts of equal length, but extending over different hours of the day, has been completed and its result will be published shortly.

Personal Susceptibility to Accidents.—Another problem of general interest and importance investigated by the Board during 1926, and in fact since its inception, is that of accident causation. The earliest investigation in 1919 suggested that personal susceptibility may be a much more material factor in accident causation than is generally supposed. It is pointed out that in regard to accidents all workers do not start equal. Some are more liable to suffer casualties than others under the same conditions of risk. The report suggests that the bulk of accidents may occur among a limited number of individuals having a special personal susceptibility. Consideration of these conclusions leads to the important practical inference that the number of industrial accidents might be greatly reduced by the initial exclusion of a comparatively small number of workers from risky occupations. To establish the truth or falsity of this hypothesis the Board applied selected psychological tests to groups of workers numbering 650 in all, and, though no definite conclusion can be drawn as yet, due to the fact that additional data remain to be procured, present indications are that the tests will establish the truth of the personal susceptibility theory.

Another factor in accident causation is the apparent relation which exists between youth and accident rate. Investigation reveals an association between the number of accidents and the number of sicknesses incurred by a given individual, pointing to the existence of a factor common to both. The relation of environmental conditions to accidents in coal mines was investigated, and some evidence was found that the accident rate is higher in the hotter seams.

The design of machinery was the subject of a preliminary investigation during the year, and it was found that slight adjustments in the operating parts of machines may often lead to greater comfort and ease for the operator. With this object in view a further survey of machines in common use was made and a report is now in course of preparation.

The Board's activities on vocational guidance were confined to an endeavour to demonstrate its possibility rather than to attain results of practical value. Before this can be possible much further research is needed; children must be tested and placed in occupations; their after-histories must be compared with those of children who have not benefited by the test; a comparison should then furnish a clear indication of the value of vocational guidance. The Carnegie United Kingdom Trust has made provision for a continued study of vocational guidance, and this branch of industrial psychology is expected to make great strides in the future.

The report comments on the attitude of industries toward the scientific study of the human factor in industry. Industrialists have naturally been inclined to devote their attention to the improvement of conditions by recognized practice, rather than by the application of methods which must necessarily be largely experimental. It is important to note that the changes suggested in the Board's reports have one significant characteristic, namely, that improvement of the conditions or methods of work for the worker means an increase in his output (excepting in cases wherein production depends wholly on the machine). Accordingly the introduction of such methods can never be a matter of conflict between the interests of the employer and the worker because these are both affected in the same direction. It is a notable fact that whenever an experimental change, advised by the Board, has proven successful, the new conditions have usually been permanently retained.

The Board recommends the formation of small committees of employers and workmen in the more important industries, in order to discuss and submit for investigation problems affecting the human factor in industry. It would be their work to consider proposals submitted by such bodies as the Board and the National Institute of Industrial Psychology, and to take steps to apply experimentally such methods as are regarded as appropriate to the industry concerned.

Increase in Industrial Accidents in Germany

The *Industrial Safety Survey*, published by the International Labour Office, Geneva, contained an article by Dr. Eibel, of the Imperial Insurance Office, Berlin, which discusses the reports of the Industrial Accident Associations on the prevention of accidents for 1925. The writer notes a marked increase in the number of industrial accidents as recorded by all the associations, and suggests various reasons for the increase. These reasons are similar to those given to explain the corresponding increases noted in Canada and the United States (LABOUR GAZETTE, June, 1927, page 593). Dr. Eibel attributes the increase to the following causes:

"The extension of compulsory insurance to accidents happening on the way to and from work; the inclusion of occupational diseases in accident insurance, and more frequent changes in the staffs of undertakings, which as a result of the uncertain state of business, are frequently compelled to reduce their staffs or to stop work, and, on the resumption of work, to engage workers strange to the undertaking, with whom the danger of accident is appreciably greater than with persons familiar with the work. In many undertakings such changes in staff are estimated by the association concerned at from 300 to 400 per cent of the total number employed. Increase in competition due to the unfavourable economic situation, involving as it does the most exacting demands on men and machines, may also have contributed to the increase in accident figures.

"In many cases," Dr. Eibel continues, "lack of foresight, incapacity, and unskilfulness on the part of the workers is indicated as a cause of accidents. Up to a certain point it is impossible to exonerate the workers from such responsibility. There is, however, at present a lack of reliable information as to the extent to which accidents have been occasioned by circumstances beyond the control of the workers; insufficient lighting, fatigue, mental depression, etc. In numerous cases the owners of undertakings are found to be partly to blame for industrial accidents, where they have allowed insured persons to break regulations, have failed to give the workers the necessary guidance and instructions, or have neglected to prescribe protective measures. It is chiefly the small employers who lay themselves open to such censure."

Dr. Eibel goes on to state the great importance attached by the Accident Associations to the careful special training of persons responsible for the management of undertakings, and, also to the continual inspection of undertakings with the object of improving accident prevention measures. Co-operation of the workers and employers is fostered in Germany by means of lectures, training courses, lantern slides, films and posters, all of which are destined to keep before the worker's mind the principles of safety by which accidents are to be avoided.

Regulation of Lead Paint in Great Britain

Draft regulations under the Lead Paint (Protection against Poisoning) Act of 1926, were submitted recently by the British government to the Painters and Decorators' Joint Industrial Council, and also to organizations of employers and employees in this industry. (An account of this Act was given in the LABOUR GAZETTE, July 1926, page 693). The regulations affected the shipbuilding, engineering, iron and steel industries, and the railway companies. They asked that certain workpeople who were only occasionally employed on painting should be exempt from the regulations, and also that the prohibition of the dry rubbing-down process should not apply to paint on iron or steel.

It was explained that lead poisoning was caused by inhalation of dust or by absorption into the system. Prohibition of the use of lead paint was not at present practicable, and so the regulations were designed to suppress dust by prohibiting the rubbing down or scraping by a dry process of any surface painted with lead paint, and also to prevent or minimize the absorption of lead into the system by regulations enforcing cleanliness and care.

A complete agreement was reached by the government representatives and the joint council in regard to the regulations.

American Association for Old Age Security

A group of American sociologists, religious leaders and economists has recently constituted the "American Association for Old Age Security, which states the following as its object:—

The aim of the American Association for Old Age Security is to promote, through legislation, adequate provision for the dependent aged in the United States. While the Association will leave the decision as to the exact nature of the pension or insurance system to be adopted to individual States, it hopes to be able to furnish legislators the necessary guidance and information in the working out of the soundest and most expert pension plan. It will draft carefully worked-out legislation for introduction in every State in the Union, and will use all its energies in promoting such legislation until a constructive program of care for the aged has been provided.

RELATIONSHIP OF JOB AND SCHOOL IN APPRENTICE TRAINING

THE following extracts are taken from an article by F. S. Rutherford, assistant director of technical education, Ontario Department of Education, which appeared in the *Contract-Record and Engineering Review* of June 1, 1927.

It is no longer necessary to call attention to the fact that apprentice training on the job in Ontario is practically a thing of the past. Its failure to meet industrial requirements is everywhere evident. Unskilled workmanship is the result of the modern spirit of bulk production. We have been content to secure our skilled workers through immigration from countries where adequate training was still available. Not only has this source been limited, but due to after war conditions, immigration policies have curtailed this supply. It is to be noticed also that the public have begun to realize that trade opportunities as well as professional opportunities should be open to Canadian boys who are being turned out from our own schools. These boys should have the opportunity to enter the trades and become our skilled craftsmen.

Apprentice training in the building trades at present in Ontario is almost non-existent. The cause for this is attributed to various reasons which depend largely upon the source from which the reason comes. Some of these reasons may be stated as follows:

1. Boys are not willing to enter trades, having been trained for "white collar jobs".
2. Organized labour restricts the number of apprentices in each trade.
3. Employers are not willing to train apprentices for fear of losing them to some competitor when trained.
4. The general contractor covering all branches of the building trades does not wish to take time for the training of apprentices, and has often a lack of continuity of work which would make it impossible to complete an apprentice agreement requiring continuous employment.
5. Journeymen have no time for training apprentices on the job.

No doubt some truth is contained in these reasons for the failure of the system, but a study of the reasons points definitely to the necessity for closer co-operation between the employer, the employee, and the educational authority if a satisfactory solution is to be evolved.

Function of the Technical School.—The vocational and technical schools have been organized in most of the towns and cities of the province to train boys for industrial pursuits. It is recognized that this training, however good, is not complete without actual experience by the learner on the job. The element of time does not enter into school work since the teacher's aim is to devlop knowledge and skill rather than speed. These schools have been established by the local communities, assisted by generous aid from federal and provincial funds both for capital and maintenance charges. The industrial or vocational committees which control the building and operation of these schools are composed of certain members of the school boards together with representative employers and employees. These schools are therefore ready and waiting to assist in the training of apprentices within the scope of their respective fields. It should be borne in mind, however, that a technical school does not aim to turn out journeymen, nor does it propose to give training in practical skill only, but to turn out boys who have received a thorough training in the essentials of a general education, and at the same time to furnish a special training in the subjects and operations which are fundamental to the trades and industries in which they expect to become employed. Having taken the regular and special training in such a school, a boy, after completing sufficient time under trade conditions in the industry, should not only become an expert workman, but should have a training which would fit him for a position as foreman and eventually superintendent.

The trade teachers in technical schools are chosen from the ranks of skilled journeymen in the respective trades in order that they may be able to impart information to their pupils which will meet the requirements of the trade when the pupils enter industry.

The technical schools may be said to effectively answer the charge that boys are trained for the white collar jobs. In the experience of the writer, there are hundreds of boys in the industrial courses in Ontario technical and vocational schools who are anxious and willing to take their place in the ranks of industrial trade workers, and in many cases have definitely decided the trade for which they feel they are best adapted and for which they have special aptitude.

Construction Apprenticeship Council.—The apprenticeship plan of the Construction Apprenticeship Council of Ontario is an attempt to get together those organizations interested in the training of apprentices. In the construction industries the employer and em-

ployee both appear to see the need for action and have been able to agree upon a definite scheme. This plan provides for continuous employment for the apprentice over a period of four years with a period of instruction in school for ten weeks during the first two years during which period the apprentice is to be paid an allowance for each day's attendance.

Attitude of Organized Labour.—It is pleasing and encouraging to note the attitude of organized labour towards the training of apprentices. The representatives of the various organizations are unanimous in their willingness to co-operate in any scheme which will provide a satisfactory type of training and thereby produce well-trained journeymen. It is to be recognized at this point that organized labour has taken a very active place in the development of the present vocational school, and it is largely due to their efforts that the federal government saw fit to assist the provinces in promoting a more practical type of secondary education. In this connection, it is interesting to note the attitude of the New York State Federation of Labour with respect to the training of apprentices in the building trades.

"Those engaged in industry both on the employer's and workers' side appreciate and realize the importance and necessity of teaching apprentices all of the various branches of the trade. Through specialization and commercialism the condition is brought about whereby a boy who works in one shop during all the years of his apprentice training is not given an opportunity to learn all there is to know of his trade. Quick and quack methods of turning out mechanics have proven failures in the last few years. The so-called 'American plan,' whereby young men are turned out as specialists, will prove another of these failures. There is no short cut to training mechanics.

"A mechanic in all that the word implies has had practice, experience, and instruction in the various processes of the trade. He knows all of the processes of the trade, the relation of one process to another, and to the finished product. He can perform his work with an economy of material, a high degree of accuracy, and in a minimum of time. These factors of expertness are accomplished by the co-ordination of the brain, the eye, and the hand, and the proper functioning of these factors is only brought about by well-directed apprenticeship training. All sensible employers are in favour of the training of apprentices, as they know a well-trained mechanic is an asset to the industry. He earns the wages he receives, goes about his work in a businesslike way without the necessity of a highly paid foreman telling him every few minutes what to do and how to do it. He can stand on his own feet.

"Organized labour is in favour of a well-directed apprenticeship plan, as well-trained workers maintaining a high standard for their work can maintain wages commensurate with the quality and quantity of work performed. Such workers take pride in their work and raise the standard of their trade to a higher plane whereby the craft has the respect of the community.

"When all the well-trained mechanics are in an organization there is no fear of an open-shop movement.

"The public favours well-trained workers, as it knows when work is performed by well-trained mechanics it receives full value for money expended.

"Many of our organizations have, through the co-operation of employers and public vocational schools, arranged courses for the training of their apprentices. The unions who have tried this method are more enthusiastic over the plan and the further they go into it, endorse and recommend it to other organizations."

Canadian National Institute for the Blind

The annual report of the Canadian National Institute for the Blind for the year ending March 31, 1927, records the industrial activities of blind persons in Canada. The broom and basket industries both in Toronto and Ottawa showed improved results during the year, and the educational endeavours fostered by the Institute made a steady advance. In an effort to assist individuals in other professions and occupations the Institute turned its attention chiefly to newsvending, piano-tuning and massaging. In the first of these occupations blind vendors earned on an average of $16 a week. Piano-tuning as an occupation for blind workmen also made an advance, but massaging, due to the difficulty of securing the active co-operation of the medical profession, was the cause of some discouragement. The Blind Craft Shop, established in 1924 by the Toronto Women's Auxiliary, reported a very successful year, sales amounting to $14,852.

Commenting on old age pensions the report says: "During the recent session of Parliament an Old Age Pension Bill was passed, subject to Provincial participation, but providing the allowance only for the general group of necessitous aged of seventy years or more. The special age amendment requested on behalf of the blind has not as yet been allowed. We confidently hope for such recognition of the needs of the blind during the coming year."

LEAGUE OF NATIONS INTERNATIONAL LABOUR ORGANIZATION

Great Britain and the Hours Convention

The British Government has been repeatedly questioned in Parliament as to its attitude towards the ratification of the eight-hour day convention of the International Labour Conference. On the last occasion on which the subject was discussed (June 2), the Minister of Labour, Sir Arthur Steel-Maitland, declared that the Government was being pressed on one side to ratify without properly considering the obstacles, and on the other side, not to ratify under any conditions. The Government was in no way in honour bound to ratify the convention. If a Government representative voted for the adoption of a draft convention in the International Labour Conference, what he did was to concur in its adoption for submission to the various governments. There was no obligation on any government to ratify. In the present case the Government was being faced with practical difficulties; for example, there was the question of overtime. The usual view held by lawyers in Great Britain was that, under a strict interpretation of the convention taken by itself, the present overtime system in force in Great Britain would be impossible, whether on the railways, in the engineering trades, or in a industry such as ship repairing. This question was the more important because the interpretation accepted abroad was different and would allow railway overtime, which under the British legal interpretation was impossible. Road transportation involved further difficulties. In the German bill, this was treated as "intermittent work" but it was difficult to reconcile this interpretation with the agreement which had been reached at a conference in London between the Ministers of Labour of Great Britain, Germany and certain other countries, nor would those in Great Britain who desired immediate ratification be content to legislate and administer on the French model, which he did not criticize but which was different from the practice followed hitherto in Great Britain.

The Minister of Labour did not propose that the Government should be stampeded on this question. There were difficulties to be surmounted and those who were concerned with them must help the Government to see whether they could not be got out of the way. He was trying to get a statement of the industries in which real difficulty was felt, such as the crucible iron trade, and other trades such as tailoring, in which work was done by piecework.

In conclusion, the Minister declared that this was the most difficult and complicated piece of work in which he had ever been engaged.

Switzerland and Night Work in Bakeries

The Swiss Federal Council on May 20, 1927, submitted to the Federal Assembly a report on the convention concerning night work in bakeries adopted at the Seventh Session of the International Labour Conference. The Federal Council states in its report that experiments have sufficiently proved that it is useless in Switzerland to hope for a satisfactory solution of the question by means of an agreement freely entered into by employers and workers, and that it is therefore only by means of a Federal law that the question can be regulated compulsorily at all. At the present moment it appears that, according to the enquiries and negotiations which have taken place in Switzerland, the most convenient hour for beginning work would be 4 a.m., the rest period falling between 8 p.m. and 4 a.m. In this way account would be taken of all legitimate interests, particularly those of the hotel industry, the importance of which must not be lost sight of, and those of bakeries with electrically-heated ovens.

Had this viewpoint been admitted as a general rule by the Conference, the Federal Council would have proposed to the Federal Assembly to settle the question by fixing the hour for beginning work at 4 a.m., and to ratify the convention. As this was not the case, ratification would seem to be impossible. The present situation is so confused, says the Federal Council, that it does not even permit of presenting a Bill to put the solution advocated into practice.

For the moment, the master bakers are opposed to a statutory regulation of the question, as are also the artisans and employers. As regards the workers, some would accommodate themselves to the Government's proposals, while others go much further, and demand that work should only begin at 6 a.m. The co-operative societies, on the other hand, which are interested in the question both as employers and as consumers, and which have an important following in the workers who are affiliated to them, agree in fixing the hour for beginning work at 4 a.m., but demand that their large bakeries should not be subject to the prohibition of night work.

The Federal Council concludes by stating that in view of the above facts it is not in a position to ratify the convention.

Inspection of Emigrants on Board Ship

Announcement has been made in the British Parliament that the Government proposes to proceed with the ratification of the draft convention which was adopted by the International Labour Conference in 1926 for the simplification of the inspection of emigrants on board ship, and also to accept the recommendation concerning the protection of emigrant women and girls on board ship. The announcement in question was in the terms following:

His Majesty's Government propose to ratify the draft convention concerning the simplification of the inspection of emigrants on board ship which was adopted by the Eighth Session of the Conference. His Majesty's Government are advised that ratification will not involve any legislative or administrative changes.

His Majesty's Government are of opinion that the effectiveness of this draft convention would be much enhanced if the adhesion of the other principal maritime countries were secured, and they propose accordingly, in registering the ratification with the Secretariat of the League of Nations, to state that it will become effective only when the draft convention has been ratified by France, Germany, Holland, Italy, Norway and Spain.

His Majesty's Government propose to accept the recommendation concerning the protection of emigrant women and girls on board ship which is substantially in accord with existing practice.

Regulation of Forced Labour

At a recent session of the Committee of Experts on Native Labour of the International Labour Office, the fundamental principles for the regulation of forced labour contained in the preliminary report on the question perpared by the International Labour Office were considered and approved, with modifications in some cases.

The Committee, the members of which are exceptionally qualified to deal with the subject under consideration, took the view that the object of the regulation of forced labour was to prevent such abuses as might exist in the system, but that the real aim to be pursued was to expedite the abolition of forced labour of any kind whatsoever. They therefore agreed that strict conditions should be fulfilled before recourse should be had to it.

Forced labour of women and children is, in the opinion of the Committee, not permissible: the principle it approved in this connection permits the exercise of compulsion on adult able-bodied males only. The Committee also approved the important principle that forced labour should always be paid for, except in cases of *force majeure* and emergencies, such as floods, fire, etc., and in what is described as ordinary routine sanitary work in a village.

Publications

Three Reports have recently been issued by the International Labour Office dealing with the subject of (1) Freedom of Association; (2) Minimum Wage-Fixing Machinery; and (3) Sickness Insurance, these being questions discussed at the Tenth Session of the International Labour Conference, held in Geneva in May and June last. Freedom of Association is a subject of obvious interest at the present time, and this survey of the situation throughout the world will be of great value to all concerned with the problem.

The second report, on Minimum Wage-Fixing Machinery, surveys the systems in various countries of fixing and regulating minimum wages; examines the principles underlying the several systems; describes the methods of grouping individuals for minimum wage purposes; considers the problems of inspection and enforcement; and is completed by a succinct summary of minimum wage legislation, country by country.

The third report, on Sickness Insurance, is on familiar lines, summarizing the views of the various Governments as to the form of international agreement which should be provided on this subject. The report also constitutes a valuable guide to existing practice throughout the world as regards sickness insurance.

Minimum Wages and Conciliation

Under the title "Towards Industrial Peace", the League of Nations Union of Great Britain is publishing a report of the proceedings of the Conference organized by the Union and held in London last February, on "Systems of fixing minimum wages and methods of conciliation and arbitration."

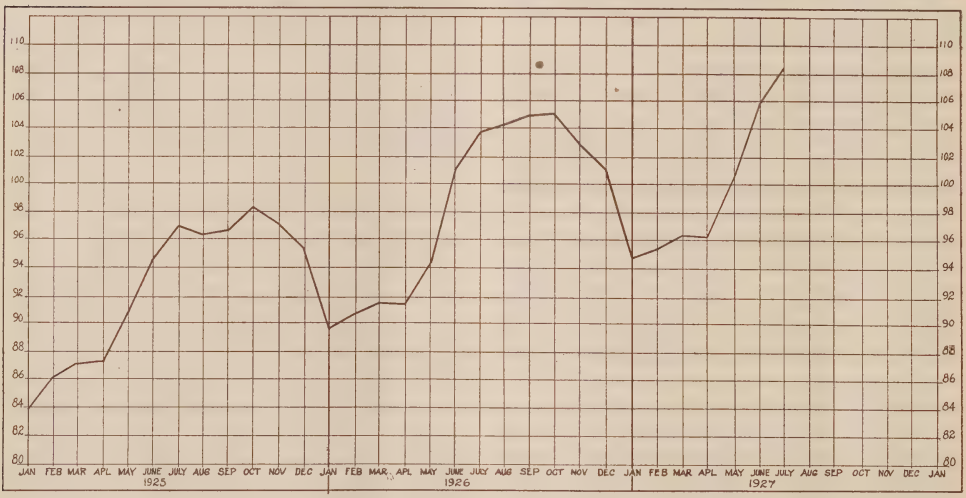
The primary object of the Conference was to focus public attention on questions of current importance, including one which was to come before the Tenth Session of the International Labour Conference. It was attended by a large number of officials of industrial organizations and individuals interested in the problems to be considered.

"Automotive Transportation and Railroads"

The Commerce and Marine Commission of the American Bankers' Association has recently published a pamphlet on "Automotive Transportation and Railroads," giving the results of a study of the relationships now developing between the newer and older forms of transport, and estimating the economic effects and the future developments of automobile traffic. The report first of all shows the economic importance of the motor vehicle industry, emphasizing its immense output, which is equalled by no other single industry in the United States. On December 31, 1926, the total number of motor vehicles registered in the country was 22,330,000, and during the year manufacturers produced 4,259,425 additional motor vehicles with a wholesale value of close to $3,000,000,000. When to that total are added the wholesale value of 63,000,000 tires for replacement ($775,000,000) and the wholesale price of parts and accessories ($600,000,000) the grand total is about four and a third billion dollars.

Since 1923 the products of motor vehicle manufacturing plants have increased in much greater degree than those of any other industry, and the motor vehicle product is now firmly established in first place. According to estimates published in 1926 by the National Automobile Chamber of Commerce, the number of persons employed in this industry, directly and indirectly, was then 3,445,642 or about eight per cent of all persons gainfully employed. Included in this total are the employees of 53,366 distributing agencies, 51,715 public garages, 83,758 service stations and repair shops, and 66,584 supply stores.

These figures do not include the Canadian branches of American producers, but some figures showing the progress of the industry in Canada may be quoted from a recent report published by the Dominion Bureau of Statistics. During the year 1926 there were 204,727 motor cars manufactured in Canada, an increase of 26 per cent over the output in 1925. The total production value for the industry in 1926 was $133,598,456 as compared with $110,835,388 in 1925. Eleven companies produced cars and trucks in Canada during the past year. Capital employed by these concerns amounted to $82,791,968. The automotive industry absorbed 11,905 Canadian workmen; salary payments during the year amounted to $3,913,865, and wages totalled $15,736,939 making a total of $19,650,804 for salaries and wages. The export of motor vehicles and parts from Canada for 1926 equalled $38,222,387.



Proceeding to discuss the relationship developing between the highway and rail transport the report deals with the question of freight transportation by motor truck as compared with railroad transportation. Basing its conclusion on figures published by the United States Bureau of Public Roads the report states that it does not appear that truck transportation on rural highways will increase in a degree that will be competitively injurious to railroads. The "ton-miles" covered by trucks competing with railroads in 1926 numbered approximately 9,366,500,000, as compared with 488,577,875,000 ton-miles covered by the railway freight cars. The railroads are becoming active in utilizing trucks for supplementary service and this is probably as far as their use will proceed.

In the field of passenger transportation, however, motor vehicles have seriously encroached upon railroad passenger traffic. Data furnished by the Bureau of Public Roads indicate that passenger motor vehicles on the rural highways last year travelled 122,000,000,000 passenger miles, as compared with 35,487,000,000 passenger miles covered by the railroads. As a result many local trains on light traffic branch lines are a liability instead of an asset, and the railroad companies are endeavouring to reclaim a part of their lost traffic by substituting motor coaches on the highway for the almost empty passenger train by rail. The motor vehicle has therefore become a strong economic factor in transportation, though it is a difficult task to determine the limits of its economic possibilities. An investigation held to determine this precise point shows that the most successful companies are those which confine their operations to distances of not more than sixty miles. Many cases of failure have been noted in companies which engaged in longer distance activity, which has been greatly hampered by competition among the truckers. Moreover the tendency of the railroad companies to improve their services tends to lessen the demand for long distance motor vehicle transportation. The loss of relatively long distance passenger traffic has effected the railroads most of all, and they have partly overcome this loss by establishing supplementary motor-bus service in some localities. The railroad companies have recognized the fact that motor transportation has come to stay, and are seeking to co-operate with the motor owners so as to improve transportation facilities without lowering the standard of railway train service.

EMPLOYMENT SITUATION AT THE BEGINNING OF JULY, 1927, AS REPORTED BY EMPLOYERS MAKING RETURNS TO THE DOMINION BUREAU OF STATISTICS

THERE were further pronounced increases in employment at the beginning of July, according to statements tabulated by the Dominion Bureau of Statistics from 6,137 firms employing 896,956 workers, or 21,866 more than on June 1. This increase, which was rather larger than on July 1 of any other year of the record, brought the index number to 108.4, as compared with 105.9 in the preceding month, and with 103.7, 96.8, 95.9, 99.5, 91.1 and 87.5 at the beginning of July in 1926, 1925, 1924, 1923, 1922, and 1921, respectively. The situation continues to be decidedly more favourable than in any other month of the years since 1920, as may be seen from the following chart.

EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

NOTE.—The curve is based on the number of employees at work on the first day of the month, as indicated by the firms reporting, in comparison with the number of employees they reported in January, 1920, as 100.

General improvement was registered in all industries except logging, which showed seasonal curtailment. The largest gains were reported in construction, in which they were greater than on July 1 of any other year of the record.

Employment by Economic Areas

The trend was favourable in all provinces, the most noteworthy expansion taking place in the Maritime Provinces and Quebec.

Maritime Provinces.—Statements were tabulated from 546 firms employing 74,454 workers, as against 68,310 in the preceding month. This increase of over 6,100 persons brought employment to a higher level than in any other month in the last three years, the index standing at 100.5, as compared with 91.1 on July 1, 1926. Construction recorded the most pronounced improvement, but there were also gains in logging, mining, services and some other groups. Manufacturing and transportation, on the other hand, were slacker.

Quebec.—Construction, transportation, manufacturing, services and trade reported the largest additions to staffs in Quebec, while logging was seasonally slack, as river-driving finished. The forces of the 1,354 co-operating employers aggregated 257,789 persons, compared with 252,384 on June 1. Although this advance involved fewer workers than that registered on the corresponding date last year, the index then was rather lower; employment at the beginning of July, 1927, was, in fact, at the highest level so far recorded.

Ontario.—Continued but smaller expansion was noted in Ontario, where the 2,791 firms whose statistics were tabulated reported 364,642 employees, or 3,220 more than on June 1. Manufacturing and logging registered between-season dullness, while considerable

gains were shown in construction, transportation, mining and trade. Larger increases were indicated on July 1, 1926, but the index then was over five points lower.

Prairie Provinces.—The greatest gains in this area were in construction, manufacturing, transportation, services and communications, while logging (in which the movement was seasonal) showed a decline. Data were compiled from 775 employers with an aggregate staff of 118,556 workers, as against 113,998 in their last report. This increase of 4,558 workers exceeded that registered on July 1, 1926, while the level of employment was higher than on the same date in any other year of the record.

British Columbia.—The advances in British Columbia were the largest ever reported on July 1, and the index, at 122.9, was at its maximum since the record was instituted in 1920. A total working force of 85,515 persons was employed by the 671 firms whose data were received and who had 78,976 workers in the preceding month. Manufacturing, particularly canneries and lumber mills, construction and services recorded the most marked gains, while logging afforded less employment.

Table I gives index numbers by economic areas.

Employment by Cities

Of the eight cities for which separate tabulations are made, only two—Hamilton and Windsor (with the other Border Cities) showed reduced activity, while in Quebec, Montreal, Toronto, Ottawa, Winnipeg and Vancouver, the trend was decidedly favourable.

Montreal.—Employment in Montreal continued to advance, particularly in the manufacturing, transportation, construction and trade groups. A combined working force of 120,201 persons was indicated by the 722 co-operating employers, who had 118,191 on June 1. The gains noted on July, 1926, were not so extensive, and the index then was considerably lower, as it was on the same date in every other year of the record.

Quebec.—Further improvement brought the index number in Quebec to 112.7, the highest point reached since the record for this city was commenced in 1922. Statements were tabulated from 95 firms employing 10,615 employees, compared with 10,276 in the preceding month. Manufactures and construction registered practically all the increase.

Toronto.—Manufacturing, notably in food and printing establishments, construction and trade reported increased activity. The 800 firms furnishing data enlarged their staffs by 928 employees to 105,003 at the beginning of July. Much smaller gains were noted on the corresponding date last year, when employment was in less volume.

Ottawa.—Statistics were received from 136 employers with 11,610 persons on their pay-lists, compared with 11,267 in the preceding month. Most of the expansion took place in construction, but manufactures were also busier. The additions to payroll exceeded those indicated on July 1, 1926, and the index continued to be several points higher than it was last summer.

Hamilton.—There were minor losses in personnel in Hamilton, but employment continued at a higher level than on the same date last year; 147 workers were released from the forces of 201 firms furnishing information, bringing them to 30,251 on the date under review. Construction was busier, but manufacturing was seasonally dull.

Windsor and the Other Border Cities.—Further curtailment in employment in automobile plants in the Border Cities caused a reduction of 1,808 persons in the staffs of the 90 reporting employers, who had 9,202 in their employ on the date under review. The index was lower than on July 1, 1926, when smaller declines were reported.

Winnipeg. — Manufacturing, construction, transportation and communications registered advances that brought employment to a higher level than at the beginning of July in any other year of the record. An aggregate working force of 28,347 employees was reported by the co-operating firms; this was 738 more than on June 1. The improvement registered on the corresponding date a year ago was less extensive.

Vancouver.—The trend of employment in Vancouver continued to be favourable, according to data from 236 establishments employing 26,750 workers, as against 26,143 in the preceding month. The greatest gains were in manufacturing, but communications and some other industries also reported improvement. A small decline was noted by the firms making returns for July 1, 1926, when the index stood at 115.3, as compared with 122.8 on the date under review.

Index numbers by cities are given in Table II.

NOTE.—Number employed by the reporting firms in January, 1920, is taken as 100 in every case. The "relative weight" shows the proportion of employees in the indicated area to the total number of employees reported in Canada on the date under review.

[1]The "Relative Weight" column shows the proportion that the number of employees in the indicated industry is of the total number of employees reported in all industries by the firms making returns on the date under review

Manufacturing Industries

Fish, fruit and vegetable canneries, lumber, pulp and paper, rubber, building material, electric current, mineral products, boot and shoe and electrical apparatus factories registered heightened activity, but seasonal curtailment was shown in textile and iron and steel plants. The 3,892 co-operating manufacturers employed 487,723 operatives, as against 487,145 in the preceding month. Although more pronounced gains were indicated

in this division on July 1, 1926, the index then was several points lower.

Animal Products, Edible.—Additions to staffs on a larger scale than on July 1 of any other year of the record were shown in this group, 1,162 workers being taken on by the 238 reporting establishments, which had 19,205 in their employ. Much of the improvement took place in fish canneries in British Columbia, but dairies and meat preserving plants in Quebec, Ontario and the Prairie Provinces were also busier. The index number on July 1, 1927, was at the highest point so far reached in this record.

Leather and Products.—Statements were received from 192 manufacturers in this group employing 17,139 persons, as compared with 17,009 in the preceding month. Most of this increase took place in boot and shoe factories in Ontario and Quebec. The situation was rather better than on the corresponding date in the last five years.

Lumber and Products.—Rough and dressed lumber mills reported heightened activity, while container, match and other wood using industries, except vehicles, also showed improvement. The gains, however, were not so pronounced as on July 1, 1926, when the index number was somewhat higher. A combined working force of 57,307 employees was reported by the 724 co-operating firms; this was 2,296 more than at the beginning of June. All provinces shared in the upward movement.

Plant Products, Edible.—The resumption of operations in canneries, together with an increase in personnel in biscuit factories caused a considerable advance in the vegetable food group, but this was partly offset by losses in sugar refineries and some other divisions. Returns were received from 311 manufacturers with 27,336 operatives, as against 26,771 in their last report. There were reductions in the Maritime Provinces and Quebec, while the tendency was decidedly favourable in Ontario and British Columbia. Much larger advances were noted at the beginning of July a year ago, but the index number then however was slightly lower.

Pulp and Paper Products.—Continued, though less extensive expansion was shown in the pulp and paper group; printing and publishing was decidedly more active, but pulp and paper mills released some employees. The result was an increase of 309 workers in the staffs of the 471 establishments furnishing data, which employed 60,271 on the date under review. Although more pronounced advances were reported on July 1, 1926, employment then was at a lower level. A contraction was recorded in the Maritime Provinces, but elsewhere improvement was shown, particularly in Quebec.

Rubber Products.—Further, though smaller gains were indicated in rubber factories, chiefly in Ontario and Quebec. This gain contrasts with the slight reduction registered on July 1 last year, when employment was in considerably less volume. Statistics were tabulated from 32 firms with 14,326 persons in their employ on the date under review, as compared with 14,179 in the preceding month.

Textile Products.—Curtailment of operations was reported by the 515 co-operating textile manufacturers who employed 74,440 workers, or 1,179 less than at the beginning of June. The largest losses were in knitting mills and head-wear factories, although the production of woollen and silk goods also showed a falling-off. Practically all the contraction took place in Ontario. Minor increases were indicated on the corresponding date in 1926, but the index number then was several points lower.

Tobacco, Distilled and Malt Liquors.—Employment in this division declined slightly, according to statistics received from 107 establishments, whose staffs dropped from 12,534 persons on June 1, to 12,378 at the beginning of July. There were reductions in Quebec, while in British Columbia and the Prairie Provinces the trend was upward. Rather greater losses were shown on the same date last year, when the situation was not so favourable.

Chemicals and Allied Products.—Statements were tabulated from 111 firms in this group, employing 6,688 workers, or 131 less than in their last report. The Maritime Provinces and Ontario registered the bulk of this shrinkage, which involved slightly fewer workers than that indicated on July 1, 1926. Employment then was not so active.

Clay, Glass and Stone Products.—Continued advances on a larger scale than on the corresponding date a year ago were noted in building material plants at the beginning of July, when the 112 co-operating establishments enlarged their forces by 383 persons to 10,795. All provinces shared in the upward movement which, however, was most pronounced in Ontario and Quebec. Conditions were better than in the summer of any other year of the record.

Electric Current.—Continued improvement was recorded in electric current plants on July

1, the gains being shown mainly in Quebec and the Western Provinces. A combined working force of 13,096 persons was employed by the 88 producers whose returns were received, and who reported 12,724 in the preceding month. Although the additions to staff indicated at the beginning of July last year were somewhat larger, the level of employment then was lower.

Electrical apparatus.—There was an increase of 127 in the payroll of the 39 manufacturers furnishing data, who had 10,335 employees on July 1. Ontario and Quebec registered practically all this gain, which involved almost the same number of persons as were added to staffs on July 1, 1926. The number engaged in the production of electrical apparatus then, however, was much smaller.

Iron and Steel Products.—The trend of employment in iron and steel factories was downward, as is usually the case in the summer; the largest losses took place in automobile works, but there were also recessions in rolling mills, foundries, agricultural implement plants, and some other divisions. Returns were compiled from 636 employers, whose forces aggregated 128,519 workers, as against 132,113 in the preceding month. Although this reduction was slightly larger than that noted on the corresponding date in 1926, the index then was practically the same as on the date under review. The bulk of the shrinkage took place in Ontario, but there were also declines in the Maritime Provinces, while elsewhere employment advanced.

Mineral Products.—Employment in mineral products continued to expand, the increase exceeding that of July 1, 1926, when the situation was less favourable. The 74 co-operating manufacturers reported 10,342 workers, or 189 more than on June 1. A large share of these additionally employed workers were taken on in oil refineries and other divisions of the group in Quebec and the Western Provinces.

Logging

The conclusion of river-driving operations in many logging camps, chiefly in Quebec, caused a seasonal falling-off in employment, 3,924 persons being released from the staffs of the 221 reporting firms, who employed 16,414 on July 1. This decline involves approximately the same number of workers as that noted on the corresponding date a year ago, when the index was rather higher.

Mining

Coal.—There was a small increase in employment in the staffs of 89 coal mines, in which 25,978 men were employed as compared with 25,895 in their last report. Minor gains in the Maritime Provinces were partly offset by slight losses in the Western coal-fields. Much more pronounced improvement was indicated on July 1, 1926, but the index number then was several points lower.

Metallic ores.—Continued, though smaller advances were reported in metallic ore mines, chiefly in Ontario. Statements were tabulated from 53 operators employing 12,417 workers, or 128 more than at the beginning of June. The index number stood at 166.1, the highest point yet reached in this record. An insignificant increase was registered on the corresponding date in 1926.

Non-metallic minerals other than coal.—Additions to pay-rolls on a greater scale than at the beginning of July in most years of the record were made in non-metallic mineral mines, 67 of which employed 7,289 persons, or 239 more than in their last report. Quarrying in the Maritime Provinces and Ontario absorbed most of these extra workers. The index number was higher than in any other month since 1920.

Communications

Further gains exceeding those shown on the same date last year were registered in this group, in which 593 additional persons were employed by the 186 companies and branches making returns. They had 25,687 on their payrolls, a larger number than has ever before been indicated in this record. Telegraphs and telephones both reported heightened activity, more marked advances being indicated by the latter.

Transportation

Street Railways and Cartage.—Employment in the local transportation group advanced slightly at the beginning of July; 111 firms reported 20,597 workers in their employ, as against 20,436 in the preceding month. In Quebec, the Prairie Provinces and British Columbia the tendency was favourable, but there were declines in Ontario. Considerably greater expansion was registered on July 1, 1926, but the index number then was rather lower.

Steam Railways.—Statistics tabulated from 100 companies and divisional superintendents in the steam railway operation group, showed

that they employed 80,372 workers at the beginning of July, or 1,780 more than in the preceding month. This advance was a good deal larger than that noted on the same date a year ago; employment was then below its level at the time of writing. There were important increases in Quebec, Ontario and the Prairie Provinces.

Shipping and Stevedoring.—In contrast with the pronounced reductions in employment registered in this group at the beginning of July a year ago, there was a moderate increase in employment in water transportation on the date under review, when 59 companies reported 16,295 employees, an increase of 329 over the preceding month. Conditions were rather better than on July 1, 1926. There was seasonal curtailment in the Maritime Provinces, while in Quebec and Ontario improvement was shown.

Construction and Maintenance

Building.—Continued important advances in employment were noted in building construction, the gains exceeding those registered on the same date in any other year of the record, while the index number, standing at 193.0, was also at its peak for the beginning of July in the years since 1920. The 446 co-operating contractors employed 40,128 workers, as compared with 36,746 in the preceding month. All provinces reported expansion, but the additions to staffs in Ontario were much the largest.

Highway.—The number of men engaged on road construction and maintenance was greatly augmented at the date under review, when the 144 firms furnishing data reported 29,687 workers, or 12,578 more than on June 1. Employment in this work was at the maximum since the record was instituted in 1920. Marked advances were shown generally, the largest taking place in the Maritime Provinces, Quebec and Ontario.

Railway.—A combined working force of 54,809 workers was reported by the 37 contractors and superintendents whose statistics were tabulated, and who had 50,534 at the beginning of June. All provinces except British Columbia shared in this gain, which was most noteworthy in Ontario and the Prairie Provinces. Rather smaller additions to staffs were noted on July 1 last year; the index number then, however, was one point higher than on the date under review, when it stood at 174.9.

Services

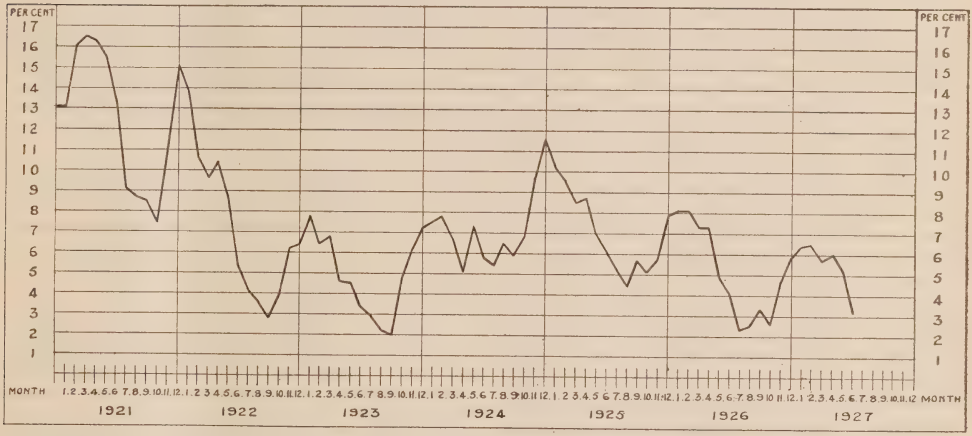
Continued and greater expansion was shown in the service group, according to returns from 172 employers with 16,618 persons on their staffs, as compared with 15,470 in the preceding month. The opening of the summer hotel season caused most of the gain which exceeded that reported on July 1 on any other year of the record, while employment was at the highest level, so far reached. The tendency was favourable in all provinces, but the largest increases were in Quebec and the Prairie Provinces.

Trade

Improvement on a larger scale than in most years since 1920 was registered in trade, in which both wholesale and retail establishments showed heightened activity. Statements were tabulated from 560 firms having 62,942 persons in their employ, or 516 more than at the beginning of June. The additions to staffs in Quebec and Ontario were most marked. The index number, at 106.8, was higher than on July 1 in any other year of the record.

Tables I, II and III give index numbers of employment by economic areas, leading cities and industries, respectively. The columns headed "Relative weight" show the proportion that the number of employees reported in the indicated area or industry is of the total number of employees reported in Canada by the firms making return on July 1, 1927.

Women's Minimum Wages in Quebec



The Minimum Wage Commission of the Province of Quebec is stated to have completed an investigation into the wages paid to women in the printing and allied trades in the province, and it is anticipated that an official schedule of minimum wages will be in force in September. The commission has also opened an inquiry into conditions of female employment in the confectionery and biscuit industries. Orders 1 and 2, respectively governing employment in laundries, dyeworks, etc., in Montreal and district and in the rest of the province, were outlined in the LABOUR GAZETTE, March, 1927, and December, 1926.

UNEMPLOYMENT IN TRADE UNIONS AT THE CLOSE OF JUNE, 1927

THE term unemployment as used in the following report has reference to involuntary idleness due to economic causes. Persons engaged in work other than their own trades or who are idle because of illness, are not considered as unemployed. Unions involved in an industrial dispute are excluded from these tabulations. As the number of unions making returns varies from month to month with consequent variation in membership upon which the percentage of unemployment is based, it should be understood that such figures have reference only to the organizations reporting.

The situation among local trade unions during June continued the favourable trend of the previous month, rapidly attaining the usual summer level of activity. For this month returns were tabulated from 1,561 labour organizations with 167,711 members, 5,410 or a percentage of 3.2 of whom were without work in contrast with an unemployment percentage of 5.2 in the previous month. A greater volume of work was afforded also than in June last year when 4.1 per cent of the members were reported idle. In comparison with the returns for May, Quebec with considerable improvement in its garment trades, registered the most substantial gain, namely that of nearly 5 per cent and was followed by a 4 per cent gain in Nova Scotia. The Ontario situation remained unchanged, the unemployment percentage in both cases standing at 3.1. In the remaining provinces with the exception of New Brunswick, there were nominal increases in employment, while the New Brunswick reduction was practically negligible. The advance in employment over June last year was mostly centred in the Province of Quebec, which as in the previous comparison indicated an increase of almost 5 per cent. Nova Scotia and Alberta unions also registered heightened activity, but in lesser volume than in Quebec, while in New Brunswick, Ontario, Saskatchewan and British Columbia there were slight contractions in the amount of work afforded. In Manitoba no change in the situation occurred.

PERCENTAGE OF UNEMPLOYMENT AS REPORTED BY TRADE UNIONS
Quarterly 1916-1921, Monthly 1922-1926

A separate tabulation was made of unemployment conditions at the end of June among trade union members in the largest city in each province, with the exception of Prince Edward Island. In Montreal the situation improved considerably over May, the percentage out of work on June 30 being 4.9 as against 12.1 at the close of the previous month. The June unemployment percentage was, however, the largest registered of any of the cities. Halifax, Toronto, and Vancouver, each with 4.1 per cent of idleness, were next in line, followed by 3.4 per cent in St. John, while Regina with 1.6 per cent of inactivity indicated little variation from the May level.

The accompanying chart shows the curve of unemployment by months from 1921 to date. During June, the curve continued in the down-

ward course of the previous month, but the decline was more precipitous. The trend was parallel to that of the same month in 1926, although the level attained during June this year was lower than last.

In the manufacturing industries reports were tabulated from 422 unions with 47,443 members, 3.8 per cent of whom were idle in comparison with percentages of 8.9 in May and 8.3 in June last year. Apart from the substantial improvement among garment workers there were practically no outstanding changes in either comparisons though several of the trades showed slight fluctuations. Iron and steel workers and paper makers registered small increases in employment in comparison with May and jewelry, glass and leather workers and metal polishers showed reductions, while in comparison with June last year the situation for printing tradesmen, woodworkers and papermakers improved slightly and that for cigar makers, leather, glass and iron and steel workers was less favourable.

From the coal mining regions reports were tabulated from 31 local unions with 12,605 members, 3.6 per cent of whom were idle as compared with 8.5 per cent in May. This gain was all attributable to improved conditions in Nova Scotia and Alberta, while in British Columbia there was no change, all members being reported at work. In comparison with the returns for June last year, when 6.4 per cent of the members were idle, the situation for Nova Scotia miners improved; in Alberta there was very little change and in British Columbia all members as last year were reported fully engaged. Quarry workers in Nova Scotia registered the same percentage of idle members as in May and asbestos miners in Quebec no unemployment.

The volume of unemployment among building tradesmen was slightly less than in May, though considerably above the June level last year. Returns were tabulated during June from 170 unions of these tradesmen with 18,421 members, 1,481 or 8.0 per cent of whom were idle as compared with 9.3 per cent in May and 4.4 per cent in June last year. Hod carriers and building labourers and carpenters and joiners were the only tradesmen to register contractions in employment in comparison with May and these were not pronounced. Of the gains in the remaining trades the most substantial were among bricklayers, masons and plasterers, painters, decorators and paperhangers, plumbers and steamfitters, bridge and structural iron workers and tile layers, lathers and roofers. In comparison with the returns for June last year employment was more plentiful for steam shovel and dredgemen, bridge and structural iron workers, carpenters and joiners, painters, decorators and paperhangers and tile layers, lathers and roofers, but more than offsetting declines were recorded by bricklayers, masons and plasterers, electrical workers, granite and stone cutters, plumbers and steamfitters, and hod carriers and building labourers.

The transportation division showed little change during June from the level in May, there being 2.2 per cent of unemployment reported at the end of June as compared with 2.1 per cent in the previous month. The steam railway division, whose returns constitute over 82 per cent of the entire group membership reporting indicated a nominal adverse change, as did also the street and electric railway division, and the improvement among navigation workers was not quite sufficient to counteract these reductions. During June last year 2.0 per cent of idleness was reported in the transportation industry as a whole, the decline during June this year in comparison, being apparent both among steam and street and electric railway employees and

TABLE I.—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY PROVINCES

among navigation workers. The changes throughout, however, were small.

A separate tabulation is made for longshore workers from whom 11 reports were received during June, indicating a membership of 6,946 persons, 1,287 of whom or a percentage of 18.5 were unemployed. A nominal decline was registered as compared with May when the unemployment percentage stood at 17.2 and a slight improvement over June last year when 19.2 per cent of the members were without work.

From federal and civic government employees 137 unions reported with 12,524 members, .5 per cent of whom were idle as compared with .1 per cent in May, and no unemployment in June last year. Federal employees for each month used here for comparative purposes, reported all their members at work, but among civic employees there was .1 per cent of idleness during June as against .3 per cent in May and no inactivity in June last year.

Reports were received from 107 unions in the miscellaneous group of trades with 4,935 members, 5.0 per cent of whom were out of work as compared with 6.6 per cent in May. Employment for all tradesmen in the group including hotel and restaurant and theatre and stage employees, barbers and stationery engineers and firemen, was somewhat better than in May. In comparison with the returns for June last year when 3.4 per cent of idleness was recorded. Stationery engineers and firemen, hotel and restaurant employees and barbers were afforded less work, but slightly improved conditions existed among theatre and stage employees.

Fishermen with three unions reporting a membership of 1,355 persons showed scarcely any unemployment, as compared with 5.9 per cent in May and 1.4 in June last year. Lumber workers and loggers were fully engaged as in both the previous month and June, 1926.

Table I on page 876 summarizes the returns by provinces for June of each year from 1919 to 1924 inclusive, and for each month from January, 1925, to date, and table II on page 877 represents the percentages of unemployment reported in the different groups of industries for the same months.

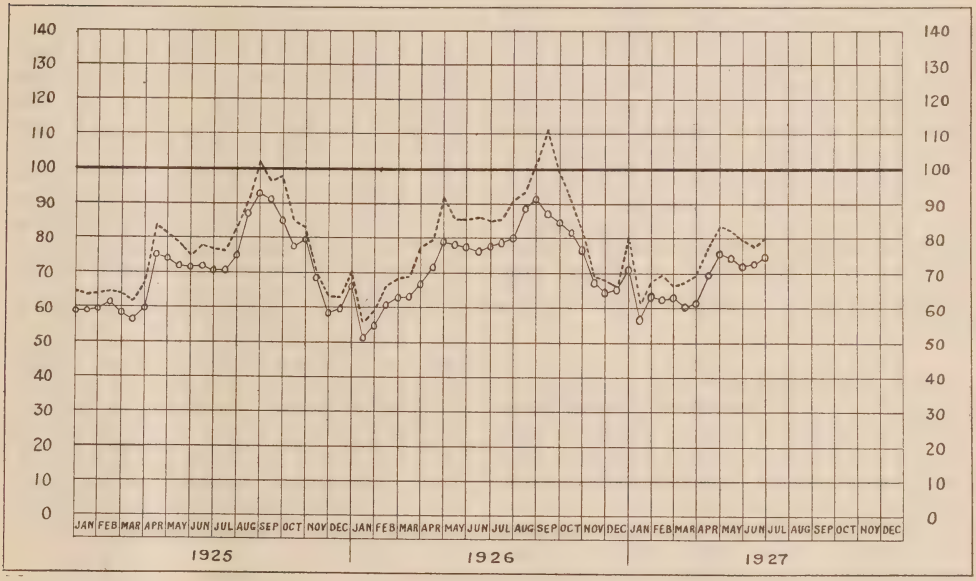
EMPLOYMENT OFFICE REPORTS FOR JUNE, 1927

THE volume of business transacted in the offices of the Employment Service of Canada, as shown by the average daily placements effected during the month of June, 1927, recorded a decline of over 3 per cent when comparison is made both with the work carried on during last month and also with that of the corresponding period a year ago. The most marked decline from last year was in the construction group, transportation also showing a reduction, though in a lesser degree. Logging, farming, communication and trade, however, registered gains under both comparison while changes in the other groups were comparatively small.

The accompanying chart shows the trend of employment since January, 1925, as represented by the ratio of vacancies notified and of placements effected for each one hundred applications for work registered at the offices of the Service throughout Canada, the computations being made semi-monthly, It will be noted that the curve of vacancies in relation to applications declined slightly during the first half of the month, but showed an upward trend during the latter half of the period, while the curve of placements in relation to applications rose gradually throughout the month. In neither instance, however, did the curve attain the level reached at the close of June, 1926, there being a decline of 5 points and 3 points respectively. The ratio of vacancies to each one hundred applications was 77.9 and 80.1 during the first and second half of June, 1927, in contrast with the ratio of 85.9 and 85.0 during the same periods in 1926. The ratio of placements to each one hundred applications during the periods under review was 72.6 and 74.8 as compared with 76.3 and 77.7 during the corresponding month a year ago.

A summary of the reports from the offices showed that the average number of applications reported daily during the first half of June, 1927, was 1,828 as compared with 1,725 daily during the preceding period and with 1,766 daily during the corresponding period in 1926. Applications for work during the latter half of the month registered 1,580 daily, in contrast with 1,616 daily during the latter half of June a year ago.

Employers notified the Service of a daily average of 1,424 vacancies during the first half and of 1,266 during the latter half of the month under review, as compared with a daily average of 1,518 and 1,374 vacancies during the month of June, 1926. Vacancies offered to the Service during the latter half of May, 1927, averaged 1,369 daily.



The Service effected an average of 1,326 placements daily during the first half of June, of which 914 were in regular employment and 412 in work of one week's duration or less,

as compared with a total average placement during the preceding period of 1,243 daily, and with 1,347 daily during the first half of June, 1926. During the latter half of the month under review, placements averaged 1,182 daily (812 regular and 370 casual), as compared with an average of 1,256 daily during the corresponding period a year ago.

During June, 1927, the offices of the Service referred 32,571 persons to vacancies and effected a total of 31,266 placements. Of these the placements in regular employment numbered 21,518, of which 17,435 were of men and 4,083 of women, while placements in casual work totalled 9,748. Opportunities for employment numbered 23,410 for men and 10,130 for women, a total of 33,540. The number of applications for work was 42,462, of which 31,243 were from men and 11,219 from women.

POSITIONS OFFERED AND PLACEMENTS EFFECTED FOR EACH ONE HUNDRED APPLICATIONS FOR EMPLOYMENT

Applications ——— Vacancies - - - - - - - - - - - - Placements o—o—o—o—o—o

The following table gives the placements effected to date by the offices of the Employment Service of Canada:

Year	Placements		
	Regular	Casual	Totals
1919 (10 months)	268,001	37,904	305,905
1920	366,547	79,265	445,812
1921	280,518	75,238	355,756
1922	297,827	95,695	393,522
1923	347,165	115,387	462,552
1924	247,425	118,707	366,132
1925	306,804	106,021	412,825
1926	300,226	109,929	410,155
1927 (6 months)	104,144	51,162	155,306

Nova Scotia

There was a decrease of over 21 per cent in the number of positions offered through employment offices in Nova Scotia during June when compared with the preceding month, but an increase of over 6 per cent in comparison with the corresponding month last year. Placements declined over 21 per cent from May, and were nearly 12 per cent less than in June, 1926. The reduction in placements from June last year was due to minor declines in all industrial groups except logging, trade and finance. Logging, in which 127 placements were effected, showed the largest increase. The majority of placements made during the month were in the services division and numbered 328, of which 253 were of household workers. Regular employment was secured for 144 men and 84 women during the month.

New Brunswick

Employment opportunities, as indicated by orders received at offices in New Brunswick during June, were nearly 28 per cent fewer than in the preceding month, and over 7 per cent less than in the corresponding month in 1926. Placements declined over 25 per cent from May, and nearly 5 per cent from June last year. Decreased placements in the logging and services divisions were responsible for the reduction from last year, although there was also a minor decline in trade. Construc-

tion and maintenance showed the only gain of importance, although all other groups registered some increase. Industrial divisions in which most of the placements were effected during the month were; logging, 88; construction and maintenance, 119; and services, 445, of which 313 were of household workers. Placements in regular employment numbered 217 of men and 69 of women.

QUEBEC

During the month of June positions offered through employment offices in the Province of Quebec were over 2 per cent less than in the preceding month and nearly 38 per cent less than in the corresponding month last year. There was a gain of over 12 per cent in placements when compared with May, but a decline of over 14 per cent in comparison with June, 1926. The decline in placements from last year was due to reductions in the construction and maintenance group, as although other groups showed declines, these were more than offset by gains in logging, farming and services. Industrial divisions in which most of the placements were effected during the month were: manufacturing, 180; logging, 501; farming, 126; construction and maintenance, 626; and services, 667, of which 303 were of household workers. During the month 1,670 men and 475 women were placed in regular employment.

ONTARIO

There was a decline of over 8 per cent in the number of positions offered through offices in Ontario during June when compared with the preceding month, and of nearly 2 per cent when compared with the corresponding month last year. Placements also were over 2 per cent less than in May, and nearly 5 per cent lower than in June, 1926. The most noteworthy gains in placements over June last year were in logging, farming, services and trade, but these gains were more than offset by declines in manufacturing, mining, transportation and construction and maintenance. Minor changes only were recorded in other groups. Placements by industrial divisions included: manufacturing, 1,693; logging, 1,463; farming, 999; mining, 94; transportation, 365; construction and maintenance, 3,484; trade, 391; and services, 4,245, of which 2,326 were of household workers. There were 7,402 men and 1,466 women placed in regular employment during the month.

MANITOBA

The demand for workers as indicated by orders listed at offices in Manitoba during June declined less than one cent when compared with the preceding month, but showed a gain of 13 per cent in comparison with the corresponding month last year. There was a decrease of nearly 4 per cent in placements in comparison with May, but a gain of nearly 22 per cent over June, 1926. All industrial divisions participated in the gains in placements over June last year, those in logging, farming and construction and maintenance being the most pronounced. Industrial divisions in which most of the placements were effected during the month were: manufacturing, 166; logging, 187; farming, 875; construction and maintenance, 417; trade, 210; and services, 1,936, of which 1,418 were of household workers. During the month 1,361 men and 628 women were placed in regular employment.

SASKATCHEWAN

During June orders received at employment offices in Saskatchewan called for over 13 per cent fewer workers than in the preceding month, but were nearly ten per cent more than during the corresponding month last year. Placements were over 14 per cent fewer than in May, but were over 15 per cent in excess of June, 1926. Increased placements over June last year were made in all industrial divisions except construction and maintenance, the most important gains being in manufacturing, farming and services. The declines under construction and maintenance were almost entirely confined to the railway division of this group. Placements by industrial groups included: manufacturing, 180; logging, 98; farming, 1,551; construction and maintenance, 636; trade, 150; and services, 952, of which 515 were of household workers. Regular employment was secured for 2,316 men and 435 women during the month.

ALBERTA

Orders listed at employment offices in Alberta during June called for over 4 per cent fewer workers than in the preceding month, and over 3 per cent less than during the corresponding month last year. There was a decline of 6 per cent in placements from May, and of over 3 per cent when compared with June, 1926. Placements in logging, farming, services and trade were higher than during June last year, but these gains were more than offset by losses in all other groups. The largest reduction in placements was shown in the railway division of the construction and maintenance group. Industrial groups in which most of the placements were effected during the month were: manufacturing, 223; logging, 86; farming, 1,816; construction and maintenance, 695; trade, 122; and services,

REPORT OF THE EMPLOYMENT OFFICES FOR THE MONTH OF JUNE, 1927

892, of which 568 were of household workers. During the month 2,746 men and 408 women were placed in regular employment.

BRITISH COLUMBIA

Opportunities for employment as indicated by orders received at employment offices in British Columbia during June were over 17 per cent better than in the preceding month, but over 29 per cent less favourable than in the corresponding month last year. There was an increase of over 15 per cent in placements when compared with May, but a decline of nearly 24 per cent from June, 1926. All industrial groups except trade showed less placements during June of this year than last, those in construction and maintenance being the most noteworthy. Placements by industrial divisions included: manufacturing, 507; logging, 355; farming, 598; transportation, 198; construction and maintenance, 658; trade, 210; and services, 922, of which 478 were of household workers. Placements in regular employment numbered 1,579 of men and 538 of women.

Movement of Labour

During June, 1927, the offices of the Employment Service of Canada made 21,518 placements in regular employment, of which 13,414 were of persons for whom the employment found was outside the immediate locality of the offices at which they were registered. Of the latter 1,476 were granted the Employment Service reduced transportation rate, 1,114 going to points within the same province as the despatching office and 362 to other provinces. The reduced transportation rate, which is 2.7 cents per mile with a minimum fare of $4, is granted by the railway companies to bona fide applicants at the Employment Service who may desire to travel to distant employment for which no morkers are available locally.

Quebec offices issued 157 certificates for special transportation, 61 of which were granted by the Montreal office to 52 sawmill workers, 6 bushmen, 2 camp cooks and 1 sawmill engineer going to employment within the Montreal zone. All of the movement outside of the province was from Hull, 96 bushmen receiving transportation to lumber camps in the vicinity of North Bay.

The number of workers travelling from Ontario offices at the special rate was 427, of whom 406 went to various points within the provinces and 21 to outside points. Of the former the North Bay office transported 38 railway construction labourers, 42 bushmen, 6 cooks, 1 miner and 1 mill had to Cobalt. 77 railway construction labourers, 5 carpenters, 4 bushmen, 1 packer, 1 painter, 2 sawmill labourers and 1 fire ranger to Timmins and 7 highway construction labourers within its own zone. From Toronto 1 blacksmith and 1 power man went to Port Arthur, 10 bushmen to Peterboro, 1 transit man to Port Arthur, 1 cook to Timmins and 14 labourers to Cobalt, while Sudbury sent 6 station workers to employment in the Cobalt zone, 1 cook to Niagara Falls and 80 mill hands, 12 bushmen, 1 edgerman and 1 cook within its own zone. Oshawa received 1 tool maker from Windsor, Kingston 1 farm labourer and 1 farm cook from St. Catharines, Timmins 5 labourers from Cobalt and Sudbury, 1 engineer and 1 mechanic from Pembroke. The movement from Ottawa included 1 carpenter going to Oshawa and 1 machine hand to Sudbury, and from London 4 pulpwood cutters to Peterboro and 1 carpenter to Oshawa. The Fort William office issued transportation to 16 construction labourers, 8 bushmen and 3 miners, and the Port Arthur office to 31 bushmen and 16 construction labourers, all of whom went to points within their respective zones. The interprovincial transfers were for the Hull zone, North Bay sending 15 bushmen, 2 labourers, 2 bricklayers and 1 railway construction labourer, and Pembroke 1 carpenter.

The transfers from Manitoba which involved the issuing of special rate certificates were 342 in number, 149 of which were for persons travelling to points within the province and 193 to other provinces. The provincial movement was all from Winnipeg 65 farm hands, 18 farm domestics, 1 painter and 11 hotel and household workers going to Brandon, 17 carpenters, 2 sawmill labourers, 6 bushmen, 3 farm hands, 1 farm domestic and 1 clerk to Dauphin and 21 farm hands, 1 blacksmith helper and 2 hotel workers to points within the Winnipeg zone. The interprovincial transfers from Winnipeg included 5 teamsters and 17 bushmen sent to the Prince Albert zone, 21 carpenters, 1 cook and 1 cookee to Estevan, 6 bushmen to Melfort, 1 cook to Yorkton, 5 teamsters to North Battleford, 9 carpenters to Saskatoon and 31 farm labourers and 11 farm household workers to various parts of Saskatchewan. To the district near Port Arthur, Winnipeg shipped 66 pulpwood cutters, 1 pipe fitter, 1 farm worker, 1 cookee and 7 domestic and hotel workers, to the Fort William zone 2 restaurant workers and to Hull 5 structural iron workers. In addition Dauphin transferred 1 bushman and 1 domestic to the Prince Albert zone.

Offices in Saskatchewan effected 176 transfers all to provincial points. The workers travelling from the Saskatoon office included

12 labourers for the North Battleford zone, 2 sawmill labourers and 26 bushmen for Prince Albert, and 4 carpenters, 1 blacksmith for points within the Saskatoon zone. From the Regina office 2 labourers and 2 teamsters went to Moose Jaw, 1 telephone helper and 1 blacksmith to Saskatoon, 4 teamsters to Weyburn and 1 teacher to Estevan. Moose Jaw issued transportation to 11 teamsters and Prince Albert to 25 pulpwood cutters, all going to points within their respective zones. Of the remainder 70 were farm labourers and 2 farm household workers, the majority of whom went from Moose Jaw and Saskatoon to farms within their own zones, and 12 were hotel and household workers for employment in various parts of the province.

Of the 226 persons who received transportation vouchers from the Alberta offices 202 were for employment within the province and 24 for outside points. The Edmonton office effected 156 of the transfers provincially, including 68 farm hands, 11 miners, 14 bushmen, 11 station men, 10 cooks, 3 mill hands, 3 blacksmiths, 3 axe men, 1 truck driver, 1 carpenter, 4 general labourers, 1 line man, 1 survey man, 2 sheep herders, 1 lumber loader, 1 edgerman, 6 teamsters, 4 groundsmen, 2 farm domestics, 1 sawyer, 1 gas engineer, 3 dairy men and 2 hotel workers, all for employment in the Edmonton zone, and 1 farm labourer for each of the Calgary and Drumheller zones. The remaining 46 were transferred by the Calgary office, 2 carpenters travelling to Lethbridge, 1 sheep herder to Medicine Hat, 1 teamster to Edmonton and 42 farm workers mostly for employment around Drumheller. The movement to other provinces was practically all of farm labourers, the Edmonton office despatching 19 farm hands and 1 housekeeper to Saskatchewan, and the Calgary office 1 farm hand to Manitoba, 2 to Saskatchewan and 1 to British Columbia.

British Columbia offices granted reduced rate certificates to 148 workers, 118 of whom were going to points within the province and 30 to other provinces. The majority of the provincial transfers were from the Vancouver offices, 9 miners, 4 bushmen, 2 blacksmiths, 4 cooks, 3 farm labourers, 3 flunkies and 2 engineers going to Kamloops, and 9 station men, 5 carpenters, 4 labourers, 2 cooks, 1 auto mechanic, 1 labourer and 1 engineer to Penticton, 14 stationmen and 1 cook to Nelson, 3 miners and 2 carpenters to Cranbrook, 1 steel sharpener and 1 engineer to Prince George, 1 farm labourer to Kelowna and 6 labourers, 1 farm teamster, 2 miners, 3 carpenters, 2 flunkies, 1 cook, 1 blacksmith, 1 engineer and 2 waitresses to points within the Vancouver zone. Twelve bushmen were carried at the reduced rate from Kamloops to employment within its own zone and 1 miner from Nelson to Cranbrook. From the Prince George office 1 cook and 1 flunkey were sent to Prince Rupert and 4 bushmen and 1 planer man within the Prince George zone. The remainder were 4 miners, 1 steel sharpener and 1 cook who were transported from Prince Rupert to points in its own zone. Of those going to employment outside the province, Vancouver despatched 2 cooks and 1 carpenter to Calgary and 1 boiler maker to Regina. The remaining 26 were farm workers, 18 going to Alberta points, 7 to Saskatchewan and 1 to Manitoba, the greater number of whom secured certificates from the Vancouver offices.

Of the 1,476 persons who benefited by the Employment Service reduced transportation rate, 786 were carried by the Canadian National Railways, 467 by the Canadian Pacific Railway, 205 by the Timiskaming and Northern Ontario Railway and 18 by the Pacific Great Eastern Railway.

REPORT OF THE EMPLOYMENT SERVICE OF CANADA FOR THE PERIOD APRIL TO JUNE, 1927

THE volume of business transacted by the offices of the Employment Service of Canada during the quarter April to June 1927, was somewhat less than that effected during the corresponding quarter of 1926, as there was a decrease of 6 per cent in the vacancies offered, and of 4 per cent in the placements effected in regular and casual employment. This reduction in both comparisons was largely due to decreased vacancies and placements in the construction and maintenance group, the decline in the railway division of this section being the most marked. All other groups, however, except logging, services and trade, also showed reductions. Nova Scotia and Ontario were the only provinces to record an increase in vacancies offered, while Nova Scotia and Manitoba also showed a gain in placements effected. All the other provinces reported declines in both vacancies and placements, those in British Columbia being the most noteworthy in both instances. The accompanying table gives the vacancies and placements of the Employment Service of Canada by industrial groups in the various provinces during the period April to June, 1927.

From the chart on page 879 which accompanies the article on the work of the employment offices for the month of June, it will be seen that the trend of the curves representing the ratio of vacancies and of placements to applications was upward during the month of April, followed by a decline during May. During the first half of June the curve of vacancies in relation to applications still continued its downward trend, while that of placements

remained steady, but during the latter half of the month both curves again rose to a higher level. During the period April to June last year there was an average of 86 vacancies and of 77 placements for each 100 applications for employment, as compared with 80 vacancies and 73 placements for each 100 applications during the period under review.

During the three months April to June, 1927, the offices of the Service reported that

they had made 97,457 references to positions, and had effected a total of 93,464 placements, of which 63,528 were in regular employment and 29,936 in casual work. Of the placements in regular employment 51,901 were of men and 11,627 of women, while casual work was found for 15,899 men and 14,037 women. A comparison with the same period of 1926 shows that 97,910 placements were then made, of which 67,379 were in regular employment and 30,531 in casual work. Applications for employment during the period under review were received from 93,828 men and 33,763 women, a total of 127,591, in contrast with the registration of 127,429 persons during the same period of 1926. Employers notified the Service during the quarter April to June, 1927, of 102,343 vacancies, of which 70,533 were for men and 31,810 for women, as compared with 109,192 opportunities for work offered during the corresponding quarter a year ago.

In another section of this issue will be found a report in detail of the transactions of the employment offices for the month of June, 1927.

Co-operative Movement in the United States

The United States Bureau of Labour Statistics, in a bulletin issued in March, 1927, gives the results of a statistical survey of co-operative societies (other than agricultural) as existing in the year 1925. The peak of the co-operative movement in the United States it is stated, was attained in 1920, when societies were springing up all over the country, but the adverse economic conditions prevailing for the three following years resulted in a decline in the number of these societies. The report shows that, while the co-operative movement in the United States is behind that in European countries, it has nevertheless reached considerable proportions, the total co-operative membership in the country being over 700,000, and the co-operative business for the same year being in excess of 300,000. The consumers' societies, which have entered many lines of business, reach their highest development in the middle West. These organizations have come through a difficult period but are now showing signs of recovery. Nearly 25 per cent of these societies had sales of $100,000 or more in 1925; and 72 per cent made a profit on the 1925 business averaging 3.9 per cent on sales. The report points out that high dividends have been wrongly regarded as one of the main objects of a successful society, and many a failure of a supposedly strong co-operative organization has been due to the fact that all the earnings have been returned to members in dividends, leaving no reserves for emergencies. Experience shows the necessity of setting aside adequate reserves from the earnings of prosperous years to meet the exigencies of the lean years. Notwithstanding this lesson from past experience more than three-quarters of a million dollars in dividends were distributed to members by the societies which paid dividends.

Credit societies made loans in 1925 aggregating more than $20,000,000, their members numbering about 170,000 persons. These societies returned more than $450,000 in dividends but their value is estimated more by the savings effected for the borrower than by the returns made to stock-holders.

The housing societies are, with one exception, concentrated in New York City where housing conditions have been such as to force the would-be tenant or home owner to look about for a means of escape. The dwellings provided are noted for their relatively small cost and for the saving on upkeep. These organizations have provided living quarters for 1,805 families and control property valued at more than $4,000,000.

The producers' co-operative movement is the least developed of the types studied and shows the least indication of future expansion. The comparative failure of societies of this type is traceable to financial difficulty, lack of selling ability on the part of the members, lack of harmony between manager and man, and a tendency to restrict the number of members who are to share in the profits.

The development of the co-operative movement throughout the country is stated to be "spotty", many societies being isolated and out of touch with other co-operators. However, a determined move toward the spread of the co-operative idea and the closer linking of the co-operative societies appears in the formation of district co-operative leagues. These are primarily educational and propagandist bodies, but they are in certain instances actively forwarding joint buying by the societies in their districts. Where the membership is strong, the co-operative society is found to be a real influence in insuring fair wages, improving working conditions, and hours of labour, and in raising the general cultural level in the locality where it exists.

AGREEMENTS IN SETTLEMENT OF DISPUTES AS TO WAGE INCREASES AND WORKING CONDITIONS ON RAILWAYS IN CANADA

DURING recent months negotiations have been carried on between the officials of the principal railways in Canada and the organizations of those classes of employees not affected by the settlements reached in December, 1926, and January, 1927, for train service employees, conductors, brakemen, etc., shop employees, both mechanics and labourers, and maintenance of way employees. These classes secured increases of substantially 6 per cent, or 4 cents per hour for certain classes, and 3 cents and 2 cents per hour for other classes (Labour Gazette, February, 1927, and preceding issues).

A dispute between the Canadian National Railways and employees in the dining and parlor car service regarding working conditions, and another involving employees at the Montreal wharf as to wages and working conditions, were referred to Boards and the reports, with agreements, were published in the Labour Gazette for January on pages 17 and 19 respectively.

The negotiations between the Canadian Pacific Railway and its clerks, freight handlers, etc., members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees, resulted in a dispute which was referred to a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act, 1907, the report of the Board, with a minority report, being published in the March issue of the Labour Gazette. In the July issue it was stated that following negotiations between the parties which did not bring about a settlement and after a strike vote had been taken by the employees affected, the Minister of Labour brought the parties together and a compromise was agreed to on June 7. In the meantime the company had put into effect an increase of 2½ cents per hour. The Board report had recommended an increase of 4 cents per hour, the minority report recommending no increase. The settlement provided for a further increase of approximately one cent per hour to be distributed among the various classes.

A dispute between the Canadian National Railways' clerks, freight handlers, etc., members of the Canadian Brotherhood of Railroad Employees, and the management was also referred to a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act, 1907, a report of the Board dealing with wages only and a minority report being printed in the Labour Gazette for May. It was arranged that there would be further negotiations as to working conditions, the Board to be re-convened if a settlement were not reached. The chairman of the Board and the member nominated by the employees recommended an increase of 4 cents per hour for all classes affected with an additional ½ cent per hour to be used to increase the rates for certain positions. The member nominated by the railway officials recommended an increase of 2 cents per hour *plus* the extra ½ cent per hour on the same lines as recommended by the majority of the board. The employees offered to agree to the increase recommended by the Board but the management of the railway refused and offered an increase on the basis of 3 cents per hour for monthly employees, that is, $5.00 per month with additional increases for certain positions, and for hourly paid employees an increase of 2 cents per hour with additional increases for certain positions. The employees' representatives refused this and took a strike vote but the company put the proposed schedule into effect as from May 1. The Minister of Labour kept in touch with these developments making certain suggestions and, the parties concerned renewing negotiations, on July 21st it was announced that an agreement had been reached, providing for further increases for certain classes and positions.

Sleeping and dining car employees on the Canadian National Railways, members of the Canadian Brotherhood of Railroad Employees, applied for a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act, 1907, and the dispute was referred to the Board already established to deal with the dispute between the railway and its clerks, freight handlers, etc. The Board succeeded by conciliation in bringing about a settlement providing for increases in wages ranging up to $10.00 per month in some cases, with free meals and uniforms, but the report of the Board with particulars has not yet been received.

Railroad telegraphers on the principal railways in Canada, members of the Order of Railroad Telegraphers, had been negotiating for increases in wages and on July 18 it was announced that an agreement had been reached with the Canadian Pacific Railway Company providing for increases of $5.00 per month for operators, agents and relief agents, $10.82 per month for linemen, $15.00 per month for dispatchers east of Cartier, $12.00 per month for dispatchers west of Cartier, and making certain changes in working conditions. A similar agreement with the Canadian National Railways was announced a few days later.

Negotiations between the locomotive engineers, firemen, etc., and the railways have been postponed for a few weeks.

In connection with a dispute between the Canadian Pacific Railway and certain classes of clerks, storekeepers, etc., in the stores department, and also in connection with a dispute between the railway and certain classes of clerks, etc., in the mechanical departments, applications were made for Boards of Conciliation and Investigation under the Industrial Disputes Investigation Act, 1907 (LABOUR GAZETTE, May, 1927, page 491). In the case of the former, negotiations were resumed at the instance of the Department of Labour and an agreement was reached. In the case of the latter no settlement has yet been reported.

RECENT INDUSTRIAL AGREEMENTS AND SCHEDULES OF WAGES

A SUMMARY is given below of the more important industrial agreements and schedules of wages and working conditions that have recently been received by the Department. Such agreements are summarized each month in the LABOUR GAZETTE. In the majority of cases, the agreements are signed by both employers and employees. Verbal agreements, which are also included in the records, are schedules of rates of wages and hours of labour and other conditions of employment agreed upon between the parties concerned, and in effect though not signed. In addition to these, important schedules of wages are summarized, including civic schedules. In the cases of each agreement or schedule, the rates of wages for the principal classes of labour are given, with other information of general interest.

Manufacturing: Printing and Publishing

TORONTO, ONTARIO.—PUBLISHERS OF THE FOUR DAILY NEWSPAPERS AND INTERNATIONAL PRINTING PRESSMEN AND ASSISTANTS' UNION NO. 1.

(This agreement is an award of the local Board of Arbitration appointed in accordance with the code of the procedure of the International Arbitration Agreement between the American Newspaper Publishers' Association and the International Printing Pressmen and Assistants' Union of North America.)

Agreement in effect from June 1, 1925 until May 31, 1928 and thereafter up to 60 days.

Union to supply help, and such help to be given preference.

Office to meet expense of carfare involved by securing additional subs.

Each publisher shall employ a foreman.

Hours, eight per day, seven per night.

Journeymen called in by office and not required shall receive $2.

Wages, per week, journeymen, from June 1, 1925 to May 31, 1926, day work, $41, night work, $41.50; from June 1, 1926 to May 31, 1927, day work, $41.50; night work, $42; from June 1, 1927 to May 31, 1928, day work, $42.50; night work, $43. Foreman's wages to be fixed by negotiation; overtime, time and one-half; public holidays and Sundays, double rate.

Apprentices to serve five years, scale rising from $15 per week for first 6 months of third year to $28 for second 6 months of fifth year. Commencement wage to be not less than $12 per week. Apprentices to join the union after 6 months.

Foreman to be sole judge of competency.

Chapel having a grievance will notify executive board, who will refer same to publishers or business manager of the newspaper, and if difference is not then adjusted it shall be referred to the joint standing committee of two publishers and two members of the union.

Changes in union constitution or by-laws will not change the agreement.

Differences shall be settled by arbitration.

TORONTO, ONTARIO.—PUBLISHERS OF THREE TORONTO DAILY NEWSPAPERS AND MAILERS' UNION, NO. 5.

Agreement to be in effect from June 1, 1927, to May 31, 1929.

Wages per week, day work, $38; night work, $38.50.

Hours, eight per day; seven per night.

Extras, time and one-half for hour work, minimum of four hours. These men not to receive more than a regular day's pay unless working more than a regular day.

Overtime rate, time and one-half.

Work on evening papers on specified days, double time.

Differences to be settled by arbitration.

Apprentices' wages, per week, from $15 during first 6 months of third year to $25 during second 6 months of fifth year.

WINNIPEG, MANITOBA.—EMPLOYING PHOTO-ENGRAVERS AND INTERNATIONAL UNION OF PHOTO-ENGRAVERS, LOCAL NO. 37.

Agreement to be in effect from October 1, 1926 until September 30, 1929, and thereafter from year to year with 60 days' notice of change.

Minimum wage per week, journeymen, first year, $50; second year, $53; third year, $55.

Hours, 44 per week.

Overtime first three hours, time and one-half; thereafter, Sundays and general holidays, double time.

Seven days' notice shall be given of alteration of schedule time. Seven days' notice of discharge or leaving a job.

Apprentices to serve five years, beginning at the age of sixteen or over. No overtime for first three years, and then only when accompanied by a journeyman. One apprentice to five journeymen.

Apprentices' scale, per week, from $10 in first year to $36 in fifth year.
Only union members to be employed if available.
Foreman to be a union member.
Disputes to be submitted to an arbitration committee of three employers and three union members.
During arbitration, no strikes or lockouts shall be engaged in.
No contracts of employment to be entered into without the sanction of the Union.

Vancouver, B.C.—Three Newspaper Publishing Firms and Vancouver Typographical Union, No. 226.

Agreement to be in effect from January 1, 1927 until December 31, 1929, with 30 days for negotiations regarding new agreement.
Only union members to be employed if available.
Questions arising regarding contract or scale shall be referred to a joint committee.
Foreman to be judge of competency.
If better terms are allowed by the union to any Vancouver newspaper they shall be allowed to the employers under this agreement.
Wages, per hour, morning newspapers, $1.16⅔; 7½ hours' work, six nights per week.
Evening newspapers, $1.06⅔: 7½ hours per day, six days per week.
When a shift is part day and part night, 60 cents in addition to the night scale shall be paid.
Subs coming regularly, doing less than four days' or nights' work per week shall be paid 50 cents extra for each shift worked for the office.
Overtime, time and one-half.
Machinist operators, 50 cents extra per shift.
Work on Christmas Day, Dominion Day and Labour Day, on both morning and evening newspapers, double price. Sunday work, double time; for other holidays, time and one-half, provided it shall be permissible to work on such holidays for five hours for a full days pay, at option of the publishers.
Under extraordinary conditions, men may be required to get out regular editions at single price.
One dollar extra for a call-back.
One apprentice for six journeymen; sixteen years to be minimum age.
Apprentices shall be examined on entering the office.
Minimum wages, third year, one-third of journeymen's wage; fourth year, one-half; last year, two-thirds.
Hours, same as for journeymen.
No overtime while journeymen are available.
Learners on machines to be journeymen members.
Period for learning, seventeen weeks.
Learners may work overtime only if no journeymen are available.
Wages of beginners on machines, other than apprentices, from 40 per cent of scale during first three weeks to 85 per cent of scale during last four weeks. Total period, seventeen weeks.
Foreman shall employ help, and discharge same for incompetency, neglect of duty, violation of office rules, and to decrease the force.
Foreman shall be judge of competency.
Foreman shall not be disciplined for carrying out union instructions.
Journeymen desiring to become learners on machines shall retain their priority on the floor during term of apprenticeship.
No strikes, walkouts, boycotts or lockouts are to take place.
When sufficient men are not available, the foreman may transfer men from night to day.
Extra men may be employed for less than a full day.

Victoria, B.C.—Certain Local Firms and International Typographical Union, Local No. 201.

Agreement to be in effect from January 1, 1927 to December 30, 1929, and for another year unless 60 days' notice of change is given.
Only union members are to be employed.
Minimum wages, night work from January 1, until October 1, 1927, $1.11⅓ per hour or $50.10 per week. From October 1, 1927 until end of contract, $1.14⅔ per hour or $51.60 per week.
Seven hours per night; six nights per week.
Day work, same periods, $1.03⅓ and $1.06⅔ per hour, $46.50 and $48 per week.
Lobster shift, 50 cents over night scale.
Foreman, not less than 75 cents per day above journeymen's scale.
Head machinists, assistant foreman, head admen, machinist operators and machine tenders, not less than 50 cents per day over journeymen's scale.
Call-back, $1.
Overtime beyond seven and one-half hours per day, time and one-half.
No overtime for apprentices if journeymen are available.
Sundays, Labour Day and Christmas Day, double time; other holidays, time and one-half, provided newspapers may work a five-hour day for a full day's pay on such holidays.
One apprentice to five journeymen.
Three apprentices when more than twenty regulars are employed, including machine-tender apprentice.
Wage for apprentices, third year, one-third of journeymen's scale; fourth year, one-half; fifth year, two-thirds.
Apprentices are to be entitled to increases if successful in the International Typographical Union course in printing.
Wages for beginners on typesetting machines, first four weeks, thirty per cent of scale; second four weeks, forty per cent; third, fifty per cent; fourth, sixty per cent; fifth, seventy per cent; sixth, eighty per cent.
Proof readers must be union members.
All proofs must be read by a member of the chapel.
Under extraordinary conditions, men may be required to get out regular edition at single price if work is not completed within regular hours.

Construction: Buildings and Structures

Toronto, Ontario.—Various Master Painters, Company, Firm or Contractor and Painters, Decorators and Paperhangers of America, Local No. 151.

(This agreement was drawn up to settle the strike reported in the Labour Gazette for July and in this issue and accepted by the majority of the 40 employers concerned, the employees of the remainder continuing on strike.)

Agreement to be in effect from May 1, 1927 to May 1, 1928.

Hours, eight per day; forty-four per week.

Overtime, first four hours, time and one-half. Shift work to be single time. Saturday afternoon, Sundays and holidays, double time.

Minimum wages, per hour, journeymen, from June 6 to August 15, 1927, 80 cents; from August 15 to May 1, 1928, 85 cents.

Workmen sent to outside jobs shall be paid railway fare and expenses, regular pay during the day, or berth for the night. Allowance for board and lodging. Overtime on country work to be permitted if not interfering with local union.

Transportation beyond the city limits to be provided; workmen to travel on employers' time.

Any mechanic not proving satisfactory may be discharged, wages being paid at once.

HAMILTON, ONTARIO.—CERTAIN MASTER PAINTERS AND CONTRACTORS AND BROTHERHOOD OF PAINTERS, DECORATORS AND PAPERHANGERS OF AMERICA, LOCAL NO. 205.

Agreement unsigned but acknowledged by letter.

Minimum wage, per hour, 75 cents.

Hours, eight per day, four on Saturday. Night work, nine hours' pay for eight hours' work.

Overtime, after eight hours, time and one-half; overtime to be eliminated as far as possible.

Travelling time and transportation both ways to men working 12 miles or more from the City Hall. Within this radius, travelling time one way and transportation both ways.

Men required to stay on job shall recive board and transportation.

No work on Labour Day. Double time for specified holidays.

No sub-contracting; no man to accept work on his own behalf if fully occupied with work of an employer.

In failure to agree on wages and conditions, disputes to be submitted to an arbitration board of one from each party and a chairman mutually agreed on.

NIAGARA FALLS, ONTARIO, AND SURROUNDING TERRITORY.—BUILDERS' EXCHANGE, MASTER CARPENTERS OF THE CITY OF NIAGARA FALLS AND UNITED BROTHERHOOD OF CARPENTERS AND JOINERS OF AMERICA, LOCAL NO. 713.

Agreement to be in effect from March 1, 1927 until February 28, 1929, with two months' notice of change.

Hours, eight per day, four on Saturdays.

Minimum wage, per hour, journeymen, from March 1, until July 31, 1927, 85 cents; from August 1, 1927 until February 28, 1929, 90 cents.

Overtime, until 9 p.m., and Saturday afternoons, time and one-half. All other, double time.

Master carpenters may work on their contracts. Only union men to be hired when available. If not, non-union men may be hired, being given 12 days to join the union.

Men moved from one job to another during working hours to be paid car-fare and travelling time.

If alteration of agreement is desired, an effort shall be made to reach a settlement on or before February 1. If party receiving notice of desired change fails to meet party sending notice, it shall be presumed the change is granted, to be effective on March 1 following.

Apprentices to be employed only when there are journeymen, with one to five journeymen. Apprentices may work overtime only when working with journeymen.

Foremen, five cents per hour above union rate.

Business agent may visit the job at any time, but not interfere with same.

Men in contractors' shops may work if necessary one hour per day overtime on machines at straight time rates.

No member may work after regular hours for any person else while employed by a recognized contractor.

Any grievance shall be submitted to a committee of two from each party.

WELLAND, ONTARIO.—EMPLOYING PLUMBERS AND JOURNEYMEN PLUMBERS AND STEAMFITTERS, LOCAL NO. 595.

Agreement to be in effect from May 1, 1927 until April 30, 1928, or for another year, with 90 days' notice of change.

Hours, eight per day; four on Saturdays.

Overtime, Saturday afternoons, Sundays and all legal holidays, double time.

Transportation and board for men working out of town. If returning daily, same to go one way in their own time.

None but union men to be employed or those willing and eligible to become so.

Not more than one apprentice to three journeymen, additional helpers being allowed as required.

Wages, per hour, plumbers and steamfitters, 95 cents.

PORT ARTHUR AND FORT WILLIAM, ONTARIO.—TWIN CITY BUILDING CONTRACTORS AND BRICKLAYERS, MASONS AND PLASTERERS' INTERNATIONAL UNION, LOCAL NO. 25.

Verbal agreement, to be effective from May 1, 1927 until April 30, 1928, with three months' notice of change.

Minimum wage, per hour, $1.25.

In event of men being brought in from other parts, where higher rate is paid, higher rate shall prevail with all men on the job.

Hours, eight per day, four on Saturdays.

When two shifts are worked, no member to work more than eight hours in twenty-four.

Overtime and holiday work to be performed only in cases of extreme emergency.

For out-of-town work, walking time to be allowed, three miles per hour. Men sent from one job to another to be paid travelling time. Transportation to be paid for out-of-town work, except in case of a man quitting of his accord.

A shack shall be supplied.

The steward shall examine all scaffolding. No perpendicular ladders to be used. Where scaffold is over 20 feet high, the scaffold beneath shall be left intact.

Winnipeg, Manitoba.—Master Plasterers' Section of the Builders' Exchange and Operative Plasterers and Cement Finishers' International Association, Local No. 334.

Agreement to be in effect from June 21, 1927 until December 31, 1928, with one month's notice of change.

No stoppage of work until matter under dispute is brought before the Joint Arbitration Committee and a settlement reached. Committee shall consist of three members of each of the parties, who shall investigate into and try to settle same. Settlement shall be binding after union ratification.

No sub-contracting to be done by members.

Hours, eight per day; four on Saturdays.

No work on Saturday afternoons, Sundays or specified holidays.

Overtime, double time. Members will be fined for failing to report known cases of overtime work at regular rates.

When desirable, three shifts shall be worked with half an hour for a meal.

No more than two hours overtime per day on country jobs.

Transportation for out-of-town work; travelling time up to eight hours in twenty-four, at regular rate. Travelling time in the city when changing jobs.

Extra car-fare and travelling time for work outside the city.

Minimum wage per hour, $1.25; from January 1, 1928, $1.35.

In event of any increase in wages in other basic trade, plasterers rate will advance at once.

Members must report the fact of working with any plasterer not a member in good standing of the society.

Foremen must be members of the local.

Two bosses must not use the tools unless one or more union men work for each boss.

Edmonton, Alberta.—General Contractors' Association of Builders' Exchange and Bricklayers' and Masons' International Union, No. 1.

Agreement to be in effect from May 1, 1927 until April 30, 1929. New agreement to be negotiated during February, 1929.

Hours, eight per day for five days; four on Saturdays.

Minimum wage, per hour, $1.35. Foremen not less than 10 cents extra per hour.

Overtime only for saving of life or property, at time and one-half to 9 p.m., thereafter, and Saturday afternoon, Sundays and all legal holidays, double time.

Edmonton, Alberta.—General Contractors' Association of Building Industries and District Council of Carpenters, Locals 1325 and 2607.

Agreement to be in effect from May 1, 1927 until April 30, 1929, and for an additional year unless notice of change is given before January 31.

Hours, eight per day; four on Saturdays.

Minimum wage, per hour, 95 cents.

Double time for holiday work. No work on Labour Day.

Overtime, time and one-half.

Members of Carpenters' locals to be given preference of employment.

Transportation and Public Utilities: Electric Railways

Cornwall, Ontario.—Cornwall Electric Railway Company and Amalgamated Association of Street and Electric Railway Employees of America, Division No. 946.

Agreement to be in effect from February 1, 1927 until February 1, 1928.

The company agrees that all employees covered by the agreement may become and remain members of the Association during life of the agreement. Employees may have necessary leave of absence to attend conventions or do committee work.

Promotion and transfers shall be based on seniority and efficiency.

Uniforms to be supplied by company.

Hours per day, in power houses running continuously, eight, with alternating shifts.

Wages, per hour, passenger conductor motormen, first year, 35 cents; second year, 37 cents; third year, 40 cents.

Freight services, motormen, 50 cents; brakemen, 37 cents. Shop men: per hour, carpenters, 45 cents; general hands, 40 cents; pitmen, 38 cents; helpers, 35 cents.

Power house employees, line and meter men and gas department paid by the month.

Track maintenance men: foremen, 42 cents. labourers, 37 cents.

In event of Sunday operation, time and one-half for Sunday work.

Winnipeg, Manitoba.—Winnipeg Electric Railway Company and Motormen, Conductors and Busmen of the Company Represented by a Committee.

Agreement to be in effect from May 1, 1927 until April 20, 1930, and thereafter with 30 days notice of change prior to May 1 in any year.

In event of extreme emergency such as result of war or other catastrophe, affecting cost of living or revenue, either party may give 30 day's notice of desire to terminate agreement on April 30 in any year, and negotiate a new one.

This agreement followed one effective between May 1, 1926 and April 30, 1927, findings of a Conciliation Board of August, 1926. It was concluded after arbitration between the two parties and gives an increase of one cent per hour to each class of worker, and various other changes in working conditions.

Wages, per hour, one-man car operators and busmen, first six months, 53½ cents; second six months, 56½ cents; second year, 60½ cents; thereafter, 63½ cents. Two-men car operators, first six months, 48 cents; second six months, 51 cents; second year, 55 cents; thereafter, 58 cents. Sunday rate, 5 cents extra per hour.

On May 1, 1928, and again on May 1, 1929, one cent per hour will be added to the rates.

Extra motormen, conductors and busmen, reporting every day, minimum of $20 per week.

Overtime, time and one-half.

Special allowance for reporting time, pull-in time and box time.

Seniority subject to efficiency to be given preference.

Uniforms to be furnished by company.

Runs shall conform as nearly as possible to an eight-hour day.

Time in excess of eight hours and twenty minutes to be overtime.

Minimum time for runs, seven hours and forty-five minutes.

No run shall exceed a thirteen-hour spread.

Men for motor bus operation shall be taken from the service, runs being available only to qualified men.

Men may train for buses between August 1 and October 1 in any year.

Reasonable leave will be granted on application.

Any employee holding office in the employees' organization, requiring absence from the company's employ shall during absence retain seniority rights.

Such officers will be granted leave when regular operation of the service will permit.

In lay-off owing to slack work, youngest men in service shall be first laid off.

Men laid off shall be given preference of employment.

Employees shall have free transportation on all lines of the company and may have trip passes over certain other lines.

Both parties agree not to allow outside influence or interference in any dispute between them.

Disputes regarding wages or working conditions or other matters, if not satisfactorily adjusted by railway officials, shall be considered by a body of officials of the company and a grievance committee of motormen, conductors and busmen on the seniority list, who shall endeavour to reach a satisfactory settlement.

No discrimination by either party against any employee for joining or continuing as a member of any labour organization or for not being a member of same.

Transportation and Public Utilities: Telegraphs and Telephones

ALBERTA.—ALBERTA GOVERNMENT TELEPHONES, REGULATIONS AND WAGE SCHEDULE FOR OUTSIDE FORCES.

In effect from March 1, 1927 until March 1, 1928, and thereafter from year to year unless notice in writing is given on or before February 1 of any year.

Hours, eight per day on exchange, rural and long distance work. Ordinary working hours 8 a.m. to noon and 1 p.m. to 5 p.m. except in Calgary, Lethbridge and Medicine Hat. At these points, exchange employees other than plant inspectors will work 44 hours per week, having Saturday afternoon off.

In shift, any eight consecutive hours (one hour intermission for meals) shall constitute a day, including Saturday afternoons.

Employees waiting orders or material will be paid at standard rate, and employees relieved from duty during the day (except by their own fault, or request, or on account of weather) to receive not less than one-half day's pay.

Overtime, Sundays and holidays, time and one-half.

From 10 p.m. to 8 a.m., double time.

Overtime not allowed employees on monthly salary except in extraordinary cases such as storms, fires or floods.

Automatic men to be allowed overtime for Sundays and holidays when required in addition to their regular shift.

Monthly employees, two weeks' holidays with pay each year, after one year's employment.

Hourly employees, one week's holiday per year after one year's employment.

Car-fare and transportation to be furnished by the department when considered necessary.

Board and lodging to be allowed inspectors and switchboard men on duty away from headquarters.

Board and lodging to be allowed to other employees away from headquarters on temporary jobs.

Apprentices shall serve four years for "inside work" such as shop, switchboard and installation work and for cableman; three years for "outside work" such as line construction and maintenance.

Nothing in the schedule to reduce pay of an employee now getting a higher rate for work classified in the wage schedule.

No discrimination against employees on account of affiliation or relation they may or may not have.

Department will receive complaints from any employee or committee of employees.

Wage schedule: per month, foreman, $180; foreman, rural and long distance, $170; wire chiefs, $180 and $160; district plant inspectors, $152.50; plant inspectors, $150; switchboardmen (travelling), $150. Switch foreman, rural and long distance, $6.35 per day; sub-foreman (exchange), chief installer, 85 cents per hour. Switch foremen (class A), $180 per month; (class B) and (class C), 88 and 85 cents per hour.

Per hour-cable splicers, 86 cents; troublemen, switchboardmen, switchmen (automatic), linemen (exchange), 80 cents; repairmen, 80 cents; installers, rackmen, 75 cents; linemen (rural and long distance), $5.85 per day. Floating gang per day, with board and lodging, foremen, $5.35; sub-foremen, $4.65; linemen, $4.25. Switchboardmen or linemen transferring to district work, $130 per month for the first year.

After three years' service, in any grade above apprentice, a merit rate will be added to the base rate as follows: foremen, wire chiefs and switch foremen, class "A", $5 per month; plant inspectors and travelling switchboardmen, $2.50 per month Employees on daily rate, 15 cents per day; employees on hourly rate, 2 cents per hour.

Rates for apprentices, during first six months, plant inspector, $57 per month; linemen, rural and long distance, $3.15 per day; linemen, floating gang, $1.65 per day; others, per hour, 28½ cents.

The schedule provides specified increases every six months.

Higher salaries than those in the schedule for journeymen will be paid when warranted by ability and quality of service.

Transportation and Public Utilities: Electricity and Gas

WINNIPEG, MANITOBA.—WINNIPEG ELECTRIC COMPANY AND THE GAS WORKERS' UNION OF WINNIPEG.

Agreement to be in effect from May 1, 1927 until May 1, 1928, and from year to year unless changed after 30 days' notice.

No discrimination against employees for being or not being union members, but foremen or sub-foremen shall not be members of the union.

Wages per hour, heaters, pusher operators, 64 cents; producer operators, door lifter operators, quenching car operators, 62 cents; handy men, pipe fitter, tinsmith, 60 cents; yard men, coke wheelers and labour employed in coal cars and purifying house or any part of the gas works, 45 cents.

Overtime, time and one-half. Regular rate for Sunday and holiday work when same occurs in regular shift.

Employees shall enjoy same privileges as regards passes on Company lines as previously.

Hours, 8 per day for men on the battery, 9 per day for yard men and labourers.

Leave of absence to be granted upon application to respective foremen. Union officers to be granted leave for union business when operation of works will permit.

Employees on relay shifts shall change shift in rotation as arranged by the Company and the Union.

Seniority and efficiency to be given preference in case of vacancies.

Grievances will be adjusted by the foreman and union representatives if possible, or by superintendent of plant, orders of foreman being carried out in the meantime.

Representatives of the Company and the union to meet regarding all questions which may arise.

BUILDING PERMITS ISSUED IN CANADA IN JUNE, 1927

THE value of the building permits issued by 63 cities during June aggregated $18,399,858; this was a seasonal decline of 10.4 per cent from the May total of $20,532,147, while in the more significant comparison with June, 1926, there was a falling-off of only 1.7 per cent, the value for that month having been $18,718,050. The aggregate for the first half of 1927, however, exceeded that of the first half of any other year on record for these

[1] Report not received.

cities; standing at $81,373,619, it was 3.3 per cent higher than in the first half of 1926, the previous high level. As has been pointed out in other issues, the wholesale costs of building materials this year have averaged considerably less than in any other of the last eight years.

Some 50 cities furnished detailed statements showing that they had issued over 1,700 permits for dwellings valued at more than $7,800,000 and some 3,300 permits for other buildings estimated at approximately $9,000,000. During May, authority was given for the erection of nearly 2,000 dwellings and some 4,000 other buildings, valued at approximately $9,000,000 and $10,250,000 respectively.

Improvement over May, 1927, was reported in New Brunswick and Quebec, where there were gains of 113.2 and 9.9 per cent respectively. Of the declines elsewhere, that of $1,413,294 or 16.4 per cent in Ontario was most pronounced, although Alberta registered a greater proportionate decrease of $421,141 or 31.6 per cent.

As compared with June, 1926, there were increases in all provinces except Ontario and British Columbia, in which there were reductions of 10.6 per cent and 38.1 per cent respectively. Saskatchewan reported the greatest increase, of $751,215 or 95.1 per cent.

Of the larger cities, Montreal recorded an increase in the value of the permits issued, as compared with both the preceding month and the corresponding month in 1926; Toronto and Winnipeg showed a decline in the former and an advance in the latter comparison, while in Vancouver the reverse was the case, there being an increase over May, but a reduction as compared with June, 1926. Of the other centres, Halifax, New Glasgow, Moncton, Saint John, Shawinigan Falls, Sherbrooke, Westmount, Belleville, Chatham, Kitchener, Oshawa, St. Catharines, St. Thomas, Sarnia, Sault Ste. Marie, Woodstock, Regina, Lethbridge, Prince Rupert and South Vancouver reported improvement in both comparisons.

Table I gives the value of the building permits issued by 63 cities during May, 1927, and June, 1926; the 35 cities for which records are available since 1910 are marked with asterisks.

Cumulative Record for First Half Year, 1920-1927.—Table II is a record by provinces of the building permits issued by 63 cities during the first six months of each year since 1920; it also shows the totals for the same years, the proportion that the six months' aggregates bear to the yearly totals, and the average index numbers of wholesale prices of building materials and of wages in the building trades.

The 1927 aggregate for the first half year was $81,373,619; this was an increase of 3.3 per cent, 23.5 per cent, 34.1 per cent, 11.4 per cent, 14.2 per cent, 45.9 per cent, and 31.8 per cent, as compared with the first six months of 1926, 1925, 1924, 1923, 1922, 1921

TABLE II.—PROVINCIAL TOTALS OF BUILDING PERMITS ISSUED BY 63 CITIES DURING FIRST HALF YEAR, 1920-1927

[2] Compiled by Department of Labour, Average, 1913=100.

and 1920, respectively. Since the average index number of wholesale prices of building materials is this year considerably lower than in any other since 1920, the advance in the volume of construction is greater than would be indicated by the percentage gain in the value of the building authorized by the co-operating cities.

Provincial Totals of Building Permits Issued.—Nova Scotia, New Brunswick, Ontario, Saskatchewan and Alberta reported higher aggregates of building permits issued than in the first six months last year; in Saskatchewan, in fact, the total was greater than in any other year since 1920. Nova Scotia registered the greatest proportionate gain of $714,382, or 242.7 per cent, while the largest absolute increase of $4,667,963, or 14.9 per cent was in Ontario. Of the remaining provinces, Quebec showed a decline of only 3.0 per cent; in Manitoba and British Columbia, however, there were reductions of 40.7 per cent and 10.8 per cent respectively

During the first six months of this year, the 31 cities furnishing returns in Ontario reported 44.2 per cent of the total value of the building authorized, as compared with 39.8 in the same months of 1926. In Quebec, the proportion declined from 24.9 last year to 23.3 in the elapsed months of 1927, in British Columbia from 16.7 per cent to 14.5 per cent and in Manitoba from 10.8 to 6.2 per cent. There were increases in this proportion in the remaining provinces.

Totals of Permits Issued by Four Leading Cities.—In Table III are given the aggregates of permits issued in the four largest cities in the first half of each year since 1920, together with the proportion that their totals are of the yearly and half-yearly totals for the 63 cities. The building authorized was valued at $35,330,568 in the first six months of 1927; this was 12.7 per cent lower than in the same months last year, but it was higher than in any other year of the record except 1923, when the cost of building materials was considerably higher.

The aggregate for Montreal was rather lower than in 1926, but was greater than in any other year except 1923. The total for Toronto, which was exceeded only in 1923 and 1922, was 9.1 per cent above last year's aggregate. Winnipeg registered a smaller total of estimated building than in the first half of 1926, but greater than in any other of the eight years shown in Table III, except 1920, while in Vancouver the 1927 aggregate was only exceeded in 1926.

TABLE III.—BUILDING PERMITS ISSUED BY FOUR LARGEST CITIES IN FIRST HALF YEAR, 1920-27

City	1927	1926	1925	1924	1923	1922	1921	1920

Maternity Allowances in Australia

The Australian Maternity Allowance Act, passed by the Federal Parliament in 1912, provided for the payment of five pounds in the case of each confinement resulting in the birth of a viable child whether such child was born alive or dead. The mother must be a native of the Commonwealth or intend to settle therein. No payment is made in the case of an aboriginal or an Asiatic. The Commissioner of Maternity Allowances recently issued a statement showing the number of claims granted, the expenditure and cost of administration of the Act during the twelve months ending June 30, 1926. During that period allowances were granted in 136,171 cases, entailing an expenditure of £680,855. In addition the cost of administration of the Act amounted to £15,702. There were 517 cases reported where maternity allowances were rejected because of the fact that the requirements of the law were not fulfilled.

FAIR WAGES CONDITIONS IN DOMINION GOVERNMENT CONTRACTS

THE Department has recently received information regarding certain contracts executed by the Government of Canada which included among their provisions the fair wages conditions sanctioned by Order in Council for the protection of the labour to be employed. The contracts (Group "A") awarded in connection with the works of construction contain the general fair wages clause, which is as follows:—

1. All mechanics, labourers, or other persons who perform labour in the construction of the work hereby contracted for, shall be paid such wages as are generally accepted as current from time to time during the continuance of the contract for competent workmen in the district in which the work is being performed for character or class of work in which they are respectively engaged, and if there be no current rates in such district, then fair and reasonable rates, and shall work such hours as are customary in the trade, in the district where the work is carried on, or if there be no custom of the trade as respects hours in the district, then fair and reasonable hours, unless for the protection of life and property, or for other cause shown to the satisfaction of the Minister of Labour, longer hours of service are required. The Minister of Labour may at any time and from time to time determine for the purposes of this contract, what are the current or fair and reasonable rates of wages and the current or fair and reasonable hours, and may from time to time rescind, revoke, amend, or vary any such decision, provided that his determination and any amendment or variation shall not be operative prior to the period of three months immediately preceding the date thereof.

The contract for interior fittings (Group "B") awarded contains the general fair wages clause, and other conditions for the protection of the labour employed in the execution of same, as sanctioned by the Fair Wage Order in Council as follows:—

All workmen, labourers, or other persons who perform labour in the construction of the work hereby contracted for, shall be paid such wages as are generally accepted as current from time to time during the continuance of the contract for competent workmen in the district in which the work is being performed, and if there be no current rate in such district, then a fair and reasonable rate, and shall work such hours as those fixed by the custom of the trade as respects hours in the district where the work is carried on, or if there be no custom of the trade as respects hours in the district then fair and reasonable hours, except for the protection of life and property, or on due cause shown to the satisfaction of the Minister of Labour. In the event of a dispute arising as to what is the current or a fair and reasonable rate of wages or what are the current hours fixed by the custom of the trade or fair and reasonable hours it shall be determined by the Minister of Labour, whose decision shall be final; payment may also be withheld of any moneys which would otherwise be payable to the contractor until the Minister of Labour's decision has been complied with.

By the term "current wages" and the term "hours of labour fixed by the custom of the trade" in the foregoing are meant respectively the standard rates of wages and hours of labour either recognized by signed agreements between employers and workmen in the district from which the labour required is necessarily drawn or actually prevailing, although not necessarily recognized by signed agreements.

Three of the contracts above mentioned contained schedules of rates and hours based on the current standards of the district in these respects. These schedules are given below.

A statement was also received as to supplies ordered by the Post Office Department subject to the regulations for the suppressing of the sweating system and the securing of fair wages, etc.

The general labour conditions sanctioned by the Fair Wages Order in Council are as follows:—

1. Where there are special circumstances which in the judgment of the Minister of Labour make it expedient that he should do so, he may decide what are the current or fair and reasonable rates of wages for overtime, and what is the proper classification of any work for the purposes of wages and hours. Immediately upon receipt of notice of any decision of the Minister of Labour hereunder the contractor shall adjust the wages and hours and classification of work so as to give effect to such decision. In case the Contractor shall fail so to do, or to pay to any employee or employees for any services performed or for any hours of labour, wages according to the rates fixed therefor by the Minister of Labour hereunder regarding overtime and classification, the Minister of Labour may authorize and direct the Minister to pay any such wages at the rates so fixed and deduct the amount thereof from any moneys owing by the Government to the Contractor and any such payment shall for all purposes as between the Contractor and the Government be deemed and taken to be payment to the Contractor, and the Contractor shall be bound in every particular by any such authority, direction and payment as aforesaid. The powers of the Minister of Labour hereunder shall not be exercised as to any employee or employees where it is established to his satisfaction that an agreement in writing exists and is in effect between the Contractor and the class of employees to which such employee or employees belong or the authorized representatives of such class of employees fixing rates of wages, overtime conditions and hours of labour.

2. The Contractor shall post and keep posted in a conspicuous place on the premises where the contract is being executed, occupied or frequented by the workmen, the Fair Wages Clause or Schedule inserted in his contract for the protection of the workmen employed, also any decision of the Minister of Labour under the preceding paragraph.

3. The Contractor shall keep proper books and records showing the names, trades, and addresses of all workmen in his employ and the wages paid to and time worked by such workmen, and the books or documents containing such record shall be open for inspection by the Fair Wage Officers of the Government at any time it may be expedient to the Minister of Labour to have the same inspected.

4. The Contractor shall not be entitled to payment of any money which would otherwise be payable under the terms of the contract in respect of work and labour performed in the execution of the contract unless and until he shall have filed with the Minister in support of his claim for payment a statement attested by statutory declaration, showing (1) the rates of wages and hours of labour of the various classes of workmen employed in the execution of the contract; (2) whether any wages in respect of the said work and labour remain in arrears; (3) that all the labour conditions of the contract have been duly complied with; or, in the event of notice from the Minister of Labour of claims for wages, until the same are adjusted. The Contractor shall also from time to time furnish the Minister such further detailed information and evidence as the Minister may deem necessary in order to satisfy him that the conditions herein contained to secure the payment of fair wages have been complied with, and that the workmen so employed as aforesaid upon the portion of the work in respect of which payment is demanded have been paid in full.

5. In the event of default being made in payment of any money owing in respect of wages of any workmen employed on the said work and if a claim therefor is filed in the office of the Minister and proof thereof satisfactory to the Minister is furnished, the said Minister may pay such claim out of the moneys at any time payable by His Majesty under said contract and the amounts so paid shall be deemed payments to the Contractor.

6. These conditions shall extend and apply to moneys payable for the use or hire of horses or teams, and the persons entitled to payments for the use or hire of horses or teams shall have the like rights in respect of moneys so owing them as if such moneys were payable to them in respect of wages.

7. With a view to the avoidance of any abuses which might arise from the sub-letting of contracts it shall be understood that sub-letting other than such as may be customary in the trades concerned is prohibited unless the approval of the Minister is obtained; sub-contractors shall be bound in all cases to conform to the conditions of the main contract, and the main Contractor shall be held responsible for strict adherence to all contract conditions on the part of sub-contractor; the contract shall not, nor shall any portion thereof be transferred without the written permission of the Minister; no portion of the work to be performed shall be done at the homes of the workmen.

8. All workmen employed upon the work comprehended in and to be executed pursuant to the said contract shall be residents of Canada, unless the Minister is of opinion that Canadian labour is not available or that other special circumstances exist which render it contrary to the public interest to enforce this provision.

Department of Public Works

Contracts in Group "A" (Construction)

Dredging bed of River St. Louis, P.Q. W. H. Robinson, Toronto, Ont. Date of contract, June 21, 1927. Amount of contract, approximate expenditure, $33,624.

Construction of a new hull and housing for dredge P.W.D. "Arrow Lakes", British Columbia. Names of contractors, McCharles and McDougall of Nelson, B.C. Date of contract, June 22, 1927. Amount of contract, $7,875.

Repairs to wharf and approach at Quatsino, B.C. Name of contractors, McDonald Pile Driving Company, Limited, Victoria, B.C. Date of contract, June 27, 1927. Amount of contract, approximate expenditure, $1,488.20.

Dredging main entrance of channel to harbour and grain elevator at Collingwood, Ont. Name of contractors, The C. S. Boon Dredging and Construction Company, Limited, Toronto, Ont. Date of contract, June 30, Names of contractors, O. F. Cummins and 1927. Amount of contract, approximate expenditure, $29,600.

Reconstruction of wharf and approach in concrete at St-Ignace de Loyola, Berthier County, P.Q. Names of contractors, Munn and Shea, Limited, Montreal, P.Q. Date of contract, July 5, 1927. Amount of contract, approximate expenditure, $4,490.

Dredging areas numbers 1 and 2 in La Have River, N.S. Name of contractors, Beacon Dredging Company, Limited, Halifax, N.S. Date of contract, July 5, 1927. Amount of contract, approximate expenditure, $66,600.

Dredging entrance channel, Port Hope, Ont.—deepening East side of Port Hope Sanitary Company's dock and North end of West Harbour. Names of contractors, J. P. Porter, R. F. Porter and L. T. Porter, St. Catharines, Ont., of the firm of J. P. Porter and Sons. Date of contract, July 7, 1927. Amount of contract, approximate expenditure, $15,000.

Dredging entrance channel and basin at Varennes, P.Q. Name of contractors, Les Chantiers Manseau, Sorel, P.Q. Date of contract, July 8, 1927. Amount of contract, approximate expenditure, $48,770.40.

Reconstruction of wharf at Beloeil, Vercheres County, P.Q. Name of contractor, Moise Guertin, of Beloeil Village, P.Q. Date of contract, July 8, 1927. Amount of contract, approximate expenditure, $3,265.

Repairs to West Pier and construction of a wooden sheet pile wall, etc., in the rear of the east side of the harbour of Port Maitland, Ont. Name of contractor, Vivian T. Bartram, Toronto, Ont. Date of contract, July 8, 1927. Amount of contract, approximate expenditure, $26,485.34.

Dredging channel at Victoria Harbour, B.C. (Hospital Rock). Name of contractors, North Western Dredging Company, Limited, Vancouver, B.C. Date of contract, July 11, 1927. Amount of contract, approximate expenditure, $35,028.

Dredging areas numbers 1 and 2 at Victoria Harbour, B.C. Name of contractors, North Western Dredging Company, Limited, Vancouver, B.C. Date of contract, July 11, 1927. Amount of contract, approximate expenditure, $9,100.

Dredging channel at the mouth of the Desbarats River (Walker River), Ont. Name of contractors, A. B. McLean and Sons, Sault Ste. Marie, Ont. Date of contract, July 12, 1927. Amount of contract, approximate expenditure, $3,000.

Deepening areas at elevators and in front of new elevator of the Great Lake Transportation Company at Midland, Ont. Name of contractors, The Randolph Macdonald Company, Limited, Toronto, Ont. Date of contract, July 13, 1927. Amount of contract, approximate expenditure, $135,252.

Dredging in the Harbour, Owen Sound, Ont. Name of contractors, The C. S. Boon Dredging and Construction Company, Limited, Toronto, Ont. Date of contract, July 13, 1927. Amount of contract, approximate expenditure, $13,600.

Dredging in main channel, Lake St. Louis, P.Q. Name of contractors, Les Chantiers Manseau, Sorel, P.Q. Date of contract, July 15, 1927. Amount of contract, approximate expenditure, $60,566.31.

Dredging area between outer end of entrance piers at Cobourg, Ont. Name of contractors, J. P. Porter and Sons, St. Catharines, Ont. Date of contract, July 18, 1927. Amount of contract, approximate expenditure, $19,800.

Dredging between piers at entrance of western channel, and entrance of eastern channel, Toronto, Ont. Name of contractors, J. P. Porter and Sons, St. Catharines, Ont. Date of contract, July 18, 1927. Amount of contract, approximate expenditure $19,397.10.

Alterations to toilet rooms in the Customs House, St. John, N.B. Name of contractors, W. E. Emerson and Sons, Limited, St. John, N.B. Date of contract, June 23, 1927. Amount of contract, $11,298.

Contract in Group "B" (Interior Fittings)

Construction of booths in the Victoria Memorial Museum, Ottawa, Ont. Name of contractors, R. A. Sproule and Son, Ottawa, Ont. Date of contract, July 12, 1927. Amount of contract, $2,985.

Contracts containing schedule of wages and hours

Repairing, reconditioning and erection of 100-ton electrically operated derrick Songhees Dry Dock at Esquimalt, B.C. Name of contractors, The Pacific Construction Company, Limited, Vancouver, B.C. Date of contract, June 27, 1927. Amount of contract, $13,665.

Department of Railways and Canals

Contracts in Group "A" (Construction)

Metal coating repairs to concrete pedestals of Cap Rouge Viaduct, La Tuque Subdivision, Saguenay Division, P.Q. Name of contractors, The Wertz Company Limited, Toronto, Ont. Date of contract, May 6, 1927. Amount of contract, approximate expenditure, $20,000.

Placing of stone protection along certain portions of the Summit Level of the Welland Canal, between the Guard Lock, south of Thorold, and the Aqueduct at Welland, Ont. Name of contractors, A. E. Rigby and Son, St. Catharines, Ont. Date of contract, July 5, 1927. Amount of contract, approximate expenditure, $11,500.

Post Office Department

The following is a statement of payments made in July, 1927, for supplies ordered by the Post Office Department, under contracts which are subject to the Fair Wages policy:

Nature of Orders	Amount of Orders
	$ cts.
Making metal dating stamps and type, also other hand stamps and brass crown seals	1,384 57
Making and repairing rubber stamps, daters, etc.	127 53
Making up and supplying letter carriers' uniforms, etc.	17,942 42
Stamping pads, ink, etc.	289 71
Bag fittings	37,589 37
Letter pouches	47 00
Scales	504 10
Mail bagging	2,787 34
Letter boxes	774 20

Census of Office Occupations in Massachusetts

The Department of Labour and Industries of Massachusetts has published a bulletin giving the rates of wages and other information regarding office employees in the State as on May 1, 1926, being part III of the annual report on statistics of labour. The information in the bulletin is based on statements received by the Department from 1,075 establishments, classifying their office employees by sex and occupation and giving the scale of wages enjoyed by each occupation. The complete returns show that in the establishments investigated there were 22,427 office workers, of whom 8,182 (36.5 per cent) were males and 14,245 (63.5 per cent) were females. Thus for every 4 males employed in office work there were seven females. According to the occupational section of the Fourteenth Census of the United States there were in the State in 1920 175,000 office employees of whom 72,000 were males and 103,000 females. The present survey thus represents for all occupations 12.8 per cent of the total number of persons employed as office workers in Massachusetts, the number of males and females covered representing 11.3 per cent and 13.8 per cent of the respective totals for the State.

Four office occupations are dealt with in the report, namely clerical, stenographic, accounting and bookkeeping, and office appliance. Of the 22,427 office workers in all salary groups, both sexes combined, 11,673 (52.1 per cent) were in the clerical section, 4,756 (21.2 per cent) were in the stenographic section, 5,195 (23.2 per cent) were in the accounting and bookkeeping section, and 803 (3.6 per cent) were in the office appliance section. Thus the clerical section, almost evenly divided between males and females, included slightly more than one half of all office employees covered by the survey.

It is of interest to note what salary groups include the bulk of the several classes of employees. Of the 22,427 office workers, both sexes combined, five successive groups, beginning with 2,402 employees receiving "$18 but less than $20" and ending with 2,195 employees receiving "$30 but less than $35," included 13,999 employees, or 62.4 per cent of the total. Of the 8,182 males, 3,473 (42.4 per cent) were in three successive groups receiving $25 up to but not including $40, the largest of the three, representing 16.3 per cent receiving $30 but less than $35. In addition, 1,498 or 18.3 per cent received $50 or over per week. Of the 14,245 females, 9,299 or 65.3 per cent were in four successive groups ranging from $18 up to but not including $30. The two largest groups comprised 18.8 per cent receiving $25 but less than $30, and 17.2 per cent receiving $22 but less than $25.

PRICES, RETAIL AND WHOLESALE, IN CANADA, JULY, 1927

Cost of Living, Prices of Staple Articles and Index Numbers

THE movement in prices during the month was slight, the weekly family budget in terms of retail prices being somewhat higher, while the Dominion Bureau of Statistics index number of wholesale prices declined slightly.

In retail prices the cost per week of a list of twenty-nine staple foods for an average family of five in terms of the average retail prices in some sixty cities was $10.92 at the beginning of July, as compared with $10.86 for June; $11.07 for July, 1926; $10.49 for July, 1925; $9.91 for July, 1924; $10.17 for July, 1923; $10.27 for July, 1922; $10.96 for July, 1921; $16.84 for July, 1920; $16.92 for June, 1920 (the peak); $13.00 for July, 1918; and $7.42 for July, 1914. The advance was due chiefly to a substantial increase in the price of potatoes. There were, however, less important increases in eggs, bread, flour, prunes, salt pork and mutton. The seasonal decline in the price of butter continued, while slight decreases occurred also in the prices of beef, veal, fresh pork, bacon, lard, rice and coffee. Including the cost of fuel and rent with that of foods the total budget averaged $21.11 at the beginning of July, as compared with $21.04 for June; $21.30 for July, 1926; $20.70 for July, 1925; $20.30 for July, 1924; $20.65 for July, 1923; $20.67 for July, 1922; $21.53 for July, 1921; $26.92 for July, 1920 (the peak); $20.66 for July, 1918; and $14.17 for July, 1914. Fuel and rent showed little change.

In wholesale prices the index number calculated by the Dominion Bureau of Statistics, based upon the average prices of 236 commodities in 1913 as 100, and weighted according to the commercial importance of the commodities, declined to 152.0 for July, as compared with 153.5 for June; 156.2 for July, 1926; 158.1 for July, 1925; 153.9 for July, 1924; 153.5 for July, 1923; 154.1 for July, 1922; 163.7 for July, 1921; 256.3 for July, 1920 (the peak); 202.8 for July, 1919; and 199.5 for July, 1918. Thirty-six prices quotations were higher, fifty-four were lower and one hundred and forty-six were unchanged.

In the grouping according to chief component materials five of the eight main groups declined, one advanced and two were practically unchanged. The groups which declined were: the Vegetables and their Products group, advances in the prices of grains, mill feed and fruits being more than offset by declines in the prices of potatoes, sugar, rubber, hay, coffee, rosin and turpentine; the Animals and their Products group, due to declines in the prices of cattle and meats, which more than offset advances in the prices of hogs, eggs, hides, leather, boots and shoes; the Wood, Wood Products and Paper group, because of lower prices for groundwood and matches; the Non-Ferrous Metals group, due to declines in the prices of lead, silver, tin, spelter and solder; and the Chemicals and Allied Products group, due mainly to a decline in the price of white lead. The Fibres, Textiles and Textile Products group advanced, due to the higher prices for cotton, wool and jute. The Non-Metallic Minerals group and the Iron and its Products group were practically unchanged.

In the grouping according to purpose both consumers' goods and producers' goods declined, the former due to lower prices for potatoes, cattle, meats, sugar, coffee and matches, which more than offset higher prices for eggs, hogs, tea, rolled oats, oatmeal, boots and shoes; and the latter due to lower levels for building and construction materials, and in materials for the metal working industries, for the chemical using industries, for the meat packing industries, as well as miscellaneous producers' materials. Materials for the textile and clothing industries, for the fur industry and for the leather industry advanced.

In the grouping according to origin raw or partly manufactured goods were lower, declines in the prices of potatoes, hay, straw, cattle, meats, sugar, rubber and non-ferrous metals more than off-setting increases in grains, cotton, wool, jute, eggs, hogs, tea, hides and skins. Fully or chiefly manufactured goods also declined slightly. Domestic farm products and articles of marine origin declined, while articles of forest origin and articles of mineral origin advanced slightly.

Professor Michell's index number of wholesale prices of forty articles, with prices during 1900-1909 as 100, declined to 171.8 for July, as compared with 173.6 for June; 174.0 for July, 1926; 269.4 for July, 1920; and 117.3 for July, 1914. Foodstuffs declined, due to lower prices for pork, sugar, flour, tapioca, potatoes and currants. Manufacturers' goods advanced somewhat, due to higher prices for wool, cotton, hides, silver and spruce.

EXPLANATORY NOTE AS TO WHOLESALE PRICES

The index number calculated by the Dominion Bureau of Statistics is based upon the prices of 236 commodities, price levels in 1913 being taken as the base, that is equal to 100, the figures being weighted according to the commercial and industrial importance of each

article included. The index number has been calculated by years back to 1890, being unweighted, however, for the period of 1890 to 1913 and has been calculated by months from 1919 to date for all groupings and from 1913 to date for the principal grouping. Summary tables of the Bureau's index number may be found in the supplement to the Labour Gazette for January, 1925, January, 1926, and in greater detail in the Report on "Prices and Price Indexes 1913-24." issued by the Bureau. A description of the methods used in the construction of the index number appears in the Labour Gazette for June, 1923.

The accompanying table gives the index numbers of the Dominion Bureau of Statistics by the principal groups in the three methods of classification and with those of the classification according to purpose or use in detail for the current month and for certain preceding dates.

EXPLANATORY NOTES AS TO RETAIL PRICES

The table of retail prices and rentals shows the prices at the beginning of July of seventy-one staple foodstuffs, groceries, coal, wood and coal oil and the rent for six-roomed houses in some sixty cities throughout Canada. All prices are for delivered goods. The exact quality, for which the quotation is given is set forth in the case of each commodity, and every effort has been made to ensure that the quotations in each case refer to the same class of commodity in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The prices of foods and groceries in each city, except milk and bread, are the averages of quotations reported to the Department and to the Dominion Bureau of Statistics by a number of representative butchers and grocers in each. The prices of fuel and the rates for rent are reported by the correspondents of the Labour Gazette.

Statistics similar to these were published each month from 1910 to 1920, the figures during this period being secured at the middle of each month by the correspondents of the Labour Gazette resident in each locality from dealers doing a considerable business with workingmen's households. From 1910 to 1915 the table contained a list of only the twenty-nine foods included in the family budget, with laundry starch, coal, wood, coal oil and rent. In 1915 when monthly publication of the budget in the Labour Gazette was begun, it was decided to extend the list of foods to 40, and in 1920 the list of foods and groceries was still further extended to include over 100 items.

Beginning with October, 1922, a number of commodities were dropped from the list, and in the case of a number of articles the average prices of the grades most sold have been given, owing to the impossibility of securing prices for uniform grades for the various cities from month to month.

Oleomargarine was dropped in March, 1924, the provision for its manufacture and sale since 1917, notwithstanding the Dairy Act, expired at the end of February, 1924.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workingmen. The first class is of houses in good condition, favourably located in such districts with good modern conveniences. The second class is of houses in fair condition less desirably located, but still fairly central, without modern conveniences.

The weekly budget of a family of five, calculated in terms of the average prices in the cities for which reports are received, includes twenty-nine staple foods, laundry starch, coal, wood, coal oil, and rent, these being the items for which statistics have been obtained each month and published in the Labour Gazette since January, 1910. The quantities of each commodity included are modifications of those employed in similar calculations by various authorities. For some articles comparatively large quantities are included owing to the absence of other important items of the same class. For instance, the only fruits are evaporated apples and prunes, and the only fresh vegetable is potatoes. But as market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportions of expenditure on the various classes of foods tends to be maintained. At times when the price of an article heavily weighted for this purpose rises, or falls (abnormally) the increase (or decrease) in food prices so indicated is exaggerated, and this should be taken into account in using the budget as an indicator of changes in the cost of living. In fuel and lighting the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the differences in the heating value of the various fuels. It was estimated, when the budget was first published in 1912 in the report on wholesale prices in Canada for 1911, that these calculations represented from sixty to eighty per cent of the expenditures of an ordinary family, according to the total income. For the average family of five the expenditure on these items of food, fuel, light and rent would be perhaps two-thirds or about sixty-five per cent of the total income.

While the budget serves to show the increase or decrease from time to time in the cost of the items included, it does not purport to show the minimum cost of food and fuel supplies for an average family in the Dominion or in any one province. The quantities of meats, dairy products, cereals, etc., included were adopted as affording a liberal supply for the healthy family of a man at hard physical work. On the other hand an average family with an income sufficient to do so would buy less meat, etc., but more fruit, fresh and canned vegetables, etc., so that comparative expenditure would be little changed.

Index Number of Changes in the Cost of Living

In March, 1921, the Department published in the Labour Gazette a table of percentages of changes in the cost of living since 1913 as a tentative cost of living index number, using the figures of the above mentioned budget for the calculation for food, fuel and rent, with preliminary figures for clothing and sundries added and this table has been brought down to date at intervals since. The calculation of a comprehensive cost of living index number

covering all items of workingmen's family expenditure in progress since 1918 has been sufficiently advanced to enable the publication of preliminary figures by groups in a supplement to the LABOUR GAZETTE for January on Prices in Canada and in Other Countries, page 9. This table gives figures for June and December each year from 1914 to 1926, inclusive. Figures are now available also for March and September each year since 1917 and the accompanying table gives figures for December each year from 1914 to 1917, quarterly figures 1918 to 1926, and monthly figures for 1927. As stated in the above mentioned supplement the figures in the food group in the family budget are still used to show the changes in food prices but in the other groups the percentage changes in the prices of each article have been weighted according to workingmen's average family consumption, and in the fuel and light group, gas and electricity have been included.

CHANGES IN THE COST OF LIVING IN CANADA FROM 1913 TO 1927*

*The figures for "all items" were calculated by giving the following weights to each group: Food 35%; Fuel 8%; Rent 18½%; Clothing 18¾%; Sundries 20%.

Cost of Electric Current and Gas for Householders

With rates in 1913 as 100, index numbers of electric light rates were 1900, 141.4; 1905, 135.6; 1910, 118.1; 1911, 113.4; 1912, 109.1; 1913, 100.0; 1914, 96.5; 1915, 90.8; 1916, 87.6; 1917, 87.2; 1918, 85.8; 1919, 85.8; 1920, 84.2; 1921, 84.9; 1922, 82.7; 1923, 79.5; 1924, 79.2; 1925, 75.6; 1926, 75.6.

The above figures were arrived at by converting to the base of 1913 as 100, an index number of electric current costs from 1900 to 1913 constructed for the Board of Inquiry into the cost of living in Canada, 1914-15 (Report, Vol. 2, page 318) and bringing the figures down to 1926. The figures are unweighted. The Dominion Bureau of Statistics has recently issued an index number of electric current rates for household consumption as follows: 1923, 73.8; 1924, 72.2; 1925, 69.9; 1926, 68.7. This index number is weighted according to consumption in each city. When the above index number, 1900-1926, is weighted according to population in each city covered for the years 1923, 1924, 1925 and 1926, the figures are substantially the same as those recently issued by the Bureau.

The following are index numbers of rates for manufactured and natural gas for the years 1913 to 1925 issued by the Dominion Bureau of Statistics: Manufactured gas, 1913, 100; 1914, 98.2; 1915, 98.0; 1916, 96.2; 1917, 100.8; 1918, 107.5; 1919, 111.4; 1920, 125.6; 1921, 144.4; 1922, 141.4; 1923, 136.2; 1924, 135.1; 1925, 132.0. Natural gas, 1913, 100; 1914, 102.3; 1915, 105.0; 1916, 105.1; 1917, 108.2; 1918, 104.8; 1919, 114.0; 1920, 126.2; 1921, 135.1; 1922, 158.9; 1923, 158.6; 1924, 156.8; 1925, 175.3. For the years 1900 to 1913 two index numbers of gas costs, calculated for the Cost of Living Inquiry in 1914-1915, have been averaged and converted to the base of 1913 as 100, as follows: 1900, 125.8; 1901, 125.8; 1902, 125.8; 1903, 125.2; 1904, 123.9; 1905, 120.1; 1906, 107.5; 1907, 108.8; 1908,

Retail Prices

Beef prices, which had advanced from January to June, showed a slight downward tendency in July, sirloin steak averaging 33 cents per pound, as compared with 33.2 cents in June; round steak 27.4 cents per pound as compared with 27.5 cents in June; rib roast 25 cents per pound as compared with 25.4 cents in June; and shoulder roast 18.7 cents per pound as compared with 19.1 cents in June. Veal also declined, averaging 19.9 cents per pound in July, as compared with 20.3

cents in June. Mutton was slightly higher at an average price of 30.1 cents per pound. Fresh pork was down from 28.4 cents per pound in June to 28.2 cents in July, while salt pork advanced slightly, averaging 26.6 cents per pound. Bacon was down from 39.4 cents per pound in June to 38.8 cents in July. In fresh fish cod steak, halibut and white fish were slightly lower. Lard was down from an average price of 21.7 cents per pound in June to 21.5 cents in July.

Eggs were higher, in many localities, fresh averaging 37.8 cents per dozen, as compared with 36.2 cents in June, and cooking averaging 34.3 cents per dozen, as compared with 33.1 cents in June. Milk was unchanged in the average. The price declined at New Glasgow, St. Hyacinthe and Prince Rupert, while an advance occurred at Regina. Butter was substantially lower, declines occurring in practically all localities, being less pronounced, however, in Ontario and Quebec than in the other Provinces. Dairy averaged 37 cents per pound in July, as compared with 40 cents in June, and 43.9 cents in May; while creamery averaged 41.9 cents per pound in July, as compared with 44.1 cents in June, and 49.1 cents in May. Cheese was slightly higher at an average price of 30.7 cents per pound.

Bread was up from an average of 7.7 cents per pound in June to 7.8 cents in July. Soda biscuits were slightly lower, averaging 18.3 cents per pound. Flour was up from an average of 5.3 cents per pound to 5.4 cents, higher prices being reported from many localities. Rice was slightly lower, averaging 10.8 cents per pound. Beans advanced slightly, averaging 8.2 cents per pound. Potatoes showed a general advance, the average being up from $2.12 per ninety pounds in June to $2.43 in July. The increase was more pronounced in Ontario than in other provinces. Prunes advanced from an average of 14.7 cents per pound in June to 15.1 cents in July. Raisins and currants showed little change. Granulated sugar was unchanged in the average, increases in some localities being offset by declines in others. Coffee was down from an average price of 61.4 cents per pound to 60.7 cents in July. Anthracite coal was slightly lower, averaging $16.19 per ton. Lower prices were reported from Moncton, St. John, and Cobalt. Bituminous coal, coke and wood showed little change. No changes were reported in rent.

Wholesale Prices

The following is a summary of a statement of wholesale prices changes during the month issued by the Dominion Bureau of Statistics.

Grain prices were again slightly higher, No. 1 Manitoba Northern cash wheat, Fort William and Port Arthur basis, averaging $1.62 per bushel, as compared with $1.51 in June. American corn was up from $1.10 per bushel to $1.13. Western oats advanced from 64 cents per bushel to 65¾ cents. Barley was down from 92 cents per bushel to 89½ cents, and flax seed from $1.99 per bushel to $1.95. Rolled oats advanced from $3.85 per 90 pound sack to $4.10. Bread at Vancouver advanced from 7½ cents per 18 ounce loaf to 8 cents. Raw sugar declined from $4.17¾ per hundred pounds to $4.08¼, and granulated from $6.41¼ per hundred pounds to $6.31¾. Reports of higher European beet sugar crop were said to cause the lower prices. Potatoes were substantially lower, Quebec grades at Montreal being down from $2.13½ per bag to $1.51; Ontario grades at Toronto from $2.97½ per bag to $2.38¼; and New Brunswick potatoes at St. John from $3.75-$4.50 per barrel to $3. Hay at Toronto declined from $16.50 per ton to $15. Straw was also lower at $10 per ton. Pepper advanced from 38 cents per pound to 42 cents. The decline in rubber continued, a grade of Ceylon being down from 37½ cents per pound to 35 cents. Turpentine fell from $1.05 per gallon to $1.02. Rosin was again lower at $11.40 per barrel, as compared with $14 in June. Western cattle at Winnipeg were down from $9.18¾ per hundred pounds to $8.34; choice steers at Toronto from $8.87½ per hundred pounds to $8.55½, and sheep from $6.25 per hundred pounds to $5.50. Hogs advanced from $9.58 per hundred pounds to $9.75. Meats were generally lower. Dressed beef, hindquarter, at Toronto declined from $19 per hundred pounds to $18.40, mutton from 11 cents per pound to 10 cents; and hogs from $15.75 per hundred pounds to $15.05. Fowl was down from 25 cents per pound to 22 cents. Fresh eggs at Montreal advanced from 36-38 cents per dozen to 37-40 cents. Beef hides at Toronto advanced from 16-17 cents per pound to 18-19 cents. Harness leather was up from 48 cents per pound to 50 cents, and men's heavy grain boots advanced from $2.45 per pair to $2.50, and women's dongola from $2.30 per pair to $2.40. Raw cotton continued to advance, the price at New York rising from 16⅝ cents per pound to 18 cents. The low price for the month was 17.05 cents per pound, reached on the 5th, and the high 18.95 cents per pound, reached on the 25th. Jute was up from $8.34 per cwt. to $9.17. Raw silk declined from $5.50 per pound to $5.25. Wool advanced from 24-25 cents per pound to 27 cents. Binder twine was down from 13⅛ cents per pound to 12⅜

cents. Matches declined from $10 per box to $8.50, due, it was said, to the reduction in excise duty. In non-ferrous metals lead declined from $6.65 per cwt. to $6.40; silver from 57 cents per ounce to 56¼ cents; tin from 67¼ cents per pound to 65 cents; and spelter from $7.82½ per cwt. to $7.73. White lead was down from $13.41 per hundred pounds to $12.95.

PRICES IN GREAT BRITAIN AND OTHER COUNTRIES

THE following notes and the accompanying tables give the latest information available as to the movements of prices in Great Britain and other countries. The index numbers of retail prices are from official sources unless otherwise stated. The authorities for the wholesale prices index numbers are named in all cases.

Great Britain

WHOLESALE PRICES.—The index number of the Board of Trade, on the base 1913=100, was 141.8 in June, an increase of 0.5 per cent for the month. There was a rise of 2.2 per cent in the general average of all articles of food, with increases in all groups. Industrial materials declined 0.5 per cent with declines in iron and steel, other metals and minerals and the miscellaneous group, and advances in cotton and other textiles. On the base "average prices in 1924=100" the index number for June was 85.3.

The *Statist* index number, in continuation of Sauerbeck's figures, was 123.1 at the end of June, showing a decline of 0.6 per cent from the level at the end of May, which was 123.8. All food groups declined, the whole falling 1.9 per cent. In materials, there was a rise on the whole of 0.3 per cent with a decline of 1.8 per cent in minerals and rises in textiles and sundries.

The *Times* index number, on the base 1913=100, was 142.4 in June, an advance of 0.4 per cent over the May level. Foods showed no change on the whole, a marked advance in meat and fish being offset by declines in other groups. Materials advanced 0.5 per cent, with an advance of 6 per cent in the group "textiles other than cotton," due to a sharp advance in flax and dearer prices for wool and jute. The other materials groups were slightly lower for the month.

COST OF LIVING.—The index number of the Ministry of Labour, on the base July, 1914=100, was 166 at July 1 as against 163 at June 1. For the month there was an advance of five points in foods and a decline of five points in fuel and light, other groups showing no change. Foods were 159; rent, 151; clothing 210-215; fuel and light, 170; sundries, 180. At August 1, foods were 156, rent, clothing, fuel and light and sundries showing no change. The cost of living was 164.

Belgium

WHOLESALE PRICES.—The index number of the Ministry of Industry, Labour and Social Affairs, on the base April, 1914=100, was 848 in May, being 2 points above the previous month's level. There were advances in food products, fertilizer, textile products, hides and leather products, and raw rubber, with declines in fuels, tar and products, metal products, and resin products, and little change in other groups.

COST OF LIVING.—The official index number of the cost of living of a workingman's family of the lowest category, on the base 1921=100, was 205.70 for June as against 201.28 for May, a rise of 2.2 per cent for the month. This was due to a rise of 2.9 per cent in the index for food prices, but there were slight increases shown by all the other groups.

France

WHOLESALE PRICES.—The index number of *Statistique Générale*, on the base July, 1914=100, was 636 in June, a decline of 0.9 per cent from the May level. A decline in native products was partially offset by a rise in imports. Foods showed a decline and materials rose slightly, owing to an increase of 4.6 per cent in the textiles index.

COST OF LIVING.—The official index number of cost of living, Paris, on the base 1914=100, was 525 for the second quarter of 1927, thus differing from the level of the previous quarter by only one point. Foods and rents rose and heat and light and sundries declined. Clothing showed no change.

Germany

WHOLESALE PRICES.—The index number of the official Statistical Office, on the base 1913=100, was 137.9 for the average of the month of June, an advance of 0.6 per cent over the May average. There were slight advances shown by foods of vegetable origin, industrial materials and semi-manufactured goods, and manufactured goods. Colonial goods declined slightly.

Cost of Living.—The official index number on the base 1913-14=100 was 147.7 for June, an increase of 0.8 per cent above the May level. This was chiefly due to a rise in food prices, which rose 1.3 per cent during the month. Clothing rose 0.4 per cent. Heat and light declined and sundries rose slightly. Rent showed no change.

Italy

Wholesale Prices.—The index number of the Chamber of Commerce, Milan, on the base 1913=100, was 509.39 in June, a decline of 5 per cent for the month. There were sharp declines in all groups, the groups "animal foods" and "minerals and metals" reaching their lowest levels since the beginning of the compilation, May, 1921.

China

Wholesale Prices.—The index number of the Chinese Treasury Department's Bureau of Markets, on the base February, 1913=100, was 173.1 in April, as against 174.7 in March. For the month slight increases were shown in textiles, industrial materials and sundries, and slight declines in cereals, other food, metals and building materials. The total index number was 11.1 per cent higher than in June, 1926, but slightly lower than in November, 1926.

India

Wholesale Prices.—The index number of the Labour Office, Government of Bombay, on the base "prices in July, 1914=100," was 148 in May, as against 145 in April (revised figure). Foods advanced 2 points to 143, with slight increases in cereals, pulses, and the miscellaneous foods group and a decline in sugar. Non-foods advanced 3 points to 150, with advance in all groups except metals, which showed a slight decline. The raw cotton group advanced during the month 10.9 per cent to 142.

Cost of Living.—The working class cost of living index number was 154 in June as against 152 in May. Foods advanced one point to 151 and fuel and lighting, clothing and house rent were unchanged at 166, 147 and 172 respectively.

United States

Wholesale Prices.—The index number of the Bureau of Labour Statistics on the base 1913=100.0, was 143.7 for June, compared with 144.1 for May, a decline of one-fourth of one per cent. Small decreases were shown for the groups of foods and building materials, and negligible decreases for chemicals and drugs and house furnishing goods. Farm products, fuels, metals and miscellaneous commodities increased slightly. No change was reported for clothing materials.

Bradstreet's index number, showing the cost of a list of 106 commodities, was $12.5830 on August 1, a gain of 1.6 per cent over the $12.3803 of July 1. Seven groups of commodities advanced, including hides and leather, textiles, fruits, live-stock, naval stores, metals and building materials. The four groups declining included provisions, oils, breadstuffs, and miscellaneous products. Coal and coke, and chemicals and drugs were unchanged.

Dun's index number, showing the cost per capita of a year's supply of commodities, rose to $186.335 on August 1, a gain of nearly 0.4 per cent over the July 1 level. Four groups advanced, including breadstuffs, meat, "other foods", and clothing. Three groups declined, including dairy and garden products, metals, and the miscellaneous group. All changes were slight.

Cost of Living.—The index number of the Special Commission on the Necessaries of Life, of the Cost of living in Massachusetts, was 159.7 for June, on the base average retail prices in 1913=100, a slight decrease from the May level, 159.9. Food, clothing and fuel and light declined slightly, while shelter and sundries showed no change.

Ohio Labour Federation supports Safety Movement

The Ohio Federation of Labour, at its state convention recently held at Middleton, Ohio, agreed that more than one-half the accidents and occupational diseases could be prevented by co-operation between employer and employed. The convention recommended that safety committees be set up in every plant, and that this subject be given whole-hearted support by every affiliate of the Federation. Discussing the value of safety committees the committee in charge reported that "where safety committees are in existence in unions and shops, excellent results have been attained in curtailing accidents. We trust no delegate to this convention will consider his or her report to the local complete on the activities of this convention without dwelling at length on the necessity for safety in the industrial life of the State of Ohio."

FATAL INDUSTRIAL ACCIDENTS IN CANADA DURING THE SECOND QUARTER OF 1927

THE number of fatal industrial accidents, and such fatalities from industrial diseases as are included with fatal accidents by workmen's compensation boards, etc., recorded in the Department as occurring during the second quarter of 1927, was 290, there being 86 in April, 100 in May and 104 in June. In the second quarter of 1926, 260 fatal accidents have been recorded. In this report it is the custom to record industrial accidents under the dates of the occurrence of the accidents, and fatal industrial diseases under the dates on which they prove fatal.

Reports were received from the Workmen's Compensation Boards, the Board of Railway Commissioners, and certain other official sources; from certain large employers of labour; and from the correspondents of the LABOUR GAZETTE. Reports of accidents were also recorded from local newspapers.

By industrial groups the fatalities occurred as follows: agriculture, 43; logging, 29; fishing and trapping, 5; mining, non-ferrous smelting and quarrying, 27; manufacturing, 42; construction, 43; transportation and public utilities, 74; trade, 11; service, 16. Of the mining accidents, 9 were in metalliferous mining, 16 in coal mining, and one each in "non-metallic mineral mining and quarrying n.e.s.," and in "structural materials." Of the accidents in manufacturing, 4 were in the group "vegetable foods, drink and tobacco," 3 in "animal foods," one in "textiles," one in "rubber goods," 4 in "pulp, paper and paper goods," one in non-metallic mineral products," 14 in "saw and planing mills," 4 in "wood products," and 10 in "iron, steel and products." In construction there were 25 accidents in "building and structures," one in "ship building," 9 in "bridge and highway," and 8 in "miscellaneous construction." In transportation and public utilities, there were 38 fatalities in "steam railways," 2 in "street and electric railways," 19 in "water transportation," 5 in "local transportation," one in "storage," 7 in "electricity and gas" and 2 in "telegraphs and telephones." In trade there were 3 fatalities in "wholesale trade" and 8 in "retail." In service there were 9 in "public administration," 2 in "recreational service," 4 in "personal service," and one in "professional service."

Of accidents involving a number of fatalities, the principal one occurred on April 19, causing 6 industrial fatalities. This was a derailment in which a freight train left the rails owing to a washout. The engineer died of scalds and a fireman died of injuries due to being pinned under the engine. Three stockmen and one stock raiser, travelling on the train in the course of their employment, who were also victims of this accident, have been listed under "agriculture and stockraising." During the period under review three railway wrecks each causing two or more deaths occurred. The first was on April 8 at Nipisiquit Junction, N.B., when a train upset owing to the snowplough on the engine having run foul of the frog of a switch. The engineer was instantly killed, the brakeman dying later of scalds. On April 9, a collision of freight trains occurred in a blizzard at Seven Persons, Alberta, in which a trainman and an engineer were killed. On May 15, near Nipigon, Ontario, a passenger train was derailed on crashing into a landslide, resulting in the death of the engineer, fireman and a mailman. The most serious accident in the mining industry during the period occurred at Cody, B.C., on April 22, when a steel cable lifting the cage in the main rise of a mine parted, the cage falling 150 feet to the bottom. Two miners were instantly killed, a third dying later of injuries received. In construction, an accident occurred at Hydro, Ont., on May 2, in which a steam shovel engaged in cutting out a channel to divert the waters of a river struck a missed charge of dynamite, killing two labourers. On June 24, at Leaside, Ont., owing to the collapse of a swinging platform, two riveters on bridge work fell 120 feet, one being instantly killed and the other dying of injuries. On April 9 an accident occurred in Water Transportation, when the schooner *Nellie* of Parrsboro, N.S., was wrecked in a gale near Cape Chignecto, with the captain and two seamen on board. In the group "Public Administration" an accident occurring at Walkerville, Ont., on June 16 resulted in the death of two firefighters, when the steering gear of a hook and ladder machine broke, causing the machine to strike a pole.

Supplementary lists of accidents.—The supplementary list of fatal accidents occurring in 1926, to be found after the main table of accidents, contains seven fatalities of which one was in logging; one in manufacturing, two in construction and three in transportation. Three of these are known to have resulted fatally in 1927. One of the accidents occurred in September, one in October, three in November and two in December. Concluding the tables is a supplementary list of fatal industrial accidents occurring during the first quarter of 1927. This includes eleven fatalities, of which 4 were in logging; 2 in mining; 2 in manufacturing; one in construction and 2 in transportation and public utilities. Three accidents were in February and 8 in March.

FATAL INDUSTRIAL ACCIDENTS IN CANADA DURING THE SECOND QUARTER OF 1927

Trade or Industry	Locality	Date	Age	Cause of Fatality
AGRICULTURE AND STOCK-RAISING—				
Farmer	Renown, Sask.	April 4	45	Caught in belt of a gasoline engine.
Farmer	Irma, Alta.	" 5		Caught between vehicles when team bolted.
Farmer	La Vallée, Ont.	" 6	66	Slipped and fell onto wood sawing machine.
Farmer	Blenheim Tp., Ont.	" 13	80	Fell from load of lumber.
Farmer	Brooke Tp., Ont.	" 14	61	Injured in runaway. Died April 15.
Farm hand	Boucherville, Que.	" 14	17	Was leading horse to operate capstan, when pole slipped, spinning around, striking victim.
Farm owner	Near Portage la Prairie, Man.	" 14		Drowned in flood waters which poured over highway.
Farmer	St. Bruno, Que.	" 15	56	Kicked by a horse.
Farmer	Oakland Tp., Ont.	" 16	42	Foot caught in engine belt, drawing him into fly-wheel.
Farmer's wife	Near Borden, Sask.	" 16		Lost between house and barn in snowstorm.
Farmer's son	McKillop Tp., Ont.	" 18	11	Cleaning land roller when horses started, crushing him.
Stockman	Near Hornepayne, Ont.	" 19		Derailment caused by washout.
Stockman	" "	" 19		
Stockman	" "	" 19		
Stock raiser	" "	" 19		
Farmer	Nicolet, Que.	" 20		Horse ran away; man crushed by wheels.
Farmer's son	Craik, Sask.	" 21	16	Was leading horse, which ran away, striking windmill, causing it to fall over and crush victim.
Farmer	Panoka, Alta.	" 21	25	Drowned in flood when attempting to ford river on horseback.
Wild horse rider	Ashcroft, B.C.	" 24		Kicked by a horse.
Farmer	Hillier, Ont.	May 4	22	Clothing caught fire from burning bush.
Farm hand	Near Leask, Sask.	" 9		Run over by a disk harrow.
Farmer	Donalda, Alta.	" 10	45	Kicked by a horse; died May 13.
Farmer	Agassiz, B.C.	" 11	54	Struck by freight train while driving cows.
Farmer	Near Vera, Sask.	" 12		Kicked by a horse.
Farmer	Near Qu'Appelle, Sask.	" 14	27	Crushed when tractor backed up.
Farmer	Moody, Man.	" 15		Fell beneath railway train.
Farmer	Canavoy, P.E.I.	" 16	66	Arm caught in flywheel of gasoline engine of wood saw. Died May 17.
Farmer	North Shefford, Que.	" 23	75	Gored by a bull. Died May 24.
Farm labourer	Near Gleichen, Alta.	" 24		Thrown from plough which struck stone.
Farmer	Bull Moose Hill, N.B.	June 2		Kicked by a horse. Died June 7.
Farmer	Parkland, Alta.	" 8		Struck by lightning.
Farmer	Hallowell Tp., Ont.	" 12	55	Gored by a bull.
Rancher	Near Macleod, Alta.	" 11	54	Drowned in flood water of river.
Farmer	Near Metcalfe, Ont.	" 16	39	Crushed under wagon wheels when horses bolted.
Horse dealer	Savona, B.C.	" 17	54	Horse fell and rolled on him.
Farmer's wife	Near Wynyard, Sask.	" 18		Farmhouse wrecked in tornado.
Farmer	Aldborough Tp.. Ont.	" 18	60	Truck struck his waggon.
Farmer	Johnston Corners, Ont.	" 19	65	Attacked by a mad bull. Died June 23.
Farmer's son	Hobart Tp., Ont.	" 21		Run over by a manure spreader.
Farm hand	Nesbitt, Man.	" 24	16	Struck by lightning while operating a seed drill.
Farmer	Near Pembroke, Ont.	" 24		Struck by a falling tree. Died June 26.
Farmer	Indian Head, Sask.	" 27	71	Crushed by wheel after fall from a waggon. Died June 28.
Farm hand	Near Tilbury, Ont.	" 27	49	Trampled by a mad bull.
LOGGING—				
Fireman	Rock Bay, B.C.	April 16	20	Struck by snag pulled down by line.
Logger	Mission City, B.C.	" 16	54	Was rolling logs off a truck when peavy handle caught in clothing, throwing him under log.
Labourer	Bloedel, B.C.	" 20		Hit by flying root following blast.
Donkey engineer	Sardis, B.C.	" 22	26	Fell between drums; crushed by engine.
River driver	Eels Creek, Ont.	" 28	19	Slipped from log while breaking a jam. Drowned
Chokerman	Myrtle Point, B.C.	" 30	27	Choker caught snag, which fell, crushing victim.
Rigging slinger	Charter Siding, B.C.	May 3	30	Struck by hidden decayed tree caught by log.
Logger	Capilano, B.C.	" 4	31	Crushed between logs on a loading platform.
Logger	Germain Point, Que.	" 4		Explosion of gasoline motor.
Watchman on chute	Waddington Channel, B.C.	" 5	57	Caught by a log in a chute.
Labourer	Glendale, Ont.	" 6		Drowned.
Labourer	Magnassippi River, Ont.	" 6	20	Drowned.
Hooktender	Near Duncan, B.C.	" 6	35	Struck in back by a log thrown against a stump.
Logger	Moncou, Que.	" 7		Premature blast while trying to prevent a log jam.
Logger	Moncou, Que.	" 7		
River driver	Deux Rivières, Que.	" 7		Slipped from logs and fell beneath them; drowned.
Head loader	Youbou, B.C.	" 9	48	Hit on head by breaking guy line. Died May 11.
Driver	Tonuko River, Ont.	" 12	27	Drowned.
Labourer	Stave Lake, B.C.	" 13	27	Fell into a creek; drowned.
Brakeman on logging train.	Stillwater, B.C.	" 19		Crushed under poles when logging train was derailed.
Signalman	Thunder Bay, B.C.	" 19	19	Was struck by a log.
Labourer	Kenney, Ont.	" 21		Drowned.
Boom master	Near Timmins, Ont.	" 24	27	Fell from boom; drowned.
River driver	Sudbury, Ont.	" 31	18	Drowned.
River driver	Near Sault St. Marie, Ont.	June 1		Fell from a log; drowned.
Logger	Athabaska River, Alta.	" 13		Drowned.
Logger	Comox, B.C.	" 23	30	Injured at logging camp; died July 8.
Fireman on tug	Ronan Lake, Ont.	" 27	50	Killed while towing logs; fell from stern of alligator into propeller.
Logger	Shawinigan Lake, B.C.	" 29		Struck by a swinging timber.

FATAL INDUSTRIAL ACCIDENTS IN CANADA DURING THE SECOND QUARTER OF 1927—*Continued*

Trade or Industry	Locality	Date	Age	Cause of Fatality
FISHING AND TRAPPING—				
Fisherman	Campbell River, B.C.	April 8	.....	Fell overboard; drowned.
Nova Scotian fisherman.	Off Western Bank	" 9	50	Crushed when huge wave submerged schooner.
Fisherman	Ferguson's Cove, N.S.	" 23	32	Fell from motorboat in heavy sea; drowned.
Lobster fisherman	Woods Harbour, N.S.	June 6	19	Drowned when boat struck a rock.
Boy	Mahone, N.S.	" 6	19	Drowned in capsize of dory.
MINING, NON-FERROUS SMELTING AND QUARRYING—				
Metalliferous mining:				
Mucker	Britannia Mines, B.C.	April 4	.....	Buried by rush of muck down chute.
Trammer	Cobalt, Ont.	" 16	24	Fell down chute.
Miner	Near Amos, Que.	" 20	.....	Struck by rock.
Miner	Cody, B.C.	April 22	55	Fell with cage owing to breaking of cable. Third death occurred on April 23.
Miner		" 22	25	
Miner		" 22	25	
Machine runner	Kirkland Lake, Ont.	May 30	27	Crushed.
Trammer	Creighton Mine, Ont.	" 30	.....	Explosion of dynamite.
Miner	Kirkland Lake, Ont.	June 3	.....	Fell through an ore chute.
Coal mining:				
Miner	No. 16 colliery, New Waterford, N.S.	April 8	33	Crushed by fall of stone.
Acting yardmaster	No. 2 colliery, Glace Bay, N.S.	" 8	45	Coal car jumped track.
Overman	Birch Grove, N.S.	" 29	.....	Hit by a level trip.
Miner	Sydney Mines, N.S.	May	70	Sustained broken leg in mine. Died of pneumonia May 29.
Tipple hand	Walamun, Alta.	" 4	25	Slipped in front of car.
Miner	Luscar, Alta.	" 12	31	Mine car hit man and threw him against timber.
Miner	Springhill, N.S.	" 17	22	Hit by trip of loaded coal boxes. Died May 18.
Miner	Mountain Park, Alta.	" 20	52	Gassed in mine.
Fire boss	Drumheller, Alta.	" 22	.....	Struck by fall of rock.
Miner	Nordegg, Alta.	" 27	48	Slipped while digging coal, striking back.
Miner	Stellarton, N.S.	" 30	26	Struck by lump of coal falling from face.
Labourer	Sydney, N.S.	June 9	.....	Fell in front of moving cars; crushed.
Miner	Luscar, Alta.	" 14	22	Struck by runaway empty mine car.
Miner	Glace Bay, N.S.	" 20	27	Struck by fall of coal.
Miner	Blairmore, Alta.	" 20	34	Caught by fall of top coal.
Miner	Fernie, B.C.	" 24	70	Caught and crushed in cave-in.
Non-metallic mineral mining and quarrying, n.e.s.:				
Miner	Asbestos, Que.	Before May 21	.....	Accidentally killed.
Structural materials:				
Maintenance man	Wentworth, N.S.	June 2	50	While repairing belt while machine was in operation, was drawn in and crushed. Died June 3.
MANUFACTURING—				
Vegetable foods, drink and tobacco:				
Bakery driver	Montreal, Que.	April 14	72	Struck by taxicab when alighting from waggon.
Labourer	Lindsay, Ont.	" 16	68	Injured knee; infection.
Factory girl	Montreal, Que.	May 27	18	Burned when clothing caught fire from gas explosion. Died June 7.
Carpenter with brewing company.	Sarnia, Ont.	June 7	.....	Struck by timber.
Animal foods:				
Engineer of refrigerating plant	Montreal, Que.	April 13	71	Overcome by ammonia fumes from burst pipe.
Employee of creamery	Ottawa, Ont.	" 23	46	Fell from a platform as a result of heart failure.
Labourer in packing plant	Moose Jaw, Sask.	May 10	33	Crushed by elevator.
Textiles:				
Dyer	Charlotte Co., N.B.	June 22	37	Thrown against tank by compressed air escape.
Rubber goods:				
Worker in rubber plant	Toronto, Ont.	May 2	44	Burned. Died June 6.
Pulp, paper and paper goods:				
Labourer	Kenora, Ont.	April 11	32	Fell onto revolving drum, and was thrown against iron beam.
Labourer	La Tuque, Que.	May 11	37	Fell from a scaffold.
Labourer	Little Current, Ont.	" 14	37	Slipped between swinging crane and opening on deck.
Employee of paper mill	Stoneham, Que.	June 2	.....	Drowned.
Non-metallic mineral products:				
Foreman in mill	Asbestos, Que.	April 24	50	Struck by piece of machinery.

FATAL INDUSTRIAL ACCIDENTS IN CANADA DURING THE SECOND QUARTER OF 1927—*Con.*

Trade or Industry	Locality	Date	Age	Cause of Fatality
MANUFACTURING—*Con.*				
Saw and planing mills:				
Labourer	Mission City, B.C.	April 18	53	Crushed beneath load of logs.
Labourer	Hawkesbury, Ont.	" 25	21	Slipped into river; drowned.
Fireman	Barrie, Ont.	May 5	67	Crushed by a waggon.
Labourer	L'Avenir, Que.	" 12	59	Struck by piece of wood thrown from saw.
Labourer	Montreal, Que.	" 16	30	Boiler explosion in sawmill.
Marker	Vancouver, B.C.	" 20	44	Fell and was dragged over rolls when struck by piece of timber. Died May 21.
Labourer	Edmonton, Alta.	" 23	35	Struck by lumber from planer.
Labourer	Appelo, Ont.	" 24	49	Struck by a slab.
Labourer	Sundridge, Ont.	June 9	48	Caught in saw.
Locomotive engineer	Brent, Ont.	" 16	42	Crushed by engine.
Engineer	Chapleau, Ont.	" 24	44	Infection.
Labourer	Northumberland Co., N.B.	" 27	65	Fell into hot water. Scalds.
Saw operator	Timmins, Ont.	" 30	22	Fell on circular saw. Died July 2.
Carpenter	West River, Ont.	" 30	62	Drowned.
Wood products:				
Watchman with cabinet company	Kitchener, Ont.	April 12	.....	Sliver in hand; infection.
Pump manufacturer	Kemptville, Ont.	" 9	75	Clothing caught in wood working machinery.
Truck driver for manufacturing company	Near Louisville, Que.	May 13	19	Driver failed to wait for passing of train and was struck by same.
Labourer in wooden box factory	Toronto, Ont.	June 8	20	Struck by piece of wood flying from saw.
Iron, steel and products:				
Tinsmith's helper	Winnipeg, Man.	May 3	27	Taking strip of iron from a machine; cut finger; septicaemia.
Labourer in can factory	Montreal, Que.	" 9	52	Fell down elevator shaft.
Steel worker	Hamilton, Ont.	" 13	35	Caught in a wire coiling machine.
Brakeman at steel plant	Sydney, N.S.	" 26	.....	Struck by a revolving crane.
Iron worker	Walkerville, Ont.	" 26	42	Crushed under car.
Clerk	Longue Pointe, Que.	" 27	60	Run over by a company locomotive.
Labourer	Montreal, Que.	June 7	40	Struck by a piece of bursting emery wheel.
Mechanical Superintendent of manufacturing company	Toronto, Ont.	" 23	68	Fell in plant.
Employee of engineering works	Vancouver, B.C.	" 27	.....	Fell from a platform. Died June 28.
Watchman	Gananoque, Ont.	" 30	.....	Fell into river; drowned.
CONSTRUCTION—				
Buildings and structures:				
Labourer	Ford, Ont.	April 14	.....	Fell off house.
Foreman carpenter	Winnipeg, Man.	" 25	52	Crushed by cave-in. Died April 26.
Riveter's helper	Brandon, Man.	" 25	29	Collapse of scaffold inside of tank.
Crane operator	Hamilton, Ont.	" 26	40	Crushed by a crane.
Foreman of construction company	Oshawa, Ont.	" 26	29	Struck by swinging cab of steam shovel. Died April 27.
Labourer	Montreal, Que.	" 28	38	Struck by falling plank.
Labourer	Quebec, Que.	May 2	60	Fell from a scaffold.
Labourer	Windsor, Ont.	" 4	28	Struck by truck.
Carpenter	Toronto, Ont.	" 10	60	Heart attack while at work.
Electrical worker	Gatineau, Que.	" 16	26	Came in contact with high voltage wire.
Carpenter	Great Falls, Man.	" 18	48	Fell from scaffold to floor.
Labourer	Orillia, Ont.	" 21	29	While helping to move an out-house, came in contact with high voltage wire; electrocuted.
Electrician's helper	West Templeton, Que.	" 27	.....	Fell from a transformer.
Plasterer	Toronto, Ont.	" 27	40	Touched live wire; electrocuted.
Labourer on construction	Westmount, Que.	" 28	25	Was helping to lift heavy stone which slipped, falling onto scaffold which collapsed.
Labourer on smelter construction	Rouyn, Que.	June 1	46	Struck by piece of steel.
Labourer on elevator construction	Didsbury, Alta.	" 2	42	Collapse of scaffold under heavy weight.
Labourer	Kenora, Ont.	" 3	36	While renewing planking of roof, fell through hole to ground.
Construction engineer	Toronto, Ont.	" 9	30	Overcome by gas fumes.
Painter	Toronto, Ont.	" 11	35	Fell from a ladder.
Cement worker	Woodstock, Ont.	" 13	62	Fell from a load of gravel when horses bolted.
Painter	New Glasgow, N.S.	" 16	27	Fell from a ladder to concrete pavement.
Carpenter	Dauphin, Man.	" 16	40	Fell into bin of grain elevator.
Carpenter	Fredericton, N.B.	" 18	62	Fell from height of 8 feet.
Labourer in excavation	Vancouver, B.C.	" 25	19	Buried by slide of sand.
Shipbuilding:				
Boilermaker	Halifax, N.S.	May 16	.....	While inside a boiler he was burned by explosion of oil caused by torch falling.

FATAL INDUSTRIAL ACCIDENTS IN CANADA DURING THE SECOND QUARTER OF 1927—Con.

Trade or Industry	Locality	Date	Age	Cause of Fatality
CONSTRUCTION—*Con.*				
Bridge and highway—				
Employee of Paving co.	Weston, Ont.	April 30	62	Truck in which he was riding to work was struck by train.
Workman demolishing a bridge	Greenburn, Ont.	May 27	42	Crushed by falling iron girder.
Riveter	St. George, Ont.	June 6	37	Drill used in boring holes in girders snapped throwing him to ground.
Labourer on road gang	Near Pembroke, Ont.	" 7	55	Struck by train when cleaning crossing.
Labourer	Woodstock, N.B.	" 20	27	Struck on head by windlass while unloading gravel.
Riveter	Leaside, Ont.	" 24	.....	Fell to rocky ground when swinging platform split. Second man died June 26.
Riveter	Leaside, Ont.	" 24	.....	
Labourer	Leaside, Ont.	" 27	.....	While working beneath bridge under construction, was struck by plank falling from same. Died July 1.
Labourer	St. John, N.B.	" 27	.....	Fell from bridge when his wheelbarrow of cement overbalanced.
Miscellaneous:				
Labourer	Montreal, Que.	April 1	30	Crushed by boulder falling into street excavation.
Employee of construction firm	Near Great Falls, Man.	" 19	.....	Drowned when raft capsized in flood waters of river.
Labourer	Hydro, Ont.	May 2	.....	Steam shovel struck missed charge of dynamite.
Labourer	Hydro, Ont.	" 2	.....	Men crushed under rocks following explosion.
Electrical worker	Paugan Falls, Que.	" 26	22	While working on roof of power station slipped and grabbed wire; electrocuted.
Cement finisher	Humberstone, Ont.	" 28	33	Lost balance and fell into ship canal.
Labourer	Welland Canal, Ont.	June 11	32	Struck by a dump car.
Deckhand on sand dredge	Welland Canal, Ont.	" 29	29	Fell from deck probably owing to a seizure; drowned.
TRANSPORTATION AND PUBLIC UTILITIES—				
Steam railways;				
Brakeman	Chipman, N.B.	April 2	40	Crushed between pilot and coupling when foot slipped.
Yardman	C.N.R. yards, Detroit, Mich.	" 5	48	Slipped from footboard of engine; run over.
Engineer	Nipisiquit Jct., N.B.	" 8	40	Train upset; snowplow on engine ran foul of switch in storm. Engineer killed; brakeman died of scalds, April 13.
Brakeman	Nipisiquit Jct., N.B.	" 8	.....	
Trainman	Seven Persons, Alta.	" 9	.....	Train collision in blizzard.
Engineer	Seven Persons, Alta.	" 9	40	
Labourer	Dean Lake, Ont.	" 17	23	Fell from top of a standing box car.
Engineer	Near Hornepayne, Ont.	" 19	34	Derailment caused by washout.
Fireman	Near Hornepayne, Ont.	" 19	29	
Roadmaster	Weyburn, Sask.	" 24	51	Testing speeder, when dog ran in front, derailing it, causing it to crash over embankment and fall on victim.
Switchman	Toronto, Ont.	" 30	22	Fell between cars while uncoupling.
Sectionman	Brazeau Siding, Alta.	" 30	29	Motor car collided with rear of another.
Sectionman	Near Lynden, Ont.	May 11	49	Riding on gasoline jigger which jumped rails.
Car repairer	Toronto, Ont.	" 12	45	Crushed by flat car owing to collapse of jack.
Conductor (serving as brakeman)	Niblock, Ont.	" 13	48	Crushed beneath wheels of car. Died May 15.
Engineer	Near Nipigon, Ont.	" 15	63	Train crashed into a landslide and was derailed.
Fireman	Near Nipigon, Ont.	" 15	41	
Mailman	Near Nipigon, Ont.	" 15	.....	
Chief clerk	North Bay, Ont.	" 19	33	Fell beneath train. Died May 20.
Brakeman	Near Woodstock, N.B.	" 19	42	Fell into river from a gravel train on a bridge.
Yardman	Quebec, Que.	" 21	23	Caught between siding platform and a moving freight car.
Sectionman	Near Mabella, Ont.	" 21	53	Struck by train while removing hand car from track.
Brakeman	Toronto, Ont.	" 23	26	Crushed while coupling.
Sectionman	Millidge, Ont.	June 3	45	Struck by train.
Sectionman	Shawinigan Falls, Que.	" 3	45	Struck by car while moving velocipede.
Brakeman	Caledonia, Ont.	" 4	.....	Fell between shunting cars.
Section foreman	Near Delson, Que.	" 6	41	Was run over by scooter from which he had fallen
Brakeman	Toronto, Ont.	" 7	26	Struck by a shunting engine.
Sectionman	Brodie, B.C.	" 14	.....	While unloading stone from a flat car they were crushed by a falling tree.
Sectionman	Brodie, B.C.	" 14	.....	
Sectionman	Near Lac au Saumon, Que.	" 17	31	Speeder collided with express train.
Labourer	Winnipeg, Man.	" 22	44	Struck by engine in yards.
Sectionman	Near Melville, Sask.	" 24	.....	Crash of two handcars.
Conductor	Telford, Man.	" 24	44	Slipped and was run over while coupling.
Sectionman	Pringle, Ont.	" 26	40	Velocipede struck by train.
Freight handler	Montreal, Que.	" 28	50	Struck on head by a plank. Died July 27.
Sectionman	Monkton, Ont.	" 28	19	Fell between two cars.
Steam shovelman	Copetown, Ont.	" 30	22	Crushed when steam shovel overturned.

FATAL INDUSTRIAL ACCIDENTS IN CANADA DURING THE SECOND QUARTER OF 1927—Con.

Trade or Industry	Locality	Date	Age	Cause of Fatality
TRANSPORTATION AND PUBLIC UTILITIES—*Continued.*				
Electric Railways:				
Car cleaner	Vancouver, B.C.	April 11	53	Caught between shunted freight cars.
Conductor	Montreal, Que.	June 20	46	Crushed between cars while replacing trolley on wire.
Water Transportation:				
Deckhand	Sidney, B.C.	April 3	33	Slipped and fell while attempting to tie up vessel.
Captain	Near Cape Chignecto, N.S.	" 9	.....	Drowned following capsize of schooner in gale.
Seaman	Near Cape Chignecto, N.S.	" 9	.....	
Seaman	Near Cape Chignecto, N.S.	" 9	.....	
Boiler scaler	Vancouver, B.C.	" 14	.....	Slipped from gang plank; drowned.
Second mate of vessel	Barnet, B.C.	" 18	.....	Struck by sling load of lumber. Died April 21.
Ship labourer	Quebec, Que.	" 26	40	Fell into hold of ship.
Ship liner	Vancouver, B.C.	" 30	29	Fell into hold of freighter.
Fireman on tug	Toronto, Ont.	May 14	26	Fell from plank as he walked from tug to scow; drowned.
Seaman	Quebec, Que.	" 19	.....	Fell into hold of vessel.
Shipliner	Montreal, Que.	" 20	65	Fell through open hatch into coal bunker.
Ship's painter	Walkerville, Ont.	" 27	19	While painting ship's side fell from swinging stage; drowned.
Sailor	Campbellton, N.B.	" 30	18	Tripped and fell from wharf while handling line; drowned.
Sailor	Montreal, Que.	June 1	18	Returning from leave ashore, slipped while climbing a line to deck; drowned.
Seaman	Halifax, N.S.	June 10	.....	Drowned from power boat.
Sailor	Sorel, Que.	" 14	.....	Fell into hold of a vessel.
Employee on scow	Prince Rupert, B.C.	" 19	70	Fell overboard.
Longshoreman	Chicoutimi, Que.	" 21	19	Fell into water from a barge; drowned.
Longshoreman	Montreal, Que.	" 28	50	Struck on head by plank; died July 27.
Local transportation:				
Truck driver	Thompson Valley, B.C.	April 8	35	Truck overturned on highway under construction; died April 12.
Taxicab driver	Near Sudbury, Ont.	May 12	.....	Shot; violence.
Teamster	Fernie, B.C.	" 17	30	Kicked by a horse; died May 18.
Taxicab driver	Montreal, Que.	June 19	32	Collision with street car.
Truck driver	Windsor, Ont.	" 22	.....	Collision with truck.
Storage:				
Elevator manager	Fort Saskatchewan, Alta.	April 26	.....	Fell down shaft of elevator. Died April 28.
Telegraphs and Telephones:				
Wireless operator	Lunenburg, N.S.	June 5	29	Drowned from a dory.
Instrument installer (telephone)	Sudbury, Ont.	" 9	25	His car struck by train on way to work.
Electricity and gas:				
Electrical worker	New Toronto, Ont.	April 13	.....	Touched high-power wire; electrocuted.
Winder with electric company	Walkerville, Ont.	" 20	42	Electrocuted.
Lineman	Sandwich, Ont.	May 25	22	Touched a live wire; electrocuted.
Lineman with power commission	North York, Ont.	June 9	29	Burned.
Lineman	Napanee, Ont.	" 13	35	Electrocuted on hydro-electric pole.
Hydro employee	Sarnia, Ont.	" 16	30	Electrocuted by high voltage wires.
Electrical worker	Iroquois Falls, Ont.	" 18	32	Working without rubber gloves as voltage was not considered high; electrocuted.
TRADE—				
Wholesale:				
Salesman	Dunnville, Ont.	May 20	.....	Struck by a train.
Travelling salesman	Near Milestone, Sask.	June 19	.....	Automobile accident.
Travelling salesman	Chatham, Ont.	" 30	44	Crushed by a motor car.
Retail:				
Janitor in retail store	Peterborough, Ont.	April 7	.....	Crushed by elevator.
Clerk in butcher shop	Toronto, Ont.	" 23	28	While boning meat, accidentally plunged knife into his own groin.
Fish peddler	Near Boylston, N.S.	May 17	.....	Pinned beneath overturned automobile.
Merchant	Near Rigaud Sta., Que.	" 19	60	Truck struck by train.
Milk driver	Sandwich, Ont.	" 22	35	Truck struck by interurban car.
Milk dealer	Durham, Ont.	June 8	56	Crushed under car struck by bus.
Coal driver	Kingston, Ont.	" 21	.....	Pinned under overturned cart.
Merchant	Mount Forest, Ont.	" 30	.....	Fell down elevator shaft.
SERVICE—				
Public administration:				
Operator of govt. gasoline boat	Port Colborne, Ont.	May 23	36	Lost balance and fell into canal; drowned.
Traffic constable	Montreal, Que.	" 31	50	Crushed between two automobiles while on duty.
Compassman	Etomani River, Man.	June 2	18	Paddling upstream, canoe capsized; drowned.
Park constable	Winnipeg, Man.	" 12	71	Patrolling on bicycle; was knocked down by automobile.

FATAL INDUSTRIAL ACCIDENTS IN CANADA DURING THE SECOND QUARTER OF 1927—*Continued*

Trade or Industry	Locality	Date	Age	Cause of Fatality
SERVICE—				
Public administration— Continued.				
Fire fighter	Walkerville, Ont.	" 16	.....	Driving a new "hook and ladder" when the steering gear broke. One man crashed into a pole. Chief died later.
Fire chief	"	" 16	.....	
Sailor on patrol boat	Grand Manan Channel, N.B.	" 23	50	Struck by boom of vessel; knocked overboard.
Inspector on road repair	Martinville, Que.	" 24	76	Dynamite blast.
Pilot in air force	High River, Alta.	" 28	25	Plane crashed in test flight.
Recreational:				
Scene painter	Winnipeg, Man.	April 8	35	Fell from a swinging stage owing to breaking of cable. Died April 10.
Carnival employee	Brantford, Ont.	May 23	.....	Fell from an electric power pole.
Personal:				
Handyman	Montreal, Que.	April 27	57	Fell to ground while placing summer shutters.
Cook for construction gang	Near Lancaster, Ont.	May 3	55	Struck by train.
Elevator greaser	Banff, Alta.	" 17	18	Crushed when elevator ascended.
Cook	Lotbinière, Co. Que.	June 17	38	Riding on track bicycle; was struck by train.
Professional—				
School teacher	Wideawake, Alta.	April 29	.....	School house, in which he lived, destroyed by fire. Died of injuries, May 1.

SUPPLEMENTARY LIST OF FATAL INDUSTRIAL ACCIDENTS OCCURRING DURING 1926

LOGGING—				
Logger	Yahk, B.C.	Dec. 8	26	Struck by tree broken by a falling tree. Died Dec. 9.
MANUFACTURING—				
Saw and planing mills:				
Piler	Vancouver, B.C.	Sept. 30	23	Run over by lumber carrier. Died April 3, 1927.
CONSTRUCTION—				
Buildings and structures:				
Labourer	Niagara Falls, Ont.	Nov. 25	37	Struck by train; back broken. Died some months later.
Bridge and highway:				
Road foreman	Ashcroft, B.C.	Dec. 6	58	Struck on head by boulder following cave-in. Died March 30, 1927.
TRANSPORTATION AND PUBLIC UTILITIES—				
Steam railways:				
Section foreman	W. Summerland, B.C.	Nov. 4,	47	Collision of power cars while victim was returning home. Died November 8.
Water transportation:				
Seaman	Cornwall, Ont.	Nov. 12	20	Crushed.
Local transportation:				
Labourer	Elmira, Ont.	Oct. 19	73	Fell off wagon; fractured leg.

SUPPLEMENTARY LIST OF FATAL INDUSTRIAL ACCIDENTS OCCURRING DURING THE FIRST QUARTER OF 1927

LOGGING—				
Logger	Stillwater, B.C.	Feb. 19	.....	Struck by snag brought down by a line.
Teamster	Wynndel, B.C.	" 25	50	Fell from load of logs when chain broke. Died April 8.
Hook tender	Rock Bay, B.C.	Mar. 8	58	Struck by tree caught by moving log. Died March 12.
Logger	Theodosia Arm, B.C.	" 16	.....	Crushed by a rolling log. Died March 19.
MINING, SMELTING AND QUARRYING—				
Metalliferous mining:				
Miner	Premier, B.C.	Feb. 24	53	Suffocated when snow slide swept over mouth of a tunnel.
Coal Mining:				
Miner	Canmore, Alta.	Mar. 26	50	Miner's phthisis.
MANUFACTURING—				
Saw and planing mills:				
Labourer	Chemainus, B.C.	Mar. 12	21	Tying bundles of cedar lumber; splinters in hand; infection. Died March 29.
Pulp and paper products:				
Labourer	Port Alberni, B.C.	Mar. 11	63	Fell from a platform.
CONSTRUCTION—				
Buildings and structures:				
Concrete worker	Victoria Co., N.B.	Mar. 15	45	Crushed under fall of concrete car.
TRANSPORTATION AND PUBLIC UTILITIES—				
Steam Railways:				
Trainman	Haney, B.C.	Mar. 12	43	Slipped and fell beneath car. Died April 23.
Electricity and gas:				
Plumber	Montreal, Que.	Mar. 1	62	Poisoned while repairing break in gas pipes. Died June 10.

IMMIGRATION TO CANADA DURING SECOND QUARTER OF 1927

THE accompanying tables, issued by the Department of Immigration and Colonization, show the nature and extent of immigration into Canada during the three months ended June 30, 1927, with some comparative figures for the corresponding period of 1926. The total number of immigrants was 77,434, of whom 27,483 were British, 7,663 from the United States, and 42,288 from other countries. In the corresponding period of 1926 the total number of immigrants was 48,304, of whom 21,823 were British, 6,247 from the United States and 20,234 from other countries.

RECENT LEGAL DECISIONS AFFECTING LABOUR

Montreal City Policemen May Not Belong to a Union

The Supreme Court of Canada, in a judgment rendered in June, reversed the decision given in 1925 by Mr. Justice Coderre in the Superior Court, later confirmed by the Court of King's Bench of Quebec, in the case of *Bélec versus the City of Montreal.* The latter judgment, and the circumstances relating to this case, were outlined in the LABOUR GAZETTE, May, 1925, page 539. Mr. Justice Coderre in the Superior Court declared to be null and void certain resolutions and orders passed by the Montreal City council, forbidding members of the city police force to be members of Policemen's Federal Labour Union, No, 62, a union which holds a charter from the Trades and Labour Congress of Canada. The city of Montreal next carried the case before the Court of King's Bench (Appeal Division) which court confirmed the decision of the Superior Court, two judges, however, dissenting. Further appeal was next made by the city to the Supreme Court of Canada, which as stated above, reversed the decision of the two lower courts. Subsequently, appeal was made by the plaintiff in the case to the Judicial Committee of the Privy Council, but on July 28, information reached Ottawa that the Privy Council had refused leave to appeal. The text of the judgment of the Supreme Court, which therefore remains the final decision in this case, is as follows. Judgment was given by Mr. Justice Lamont with the concurrence of Chief Justice Anglin, and of Judges Mignault, Newcombe and Rinfret:

TEXT OF JUDGMENT

The City of Montreal, Appellant,
vs.
Philippe Bélec, Respondent.

LAMONT J:

(Concurred in by Anglin C.J.C., Mignault, Newcombe and Rinfret, J. J.

This is an appeal by the City of Montreal against the judgment of the Court of King's Bench (Appeal Side) confirming a judgment of the Superior Court which declared illegal and void certain resolutions passed by the city and a certain order of the Chief of Police based thereon.

For some time prior to July, 1922, friction had existed between the city council and the Federation of Municipal Employees. This federation was a labour union including among its members the police employees of various cities and municipalities in the Dominion. In 1918 a branch of the union, known as Branch No. 62, was formed by the police employees of Montreal. The plaintiff was the secretary of this branch. The union desired the city to recognize its existence and to deal with it through its duly appointed representatives in case of any dispute between the city and any of the members of the union employees of the city. This the city would not do. On July 13, 1922, the union passed a resolution in which their grievances, so far as they related to the police force, were set out in the following words:—

"Whereas the employees of the city of Montreal complain that for a long period they have suffered numerous grievances, of which the most important are —

Police Force—Refusal by the executive committee of the council to allow arbitration, as demanded by the police, and as granted to them by the Minister of Public Works and Labour, to follow its course".

A copy of this resolution was forwarded to the city council and was by it referred to a special committee which reported as follows:—

1. Your committee declares its opposition to the police union in its present form.

2. Your committee is of the opinion, so far as members of the police force, firemen, and waterworks employees are concerned, no federation of municipal employees should be in existence. The committee, however, has no objection to the existence of the welfare association maintained by these employees.

This report was unanimously adopted by the council on September 15, 1922. On November 28, 1923, the council passed the following resolution:—

"Resolved—Whereas the police union is not recognized by the city, no member of the police force should be permitted to take part in the said union, and the chief of police is authorized to take any disciplinary measures that may be necessary to secure compliance with the resolutions adopted by the council and the executive committee."

Instructions were given to the chief of police in accordance with this resolution. On November 29 the chief of police issued the following order:—

"That it is strictly forbidden for all officers or men to belong to the police union as constituted and they have eight days from to-day to dispose of all money, etc. Order of the Executive Board. Per Chief Belanger."

Considering that the resolutions and order above referred to contravened the provisions of the "Municipal Strike and Lock-out Act," C. 46, 11 Geo. V (Now R.S.Q., c. 98) the plaintiff, on March 31, 1924, brought this

action, and asked that the resolutions of September 15, 1922, and November 28, 1923, and the order of the Chief of Police of November 29, 1923, be annulled and set aside on the ground that they were *ultra vires* of the city council and contrary to law. He further asked that an injunction issue restricting the city from enforcing the said order. The learned trial judge upheld the plaintiff's claim and declared illegal and void the said resolutions and order; and he granted the injunction restraining the city from proceeding to enforce them. On appeal the Court of King's Bench (Dorion and Tellier J. J. dissenting) affirmed the judgment of the Superior Court. The city now appeals to this court.

The pertinent provisions of sec. 2520*o*, are as follows:—

2520 *oc*. This section shall apply to any claim or dispute between employers and employees in connection with the following matters:

a. The price to be paid for work done or in course of being done, whether the disagreement has arisen wiht respect to wages, working hours, by night or by day, or the length of day or night work;

b. The dismissal of one or more employees on account of membership in any labour union.

2520 *od*. It shall be unlawful for an employer to declare or cause a lockout, or for employees to strike, on account of any dispute mentioned in the foregoing article before such dispute has been submitted to a board of arbitration.

2520 *oj*. Any employer who declares or who is the cause of a lockout in contravention of the provisions of this section, shall be liable to a fine of not less than one hundred nor more than one thousand dollars, for every day or part of a day that such lockout lasts.

It is admitted that there is no claim or dispute under sub. sec. (a) of 2520 *oc*. The action, therefore if it can be maintained, must come within sub. sec. (b).

For the city it is contended that the action is premature in that there can be no claim or dispute in connection with the dismissal of an employee on account of membership in a labour union until an employee has been actually dismissed because of such membership. While for the respondents it is contended that the resolutions of November 28, 1923, passed by the city, and the order of the chief of police based thereon, constituted a clear threat of dismissal in case of non-compliance with the order; that such threat, even without a dismissal, created between the city police employees, who desired to maintain their membership in the union, a dispute which would probably be said to be "a dispute in connection with the dismissal of one or more employees", that the dismissal of those employees would amount to a lockout within the meaning of 2520 *od*. and that as the declaring or causing of a lockout would be unlawful before such dispute had been submitted to arbitration, the legislature must have intended that resort should be had to arbitration in order to forestall and prevent the threatened lockout. This contention was given effect to in the courts below.

With great deference I am of opinion that the judgments below cannot be upheld. It is quite clear that there was a difference of opinion between the city council and the union as to the desirability of having the city recognize the union. Such a difference of opinion, however, the legislature has not seen fit to bring within the purview of the Act. As an employer who declares or is the cause of a lockout in contravention of the section is liable to a penalty for so doing, the section must be strictly construed and must be limited in its application to such matters as clearly come within the language used.

The section, in so far as this action is concerned, is limited to a "claim or dispute in connection with the dismissal of one or more employees."

Now it will be observed that there is no intimation in the language of the resolutions or order that a failure to comply with the order will be followed by dismissal. There is, therefore, no express threat of dismissal. It is, however, contended that as the exercise of the power of dismissal is the only means which the city has of compelling obedience to the order, the language of the order implies that non-compliance therewith will be followed by dismissal, and that it was so understood by the employees. Even if that be so it is not, in my opinion, sufficient to constitute " a claim or dispute in connection with the dismissal of one or more employees."

Until an employee has been dismissed I am unable to see how any claim or dispute can arise in connection with his dismissal. Upon this point I find myself in harmony with the reasons given by Mr. Justice Dorion and Mr. Justice Tellier.

In his judgment Mr. Justice Dorion said:—

"I am of the opinion that to "declare" a strike (or a lockout) is to "give it effect". A lock-out is the turning out of the employees. Well, the city has not dismissed a single police officer, and, if the policemen persist in refusing to quit the union, it is still possible for the city to comply with the law (this is precisely the occasion when such a step should be taken), by requesting the establishment of a Board of Arbitration under article 2520 cf.

And Mr. Justice Tellier says:—

"The council would violate the law only in the event that it decided to punish those who refused to comply with its orders and resorted to a lock-out or a dismissal of the members of the police force. Until the council

so acts it is within its rights, and the act concerning strikes and lock-outs does not apply, inasmuch as the case under consideration is not provided for.

The resolutions and order under attack in this action were declarations of policy on the part of the city council. They constituted an expression of the council's intention. The council, however, was always in a position to review its expressed intention and to alter its policy at any time before carrying it into effect. And that is evidently what took place here. The eight days specified in the order of the chief of police expired, but their expiration was not followed by any dismissal. The council stayed its hand as it had a perfect right to do, and its implied threat of dismissal never amounted to more than a threat. Wherein then did the city contravene the act? If the legislature had intended the act to apply to a claim or dispute in connection with a threat of dismissal as well as to a claim or dispute in connection with the dismissal itself, it could and doubtless would have said so. Not having said so I am of opinion that the legislative intention was to limit the application of the act under sub. sec. (b) to cases in which there had been an actual dismissal.

That such was the legislative intention is, I think, supported by the language used in sec. 2520 *oj.* above quoted.

If the city had been prosecuted for declaring or causing a lockout under the circumstances existing in this case, could it have been subjected to the penalty mentioned in that section? In my opinion it could not. It would, in my opinion, have been a sufficient answer on the part of the city to have shown that its police employees were at work in the performance of their duties on the days on which the city was charged with having locked them out. Where the employees continue to perform their duties under their employment a lockout cannot, in my opinion, be said to exist. As no policeman was dismissed on account of membership in any labour union, the city has not, in my opinion, contravened the provisions of the act. The plaintiff's action must therefore fail.

I would allow the appeal; set aside the judgments in the courts below, and enter judgment for the city with costs in all courts.

—(Supreme Court of Canada—City of Montreal, appellant, vs. Philippe Bélec, respondent.)

THE LABOUR GAZETTE

PREPARED AND EDITED IN
THE DEPARTMENT OF LABOUR, OTTAWA, CANADA

VOLUME 27] SEPTEMBER, 1927 [NUMBER 9

NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

Monthly Summary

A continued increase in industrial employment in Canada was shown at the beginning of August, according to returns received by the Dominion Bureau of Statistics from 6,211 firms, each with a minimum of fifteen employees. These firms employed 903,060 persons on August 1, as compared with 898,766 on July 1. The increase was somewhat less than that registered on August 1, 1926, but the employment index number, at 109.2 on August 1, was higher than in any other month since the record was instituted in 1920; on July 1, 1927, it stood at 108.4 and on August 1, 1926, 1925, 1924, 1923, 1922 and 1921, it was 104.2, 96.3, 94.7, 100.2, 93.1 and 88.9, respectively. These index numbers are computed with the staffs employed in January, 1920, as base=100. The returns represent all industries except agriculture, fishing, hunting and highly specialized business undertakings. Reports received from the offices of the Employment Service of Canada indicated a slight decline in the volume of business transacted during July in comparison with the figures recorded both for June, 1927, and July, 1926. At the beginning of August the percentage of unemployment among members of local trade unions stood at 3.3 as compared with percentages of 3.2 at the beginning of July and 2.3 at the beginning of August, 1926. The August percentage is based on reports received by the Department of Labour from 1,569 local trade unions with a combined membership of 167,648 persons.

The average cost of a weekly family budget of twenty-nine staple foods was $10.93 at the beginning of August, as compared with $10.92 for July; $11.10 for August, 1926; $10.84 for August, 1925; $10.19 for August, 1924; $10.53 for August, 1923; $10.44 for August, 1922; $11.44 for August, 1921; $16.42 for August, 1920; $16.92 for June, 1920 (the peak); $13.41 for August, 1918; and $7.68 for August, 1914. In wholesale prices the index number calculated by the Dominion Bureau of Statistics based upon prices in 1913 as 100 was slightly higher at 152.3 for August, as compared with 152.0 for July; 154.0 for August, 1926; 158.9 for August, 1925; 156.8 for August, 1924; 153.5 for August, 1923; 151.7 for August, 1922; 165.5 for August, 1921; 250.2 for August, 1920; 256.7 for May, 1920 (the peak); and 202.8 for August, 1918.

The time loss due to industrial disputes in August, 1927, was greater than during July, 1927, but less than during August, 1926. Thirteen disputes were in existence at some time during the month, involving 4,894 workpeople, and resulting in a time loss of 13,339 working days. Corresponding figures for July, 1927, were: thirteen disputes, 1,923 workpeople and 8,803 working days, and in August, 1926, fourteen disputes, 4,326 workpeople and 34,800 working days.

Industrial Disputes Investigation Act, 1907

During August the Department received three new applications for Boards of Conciliation and Investigation under the Act. Full particulars of the proceedings during the month are given on page 939 of this issue. An outline of the proceedings during the past year, and since 1907, will also be found in the same section.

British Columbia adopts Old Age Pensions

A proclamation was published in the *British Columbia Gazette* on August 25, declaring that the Old Age Pensions Act, which was passed at the last session of the provincial legislature (Statutes of 1926-27, chapter 50), took effect on August 17, 1927. This Act enabled the provincial government to enter into an agreement with the government of Canada pursuant to the provisions of any measure that might be enacted by the Dominion Parliament relating to Old Age Pensions, and authorized payment of one-half of the amount of such pensions by the province. Reference was made in the April issue of the LABOUR GAZETTE (p. 374-377) to the subsequent adoption of an Old Age Pensions Act by the Dominion Parliament, the cost of such pensions to be divided equally between the Dominion government and the respective provincial governments.

The same issue of the *British Columbia Gazette* contained also certain regulations which have been made by Order in Council under the authority of section 7 of the federal Act relating to Old Age Pensions, as follows:

1. The Workmen's Compensation Board is authorized and directed to keep such records, books, and accounts of the receipts and expenditures under this Act as may be necessary; to pay pensions monthly by bank cheque; and to do all such other acts and things as are incidental, conducive, or necessary to the proper administration of the said Act and the "Old-age Pensions Act," being chapter 35 of the Statutes of Canada, 1927, and the regulations made thereunder, and to the operation of the pension scheme therein contained.

2. Every person who makes application for a pension shall complete such forms and furnish such evidence and proofs of his claim from time to time as may be required by the Workmen's Compensation Board.

3. The Workmen's Compensation Board shall be entitled to obtain without charge from any Government department any available information they may deem necessary in the administration of the "Old-age Pension Act," chapter 35 of the Statutes of Canada, 1927, and the "Old-age Pension Act," chapter 50 of the Statutes of British Columbia, 1926-27.

The Honourable Peter Heenan, federal Minister of Labour, visited the province of British Columbia during the month of August, and conferred with the provincial government in regard to the inauguration of a system of old age pensions in the province under the authority of the above-mentioned federal and provincial legislation.

Question of protective legislation for female employees

The British House of Commons on July 19 refused a private member leave to introduce a bill designed to repeal the section of the Lead Paint (Protection against Poisoning) Act, 1926, prohibiting the employment of women in painting buildings with white lead paint. This subject was mentioned in a note in the LABOUR GAZETTE, September, 1926 (page 847), in connection with the discussions on the latter measure; and a somewhat similar controversy in the United States between the advocates of equal treatment for women in industry and those in favour of special protective legislation was noted in the issues for April, 1926 (page 308), and June, 1926, (page 531).

Miss Margaret Bondfield, defending the protective principle in the British House, said as follows:—"We have never raised this question of special regulations for women unless we have had direct experience of the necessity for such regulations, and it seems a very amazing thing that all the objections to protective legislation should come from women who are not themselves working women. The main argument is that it is going to restrict the field of women's employment. I do not think that is a sound argument at all. Since we have had our Factory Regulations, since we have improved the conditions of women's work by protective legislation, there are more, and not fewer, women working in connection with these trades, and with regard to experts' opinion (*i.e.*, on the special liability of women to contract certain industrial diseases), I can quote just as many experts showing that the situation is as bad, or worse, in connection with this business in relation to women. In all these matters we have to exercise common sense. Those who represent the working-women are satisfied, by investigation and expert evidence, as well as by practical day-by-day experience of the workshops, that lead poisoning can be abolished, and ought to be abolished, and if we have to wait some time longer for men to get rid of this evil, then we will not wait so long before women will get rid of it."

Industrial and Labour Information, published by the International Labour Office, Geneva, contained the following note on this subject in its issue of August 15:—

"The question of the protection of women wage earners has been the subject of considerable discussion during the past two generations. The main question at issue has always been: Should conditions of labour be the same for men and women, or should women workers enjoy special protective legislation? The International Women's Suffrage Alliance holds that any preferential system of international legislation as regards women might, despite its temporary advantages, become a real instrument of tyranny, and might result in limiting the numbers of working women in certain undertakings and diminishing their chances of obtaining high wages. On the other hand, the International Council of Women decided recently that no action concerning the legislative protection of women's work should be undertaken without previous consultation with the women workers' organizations concerned.

"In this connection attention may be drawn to the resolution adopted unanimously by the International Conference of Women Workers held in Paris at the end of July last, attended by the representatives of the organizations of fourteen countries. In this resolution the working women assert their fixed determination to secure the triumph of their claims for the protection of women workers in all branches of women's work. The claims in question cover a variety of subjects. They deal with the pro-

tection of the woman in her capacity as a worker. They extend to all protective labour measures, such as those connected with the eight-hour day, factory inspection, sickness insurance, freedom of association, minimum wages, etc. They deal also with the protection of the woman worker in her capacity as a woman, and special attention is drawn in the resolution to the necessity of the ratification of the Washington Convention concerning the employment of women before and after childbirth, and concerning the employment of women during the night. They also deal with the subject of the extension and enforcement of the various Recommendations of the International Labour Conference concerning the employment of women in certain unhealthy industries and in agriculture."

Cost of Workmen's Compensation in Canada

Professor H. Michell, of McMaster University, Toronto, contributes to the August issue of *Industrial Canada* a study of the cost of workmen's compensation in the Canadian provinces. This article is one of a series of studies of the practical effects of some of the principal groups of provincial labour laws. The April issue of this GAZETTE contained a note on the effects of minimum wage legislation, and the issue for June referred to an article on the results of workmen's compensation in Canada, of which the present article is a continuation.

The diverse character of the industries in the various provinces, from the standpoint of risk, makes it difficult to reach definite conclusions as to the comparative cost of compensation. "The very high cost of compensation, for instance, in New Brunswick," Professor Michell points out, "is due to the fact that such dangerous occupations as lumbering, mining and stevedoring form so large a bulk of the province's industrial activity. Sawmills in New Brunswick with a payroll of $2,903,000, paid in 1925 an assessment of 4.5 per cent of that payroll, or $130,617. Logging paid 4.25 per cent or a total assessment of $119,563. The same is true for mining in Nova Scotia and British Columbia. In Ontario, on the other hand, while there are, of course, dangerous occupations, they do not bulk so largely in the whole."

Allowing, however, for this factor in the problem, the writer considers that the total burden on industry as a whole is evenly distributed over the various provinces. The conclusions reached in the study, which is accompanied by charts and tables, are as follows:—

"First, the Compensation Boards of the various provinces are functioning efficiently and are providing for both employers and workpeople an admirable service in dealing with the harassing problems of compensation for industrial accidents.

"Second, the various provinces are probably afforded this service as cheaply as it is possible to obtain it. In view of the enormous amount of work entailed on the Boards and the great sums of money handled, the administration expenses are remarkably low and speak well for the efficiency of the system.

"Third, as population increases and the provinces become more and more industrialized, the amounts expended on compensation will proportionately increase, and the amounts paid in pensions will also increase.

"Fourth, as systems of compensation are always open to amendment by legislative action, and since legislatures show a constant tendency to be increasingly generous, there is always a danger that attempts will be made to revise scales of compensation upwards, in spite of the fact that experience has shown the existing scales to be fully high enough if malingering is not to be encouraged. It is very seldom, indeed, that any scheme of social amelioration becomes less and not more generous.

"Fifth, coupled with this is also the very natural and entirely legitimate tendency of those administering the Boards, as their experience grows, to permit the inclusion of a greater number of industrial risks and particularly industrial diseases, thus broadening the scope of the compensation given. For instance, in Ontario during 1926 three new diseases were added to the list on which compensation is paid, the most important of which was silicosis, a disease contracted by miners, caused by silica in the rock being worked upon. To widen the scope of compensation paid in this manner is an invariable and, indeed, quite unavoidable tendency.

"Sixth, as wages increase the cost of compensation increases and *vice-versa*. Thus, the average cost of all accidents in Ontario was $213.26 in 1921, and $180.60 in 1925, due of course, to the fall of wages. The average cost of all accidents in the future will, therefore, fluctuate with the wages paid.

"Lastly, in the system of government control of workmen's compensation we have a system undoubtedly superior to any that has yet been devised."

Labour "turnover" in lumbering industry in Ontario

In the *Canada Lumberman* for August 15, Mr. William C. Millar of Fort William, Ontario, suggests remedies for the serious conditions existing in the lumbering camps in western Ontario as the result of the rapid labour

turnover. Last winter, he states, was one of the worst on record for men "jumping their jobs." "Before the labour market will ever be stabilized in the woods, operators will have to devise some means to make the work less seasonal by supplying work in summer camps. Labourers will have to be trained to a point where they can secure wages on a par with that paid other lines in these days of high cost of living. The best camps will have to be built with some of the necessary conveniences and social comforts as supplied to the town workers. It does not seem that the lumbering interests can stand any more expense just now owing to the poor conditions of affairs in the forest products market, and as the pulp interests will be using 80 per cent of the labour in this district, it looks to me to be a matter which will concern them more than any other industry and to them I look for a solution of the labour problem."

Mr. Millar illustrates his proposals with one or two examples showing how the supply of labour has been stabilized when employing companies have provided labour during the slack period of the year, he says: "From figures secured it has been found that of the big companies operating in this district, the Indian Lake Lumber Company of Osaquan had the least trouble with their men quitting. This can be accounted for owing to the fact that a big percentage of their lumberjacks are engaged during the summer in the sawmill at Osaquan, where a thriving community has grown up around the industry. This season's figures gives the number of children in Osaquan as 85, the parents of every one being employed by the company. It is regrettable that more companies cannot or do not follow the splendid community system inaugurated by this company from which all benefit."

The writer commends the action of the Ontario Government which recently threw open for homesteading the Sibley peninsula on which the Provincial Paper Mills Limited had been taking out pulpwood. Handpicked homesteaders were brought in from Denmark and most of them were successful in building comfortable homes, but some were handicapped by lack of sufficient funds.

Mr. Millar recommends that this policy should be adopted generally as a means of stabilizing employment in the lumber industry. He believes that the lumber companies could easily absorb the produce of the farms for supplies and in addition would have the services of these settlers during the winter months. Commenting on the leasing by the Ontario Government of large tracts in the Nipigon Reserve the writer suggests that the plan might be tried out there if the land is of agricultural value.

"Social wage" policy of American Federation

A new wages policy was adopted by the American Federation of Labour at its annual convention in 1925, when it was declared that "Social inequality, industrial instability and injustice must increase unless the workers' real wages, the purchasing power of their wages, coupled with a continuing reduction in the number of hours making up the working day are progressed in proportion to man's increasing power of production."

The new policy is outlined by President William Green in the August issue of the *American Federationist.* It represents the third phase in the Federation's effort to secure adequate wages for labour. In the earliest period the aim of organized labour was to secure higher money wages. The second period began with the advance in the price of commodities. At that stage organized labour learned that the value of wages depended on the purchasing power of money, and adopted the policy of seeking increases in "real wages." The third period began when labour perceived, in the words of President Green, that "higher real wages from a social point of view do not improve the situation of the worker if productivity increases more than real wages." Enlarging on this theme the president continues: "Higher productivity without corresponding increase of real wages means that the additional product has to be bought by others than the wage-earner. This means that the social position of the wage-earner in relation to other consumers becomes worse, because his standard of living will not advance proportionately with those of other groups. Deteriorating social position, that is, declining purchasing power of the mass of the wage-earners in relation to the national product brings about industrial instability which will develop into industrial crisis. The American Federation of Labour is the first organization of labour in the world to realize the importance of the factor productivity in economic society. It no longer strives merely for higher money wages; it no longer strives merely for higher real wages; it strives for *higher social wages,* for wages which increase as measured by prices and *productivity.* This modern wage policy lifts the movement to an absolutely new level. For higher real wages meant only: betterment of the economic position—while higher social wages mean: betterment of the economic and *social* position of the worker. The modern wage policy guarantees an active but stable development of industrial society."

Low paid employees fewer in British Columbia

The effect of the British Columbia minimum wage laws in reducing the relative number of low-paid employees in the province is noted in articles elsewhere in the present issue. According to the annual report of the Deputy Minister of Labour for 1926, the number of wage-earners receiving under $18 a week, or less than $3 a day, fell from 10,803 to 6,978, a reduction of 35.13 per cent. Wage-earners receiving from $18 to $30 a week, or from $3 to $5 a day, grew in number from 51,370 to 58,758, a rise of 14.38 per cent, and those receiving $30 a week or over increased from 33,268 to 34,567, or 3.90 per cent. The changes appear to have been fairly general, affecting most of the industrial groups. The largest increase was shown by the laundries, cleaning and dyeing group. On the other hand the most marked change in the weekly average of any group was a reduction of $2.85 in smelting, but this was the result of an arrangement made during the year by which wages rise and fall with the fluctuations in the prices of metals.

Male minimum wages in British Columbia

The first report of the Board of Adjustment which administers the Male Minimum Wage Act of British Columbia forms part of the Annual Report of the Provincial Department of Labour for 1926, which is reviewed on another page of this issue. The Board's first order under this Act, fixing the lower limit of wages in the lumbering industry at 40 cents an hour,* went into force on November 1, 1926, and was therefore operative for only two months of the period covered by the report. Before they issued the order the Board estimated that 24 per cent of all lumber workers in the province were receiving less than 40 cents an hour, and it was believed that it would mean an increase in pay for nearly 9,000 workers. The order was expected to result, to some extent, in stabilizing the labour employed in this industry. "It had come to the notice of the Board," the report states, "that there was a large body of white labour employed in the industry at low wages, and that these men, having no higher rates of pay in prospect, had not regarded this work as their permanent calling. This had meant the absence of an incentive to attain a higher degree of efficiency, and also frequent changes of personnel, both of which conditions had been a liability rather than an asset to the industry."

* Labour Gazette, October, 1926, page 948.

Another expected result of the order was the lowering of the proportion of oriental workmen employed in the industry. The Board states that there was common testimony that the greater efficiency of the white worker entitled him to a rate of pay one-fourth higher than the wages of the oriental. It therefore seemed reasonable to expect that "if an employer found himself obliged to pay his oriental workers 40 cents an hour, he would be willing to pay his white workers more, or, alternatively, that a large additional number of white workers would be introduced into the industry." That the Board's expectation was justified may be seen from the fact that while in 1925 there were 55.20 per cent of white employees and 44.80 per cent of orientals in the industry, in November, 1926, there were 65.70 per cent of white employees and 34.30 per cent of orientals.

The main provisions of the Male Minimum Wage Act are summarized as follows:— "The administration of the Act is in the hands of the Board of Adjustment, whose duty it is to ascertain the wages paid to employees in the various occupations and fix a minimum wage. This is to be made legally effective by the issue of an order or orders by the Board, and after the date specified in the order it becomes illegal for an employer to pay an employee a wage less than the minimum. Exceptions may be made in the case of employees classified as handicapped, or part-time employees, or apprentices, but for each such individual a permit is to be given by the Board, authorizing the payment of a wage less than the ordinary minimum wage; and the number of employees to whom such lesser wage is paid may be limited. Penalties of fine or imprisonment are provided in case of violation of the Act, and an important clause is the one which enables an employee, having been paid less than the legal minimum wage to which he is entitled, to recover from his employer, in a civil action, the amount by which he has been underpaid, with costs."

The report contains an account of the legal proceedings arising out of the challenge made by certain employers in the province to the validity of the first order (Labour Gazette, January, 1927, page 120, etc.).

Hours of work in British Columbia shipbuilding industry

The Board of Adjustment which administers the "British Columbia Hours of Work Act, 1923," recently announced that the eight-hour day rule would be strictly enforced in the shipbuilding yards in the province. *Industrial Canada,* the monthly publication of the Cana-

dian Manufacturers' Association, in its August issue, anticipates that this policy will affect the Japanese boat building industry, which had grown to considerable proportions in the province, as many Japanese fishermen have turned to boat building, being unable to secure fishing licenses. These men work, it is stated, for longer hours and for less pay than white labour, and consequently their employers were in a position to underbid the white employer on the building of seine boats and other fishing crafts. *Industrial Canada* remarks that "the new eight-hour day regulations will require all boat builders to adhere strictly to that principle and this will mean that Japanese yards will have to pay higher wages to their carpenters. Consequently the orientals will not be in such an advantageous position in future to underbid 'white' yards. The situation is being closely watched by the Division and no stone will be left unturned to assist our shipyard members in this respect."

State enterprise in Australia

State enterprises in Australia form the subject of an article by Mr. J. B. Brigden, Professor of Economics in the University of Tasmania, appearing in the July number of the *International Labour Review*. The writer describes Australia as a fertile soil for legislative experiment. From the development of natural resources and public utilities State endeavour has expanded to cover a very wide field. There are two main types of State enterprise. The largest and most expensive undertakings are those designed to extend and to encourage land settlement. The other main type is associated with public works and springs from the "day labour" system of direct construction by the State. Both types of enterprise are well distributed throughout Australia, and Queensland has also shopkeeping enterprises for the protection of the consumer. A classification of State endeavours shows the following divisions: 1. Land settlement and its requirements; 2. Transport facilities—roads, railways, tramways, shipping; (3) Other public utilities to facilitate or protect private enterprise; (4) Banking and marketing; (5) Subordinate enterprises chiefly to supply state requirements; (6) Enterprises to assist or protect the ultimate consumer; (7) Enterprises intentionally socialistic.

The strictly trading enterprises, as a rule, have proved successful financially, but the undertakings designed to encourage private enterprise have been more expensive to the State. According to the writer, State enterprise has been a useful check on contractors in special classes of work where quality was more important than the lowest money cost. On the other hand, state undertakings have tended to check the growth of voluntary co-operation. Faced with any problem, the first impulse of the Australian, it is stated, is to clamor for government action. As far as labour conditions are concerned there is little difference between the state and the private employee. Trade unions are fostered by labour governments, which follow the policy of "closed shop" and "preference to unionists". The advantages of greater security of employment and, in some cases, of pension rights, are the only material advantages enjoyed by the state employee over his privately employed neighbour.

The writer notes a tendency for governments to rush in and out of business enterprises without sufficient prudence and without adequate provision for elasticity in management. Considering the absence of any special form of administration the enterprises on the whole proved successful.

The writer believes that the cautious economist will be slow to endorse any proposal for a further extension in Australia of state enterprise, unless the strongest reasons for such extension are established. He suggests the urgent need for an examination of administrative methods, not because state enterprise is necessarily less efficient than private enterprise, but because the normal administrative methods of government are not suited to it.

Conciliation and arbitration in Norway

The Norwegian government recently amended the Labour Disputes Act and also re-introduced compulsory arbitration. This action came as the result of protracted negotiations for a settlement of disputes in the mining, metal, textile and boot and shoe industries, all of which proved abortive. Under the Labour Disputes Act of 1915, the National Conciliator could prohibit a strike or lockout where serious danger to the public interest was involved, and any such strike or lockout, entered upon before the compulsory conciliation proceedings prescribed by the Act had terminated, was declared to be illegal and the parties thereto were liable to a fine of from five to 25,000 kroner. A number of temporary acts prescribing compulsory arbitration were passed each year until 1922, when the measure lapsed until revived by the new Act. The terms of the Labour Disputes Act remain substantially the same as those

of the Act of 1915, but the former provision that an association must have at least twenty-five members to be considered a trade union is repealed, and the Labour Court is to consist of a president and six members instead of four as under the earlier Act. The president and members are to be appointed by the Crown for three years. An added section provides that when a ballot is taken on a conciliation proposal the organization shall take steps to enable all members to become acquainted with the proposal in its entirety, and information regarding the numbers that voted for and against the proposal must be supplied.

The Compulsory Arbitration Act provides that, in a case where conciliation has failed and where a strike is liable to endanger important public interests, the Crown may order that it be settled by compulsory arbitration which may be confined to such points at issue as cannot be settled by conciliation. The court is to consist of five members, a president and two members appointed by the Crown, and two members nominated respectively by the Norwegian National Federation of Trade Unions, and the Norwegian Employers' Association. The president is appointed for the period of validity of the Act and the other members for each case as it arises. An award of the Arbitration Court will be valid for a period not exceeding two years, and is subject to re-examination if during that time conditions undergo changes which may be regarded as important in determining the wages provisions of an award.

Family endowment in New South Wales

After a controversy extending over several months between the Legislative Council and Legislative Assembly, the Family Endowment Act of New South Wales was passed in March 1927. The Act is based on the principle that the living wage for adult male workers shall be declared for a husband and wife only instead of (as previously) for a husband, wife and two children. It will not therefore come into effect until after the declaration of the living wage for a man and wife without children has been made by the Industrial Commission of New South Wales. The Act provides for the payment to mothers of five shillings a week for each child for the maintenance, training and advancement of children under 14 years of age. The allowance may be continued up to 16 years in case of children incapacitated from earning a living by reason of a physical or mental defect. Various conditions must be satisfied before the allowance becomes payable. At the date when the claim to an allowance is made the mother and children must have been residents of New South Wales for two years; allowances are not payable to mothers of illegitimate children or to mothers in receipt of widows' pensions; children of an alien father are excluded unless born in Australia; families with an income equal to the living wage for one year, plus £13 for each child under 14 years of age, are not eligible for an allowance. The Finance (Family Endowment Tax) Act, 1927, provides that employers shall pay into a newly constituted family endowment fund amounts equal to three per cent of their total wages bill, and from this fund the family allowances will be paid.

The family allowance is a social experiment which has attracted wide attention in recent years. It is generally held that the subject is one which concerns the state rather than the employer. Since the state is primarily concerned with the well-being of the family, any endeavour to shift the responsibility to the employer would almost inevitably lead to a preference for unmarried workmen. However, one of the early steps in the direction of family endowment was taken by the employers in the coal fields of South Wales, who recently introduced family wages (Labour Gazette, September, 1925, page 864). The system has also made considerable progress on the continent of Europe, especially in France and Belgium. (Labour Gazette, September, 1925, page 864.)

Industrial Health Exhibit at Rotterdam in 1928

A section on industrial health, safety, sickness and psychotechnic is being arranged as a part of the Dutch Industrial Exhibition which will be held next year at Rotterdam (Holland) from June to September. A large hall will be provided for this purpose. A committee has been created, consisting of Dr. N. M. Josephus Jitta, president of the advisory committee on Health, 1st vice-president; C. J. Ph. Zaalberg, Director General of Labour, 2nd vice-president; Eng. R. A. Gorter, Director of the Prevention Museum at Amsterdam; Dr. W. R. M. Kranenburg, medical adviser of the Central service of inspection of labour; Prof. J. G. Sleeswijk, professor of industrial health at the Technical University of Delft; Dr. A. H. Vossenaar, chief medical officer of mines at Heerlen; Dr. J. Sanders, of Rotterdam; F. W. Drijver, mandatory of the "Bankassociatie at Rotterdam".

This division of the exhibition will consist of a scientific section and a commercial section. In the commercial section special accommodation will be provided, as far as possible and when space will permit, for those who deal in articles of interest to the four groups above mentioned. Firms who intend to exhibit articles in this special section may communicate right now with the First Secretary, Dr. J. Sanders, Heemraadsingel 240, Rotterdam.

Employers in the shipbuilding industry in Great Britain are reported to have offered to co-operate with the employees' union in establishing an index in accordance with which wages will rise or fall automatically in accordance with the ability of the industry to pay.

A magistrate in Ontario recently commented on the low wages paid by some farmers to their hired men. In the case before him a young Englishman who had been in the country less than three months had worked for a farmer at a wage of $20 a month, but had failed to obtain payment in full. The magistrate pointed out that first-rate work could not be expected from an employee in return for such a wage, and he would listen to no complaint regarding the man's work.

The Department of Mines of Canada has published the first of a series of twelve pamphlets designed to outline the activities of its various branches and the services they perform. These services are described as follows: Geological and topographical mapping of Canada's mineralized areas; investigations of Canada's mineral resources, and of economic methods of production, marketing, and utilization; research work in ore dressing and metallurgy, fuels and fuel testing, ceramics, etc.; regulation of manufacture, testing, storage and importation of explosives; maintenance of a national museum of natural history, mineralogy, geology, and ethnology.

The League of Nations' Secretariat at Geneva has issued a series of publications describing the various phases of the League's organization and their functions. They are intended for general purposes of information and are not official documents. One of these booklets, entitled "The League of Nations its Constitution and Organization", records the members of the League, the conditions of admission and withdrawal, its action and finances It briefly outlines the main constitutional organs of the League, namely, the Assembly, the Council, and the Permanent Secretariat, and describes its two essential branches, the Permanent Court of International Justice and the International Labour Organization. Another booklet, entitled "A Survey", gives a résumé of the work of the League and what it has accomplished in the solution of various problems. The third booklet is entitled "The Permanent Court of International Justice" and gives a detailed account of this organization, tracing the events that led to its formation, describing its procedure and personnel, since its first meeting in 1922. A fourth publication entitled "Social and Humanitarian Work" outlines the measures adopted to restrict the drug traffic and the traffic in women and children. It deals with the repatriation of war prisoners and outlines relief work carried on among Russian and near East refugees.

The Mining Association of Great Britain, on behalf of its constituent associations, recently approved an undertaking to restrict the outside recruiting of workers for the industry. The agreement provides that no member of the association shall engage any person over 18 years of age, otherwise than as a student, in any of a specified list of occupations unless that person had a least a week's experience in that occupation before April 30, 1926. This restriction does not apply where an employer has notified an Employment Exchange of the vacancy and has failed to obtain an applicant. When in such a case on outsider is recruited, however, the employer is requested to forward particulars to the nearest Employment Exchange. These restrictions, which are destined to help the local miner, do not apply to disabled ex-service men.

The number of assisted passages to Canada from Great Britain and Northern Ireland in connection with agreed schemes under the Empire Settlement Act was 1,898 during July, as compared with 1,966 to Australia, and 504 to New Zealand. The total departures from Great Britain this year to the end of July numbered 19,710 to Canada; 18,267 to Australia; and 331 to New Zealand. During the entire period from the inception of the scheme in 1922 to the end of 1926 there were 40,862 departures from Great Britain to Canada, as compared with 111,716 to Australia and 34,404 to New Zealand. The statistics to date for the present year show an increase in the trend of immigration to Canada. There have been over 1,500 more departures to Canada than to Australia from Great Britain during the present year, whereas formerly the majority of assisted emigrants from the United Kingdom emigrated to Australia.

GENERAL REVIEW OF THE INDUSTRIAL SITUATION

THE employment situation at the end of August was reported by the superintendents of the Employment Service of Canada to be as follows:—

From Nova Scotia it was reported that recent storms had damaged the apple crop to a considerable extent, it being estimated that in the vicinity of a million dollars less would be received as a result. In this province the grain harvest was proceeding satisfactorily. While fish were plentiful, heavy storms were temporarily demoralizing this industry. A fair amount of construction work was being carried on, particularly at Halifax where all works under way were progressing satisfactorily. Manufacturing was stated to be normal, with the iron and steel group at Sydney reported as fair. Activity in the coal mining industry was fairly good. A shortage of applicants for female domestic work was reported, with a fair demand for workers in this class. Trade throughout Nova Scotia was rather good, while transportation activity was fair.

In New Brunswick damage to crops by storms was reported; reports were received of a blight on the potato crop, which appeared serious in some districts. Logging activities had not yet begun, but the prospects were promising, and some small orders were being received. With the close of the salmon fishing season towards the end of August, activities in the fishing industry experienced somewhat of a lull. Manufacturing appeared to be rather brisk, and improvements in some lines were reported. Construction was proceeding satisfactorily with a fair volume of work underway. Trade appeared to be active, with improvements reported. Transportation was normally brisk, although the decline in the tourist traffic was affecting it to some extent. The demand for women domestic workers continued to be rather satisfactory.

Farm workers were in brisk demand in the Province of Quebec. The demand for bush workers had started, and the prospects were for a very busy season. The principal lines of manufacturing were reported as in a very healthy condition, especially in Montreal. The demands for workers for the building and construction industries increased generally throughout this province during August. Transportation was active, while trade, especially retail, was reported as good. The demands for female domestic workers were numerous, with the usual shortage of applicants.

The harvest excursions took many farm workers away from the Province of Ontario, and while harvesting at the end of August was nearing completion, there was some demand for workers to replace those who had left, and some local shortages were reported. Reports on the building and construction industries were not uniform throughout the province. Some centres reported construction as slackening off, due to the completion of contracts, while others reported a considerable activity with temporary shortages of some classes of skilled workers. Toronto, Hamilton and some other centres reported better prospects this year in the matter of fall and winter building. The metal mining industries continued steady. While manufacturing did not show any noteworthy changes, the tendency seemed to be rather in the direction of improvement than toward a slackening off. As usual, demands for women domestic workers in Ontario were reported as fairly numerous. Generally speaking, employment conditions throughout this province seemed to be in a rather satisfactory state, and compared with the year previous an improvement was noticeable.

The arrival of farm help from Eastern Canada at Winnipeg was the largest single factor in the employment situation in Manitoba at the end of the month. The demand for harvest workers was steadily increasing, but to date no shortage of labour had developed. Building tradesmen in the City of Winnipeg were busy owing to the fair volume of work proceeding, while the Brandon office reported having filled orders for highway and railway labour. Orders for casual labour, especially at Winnipeg, were fairly numerous, but they were readily filled. The usual seasonal shortage of women domestic workers was reported.

As grain cutting became general in Saskatchewan, local shortages of harvest workers developed, but the shortage was not general and not acute, and a further arrival of Eastern harvesters was looked to as a solution of the problem. Demands for railroad construction labour to replace workers having left to engage in harvesting were fairly heavy. From Moose Jaw a local shortage of carpenters and bricklayers was reported, but generally speaking there was no shortage of construction workers throughout the province. Calls for general labour for odd jobs were not numerous, and there were plenty of applicants. The usual heavy demands for women domestic workers, with the shortage of applicants customary at this particular season, were reported.

While grain cutting in Alberta would not become general till early in September, de-

mands for farm hands were heavily increasing, and some local shortages were reported. Requests for construction workers were being received in fair volume, and the usual difficulty in filling railroad construction orders, due to the competition of harvest employment, was developing. From Drumheller it was stated that certain coal mines were about to re-open, but generally this latter industry remained slack. Demands for women domestic workers were increasing with local shortages reported. Employment conditions throughout Alberta seemed very favourable, stimulated chiefly by harvesting operations.

Judging by the demands for workers, the logging industry in British Columbia showed a slight improvement. Though the calls for workers for the metal mines were light, this industry remained normal. Building and construction were rather active, with some centres in the Coast Province reporting all tradesmen as busy. Toward the close of the month orders for railroad construction labour seemed to be on the increase. Manufacturing was rather

*Figures for end of previous months. †Bradstreet. ‡*Maclean Building Review*. §For group figures see articles elsewhere in this issue. **Figures for four weeks ending August 27, 1927, and corresponding previous periods. ***The index of the physical volume of business includes, forestry, mining, manufacturing, employment in wholesale and retail trade, imports, exports, car loadings, shares traded and bank debits. Industrial commodity production includes forestry, mining, manufacturing and construction. Manufacturing includes consumers' goods and producers' goods. ††Preliminary. (1) Excluding lines east of Quebec.

quiet. The number of harvest workers despatched to the Prairie Provinces had substantially improved the British Columbia employment situation, with the result that there was very little unemployment in evidence.

Employers' Reports

Employment at the beginning of August showed a further moderate increase, according to reports compiled by the Dominion Bureau of Statistics from 6,211 firms. These firms employed 903,060 persons, as compared with 898,766 on July 1. This advance involved a rather smaller number of workers than that registered on August 1, 1926, but the index number, at 109.2 on the date under review, was higher than in any other month since the record was instituted in 1920; on July 1, 1927, it stood at 108.4, and on August 1, 1926, 1925, 1924, 1923, 1922 and 1921, it was 104.2 96.3, 94.7, 100.2, 93.1 and 88.9, respectively.

Somewhat greater activity was shown in all provinces except Quebec, where the situation was practically unchanged. In the Maritime Provinces, the increase was not as pronounced as that indicated on August 1, 1926, when the index was much lower. Manufacturing was decidely slacker, chiefly owing to the completion of the season's work in fish-canning, and logging was also seasonally quiet, but the trend of employment was upward in construction, mining and transportation. In Quebec, little general change was shown, manufacturing construction, services and trade reporting increases, while logging and transportation were slacker. In Ontario, there were gains in transportation, construction and trade, but the fluctuations were generally small. In the Prairie Provinces, the most pronounced improvement was in construction, but manufacturing, trade and mining were also more active; on the other hand, transportation recorded large reductions. In British Columbia, continued gains were registered, mainly in manufacturing, logging, mining, construction and services.

Employment in Quebec, Ottawa, Hamilton, Windsor, including the other Border Cities, and Winnipeg advanced, while the tendency was unfavourable in Montreal, Toronto and Vancouver. Montreal showed the first decline in employment so far recorded in 1927; construction and trade registered decided improvement, but manufacturing and transportation released workers. In Quebec, further but smaller gains were noted, principally in manufacturing and transportation. In Toronto, manufacturing, especially of electrical goods, showed seasonal dullness, while transportation and construction recorded heightened activity. In Ottawa, the largest gains were in lumber mills, although construction was also busier. In Hamilton, manufacturing registered decided improvement, and construction also afforded more employment. In Windsor and the Other Border Cities, partial recovery from the losses noted in the preceding month was made, automobile works and construction registering larger working forces. In Winnipeg, there were general increases in manufactures, construction and trade. In Vancouver, manufacturing and transportation reported curtailment of operations, while construction was more active.

Further moderate gains were made in manufactures, chiefly in fruit and vegetable canning, lumber, tobacco, distilled and malt liquor, pulp and paper, building material and electric current plants, while fish-preserving, electrical appliance, iron and steel and non-ferrous metal factories recorded reductions. Logging continued to show seasonal dullness, and transportation was also slacker. On the other hand, mining, communications, construction and maintenance, services and trade reported continued advances.

An article elsewhere in this issue gives in some detail the employment situation as at the beginning of August.

Trade Union Reports

Unemployment among local trade unions at the close of July was in practically the same volume as in the previous month, according to the returns tabulated from 1,569 labour organizations with 167,648 members, 5,466 of whom, or a percentage of 3.3, were without work at the end of July, as compared with 3.2 per cent in June. The situation was slightly less favourable than in July last year, when 2.3 per cent of the members were idle. Nova Scotia, Ontario, Manitoba and Alberta unions reported slightly improved conditions as compared with June and Quebec, Saskatchewan and British Columbia small declines in employment. In New Brunswick there was no change in the percentage of idle members. When making a comparison with the returns for July last year, the trend of employment in Nova Scotia and Alberta was upward during the period under review. British Columbia reported the same percentage of unemployment, and in the remaining provinces there were moderate contractions.

An article elsewhere in this issue gives in more detail a summary of unemployment as reported by local trade unions at the close of July.

EMPLOYMENT OFFICE REPORTS.

During the month of July, 1927, the offices of the Employment Service of Canada made 30,854 references to positions and effected a total of 29,521 placements. Of these the placements in regular employment were 21,403, of which 17,554 were of men and 3,849 of women. The placements in casual work numbered 8,118. The offices of the Employment Service were notified of 31,955 vacancies, of which 23,398 were for men and 8,557 for women. Applications for work were registered from 28,668 men and 10,016 women, a total of 38,684. A slight decrease is shown in the volume of business transacted when the above figures are compared with those of the preceding month and also with the records of July a year ago, the reports for June, 1927, showing 33,540 vacancies offered, 42,462 applications made and 31,266 placements effected, while in July 1926 there were reported 37,851 opportunities for employment, 42,763 applications for work and 33,970 placements in regular and casual employment. A report in detail of the work of the offices for the month of July, 1927, may be found elsewhere in this issue.

PRODUCTION IN CERTAIN INDUSTRIES.

Some figures indicating the recent movement of trade and industry are given in the table on page 934.

The Dominion Bureau of Statistics reported that, compared with the high level attained during preceding months, the volume of Canadian business showed moderate recession in July. Most of the important statistical series indicating the trend of industrial activity were lower in July, even after correction was made for seasonal tendencies. The index of the physical volume of business maintained in the Dominion Bureau of Statistics was 139.3 in July compared with 150.8 in the preceding month. Greater activity was shown in the mining industry while the placing of a large contract gave the building industry an appearance of a large volume. Merchandise imports showed an increase after adjustment for the change in the price level. Employment in wholesale and retail trade indicated a good distribution of commodities, although car loadings showed recession. The chief declines were shown in manufacturing, in forestry and in bank debits placed on a physical volume basis by the elimination of the price factor.

A weighted index of the physical volume of sixteen commodities, intended to indicate the trend of activity in the manufacturing plants of the Dominion was 141.6 in July, according to a preliminary estimate, compared with 159.4 in the preceding month. The index in July was lower than in any other month of the present year, being slightly below the level of January and February and 13 per cent less than the average from March to June. As adjustment is made for seasonal variation in the preparation of the index, the decline in July was irrespective of the usual summer dullness. The imports of crude rubber showed an important increase, amounting to 4,710,000 pounds, compared with 3,478,000 pounds in the same month last year. Slight increases were also shown in the inspected slaughtering of cattle, while the imports of wool were slightly in excess of the preceding month, but this factor is at a comparatively low level. The decline in the output of automobiles was due to special conditions in the industry, but the decline in the primary iron and steel industry was unmistakable. The decline in newsprint production was also pronounced and the imports of raw cotton declined, though in good volume. The production of pig iron during July, 1927, amounted to 50,997 long tons. This output was 17 per cent less than the 69,437 tons made in the previous month, and 14 per cent under the 67,232 tons reported for July a year ago.

The output of coal from Canadian mines during June increased 11 per cent from the production for the preceding month, but it was 44 per cent greater than the average for June in the past five years. The figures were 1,443,085 tons in June as against 1,305,359 tons in May and an average of 1,002,195 tons during the five preceding years.

Of the coal-producing provinces Nova Scotia, Alberta and British Columbia showed increases in production as compared with the preceding month and as compared with the average for the same month in the five preceding years.

Men employed in the coal mines of Canada during June numbered 25,717, of whom 19,739 worked underground and 5,978 on surface, as compared with a total of 25,549 in May, of whom 19,579 worked underground and 5,970 on surface. Production per man was 56.1 tons in June as against 51.0 tons in May. During June the production per man per day was 2.4 tons, which was the same as in May. The tonnage lost was largely due to "lack of orders."

BUILDING PERMITS AND CONTRACTS AWARDED

According to a report prepared by the Dominion Bureau of Statistics, the value of the building permits issued by the municipal authorities in sixty-three cities in Canada during the month of July, 1927,

amounted to $16,511,011, as compared with $18,399,858 in the preceding month, and $18,683,415 in July, 1926.

The *McLean Building Review* estimates the total value of the construction contracts awarded in Canada in August, 1927, at $29,881,000. Of this amount $10,220,800 was for residential buildings; $9,530,400 for business buildings; $7,542,200 for engineering construction, and $2,587,600 for industrial construction. The apportionment of contracts awarded by provinces during August, 1927, was: Ontario, $11,944,500; Quebec, $9,677,900; British Columbia, $3,730,100; Prairie Provinces $3,690,100, and the Maritime Provinces, $838,400.

The "contemplated new construction" in Canada during August, 1927, according to the same *Review*, totalled $34,990,000, $10,888,500 of this amount being for residential buildings; $8,657,700 for business buildings; $8,550,100 for industrial buildings, and $6,893,700 for engineering construction (including bridges, dams and wharves, sewers, watermains, roads streets and general engineering).

The total value of construction contracts awarded in the Dominion during the January-August period, 1927, was $272,086,000, and was classified as business buildings, $93,923,600; residential construction, $81,027,700; public works and utilities, $66,847,000, and industrial work, $30,287,700. The distribution by provinces during the same period was: Ontario, $120,650,400; Quebec, $87,016,300; the Prairie Provinces, $37,187,600; British Columbia $20,545,900 and the Maritime Provinces, $6,685,800.

EXTERNAL TRADE

A summary of Canadian trade prepared by the Department of National Revenue shows that in July, 1927, the merchandise entered for consumption amounted to $91,368,667, as compared with $101,029,386 in June, and $88,604,911 in July, 1926. The domestic merchandise exported amounted to $79,395,041 in July, 1927, as compared with $105,678,453 in June, 1927, and $110,325,650 in July, 1926.

The chief imports in July, 1927, were: iron and its products, $21,419,165; fibres, textiles and textile products, $14,425,276, and non-metallic minerals and products, $13,222,424.

The chief exports in the same month were in the group of wood, wood products and paper, $24,865,331; agricultural and vegetable products, mainly foods, $16,329,564, and animals and animal products, $14,286,015.

In the four months ending July, exports of agricultural and vegetable products, mainly foods were valued at $140,742,767; wood, wood products and paper, $92,171,586, and animals and animal products, $44,132,669.

Strikes and Lockouts

The time loss due to industrial disputes in August, 1927, was greater than during July, 1927, but less than during August, 1926. There were in existence during the month thirteen disputes, involving 4,894 workpeople, and resulting in a time loss of 13,339 working days, as compared with thirteen disputes in July, involving 1,923 workpeople, and resulting in a time loss of 8,803 working days. In August, 1926, there were on record fourteen strikes, involving 4,326 workpeople and resulting in a time loss of 34,800 working days. Two of the strikes and lockouts commencing prior to August terminated during the month and the three strikes and lockouts reported as commencing during the month also terminated during August. At the end of August, therefore, there were on record eight strikes and lockouts, affecting 282 workpeople, not including those strikes and lockouts in which employment conditions were reported to be no longer affected but which had not been formally called off.

Prices

The cost per week of a list of twenty-nine staple foods for an average family of five, in terms of the average retail prices in some sixty cities, was $10.93 at the beginning of August, as compared with $10.92 for July; $11.10 for August, 1926; $10.84 for August, 1925; $10.19 for August, 1924; $10.53 for August, 1923; $10.44 for August, 1922; $11.44 for August, 1921; $16.42 for August, 1920; $16.92 for June, 1920 (the peak); $13.41 for August, 1918; and $7.68 for August, 1914. Seasonal increases occurred in the prices of eggs, butter and cheese. The prices of rolled oats, veal and tea were also higher, while declines occurred in the prices of beef, mutton, fresh and salt pork, bacon, rice, beans, prunes, sugar and potatoes. Including the cost of fuel and rent with that of foods the total budget averaged $21.11 at the beginning of August, as compared with $21.10 for July; $21.32 for August, 1926; $21.05 for August, 1925; $20.57 for August, 1924; $21.03 for August, 1923; $20.88 for August, 1922; $21.98 for August, 1921; $26.60 for August, 1920; $26.92 for July, 1920 (the peak); $21.20 for August, 1918; and $14.41 for August, 1914. Fuel and rent were practically unchanged.

In wholesale prices the index number calculated by the Dominion Bureau of Statistics was slightly higher at 152.3 for August, as

compared with 152.0 for July; 154.0 for August, 1926; 158.9 for August, 1925; 156.8 for August, 1924; 153.5 for August, 1923; 151.7 for August, 1922; 165.5 for Augst, 1921; 250.2 for August, 1920; 256.7 for May, 1920 (the peak); and 202.8 for August, 1918. In the classification according to chief component materials five of the eight main groups advanced, while three declined. The Vegetables and their Products group was substantially lower, advances in the prices of corn, oats, flax, shorts, tea and rubber being more than offset by lower prices for wheat, barley, rye, flour, potatoes and sugar. The Iron and Its Products group was lower, due mainly to a decline in the price of pig iron. The Non-Metallic Minerals and their Products group also declined, due to lower prices for brick. The groups which advanced were: the Animals and their Products group, because of advances in the prices of eggs, butter, cheese and hogs, which more than offset declines in the prices of cattle, hides and fresh meats; the Fibres, Textiles and Textile Products group, because of higher prices for raw cotton, cotton products, flax, jute and hessian; the Wood, Wood Products and Paper group, due chiefly to advances in the prices of some lines of lumber; the Non-Ferrous Metals group, due to higher prices for copper, lead and brass, which more than offset declines in the prices of silver and antimony; and the Chemicals and Allied Products group.

Over-Production in the Coal Industry in Europe

The prevailing situation in the British coalfields has been painted in dark colours by several labour members in the British House of Commons, who severely criticised the Government for its inaction. The Secretary of the Mines Department in his reply to the debate stated that the main cause of the trouble was over-production of coal throughout the world. As a result of the British strike, he said, seven months' supplies of British coal were excluded from the markets of the world, with the consequence that people adopted substitutes and other countries got an opportunity to increase their production. In spite of all that, there had been a wonderful recovery of British export trade, as owing to the lower cost of production, British pits had been better able to enter into competition abroad.

The *Manchester Guardian Commercial* of July 17 observes that this all-round over-production and war of price-cutting cannot be contemplated with any satisfaction; that it points logically to some form of international agreement, and to a realization that energies should be bent on making a more efficient industry, even if on a contracted scale; and that wasteful international competition, causing fiscal retaliations, is not good business.

The *Berliner Tageblatt* of June 11 discussed the international coal situation as follows: "The reappearance of the British coal crisis is a sign that the world coal crisis still prevails and is beginning once more to become acute now that the beneficial effects of Great Britain's six months' deficiency are at an end. The world's over-production of coal is increasing. And the struggle of the different countries to maintain or to extend their share in the total production is being increasingly felt from month to month. Competition on the export markets is growing. And as in many cases this competition can only exist with the help of dumping prices, the desire is growing everywhere that the home markets should be shut off from the export markets and that the former should be utilised, by a maintenance of prices, to compensate for the lack of profits in the latter. The efforts of the Ruhr coal industry to secure preferential tariffs for the North Sea districts, in which English coal predominates, is an example of this tendency. Another is the new French Decree prescribing a system of State licences for imported coal."

Mr. W. T. Layton, editor of the *Economist*, in a recent article in the *Manchester Guardian*, commented on the statement that owing to industrial disputes 300 million working days had been lost in Great Britain during the years 1910-1925. "The total of the sixteen years," he wrote, "is of course colossal, but if we would keep a sense of proportion it is well to remember that it is only about one day per year per worker, whereas the time lost per head through sickness and disablement is five or six days per head, while idleness due to unemployment amounts to a still larger figure."

On July 1 the British Columbia Electric Railway Company gave effect to two "plans" for the benefit of employees of five years standing. Under the first plan the company agrees to advance loans for home building at low rates of interest, repayment to be made monthly or semi-monthly. The second plan provides for death benefits covering each employee to the extent of $1,000, payable to the beneficiary if the employee dies while still in the company's service. Nearly 3,300 men and women will benefit by these arrangements.

PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907, DURING THE MONTH OF AUGUST, 1927

DURING the month of August three applications for the establishment of Boards of Conciliation and Investigation under the terms of the Industrial Disputes Investigation Act, 1907, were received in the Department of Labour as follows:—

(1) From certain employees of the Corporation of the City of Vancouver, being fire fighters, members of City Fire Fighters' Union No. 18, International Association of Fire Fighters. Approximately 200 employees were stated to be directly affected by the dispute, which grew out of the employees' request for increased wages. The industry in question not being one to which the Industrial Disputes Investigation Act primarily applies, a Board could be established only upon the consent of the employer as well as the employees. At the close of the month the Department had not been as yet informed if joint consent was forthcoming in this case.

(2) From certain employees of the Dominion Power and Transmission Company, Limited, being linemen, high tension trouble men, groundmen, shopmen, armature winders, machinists, wiremen and helpers, etc., members of the Canadian Electrical Trades Union, Hamilton branch. The dispute related to wages and working conditions, 60 employees being directly affected and 300 indirectly. A Board was established, Messrs. Colin G. Snider, K.C., and John L. Counsell, K.C., of Hamilton, Ont., being appointed Board members on the recommendation of the employing company and employees, respectively. The Board had not been completed at the close of the month.

(3) From the British Columbia Electric Railway Company and certain of its employees, being members of Divisions Nos. 101, 109 and 134, Amalgamated Association of Street and Electric Railway Employees of America. The application in this instance was made jointly by the employer and employees. The dispute related to wages and working conditions, and the number of employees directly affected was given as 1,700. A Board was established, Messrs. A. G. McCandless and Percy R. Bengough, of Vancouver, B.C., being appointed Board members on the recommendation of the employing company and employees, respectively. The chairman had not been appointed at the end of the month.

SUMMARY OF PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907

THE tables presented below summarize the proceedings under the Industrial Disputes Investigation Act, 1907, for the fiscal year ending March 31, 1927, and from March 22, 1907, to March 31, 1927.

I. TABLE SHOWING PROCEEDINGS BY INDUSTRIES FROM APRIL 1, 1926, TO MARCH 31, 1927.

Industries affected	Number of applications for Boards received	Number of Boards established	Number of strikes not averted or ended
I. Disputes affecting mines, transportation and communication and other public utilities—			
(1) Mines—Coal	1	0	0
(2) Transportation and communication—			
(a) Steam railways	5	5	0
(b) Street and electric railways	2	2	0
(c) Express	1	1	0
(d) Shipping	2	2	0
(e) Telegraphs	2	0	0
(f) Telephones	1	0	0
II. Disputes not falling clearly within the direct scope of the Act	5	1	0
Total	19	11	0

II. TABLE SHOWING PROCEEDINGS BY INDUSTRIES FROM MARCH 22, 1907, TO MARCH 31, 1927.

Industries affected	Number of applications for Boards received	Number of strikes not averted or ended
I. Disputes affecting mines, transportation and communication, other public utilities and war work—		
(1) Mines—		
(a) Coal	72	10
(b) Metal	20	5
(c) Asbestos	1	0
(2) Transportation and communication—		
(a) Steam railways	198	7
(b) Street and electric railways	108	7
(c) Express	12	1
(d) Shipping	34	0
(e) Telegraphs	23	1
(f) Telephones	8	0
(3) Miscellaneous—		
(a) Light and power	24	3
(b) Elevators	1	0
(4) War work	30	1
II. Disputes not falling clearly within the direct scope of the Act	130	2
Total	661	37

On March 31, 1927, results were still pending in connection with four applications concerning disputes between (1) the Shipping Federation of Canada and the Canadian Pacific Steamships, Limited, and certain of their employees, being checkers and coopers, members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees; (2) the Inverness Railway and Coal Company and certain of its miners; (3) the Canadian National Railways and certain of its employees, being clerks, freight handlers, warehousemen, passenger station employees, stores employees, stationary engineers, stationary firemen, classified and unclassified labourers in and around shops and warehouses, etc., as represented by the Canadian Brotherhood of Railroad Employees; (4) the British Columbia Telephone Company and certain of its employees, being members of Locals 230 and 310, International Brotherhood of Electrical Workers.

STRIKES AND LOCKOUTS IN CANADA DURING AUGUST, 1927

THE number of strikes and lockouts in existence during August was thirteen, the same number as in the preceding month. The time loss for the month was less than during August, 1926, being 13,339 working days, as compared with 34,800 working days during the same month last year.

Date	Number of disputes	Number of employees involved	Time loss in working days
Aug. 1927	13	4,894	13,339
July 1927	13	1,923	8,803
Aug. 1926	14	4,326	34,800

The record of the Department includes lockouts as well as strikes, but a lockout, or an industrial condition which is undoubtedly a lockout, is rarely encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout, included as such in the records of the Department, is a cessation of work involving six or more employees at its commencement and lasting at least one working day. Disputes of less than one day's duration, and disputes involving less than six employees, are included in the published record only when ten days' or more time loss is caused, but a separate record of such disputes is maintained in the Department, and the figures are given in the annual review.

The figures printed are inclusive of all disputes which come to the knowledge of the Department, and the methods taken to secure information practically preclude probability of omissions of a serious nature. Information as to a dispute involving a small number of employees, or for a short period of time, is frequently not received until some time after its commencement.

Ten disputes, involving 299 workpeople, were carried over from July, and three disputes commenced during August. Two of the strikes and lockouts commencing prior to August terminated during the month, and the three strikes and lockouts commencing during August, also terminated during the month. At the end of August, therefore, there were on record eight strikes and lockouts, as follows; bakers, Montreal, P.Q.; ladies' clothing factory workers, Toronto, Ont.; men's clothing factory workers, Montreal, P.Q.; electrotypers, Toronto, Ont.; blacksmiths, Saskatoon, Sask.; stonecutters, Montreal, P.Q.; lathers, Montreal, P.Q.; and electrical workers, Vancouver, B.C.

The record does not include minor disputes such as are described in a previous paragraph, nor does it include disputes as to which information has been received indicating that employment conditions are no longer affected, although the unions or organizations concerned have not yet declared them terminated. Information is available as to four such disputes, namely, cigarmakers at Montreal, March 24, 1925; men's clothing factory workers, Montreal, P.Q., July 28, 1926; fur workers at Winnipeg, Man., September 25, 1926; and plumbers at Windsor, Ont., April 5, 1927. The dispute involving moulders at Galt, Ont., which had been in existence since August 2, 1922, was called off by the union on August 18, 1927, no settlement having been reached.

Information regarding a cessation of work at Reserve, N.S., from July 25 to July 29, was received in the Department too late to be included in the August issue of the LABOUR GAZETTE. This dispute involved approximately 1,200 men for three days, when coal miners employed in three collieries were on strike as a result of the suspension of two of their number who objected to a change in their working positions. The employer refused to reinstate the men in question and by July 29 the strikers had all returned to work.

A dispute of coal miners at Aberdeen, N.S., commencing about August 30, 1927, has been reported to the Department, but no particulars have as yet been received.

Of the disputes which commenced during the month one was against the discharge of employees, one for increase in wages, and one was a protest against the impending execution of two workmen in Massachusetts, U.S.A. Of the five strikes which terminated during the month two were in favour of the employers, two were partially successful and one is recorded as indefinite.

The following paragraphs give particulars in regard to certain disputes, in addition to information given in the tabular statement.

LADIES' CLOTHING FACTORY WORKERS, TORONTO, ONT.—In connection with this dispute, an alleged lockout from June 30, 1926, it has been reported that the pickets have been withdrawn from the establishment concerned,

STRIKES AND LOCKOUTS DURING AUGUST, 1927

Industry, occupation and locality	Number of employees involved	Time loss in working days	Remarks
(a) Strikes and Lockouts occurring prior to August, 1927.			
MANUFACTURING—			
Vegetable Foods—			
Bakers, Montreal, P.Q.....	54	1,404	Commenced May 1, 1927, for increase in wages. Unterminated.
Clothing (including knitted goods)—			
*Ladies' clothing factory workers, Toronto, Ont.....	4	104	Alleged lockout, commenced June 30, 1926; enforcement of non-union conditions. Unterminated.
Cap makers, Toronto, Ont....	3	78	Commenced August 27, 1926, for employment of union members only. Lapsed August, 1927, in favour of employers.
Men's clothing factory workers, Montreal, Que.....	42	1,092	Commenced June 4, 1927, against change to piecerate system and to maintain union conditions. Unterminated.
Printing & Publishing—			
Electrotypers, Toronto, Ont..	3	78	Commenced December 20, 1926, against discharge of employees for union activity. Unterminated.
Iron, Steel and Products—			
Blacksmiths, etc., Saskatoon, Sask.....	4	104	Commenced May 17, 1927, for increase in wages and recognition of union. Unterminated.
Non-Metallic Mineral Products—			
Stonecutters, Montreal, P.Q...	80	2,080	Commenced June 10, 1927, for increase in wages. Unterminated.
CONSTRUCTION—			
Buildings and Structures—			
Lathers, Montreal, P.Q.....	50	1,300	Commenced June 6, 1927, for increase in wages. Unterminated.
Painters, Toronto, Ont.....	14	84	Commenced June 6, 1927, for increase in wages. Terminated August 6, 1927. Partially successful.
Electrical workers, Vancouver, B.C.....	45	1,170	Commenced July 14, 1927, for increase in wages and shorter hours. Unterminated.
(b) Strikes and Lockouts commencing during August, 1927.			
MINING, NON-FERROUS SMELTING AND QUARRYING—			
Coal miners, Springhill, N.S..	250	250	Commenced Aug. 16, 1927, against discharge of employees. Terminated August 17, 1927, in favour of employers.
Coal miners, Glace Bay District, N.S.....	3,845	3,845	Commenced Aug. 22, 1927; protest against execution of two workmen in U.S.A. Terminated August 23, 1927. Indefinite.
CONSTRUCTION—			
Buildings and Structures—			
Plumbers, Toronto, Ont.....	500	1,750	Commenced Aug. 24, 1927, for increase in wages. Terminated Aug. 27, 1927, Partially successful.

*Reports indicate that the strikers have been replaced but there are still a number of employees out and on the strike benefit list of the union.

but that the union has not called off the dispute pending the result of legal proceedings instituted by the union against the employer for breach of contract in violating the agreement, and some workers remain on the strike benefit list.

CAP MAKERS, TORONTO, ONT.—In this dispute, beginning in August, 1926, the union demanded an agreement providing for the employment of union members only. The dispute appears to have lapsed during August, 1927, the employer having replaced the strikers some time ago and the strikers on the benefit list of the union having gradually secured work elsewhere.

ELECTROTYPERS, TORONTO, ONT.—Some of the employees involved in this dispute, which commenced on December 20, 1926, had secured work elsewhere temporarily, but in August they were again on the strike benefit list of the union.

PAINTERS, TORONTO, ONT.—As reported in the August issue of the LABOUR GAZETTE, agreements were signed by the union and certain of the employers involved, providing for an increase in wages from 75 cents per hour to 85 cents, the union having demanded 90 cents per hour before the strike. On August 6 the union called off the strike. It has been reported that a large number of painters have been working for 75 cents per hour and some of the employers who had signed the agreement had notified the union that they were cancelling it.

COAL MINERS, SPRINGHILL, N.S.—A cessation of work occurred at Springhill, N.S., involving 250 men, who stopped work in sympathy with two miners suspended for loading dirty coal. A committee of the employees negotiated with the management and the men returned to work with the understanding that the case would be investigated. Some days afterwards the two employees suspended were permitted to return to work, having given assurance that they would in future send up clean coal only.

COAL MINERS, GLACE BAY DISTRICT, N.S.—Coal miners in a number of mines in this district ceased work on August 22 for one day as a protest against the impending execution of Sacco and Vanzetti, two workmen in the State of Massachusetts who were convicted of murder several years ago. It was stated that the stoppage occurred without union sanction. Representations in favour of a new trial had been made by various organizations and persons throughout the world, including a number of labour organizations and in several localities throughout the world workmen ceased work for one day in protest against the execution.

PLUMBERS, TORONTO, ONT.—Union plumbers at Toronto employed by about three hundred firms ceased work on August 24, 1927, a demand for an increase in wages from $1 per hour to $1.15 having been refused in negotiations for a new agreement. On August 29 an agreement was reached providing for the maintenance of the $1 rate until May 1, 1928, and an increase on that date to $1.12½ per hour.

STRIKES AND LOCKOUTS IN GREAT BRITAIN AND OTHER COUNTRIES

THE latest available information as to strikes and lockouts in various countries is given in the LABOUR GAZETTE from month to month, bringing down to date that given in the issue for February, 1927, as an addendum to the review of strikes and lockouts in Canada during 1926. The latter review included a table summarizing principal statistics as to strikes and lockouts since 1918 in the several countries for which such figures were available. Many countries publish these statistics only once each year, the figures being issued in some cases after an interval of as much as two years, so that for such countries the latest figures are not for relatively recent dates.

Great Britain and Northern Ireland

The number of new disputes beginning in July was 22, involving (directly and indirectly) approximately 18,000 workpeople. In addition, 13 disputes involving about 7,000 workpeople which began before July were still in progress at the beginning of the month, so that there were 35 disputes involving about 25,000 workpeople in progress during the month. The time lost for all disputes was approximately 104,000 working days.

Of the 22 disputes beginning in the month, 7 were against reductions in wages, 6 arose on other wages questions, 5 on questions re-

specting the employment of particular classes or persons and 4 on other questions. Settlements were reached in the case of 22 disputes, 4 in favour of workpeople, 6 in favour of employers and 12 ended in compromises.

The strike of 2,000 coal miners which began in May, when the miners refused to work one shift on Saturday rather than 2 shifts on alternate Saturdays, and which dispute involved stoppages of work on Saturdays only, had not been settled at the end of July.

A strike of rivetters etc., employed in shipyards on the Clyde took place in June for an increase in piece rates. Work was resumed after three days but a claim was made for an increase of 25 per cent in piece-work rates. The employers refused the advance and about 3,000 rivetters again went out on strike on July 26 to enforce the demand. On August 3, work was resumed by instruction of the trade union in order that negotiations might be re-opened.

A general lockout involving 5,000 slipper operatives at Rossendale followed repeated threats of strikes for increases in wages at various firms and one actual strike for reinstatement of suspended employee. The lockout began July 20, and no settlement had been reached at the end of July.

New Zealand

During the first six months of 1927, there were 21 industrial disturbances involving 23 firms and 2,134 workers. The approximate loss in wages was £6,169.

United States

During June, according to preliminary figures, 67 disputes began in the United States, of which 52 involved 13,917 employees, making the average number of employees per dispute, 310. For May, revised figures are 114 disputes beginning during the month, of which 93 involved 20,621 employees. Of the 67 disputes beginning in June, 17 were in building trades, 11 in the textile industry, 9 in the clothing industry and the others in various other industries.

Bituminous Coal Miners' Dispute.—During the first week of August, the Governor of Ohio attempted to reconvene the Central Competitive Field joint conference, but was unsuccessful. The union expressed their willingness to attend, but the operators refused. Later in the month, several disturbances and riots occurred in Eastern Ohio, following attempts to open non-union mines. Several arrests were made, and a court order was granted restraining union officers and members from interfering with the operation of the mines. In Central Pennsylvania a number of leading operators opened their mines on a non-union basis. In Indiana several small mines opened on union terms while other operators in this state and in Illinois, on the ground of continued poor market conditions, maintained their attitude that the reduced wage was necessary to meet competition. There was no change in the situation in the Southwest field.

Building Trades' Disputes.—During June, there were several important disputes in the building trades. A strike of bricklayers in Pittsburg, Pennsylvania, took place for an increase in wages from $1.62 to $1.70 an hour with a 5-day instead of a 5½-day week. A compromise was reached by which the increase in wages was granted with a continuance of the 5½-day week. In Providence and vicinity, Rhode Island, 1,200 carpenters went on strike for an increase in wages from $1.10 to $1.25 per hour. During July a settlement was reached in Providence only, an increase to $1.71½ being granted by employers. About 2,000 labourers and hod carriers also went out on strike at the same time as the bricklayers for an increase from 65 to 75 cents per hour, but no settlement of this dispute had been made at the end of June.

Belgium

During June, 12 strikes and 2 lockouts began, and 19 strikes which began before June were still in progress at the beginning of the month, making a total of 33 disputes in progress during the month. The number of workpeople involved was 13,290 and the time loss 261,395 working days. Of the 14 disputes beginning in the month, 7 were over wages questions and the others over various other questions. Settlements were reached in the cases of 18 disputes, 5 in favour of workpeople, 10 in favour of employers and 3 ended in compromises.

Czecho-Slovakia

The following table gives revised figures as to strikes and lockouts for the years 1921 to 1924 and preliminary figures for 1925 and 1926:

Year	Number of Disputes	Workpeople directly and indirectly affected	Time loss in working days
1921	453	222,718	2,251,732
1922	288	331,229	3,975,098
1923	248	209,179	4,713,790
1924	334	98,117	1,361,775
1925	294	166,727	1,482,857
1926	150	37,267	464,383

Finland

During June, 25 disputes were in progress, involving 103 workpeople and causing a time loss of 13,189 working days.

During July, 24 disputes were in progress involving 114 workpeople and causing a time loss of 12,328 working days.

Germany

The number of strikes and lockouts ending in the year 1926 was 365 affecting 2,872 establishments. The number of workpeople involved was 91,205 directly and 5,304 indirectly and the time loss 1,404,875 working days. Disputes are classified by causes as follows: 315 over wages questions, 26 over questions as to hours of work and 117 for other causes. Where two or more causes may be assigned to any one dispute, the dispute is classified under each heading. The results of the disputes were as follows: in the case of 81 disputes involving 6,529 workpeople, the workpeople were successful; in the case of 158 disputes involving 71,362, the workpeople were partially successful; in the case of 126 disputes involving 13,314, the workpeople were unsuccessful.

Netherlands

In the year 1926, 212 disputes began involving 9,100 workpeople and 594 establishments. The number of working days lost in all disputes in progress during the year was 281,300.

During May, 1927, 26 disputes began involving 598 workpeople.

During June, 1927, 9 disputes began involving 637 workpeople.

Poland

In the year 1926, there were 583 strikes affecting 2,681 establishments and 143,581 workers and resulting in a time loss of 1,382,133 working days. Classified by causes, 488 strikes involving 108,820 strikers arose out of questions of wages, 36 strikes involving 14,142 concerning hours and conditions of work, 8 involving 1,483, concerning recognition of unions, 44 involving 8,759 against discharge of employees, 5 involving 10,344 were political or sympathetic strikes and 2 involving 33 strikers were owing to other causes. The results were as follows: 395 strikes involving 83,998 strikers ended in complete or partial success to the strikers, 175 strikes involving 48,175 were unsuccessful and in the cases of 13 strikes involving 11,408 strikers, the results were unknown.

TRADE DISPUTES AND TRADE UNIONS ACT OF GREAT BRITAIN

THE provisions of the Trade Disputes and Trade Unions bill as introduced in the British House of Commons on April 4, were outlined in the LABOUR GAZETTE, May, 1927 (page 523). Many important changes were made in the bill during its passage through Parliament, and the Act received the Royal Assent on July 29. The following summary of the Act, as finally passed, is taken from the *Ministry of Labour Gazette* for August, 1927.

Strikes and Lockouts

Section 1 declares a strike illegal if it

(i) has any object other than or in addition to the furtherance of a trade dispute within the trade or industry in which the strikers are engaged; and

(ii) is a strike designed or calculated to coerce the Government either directly or by inflicting hardship upon the community.

An illegal lockout is defined in exactly similar terms; and it is declared illegal to commence, or continue, or to apply any sums in furtherance or in support of, any such illegal strike or lockout.

A trade dispute is not to be deemed to be within a trade or industry unless it is a dispute between employers and workmen, or between workmen and workmen, in that trade or industry which is connected with the employment or non-employment, or the terms of the employment, or with the conditions of labour, of persons in that trade or industry. Without prejudice to the generality of the expression "trade or industry," workmen are to be deemed to be within the same trade or industry if their wages or conditions of employment are determined in accordance with the conclusions of the same Joint Industrial Council, Conciliation Board, or other similar body, or in accordance with agreements made with the same employer or group of employers.

Penalties are provided against any person who declares or instigates an illegal strike or lockout, or incites others to take part in or otherwise acts in furtherance of such a strike or lockout; but it is provided that no person shall be deemed to have committed an offence under this section or at common law by reason only of his having ceased work or refused to continue to work or to accept employment. The provisions of the Trade Dis-

putes Act, 1906, and of the second proviso to Section 2 (i) of the Emergency Powers Act, 1920, are not to apply to any act done in contemplation or furtherance of an illegal strike or lockout; but no person is to be deemed to have committed an offence under any regulations made under the Emergency Powers Act, 1920, by reason only of his having ceased work or having refused to continue to work or to accept employment.

Section 2 provides that no person refusing to take part, or to continue to take part, in an illegal strike or lockout shall be subject to expulsion from any trade union or society, or to any fine or penalty, or to deprivation of any right or benefit to which he or his legal personal representatives would otherwise be entitled, or liable to be placed in any respect either directly or indirectly under any disability or at any disadvantage as compared with other members of the union or society. This section is made retrospective as respects any strike or lockout since the 1st May, 1926, which is declared illegal by the Act.

Picketing

Section 3 declares it to be unlawful for one or more persons (whether acting on their own behalf or on behalf of a trade union or of an individual employer or firm, and notwithstanding that they may be acting in contemplation or furtherance of a trade dispute) to attend at or near a house or place where a person resides or works or carries on business or happens to be, for the purpose of obtaining or communicating information or of persuading or inducing any person to work or to abstain from working, if they so attend in such numbers or otherwise in such manner as to be calculated to intimidate any person in that house or place, or to obstruct the approach thereto or egress therefrom or to lead to a breach of the peace. "To intimidate" is defined as meaning to cause in the mind of a person a reasonable apprehension of injury to him or to any member of his family or to any of his dependants or of violence or damage to any person or property; and the expression "injury" includes injury to a person in respect of his business, occupation, employment, or other source of income, and includes any actionable wrong. It is also declared unlawful for one or more persons, for the purpose of inducing any person to work or to abstain from working, to watch or beset a house or place where a person resides or the approach to such a house or place.

Political Funds

Section 4 provides that it shall not be lawful to require any member of a trade union to make any contribution to the political fund of a trade union unless he has given notice, in a prescribed form, of his willingness to contribute thereto. Contributions to the political fund must be made separately from any contributions to the other funds of the union.

Civil Servants

Section 5 prohibits established civil servants from being members, delegates, or representatives of any organization of which the primary object is to influence or affect the remuneration and conditions of employment of its members, unless the organization is an organization of which the membership is confined to persons employed by or under the Crown and is an organization which complies with such provisions as may be contained in the regulations for securing that it is in all respects independent of, and not affiliated to, any such organization as aforesaid the membership of which is not confined to persons employed by or under the Crown or any federation comprising such organizations, that its objects do not include political objects, and that it is not associated directly or indirectly with any political party or organization.

Employment Disabilities

Section 6 makes it unlawful for any local or other public authority to make it a condition of the employment or continuance in employment of any person that he shall or shall not be a member of a trade union, or to impose any condition upon persons employed by the authority whereby employees who are or are not members of a trade union are liable to be placed in any respect either directly or indirectly under any disability or disadvantage as compared with other employees. It is also made unlawful to make membership or non-membership of a trade union a condition of any contract with a local or other public authority. Another subsection of this section provides penalties against any person employed by a local or other public authority who wilfully breaks a contract of service with that authority, knowing or having reasonable cause to believe that the probable consequence of his so doing, either alone or in combination with others, will be to cause injury or danger or grave inconvenience to the community.

Injunctions

Section 7 empowers the Attorney-General (in Scotland, the Lord Advocate) to apply for an injunction to restrain any application of the funds of a trade union in contravention of the Act.

Definitions

Section 8 defines a "strike," for the purposes of this Act, as meaning the cessation of work by a body of persons employed in any trade or industry acting in combination, or a concerted refusal, or a refusal under a common

understanding, of any number of persons who are, or have been, so employed, to continue to work or to accept employment. "Lockout" is defined as meaning the closing of a place of employment or the suspension of work, or the refusal by an employer to continue to employ any number of persons employed by him in consequence of a dispute, done with a view to compelling those persons, or to aid another employer in compelling persons employed by him, to accept terms or conditions of or affecting employment. A strike or lockout is not to be deemed to be calculated to coerce the Government unless such coercion ought reasonably to be expected as a consequence thereof.

LABOUR AND INDUSTRY IN BRITISH COLUMBIA IN 1926

THE ninth annual report of the Department of Labour of British Columbia contains full information concerning industrial, labour, and governmental activities in the province during the calendar year 1926. The Department was established under an act of 1917. It has authority to require the trade unions, industrial societies and other organizations to supply information as to their rules and practices; to require employers to furnish reports as to their employees, that is, their names, occupations, wages, hours of work, etc.; and to obtain from any available source information as to the cost of living, and the relations of prices to labour and industrial conditions in the province. The Department administers the employment service and Factories Act. The Deputy Minister of Labour is *ex officio* the chairman of the Board of Adjustment under the Hours of Work Act of 1923, providing for an 8-hour working day in the industries of the province excepting those industries expressly exempted by the Board.

Industrial Conditions

The year 1926 is described as one of considerable progress, the pay-roll of the province reaching a record total. During the year 4,521 industrial employers sent returns to the Department, and in addition to these returns the Department made a careful calculation of the pay-rolls of employers who failed to report. On this basis an estimate totalling $175,173,836, was made of the salaries and wages in connection with industrial operations in the province during 1926. This compares with $159,959,820 for 1925, and with $151,037,316 for 1924, the increase last year being nearly $15,000,000. Nearly all the leading industries shared in these increases, substantial gains being recorded in the lumbering, contracting, coast-shipping, food-products, metal-mining, pulp and paper, and the various other manufacturing industries. The principal falling off was in the coal-mining industry, owing to circumstances which were, at least in part, temporary, as was evidenced by improved conditions during the closing months of the year. The highest number of persons employed in industries generally was recorded in September and the lowest in January. The changes made in wage rates were mostly in an upward direction, and there was a slight increase in the general weekly average. The number of lower-paid wage-earners showed a considerable decrease.

The estimated pay-roll of the province in 1926 is divided by districts as follows: Greater Vancouver, $63,833,346. Rest of Mainland, $81,123,003; Vancouver Island, $30,217,486. The 4,521 returns received were divided into twenty-five groups. Twenty of these show an increase over their pay-roll for 1925, the increase amounting to $14,808,307. The remaining five groups show a decreased pay-roll, the decrease aggregating $1,330,846. There is, accordingly a net increase in the twenty-five groups of $13,477,360.

The building and contracting group, which showed such a marked advance in 1925 that many people doubted its ability to go any further ahead in 1926, made even greater strides in the latter year, the pay-roll of this industry going up $1,700,000. The Lower Mainland, the region centering in the City of Vancouver, obtained the chief benefit of this expansion, but improved records came also from most of the other districts of the province; substantial increases were also recorded in shipping, the manufacture of food products, printing, oil-refining and the metal trades group. The lumbering industry made the most notable expansion during that year, nearly three millions being added to the pay-roll.

Of the industries showing a decline during the year, the most conspicuous was coal-mining. The reduction of its pay-roll by over $600,000 is attributed partly to the severe competition of oil fuel in its various forms, and partly also to the extreme mildness of the winter 1925-26, necessitating less than the normal consumption of domestic coal. The explosives and chemicals groups and also the cigar and tobacco manufacturing industry show

a slight decrease. The wage payments of the various public utilities in the country show a reduction of nearly $100,000. This is explained by the fact that in 1925 the returns from some of the operations included considerable payments for extention work.

Generally speaking, the large industrial companies in the Coast region nearly all paid larger totals under the head of wages in 1926 than in 1925. A comparison of the pay-rolls in the various industries for the past three years is given in the following table:—

Industry	1924		1925		1926	
	No. of Firms reporting	Total Pay-roll	No. of Firms reporting	Total Pay-roll	No. of Firms reporting	Total Pay-roll
		$ cts.		$ cts.		$ cts.

Factory Inspection

The chief inspector of factories, in his report, remarks that "each succeeding year brings a noticeable improvement in the safety, sanitary, and lighting conditions of the factories coming under our jurisdiction." The efforts of the Department of Factory Inspection to lessen the accident rate has with very few exceptions met with voluntary recognition on the part of those to whom orders were issued respecting dangerous conditions. The report notes a decreased number of major accidents and commends the co-operation of owners, managers and workmen which made the decrease possible. The report embodies useful directories containing the names of employers and trade unions in the province as well as the names and addresses of officials of the various organizations.

The report notes a slight increase over 1925 in the number of Asiatic workers in the province. This increase was chiefly made up of Chinese, though Japanese, and particularly females of that country, figure prominently in the returns. The progressive decline in the number of Hindus which has been going on over a number of years is again in evidence. As in other years the largest share of provincial labour is supplied by native Canadians

and natives of Great Britain, who, together, represent more than two-thirds of the industrial workers.

The report outlines the "Hours of Work Act" of 1923 and the "Male Minimum Wage Act" of 1925 and records the effect of each on the industries to which they apply (pages 929 and 948). The absence of labour disputes of serious character was again a feature of the industrial life of the province. During the year, thirteen disputes, involving stoppage of work, effected 1,749 workmen and entailed a loss of 28,016 working days.

Employment Service

The report remarks on the continued usefulness of the Employment Service in the province as shown by the fact that 10 per cent more persons were placed in employment in 1926 than in the previous year. This equals the record of 1925. The Service is continuing the work of endeavouring to find employment for handicapped ex-service men for which purpose special sections were created in 1925 in Vancouver and Victoria.

BRITISH COLUMBIA "HOURS OF WORK ACT" IN 1926

THE second annual report of the Board of adjustment on the administration of the Hours of Work Act is contained in the Annual Report of the Department of Labour for British Columbia for 1926 (see page.... of this issue). The report states that already the Act has resulted in considerable shortening of the working day for employees who formerly worked an excessive number of hours. Proof of this statement is found in the details as to working hours which were collected by the Department from 4,521 employers of labour in 1926. These details are given fully in a table which is reproduced in abbreviated form below. In each industry comparison is made between 1924, the year before the Act became operative, and 1926. In 19 of the 25 groups of industries a reduction is shown in the average weekly working period. The groups not so affected either contain a considerable number of workers who do not come under the provisions of the Act, or else their normal working hours, both before and since the passing of the Act, have been less than 48 a week.

The effect of the "Hours of Work Act" has chiefly been felt in the lumbering group of industries which employ altogether something like 40,000 persons. In the logging branch the average hours have been reduced from 50.79 to 48.71, or a difference of 2.08 a week. Sawmills have witnessed an average reduction of working-time by 4.82 hours a week; shingle-mills, 7.12 hours; planing-mills, 5.10 hours; logging-railways, 1.95 hours; the branch embracing box-factories, sash and door plants, etc., 2.62 hours; mixed plants, 4.98 hours; and pulp and paper mills, 5.01 hours. In the lumbering group there are still some sections with an average slightly over forty-eight hours and this is explained by the permanent and temporary exemptions already referred to, but the figures given in the table below will show that, for the general body of workers, the Act has meant a real reduction in the hours of labour.

Apart from the lumbering industry there is an average reduction of 2.15 hours weekly in the contracting group, and of 4.41 hours in the allied group of industries for the provision of builders' materials. The other changes are less important, though, in reference to the increase of 3.49 hours weekly in

TABLE SHOWING CHANGES IN HOURS OF WORK IN VARIOUS INDUSTRIES, 1924 AND 1926

—	Average Weekly Working Hours	
	1924	1926
Breweries	49·04	47·91
Builders' material, etc	51·51	47·10
Cigar and tobacco manufacturing	44·26	44·46
Coal mining (1)	47·90	48·00
Coast shipping	56·76	53·29
Contracting	47·72	45·57
Explosives, chemicals, etc	52·44	51·49
Food products, manufacture of	53·67	51·82
Garment-making	45·12	44·81
House furnishings	46·01	45·14
Jewellery, manufacture of	43·65	43·96
Laundries, cleaning and dyeing	46·66	46·54
Leather and fur goods, manufacture of	47·88	47·26
Lumber industries.—In this group are included:—		
Logging	50·79	48·71
Logging—railways	52·01	48·06
Mixed plants	54·01	49·03
Lumber dealers	52·29	46·78
Planing mills	55·58	50·48
Sawmills	54·05	49·23
Shingle mills	55·44	48·32
Metal trades	44·36	45·81
Metal mining (2)	53·12	55·43
Miscellaneous trades and industries	48·79	47·67
Oil refining	47·97	51·46
Paint manufacturing	44·63	44·25
Printing and publishing	45·90	45·58
Pulp and paper manufacturing	53·24	48·23
Ship building	44·73	44·14
Smelting (3)	55·95	53·21
Street railways, gas, water, power, etc	46·12	45·83
Wood, manufacture of (not elsewhere specified)	48·90	46·28

(1) This group comes under the Coal Mines Regulation Act.
(2) This group comes under the Metalliferous Mines Act.
(3) Covered by the Labour Regulations Act.

the oil-refining group, it should be noted that this group includes the new fish-reduction plants where the operations are in the nature of things both seasonal and intermittent and in which it would not be possible to insist upon a strict interpretation of the Act.

The report states that 176 temporary exemptions were granted during the year, mentioning the most usual reasons for permitting overtime. These reasons include urgency of orders following the arrival of a ship for cargo; breakdowns; grain movements; approach of freeze-up; seasonal work; holiday rush, etc. Forty-two applications for permits of exemption were refused during the year.

The report contains the text of all the regulations so far issued under the Hours of Work Act. Certain adjustments of working hours are permitted in particular industries to meet special circumstances in each case. For example, bakers are allowed to work 10 hours per month in excess of 48 hours per week, and special rules are made to the requirements of work involving a periodical rush of business. The fishing industry and all its branches, including canning, is exempted from the eight-hour day provision.

MINIMUM WAGES FOR WOMEN IN BRITISH COLUMBIA

THE ninth report on Minimum Wages for female employees in British Columbia outlines the activities of the Board during the calendar year 1926. The Minimum Wage Act is among the acts administered by a board of three members one of whom is the Deputy Minister of Labour, the report of the board forming part of the Department's annual report of the year, which is reviewed elsewhere in this issue. Among the events of the year the report outlines the proceedings of the conference convened in Vancouver at the request of the employees of the fruit and vegetable industry, who filed a petition with the board. As a result of the deliberations of this conference the minimum wage for experienced female workers in the fruit and vegetable industry was increased during the year to $14.40 for a week of forty-eight hours, either on a time or piece-rate basis. For inexperienced workers a weekly wage of $11 for the first two months was recommended. In both cases "time and one-half" was allowed for overtime. This increase in the minimum wage affected 2,455 female employees in the fruit and vegetable industries.

The law provides that in cases where workers have been paid less than the established minimum wage they may institute a civil action to recover the difference between what they received and the minimum rate together with the costs of solicitor's fees fixed by the court. When cases of this kind come to light endeavours are made to effect amicable settlements. As a result of these endeavours the sum of $3,315 in arrears of wages was collected for underpaid employees. This amount was made up of sums ranging from 75 cents to $400, the latter figure representing the arrears due to a woman who had been deprived of a considerable amount each month for a number of months. The report outlines a number of cases brought before the court under the Minimum Wage Act, all resulting in the imposition of fines.

A summary of the Minimum Wage Orders now in force, in addition to that affecting the fruit and vegetable industry already set forth, is as follows:—

Mercantile industry, $12.75 (hourly rate, 26 4/16 cents).

Laundry, cleaning and dyeing industries, $13.50 (hourly rate, 28 1/8 cents).

Public housekeeping, $14 (hourly rate, 29 1/6 cents).

Office occupation, $15 (hourly rate, 31 1/4 cents).

Personal service occupation, $14.25 (hourly rate, 29 11/16 cents).

Fishing industry (Canneries), $15.50 (hourly rate, 37 7/24 cents).

Telephone and telegraph occupation, $15 (hourly rate, 31 1/4 cents).

Manufacturing industry, $14 (hourly rate, 29 1/16 cents).

The payroll returns required each year from employers were in 1926 sent in by 3,123 firms, against 2,804 for the previous year. With this increase of 319 reporting firms details of wages and working hours were submitted for 16,070 women and girl employees. This is an advance of 2,171 over the 1925 total which accounted for 13,899 persons.

From the actual figure supplied by employers the weekly average wage for the adult and skilled workers proved to be $17.05 representing a decrease of 33 cents over the year 1925. For the group of employees who had not completed their training the weekly average was $10.03 as opposed to $10.34 in the previous year.

The Minimum Wage Act permits an employer to have 35 per cent of his female staff classed as inexperienced employees. The re-

turns reveal that 14.59 per cent appear in this category. This figure represents an increase of two per cent over the corresponding figure for last year but the statutory allowance is stated to be amply adequate.

Marital Status.—The payroll returns for 1926 provided columns in which the employer recorded whether the employee was married, widowed, or single. In the fruit and vegetable industry the married women comprise a large proportion of the workers, due perhaps to the fact that the product they work in is very perishable and at the peak of the season all available help is pressed into service. In the laundry industry about 25 per cent of the women recorded are married. Public housekeeping has a percentage of about 28.5 married women in its ranks. In the fishing industry out of 26 reported, 16 are married or widowed. The telephone and telegraph occupation has the lowest percentage of married workers, namely, 4.7. In comparison with other occupations there are relatively few married women in office positions. Out of the 3,756 employees reported in clerical work only 432 are classified as married.

Length of Service.—In the office occupation over 25 per cent of the employees have been in their present positions five years and upwards and 220 employees have been engaged in the one place for 10 years or more. In the telephone and telegraph occupation over 18 per cent have been in the same position for five years or more. To qualify for positions in office or telephone work considerably more training is required than in the majority of other classes, and this would seem to have a bearing on the duration of employment. Owing to the fact that in the fruit and vegetable industry the season lasts less than a year in most plants, over one-half the workers are shown to have been employed less than 12 months. Of this number doubtless there are some who worked in the same establishment in former years but all employers do not take this into consideration when making returns. With a total of 7,509 remaining in their positions less than one year the employment problem is a vital one to employers.

The following tables give a statistical summary of all occupations covered by regulations of the Board, labour turnover in each group, etc.:—

SUMMARY OF ALL OCCUPATIONS

	1926	1925	1924	1923	1922
Number of firms reporting	3,123	2,804	2,287	2,195	2,135
Number of employees—					
Over 18 years, or experienced	13,725	12,181	10,355	9,612	8,989
Under 18 years, or inexperienced	2,345	1,718	1,242	1,251	1,242
Total weekly wages—					
Employees over 18 years, or experienced	$234,001.53	$211,713.38	$176,517.87	$164,712.57	$152,890.94
Employees under 18 years, or inexperienced	$23,513.50	$17,764.00	$12,644.50	$12.511.50	$12,546.50
Average weekly wages—					
Employees over 18 years, or experienced	$17.05	$17.38	$17.05	$17.14	$17.00
Employees under 18 years, or inexperienced	$10.03	$10.34	$10.18	$10.00	$10.10
Percentage of employees under 18 years, or inexperienced	14·59%	12·36%	10·71%	11·52%	12·14%
Average hours worked per week	43·82	43·58	43·09	43·31	43·28

MINIMUM WAGE FIXING MACHINERY

New Publicaton by International Labour Office

THE International Labour Office has recently issued a new edition of the valuable publication entitled "Minimum Wage-fixing Machinery", giving additional information as to the legislation of certain countries on this subject. (The first edition was reviewed in the Labour Gazette for April, 1927, page 420.)

"Minimum wage fixing machinery in trades in which organization of employers and workers is defective and where wages are exceptionally low, with special reference to the home-working trades" was one of the items on the agenda of the Tenth session of the International Labour Conference, held at Geneva from 25 May to 16 June, 1927 (Labour Gazette, July, 1927, page 755). This conference, in accordance with the "double discussion" procedure introduced this year, did not adopt a draft convention or recommendation, but held a preliminary general discussion to determine the points which should be covered in a questionnaire to be submitted to the various governments. Replies to this questionnaire are embodied in this new edition.

The present publication traces the development of minimum wage legislation from the time of its adoption in New Zealand and Australia during the last decade of the nineteenth century down to the present day. The British Parliament passed a minimum wage law (the Trade Boards Act) in 1909; Massachusetts adopted the minimum wage principle in 1912, with eight other states followed in 1913. In 1917 minimum wage laws were passed in Alberta (the Factories Act), and Mexico. The period from 1918 to 1920 saw a wide extension of minimum wage legislation. In Great Britain and Ireland during this period an important increase in the number of trades for which minimum rates were fixed, followed the passing of the Trade Boards Act in 1918. In Canada six provinces followed the example of Alberta by enacting minimum wage laws for female employees. Minimum wage legislation was also passed in Norway, Austria, Czechoslovakia, Germany and Hungary. South Africa passed an Act of wide application in 1925 and, in 1926, Italy passed a law introducing compulsory arbitration of disputes, on establishing courts to determine conditions of labour. The scope of these laws varies greatly, some of them fixing minimum rates in nearly all trades while others provide for only certain specified categories of workers, generally women or home-workers. Thus the Canadian laws with the exception of the Male Minimum Wage Act of British Columbia, 1925, are limited to women and male juveniles.

As regards the methods adopted for fixing wages, most of the laws make provision for the setting up of machinery to fix the rates of wages from time to time. Some of these laws indicate the bases on which the minimum rates are to be fixed; others leave the wage-fixing machinery free in this respect. The chief objects of minimum wage legislation are to prevent the payment of unduly low wages, and competition between employers with regard to wages.

The report gives special attention to the most important types of machinery for the regular fixing of minimum wages; the various bases or principles adopted when fixing minimum rates; the problem of defining the limits of each trade; and the methods adopted for ensuring enforcement.

Wage Fixing Machinery

The most important types of machinery for the regular fixing of minimum rates are trade boards and general boards. Where the trade boards system is in effect a separate board is set up for each trade or industry. Each board acting independently of other boards, fixes minimum rates in its own trade or industry. This system is adopted in Great Britain, France, Austria, Czechoslovakia, Norway, Germany, the Argentine Republic and the Australian States of Victoria and Tasmania. The composition of the Trade boards is generally the same. A board usually consists of a number of representatives taken from among the employers, an equal number taken from among the employees; and one or two disinterested persons whose office it is to secure a reasonable decision in cases of difference between the claims of the two sides of representative members.

In the case of the general board system, a single board fixes minimum rates for a number of different industries. Sometimes a general board fixes rates which apply uniformly to a number of industries. Where the latter course is taken the board usually obtains the views of employers and workers in any industry before deciding on the rates for that industry. This system, it is found, provides greater possibilities of avoiding unnecessary differences between minimum rates of wages in the various trades than where these are fixed independently by a separate board in each trade. The general board type of machinery has been

adopted in the United States, Canada, in certain Australian States and in South Africa. A general board usually consists of three or five members charged with the duty of fixing minimum rates in different trades. The chairman is a disinterested person and the other members are equally representative of employers and employees. A general board does not possess expert knowledge of the conditions in different trades. Consequently before fixing a rate in any trade they frequently consult advisory committees of employers and employees in the trade concerned.

Base used for Fixing Minimum Rates

The legal minimum wage is based on one of three standards, namely, the living wage; the capacity of industry to pay; or the relation to wages of other groups of workers. The living wage principle has received its greatest application by wage-fixing bodies in Australia, New Zealand, United States, and Canada. For adult male workers the minimum wage is generally based on the requirements of a man with a wife and two children under 14 years of age. For adult female workers the minimum wage is based on the requirements of a woman without dependants. To establish the precise figure a list of the necessary commodities is drawn up and their cost is determined at prevailing prices. This figure constitutes the minimum wage. According to this standard a man with a family composed only of a wife and two children would enjoy a higher standard of living than the man with five children. To meet this difficulty family allowances have been introduced in some states. The principle of family allowances bases the living wage on the requirements of a man and his wife and makes a further allowance for each child under fourteen.

The capacity of industry to pay frequently constitutes the basis of the living wage in New Zealand and Australia. This principle may be determined in two ways. It may be understood to be the determination of the wages of a given group of workers on the basis of the capacity of industry in general, or it may also be considered to mean the capacity of each separate industry, the minimum wages of each industry being fixed according to conditions in that industry. This basis is often adopted where minimum wages are fixed by independent trade boards. In Australia and New Zealand, when a basis or living wage is fixed below which no worker shall fall, this is determined in relation to the capacity of industry as a whole. However the capacity of each separate industry is usually taken into account. In fixing the so-called secondary wage paid in respect of the worker's skill or the special character of the work, allowance is made for the financial condition of the industry concerned.

Relation of wages to other groups of workers may also constitute the basis of a living wage, and this principle also may be interpreted in two ways. The wages of a given group of workers may be fixed in relation to the level of wages for work of similar difficulty in other industries; or the minimum wages of a given group of workers may be fixed in relation to those of workers in allied occupations in the district or to those workers in the same trade in other districts. This system is in use in Norway and France.

The minimum wage for homeworkers must be fixed in such relations to wages in workshops and factories that homework is not driven out of existence. In practice this principle is based on the belief that if a representative portion of a trade can afford to pay the wage rates fixed in the agreement, the remainder of the trade should also be able to afford to pay the same rates.

Minimum Wage Groups

There are two methods of grouping individuals for minimum wage purposes, the industrial and the occupational. According to the former all similar establishments in a given area are grouped into one industrial unit, and common wage scales apply to all workers in the establishments covered. According to the occupational method of grouping, the individual workers are classified according to their occupation or craft, irrespective of the industry in which they work. In actual practice the occupational method of grouping is rarely adopted.

Difficulty is frequently encountered in defining the limits of various trades. To overcome this a definition of a trade is drafted either by the trade board or general board, on the basis of a preliminary examination of the organization of the trade after consultation with its members. Information of a technical character is obtained from the trade and the definition is then drafted in legal form by the administrative authority or the board concerned. There are no very clear principles which may be applied for purposes of demarcation. In classifying establishments into industrial groups three different criteria have been applied, namely, the material worked in, the process of manufacture, and the product. However, owing to the complexity of industrial organization no general principle or principles can be applied which will avoid all difficulties of definition.

Enforcement

To insure that the minimum rates fixed are actually paid is of primary importance, otherwise the legislation fails to give protection to the worker, while employers who observe the law are placed at a disadvantage owing to the unfair competition of their rivals. Cases of non-compliance are brought to light either by routine inspection or by complaint of the worker himself, or of a trade union official, an employer or representative of an employers' association. In order to facilitate the work of inspection, most laws require the employer to keep proper wage records. These records must include the names and actual earnings of all workers covered. Often the addresses of the home-workers must be listed. The penalties for underpayment vary. In many states a civil action can be instituted for the recovery of the difference between the wage earned and the minimum rate. Other states provide a fine, while still others adopt a publicity policy by publishing lists of those employers who do not comply with the law. The laws generally provide that the existence of an agreement between the employer and worker for work to be done at a rate lower than the legal minimum is no defence against a charge of underpayment.

Seamen's Pensions in the United Kingdom

The shipping industry provides each year a large number of pensions for aged officers and seamen who have served in the mercantile marine or the fishing fleets, and who live in Great Britain or in Northern Ireland. This is done through the Seamen's Pension Fund, which was formerly known as the Lascar Fund, and is administered by a governing body representative of all sections—owners, officers, and seamen.

Shipowners are required to pay the employers' share of the health and unemployment insurance contributions in respect of their foreign-domiciled seamen, most of whom are Lascars working on the shipping lines trading to India and the East. Foreign seamen on British ships neither pay insurance money nor do they draw any benefits. The funds thus obtained have been up to the present devoted to paying pensions of 10s. a week to retired seamen between the age of sixty-five and seventy, the latter being, of course, the age when they are qualified for the State old-age pension. The qualifying age has now been lowered, and a new arrangement will come into force from the beginning of next year by which the old seamen, instead of the 10s. a week, will get 5s. a week for life from the age of sixty-five, so that with the State pension they will have allowances of 15s. a week.

Since this scheme started over 3,000 pensions have been granted and over £140,000 paid to old and infirm seamen and fishermen. It is claimed that no other industry makes such provision for its workers. It is hoped to build up a fund so that in time it will be possible to offer a pension to every seaman who has spent any large part of his life in the mercantile marine.

Old Age Pensions in Great Britain

The British *Ministry of Labour Gazette* publishes in its August edition information relative to Old Age Pensions in the United Kingdom. The figures relate in all cases to the year ended March 31, 1927. The total number of pensions payable under the Act on that date was 1,031,575. Of this number 361,140 were payable to men and 670,435 were payable to women. The much larger number of women pensioners is accounted for in part by the fact that women are eligible for a pension at 55 while men must be 60 years of age. To this figure must be added 166,132 pensioners under the Widows', Orphans', and Old Age Contributory Pensions Act of 1925, making a total of 1,197,707. Of these, 1,175,259 (including all those under the Act of 1925, which was outlined in the Labour Gazette for June, 1925) were payable at the full 10s. rate and 22,448 at other rates from 8 shillings to one shilling a week. The total amount paid in pensions during the year, including those payable under the 1925 Act, was approximately £29,983,000.

The number of applications for pensions during the year was: Contributory, 234,898; non-contributory, 163,377. The number of non-contributory pensioners dying during the year was 117,443. The number of deaths among contributory pensioners for the last quarter of the financial year was 2,689. In Scotland the number of deaths of contributory pensioners during the year was 742.

WORKMEN'S COMPENSATION IN NEW BRUNSWICK AND ALBERTA IN 1926

New Brunswick

THE eighth annual report of the Workmen's Compensation Board of New Brunswick covers the calendar year 1926.* The total income for the year is estimated at $546,010, and the expenditure at $531,287, leaving a provisional surplus of $14,723. Deducting this from the actual deficit of $137,493 of 1925, there remains a provisional deficit of $122,770, less an estimated profit on bonds of $49,401, or a net provisional deficit of $73,368. These figures do not purport to be the actual amount of money to the debit or credit of classes, but show what has been collected from the provisional statements filed, and what the Board think is a fair income to be expected from the amount to be collected, owing to the expected increase of the actual payrolls over the provisional. The expenditure shows the same condition. To the amount paid out is added a sufficient sum which the Board estimates will cover the cost of claims in assembly and the claims which may be existing as of December 31, 1926, but not reported to the Board, and also the estimated amount for claims reported partly paid but not completed. When the actual figures for 1926 are received and all collections made and all claims adjusted, these figures may vary materially.

The actual and estimated expenditure for 1926 included in the total of $531,287 includes the following items: Temporary total disability, $146,632; medical aid, including doctors' fees and transportation as well as hospital and nursing services, $76,115; fatal accidents, $54,854; burial expenses, $1,363; permanent partial disability, $42,515; unreported claims and uncompleted claims (estimate), $161,500.

The cost of compensation for each year 1919-1925 was as follows: In 1919, $376,007; in 1920, $548,302; in 1921, $469,675; in 1922, $496,676; in 1923, $564,890; in 1924, $620,756, and in 1925, $570,883. The report indicates a decreasing number of accidents, both fatal and non-fatal, as compared with the previous year. The smaller accident rate was in turn responsible for a decreased expenditure and the Board consequently experienced a better year financially than in 1925.

The cost of administration, including commissioners' salaries, staff salaries, travelling expenses, etc., is stated as being about eight and four-fifths per cent of the total amount expended by the Board, totalling $56,159. (The rates of assessment to be charged against employers in the various classes of industry in the province in 1926 were given in the LABOUR GAZETTE for January, 1926, page 20, and the rates for 1927 were given in the issue for February, 1927, page 163.)

The report contains complete statistics for 1925. A table is given showing the number of accidents by severity of injury, from 1919 to 1925, inclusive, as follows:

INDUSTRIAL ACCIDENTS IN NEW BRUNSWICK 1919-1925

	1919	1920	1921	1922	1923	1924	1925	Total
Fatal accidents	25	47	35	30	37	38	31	243
Permanent total	.....	.....	1	1	2	1	1	6
Contingency	.....	.....	.....	.....	4	8	4	23
Permanent partial	183	254	241	245	244	261	241	1,669
Temporary total	1,832	2,967	3,032	3,225	4,047	3,823	3,612	22,538
Minor and medical aid only	656	796	1,037	1,310	1,835	1,978	2,075	9,686
	2,696	4,064	4,346	4,811	6,169	6,109	5,970	34,165

Alberta

According to the ninth annual report of the Workmen's Compensation Board of the Province of Alberta (Accident Fund) for the year ending December 31, 1926, there were 8,930 accidents reported to the Board, an increase of 575 or 6.88 per cent over the year 1925. Of these, 58 proved fatal, 87 resulted in some permanent injury and 8,785 were of a temporary nature. Of the workmen to whom these accidents happened 73.14 per cent are of British allegiance.

The average time loss caused by accidents during the year was 88.28 days in permanent, and 24.72 in temporary disability cases. The average age of the injured workmen was 34.50 years, and the average weekly wage was $23.52.

*The report of the Royal Commission on the effect of the Workmen's Compensation Act on the lumbering industry was given in the LABOUR GAZETTE, May, 1927, page 508.

Of the total of 58 fatalities during the year, 39 occurred in the coal mining group in which also there were 25 cases of permanent disability out of a total of 87 cases in all industries during the year. Temporary disabilities were more widely distributed through the various industries.

The following table shows the number of accidents during the year in groups according to cause:—

CAUSES OF ACCIDENTS REPORTED DURING 1926

Cause	Fatal	Permanent disability	Temporary disability	Total
Burns and scalds	.....	1	140	141
Burst bottles and broken glass	.....	.....	64	64
Electrical shock and burns	1	.....	18	19
Explosions	13	1	23	37
Falling timber and poles	3	3	227	233
Falling and tripping	1	2	1,235	1,238
Falling rock, coal and clay	16	5	679	700
Flying and falling objects	2	13	1,470	1,485
Heavy lifting, loading wagons and trucks	1	.....	337	338
Infection from handling meats and materials	2	.....	132	134
Inhalation of gas fumes	2	.....	50	52
Machinery, tools and equipment	5	46	1,473	1,524
Injured by horse and in runaways	.....	2	179	181
Protruding nails and spikes	.....	2	260	262
Cranking automobiles	1	.....	63	64
Struck by automobiles and trucks	.....	.....	40	40
Splashing of mixtures	.....	.....	59	59
Run over, struck by, or caught between cars	9	6	342	357
Derailment of mine cars	1	1	58	60
Slivers and splinters	.....	.....	174	174
Crushed	1	3	370	374
Striking against objects	.....	2	364	366
Frost bites	.....	.....	25	25
Miscellaneous	.....	.....	1,003	1,003
Totals	58	87	8,785	8,930

The report indicates that assessments levied during the year together with those outstanding at December 31, 1925, totalled $854,446.21. Of this amount, $783,725.84 was collected, $48,600 was cancelled (owing to over-estimate of payrolls or cessation of operations) leaving a balance of $22,120.37 unpaid at December 31, 1926.

During the year compensation totalling $298,404.40 was paid; $391,005.98 was transferred to the Pension Fund to cover awards in the case of permanent disabilities and fatal accidents, and $234,770.42 was paid to pensioners. In addition to this $97,426 was set up as a liability to cover pending claims. The expense of administration (excluding that made on account of Mine Rescue) was $74,790.66 or 6.89 per cent of collections.

Since the Act became effective on August 1, 1918, up to December 31, 1926, there has been paid to workmen compensation totalling $2,180,680.38. In addition to this sum there has been awarded and set aside in the Pension Fund the sum of $2,109,135.78 out of which $789,045.65 has been paid to workmen to whom accidents resulted in permanent disabilities and to dependents of workmen to whom accidents proved fatal. The balance at the credit of this fund at the close of the year 1926, was $1,596,301.08 out of which 174 widows and 370 children of deceased workmen, as well as 231 workmen who met with permanent disabilities are receiving monthly payments.

Payments for medical services since the inception of the Act up to December 31, 1926, total $887,779.42. This cost is borne by the workmen, but it should be noted that in a large number of cases medical aid is provided under medical contracts so that the Board is not responsible for the payment of medical aid in these cases.

Total receipts for the year on account of medical aid were $186,969.56 while payments for medical services amounted to $124,137.70.

Under the provisions of Privy Council Order No. 4432, $9,930.50 was refunded to the Board by the Department of Soldiers' Civil Re-establishment on account of compensation and medical aid payments made to workmen to which the Workmen's Compensation Act (Accident Fund) applies.

The number of employers within the scope of the Act on December 31, 1926, was 3,139.

The actual rates of assessment for $100 of payroll for the year in the coal mining industry was $3, this assessment including a rate of 50 cents for mine rescue service. Other industries with a comparatively high rate of assessment were: Lumbering and logging, $3.50; sawmills and shingle mills, $3.50; manufacture of wooden boxes, $3.50; rolling mills, $3; natural or artificial gas, oil, and natural ice operations, $3; steel building construction less than 4 stories, $3; roadmaking and street paving (with blasting), $4; aeroplane flying, $10.

The payrolls and numbers of workmen employed during 1926 are given in the accompanying table:—

PAYROLLS AND NUMBERS EMPLOYED IN VARIOUS INDUSTRIES IN ALBERTA IN 1926

Industry	Payrolls	Number employed
	$ cts.	
In and about coal mines	12,118,897 96	8,441
Employees of workmen	26,127 32	22
Stripping pits	555,710 07	311
Lumbering, planing mills, furniture, etc	2,992,790 10	4,108
Gravel pits, glass, cement, oil, ice, paint and chemicals, etc	3,078,503 12	2,048

Factory Inspection in Great Britain in 1926

The annual report of the chief inspector of factories and workshops in Great Britain for the year 1926 states that there were indications of a general improvement in industry during the first few months of the year, accompanied by a decrease in unemployment which continued until the general strike began. The effects of the general strike were short-lived, though serious, but it was otherwise with the long continued dispute in the coal industry. In South Wales, South Yorkshire, the North East Coast and Lanarkshire the coal shortage was felt most, but the report remarks on the large number of industries that were able to carry on and employ most of their workers throughout the coal stoppage. Electricity and gas were used instead of coal to supply power and light, and many firms introduced oil as a substitute for coal with good results. This was especially true in the pottery industry where the output was increased owing to shorter time required for firing. Certain industries appear to have benefited, temporarily at least, by the coal strike; for example, the manufacture of oil stoves, heaters, cooked foods, and the production of engines of the Diesel oil type received an impetus. The silk industry also experienced a revival during the coal shortage, and there was a remarkable activity in the building trades. The textile and lace industries suffered considerably, however, and many woollen mills which had been in operation for years were forced to liquidate. The report mentions the general industrial growth of the southern area of the country during the year.

During 1926 the number of registered factories rose from 144,361 to 145,411, and the number of registered workshops dropped from 128,793 to 121,861. The decrease in workshops was most marked in rural districts.

The accident figures for the year 1926 show a decrease of 19,730 from the year 1925. There were 139,963 accidents, including 806 fatal, during the year. The decrease is chiefly confined to those areas and industries which were most affected by the prolonged coal stoppage. There was a gratifying fall in the number of fatal accidents, which may however be explained by the fact that many of the most hazardous industries were working below normal capacity. Other industries show an increased accident rate. This increase is noted in the building trades, the manufacture of miscellaneous foodstuffs and the generation of gas and electricity.

New regulations recently published by the Alberta Workmen's Compensation Board require that (1) every employer operating a garage or other building to which the Workmen's Compensation Act (Accident Fund) applies, shall provide and maintain adequate means of ventilation for the removal of smoke, steam, gas, fumes, vapours, dust, or other impurities which are created or generated by any process carried on in such building or workroom; and (2) where a salamander or other heating apparatus liable to produce smoke or noxious gases is used for the drying of plaster or for other purposes, it shall be so piped as to convey smoke and gaseous matter to the outside of the building.

MINERAL INDUSTRY IN CANADA IN 1926-7

A PRELIMINARY report by the Dominion Bureau of Statistics on the mineral production of Canada during the calendar year 1926 and the first six months of 1927, states that "continuing the progress made in 1926, when the mineral output of Canada reached a new high record value of $240,437,123, production of metals and non-metals in the first half of 1927 registered a further advance. While the output of gold during the half-year was slightly less than during the first six months of 1926, the production figures for all other metals were higher than they were in the corresponding period of the preceding year. Slightly lower prices reduced the values in a few instances. Production of arsenic, cobalt, copper, lead, nickel, platinum metals, silver and zinc showed definite improvement during the six months' period ending June 30, 1927.

Considered by groups and compared with the corresponding data for 1925 the output values of metals during the calendar year 1926 showed a loss of 1.6 per cent, but this was wholly due to modifications in the methods used in computing values of certain metals. The data for copper, lead and zinc are subject to these limitations. Among the non-metals the fuels, including coal, natural gas, peat and crude petroleum, advanced in value 19.8 per cent in 1926 as compared with the totals for 1925; other non-metallic minerals showed 13.7 per cent higher values in the aggregate than during the preceding calendar year. Clay products showed a gain of 8.6 per cent and other structural materials in advance of 5.2 per cent over the totals for 1925. In the aggregate, the mineral production of Canada in 1926 showed a gain of 6.1 per cent over the totals for the preceding calendar year.

Coal Production.—The production of coal in Canada by kinds and by provinces in 1926, and from January 1 to June 30, 1927, is shown in the table following, the production being represented in short tons.

COAL PRODUCTION IN CANADA

Province	1926		January 1 to June 30, 1927	
	Quantity	Value	Quantity	Value
		$		$
NOVA SCOTIA (Bituminous)	6,747,477	26,845,226	3,572,122	13,335,611
NEW BRUNSWICK (Bituminous)	173,111	710,245	110,510	486,600

Total	**16,478,131**	**59,875,094**	**8,424,631**	**29,695,818**

Employment.—Employment in the mineral industry in Canada was maintained at about the same average rate throughout 1926 as that prevailing in 1925. The Index of employment showed that about 3.5 per cent fewer persons were listed on the rolls of the operating companies in January, 1926, than were shown on the rolls of the same companies in January, 1920. Employment dropped off slightly in the first five months of the year, but beginning in June a gradual improvement set in which carried the index of employment in December, 1926, to 4.2 per cent above the number employed in January, 1920. Non-metal mining, including coal mining, showed greater gains than did the metal mining industries, but probably this was due to the fact that in the preceding year these industries were somewhat depressed while metal mining has been enjoying an era of prosperity for several years.

In the operating mines, quarries and smelters in Canada there are upwards of 65,000 persons employed. This number does not represent the total extent of employment in the mining industry as there are no records available of the numbers engaged in prospecting and general development work on properties that have not reached the producing stage, nor does it include any allowance for those persons who are engaged in the subsidiary industries directly dependent on the mining industry for their continuance, but in these operating mines, quarries and metallurgical works there are approximately 45,000 persons employed in Ontario, British Columbia and Nova Scotia alone. About 20,000 are employed in the metal mining industry and non-ferrous metallurgical work. About 34,000 people are employed in non-metal mining and approximately 11,000 in the production of structural materials and clay products. To all these, salaries and wages totalling approximately 85 million dollars are paid annually.

The importance of the purchasing power represented by the employees of Canada's mining industry is sometimes not fully appreciated. Fuel and electricity constitute an expense item reaching a total of almost $20,000,000 a year; much of the progress that has been possible in the mining industry in recent years has been due to the extensive development of hydro-electric power facilities.

Capital Employed.—Investment in Canadian mines amounts to approximately $632,075,000; of which $290,534,965 is invested in metal mining and metallurgical works treating Canadian ores; $253,023,646 represents the investment in non-metal mines and $88,516,534 the cost of properties and plants producing structural materials and clay products.

Investments in coal mining account for 23 per cent of the total capital employed in the mining industry.

MINING OPERATIONS IN QUEBEC IN 1926

THE annual report of the Department of Colonization, Mines and Fisheries on mining operations in the province of Quebec in 1926 shows an increase of 8.1 per cent in the value of the minerals produced during the year as compared with 1925—an increase which is the highest on record under normal economic conditions. As to quantities, the report observes that "it is essentially a year of records," and in the following substances the highest annual figures to date have been registered: asbestos, zinc ores, lead ores, gold, silver, feldspar, brick and cement. As regards individual items, increases were recorded in asbestos, copper concentrates, feldspar, gold, magnesite, mineral paints, quartz, silver, soapstone, zinc ores, lead ores. Decreases were recorded in graphite, mica, molybdenite, and building materials taken as a class.

The value of the mineral production in 1926 amounted to $25,750,463, and was divided as follows: metallic minerals, $1,897,528 or 7.6 per cent of the total; non-metallic minerals (apart from structural materials), $10,837,745, or 42 per cent; structural materials $13,004,929, or 50.5 per cent. Non-metallic minerals constituted 92.4 per cent of the total value for the year, leaving 7.6 per cent for the ores of metals. This latter proportion for 1925 was only 4.5 per cent, a substantial increase in production for 1926 being thus indicated. Commenting on this greater production of metallic ores during 1926, the report attributes it as being "entirely due to the greater output of the mines in the older parts of the province," adding that "none of the discoveries of metallic deposits made in the last few years in Western Quebec and in Gaspé have as yet contributed to our mineral production." It is further stated that the recent prospecting and development activities in the newer fields cannot be reflected in the tables of production until the 1928 figures of mineral statistics have been compiled.

New Mining Areas.—Referring to development in the new mining district of Rouyn-Harricana, and also to the subject of mining investments, the report issues a warning to the public, its comment on the mining companies organized in the new area and conditions therein being in part as follows:—

> Unfortunately only a comparatively small proportion of these have as primary aim the earnest and systematic prospection and development of the mining claims which they detain, endeavouring to make mines out of them. In their initial stages mining ventures are necessarily risky, even under the most favourable conditions and circumstances, but when successful the returns are very large. In our previous reports we have drawn the attention of the public to the fact that before putting money in mining enterprises they should make enquiries and investigations which would permit them to descriminate between (1) "safe mining investments" (2) "legitimate and reasonable mining speculations" and (3) "mining frauds." In the first, the returns are not high but are reasonably sure. In the second, the money resulting from the sale of shares is really expended in intelligent search and development work on the claims and mineral deposits, which may or may not answer the hopes which were founded on them; in case of losses the shareholder would at least have the satisfaction to feel that he has had "a run for his money," for all numbers of a lottery cannot be winners.
>
> As in all cases of promising mineral discoveries, the Rouyn district is experiencing a period of boom, and unfortunately this has given rise to many instances of the third category of mining ventures, or parasitic, not to say predatory, organizations, whose main object is to mine money out of the excited public, rather than ore from the ground. This state of things is very difficult to avoid or remedy; it is not easy to protect a certain class of people, and prevent them from parting with their money. It is good to remember that, as a rule, the promising mineral discoveries and likely claims in the Rouyn district do not have to resort to full page advertisements and house to house peddling of beautifully engraved stock certificates, making appeals to the public for funds to explore and develop them.....
>
> History repeats itself, and the ultimate result of the Rouyn boom will be (1) a few good outstanding producing mines and a healthy smelting industry which will prove a national asset, and (2) a multitude of claims which will never produce ore, but will have been used

to exploit the public. This applies more particularly to the public who expects to make money out of the stock market rises of mining shares, rather than in ultimate dividends from ore-producing mines.

Wages.—According to reports received by the provincial department from individuals and companies of their operations during 1926, it is estimated that 14,022 persons were employed last year as compared with 9,304 in 1925. The accompanying table shows for each mineral produced in Quebec, the actual number of workers engaged, the wages paid, and the quantities produced in 1926, as well as comparative figures of the value of the mineral products for the years 1926 and 1925.

Of the $9,826,900 received in wages by the workmen, the miners received $4,923,205 and the quarrymen, $4,903,895. The number of 300-day men at work at the mines was 4,042, and at the quarries 4,686. This is an increase of 19 per cent and 29 per cent respectively over the preceding year. The average wage earned by a 300-day workman during 1926 was $1,137, and for 1925 it was $1,133. The method employed to ascertain the number of 300-day men represented by the 14,022 persons employed during the most active season of the year is to divide by 300 the number of days worked by the men at each mine and quarry.

The following table shows the actual number of workers employed in the mines, quarries and connected plants during 1926; also the number of workers calculated on a 300-day basis in the years 1925 and 1926.

EMPLOYMENT IN MINING INDUSTRY IN QUEBEC IN 1926

Mines, Quarries and Plants	Number of men employed 1926	Number of men calculated on 300-days basis	
		1926	1925
Asbestos	2,747	2,626	2,502

Mining Accidents.—During the year the Bureau of Mines received notices of 326 serious mining accidents entailing a loss of time of ten days or more. The accident average was 37.3 per 1,000 full-year workers, as compared with 38.3 for the preceding year. There were 20 violent deaths in the mines and quarries during the year 1926, being an average of 2.29 per 1,000 men year. This index number was 2.51, 2.72, 2.38, 1.83 and 2.42 for 1921, 1922, 1923, 1924, 1925 respectively. In the mines proper the proportion of fatal accidents was 3.46 and in the quarries 1.28, as compared with 3.23 and 1.38 for the year 1925.

An analysis of the accidents shows that the causes were similar to those reported in previous years. In the mines, 42 per cent of the fatalities were due to falls of rock, other causes being recorded as follows: falls of objects, 17 per cent; haulage, 17 per cent; explosives, blood poisoning and falls, each 8 per cent. In the quarries, falls of ground accounted for 66 per cent of the deaths among workmen, while in the annexed plants, the deaths were attributed equally to falls of rock and electrocution.

The report recommends that stronger and more efficient guards should be around places in mills where men are exposed to coming into contact with fast-running belts and high-revolution shafts or pulleys.

The report also declares that "operators who have at heart the safety of their men will know from these tables the principal causes of accidents, and they will apply themselves to protect their employees."

Workmen's Compensation in Ohio

The actuary's annual statement on the condition of the Ohio State Insurance Fund indicates a reduction in the frequency of claims for workmen's compensation in 1926 as compared with 1925.

The assessment rates are based on the experience of the various classifications for the five-year period 1922 to 1926 inclusive. Due to more favourable loss experience in 250 classifications it was possible to reduce the basic rate of such classifications. In 336 classifications there was no change in the basic rate from that of last year; in 120 classifications the experience was such that it was necessary to increase the rates over that of last year. A summary of this year's rate revision shows 35 per cent of the classifications receiving a reduction, 17 per cent an increase and 48 per cent no change from that of last year. The experience of the Occupational Disease Fund has developed to a point where it is possible to reduce the rate from 1½ cents to 1 cent per hundred dollars of payroll.

The reduction in rates will mean a saving of approximately $1,250,000 to employers in premium for the year the revised rates are to be effective. The reduction of rates can only be made in those classifications where employers in the classifications have succeeded in reducing the cost of accidents in their industry. Rates of an industry follow the accident cost of such industry.

Every employer is individually merit-rated on the experience of his individual operation over the most recent five calendar years. The classification rates are the basic rates of the industry and a favourable experience of an individual employer will reduce his individual rate below that of the classification, while an adverse experience results in an increase of the employer's individual rate above that of the classification. It is possible for two employers in a classification—one of which an adverse experience receives a rate three times that of the other employer with a favourable experience. This provides an incentive for an employer to prevent accidents in order to keep down his premium cost.

Under the Ohio law employers having three or more employees must carry workmen's compensation insurance.

The New York Court of Appeals recently reversed a decision in the Magistrates Court, which convicted the defendant of disorderly conduct on the ground that he caused a crowd to collect on the street, while engaged in picketing a place of business, there being no strike in progress at the time. The Appeal Court ruled that picketing in the absence of a strike does not constitute disorderly conduct. The word "crowd", it was stated, was a relative term, with a different meaning in the night and day, in different towns or parts of the same town. In the present case, which concerned a corner on Broadway, there was no evidence that the defendant collected a "crowd". The conviction of the defendant was declared "to rest upon the erroneous idea expressed by the magistrate that if there is no strike and he is marching up and down in front of this place of business he is guilty of disorderly conduct."

NOTES ON INDUSTRIAL SAFETY AND HEALTH

Safety Work of the International Pulp and Paper Company

MR. JOHN LUNDRIGAN, Industrial Superintendent of the International Pulp and Paper Company, outlined the accident prevention measures adopted by his company in a paper read before the tenth annual Industrial Safety Congress of New York State. This company has pulp and paper mills in seven States and in three Provinces of Canada. The general supervision and direction of all these mills is conducted from one central office at New York City, carried on through a system of general instruction which constitute the industrial law of the company, each instruction having the importance of an executive order. These orders apply to every general feature of the company's business as well as to accident prevention. The provisions of the original safety organization plan were passed on by both management and employees at each local plant. The safety provisions, a copy of which is handed to each employee as he enters the company, provide for the creation of a supervising organization at the general office, an operating organization, and a safety supervisor at each plant. The plant manager is the centre of responsibility and the safety supervisor is his executive officer. To aid the working of the system the company established nursing services in all the pulp and paper plants. Later, a physical examination of all new employees was instituted, with a view to providing an adequate supply of labour and diminishing labour turnover. The Industrial Bureau keeps a record of the company's safety experience and notes any developments that may have occurred in the industrial world in the way of improving or bettering accident and health experience.

Mr. J. A. Marshall, general superintendent of the Union Carbide Company, Niagara Falls, N.Y., in another paper at the same conference discussed the part that management can take in safety work, and made the following recommendations:—

That the management, as far as practicable, make constant use of safety devices, and furnish instructions on safe methods and practice; that the management set a sincere example by placing safety ahead of production; that department heads, foremen and supervisors demonstrate their belief in safety by observing all rules and practices, and by keeping a constant lookout for hazards; that the general engineering department design and install all equipment with a view to safe operating conditions; that the management give formal recognition to a meritorious accomplishment in safety work, and co-operate with public agencies in promoting safety in the home and on the street.

Silicosis in South Africa and in Wales

Silicosis was added in 1926 to the list of "industrial diseases" under the Ontario Workmen's Compensation Act (LABOUR GAZETTE, May, 1926, page 450). In the previous year, Mr. T. F. Sutherland, chief inspector of mines for Ontario, had visited South Africa for the purpose of gathering information that would be of service in framing new health regulations for mines in the province. This visit, with the comments of the provincial minister of mines thereon, was noted in the LABOUR GAZETTE for July, 1925, page 687.

The South African Miners' Phthisis Board recently published its annual report for the year ending March 31, 1926. The payments made out of the compensation fund for twelve months totalled £1,240,909. The object of this fund is to pay out most of the liabilities created by the various Miners' Phthisis Acts passed since 1911. Since August, 1919, the Board has granted 4,217 "one-sum" awards. Of these, 749 were granted in the period under review. Of the awards granted in 1925-26, 477 were in the ante-primary stage of the disease, the average award for this stage being £388, with a maximum award of £773. In the primary stage the average award was £528, with a maximum of £724, and in the tertiary stage the average was £507, with a maximum of £751. (A description of the stages of silicosis was given in the LABOUR GAZETTE, June, 1926, page 574.) Recipients of "one-sum" awards left £27,452 on loan with the Board. The system which allows them to do so is used by about 25 per cent of the miners to whom such awards have been made. Since October, 1919, £435,300 has been left with the Board and £407,844 withdrawn, interest being paid on the loans. There was a total during the year of 2,476 awards to miners or dependants who have received further benefits in addition to their "one-sum" payments. There have been as well 5,192 awards to miners found to have silicosis in the secondary stage or with tuberculosis. These miners are paid monthly allowances calculated on their month's earnings, and additional sums are paid to their wives and dependants.

A report issued by the Welsh Board of Health regarding the high death rate from

phthisis states that all slate workers, and in particular dressers and splitters, experience a higher mortality from phthisis than other males. At the same time the death rate of slate miners is far below that in other industries involving exposure to silica dust, such as tin mining in Cornwall and metal grinding in Sheffield. This is explained by the fact that exposure to dust is slighter in the slate industry and that the silica content of the dust is much lower.

Increase in Industrial Accidents in New York

At the tenth New York State Industrial Safety Congress, held recently at Rochester, the president described as startling the recent increase in industrial accidents. Part of this increase, he thought, might be accounted for by a reduction of the waiting period, by a more complete reporting of accidents, and by an expansion of business activity and increased employment. "Nevertheless," he stated, "it is impossible to contemplate such a trend of accidents and their cost and then recall that it is a phenomenon occurring at the end of a quarter of a century and more of increasing efforts to prevent accidents in industry, and not find in them a challenge to safety movement. Unless the testimony of those most competent to judge of how far accidents are preventable is entirely at fault, such facts as those cited above force us to the conclusion that notwithstanding all that the safety movement has accomplished, we are still far from the goal and must gird ourselves for a greater and more effective fight against the waste of life and money entailed by to-day's accident toll."

Canadian National Railways First Aid Competitions, 1927

The winning teams in the First Aid Competitions held by the Canadian National Railways in 1927 are given below, as compiled by the Company's Department of Safety and First Aid. All the Dominion and regional competitions were conducted by Colonel C. A. Hodgetts, C.M.G., M.D., director-general of St. John Ambulance Association, and were under the special supervision of Vice-President W. D. Robb.

Dominion Trophies (St. John Ambulance Association)

Montizambert Cup, representing championship of Canada, open to men. Winners, C.P.R. Team, Chapleau, Ontario.

Wallace Nesbitt Trophy, representing the railway championship of Canada, open to men. Winners, Canadian Pacific Railway Freight Offices Team, Toronto.

Lady Drummond Cup, representing championship of Canada, open to women. Winners, Canadian National Railways, Montreal, Belgo Building Team.

Manitoba Province Shield, representing provincial championship, open to men. Winners, Canadian National Railways, Fort Rouge Team, No. 1, Winnipeg.

Quebec Province Shield, representing provincial championship, open to men. Winners, Canadian National Railways, Team No. 2, Point St. Charles.

New Brunswick Province Shield, representing provincial championship, open to men. Winners, Canadian National Railways, General Offices Team, Moncton, N.B.

System Championships

Thornton Cup, representing championship of Canadian National Railways System, open to men. Winners, Fort Rouge Team No. 1, Winnipeg.

Robb Cup, representing championship of Canadian National Railways System, open to women. Winners, Office Team, Montreal Belgo Building.

Page Medal, representing individual championship of Canadian National Railways System, open to men. Winner, Arthur Morin, Quebec General Offices.

Page Medal, representing individual championship of Canadian National Railways, open to women. Winner, Miss Theresa M. Carragher, Edmonton General Offices.

Regional Championships

Chamberlin Shield, representing championship of central region, open to men. Winners, Quebec General Offices.

Bowker Cup, representing championship of central region, open to women. Winners, Montreal Belgo Building Team.

Officers' cup, representing championship Grand Trunk Western region, open to men. Winners, Car Shops at Port Huron, Michigan.

Officers' cup, representing championship Grand Trunk Western region, open to women. Winners, Detroit General Offices.

Officers' Cup, representing championship Western region, open to men. Winners, Fort Rouge No. 1, Car Department Team, Winnipeg.

Officers' Cup, representing championship Western region, open to women. Winners, Edmonton General Offices Team.

Officers' Cup, representing championship of Atlantic region, open to men. Winners, General Offices, Moncton, N.B.

Officers' Cup, representing championship of Atlantic region, open to women. No competition.

Officers' Cup, representing championship Telegraph Department, open to men. Winners, Office and Operating Department, Winnipeg.

Barber Cup, representing championship Telegraph Department, open to women. Winners, Montreal Office Team.

Galloway Cup, representing championship of Electric Lines, open for general competition. Winners, Toronto Suburban Railway, Lambton.

Local Trophies

Hutchison Shield, representing Montreal and District, open to men. Winners, Point St. Charles Shop Team No. 2, Montreal.

Bourne Cup, representing Montreal and District, open to women. Winners, Montreal Belgo Building Team.

Officers' Cup, representing Transportation Department only, open to men. Winners, Stratford Station.

Deacon Shield, representing Stratford Motive Power Shops, open to men. Winners, Stratford Shop Team, No. 2.

Lead Poisoning in Mines

A recent publication by the United States Department of Commerce outlines an investigation conducted into the lead poisoning hazard in the lead mines of Utah. The writer points out that lead poisoning contracted in the mining of lead ores is much more common than has been believed. The disease is contracted through the inhalation of lead dust, the dust of the carbonate ores being the most frequent causes. The dust of the sulphite ores seemingly only causes the disease when mined dry in poorly ventilated places. As to methods of overcoming the disease, the writer states that it can be reduced to a minimum by efficient ventilation, wet drilling, and the sprinkling of muck piles before loading. He claims that responsibility for prevention rests on both employer and employee. Proper medical supervision is the only means of overcoming chronic cases of lead poisoning which have been common in the past. While the death-rate directly ascribed to the disease is low, the writer points out that only in rare cases is lead poisoning the immediate cause of death. The sequelae, following acute attacks, and giving rise to unhealthy conditions of the digestive, nervous, circulatory or genito-urinary systems, are frequently fatal in their results. The time elapsing between the first active symptoms of lead poisoning and the terminal illness is often so long that the initial cause, lead poisoning, is lost sight of entirely, and the death certificate gives no evidence of the primary cause.

Efficient Accident Prevention on Norfolk and Western Railway

The Norfolk and Western Railway recently published a report on its work of accident prevention for the past fourteen years. A chart is given, showing an increase of 95 per cent in the volume of business handled by the company during this period, accompanied by a decrease in fatal accidents of 67 per cent, and of non-fatal accidents of 46 per cent since 1912. This record is the more impressive when it is considered that when the volume of business increases in any industry, accidents usually increase at a relatively higher rate (LABOUR GAZETTE, June, 1927, page 593). This is explained by the fact that inexperienced men must be employed when business expands. On the Norfolk and Western Railway, however, 2,675 employees were injured in 1912, or one for approximately each three and a third million ton miles carried. In 1926, with nearly double the volume of business, only 1,436 employees were injured, one for approximately each twelve and a fourth million ton miles carried, a reduction in injuries compared with the volume of business handled, of 73 per cent. In addition to this record among its employees, not a single passenger was killed in a train accident on the Norfolk and Western during the last five years. In that period more than twenty-six million persons were carried.

Safety Exhibit at Toronto Exhibition

One of the interesting exhibits in the Ontario Government Building at the Canadian National Exhibition, held at Toronto early in September, was that of the Workmen's Compensation Board under the direction of Mr. T. Norman Dean, Chief Statistician of the Board. Each day Mr. Dean posted a memorandum giving the total number of accidents reported to the Board on the previous day, together with the amount of money awarded for the day and the number of death cases. Another part of the exhibit was devoted to rehabilitation, and a blind operator was seen at work. The accident prevention features of the booth were handled chiefly by the Industrial Accident Prevention Associations, with Mr. V. L. Mummery, Chief Inspector of the Associations, in charge. The Safety Exhibit included guarded grinding wheels, safety goggles, protective footwear and other forms of safeguarding. Demonstrations of resuscitation of persons apparent-

ly drowned or suffering from gas poisoning or electric shock were given by employees of the Hydro Electric System, and demonstrations of first aid were given by teams of the Bell Telephone Company, Canadian National Railways and Canadian Pacific Railway.

The safety motion pictures shown by the Industrial Accident Prevention Associations were of unusual interest, the films being in the main those used by the Industrial Accident Prevention Associations in plant and other safety meetings held throughout Ontario.

Safety Measures Recommended in Maine

The eighth biennial report of the Department of Labour and Industry of the State of Maine, covering the period 1925-26, recommends that "each plant should have its safety organizations, consisting of a safety inspector, a workmen's safety committee in each department, a foremen's safety committee, and a general safety committee, who should see that proper mechanical safe guards are installed, investigate all accidents, and help in the educational campaign. All employees should be encouraged to make suggestions for improving the sanitary and safety conditions. Co-operation and harmony are essential, and all should work together, as the safety of one is the safety of all."

Describing the duties of factory inspectors, the report says that "the purpose of a factory inspector is to prevent accidents, see that all that can be done to protect the employee is done, to enforce laws relating to the employment of women and children, and to point out ways and assist the employer in improving conditions for those employed by him. The latter is particularly essential, for while an employer may be willing to do all in his power to better conditions, he may lack the knowledge as to how certain conditions in his own line of business have been treated in other places, which knowledge the inspector should be able to supply him with, having had the privilege and experience of looking over conditions in all lines of industry."

Italian Regulations for Industrial Hygiene

General regulations for Industrial Hygiene, applying to all paid workers in industry, commerce and agriculture, except workers on board ship and underground, were recently approved by the government of Italy. The first provisions, dealing with the handling of injurious products, stipulate that workers employed in operations exposing them to poisoning must be warned by the employer of the danger incurred; the employer must also place at their disposal adequate means of protection. In industries in which poisonous substances are produced or handled, the workers will be examined by a competent physician at the time of engagement, and subsequently at intervals determined by the minister. The regulations cover first aid appliances and working conditions in general. Certain sections fix the limits of weights to be carried, drawn or pushed by children and women. There are also several provisions concerning agricultural workers, and dealing with dwellings, dormitories, water and prevention of disease. The last provisions deal with the inspection of labour and supervision of the enforcement of the regulations. Fines are laid down for workers who fail to comply with certain provisions of the decree.

Accidents in Ontario in July

The Ontario Workmen's Compensation Board received reports in July covering 6,215 accidents, this being a decrease from the number reported in June when there were 6,446 accidents; but the figure for July of this year is higher than July, 1926. The fatal cases in July numbered thirty-five, which is a decrease from June, the number in that month being forty-seven.

The total benefits awarded by the Workmen's Compensation Board in July were $576,513.64, of which $495,031.57 was for compensation for injured workers and $81,482.07 for medical aid. The total benefits awarded in June, 1927, amounted to $518,583.41 and for July last year $538,685.09.

Referring to these figures, Mr. R. B. Morley, general manager of the Industrial Accident Prevention Association, calls attention to certain hazards of the season. An employee of a plant in Eastern Ontario fell from the dock to the water and was drowned. A traveller, while driving in Western Ontario, turned out to allow another car to pass; his wheels struck soft dirt and the car was overturned, pinning him underneath and killing him. Another accident, mentioned because of its severity, happened in a metal working plant when the operator lost his right hand due to the helper letting the hammer down while a plate was being inserted in the machine.

The fourteenth annual meeting of the International Association of Industrial Accident Boards and Commissions will be held at Atlanta, Georgia, on September 27-30.

The sixteenth annual safety congress under the auspices of the National Safety Council (U.S.A.) will be held at Chicago on September 26-30.

NOTES ON TECHNICAL EDUCATION AND APPRENTICESHIP

Training College for Technical Teachers at Hamilton, Ontario

REFERRING to the Training College for Technical Teachers about to be constructed in the City of Hamilton, the *Spectator* of August 31 makes the following statements:—

The training college is the first one of its kind in Canada and likely to maintain this unique position for some time. Its purpose is the giving of instruction in teaching to skilled tradesmen to enable them to take positions in technical institutes. Placed adjacent to the technical school, the students will be enabled to observe the methods of qualified teachers and to gain practice in teaching themselves through an arrangement made with the local board of education. Technical education is of recent development and teachers in this department of learning have to combine the qualifications of the skilled mechanic with those of the teacher. It has been found by experience that a three or six months' course will enable the intelligent mechanic to grasp the fundamentals of pedagogy. Authorities of a technical institute, having chosen a suitable man as teacher of such subjects as electrical work, motor mechanics, plumbing or printing, send him to the college where he acquires knowledge of and practice in the art of teaching. During the course, his salary is paid, half by the department and half by the board of education concerned.

The purpose of the school is to serve, primarily, technical education in Ontario, but with the development of technical instruction elsewhere, the facilities offered are likely to be taken advantage of by other provinces. Hamilton has thus become the centre of technical education training in Canada, for the college is already temporarily established in the technical institute itself.

Apprentice Training on the Baltimore and Ohio Railroad

In the LABOUR GAZETTE for December, 1922, there was given an interesting paper by Mr. A. H. Williams, supervisor of apprentices, Canadian National Western Lines, on the subject of Apprentice Training on the Western Lines of the Canadian National Railways. The adoption of a somewhat similar system of apprentice training (coupled with the technical education of apprentices) on the Baltimore & Ohio Railroad is the topic dealt with by Mr. C. N. Fullerton, supervisor of apprentice training, in an article appearing in the August issue of the *American Federationist*. Mr. Fullerton points out that "apprentice training is not new on our American railroads," but that "little or no effort has been made by the railroads to standardize the training, or measure its results." The reason for the adoption of some system of apprentice and technical training on the railroads is stated as follows:—

Recent developments in railroad industry indicate that our railroads are beginning to realize the necessity for an apprentice system that will train young men for the industry in a manner to fit them thoroughly for their future work. Other industries cannot be depended upon to train men for the railroad industry. Therefore, if we are to continue forging ahead on our railroads we must train our own young men. Other industries are doing this and the railroad industry is compelled, in its own interest, to inaugurate a systematic training of men which will secure higher type of men, eliminate the unfit, and train them in the technical as well as the practical work of railroading.

Continuing, the article outlines the first experience of the Baltimore and Ohio Railroad in apprentice training. This preliminary experience, however, did not prove entirely satisfactory. After several years of the classroom method of instruction the management made a careful survey of the results obtained. The survey indicated that "there were a number of apparent disadvantages to the method of instruction that had been in use." Consequently, the class-room method was discontinued in 1922, and it was not until September, 1926, that a new method of furnishing technical training to the apprentices was put into effect. In the interim the management, with the co-operation of the Federated Shop Crafts, had made a study of what training should be provided so as to meet the requirements of all parties. A joint committee, equally representative of both the management and the employees was appointed to "make a thorough study of apprentice training, and make a recommendation as to what training should be provided."

Dealing with the committee's objective in the inquiry and its recommendations, Mr. Fullerton states:—

It was agreed that the purpose of technical training was not to make mathematicians or draftsmen out of the apprentices, but to give them a sufficient ground work of the fundamentals of these two necessary subjects to make them proficient capable mechanics in the final analysis, to make them mechanics both in the theoretical as well as in the practical part of their trades.

The investigations of the committee soon demonstrated the fact that no system of train-

ing was to be had, ready made, that would fit their ideas of proper technical training for the apprentices on the Baltimore and Ohio. It became evident that the only way to get just what they wanted was to have some competent organization of educators build up a course of training that could be fitted to the apprentice's needs as he progressed through his term of apprenticeship.

Finally, after completing its study of the best possible methods, this joint committee recommended that The Railway Educational Bureau of Omaha, Nebraska, be selected as the school best adapted to furnish the technical training desired. The recommendation was concurred in by the Federated Shop Crafts and adopted by the management of the Baltimore and Ohio Railroad. On September 1, 1926, the present system of technical training for apprentices was inaugurated on the Baltimore and Ohio.

Touching on the nature of the training, it is explained that:—

The technical training being given the apprentices is started along two general lines. On the one side, mathematics and general instructions; on the other side mechanical drawing. This training in the fundamentals takes the apprentices over a period of about two years' work, after which time they then branch out from this point into the subjects relating to their practical craft work, continuing to use the mathematical and drawing knowledge they have acquired in the solution of practical problems in connection with their shop work.

It was considered that the following up of these subjects by the technical training relating to each individual craft assures a well-rounded-out course of technical training for all apprentices estimated to be the equivalent of two years' training in a technical university.

In order to get young men to study and apply themselves sufficiently to assimilate this technical training, the Federated Shop Crafts have, in their desire to raise the craft standards, agreed with the management of the Baltimore and Ohio to make technical training a compulsory part of the young man's apprenticeship. Furthermore, "under the rules and agreements of the Federated Shop Crafts, those apprentices who fail to submit the required lessons eliminate themselves and are not retained in the service as apprentices."

In dealing with the method employed, the character of the Bureau supplying the lessons and the results obtained, the article continues as follows:—

The technical training is handled directly by the Chief of Motive Power's Office, and is directed by the Assistant Supervisor of Shops, a staff officer on the Chief of Motive Power's staff. A complete individual record is kept of each apprentice. His progress in his technical training as well as his shop work is entered monthy on his record card, and in this manner a check is had at all times on the individual performance of each apprentice. There is no guessing about it. The record maintained speaks for itself, and it is possible to ascertain at a glance the standing of each apprentice, the grades he is making, and whether he is a good, fair or poor apprentice.

It is interesting to know that the technical training being furnished the apprentices by the Baltimore and Ohio is being supplied through The Railway Educational Bureau of Omaha, Nebraska—an institution originally started by the late Mr. E. H. Harriman, a pioneer in the early railroad history of the nation. It was originally started as a part of the Union Pacific Railroad's organization, and later operated as a separate enterprise by Mr. D. C. Buell, who originally organized the bureau for the Union Pacific. Mr. Buell has been continuously and actively at the head of the institution, operating it as an independent school for the past sixteen years. It can thus be said that The Railway Educational Bureau was started by the vision of a railroad executive who, looking into the future, foresaw the necessity for the creation of an institution to which railroad men could turn in their quest for knowledge of a technical nature.

The Railway Educational Bureau is exclusively a railroad institution, specializing on railroad training in the several departments of a railroad, and engaging in no other training. Its entire staff is made up of practical railroad men who have devoted their lives to the work. Being men of practical experience in addition to their knowledge of the theory, they are peculiarly fitted to impart the necessary technical training to railroad men.

The Railway Educational Bureau sends the lesson papers to each apprentice by United States mail and the apprentices in turn study the lesson and submit written examinations back to the bureau by mail. The bureau corrects each examination, grades it and returns it to the apprentice. A grade of 75 per cent is necessary to pass, before the apprentice is credited with the lesson. The apprentice is required to send in two lessons each month. There are approximately 1,000 apprentices, so that the bureau handles 2,000 lessons each month from the apprentices on the Baltimore and Ohio.

The lessons are studied at home by the apprentices after regular working hours, there being no interruption to the apprentice's work in the shop.

There are three travelling apprentice instructors on the Baltimore and Ohio who devote their full time to visiting each station on the railroad where apprentices are employees. Each apprentice point is visited at least once a month. Instructors offer help and encouragement to all apprentices and do everything possible to add interest to the course. Help is offered to those who need it and special attention is given to any apprentice who is delinquent.

By and through this method is maintained the personal contact which is lacking in the ordinary correspondence school work, and which is proving very helpful on the Baltimore and Ohio. It has resulted in the period of nine months during which the training has been in effect, in having approximately 75 per cent of the apprentices ahead or on their schedule of two lessons per month. This, together with the fact that less than 5 per cent of the apprentices have been eliminated due to their being three months delinquent, means that educational history is being established on the Baltimore and Ohio.

TRADES AND LABOUR CONGRESS OF CANADA

Synopsis of the Proceedings of the 43rd Annual Convention

THE 43rd annual convention of the Trades and Labour Congress of Canada was held in Edmonton, Alberta, from August 22-26, the sessions being held in the Memorial Hall, a building erected by the municipality for the war veterans, and administered by the local branch of the Canadian Legion of the British Empire Service League. The opening proceedings were presided over by Ald. A. Farmilo, president of the Edmonton Trades and Labour Council, who welcomed the delegates on behalf of the organized workers of the city, his address outlining the principles of the labour movement and the progress which had been made in securing the passage of legislation in the interests of the wage-earners. The civic welcome was tendered by Mayor A. U. G. Bury, and that for the province of Alberta by Acting Premier Hon. Geo. Hoadley. Mr. Tom Moore, president of the Congress, replied to the various addresses, and in turn, on behalf of the executive council, welcomed the delegates assembled, and also thanked the local committee for the complete arrangements made for the holding of the convention.

The first order of business was the receiving of the report of the Committee on Credentials, which as finally adopted seated 267 delegates, the representation being divided as follows: International organizations which have affiliated the whole of their Canadian membership, 41 delegates; provincial federation of labour (Alberta), 1 delegate; trades and labour councils, 38 delegates; two system divisions of the Order of Railroad Telegraphers, 7 delegates, and 180 delegates representing local unions. Two fraternal delegates were also present, representing respectively the British Trades Union Congress and the American Federation of Labour.

Following the appointment of the various committees, an associate secretary, a messenger, a sergeant-at-arms and a translator (the business of the convention being conducted in both English and French), the report of the Committee on Rules and Order, defining the methods to be followed in the transaction of the work of the convention, was adopted.

Report of the Executive Council

Immediately following the organization of the convention the members of the executive council of the Congress presented a report of the many matters with which they had dealt during the year, the opening paragraph of which referred to the close co-operation of the membership of the Congress and the securing of the enactment of several measures long sought by organized labour. Other statements in the introductory remarks were as follows:—

> Organizing work has been carried steadily forward during the year, most affiliated international unions maintaining Canadian representatives constantly in the field, whose efforts have been supplemented by the special organizing campaigns carried on in many centres by the Trades and Labour Councils and local unions. These activities have made possible the securing of numerous upward revisions of wages and betterments in working conditions, especially for those workers employed in the better organized trades and callings, and also brought about a more general recognition by employers of the policy of collective bargaining.
>
> Though industrial activities have continued to expand, providing employment for larger numbers of workers than for the past several years, there has been a constant surplus of available labour, attributable largely to the unwarranted influx of immigrants to the industrial centres throughout the Dominion, and the fact that these beneficial changes have been obtained, notwithstanding this continued prevalence of unemployment, is a notable tribute to the effectiveness of proper trade union organization.
>
> By the formation, during the early part of this year, of the "All Canadian Congress of Labour" a number of those organizations which have sought to disrupt and divide our movement during the past several years have now combined their efforts with the same objects in view. Your Executive has countered their activities by making known at every opportunity their true purposes, exposing the fallacy of their arguments and the futility of their policies. It is pleasing, therefore, to report that, warned by past experiences, our membership has refused to give any aid or support to this new dual organization and that the vitality and solidarity of our movement remains unimpaired.

The report of the executive council consisted of 53 pages and was classified under various headings, the first of which referred to the legislative program which had been presented to the Dominion Government on December 16, 1926, and which included requests for legislation covering (1) Registration of union labels, (2) Old age pensions, (3) Senate reform, (4) Picketing and injunctions, (5) Electoral reform and Election Act amendments, (6) Immigration and emigration. The report also outlined certain matters which had been taken up with some of the departments of the Federal Government, and which among others included (1) Amendments to the fair wage regulations, (2) Amendment to the Industrial Disputes Investigation Act, (3) Amendment to the Civil

Service Act and the establishment of civil service councils, as well as an upward revision of letter carriers' salaries, (4) Amendments to the Shipping Act and the equalization of salaries throughout Canada of marine engineers employed by the Government, (5) that Federal office cleaners be paid on an annual salary basis as permanent employees and be given the same privileges as the latter, (6) that legislation be passed providing that railway employees be paid every two weeks.

Under section 2, headed "Legislation," report was made of the passage of union label legislation and the Old Age Pension Act, as well as some other matters in which trade unionists have shown particular interest, and which included the provision which the Minister of Labour had incorporated in the fair wage regulations covering the wages of pulpwood workers.

Under Section 3 the executive reported that in accordance with custom the provincial executive committees and federations of labour had submitted reports. These included reports from Nova Scotia, New Brunswick, Quebec, Ontario, Manitoba, Saskatchewan, Alberta and British Columbia, from which the executive compiled the following summary on the matters which had been dealt with by these adjuncts of the Congress during the past year:—

Eight-hour Day.—Requests for legislation to give effect to the Washington Convention on the Eight-hour Day were reiterated in New Brunswick, Quebec, Ontario, Manitoba, Saskatchewan and Alberta whilst British Columbia pressed for the extension and enforcement of the existing Eight-hour Day Law to all industries. In Alberta the Government Eight-hour Day Commission held a number of sittings during the early part of the year and submitted its findings to the Legislature, the Labour Member issuing a Minority Report favouring the enactment of this Legislation. No action was taken by the Legislature on this report.

Old Age Pensions.—Enactment of legislation to give effect to the Federal Old Age Pensions Act was asked for in Nova Scotia, New Brunswick, Ontario, Manitoba, Saskatchewan, Alberta and British Columbia.

The British Columbia Legislature passed an Act which enables the Provincial Government to enter into agreement with the Federal Government for the payment of old age pensions and the necessary regulations are now being prepared to give effect to this legislation in British Columbia.

The Manitoba Legislature passed a resolution expressing satisfaction with the Federal Act, reaffirming their belief in the principle of old age pensions, and authorizing their representatives to participate in any conference between the representatives of the Government of Canada and the Provinces, held for the purpose of considering necessary supplementary legislation.

Workmen's Compensation.—Increase in the weekly compensation to 66⅔ per cent of the amount of wages was asked for in Nova Scotia, New Brunswick and British Columbia. Payment of medical aid was requested in Nova Scotia, New Brunswick and Alberta. Varied increases in benefits to widows, children and other beneficiaries were urged in Nova Scotia, New Brunswick and Alberta. Nova Scotia requested compensation for frost bite and Alberta that strains, ruptures, and rheumatism, caused by conditions of employment, be added to the list of industrial diseases. Measures to facilitate the rehabilitation of injured workers were stressed in New Brunswick. Review of Board's decisions by an independent medical board in British Columbia and by the Lieutenant-Governor-in-Council in Alberta were requested. Reorganization of the Board was asked for in Alberta. In Quebec requests for a Compensation Act administered by a Provincial Board were reiterated.

Nova Scotia amended the Act to provide that payment to widows will not cease because of temporary removal from the province and also authorizing expenditure of twenty thousand dollars ($20,000) annually towards rehabilitating injured workers and for purchasing artificial limbs, etc., when necessary. Quebec postponed the coming into effect of the new Act of 1926 from April 1, 1927, to April 1, 1928, and announcement has since been made that further inquiry regarding the setting up of a Provincial Workmen's Compensation Board will be made in the interim. Ontario added caisson disease to the list of industrial diseases and consolidated Section 6 of the Act of 1915 as amended in 1917 and 1925, making clearer the rights of workers to receive compensation under the Act whilst temporarily employed outside the Province. Alberta passed amendments raising the age of dependent children to eighteen years and also raised the maximum annual payment to $1,250 per year. In Alberta and British Columbia committees were appointed to make full inquiry into the administration of the Act and to report to the next session of their respective legislatures.

Minimum Wage Act.—Nova Scotia requested appointment of a Board to administer the Minimum Wage Law for women which is already on the Statute Books. New Brunswick requested a Minimum Wage Act for women and children. Quebec asked that female employees in stores be included under the Act and that the Board be empowered to deal with hours of labour. Ontario asked for extension of Act to cover female help in hotels outside Toronto. Ontario, Manitoba and British Columbia requested extension of the Act to cover boys under eighteen and for stricter enforcement of provisions of the Act. Saskatchewan asked extension of the Act to cover all male employees and also that beauty parlour employees be placed under the Act. Alberta requested abolition of the population limit and province-wide application of the law. British Columbia asked for changes which would prevent violation of the provisions of the Act by trade schools and the posting in conspicuous places of orders of the Board.

Quebec issued its first order under the Minimum Wage Act covering female employees in laundries, dye-works, etc. In Saskatchewan barber shops and beauty parlours were brought under the control of the Minimum Wage Regulations. In British Columbia the Act was amended to provide that statements of em-

ployers as to wages, etc., must be made under oath, and that orders of the Board must be kept posted free from mutilation or defacement. The Board was also empowered to replace any order which has been in existence for one year without the necessity of holding a new conference. The Board was given power to enforce payment to employees of any difference between wages paid and the minimum wage rates.

Fire Fighters' Legislation.—Nova Scotia and Saskatchewan requested legislation establishing the two platoon system. Ontario asked for the consolidation of the Hours of Work (Fire Fighters) Act of 1920 and the Two Platoon Act of 1921. Ontario and British Columbia urged legislation which would give right of way to fire apparatus when making calls.

Nova Scotia passed a Two Platoon Act applying to all cities of 30,000 or over on condition that a resolution approving of the Act is passed by the City Council. Ontario passed an Act consolidating the Two Platoon and the Fire Fighters' Hours of Labour Acts. Saskatchewan passed a Two Platoon Act to come into effect after January 1, 1928, and to apply to every city of 10,000 or over unless a majority of the ratepayers have voted against its adoption before then. Deduction from pay by reason of adopting the Two Platoon System by municipalities is prohibited in both Nova Scotia and Saskatchewan, the latter province providing a penalty of from $10 to $100 for infringement of the law.

Mothers' Pensions.—New Brunswick and Quebec urged enactment of Mothers' Allowance legislation. Amendments to existing legislation were requested in Ontario and Manitoba to extend the provisions of the Act to mothers with one child, or mothers who had been deserted for stated periods, or whose husbands were confined to public institutions or who were physically unable to support the family. More sympathetic administration of the Act was also urged in those two provinces. Alberta asked for extension of the Act to mothers and dependent women over fifty years of age, and British Columbia for its extension to widows with or without children who are without adequate means of support, and for more liberal provisions to various other classes of women coming under the Act.

Saskatchewan amended the Act extending its provisions to the wife whose husband is confined to a tubercular institution and requiring that the husband of a beneficiary must have been a resident of the province at the time of death or disablement.

Factories Act.—New Brunswick asked that the Act be redrafted along the lines of the Ontario Act. Ontario urged amendment providing for a forty-four hour week with maximum of fifty-four and a half hours, including overtime for female employees, and other amendments establishing more uniformity with the Minimum Wage law respecting hours of labour, ages of employees, etc., and the extension of provisions to include certain lines of industries not covered by the Act.

Alberta asked for extension of the Act to include all factories; erection of fire escapes on all buildings of more than one storey; inclusion of drilling operations; adequate protection of workers employed where injurious and explosive gases are evaporated, and establishment of the eight-hour day. British Columbia requested regulations governing employment of children and women during the fruit packing and fish run seasons in these industries.

In Manitoba the Act was amended providing that regulations may be made by the Governor-in-Council covering manufactures and trades such as cleaning and pressing establishments in which gasoline or other inflammable materials are carried. These regulations may include the taking out of annual licenses. In Saskatchewan amendments were enacted providing for the use of mechanical devices for purpose of removing gases, etc., from atmosphere of work rooms. Alberta amended the Act to bring oil and gas drilling under its provisions. This only becomes effective upon proclamation of the Governor-in-Council. Amendments to the British Columbia Act provide that no child under fifteen years may be employed in any factory, except on written permit and then not for a period exceeding six hours per day. Overtime by women and girls in fish canning and fruit curing industries is made conditional upon written consent of the workers involved, or their parents.

Fair Wage Regulations.—Quebec asked that fair wage schedule be included in government contracts and undertakings subsidized by the Government. Ontario requested strengthening and enforcement of regulations, while Alberta urged the adoption of a fair wage clause to be inserted in all Government contracts.

No action was taken by the several provinces on this matter.

Unemployment and Unemployment Insurance.—Ontario and Alberta requested the undertaking of public works as a measure of relief and the enactment of unemployment insurance legislation. Alberta asked that relief work be paid for at trade union rates.

The Manitoba Government appointed a commission to inquire into the causes of and remedies for seasonal unemployment.

Injunctions in Labour Disputes.—Ontario, Saskatchewan and Alberta requested legislation preventing the granting of injunctions and to legalize peaceful picketing during industrial disputes.

None of the provinces took action with respect to this important matter.

The numerous other requests brought to the attention of the provincial authorities dealt with various phases of such important matters as Ratification of Conventions and Recommendations of the International Labour Organization; Abolition of Trade Schools; Abolition of Military Training in Schools; Public Health and Industrial Hygiene; Education; Discontinuance by the Ontario Government of grants of prison made clay-products, in lieu of money, to public institutions; General safety measures; Immigration and Colonization; Election Act Amendments; Juvenile employment; Abolition of private detective and employment agencies; Public ownership of public utilities and labour representation on public boards and commissions; Freedom of Association, Education, etc., etc.

Favourable legislation enacted and not referred to in the foregoing summary included: Amendments to the Mines Act in Nova Scotia, New Brunswick, Quebec, Manitoba and Alberta; Amendments to the Mechanics Lien Act in Nova Scotia, New Brunswick and British Columbia; Motor Vehicles Act in Nova Scotia; Liquor Control Act in Ontario and New Brunswick; Election Act in New Brunswick and Quebec; Steam Boiler Act in Saskatchewan and Alberta;

Amendments to the Masters and Servants Acts in Manitoba and Saskatchewan; Child Welfare Act in Manitoba and Saskatchewan; Technical Education Act in New Brunswick and the Public School Act in British Columbia providing for combining school districts and the establishment of technical schools therein; Stationary Engineers Act in Ontario; Consolidation of the Employment Agencies Act; Children's Protection Act and the Public Health Act in Ontario; Amendments to the Superannuation Acts of Ontario, Saskatchewan and British Columbia; Amendments to the Town Act of Saskatchewan dealing with closing of shops on half holidays and an amendment to the Towns and Villages Act in Alberta gives right to vote to tenants in certain municipalities in municipal elections.

In Manitoba a Bill providing for a periodic rest day was introduced but failed to pass; the matter, however, was referred to the Bureau of Labour with instructions to make a thorough investigation and present recommendations before the next session of the Legislature. A Bill providing for the settlement of industrial disputes and to amend the Minimum Wage Act also failed to pass.

In Alberta a resolution aiming to abolish cadet training in the province was adopted by a committee of the House, but debate on the matter was adjourned before a vote was taken in the Legislature. Collective bargaining on railways and hours of labour for government employees were also subjects of resolution in Alberta, being withdrawn, however, on assurance being given by the Government that the matters referred to would be remedied.

A Committee of the British Columbia Legislature was appointed to investigate the administration of the Workmen's Compensation and Mother's Allowance Acts and report to the next session of the House.

Section 4 of the report stated that the congress is affiliated with the International Federation of Trade Unions, the Women's Trade Union League of America, the American Association for Labour Legislation, the American Association of Political and Social Science, the Canadian Council on Child Welfare and the League of Nations Society of Canada. It was also reported that the congress through its representatives had co-operated in the work of the International Labour Organization; Research Council of Canada; Dominion Council of Health; Dominion Fire Prevention Association; National Safety League, and the Ontario and Quebec Sections of the League; the Employment Service Council of Canada; the Frontier College; the National Council of Education; the Canadian Social Hygiene Council, and the Canadian Engineering Standards Association. Synopses of the Proceedings of the meetings of some of these societies were embodied in the report.

Section 5—"International"—contained reference to the manner in which the American Federation of Labour had co-operated with the executive in regard to organization work in the Dominion. It was stated that the congress had a fraternal delegate at the convention of the French Federation of Labour in Paris in the person of Mr. Geo. Brunet, fraternal delegate to the British Trades Union Congress, who also was the representative of the Congress at the convention in Paris of the International Federation of Trade Unions. Report was given of the annual conference of the International Labour Organization, at which the delegate for the work people was Mr. P. M. Draper, secretary of the Congress, Mr. J. T. Foster, vice-president of the congress, being adviser.

Section 6, under the caption "Workmen's Compensation," gave a brief review of the efforts to secure adequate workmen's compensation, and reported on a conference of labour representatives which had been held with a view to framing desired amendments to the Ontario Workmen's Compensation Act. This conference prepared a report of 20 pages on the subject in which 21 recommendations seeking changes in the act were submitted. This report the executive council recommended, along with such other evidence as is available from investigations in other provinces, be referred to a special committee for consideration "in order that the greatest possible degree of uniformity throughout the Dominion may be assured in the changes recommended as necessary to be made in the respective provincial acts."

Section 7—"Union Labels"—outlined the efforts made to secure protection for union labels and again referred to the passage of the desired legislation.

Section 8—"Technical Education"—called attention to the approaching expiry of the Federal grant towards technical education and recommended the executive council and provincial executive committees to press for a continuance of support and development of technical education in the Dominion.

Section 9—"Police Unions"—referred to the situation existing in Montreal as a result of a decision of the Supreme Court upholding the city in its opposition to the police maintaining a union. The executive stated that the Montreal Police Union is entitled to the greatest commendation for its defence of the right of association, and endorsed the issuing of a proposed appeal for financial assistance to aid in taking the case to the Privy Council. (The Privy Council subsequent to the writing of the report of the executive council refused to grant the union the right of appeal.)

Section 10—"Apprenticeship"—advised of the formation of the Ontario Apprenticeship Council of the Building Trades and gave an outline of the system which those interested had adopted for the training of apprentices in the building industry.

Section 11—*"Canadian Congress Journal"*—pointed out that the publication was now self-sustaining; that a new policy of accepting bulk subscriptions from local unions and trades and labour councils at a reduced rate had been introduced, and labour bodies were urged to take advantage of this offer.

Section 12—"Migration"—stated that the efforts to secure certain alterations in the Immigration Act had not been successful. The matter of prohibition of contract labour had received the endorsation of the Employment Service Council and the Minister of Labour had demonstrated his desire of finding some means of giving effect to the same. The recommendations respecting medical examination of immigrants at port of embarkation received the endorsation of the advisory council to the Department of Health and arrangements were being made to put this into effect. It was stated that the agreement entered into earlier in the year between the railway companies and the Government giving the first-named a free hand to recruit and import farm labour from Central European countries had led to an influx of these immigrants to such an extent that complaint had been made not only by organized labour but by municipal councils and provincial governments. Consequently the Government had issued orders for the suspension of admission of this class of immigrant for the time being. It was further stated that this action will not solve the problem as to what can be done with these and other unemployed people, "and the Government should be impressed with its responsibility of assisting the provincial and municipal authorities in providing for their maintenance." Reference was made to the action of the United States Government in giving a stricter interpretation to the immigration laws, whereby all except native born Canadians or those who could qualify under the quota regulations of the country of their birth, would be debarred from continuing the practice of crossing daily into the United States to follow their occupations. Every effort was made by the executive to secure modification of the order and for equal recognition by the United States authorities of all bona fide Canadian citizens irrespective of their place of birth. Some modifications of the original order had been secured, the time of the order becoming fully effective having been extended to December 1, 1927, and in addition the quota numbers have been increased which permits compliance with the law by a greater number of non-native born Canadian citizens. The executive stated that the right of the United States Government to impose such regulations was fully conceded, but nevertheless this should be exercised with due recognition to long established practice and of the friendly international relations existing with Canada. It was also stated that the right respecting the entry of workers into Canada undoubtedly rests with the Canadian Government, and the executive did not know of any reason why similar restrictions should not be applied to workers entering Canada from the United States.

Section 13—"Canadian Coal"—stated that coal mining in Canada still remains largely a seasonal occupation with the result that large numbers of miners annually suffer from unemployment. To overcome this condition representations have been made to the Federal Government to adopt a policy which would encourage greater use of Canadian mined coal. The Congress has declared in the past in favour of nationalizing the coal industry, so that production of coal might be carried on in the interests of the community instead of for private profit. It was pointed out that the Dominion Government had continued to pay bonuses on transportation of coal from the eastern coal fields to Quebec and Ontario points and also provided for assistance to coking plants. These measures, the executive stated, while commendable had not reduced the volume of unemployment, especially in the Western coal fields, and it was again declared that the problem is one of national importance demanding the closest co-operation between the Federal and Provincial Governments with a view to ensuring a larger distribution of Canadian coal at reasonable prices and more regular employment for the workers in the industry.

Section 14—"Old Age Pensions"—reported the passage by parliament of the Old Age Pensions Bill, and recommended that each of the provincial executive committees urge the immediate enactment of legislation so as to enable the statute to be applied within their respective provinces.

Section 15 dealt with a number of miscellaneous matters which had engaged the attention of the executive council, as well as reporting on some incidents of interest to the organized workers, and included the following subjects: (1) the contributions of the affiliated bodies forwarded by the Congress to aid the British Miners amounted to $3,123.26; (2) satisfactory wage adjustments were secured for members of the National Association of Marine Engineers employed by the Department of Marine, and the Government also complied with the request of the Congress that subsidies be discontinued to the Royal Mail Steam Packet Company for the West Indies service and the transference of this service to the Canadian Government Merchant Marine; (3) the reinstatement of

employees by a certain paper company which agreed to discontinue any discrimination against any worker because of his membership in the union; (4) support to the letter carriers in their efforts to secure improvements in their conditions of employment; (5) the conclusion of the report of the executive referred to the harmony existing in the ranks of the affiliates, and pointed out that this unity was evident in the legislation obtained during the year.

Reports were also submitted by the fraternal delegates to the American Federation of Labour and the British Trades Union Congress, each of which referred to the more important matters which had engaged the attention of the conventions of these bodies.

Report of Committee on Officers' Reports

The report of the Committee on Officers' Reports, to which the above reports with the exception of the sections on Workmen's Compensation and Union Labels, were referred, directed the attention of the delegates to the optimistic tone of the preamble to the report of the executive council, and noted with satisfaction the spirit of unity and co-operation manifested, expressing the hope that this spirit would continue to permeate the international trade union movement in Canada. Referring to the formation of the All-Canadian Congress of Labour the committee did not regret "the concentration of the so-called national unions in one organization," but on the contrary expressed the opinion that it is desirable "that those who would disrupt our movement should be on the outside and in the open." The Committee further stated that the records indicate a tendency towards international unionism in Canada, and declared that during the past year considerable numbers of workers had returned to international trade unions. The Committee noted with satisfaction the passage of legislation protecting union labels and the Old Age Pensions Act, and agreed with the executive council in urging the various adjuncts of the congress in the various provinces to secure enabling legislation. The Committee approved of the energy displayed by the executive council in its efforts to secure desired legislation and agreed with the various recommendations contained therein.

The Committee recommended a careful study of the legislative reports submitted by the Provincial executive committees and the federations of labour, which contained representations made to the various provincial legislatures and a record of legislation passed at the recent sessions of these bodies. The report of the committee, several items of which created considerable discussion, was adopted, as was also a recommendation that the delegates study reports of the fraternal delegates.

Report of Secretary-Treasurer

Mr. P. M. Draper, the secretary-treasurer, submitted a report of the financial transactions of the Congress during the past fiscal year. The balance on hand September 1, 1926, was $3,826.89; the total receipts during the fiscal year, including the revenue from the congress building in Ottawa, was $27,759.25; total expenditure was $22,330.07, leaving a balance of $5,429.18.

The membership on which *per capita* had been paid numbered 114,362, an increase of 11,325 over the membership reported in 1926. The secretary pointed out that if the members out of employment owing to strikes and other temporary causes were counted these figures would be increased by at least an additional 15,000. Seven charters had been issued to federal unions and the Cloth, Hat, Cap and Millinery Workers' International Union had affiliated its Canadian membership, making 57 international organizations now in affiliation. The report was referred to the Audit Committee which subsequently recommended its adoption, a course approved by the convention.

Grants to Fraternal Delegates

The Committee on Ways and Means recommended that $400 be granted to the fraternal delegate to the American Federation of Labour and $800 to the representative to the British Trades Union Congress, also that the executive council be authorized to pay all other incidental expenses in connection with the convention. These recommendations were adopted without discussion.

Union Labels

References to the union label in the report of the executive council were referred to the Committee on Union Labels, which in reporting stated: "It is indeed gratifying to note that after more than thirty years of effort on the part of the Trades and Labour Congress of Canada and the union label trades organizations amendments to the Trade Marks and Designs Act have now been enacted which permits the legal registration of union labels, shop cards and buttons. In this connection we call your special attention to the following paragraph in the executive council's report. "By the enactment of this law, international unions are now able to establish ownership of their labels and are in a position to protect them from fraudulent use and counterfeit and thus

ensure that the money spent in securing patronage of union label products will in future benefit only employers properly entitled to use such labels." It is pleasing to also record that the Canadian law in this respect is the most advanced legislation of its nature on the North American continent. As the report well points out this desirable legislation was only secured after much effort, and the officers of the Congress are deserving of considerable credit for the tactful and diplomatic manner in which they handled the problem. Your committee also believes that the thanks of the convention should be extended to (a) The Union Label Trades Department of the American Federation of Labour for its financial assistance and the hearty co-operation of its officers; (b) The Hon. Peter Heenan, Minister of Labour, who sponsored the bill in the House of Commons; (c) Officials of the Department of Labour for their assistance and co-operation, especially when the bill was before the Banking and Commerce Committee of the Senate; (d) The Hon. G. D. Robertson and Hon. J. D. Taylor for their activities while the measure was before the Upper House; and (e) Mr. G. W. Bell, K.C., M.P., who first introduced the bill in Parliament in 1926."

The committee recommended, in view of the above legislation, which gives ample protection to union labels and fair employers, that label campaigns be inaugurated in every locality and pushed with all possible vigor.

The committee commended the Executive Council for creating a Canadian Advisory Council on Union Labels and believed that same should be continued.

Pleasure was expressed at the *Canadian Congress Journal* giving considerable publicity to union labels during the past year and it was recommended that this policy be continued.

The committee reiterated the recommendation of last year to the effect that the incoming executive council give consideration to securing space for a union label booth at the Canadian National Exhibition in Toronto.

The committee noted that another label trade, the Cloth Hat and Cap Makers' International Union had affiliated its entire Canadian membership to the Congress.

The committee did not believe it necessary to enumerate the various union labels, shop cards and buttons, but would point out that the union label, shop card and button are the only guarantees of union conditions.

Attention was directed to the innovation of the Vancouver Trades and Labour Council in having a common quarterly button for its affiliated membership. The committee recommended that this system be drawn to the attention of the various trades and labour councils in the Dominion.

The committee also recommended in view of most of the provinces now operating the liquor business under a system of government control that all assistance be given the brewery workers in their efforts to organize the workers in this industry and in the protection of the workers already organized in this trade.

After a general discussion on union labels the convention adopted the report.

Workmen's Compensation Legislation

In accordance with the recommendation of the executive council a special committee on workmen's compensation legislation was appointed, to which were referred five resolutions on the subject, as well the report of a conference which had considered amendments to the Ontario Workmen's Compensation Act. Three of the resolutions submitted to the committee requested that the Quebec Government be asked to put the compensation act of that province into effect. With those the committee recommended concurrence. The committee also approved of a resolution asking that the Workmen's Compensation Board of Ontario empower some one to enforce the various clauses of the said act in regard to the protection of workmen both before and after an accident. Another resolution sought to secure the discontinuance by the Canadian National Railways of the practice of deducting money from men not allowed to join the permanent insurance fund, and who are covered by the Compensation Act when injured. To overcome this the Committee suggested that the end desired would be realized by the inclusion in schedule 1 of the workers now in schedule 2 of the Ontario Workmen's Compensation Act.

The Committee referred with satisfaction to the thoroughness with which the Special Committee on the Ontario Workmen's Compensation Act had performed the task committed to them by the representative conference in Ontario, which had been called by the Executive Council of the Congress. The Committee stated that they had carefully considered the findings and recommendations of this Committee and urged their adoption. It was also recommended that the Committee continue to co-operate with the Ontario Executive Committee of the Trades and Labour Congress, and that joint action be taken in urging upon the Ontario Government the necessity of making the legislative changes recommended and upon the Ontario Workmen's Compensation Board the necessity of administering the Workmen's Compensation Act in conformity with the recommendations

The report of the Committee continued as follows: In complying with the recommendation of the Executive Committee as set forth in their report your Committee has carefully considered the question of uniformity of Workmen's Compensation legislation in the respective provinces of the Dominion. With a view to assisting in the attainment of desired uniformity of legislation, your Committee thoughtfully reviewed a number of fundamental principles involved in Workmen's Compensation legislation and submit the following for your endorsation as being possible of realization in all the provinces of the Dominion:—

General Principles.—"With a view to ensuring equitable compensation for injured workmen and to the dependents of those fatally injured and having regard to the desirability of reaching uniformity throughout Canada, as far as may be practicable, on the general principles of workmen's compensation legislation, the scales of compensation payments and in the administration of such legislation, your Committee recommends early action to secure the following:—

1. Workmen's compensation legislation in all provinces in Canada based on the collective liability or State insurance system, administered by a Board or Commission of at least three members, one of whom must be a representative of organized labour. All employers within the scope of such legislation to be required to contribute to the accident fund out of which compensation and medical aid are payable; no contribution to such fund to be made by workmen.

2. Compensation for total or partial disability to be based on the average earnings at the time of the accident of at least two-thirds of such average up to at least $2,500; provided that the minimum amount of compensation shall not be less than $15 per week unless the wages were less than $15, in which case the compensation shall be one hundred per cent of the wages.

3. That the scales of compensation for dependent widows be at least $50 per month with an additional payment of $12 for each child under sixteen years of age; when children only, are dependants, a monthly payment of $15 for each child under sixteen years of age; compensation to dependent children to be continued for educational purposes for a longer period at the discretion of the Board.

4. Compensation should cover all accidental injuries and industrial diseases arising out of or in the course of employment.

5. That with a view to the prevention of accidents or industrial diseases Provincial Governments and Compensation Boards be urged to promote and organize accident prevention associations, preferably with the cooperation of the employees or their representatives, and that a more rigid supervision be maintained by Government inspectors of a hazardous nature.

6. That practical measures be taken by Compensation Boards to ensure more prompt reports of accidents from employers, workmen and the attending physician.

7. That in all cases of the review of a claim where the right to or amount of compensation may be involved, the injured workman shall, if dissatisfied with the decision of the Board, be given the right of examination by an independent medical board of at least two physicians satisfactory to the claimant, such Board to have the right to review the files in the case.

8. That efforts be made to provide, in all Compensation Acts, for the rehabilitation of permanently injured workmen.

9. That representatives of labour throughout Canada be urged to oppose the creation of Appeal Boards set up for the purpose of making final decisions on clamis for compensation, thus closing the door to a further review of such claims.

10. That when injured workmen have been awarded total disability compensation, same should be continued until he is able to resume his former occupation or has been offered other suitable and equally remunerative employment, and that if such injured workman has suffered a permanent partial disability, but upon the report of the attending physician is able to do light work the total disability payments should be continued until suitable employment is provided.

11. That legislation be obtained making it compulsory on the part of physicians to report to the workmen's compensation boards all industrial diseases."

The Committee also pointed out for the information of the delegates that in seeking uniformity of legislation in the respective provinces they are carrying out the desire expressed by the National Industrial Conference held in Ottawa, September 15-20, 1919. This Conference emphasized the "necessity for uniformity of law relating to the welfare of those engaged in industrial work in the several provinces" and outlined the plan for an interprovincial conference thoroughly representative of all the provinces to consider uniformity of legislation such as the

Workmen's Compensation Acts in the different provinces.

After a lengthy discussion on the report, which was considered seriatum, it was adopted unanimously.

Refused to Enlarge Executive

A resolution was submitted which sought to increase the number of vice-presidents from three (the present number) to one for each province which has affiliations with the congress, these to constitute the personnel of the executive council. This resolution was referred to the Committee on Constitution and Law, which recommended that, owing to the expense which would be involved in providing for meetings of the executive the proposal be not approved. After a lengthy discussion, the recommendation of the committee was adopted.

Another resolution referred to the same committee was one asking that the railroad fares of all delegates attending future conventions of the congress be pooled. This was also reported against, and the convention without discussion adopted the report.

Notification that Strike Exists

The Resolutions Committee considered and reported on 63 resolutions, most of which, sometimes with slight amendments, were adopted. The first resolution reported desired legislation "providing that where a strike exists and the employer advertises in the press for labour he shall be required to set out in the advertisement that a strike does exist." The resolution was approved, as was also a demand for the complete abolition of all private fee-charging employment agencies in the province of Quebec.

The convention also concurred in resolutions (1) opposing institutions supported by public subscriptions and other donations supplying persons to perform temporary work, and (2) making it compulsory for employers and others seeking the importation of labour to first consult the Employment Service of Canada, and no importation to be allowed unless the said service is unable to supply the class of workers required, and consents to importation.

Education in Quebec

Once more the congress endorsed a request that the Quebec provincial executive committee should petition the Quebec Government to adopt the following:

1. Free and compulsory education.
2. Compulsory and uniform tuition of the French and English language in all schools of the province.
3. All text books to be issued by the Government upon the recommendation of the Boards of Education and to be sold at cost price, pending their free distribution to scholars.
4. All school books to be uniform throughout the Province, this being one of the principal requirements for proper education.
5. All courses in the Provincial Government schools, technical and others, to be given free of charge.
6. No person to be permitted to teach in any school who is not the owner of a normal school diploma, except in the case of primary courses, such as those given in kindergartens, technical schools, and similar institutions.
7. That all persons under the age of twenty-one working in factories, workshops, or any other place of employment, who are not able to read and write one of the two languages of this country fluently, be compelled to attend evening classes.
8. The laws governing education be amended by the Provincial Government to provide for a minimum salary for school teachers in keeping with the cost of living and to permit the prosecution of school commissions who pay less than said minimum salary.
9. A Minister of Education to be appointed whose duties should consist in supervising the proper administration of school commissions, the enforcement of the program of education adopted by the Provincial, Catholic and Protestant Boards of Education and all other rules and regulations pertaining to education.

Fair Wage Regulations

A resolution, the preamble to which set forth that notwithstanding that the Quebec Government had adopted a resolution designed to guarantee to all workers employed on Government contracts fair and equitable wages, it was difficult to enforce its provisions owing to the lack of proper safeguards, instructed the Quebec provincial executive to endeavour to secure for the workers employed on Provincial Government contracts the same protection as given in the regulations governing Federal Government contracts.

Another resolution, which was also adopted, requested the following additions to the Fair Wage regulations regarding Dominion Government contracts.

(1) That the representatives of the Labour Department be empowered to make at any time they feel justified in doing so an inspection of the books, lists of employees, payrolls and working hours, without first having to obtain the Minister's permission, as at present.

(2) That the representative of the Department of Labour be empowered to take immediate action, without referring to the Minister, should any violation of the establishment conditions be proved to his satisfaction.

(3) That a provision be added to the regulations to allow representatives of the workers employed, where such an organization exists, to visit the work.

Endorse the Five-Day Week

Resolution No. 10 declared that owing to the improved methods of production by machinery and specializing of labour large numbers of workers are continually unemployed

without any hope of steady employment until hours are shortened, the resolve being:—

That this convention adopt the five-day (40-hour) week, and that they recommend to affiliated bodies that an attempt be made to put this in operation in the near future. Those failing to accomplish this before the next convention of the Congress to be requested to state what efforts have been made and their reasons for failure.

The Resolutions Committee recommended that the resolve read as follows: "That this convention go on record as endorsing the principle of the 5-day 40-hour week, and urge all affiliated bodies to do their utmost to put it into effect."

Delegate Buck of Toronto, moved that the resolution be referred back to committee to incorporate a demand that there should be no reduction in pay where hours are shortened.

A discussion ensued, in which it was pointed out that the congress could take no action other than making a recommendation as the matter was one with which only the affiliated bodies were competent to deal. The motion to refer back was defeated and the recommendation of the committee adopted.

Hours of Labour and Conditions of Employment

Under this heading the convention approved of legislation in the province of Quebec whereby employees in the mechanical department of the theatrical industry would be allowed one day's rest of 24 consecutive hours per week in all theatres operating seven days a week.

Approval was given (1) to a request that Federal office cleaners be paid on an annual salary basis as permanent employees, including privileges of sick leave and holidays with pay and superannuation; (2) Urging the Government to instruct the Civil Service Commission to make a re-classification of the letter carrier service "so that adequate salaries may be paid"; (3) Asking the Congress to urge the Dominion Government to remove from the Civil Service Act the section giving power to the Civil Service Commission to set salary schedules. The convention endorsed a resolution in favour of a complete revision of the Canada Shipping Act and also approved of amendments to the Ontario Factory Act and the regulations of the Ontario Minimum Wage Board with a view to securing better protection for the workers.

Endorsation was given to a request that the Bankruptcy and Winding-Up Acts be amended so that in all cases where a firm becomes insolvent that claims of employees for wages and salaries be given priority over all other creditors.

The B. & O. Plan

The following resolution asking for the condemnation of the union-management co-operative plan (commonly referred to as the "B. & O. Plan" by reason of its original introduction in the shops of the Baltimore and Ohio Railroad) was introduced by West Edmonton lodge No. 448 of the Brotherhood of Railway Carmen and Edmonton Lodge No. 546 of the International Brotherhood of Blacksmiths and Drop Forgers:

Whereas, at the inception of the Co-operative (B. & O.) Plan in the shops of the Canadian National Railways, the railway shopmen were assured that it would stabilize their employment and increase their earnings without causing reductions in staff; it being argued rather that its operation would lead to the employment of even more shopmen, and whereas, since the plan went into operation the C.N.R. has handled more freight, earned more revenue and made greater profits, but has actually reduced shop forces so, that the total shop pay roll gets smaller in spite of the increase in the amount of work, and whereas, two years' experience of the so-called Co-operative Plan has shown very clearly that its effects are exactly the opposite to what were claimed, therefore be it resolved, that this convention of the Trades and Labour Congress of Canada repudiate the Union Management—Co-operative Plan now in operation in the shops of the C.N.R., and likewise condemns all such collaboration schemes as attempts to pervert trade unionism and to subordinate our organizations to the interests of the employing class.

The Resolutions Committee recommended that as the matter was not within the jurisdiction of the congress, the resolution be nonconcurred in.

Delegate R. J. McCutcheon, of Winnipeg, said that the resolution, although presented by the local lodge of the B. of R. C., had really been prepared by the Communist Party, and was not in accordance with the facts.

Delegate Tim Buck, of Toronto, declared that the B. & O. plan was a contradiction; that there had not been any benefits to the employees, all the advantages being to the railways.

Delegate J. Corbett, of London, replying to the previous speaker, said the federated shop trades were quite able to take care of themselves, and did not need to have the Communist Party looking after their affairs. When the men in the shops did not want the B. & O. plan they would just stop co-operating.

Delegate R. J. Tallon deplored the bringing of the matter into the convention of the congress, it being purely a question for the men affected to discuss. He extolled the B. & O. plan as it had been of much advantage to the employees.

Other delegates also spoke approvingly of the plan, after which the recommendation of the committee was adopted.

Subsequently Delegate McCutcheon declared that the attack on the co-operative plan was a part of the program of the Cummunist Party, and therefore did not believe that the proceedings of the convention should give prominence to such propaganda. He accordingly moved that the resolution be not printed in the minutes. This was also adopted.

Health and Safety

Under this heading was included a resolution which pointed out that several fatalities had occurred in Ontario owing to unprotected electrical appliances. The convention concurred in a request that legislation be enacted to force the various power companies to provide safety for employees and the public.

Approval was given to the following requests: (1) Amendment to the Quebec Scaffolding Act to compel all cities and towns to adopt the said act and appointment of the necessary inspectors to insure its enforcement; (2) Insertion in the statutes of Quebec of a law covering the erection and operation of hoists; (3) That only qualified boiler makers, recognized by their employment as such, be appointed as boiler inspectors; (4) Amendments to the Quebec Stationary Engineers' Act providing for the employment of qualified persons to operate all internal combustion, ammonia or compression engines, steam or electric elevators; (5) Requiring that motor certificated engineers be employed on all vessels propelled by internal combustion engines; (6) That all persons employed as moving picture machine operators in Quebec should be thoroughly skilled in the working of mechanical and electrical apparatus and devices used in or connected with the operation of moving picture machines; (7) That efforts be made to have laws enacted to require the licensing of barbers in the province where no such statute has been adopted. The convention also reaffirmed the action of the 1926 convention in regard to trade schools, which declared that such institutions should be under the supervision of provincial governments and guidance of the education departments so that fixed regulations may be made as to methods of teaching and period of apprenticeship.

The convention also concurred in resolutions; (1) In favour of the fullest co-operation of the Congress with the Dominion Fire Prevention Association; (2) Against the manufacture or making of clothing for commercial purposes in the homes of wage earners; (3) In favour of legislation to provide proper protection to operators of spraying machines; (4) In favour of wrapping in wax paper of all bread before leaving the bakeries.

Immigration and Colonization

There were seven resolutions presented under the above heading, five of which the Resolutions Committee reported were covered by the report of the executive council and recommended that the executive be instructed to continue to press to have the policy of the congress on immigration and emigration as adopted by the Ottawa convention of 1925 put into effect. Considerable discussion took place on this subject, but no amendment was made to the recommendation of the committee, which was adopted. The committee submitted a substitute for a resolution in reference to the Alien Labour Act, which as adopted, was as follows: "That the Dominion Government have the administration of the Alien Labour Act placed under some responsible minister of the crown."

The convention also approved of a resolution requesting that a clause be inserted in the Immigration Act to the effect "that any company, corporation, society, association, person or party, or agents for the same, soliciting to bring immigrants into Canada shall be responsible financially for the said immigrant for not less than one year."

Minimum Wage

A resolution presented by the Quebec Provincial Council of Carpenters pointed out that the women's Minimum Wage Act only covers a few industries, and asked that representation be made to the proper authorities with a view to having the provisions of the act extended to all industries and commercial establishments. This was approved without any debate.

Old Age Pensions

There were two resolutions presented on the question of old age pensions, one from the Montreal Trades and Labour Council and the other from the Quebec and Levis Council, both of which urged the passage of legislation by the Quebec Legislature with a view to having the Old Age Pension Act made applicable to the citizens of that province. The Resolutions Committee amended one of the resolutions so as to cover all of the provinces, and with this change it was adopted.

Unemployment Insurance

A resolution was submitted on the subject of unemployment and sickness insurance, in which it was suggested that the Trades and Labour Congress should consider the advisability of holding a national convention for the purpose of determining the best methods to secure the necessary legislation by Federal and provincial parliaments. The Resolutions Committee recommended a substitute resolu-

tion to the effect that the congress reiterate its former stand, which is that the executive continue to press for unemployment insurance. This was approved.

Favour Peaceful Picketing

The following resolution asking for country-wide protest meetings to impress the Government in the matter of amendments to the Criminal Code was presented by Toronto Branch No. 40 of the International Fur Workers' Union.

Whereas, in spite of the representations of the executive committee of the Trades and Labour Congress of Canada, the Dominion Government refuses to introduce legislation for the amendment of Section 501 of the Criminal Code such as will legalize peaceful picketing in Canada, and whereas, there is a widespread realization that the existing conditions militate against effective strike action by the organized workers of the Dominion of Canada in their efforts to improve their standards of living. Be it, therefore, resolved, that in order to rally and crystalize the working class sentiment on this question, to impress the organized workers with the serious position of the trade union movement, and to impress the Dominion Government with the seriousness of Labour's demand, the Trades and Labour Congress of Canada name a day in the immediate future on which trade unions throughout the country shall organize protest meetings and forward demands to the Dominion Government for picketing to be regarded as legal in Canada.

The Resolutions Committee recommended the deletion of the resolve and the substitution of the following: "Resolved, that the executive council of the congress continue its efforts to secure the desired amendments to this law."

Delegate Tim Buck, of Toronto, opposed the report of the committee, while several other delegates spoke strongly against the proposal of holding protest meetings. The resolution as amended by the committee was adopted.

Favour the Organization of Women

The convention approved of a resolution urging all international unions and central bodies to co-operate in the immediate initiation of organization campaigns, particular attention to be given to the organization of unorganized female workers.

The convention also adopted a proposal in favour of bringing the young workers into the ranks of organized labour.

Approval was also given to a resolution instructing the executive council of the congress to bring to the attention of the various affiliated international organizations the question of co-operating in an endeavour "to build up the membership and offsetting the false propaganda that is being directed against the international trade union movement."

Trade Union Unity

The question of trade union unity was again brought before the convention in the following resolution which was introduced by West Edmonton Lodge 448, Brotherhood of Railway Carmen of America; Toronto Branch 40, Fur Workers' Union; Edmonton Branch 546, Blacksmiths, Drop Forgers and Helpers:

Whereas, the Trade Union Movement of Canada is weakened by division into Catholic, National, A. F. of L., and Independent International groups, and whereas, the only method by which this weakness can be overcome is by the unification of all these groups into one all inclusive trade union centre that shall embrace every functioning trade union organization regardless of jurisdictional claims similarly as does the British Trades Union Congress; Therefore be it resolved, that as a step towards unity in the Canadian trade union movement, this convention of the Trades and Labour Congress of Canada extends fraternal greetings to the national unions organized in the All Canadian Congress of Labour, and urges that these two National centres, i.e., the Trades and Labour Congress and the All Canadian Congress shall immediately open negotiations for amalgamation, and be it further resolved that this convention of the Trades and Labour Congress of Canada invites the All Canadian Congress of Labour to co-operate with us in convening an all-inclusive conference of Canadian trade union organizations for the purpose of considering the furtherance of national trade union unity in Canada.

The Resolutions Committee recommended non-concurrence in the proposal, a similar recommendation having been adopted at the 1926 convention when a resolution along somewhat the same lines was introduced.

Delegate Tim Buck urged that the delegates give the matter some attention. More time and energy, he declared, were spent in fighting among themselves than in fighting the bosses. He believed the working class would respond to a movement for unity. The delegates apparently were in no mood to discuss the matter, the previous question being promptly called for and adopted, as was also the report of non-concurrence in the resolution. Subsequently a demand was made to have the matter re-opened for discussion, but the convention did not approve. Under another resolution, however, several opponents of the proposal for a conference were given an opportunity of offering strong criticism of the actions of officers of some of the organizations now in the All-Canadian Congress of Labour in setting up dual bodies in an endeavour to disrupt the old-established trade unions.

Oppose Interference in China

Another resolution introduced by Toronto Branch No. 40 of the International Fur Workers' Union, which among other things

declared that "the Chinese people are waging a valiant struggle for their national independence and against the brutal oppression of the foreign Imperialists," and that "the toiling masses of China demand that the Imperialists get out of China and let the Chinese people develop freely their own lives and manage their own affairs," demanded (1) The withdrawal from China of the Imperialists and their armed forces. (2) The cancellation of all treaties humiliating to China and the cancellation of the extra territorial rights for foreigners. (3) Recognition and treatment of Nationalist China as an equal by various Imperialists Powers.

The Resolutions Committee offered the following as a substitute, which was adopted:—

Whereas, the lasting peace and prosperity of China is a question that can only be ultimately settled by the Chinese themselves; Therefore, resolved, that this convention goes on record as being opposed to the interference of all foreigners into the political, economic and industrial life of China.

Favour Representation in Pan-American Federation

The convention approved of a resolution instructing the executive council to take such steps as in their judgment will give the congress representation as an affiliated body in the Pan-American Federation of Labour so that the viewpoint of Canadian organized labour on the economic and political conditions as they effect workers in the Dominion may be fully expressed.

"Congress Journal" only Official Paper

A resolution was submitted which set forth that numerous complaints had been made of the number of so-called labour papers which are published by persons who are not connected in any way with the recognized labour movement, and who "simply exploit the manufacturers for advertisements, thereby making a good living for themselves to the detriment of the workers," and asked as a means of exposing such publications, that no paper be accepted by the workers as a labour paper which has not received the endorsation of the Trades and Labour Congress of Canada or the American Federation of Labour.

The Resolutions Committee amended the resolution in certain respects and substituted the following as the resolve: "That the Congress goes on record as urging members to subscribe to the *Congress Journal* as the only official paper for which the Congress could accept responsibility."

Want Separate Department for Labour

The Ontario provincial executive committee was instructed to urge on the Ontario Government the desirability of creating a separate Department of Labour under a minister whose duties will not be merged with any other department.

Another matter which it was decided to bring to the attention of the Ontario Government is the proposal to grant to each municipality local autonomy for the sale of beer and wine.

No Protest Against Break With Russia

Toronto Branch No. 40 of the International Fur Workers' Union was responsible for the introduction of a resolution asking that the convention protest against the breaking off of trade relations between Canada and the Union of Soviet Republics, and urged that immediate steps be taken to renew the previously existing friendly relations. It also asked that to help the development of trade and to assist the workers of the Soviet Union in their work of socialist construction the Federal Government be urged to immediately extend substantial credits to be used in the purchase of manufactured products in this country.

The Resolutions Committee recommended non-concurrence, and without any discussion the recommendation was approved.

Fraternal Greetings

The Wednesday morning session of the convention was set aside to hear the messages from the fraternal delegates, the first being delivered by Mr. Thos. McQuaid, vice-president of the International Union of Plate Printers and Die Stampers, of Washington, D.C., fraternal delegates from the American Federation of Labour, who in his preliminary remarks outlined the nature of the work performed by the members of his union and the efforts made to secure improvements in the conditions of employment of plate printers. In conveying the greetings of the American Federation Mr. McQuaid complimented the Dominion on reaching its diamond jubilee and pointed to the friendly relations existing between the United States and Canada. He referred to the ties which bound together the trade union movements of both countries and opined that it was essential that there should be the closest co-operation between the union members thereof. The speaker gave endorsement to the company-union co-operative plan, known as the B. & O. plan, which he claimed had been of much value to railroad employees. Other trades were considering schemes of co-operation between employers and employees.

Mr. McQuaid referred to some of the activities of the international trade unions in the United States, such as the establishment of the Union Labour Life Insurance Company; the extension of the five-day week; and the progress of union label agitation, and closed with a plea for the closest co-operation between the trade union forces of Canada and the United States.

Mr. John Cliff, of London, England, assistant general secretary of the Transport and General Workers' Union fraternal delegate from the British Trades Union, opened his fraternal message with a reference to the kinship existing between members of the trade union movement. Referring to conditions in Great Britain, he said the workers had been compelled to stand attacks both politically and industrially, and declared that the British general strike was the greatest demonstration of solidarity ever witnessed. The new Trade Unions Act was designed to cripple the trade union movement. It had been the object of the trade unions to settle disputes by negotiation and conciliation, and in many cases they had been successful, but the new act would hinder the success of the industrial councils which had been set up to adjust difficulties. Mr. Cliff outlined the provisions of the new Trade Union Act and the penalties for violations of the law. He declared that the act was designed to strangle the political activities of the labour party by reason of the restrictions in regard to political contributions, Although certain unions had been compelled to sever their connection with the trade union movement and the Labour Party, he believed they would return at the first opportunity. The speaker declared that the labour movement of Great Britain had been the pioneer of social legislation under which vast sums had been paid in benefits, including unemployment and health insurance. He also outlined the contribution which the trade unions were making to essential services, many members of such bodies serving on boards which had to do with public affairs. Mr. Cliff reported on the amalgamation of certain trade unions with a view to consolidating their activities, and expressed the opinion that it was absolutely necessary that the trade unionists of the world should be united. He outlined current labour affairs in Great Britain and stated that the movement in that country was determined to press on until poverty was abolished, and closed with congratulations to the *Canadian Congress Journal,* which he declared was one of the best labour periodicals published.

Mr. Ed. Flore, president of the Hotel and Restaurant Employees' Alliance and Bartenders' International League, of Buffalo, N.Y., also conveyed the fraternal greetings of his organization, during which he urged a better organization of the hotel and restaurant employees with a view to living wages being secured by such workers, and urged that the several unions give their assistance in this direction. He also urged a continuance of the close co-operation between the workers of Canada and the United States.

Mr. W. L. Best, legislative representative of the Brotherhood of Locomotive Firemen and Enginemen of Ottawa, in presenting the fraternal greetings of his board and the president of the brotherhood, referred to the friendly feeling existing between his organization and the Congress. He spoke of the pleasure to be derived by the thought that the efforts which had been put forth had relieved the sufferings of many and made the lives of scores of people brighter by the legislation which had been secured. Mr. Best was so impressed with the work of the congress that he intended to recommend to the next convention of the Brotherhood of Locomotive Firemen and Enginemen that affiliation should be made with the congress.

Mr. Timothy Healy, of New York, brought the fraternal greetings of the International Brotherhood of Firemen and Oilers, and pointed to the progress which his organization had made in Canada during the past year and congratulated the delegates on the success of the congress.

Fraternal greetings to the congress were received by wire from the International Federation of Trade Unions and the International Union of Photo Engravers.

At a later session the fraternal delegate from the American Federation of Labour was presented with a diamond ring, the fraternal delegate from the British Trades Union Congress being given a gold watch chain and a tie pin. Tie pins were also presented to the eight male members of the local committee of arrangements, the two lady members receiving gold brooches.

Mr. H. B. Adshead, M.P. for East Calgary, was a visitor at the Tuesday morning session, and on consent being given he addressed the delegates, speaking more particularly in regard to his efforts to check unnecessary immigration. He also referred to the manner in which the Labour members in the House of Commons had worked together to secure legislation beneficial to all classes. Mr. Adshead complimented the congress on its methods of transacting business.

The Minister of Labour

The Hon. Peter Heenan, Minister of Labour, who was present at the invitation of the local committee of arrrangements, addressed the Thursday morning session. After expressing his pleasure at having the oppor-

tunity of meeting with the delegates, he stated that during his experience he had found that labour men did not always agree in all matters, but he was bound to give them all credit for being sincere in their opinions. It was by selecting the best of the ideas presented that progress could be made. The Minister reviewed at length the beneficial legislation which had been secured through the efforts of organized labour. Workmen's compensation laws had been adopted and many improvements in the acts had been secured through the representations of organized labour. Other social legislation included mothers' allowance acts and minimum wage laws, under the provisions of which immense sums had been paid in benefits to those least able to protect themselves. Referring to federal affairs Mr. Heenan mentioned the passage of legislation to protect union labels, a measure which had been sought for many years. The fair wage regulations had been extended to the pulp and paper industry, providing for the payment of the prevailing rate of wages where pulp wood is cut from crown lands. The old age pension law was referred to as a measure which would be of incalculable benefit to many thousands of citizens, who through no fault of their own were without the proper means of providing for themselves. Efforts were being made to have the various provinces enact legislation to bring it into effect, and the minister reported that he had just previously concluded an arrangement whereby the province of British Columbia would put the law into operation. The commissioner of the Yukon had also decided to adopt the law and he believed that the provinces generally would soon do likewise. The minister also spoke of the system of government annuities whereby pensioners could add to their allowances by contributnig a small weekly payment during the years when their earning capacity was highest. He gave credit to the officers of the congress for their efforts on behalf of old age pensions and to the government for passing the law. Speaking on immigration, the minister referred the action of the government in preventing the railway companies from flooding the labour market early in the present year. He explained that for a long time there had been an agreement with the railway companies in regard to immigrants who were to settle on the land. Because the railways had not lived up to the agreement, the same had been held in abeyance with a view to steadying the labour market, and now only those immigrants who would comply with the law were being admitted. In regard to unemployment relief the minister declared that this was a matter for the municipalities and the provinces to handle, and when that is thoroughly understood he believed it would prevent the requests which are sometimes made for allocating immigrants to certain localities. Mr. Heenan closed with the announcement that the conference of provincial premiers with the Dominion Government would take place on November 3, when it was believed that many matters of importance would be considered.

Protest by a Delegate

During the Thursday afternoon session Delegate R. C. McCutcheon, of Winnipeg, representative of the International Brotherhood of Boilermakers, declared that notwithstanding the invitation extended by President Moore to the general public to attend the sessions of the convention, he himself wanted one individual to get out. He referred to the president of the Mine Workers' Union of Canada, "which is an affiliate of the all-red so-called All-Canadian Congress of Labour," whom he stated was present only to carry on his disruptive work aimed at one of the international unions connected with the Trades and Labour Congress of Canada, (although no name was mentioned, the delegates knew that Frank Wheatley, a former member of the United Mine Workers of America, was the visitor mentioned). Delegate Angus Morrison, secretary of District 18 of the U.M.W. stated that "we have nothing to fear, nothing to hide. This man's presence is only one more piece of evidence that backsliders find it hard to keep away from the international movement, and the time is not far distant when they will all return." President Moore pointed out that the invitation to the public did not except anyone, and it was a matter of the dictates of the conscience of persons from outside as to what use they made of any information gleaned. He was glad that Delegate Morrison did not press for any different treatment to persons from a rival organization, and the general invitation to the whole public would accordingly be adhered to. This closed the incident.

No Protest

Just previous to the adjournment of the afternoon session of the first day of the convention Delegate Lakeman, of Edmonton, called attention to the report that Sacco and Vanzetti were to be executed that night and proposed that a protest be forwarded to the Governor of Massachusetts. The president advised that it would require a two-thirds majority of the delegates to permit the introduction

of a resolution. The president also outlined the position of the executive in regard to the matter and stated that he believed no good would be accomplished by the sending of a protest. No resolution asking permission to introduce the proposal being submitted, the president promptly adjourned the session.

Officers for 1927-28

The election of officers and fraternal delegates resulted as follows:

President, Tom Moore, Ottawa, Ont., (re-elected for the 10th consecutive term); secretary-treasurer, P. M. Draper, Ottawa, Ont., (re-elected for the 27th consecutive term); vice-presidents, James Simpson, Toronto, Ont.; R. J. Tallon, Calgary, Alta., and J. T. Foster, Montreal, Que.

Provincial Executive Committees

Nova Scotia—P. J. Healey (chairman), Halifax; Wm. Hayes, Springhill; W. A. MacDonald and M. D. Coolen, Halifax.

Quebec—A. Mathieu, (chairman), Montreal; Omer Fleury, Quebec; L. Thibault, and James Broderick, Montreal.

Ontario—Humphrey Mitchell (chairman), Hamilton; James Watt, Toronto; C. R. Nichols, Ottawa, and S. Bush, North Bay.

Manitoba—H. Kempster (chairman), Geo. W. Howard, Ed. Taylor and V. Armand, Winnipeg.

Saskatchewan—Alex. M. Eddy (chairman), Saskatoon; C. G. Greene, Moose Jaw; H. D. Davis, Prince Albert, and H. Perry, Regina.

British Columbia—P. R. Bengough, (chairman), Vancouver; R. W. Nunn, Victoria; J. J. Gillis, Prince Rupert, and W. Page, Vancouver.

Fraternal delegate to the American Federation of Labour—Alf. Farmilo, Edmonton, Alta.

Fraternal delegate to the British Trades Union Congress—F. W. Bush, Greenwood, Ont.

Toronto was chosen as the convention city for 1928.

NOTES ON LABOUR UNION ACTIVITIES

International Stereotypers and Electrotypers Union of North America

THE twenty-sixth annual convention of the International Stereotypers and Electrotypers Union of North America was held at Pittsburgh, Pennsylvania, on July 18-23, approximately 90 delegates attending.

President W. T. Keegan gave a detailed report of the wage scale negotiations reported to the head office during the past year. According to the report of secretary-treasurer Charles A. Summer, the membership at the close of 1926 stood at 7,178, an increase of 161 over the previous year, while the balance in the treasury credited to all accounts amounted to $200,384.41, an increase over last year of $28,930.44.

Constitutional amendments adopted by the convention, subject to a referendum vote of the members to be taken during October, were as follows: (1) Increasing the president's salary from $4,000 to $5,000 per annum; (2) Creating a burial fund, for which purpose the sum of $25,000 would be transferred from the general fund, and forty cents deducted from the *per capita* dues received from each member of the international union would be deposited in this fund for its maintenance; (3) Providing that not more than $10,000 shall be invested in any one class of bonds in any locality; (4)Providing that a referendum vote shall be taken immediately on any and all amendments that have been supported by not less than one-third of the local unions; (5) Increasing the number of delegates to annual conventions from local unions according to membership.

Among the resolutions adopted were the following:—

Requesting the officers of the American Federation of Labour and affiliated organizations to urge the United States Congress to adopt a four hour day on Saturday of each week in the government printing office in Washington, D.C.;

Ratifying all actions of Local Union No. 1 and the International President in their recent dealings with the Publishers' Association of New York City.

The officers elected for the ensuing year were: president, Winfield T. Keegan, Jersey City, N.J., vice-president, Thomas P. Reynolds, Omaha, Nebraska.; secretary-treasurer, Charles A. Sumner, Kansas City, Missouri.

The convention city for 1928 will be New York.

American Flint Glass Workers' Union

The fifty-first convention of the American Flint Glass Workers' Union was held at Cambridge, Ohio, July 4-13, President William P. Clarke presiding. The convention was attended by 128 delegates, representing 92 local unions from Canada and the United States.

In accordance with the terms of a memorandum of agreement adopted at a previous con-

vention, the duties of the president, with certain exceptions, was delegated to the vice-president, thereby giving the president more time to devote to the duties of his office as president of the American Bank, a financial institution which was organized by the union and opened for business in the City of Toledo on July 6, 1925. President Clarke reviewed the progress of the bank and described the efforts being put forth to establish it on a paying basis.

Vice-president Gillooly, in reviewing the work of the past year, informed the delegates that the membership stood at 6,564, a gain over last year, while the treasury balance showed an increase of $14,700. In his report the vice-president outlined the introduction of the various labour saving machines recently been put in operation in the glass blowing industry, which had resulted in many members of the union being forced into other lines of employment outside the trade. The report further dealt with production, wages, membership, etc.

The subject of death benefits, which had been under advisement since the 1923 convention, was dealt with in the report of the national officers. After considerable discussion this report was adopted as amended. Should the plan recommended meet with the approval of a majority of the members voting, it would become binding on all members and effective on January 1, 1928. Under this plan the sum of three hundred dollars would be paid to the legal heir or heirs on the death of a member who has complied with the regulations governing the death benefit plan.

Following a lengthy discussion on the question of the introduction of automatic machines in the manufacture of glassware, the convention adopted a resolution requiring all mould-makers who had been selected to operate automatic machines and had subsequently withdrawn from the American Flint Glass Workers' Union, again to become members, and providing that in future no member will be granted a withdrawal card to perform this kind of work.

Officers elected were: president, W. P. Clarke; vice-president, Joseph M. Gillooly; secretary-treasurer, Charles J. Shipman, Toledo, Ohio.

Cumberland, Maryland, will be the convention city for 1928.

Labour Educational Association of Ontario

The Labour Educational Association of Ontario held their 25th annual convention on August 13, at Toronto. Vice-president William Varley, who presided, referred to the success which had attended the efforts of the executive committee to give effect to the resolutions passed at the last year's convention at London, Ontario, particularly that in regard to prison-made goods. The executive report showed that the association was represented on the various delegations appearing before the Provincial Government regarding legislation in the interests of the workers, and had actively championed the cause of old age pensions, certain necessary amendments to the Workmen's Compensation Act, and many other proposed measures. The main question before the convention was the proposed launching of a provincial labour paper, the success of which was reported as being assured, as numerous pledges of support had already been received.

A resolution was passed unanimously requesting the provincial government to enact legislation making the Federal Old Age Pensions Act applicable to Ontario. Another resolution extended sympathy to British labour in connection with the enactment of the new Trade Unions Act.

Delegates from the United Women's Educational Federation were present in the afternoon and took part in discussions on legislation for women and children. Several of their resolutions were endorsed. A request for women to act on juries was referred to the executive. Tom Moore, President of the Trades and Labour Congress of Canada, was present and addressed the convention.

The election of officers resulted as follows:—President, Wm. Varley, Toronto; Vice-president, Rod Plant, Ottawa; Secretary-treasurer, Jos. Marks, Toronto. Executive, E. J. Follwell, Belleville; Larry O'Connell, Toronto; H. L. Asseltine, Hamilton; Fred Ackerknecht, Kitchener; Donald Dear, Ottawa; R. Foxcroft, London; D. Medley, Guelph; Wm. Stokes, St. Thomas; Colin Cashore, Owen Sound. Kitchener was chosen as the convention city for 1928. Future conventions will be held on May 24.

A census of occupations was taken in Germany on June 16, 1925, the preliminary results of which are now published. These show that the total number of inhabitants was 62,410,619, of whom 32,008,839, or 51.3 per cent, were returned as having remunerative occupations. Of the latter 20,531,155 were males and 11,477,684 were females. In 1907 the corresponding proportion of the entire population in remunerative occupations was 45.7 per cent, or 25,155,203, of whom 16,654,660 were males and 8,500,543 were females.

LEAGUE OF NATIONS INTERNATIONAL LABOUR ORGANIZATION

Japan and the Maritime Conventions

A GOVERNMENT Bill was introduced in the House of Peers of Japan in February last to give effect to the Convention of the International Labour Conference fixing the minimum age for the admission of young persons to employment as trimmers or stokers. The age limit in question is eighteen years. The Bill in question passed both Houses of Parliament of Japan without amendment.

This Convention was ratified on behalf of Canada in 1925.

"International Labour Review"

The contents of the August issue of the *International Labour Review* comprise the following special articles:—

The Tenth Session of the International Labour Conference.

The Evolution of a Wage-Adjustment System: II, by J. R. Bellerby.

The Correlation between Seasonal Unemployment and Certain Social and Economic Phenomena, by Dr. Jaroslav Janko, of the Czecho-slovak Ministry of Labour.

Calendar Reform, by J. H. Richardson, Ph. D., Research Division, International Labour Office.

In the section devoted to "Reports and Enquiries" are the following:

The Report of the Unemployment Insurance Committee in Great Britain.

Industrial Inspection in Czechoslovakia in 1925.

Public Opinion and the International Labour Organization

The General Council of the British League of Nations Union recently adopted a resolution in the terms following with reference to the work of the International Labour Organization:

The General Council of the League of Nations Union calls attention to the need of increasing the efforts to inform the public of the work of the International Labour Organization, both in order to secure ratification of International Labour Conventions and in order to win increased support for the League of Nations as a whole through that part of it which has to deal with questions of immediate interest to the majority of the individual citizens of this country.

Great Britain and the Maritime Conventions

References were made in the issue of the LABOUR GAZETTE of April, May and August, 1925, to the Merchant Shipping (International Labour Conventions) Act, 1925, of Great Britain, which gave effect to the Draft Conventions of the International Labour Conference for the amelioration of conditions of labour at sea. This legislation applied to ships registered in the United Kingdom but has been extended since by order in council dated July 25, 1927, to the following British Colonies: Bermuda, Cyprus, Fiji, Jamaica (excluding Dependencies), Mauritius, Seychelles, Straits Settlements and Trinidad.

Eleventh Session of the International Labour Conference

A circular letter has been addressed to the governments of the Member States of the International Labour Organization from Geneva, dated July 15, relative to the 11th session of the International Labour Conference which is to meet in Geneva in 1928 on a date to be fixed later by the Governing Body of the International Labour Office. The agenda of this session of the Conference will consist of the two following items:—

I. Minimum wage fixing machinery (final discussion);

II. Prevention of industrial accidents, including accidents due to coupling on railways (first discussion).

The question of minimum wage fixing machinery passed through the Conference, when a questionnaire was adopted for communication to the various governments. It was decided at the same time to place the question of minimum wage fixing machinery on the agenda of the 1928 session for completion, with a view to the adoption of a draft convention or recommendation on this subject.

The question of the prevention of industrial accidents, on the other hand, appears on the agenda of the conference for the first time and will, therefore, be the subject of a first discussion under the double discussion procedure.

The questionnaire relative to minimum wages was issued in connection with the letter from the International Labour Office of July 15 and when the answers are received to these questions, a report based thereon will be prepared and submitted to the Conference. The preliminary report on accident prevention has already been largely prepared.

Besides dealing with the two items on the agenda, the 1928 session of the conference will have to proceed to the election of the Governing Body. The last election of this body took place at the Seventh Session in 1925.

INDUSTRIAL RELATIONS IN THE UNITED STATES

Survey by H. B. Butler, C.B., Deputy-Director of the International Labour Office, Geneva

AN unusually clear and suggestive account of American industry, considered mainly in regard to the relations between capital and labour, has been published at Geneva by H. B. Butler, Deputy Director of the International Labour Office, under the title "Industrial Relations in the United States." Like other observers from Europe, Mr. Butler was impressed by the magnitude of the country and the corresponding scale of its industrial undertakings. "American conditions," he says, "are not comparable with those which prevail in any European country, or indeed in any country outside the United States, with the partial exception of Canada. The vast extent of its territory, the mixed character of its population, the psychological and social atmosphere peculiar to a new country, are factors which find no parallel elsewhere, but which exercise a marked influence upon relations in industry."

The extent of the country prevents the centralization of either political or industrial government. Forty-eight autonomous legislatures exist within the Union, each of which jealously regards any encroachment by the Federal Legislature. Consequently there are in the United States forty-eight labour codes framed on no uniform plan. Some of the States, particularly those in the north and west, possess advanced labour legislation in all its branches, while in the southern states labour laws have made little or no advance. Another factor which profoundly influences industrial conditions is the mixture of races composing its population. The process of assimilation has been rapid, but a vast number of workers possess only a rudimentary knowledge of the English language, and illiterary has made the work of organization increasingly difficult and often placed the immigrant worker in an unfavourable position. "American individualism" is another general feature to be considered. The fact that many employers started work as labourers prevents the growth of a "class conscious" attitude towards society. At the same time self-made employers often impede industrial progress, holding that conditions which were good enough for them in their young days are good enough for their successors. The American workman desires advancement rather than security. His frequent changes of occupation are a contributory cause of the "labour turnover," one of the characteristic problems of the American employer, and one which also adversely affects his attitude towards labour.

During the past ten years there has been a tremendous growth in America's output of raw material, and a corresponding expansion in manufacturing industry. Between 1914 to 1923 the value of manufactured product increased 149 per cent. The average value produced annually by each worker rose from $3,447.84 to $6,892.93, and the average annual wage rose from $579.14 to $1,253.93 (175 per cent). Mr. Butler notes however the inequality of wages as between the skilled and unskilled workmen, the latter class being for the most part outside the ranks of organized labour. This difference demonstrates the truth of President Coolidge's statement in his message to the last Congress that "skilled labour is well compensated, but there are unfortunately a multitude of workers who have not yet come to share in the general prosperity of the nation." The high level of average wages has reacted on industry by increasing the purchasing power of the population. "The recent rise in wages may, then, be attributed to economic causes. . . . . rather than to any deliberate policy, but high wages have been found to carry with them compensations which were not generally suspected. There is no doubt that their effect in stimulating both production and consumption has been more fully realized by employers than ever before. The fact that many thousands of workers have a margin above the bare necessities of life means an increased demand for all kinds of articles, in other words, a steadier market and a stimulus to further production. On these grounds, the principle is now widely accepted among American employers that it is good policy to avoid reducing wages if possible, that piece rates for the same job should not be lowered, and that economies should be looked for in every other direction before touching wages. American employers now generally express the view that high wages are advantageous as being an incentive to production, as engendering a better feeling among their workpeople, and as creating a purchasing power among them which serves to promote and to maintain prosperity."

High wages have gone far to eliminate the causes of discord between employer and employee, uniting them in a common effort to increase production. This tendency to co-

operate has been fostered by discussion and the exchange of information. The desire for favourable industrial relations has assumed national proportions, and has stimulated both employers and trade unions to re-adjust their past policies. The spirit of co-operation is further indicated by the voluntary assumption by employers of heavy social charges for the protection of the worker against industrial risks. This voluntary insurance system does not, in Mr. Butler's opinion, offer the same measure of security to the workers that is afforded by state insurance, but once it has been established it cannot be allowed to fail without seriously prejudicing the good feeling between employer and employee which it is designed to promote.

The efforts of employers and workmen in the United States to find new relationships are mainly in three directions:—

(*a*) Scientific determination of working conditions;

(*b*) Provision, mainly by employers, against social risks, by means of life insurance, sickness funds, pensions, etc.;

(*c*) Establishment of works committees or other representation schemes for ensuring contact between men and management.

Employee representation is found in two distinct forms:

(*a*) The "American" or open shop plan. This is a form of joint representation on the basis of the single workshop. Mr. Butler considers it as a definite plan to break up trade unions, this purpose in fact being its weakness, owing to the inferior standing of the workmen on the board of management.

(*b*) Union management co-operation, on the other hand, is organized on the basis of the trade union. The policy of the American Federation of Labour is definitely to collaborate in increasing production, provided that recognition is secured. There is strong evidence, in fact, of a clearer perception on both sides of the fact that a common interest exists between employers and employed, and the former policy of conflict and opposition is being changed into a doctrine of co-operation.

Mr. Butler sees great promise for the future in the various experiments in collaboration between capital and labour now under trial in the United States. "If the American pioneers," he says, "can confirm and extend their success in bringing about real partnership between employers and workers, their example will ultimately spread to the whole mass, with the result that the United States will have secured a further guarantee of supreme importance for the maintenance of its material prosperity and for the progress of its social welfare."

WAGES OF UNSKILLED LABOUR IN THE UNITED STATES

The August issue of the *Monthly Labour Review* of the United States Bureau of Labour Statistics, contains an article on "Low Earnings of Unskilled Labour in the United States," which states that "the relatively high level of wages now existing in the United States has been the subject of frequent comment both by American and foreign observers. Reiteration of this comment, however, should not blind us to the fact that there exists in this country large numbers of common labourers whose earnings, under the best of conditions, are far below the requirements of healthful living and good citizenship."

The report states that while no complete data exist regarding the actual earnings of unskilled labour of all classes, for certain industries, however, "studies by the Bureau of Labour Statistics and other authoritative agencies give a reasonably accurate picture of the earning capacity of their unskilled employees." The data thus collected are summarized in a table in which (except in the case of coal mining and railroads) the earnings are expressed in terms of full-time weekly pay—i.e., the amount average labourer would earn in a week if his employing establishment was operating full time, and he lost no time at all through unemployment, sickness, accident, or other causes. The report observes that "the figures, therefore, may be taken as extremely conservative, representing maximum possible earnings and thus being in excess of the actual amount which the average worker receives and must live upon."

Continuing, the report adds that "the data given relate solely to males, and that while age classification is not available, it is known that common labour work is almost invariably of a type to demand an adult's strength. Moreover, the term 'common labourer' or 'unskilled labour' is rather elastic. In general it implies work requiring little or no previous training, but very often the work does demand considerable intelligence and often involves a high degree of responsibility."

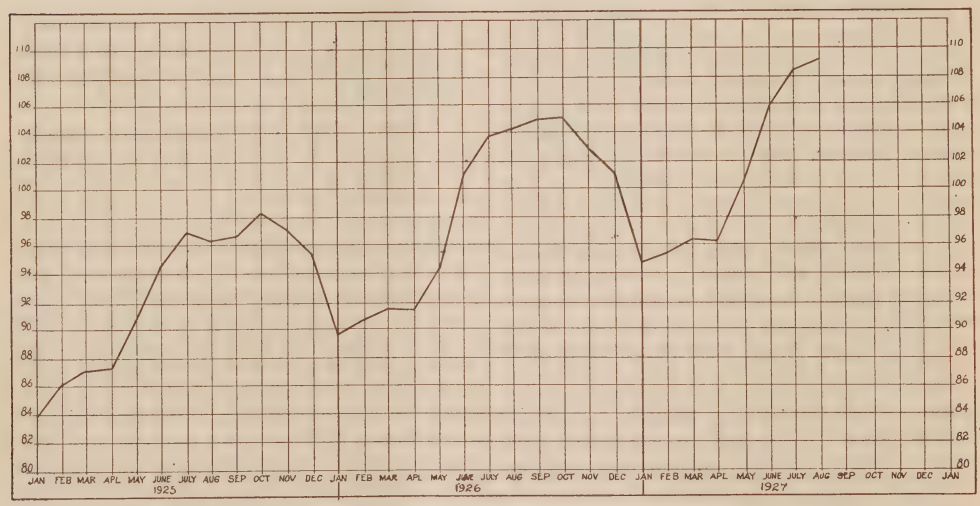
Summarized, the table gives the average weekly earnings of male common labourers in the following industries: Lumber, $17.77; slaughtering and meat packing, $21.35; woollen and worsted goods manufacturing, $21.98; machine shops, $23.07; paper box-board manufacturing, $23.99; blast furnaces, $24.34; foundries, $25.25; motor vehicle manufacturing, $28.73; bituminous coal mining (inside labourers), $22.78; bituminous coal mining (outside labourers), $23.58; anthracite coal mining (inside labourers), $29.42; anthracite coal mining (outside labourers), $29.45; metalliferous miners (underground), $22.04; railway track labourers, $17.

The President of the United States, and the Secretary of Labour, have recently expressed themselves definitely and forcibly on this situation. Speaking at Hammond, Ind., on June 14, President Coolidge said: "While we have reached the highest point in material prosperity ever achieved, there is a considerable class of unskilled workers who have not come into full participation in the wealth of the nation." Secretary Davis, in an address at Washington on June 22, said:

"If these underpaid workers were few in number, and existed only in scattered instances, the inequality would be less great. But if we count them up, if we think of those in all our industries who may lack mechanical skill but who nevertheless shoulder the heavy weights and do the roughest work, we find a great part of American industry shot through with these unfortunates. It is not an exaggeration to say that we have some millions of these hard-worked but under-paid Americans. Taken together with their families and their dependants, I would venture to say that we have among us from ten to fifteen millions of people who do not share as they should in the prosperity enjoyed by the rest of us. Morally, economically, and on the grounds of simple humanity, this inequality should not be allowed to exist in this richest nation of history."

Wages in the Automobile Industry

The August issue of the Labour Gazette, page 867, contained an article outlining the extent of the automobile industry in the United States. Miss Margaret Scattergood, writing in the August issue of the *Federationist,* the official organ of the American Federation of Labour, gives a résumé of wages in this industry, noting the difference in the amount of the wage increase and the percentage of workers affected in the different occupations from 1922 to 1925. The weekly wages of the different occupations in the automobile industry range from $28.73 to $49.90, the lowest paid occupation being that of labourer, and the highest that of lettering, stripping and varnishing. Blacksmiths are paid at the rate of $47.47; skilled sheet metal workers receive $49.19; machinists receive $40.30; assemblers receive $36.60; inspectors receive $34.17, and helpers receive $30.69. A few occupations have had a very high increase, of more than twenty per cent. The trim bench hands have advanced from a relatively low paid position to a wage well above the average, and the sheet metal workers, who were already well paid, are in 1925, next to the highest in the industry. The apprentices have advanced from a very low wage to one giving more margin of security, but their wage is still below that of the lowest paid unskilled workers. These three groups represent only 2.3 per cent of the workers. Four other occupations representing 4.4 per cent of the workers receive over sixteen per cent increase, the unskilled sheet metal workers, the blacksmiths, polishers and buffers, and paint sprayers. The sheet metal workers were a low paid group and have advanced to a relatively high wage, while the other three groups were already above the average and are now among the highest paid.



Of these seven occupations only one included women in 1922, the trim bench hands. The increase given these women is less than one-third that given the men. In two other occupations however the women received large increases; the lathe operators and drill press operators, representing .87 per cent, have had a much higher increase than any of the men. This brought them from a relatively low wage to the highest paid position of all women ($34.66 per week). The drill press operators is the next higher for the women Except for these increases no women received more than a 14.3 per cent increase, and only one occupation, the milling machine operators, was so fortunate as this. All others increased less than 8 per cent, a much smaller increase than that received by most of the men. The large majority of men in the industry received increases varying from five to 15.57 per cent. There are large variations between different occupations. Twelve occupations increased from five to 9.9 per cent; sixteen occupations increased from 10 to 15.57 per cent. One group stands out, the labourers, who received an increase of 15.57 per cent. They received a weekly salary of $28.73 in 1925, and are the largest single group in the industry representing nearly 11 per cent of all male workers. As they received a very low wage in 1922, this increase shows a marked improvement in their condition.

EMPLOYMENT SITUATION AT THE BEGINNING OF AUGUST, 1927, AS REPORTED BY THE EMPLOYERS MAKING RETURNS TO THE DOMINION BUREAU OF STATISTICS

EMPLOYMENT at the beginning of August showed a further moderate increase according to statements tabulated by the Dominion Bureau of Statistics from 6,211 firms, whose payrolls aggregated 903,060 persons, as compared with 898,766 on July 1. This advance involved a rather smaller number of workers than that registered on August 1, 1926, but the index number, at 109.2 on the date under review, was higher than in any other month since the record was instituted in 1920; on July 1, 1927, it stood at 108.4, and on August 1, 1926, 1925, 1924, 1923, 1922 and 1921, it was 104.2, 96.3, 94.7, 100.2, 93.1 and 88.9, respectively.

EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

NOTE.—The curve is based on the number of employees at work on the first day of the month, as indicated by the firms reporting, in comparison with the number of employees they reported in January, 1920, as 100.

Construction and mining reported the most pronounced gains, but the tendency was also favourable in manufacturing, services, trade and communications. On the other hand, transportation released some employees, and logging continued seasonally quiet.

Employment by Economic Areas

Somewhat greater activity was shown in all provinces except Quebec, where the situation was practically unchanged.

Maritime Provinces.—Statements were tabulated from 565 firms in the Maritime Provinces employing 75,062 persons, as compared with 74,983 in the preceding month. This increase was considerably smaller than that indicated on August 1, 1926, when the index was much lower. Manufacturing was decidedly slacker, chiefly owing to the completion of the season's work in fish canneries, and logging was also seasonally quiet, but the trend of employment was upward in construction, mining and transportation.

Quebec.—Little general change was shown in Quebec, according to returns from 1,367 employers with 257,878 workers; manufacturing, construction, services and trade reported larger payrolls, but logging and transportation were slacker. Employment was in greater volume than at the beginning of August a year ago, although moderate improvement was then indicated.

Ontario.—There was a small advance in employment in this province on August 1, when the 2,800 co-operating firms increased their staffs by 515 to 365,431 persons. The fluctuations in personnel reported to the Dominion Bureau of Statistics were generally insignificant, the greatest changes being gains in transportation, construction and trade. Slight curtailment of operations was recorded on

the corresponding date last year; the index number then was nearly six points lower than at the beginning of August, 1927, when it reached 102.6, the highest since 1920.

Prairie Provinces.—In contrast with the declines noted on August 1, 1926, there was on the date under review a considerable increase in the payrolls of the 799 employers whose statistics were tabulated and who reported 122,090 workers, or 3,150 more than at the beginning of July. The most pronounced improvement was shown in construction, but manufacturing, trade and mining were also more active, while transportation recorded the only large reductions. The index number, at 114.8, was over eight points higher than on the corresponding date in 1926.

British Columbia.—Continued gains were registered in British Columbia, chiefly in Manufacturing, logging, mining, construction and services. Returns were compiled from 682 firms employing 82,599 persons, as against 81,738 in the preceding month. Rather more extensive increases were indicated at the beginning of August last year, but the situation then was not so favourable.

Table I gives index numbers by economic areas.

Employment by Cities

Employment in Quebec, Hamilton, Ottawa, Windsor (including the Other Border Cities) and Winnipeg advanced, while the tendency was unfavourable in Montreal, Toronto and Vancouver.

Montreal.—For the first time since the beginning of this year, employment in Montreal showed a decline, which, however, was expected to be largely temporary in character; 715 firms reported 119,421 employees, or 456 less than on July 1. Construction and trade registered decided improvement, but manufacturing and transportation released workers. The index was the same as the beginning of

NOTE.—Number employed by the reporting firms in January, 1920, =as 100 in every case. The "relative weight" shows the proportion of employees in the indicated area to the total number of employees reported in Canada on the date under review.

46790—5½

August, 1926, when a slight advance was indicated.

Quebec.—Further but smaller gains were noted in Quebec City, mainly in the manufacturing and transportation industries. Statements were received from 97 employers whose staffs aggregated 10,812 workers, compared with 10,662 in the preceding month. Although this increase involved fewer workers than that noted on August 1 a year ago, the situation then was not so good.

Toronto.—Employment in Toronto remained practically unchanged, according to data from 786 employers of 104,634 persons, but it continued at a higher level than on the corresponding date of other years of the record. Manufacturing, especially of electrical goods, showed seasonal dullness, while transportation and construction recorded heightened activity.

Ottawa.—The trend of employment in Ottawa continued to be upward, 207 workers having been taken on by the 132 co-operating firms, who employed 11,740 on August 1. The largest gains were in manufactures, particularly in lumber mills, although construction was also busier. Small losses were indicated at the beginning of August, 1926, and the index then was much lower.

Hamilton.—Additions to staffs on a decidedly larger scale than on the same date last summer were made in Hamilton, where 202 employers reported 30,757 persons on their paylists, as against 30,112 in their last returns. Manufacturing registered general improvement, and construction also afforded more employment. Activity was greater than on August 1 in any other year of the record.

Windsor and the Other Border Cities.—Partial recovery from the losses noted in the preceding month was made in the Border Cities, but employment was not so brisk as at the beginning of August last year. Statistics were received from 92 firms employing 9,514 workers, or 293 more than on July 1. Automobile works and construction registered slightly greater working forces, while only small general changes took place in other industries.

Winnipeg.—Continued advances were shown in Winnipeg, according to 283 firms who had 28,849 employees, as compared with 28,513 at the beginning of July. There were general increases in manufactures, construction and trade. The improvement evidenced on the corresponding date last year was less pronounced and the index then was lower.

Relative weight of employment by Cities as at Aug. 1, 1927	13·2	1·2	11·6	1·3	3·4	1·1	3·2	2·9

Vancouver.—Manufacturing and transportation reported curtailment of operations, while construction was somewhat more active. Returns were compiled from 237 employers whose staffs aggregated 26,386 persons, compared with 26,800 in the preceding month. Marked expansion was indicated on August 1, 1926, when the level of employment was rather higher.

Index numbers by cities are given in Table II.

TABLE III.—INDEX NUMBERS OF EMPLOYMENT IN CANADA BY INDUSTRIES (JAN. 1920=100)

Industries	[1]Relative Weight	Aug. 1 1927	July 1 1927	Aug. 1 1926	Aug. 1 1925	Aug. 1 1924	Aug. 1 1923

[1]The "Relative Weight" column shows the proportion that the number of employees in the indicated industry is of the total number of employees reported in all industries by firms making returns on the date under review

Manufacturing Industries

Further, moderate gains were made in manufacturing works, 3,908 of which reported 488,448 operatives on their payrolls, as compared with 488,094 on July 1. The most marked increases were in fruit and vegetable canning, lumber, tobacco, distilled and malt liquor, pulp and paper, building material and electric current plants, while fish-preserving, electrical appliance, iron and steel and non-ferrous metal factories showed reductions. Rather greater advances were registered on the same date last year, but the index then was some three points lower.

Animal Products—Edible.—Dairies registered further gains, but fish-preserving establishments, particularly in the Maritime Provinces, were slacker. Statistics were received from 248 firms employing 19,056 workers, as compared with 19,462 in the preceding month. This reduction involved a slightly larger number of employees than that noted on August 1, 1926, but the index number then was many points lower.

Fur and Products.—As is usual at midsummer, there was a falling off in employment in fur factories, 25 of which released 101 persons from their staffs, bringing them to 1,087 on August 1.

Leather and Products.—Further but small increases in employment were shown in tanneries, boot and shoe and other leather works, 88 persons being added to the staffs of the 193 co-operating manufacturers, who employed 17,145 on July 1. The situation was rather more favourable than on the corresponding date last year, when similar gains were noted.

Lumber and Products.—Rough and dressed lumber mills continued to take on workers, while the container and other branches of the lumber industry were slacker. The advance was practically the same as on August 1, 1926, when the index number was insignificantly higher. The payrolls of the 735 firms furnishing data aggregated 58,198 operatives, as against 57,664 in their last report. There were reductions in the Maritime Provinces and increases in Quebec and British Columbia.

Plant Products—Edible.—Continued and larger additions to staffs were registered in fruit and vegetable canning, sugar, biscuit and other factories coming under this classification; 302 employers reported 28,894 workers, or 1,704 more than at the beginning of July. The gains, which were made chiefly in Quebec, Ontario and British Columbia, were on a somewhat smaller scale than on August 1, 1926, when the index number stood at 106.3, as compared with 105.4 on the date under review. The cool summer tended to delay operations in fruit canneries to some extent.

Pulp and Paper Products.—Pulp and paper mills recorded heightened activity, while little change was shown in other branches of this group. Statistics were received from 475 manufacturers whose payrolls were increased by 249 persons to 60,694 on August 1. Most of the improvement took place in Ontario. More extensive advances were noted on the corresponding date last summer, but the index number on August 1, standing at 117.5, was at the highest point so far reached in this record.

Textile Products.—Silk, hosiery and knitting and headwear factories recorded augmented working forces, but there was a greater decline in woollen and clothing plants. The result was a reduction of 97 workers in the staffs of the 513 co-operating manufacturers, who employed 74,196. The tendency was upward in Quebec, but elsewhere curtailment was shown. Small increases were noted at the beginning of August, 1926, but the index number then was lower.

Tobacco, Distilled and Malt Liquors.—Data were received from 109 establishments in these industries whose payrolls rose from 12,429 on July 1 to 12,840 employees on the date under review. Quebec and Ontario reported practically all the improvement, which exceeded that registered on August 1 a year ago; the situation then was not so favourable.

Clay, Glass and Stone Products.—There was a further advance in building material plants, according to 116 employers with 10,984 workers, or 157 more than in their last report. The bulk of the gain was in Ontario and the Prairie Provinces. Employment was in somewhat greater volume than on the same date of last summer.

Electric Current.—Another but smaller increase took place in electric current works, 88 of which reported 13,194 employees, as against 13,082 on July 1. Losses in Quebec were more than offset by improvement in Ontario and the Western Provinces. The index number was at the highest point reached since 1920, when the record was instituted.

Electrical Apparatus.—Employment in 39 electrical apparatus works showed a decline at the beginning of August, which was partly due to vacation shutdowns; they employed 10,210 operatives, or 284 less than in the preceding month. Practically all the reduction took place in Ontario. The situation was better than on August 1 last year.

Iron and Steel Products.—Automobile and other vehicle, wire, tool and other iron and steel factories reported contractions which were partly offset by gains in machinery and sheet metal works. The losses were less extensive than on the corresponding date of most years of the record, including 1926, when the index number was insignificantly lower. A combined working force of 126,987 persons was reported by the 639 co-operating manufacturers, who had 128,561 on July 1. Quebec and Ontario registered the bulk of the falling off.

Non-ferrous Metal Products.—In contrast with the additions to staffs noted on August 1, 1926, there was a decrease in employment on the date under review, 350 workers being released from the staffs of the 107 firms furnishing data, who employed 16,408. Practically all the curtailment took place in British Columbia. Despite this loss, employment continued to be in greater volume than on the corresponding date of any other year since 1920.

Logging

Seasonal dullness continued to affect employment in logging camps, especially in Eastern Canada. Statements were tabulated from 219 firms, employing 15,948 men, or 672 more than in the preceding month. Much greater losses were reported on August 1, 1926, when employment was not so active.

Mining

Coal.—There was an increase of 737 persons in the staffs of the 89 operators furnishing returns, bringing them to 26,715 on August 1, 1927. This gain, in which both Eastern and Prairie coal fields shared, contrasts with the decline registered on the same date in many of the years since 1920, the index then being lower.

Metallic Ores.—Further and larger expansion was recorded in metallic ore mines, bringing employment to its highest level in this record. Returns were received from 54 mines, with 12,890 workers, as compared with 12,496 in their last report. Improvement was shown in Quebec and Ontario, but chiefly in British Columbia.

Communications

There was another moderate advance in the personnel of telegraph and telephone companies on August 1, the 188 co-operating branches having 25,826 employees, as against 25,725 in the preceding month. The number engaged in this group was at its maximum for the last eight years.

Transportation

Street and Electric Railways and Cartage.—There was a further small increase in employment in local transportation on August 1; 115 employers reported 20,866 workers, or 191 more than at the beginning of July. Practically all the advance took place in Ontario. The index number was higher than on August 1, 1926, when slight losses were noted.

Steam Railway Operations.—The trend of employment in steam railway operation was unfavourable, the declines taking place in Quebec and the Prairie Provinces. The 100 companies and divisional superintendents furnishing data employed 78,989 persons, compared with 80,275 in their last report. Improvement was recorded on the corresponding date of 1926, but the index number then was rather lower.

Shipping and Stevedoring.—Statements were tabulated from 62 companies in this group, employing 15,270 men, or 1,103 less than on July 1, 1926. There were slight increases in the Maritime Provinces and Ontario, but in Quebec and British Columbia the movement was downward. Somewhat less extensive curtailment was noted at the beginning of August a year ago, when the index number was higher.

Construction and Maintenance

Building.—Considerable improvement was again reported in building construction, 474 contractors adding 2,423 persons to their staffs, bringing them to 43,370 at the beginning of August. There were increases in all provinces except British Columbia. Conditions were better than in any month in earlier years of the record.

Highway.—The number engaged on highway construction and maintenance showed a further important increase, chiefly in the Prairie Provinces, but to some extent throughout the country. Data were received from 159 employers, with 34,230 workers on their payrolls, as compared with 29,950 at the beginning of July. Employment in this industry reached the highest point so far recorded.

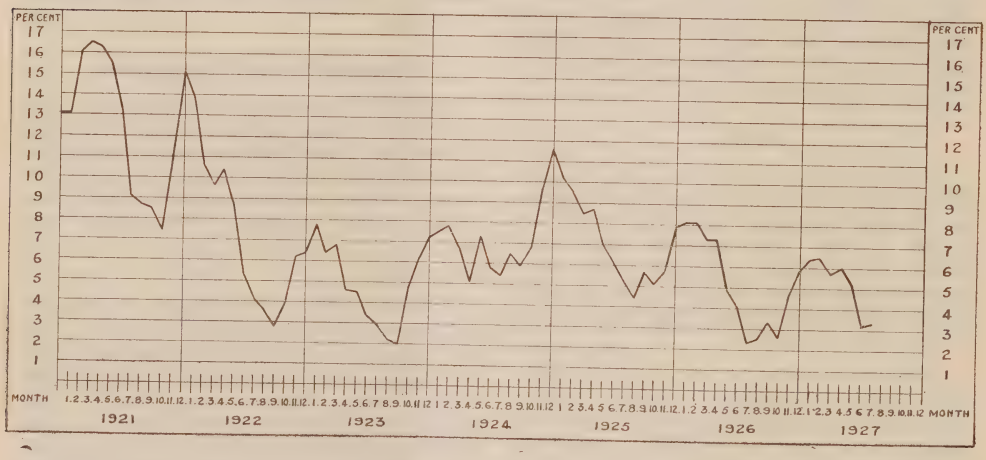
Railway Construction and Maintenance.—A seasonal falling off on a smaller scale than on August 1, 1926, was registered in this industry, according to 40 companies and divisional superintendents, whose staffs declined from 54,865 on July 1 to 52,682 men on the date under review. The index number was higher than at the beginning of August last year, and in 1925. The most pronounced declines were recorded in Ontario and the Prairie Provinces.

Services

Summer hotels reported further additions to staffs, while only slight changes were noted in other branches of the group; 169 firms employed 16,828 persons, or 360 more than at the beginning of July. Although this increase was rather smaller than that indicated on August 1, 1926, the situation then was not so favourable; in fact, employment on the date under review was at its maximum for this record.

Trade

Activity in retail and wholesale houses again advanced, according to 564 establishments, which added 690 workers to their staffs, bringing them to 63,679 on the date under review. Ontario, Quebec and the Prairie Provinces recorded most of this increase. The gains recorded at the beginning of August of last year were somewhat smaller, and the index then was several points lower.



Tables I, II and III give index numbers of employment by economic areas, leading cities and industries, respectively. The columns headed "Relative Weight" show the proportion that the number of employees reported in the indicated area or industry is of the total number of employees reported in Canada by the firms making returns on August 1, 1927.

UNEMPLOYMENT IN TRADE UNIONS AT THE CLOSE OF JULY, 1927

THE term unemployment as used in the following report has reference to involuntary idleness, due to economic causes. Persons engaged in work other than their own trades, or who are idle because of illness, are not considered as unemployed. Unions involved in an industrial dispute are excluded from these tabulations. As the number of unions making returns varies from month to month, with consequent variation in the membership upon which the percentage of unemployment is based, it should be understood that such figures have reference only to the organizations reporting.

Little variation from the June level of unemployment among local trade unions featured the July situation, the reports tabulated from 1,569 labour organizations with 167,648 members showing but 3.3 per cent of idleness, in contrast with 3.2 per cent at the end of June. Prevailing conditions during July were somewhat less favourable than in the same month last year, when 2.3 per cent of the members were unemployed. In comparison with the returns for June the various provincial changes were not particularly outstanding, Nova Scotia, Ontario, Manitoba and Alberta unions indicating slight gains, and Quebec, Saskatchewan and British Columbia minor reductions. In New Brunswick the situation was unchanged, the same percentage of idleness being recorded at the end of each month used in this comparison. When contrasted with the returns for July last year Nova Scotia and Alberta unions alone were better employed. In British Columbia there was no change, and of the re-

PERCENTAGE OF UNEMPLOYMENT AS REPORTED BY TRADE UNIONS
Quarterly 1916-1921, Monthly 1922-1926

ductions in the remaining provinces that of 3.1 per cent in Quebec was the most pronounced.

A separate tabulation was made of the unemployment conditions at the close of July among trade union members in the largest city of each province except Prince Edward Island. Of these, unions in Halifax, St. John, Toronto, Winnipeg, Regina and Edmonton all were afforded slightly greater employment than in June, while in Montreal and Vancouver the situation was reversed, unemployment in both centres being in somewhat greater volume. The percentages of idleness for July ranged from 7.0 in Vancouver to 1.1 in Regina, which city reported the most favourable conditions.

The accompanying chart traces the curve of unemployment by months from 1921 to date. During July the course followed by the curve was in an upward direction, contrary to that of the previous two months, but the projection was very slight. The trend was also opposite to that of the same month last year, though there was little divergence in either comparison.

The manufacturing industries with 425 unions reporting 48,136 members, had 4.8 per cent of their members unemployed, as against 3.8 per cent in June and 3.2 per cent in July last year. Garment and wood workers registered the most substantial declines in comparison with June, followed by minor contractions among brewery, textile and leather workers and printing tradesmen. Of the gains in employment, those among glass and hat and cap workers and metal polishers were the most noteworthy. Comparing with the returns for July last year, textile workers, metal polishers, papermakers and printing tradesmen were more actively engaged, and of the offsetting reductions the most important were among glass, leather, garment, hat and cap, jewellery, and iron and steel workers.

Unemployment in the coal mines, as indicated by returns tabulated from 32 organizations with 13,602 members, was in lesser volume during July than in both the previous month and July last year. The coal mines of Nova Scotia absorbed a slightly greater number of workers than in June, as did also the Alberta mines, while in British Columbia there was no unemployment recorded, as in June. In comparison with the returns for July last year the Nova Scotia and Alberta situation improved, and in British Columbia there was no change, all members reported being at work.

In the building and construction trades, returns were tabulated from 173 labour organizations with 18,764 members, 1,289 of whom were idle, or a percentage of 6.9 as compared with 8.0 per cent in June. Bricklayers, masons and plasterers, hod carriers and building labourers, plumbers and steamfitters, and granite and stonecutters all registered heightened activity, and the remaining trades reductions, the most noteworthy of which were among bridge and structural iron workers, tile layers, lathers and roofers, and electrical workers. In comparison with the returns for July of last year when 3.6 per cent of the members were idle, employment for all tradesmen, with the exception of painters, decorators and paperhangers, was on a lower level. The most pronounced reductions were reported among bricklayers, masons and plasterers, and carpenters and joiners.

The transportation industry with 636 unions having a combined membership of 57,345 persons reported a small adverse change as compared with June, the percentage of idleness standing at 2.8 at the end of July, as compared with 2.2 per cent at the close of the previous month. The situation was also less

favourable than in July last year when 1.5 per cent of the members were idle. The unemployment among navigation workers, principally in the Province of Quebec, was mainly responsible for the slight downward movement of employment, as compared with June Steam railway employees, whose returns constitute over 82 per cent of the entire group membership reporting, showed slight improvement, as did also street and electric railway employees. In comparison with the returns for July last year, the navigation, steam and street and electric railway divisions each contributed its quota to the increase in unemployment recorded.

A separate tabulation is made of employment conditions affecting longshore workers, from whom reports were tabulated from 12 organizations with 6,600 members. Of these 917, or a percentage of 13.9, were idle as compared with unemployment percentages of 18.5 in June and 16.7 in July last year.

In the public employment division returns tabulated from 130 unions with 12,926 members during July showed no inactivity, as against nominal percentages of idleness, both in the previous month and in July last year, sufficient employment being afforded both Federal and civic government employees.

From the miscellaneous group of trades 109 returns were tabulated, comprising 4,731 members, 4.4 of whom were idle on July 31 as compared with 5.0 per cent in June. Theatre and stage employees were slightly slacker than in June, but the situation for hotel and restaurant employees, barbers and stationary engineers and firemen improved. A nominal change only occurred in comparison with July last year when 4.5 per cent of the members were without work. In this comparison both theatre and stage, and hotel and restaurant employees were busier, but barbers and stationary engineers and firemen were not quite so fully engaged.

Very little change was indicated among fishermen as compared with June, but there was much improvement over July last year. Lumber workers and loggers reported no unemployment, as in both the previous month and July last year.

Table I on page 995 summarizes the returns by provinces for July of each year from 1919 to 1924 inclusive, and for each month from January, 1925, to date, and table II on page 996 represents the percentages of unemployment recorded in the different groups of industries for the same months.

EMPLOYMENT OFFICES REPORTS FOR JULY, 1927

THE volume of business transacted by the offices of the Employment Service of Canada during the month of July, 1927, showed a decrease of 5 per cent in the average daily placements from that of the preceding period and also a decrease of over 9 per cent when a comparison was made with the average daily placements effected during the corresponding period of 1926. All groups except logging and trade showed declines from last year, the former showing a decided gain in the volume of business transacted, while trade remained stationary.

The accompanying chart shows the trend of employment since January, 1925, as represented by the ratio of vacancies notified and of placements effected for each 100 applications for work registered at the offices of the Service throughout Canada, computations being made semi-monthly. It will be seen that the curves of vacancies and placements in relation to applications during the first half of the month remained practically on the same level as that reached at the close of June, but rose 5.6 points and 4 points respectively during the latter half of the month under review. The ratio of vacancies to each 100 applications was 79.7 and 85.3 during the first and second half of July, 1927, in contrast with the ratio of 85.8 and 91.0 during the same periods in 1926. The ratio of placements to each 100 applications during the period under review was 74.2 and 78.2, as compared with 78.7 and 80.1 during the corresponding month a year ago.

A summary of the reports from the offices showed that the average number of applications recorded daily during the first half of July was 1,545, as compared with 1,580 daily during the preceding period, and with 1,691 daily during the corresponding period of 1926. Applications for work during the latter half of the month numbered 1,550 daily, in contrast with 1,606 daily during the latter half of July a year ago.

Employers notified the Service of a daily average of 1,232 vacancies during the first half, and 1,322 during the latter half of the month under review, as compared with a daily average of 1,451 and 1,461 vacancies during the month of July, 1926. Vacancies offered to the Service during the latter half of June, 1927, averaged 1,266 daily.

The Service effected a daily average of 1,147 placements during the first half of July, 1927, of which 831 were in regular employment and 316 in work of one week's duration or less, as compared with a total average placement during the preceding period of 1,182 daily, and with 1,331 daily during the first half of July, 1926. During the latter half of the month under review placements averaged 1,213 daily (881 regular and 332 casual) as compared with an average of 1,286 daily during the corresponding period last year.

During the month of July, 1927, the offices of the Service referred 30,854 persons to vacancies, and effected a total of 29,521 placements. Of these, the placements in regular employment numbered 21,403, of which 17,554 were of men and 3,849 of women, while placements in casual work totalled 8,118. Opportunities for employment reported by employers numbered 23,398 for men and 8,557 for women, a total of 31,955. The number of applications for work was 38,684, of which 28,668 were from men and 10,016 from women.

The following table gives the placements effected to date by the offices of the Employment Service of Canada:—

Year	Regular	Casual	Totals
1919 (10 months)	268,001	37,904	305,905
1920	366,547	79,265	445,812
1921	280,518	75,238	355,756
1922	297,827	95,695	393,522
1923	347,165	115,387	462,552
1924	247,425	118,707	366,132
1925	306,804	106,021	412,825
1926	300,226	109,929	410,155
1927 (7 months)	125,547	59,280	184,827

Nova Scotia

Employment opportunities as indicated by orders received at employment offices in Nova Scotia during July were less favourable than those shown the preceding month and the corresponding month last year, there being 22 per cent and 15 per cent respectively fewer requests for workers. Placements declined over 16 per cent in comparison with June, and nearly 5 per cent when compared with July, 1926. The changes in placements by industrial groups from July last year were all of minor importance. Industrial divisions in which most of the placements were effected during the month were: construction and maintenance, 75; trade, 55; and services, 239. Of the latter 182 were of household workers.

POSITIONS OFFERED AND PLACEMENTS EFFECTED FOR EACH ONE HUNDRED APPLICATIONS FOR EMPLOYMENT

Regular employment was procured for 182 men and 50 women during the month.

New Brunswick

During the month of July positions offered through employment offices in New Brunswick declined nearly 4 per cent from June, and nearly 8 per cent below July, 1926. There was a decrease of nearly 6 per cent in placements when compared with the preceding month, and of over 10 per cent in comparison with the corresponding month last year. Reduced placements in logging, transportation and services were responsible for the decline from July, 1926, being offset in part by gains in manufacturing and construction and maintenance. The changes in other groups were small. Industrial divisions in which most of the placements were effected during the month were: manufacturing, 49; logging, 92; construction and maintenance, 101; and services, 374, of which 267 were of household workers. Placements in regular employment during the month numbered 251 of men and 95 of women.

Quebec

There was an increase of 16 per cent in the number of positions offered through offices in the Province of Quebec during July when compared with the preceding month, but a decrease of over 21 per cent in comparison with the corresponding month last year. Placements were 10 per cent higher than in June, but nearly 14 per cent less than in July, 1926. The reduction in placements from last year was almost entirely due to declines in the construction and maintenance group, although more workers secured employment in this group than in any other during the month. Last year there was an exceptionally heavy demand for workers in connection with power development on the Gatineau, as well as for railway construction at Rouyn and in other parts of the province. This work is now nearing completion, and as a result an adverse condition is shown when July this year is compared with July, 1926. There were declines in placements in all other groups except logging, farming, trade and services, the latter showing the largest gain. Placements by industrial divisions during the month included: manufacturing, 161; logging, 350; farming, 273; mining, 81; construction and maintenance, 864; and services, 588, of which 312 were of household workers. During the month 1,875 men and 471 women were placed in regular employment.

Ontario

The demand for workers, as indicated by orders listed at offices in Ontario during July, declined over 8 per cent from the preceding month, and nearly 10 per cent from the corresponding month last year. Placements also were nearly 11 per cent less than in June, and over 9 per cent below July, 1926. When comparing placements during July this year with those of July, 1926, by industrial groups, the most important gains were in logging and farming, while the largest declines were in manufacturing and construction and maintenance. Industrial groups in which most of the placements were effected during the month were: manufacturing, 1,521; logging, 1,104; farming, 1,985; transportation, 470; construction and maintenance, 2,680; trade, 303; and services, 3,236, of which 1,808 were of household workers. Regular placements numbered 6,862 of men and 1,434 of women.

Manitoba

During July orders received at employment offices in Manitoba called for nearly 3 per cent more workers than in the preceding month, but for nearly 7 per cent less than in the corresponding month last year. There was an increase of nearly 4 per cent in placements over June, but a decline of over 2 per cent when compared with July, 1926. Logging and construction and maintenance were the only groups to show any appreciable gains in placements over July last year, while services showed the largest declines. Industrial divisions in which most of the placements were effected during the month were: manufacturing, 175; logging, 201; farming, 1,367; construction and maintenance, 472; trade, 151; and services, 1,557, of which 1,156 were of household workers. Placements in regular employment numbered 1,872 of men and 603 of women.

Saskatchewan

Orders listed at employment offices in Saskatchewan during July called for approximately the same number of workers as in the preceding month, but the decline was over 8 per cent less than in the corresponding month last year. There was a decline of 4 per cent in placements when compared with June, and of less than 1 per cent when compared with July, 1926. Placements by industrial groups showed very little change when compared with July last year, and for the month under review included: manufacturing, 166; farming, 1,427; construction and maintenance, 715; trade, 123; and services, 916, of

which 559 were of household workers. Regular employment was procured for 2,261 men and 455 women during the month.

Alberta

Opportunities for employment as indicated by orders received at offices in Alberta during July were over 12 per cent less favourable than in the preceding month, and over 22 per cent when compared with the corresponding month last year. Placements declined over 10 per cent from June and over 21 per cent when compared with July, 1926. All groups except mining where no change occurred, and trade where there was a slight increase, participated in the reductions in placements from July, 1926, those in farming being the most pronounced. Industrial divisions in which most of the placements were effected during the month were: manufacturing, 309; farming, 1,553; construction and maintenance, 594; trade, 122; and services, 791, of which 508 were of household workers. Placements in regular employment numbered 2,435 of men and 392 of women.

British Columbia

There was a decrease of nearly 6 per cent in the number of positions offered through employment offices in British Columbia during July when compared with the preceding month, and of over 35 per cent in comparison with the corresponding month last year. Placements showed a nominal decline only when compared with June, but were nearly 33 per cent less than in July, 1926. Logging was the only group in which more placements were made this July than last, while large reductions were shown in manufacturing, construction and maintenance, and services. Placements by industrial groups included: manufacturing, 499; logging, 397; farming, 750; transportation, 202; construction and maintenance, 605; trade, 129; and services, 846. Of the latter, 433 were of household workers. During the month 1,816 men and 349 women were placed in regular employment.

Movement of Labour

During the month of July, 1927, the offices of the Employment Service of Canada effected 21,403 placements in regular employment, of which 12,751 were persons for whom the employment located was outside the immediate locality of the offices in which they were registered. Of the latter, 1,672 were granted the Employment Service reduced transportation rate, 1,181 travelling to points within the same province as the despatching office, and 491 to other provinces.

The reduced transportation rate, which is 2.7 cents per mile with a minimum fare of $4, is granted by the railway companies to *bona fide* applicants at the Employment Service who may desire to travel to distant employment for which no workers are available locally.

Transportation vouchers issued by the Quebec offices were 128 in number, 26 of which were provincial and 102 interprovincial. The former were all bushmen, despatched by the Quebec city office to camps within its own zone. Those travelling outside the province included 82 bushmen going from Hull to the districts surrounding North Bay, and 20 sawmill workers from Montreal to Sault Ste. Marie.

Of the 427 certificates for special transportation granted by Ontario offices. 411 went to employment within the province, and 16 to other parts of the country. The interprovincial transfers were to the province of Quebec, the Hull zone receiving 8 bricklayers and 7 railway construction labourers, and Montreal one hotel worker, all from North Bay. Provincially the North Bay office issued certificates to 34 carpenters, 3 labourers, 2 cooks, 2 power plant operators, one painter and one fitter, travelling to Timmins, one bricklayer, one cook, one labourer and one miner to Cobalt, and 3 carpenters to Peterborough. From Toronto one tool maker was transported to Chatham, from Cobalt 2 miners to Port Arthur, and from the Port Arthur office one farm labourer and 6 survey men to points within its own zone. The Sudbury transfers included 53 rockmen, 4 teamsters and one cook going to the Cobalt zone, 2 carpenters to Timmins, one cook to Sault Ste. Marie, and 9 mill hands and one clerk within the Sudbury zone. In addition 150 railway and building construction labourers went to employment, principally around Cobalt, Timmins and North Bay, and 130 bushmen for the most part to camps near Sudbury, Fort William and Port Arthur, the majority receiving certificates from the Northern Ontario offices.

From the Manitoba offices 539 persons travelled at the reduced rate, 217 within the province and 322 to outside points. With the exception of one bushman who was granted a certificate of transportation by the Dauphin office for a point within its own zone, all the business was transacted from Winnipeg. The bulk of the provincial transfers from Winnipeg were to the Brandon zone, and included 108 farm labourers, 10 teamsters, 3 construction labourers, 3 bushmen, one carpenter and 28 hotel and household workers, although

Dauphin also received 5 bushmen, 4 farm labourers, one saw setter, 2 handymen, one laundress, and one kitchen worker, and the Winnipeg zone, 45 farm labourers, one farm domestic, 2 construction labourers and one cook. Of those going to employment without the province, Port Arthur or the surrounding district was the destination of the 137 bushmen, 22 construction labourers, 11 farm hands, 11 sawmill labourers, 10 carpenters, 8 road workers, 2 engineers, one blacksmith, one cook, one stenographer, one setter, one baker and one filer, and Timmins of 2 iron workers. To Estevan and vicinity were transported 8 carpenters, 2 foremen and 5 hotel and household workers, to Regina 7 bushmen, one carpenter and 3 hotel workers, to Saskatoon 4 labourers, one carpenter and one female hotel worker, to Swift Current one glazier and one household worker, to Melfort 10 bushmen, and to North Battleford one waiter. The remainder were 64 farm labourers and 4 farm domestics, the majority for the Estevan, Regina and Swift Current zones.

The transportation certificates issued by Saskatchewan offices were all provincial, totalling 105. Of these 46 were farm hands, the majority of whom went from the Saskatoon and Moose Jaw offices to points within their respective zones, and 41 were bushmen, 37 of whom travelled from Saskatoon and 4 from Prince Albert, all to employment within the Prince Albert zone. Saskatoon also transferred one hospital domestic and one orderly to Weyburn, one gardener to North Battleford, one porter to Prince Albert and 4 labourers, one cook, one farm domestic, one school teacher and one porter within its own zone, and Moose Jaw in addition sent one carpenter to Weyburn. The movement from Regina included one carpenter for the Yorkton zone, one waiter for North Battleford, and one cook, one herder and one labourer for Moose Jaw.

The transfers from Alberta offices involved an issue of special rate certificates numbering 294, of which 267 were to provincial points and 27 to other provinces. Of the latter, Calgary despatched one cook and one farm labourer to Saskatoon, one carpenter to Estevan, 2 ranch hands and 2 cooks to Swift Current, 4 bricklayers to Regina, and 2 berry pickers to Vancouver, while from the Edmonton office 7 farm labourers went to Saskatoon, 2 carpenters, 3 farm hands and one housekeeper to North Battleford, and one setter to Prince George. The Calgary and Edmonton offices also effected all transfers provincially, those from Edmonton including 68 farm labourers, 19 mill hands, 16 labourers, 8 bushmen, 5 miners, 4 teamsters, 4 carpenters, 3 dye men, one engineer, one flunkey, one tractor man, one shoemaker, one foreman, 13 cooks, 3 housekeepers, 2 maids and one porter, all for the Edmonton zone, 8 farm hands for Drumheller, one painter and one farm hand for Calgary, and one farm labourer for Lethbridge. From Calgary 60 farm labourers travelled at the reduced rate to farms near Drumheller, 4 farm hands, one mechanic and one cook to Edmonton, 2 farm hands to Medicine Hat, one blacksmith to Lethbridge, and 26 farm labourers, 2 ranch hands and 8 hotel and household workers within the Calgary zone.

British Columbia transfers at the reduced rate numbered 179, of which 155 were for provincial points and 24 for other provinces. Provincially from Vancouver 35 bush workers, 13 labourers, 2 cooks, 5 flunkeys, 3 farm labourers, 4 carpenters, one blacksmith, 2 miners, one sawyer and one kitchen worker went to Kamloops, 4 miners, 10 station men, 5 carpenters, 2 machinists and one bull cook to Penticton, 10 station men, 2 bricklayers, one engineer and one cook to Nelson, one millwright and one engineer to Vernon, one setter to Prince George, one farm labourer to Cranbrook, and 8 railway labourers, 6 carpenters, 3 ranch hands, 3 flunkeys, 2 muckers, 2 gas engineers, one cook, one farm labourer and one chambermaid to points within the Vancouver zone. The Prince Rupert office transferred one miner to employment within its own zone, the Victoria office one cook and one painter to Vancouver, and the Nelson office 2 muckers to Cranbrook. From New Westminster one miner was despatched to Nelson and from Prince George 4 pole cutters went to Kamloops, and one cook, one fireman and one general labourer to the Prince George zone. The remaining provincial transfers were all bushmen, 2 going from each of the Prince Rupert, Prince George, Kamloops and Nelson offices to bush work within their respective zones. Of the interprovincial transfers 19 were farm labourers, 12 of whom received certificates for points in Alberta, 5 for Saskatchewan districts, and 2 for employment in Manitoba, from various British Columbia offices. In addition one saw filer, one sawyer, 2 labourers and one engineer travelled from Vancouver on the reduced rate to Edmonton.

Of the 1,672 persons who benefited by the Employment Service reduced transportation rate, 895 were carried by the Canadian National Railways, 552 by the Canadian Pacific Railway, 185 by the Temiskaming and Northern Ontario Railway, 32 by the Pacific Great Eastern Railway, and 8 by the Edmonton, Dunvegan and British Columbia Railway.

RECENT INDUSTRIAL AGREEMENTS AND SCHEDULES OF WAGES

A SUMMARY is given below of the more important industrial agreements and schedules of wages and working conditions that have recently been received by the Department. Such agreements are summarized each month in the Labour Gazette. In the majority of cases the agreements are signed by both the employers and employees. Verbal agreements, which are also included in the records, are schedules of rates of wages and hours of labour and other conditions of employment agreed upon between the parties concerned, and in effect though not signed. In addition to these, important schedules of wages are summarized, including civic schedules. In the case of each agreement or schedule, the rates of wages for the principal classes of labour are given, with other information of general interest.

Manufacturing: Vegetable Foods, Drink and Tobacco

Montreal, Que.—Certain Employing Bakery Firms and Bakery and Confectionery Workers, International Union of America, Local No. 115.

Agreement to be in effect from May 1, 1927, until May 1, 1928.

Only union members to be employed.

First-class hand may not be employed without a second and third.

Not more than six days per week, and not more than 8½ hours per day. Helpers, 10 hours. Half an hour for lunch.

Minimum wages per week, first and second hands, $45; third hand, $41; helpers, $25.

Overtime pay, per hour, oven worker, 95 cents; bench worker, 85 cents; helper, 45 cents.

Union labels to be supplied at 20 cents per thousand.

Only the employer can dismiss help.

Hebrew holidays to be paid for.

Employees may take home a loaf of bread each day.

May first and Labour Day to be holidays.

When there are no machines for making dough, only one batch (not exceeding 500 single loaves) shall be made in 8½ hours.

When two workmen enter into partnership one must be a union member.

Lethbridge, Alta.—Lethbridge Breweries, Ltd., and International Union of Brewery, Flour, Cereal and Soft Drink Workers of America, Local No. 354.

Agreement to be in effect from June 1, 1927 to May 31, 1928.

This agreement is similar to that previously in effect summarized in the Labour Gazette for October, 1926. The hours per week have been made 48 for the entire year.

Manufacturing: Iron Steel and Products

Montreal, Que.—Certain Local Firms and Sheet Metal Workers' International Association, Local No. 116.

Agreement to be in effect from July 1, 1927, until June 30, 1928.

Hours, nine per day for first five days.

Overtime after 5 p.m. and Saturday afternoons, time and one-half after midnight and Sundays, Christmas Day and New Year's Day, double time. No work on Labour Day.

Minimum wages, per hour, 70 cents.

Not more than one apprentice for three journeymen. Helpers may not use the tools to do a journeyman's work.

Travelling time, regular rate; after 10 p.m. a berth to be provided.

All travelling and boarding expenses to be paid by the employer.

Only union members are to be employed.

No sub-contracting or jobbing to be done by members.

Calgary, Alta.—Calgary Association of Master Tinners and the Sheet Metal Workers' International Association, Local No. 254.

Agreement to be in effect from April 1, 1927, to March 31, 1928, and thereafter with 90 days' notice of change.

Hours, 8 per day; four on Saturdays.

Wages per hour, $1.

Overtime, until 10 p.m., time and one-half; thereafter and Sundays and holidays, double time.

If labour is scarce in busy season, and an arrangement can be made regarding overtime work, such work on contract and manufactured lines may be at regular rate.

Travelling time and expenses out of city to be paid by employer.

Parties to agreement to have a permanent committee of three members to meet at call to take up matters pertaining to welfare of craft.

Manufacturing: Printing and Publishing

Calgary, Alta.—Albertan Publishing Company and Stereotypers Union, Local No. 109.

Agreement to be in effect from May 27, 1926, until May 27, 1929.

Wages per week, from May 27, 1927, to May 27, 1928, day, $44.10; night, $47.10. From May 27, 1928, to May 27, 1929, day, $45; night, $48.

Apprentice scale, from ¼ journeymen's scale for first year, ½ journeymen's scale for second year; ½ for third year; ⅔ for fourth year; ¾ for fifth year.

Hours, 45 per week on day shift; 42 per week on night shift.

OTTAWA, ONT.—CITIZEN PUBLISHING COMPANY AND THE INTERNATIONAL STEREOTYPERS AND ELECTROTYPERS' UNION, LOCAL No. 50.

Agreement to be in effect from August 1, 1926, to August 1, 1928, and from year to year thereafter unless changed on 90 days' notice from either party.

Wages per week, journeymen, $40.

Overtime, time and one-half; Sundays and holidays, double time.

Only union members to be employed.

One apprentice to a shift, serving five years.

Wages per day or night, first year, $1.50; second, $2; third, $2.50; fourth, $3.16⅔; fifth, $3.66⅔.

One week's notice of dismissal or leaving work.

Any misunderstanding over agreements or other dispute to be submitted to arbitration.

Union to furnish sufficient and competent help.

Conditions as to hours and arrangement of work to continue as long as total hours do not exceed 48 per week.

Manufacturing: Pulp, Paper and Paper Goods

IROQUOIS FALLS, ONTARIO.—ABITIBI POWER AND PAPER COMPANY LIMITED AND VARIOUS INTERNATIONAL UNIONS.

Agreement in effect from May 1, 1926, until May 1, 1927, as summarized in the LABOUR GAZETTE for August, 1926, to continue for one year, until May 1, 1928, with the following additional clause:

Union organizations parties to this agreement not to require the company to decide any questions of jurisdiction except in regard to what union's jurisdiction a specific position should come under when the organizations cannot agree among themselves. The company will not be asked to force an employee to join any particular organization, and the organizations concerned are not to pursue any measures to compel a man to join a union that might cause friction and interfere with operation.

PORT ARTHUR, ONTARIO.—PORT ARTHUR DIVISION, PROVINCIAL PAPER MILLS, LIMITED, AND INTERNATIONAL BROTHERHOOD OF PULP, SULPHITE AND PAPER MILL WORKERS.

Agreement to be in effect from May 1, 1927, to April 30, 1928.

Membership to include sulphite workers, groundwood workers, mechanics and helpers, yard labour, teamsters and slasher mill foreman, but not paper mill workers or slasher mill labour.

Union members to be given preference of employment.

New employees to be given 15 days to join the union; outside labour, two months.

Salaried men may join the union but are in no way affected by the agreement.

Plant to be in operation six days per week; longer when mutually agreed upon.

Hours per day, 8, six days per week.

Overtime, time and one-half.

At least four hours' pay for call-back for repair work.

Slasher mill workers ten hours per day except when otherwise arranged.

Tour workers, 8 hours per day.

Work between 7 a.m. Sunday and 7 a.m. Monday, time and one-half.

Hours in chlorine room dependent on amount of liquid required.

No unnecessary work to be performed on holidays. Rate time and one-half.

Maintenance men required to work on Sunday may have Saturday afternoon or all day Saturday off when possible, without pay.

Saturday afternoon work not to be paid time and one-half.

No strikes or lockouts shall occur.

Transportation and Public Utilities: Local Transportation

VANCOUVER, B.C.—YELLOW CAB COMPANY, LIMITED, AND THE TAXICAB DRIVERS (Metered Cabs) OF THE COMPANY.

Agreement to be in effect from June 1, 1927, until June 1, 1928, and thereafter subject to 30 days' notice.

This agreement was drawn up as a settlement of the strike mentioned in the LABOUR GAZETTE for July, 1927.

Wage scale: 1st 30 days, 33⅓ per cent commission. After 30 days, $2.50 per day or 35 per cent commission (whichever is larger).

The company agrees to recognize the Taxicab Drivers' Union, International Brotherhood of Teamsters, Chauffeurs, Stablemen and Helpers of America, and will not discriminate against any employee on account of membership in same.

The company agrees to recognize properly elected representatives from its own employees to discuss grievances.

Same hours to exist as heretofore.

Schedule of working conditions to be drawn up and discussed within the next 30 days.

Differences as to interpretation of this agreement may be submitted to a Board of Arbitration of two members appointed by each party a fifth and disinterested party to be elected by them if the four cannot agree.

During arbitration there shall be no suspension of labour.

Transportation and Public Utilities: Water Transportation

MONTREAL, QUEBEC.—THE HARBOUR COMMISSIONERS OF MONTREAL AND THE INDEPENDENT ASSOCIATION OF MONTREAL HARBOUR EMPLOYEES.

Agreement to be in effect for employees of the grain elevator system, construction forces, machine shop and shipyard, harbour yard shops, electrical department and cold storage plant from May 1, 1927 until May 1, 1928, and for other employees until the close of navigation, 1927.

Grain Elevator System, Elevators Nos. 1, 2, 3 and B.

Cold storage warehouse: per hour—all hourly labour except mechanic, shipper and sub-foremen, 55 cents.

Cold storage power house: per hour—operating engineers, 66 cents; helpers, 47 cents; firemen, 52 cents.

Sundays and certain legal holidays—time and one-half for emergency work.

Conditions for elevator employees: ten hours per day from opening of navigation until December 15. Thereafter until opening of navigation, 1928, 8 hours per day, with time and one-half after the 9th hour.

Overtime for all hourly men, time and one-half, including Sundays and holidays.

At least five hours' pay for Sunday work.

At close of navigation men shall be told when services will be again required. Only car shovellers will be asked to unload boats.

Work after 6 p.m. Sunday only in emergency.

Employees of Machine Shop, Notre Dame Street and Machine Shop, Guard Pier: Hours, 9 per day, 5 on Saturdays. Overtime after regular working day.

Traffic Shop—straight pay on Saturday afternoons.

Construction forces—hours in summer, 10 per day; hours in winter 8; overtime after the 9th hour in winter.

Firemen on locomotive cranes, when watching on Sundays, firemen's rate for Sunday work; this work will be done when possible by a regular watchman.

Electrical Department—Overtime after 8 hours when that is the regular shift.

Cold storage warehouse: hours in summer 10, in winter 8. Overtime, time and one-half.

General—A sub-foreman will be paid 5 cents per hour more than the men under his control.

Employees having grievances to have right of a hearing before the superintendent and assistance of a fellow employee chosen by him.

Employee has right of appeal to Commissioners.

The fellow employee may be the union delegate, but neither is to cause interruption of work without permission of the foreman or superintendent.

Promotions are to be made by the Commissioners.

The Commissioners will meet the Harbour Union representatives when differences arise.

BUILDING PERMITS ISSUED IN CANADA IN JULY, 1927

THE value of the building authorized during July showed a seasonal decline of 10.3 per cent as compared with the preceding month, while there was also a decrease of 11.6 per cent in comparison with the exceptionally high total recorded in July, 1926. The aggregate for the 63 cities was $16,511,011, as against $18,399,858 in June, and $18,683,415 in the corresponding month last year; the latter total included a permit for an engineering project estimated at some $4,000,000 undertaken in Vancouver, which made it considerably higher than in July of any other year of the record.

Some 50 cities furnished detailed statistics, showing that they had issued nearly 1,500 permits for dwellings valued at over $6,000,000, and some 2,200 permits for other buildings estimated at approximately $7,000,000. In June, authority was given for the erection of about 1,700 dwellings and 3,300 other buildings, valued at approximately $7,800,000 and $9,000,000 respectively.

Increases from the previous month were reported in Nova Scotia and Ontario, respectively, while elsewhere there were reductions, of which that of $1,805,784 or 38.5 per cent in Quebec was most pronounced.

In comparison with July, 1926, Nova Scotia, New Brunswick, Quebec, Ontario, Manitoba and Saskatchewan registered improvement, that of $947,567, or 182.9 per cent, in the last named being greatest. British Columbia reported the most marked decline, of $4,512,478 or 78.0 per cent.

Of the larger cities, Montreal, Toronto and Winnipeg recorded losses as compared with the preceding month, but increases over July last year, while in Vancouver there was a falling off in both comparisons. Of the other centres, Halifax, Sydney, Fredericton, Saint John, Three Rivers, Hamilton, Niagara Falls,

Peterborough, Port Arthur, St. Catharines, Sarnia, Sault Ste. Marie, Welland, Brandon, Moose Jaw, Regina, Lethbridge, Medicine Hat, Nanaimo, South Vancouver and Victoria reported gains as compared with both June, 1927, and July, 1926.

Cumulative Record for First Seven Months, 1927.—The following table gives the value of the building authorized by 63 cities during July and in the first seven months of each year since 1920. The cumulative total shown for this month includes for the first time permits valued at $72,800 issued by Charlottetown during April and May. The average index numbers of wholesale prices of building materials in the first seven months of the years since 1920 are also given (1913 = 100).

The aggregate for the first seven months of this year was thus slightly greater than in 1926, the previous high level of the record, while the average index numbers of wholesale prices of building materials continued to be lower in any other year since 1920.

Year	Value of permits issued		Average indexes of wholesale prices of building materials in first seven months
	In July	In first seven months	
	$	$	
1927	16,511,011	97,957,430	147·4
1926	18,683,415	97,443,834	150·2
1925	12,812,603	78,712,320	154·1
1924	11,681,196	72,355,350	163·8
1923	13,078,547	86,126,043	166·7
1922	15,740,810	87,022,484	161·5
1921	10,965,891	66,737,575	194·5
1920	13,743,045	75,497,755	215·3

The table below gives the value of the building permits issued by 63 cities during June and July, 1927, and July, 1926. The 35 cities for which records are available since 1910 are marked with asterisks.

[1] Report not received.

FAIR WAGES CONDITIONS IN DOMINION GOVERNMENT CONTRACTS

THE Department has recently received information regarding certain contracts executed by the Government of Canada which included among their provisions the fair wages conditions sanctioned by Order in Council for the protection of the labour to be employed. The contracts (Group "A") awarded in connection with the works of construction contain the following fair wages clause:

1. All mechanics, labourers, or other persons who perform labour in the construction of the work hereby contracted for, shall be paid such wages as are generally accepted as current from time to time during the continuance of the contract for competent workmen in the district in which the work is being performed for the character or class of work in which they are respectively engaged, and if there be no current rates in such district, then fair and reasonable rates, and shall work such hours as are customary in the trade, in the district where the work is carried on, or if there be no custom of the trade as respects hours in the district, then fair and reasonable hours, unless for the protection of life and property, or for other cause shown to the satisfaction of the Minister of Labour, longer hours of service are required. The Minister of Labour may at any time and from time to time determine for the purposes of this contract, what are the current or fair and reasonable rates of wages and the current or fair and reasonable hours, and may from time to time rescind, revoke, amend, or vary any such decision, provided that his determination and any amendment or variation shall not be operative prior to the period of three months immediately preceding the date thereof.

One of the contracts above mentioned contained a schedule of rates and hours based on the current standards of the district in these respects. The schedule is given below.

One contract was awarded for interior fittings (Group "B") containing the general fair wages clause, and other conditions for the protection of the labour employed, as sanctioned by the Fair Wages Order in Council which reads as follows:—

All workmen, labourers, or other persons who perform labour in the construction of the work hereby contracted for, shall be paid such wages as are generally accepted as current from time to time during the continuance of the contract for competent workmen in the district in which the work is being performed, and if there be no current rate in such district, then a fair and reasonable rate, and shall work such hours as those fixed by the custom of the trade as respects hours in the district where the work is carried on, or if there be no custom of the trade as respects hours in the district then fair and reasonable hours, except for the protection of life and property, or on due cause shown to the satisfaction of the Minister of Labour. In the event of a dispute arising as to what is the current or a fair and reasonable rate of wages or what are the current hours fixed by the custom of the trade or fair and reasonable hours it shall be determined by the Minister of Labour, whose decision shall be final; payment may also be withheld of any moneys which would otherwise be payable to the contractor until the Minister of Labour's decision has been complied with.

By the term "current wages" and the term "hours of labour fixed by the custom of the trade" in the foregoing are meant respectively the standard rates of wages and hours of labour either recognized by signed agreements between employers and workmen in the district from which the labour required is necessarily drawn or actually prevailing, although not necessarily recognized by signed agreements.

A statement was also received as to supplies ordered by the Post Office Department subject to the regulations for the suppressing of the sweating system and the securing of fair wages, etc.

The general labour conditions sanctioned by the Fair Wages Order in Council are as follows:—

Where there are special circumstances which in the judgment of the Minister of Labour make it expedient that he should do so, he may, in the manner and subject to the provisions hereinabove set forth, decide what are the current or fair and reasonable rates of wages for overtime, and what is the proper classification of any work for the purposes of wages and hours. Immediately upon receipt of notice of any decision of the Minister of Labour hereunder the Contractor shall adjust the wages and hours and classification of work so as to give effect to such decision. In case the Contractor shall fail so to do, or to pay to any employee or employees for any services performed or for any hours of labour, wages according to the rates fixed therefor by the Minister of Labour, the Minister of Labour may authorize and direct the Minister to pay any such wages at the rates so fixed and to deduct the amount thereof from any moneys owing by the Government to the Contractor and any such payment shall for all purposes as between the Contractor and the Government be deemed and taken to be payment to the Contractor, and the Contractor shall be bound in every particular by any such authority, direction and payment as aforesaid. The powers of the Minister of Labour hereunder shall not be exercised as to any employee or employees where it is established to his satisfaction that an agreement in writing exists and is in effect between the Contractor and the class of employees to which such employee or employees belong or the authorized representatives of such class of employees fixing rates of wages, overtime conditions and hours of labour.

2. The Contractor shall post and keep posted in a conspicuous place on the premises where the contract is being executed, occupied or frequented by the workmen, the Fair Wages Clause or Schedule inserted in his contract for the protection of the workmen employed, also any decision of the Minister of Labour under the preceding paragraph.

3. The Contractor shall keep proper books and records showing the names, trades, and addresses of all workmen in his employ and the wages paid to and time worked by such workmen, and the books or documents containing such record shall be open for inspection by the Fair Wage Officers of the Government at any time it may be expedient to the Minister of Labour to have the same inspected.

4. The Contractor shall not be entitled to payment of any money which would otherwise be payable under the terms of the contract in respect of work and labour performed in the execution of the contract unless and until he shall have filed with the Minister in support of his claim for payment a statement attested by statutory declaration, showing (1) the rates of wages and hours of labour of the various classes of workmen employed in the execution of the contract; (2) whether any wages in respect of the said work and labour remain in arrears; (3) that all the labour conditions of the contract have been duly complied with; nor, in the event of notice from the Minister of Labour of claims for wages, until the same are adjusted. The Contractor shall also from time to time furnish the Minister such further detailed information and evidence as the Minister may deem necessary in order to satisfy him that the conditions herein contained to secure the payment of fair wages have been complied with, and that the workmen so employed as aforesaid upon the portion of the work in respect of which payment is demanded have been paid in full.

5. In the event of default being made in payment of any money owing in respect of wages of any workmen employed on the said work and if a claim therefor is filed in the office of the Minister and proof thereof satisfactory to the Minister is furnished, the said Minister may pay such claim out of the moneys at any time payable by His Majesty under said contract and the amounts so paid shall be deemed payments to the Contractor.

6. These conditions shall extend and apply to moneys payable for the use or hire of horses or teams, and the persons entitled to payments for the use or hire of horses or teams shall have the like rights in respect of moneys so owing them as if such moneys were payable to them in respect of wages.

7. With a view to the avoidance of any abuses which might arise from the sub-letting of contracts it shall be understood that subletting, other than such as may be customary in the trades concerned, is prohibited, unless the approval of the Minister is obtained; subcontractors shall be bound in all cases to conform to the conditions of the main contract, and the main contractor shall be held responsible for strict adherence to all contract conditions on the part of sub-contractor; the contract shall not, nor shall any portion thereof be transferred without the written permission of the Minister; no portion of the work to be performed shall be done at the homes of the workmen.

8. All workmen employed upon the work comprehended in and to be executed pursuant to the said contract shall be residents of Canada, unless the Minister is of opinion that Canadian Labour is not available or that other special circumstances exist which render it contrary to the public interest to enforce this provision.

DEPARTMENT OF PUBLIC WORKS

Contract containing schedule of wages and hours

Additions and alterations to the Public Building at Drummondville, P.Q. Name of contractors, Stewart Construction Company, Limited, Sherbrooke, P.Q. Date of contract, July 28, 1927. Amount of contract, $11,550.

Contracts in Group "A" (Construction, etc.)

Dredging in Batiscan River, P.Q., channel under basin in front of Price Brothers' wharf. Name of contractors, National Dock and Dredging Corporation, Limited, Quebec, P.Q. Date of contract, August 18, 1927. Amount of contract, approximate expenditure, $11,000.

Dredging entrance of channel, etc., at Charlemagne, P.Q. Name of contractors, National Dock and Dredging Corporation, Limited, Quebec, P.Q. Date of contract, August 18, 1927. Amount of contract, approximate expenditure, $14,700.

Dredging western channel in the St. Maurice River at Three Rivers, P.Q. Name of contractors, National Dock and Dredging Corporation, Limited, Quebec, P.Q. Date of contract, August 18, 1927. Amount of contract, approximate expenditure, $6,600.

Dredging channel from outlet to lower wharf at Nicolet, P.Q. Name of contractors, National Dock and Dredging Corporation, Limited, Quebec, P.Q. Date of contract, August 18, 1927. Amount of contract, approximate expenditure, $12,870.

Dredging areas numbers 1, 2 and 3 at Rivière-du-Loup (en Haut), P.Q. Name of contractors, Les Chantiers Manseau, Sorel, P.Q. Date of contract, August 19, 1927. Amount of contract, approximate expenditure, $68,600.

Redredging Main Harbour Center at Port Arthur, Ont. Name of contractors, Canadian Dredging Company, Limited, Midland, Ont. Date of contract, August 6, 1927. Amount of contract, approximate expenditure $58,000.

Dredging at Ellis Bay, Anticosti Island, channel leading to the Anticosti Corporation wharves, etc. Name of contractors, Canadian Dredging Company, Limited, Midland, Ont. Date of contract, August 6, 1927. Amount of contract, approximate expenditure, $515,474.

Widening and deepening channel at the outer end and turning basin at new wharf of St. Anne Paper Company, Beaupré, P.Q. Name of contractors, Canadian Dredging Company, Limited, Midland, Ont. Date of contract, August 6, 1927. Amount of contract, approximate expenditure, $218,420.

Deepening a bar at the entrance of the Harbour at St. Nicholas Bay, Saguenay, Charlevoix County, P.Q. Name of contractors, National Dock and Dredging Corporation, Limited, Quebec, P.Q. Date of contract, July 17, 1927. Amount of contract, approximate expenditure, $12,400.

Deepening and enlarging channel to wharf at St. Michel de Bellechasse, P.Q. Name of contractors, National Dock and Dredging Corporation, Limited, Quebec, P.Q. Date of contract, July 27, 1927. Amount of contract, approximate expenditure, $16,647.

Deepening at the downstream side of St. Regis Paper Company's wharf, at Godbout, Saguenay, Charlevoix County, P.Q. Name of contractors, National Dock and Dredging Corporation, Limited, Quebec, P.Q. Date of contract, July 17, 1927. Amount of contract, approximate expenditure, $18,000.

Dredging of three shoals areas numbers 1, 2 and 3, at the western entrance to Murray Canal, at Presque'Ile, Ont. Name of contractors, The Randolph Macdonald Company, Limited, Toronto, Ont. Date of contract, July 28, 1927. Amount of contract, approximate expenditure, $14,630.

Deepening and widening the entrance channel and enlarging the turning basin at Goderich, Ont. Name of contractors, Kilmer and Barber, Limited, Toronto, Ont. Date of contract, July 22, 1927. Amount of contract, approximate expenditure, $73,280.

Deepening water berths at the wharves, St. John Harbour, West St. John, N.B. Name of contractors, St. John Dry Dock and Shipbuilding Company, Limited, St. John, N.B. Date of contract, July 25, 1927. Amount of contract, approximate expenditure, $25,000.

Deepening channel slip west of west pier at Port Dover, Ont. Name of contractors, A. W. Robertson, Limited, Montreal, P.Q. Date of contract, July 28, 1927. Amount of contract, approximate expenditure, $5,313.75.

Frost-proof warehouse and wharf improvements at the Railway Wharf, at Georgetown, P.E.I. Names of contractors, Henry James Phillips, Charlottetown, and Peter G. Clark, Summerside, P.E.I. Date of contract, August 8, 1927. Amount of contract (unit prices), approximate expenditure, $52,998.50.

Extension to wharf at Hecla, Man. Names of contractors, La Cour and Schieler, Winnipeg, Man. Date of contract, August 11, 1927. Amount of contract (unit prices), approximate expenditure, $11,820.

Extension to harbour wall, for Harbour Improvements at Owen Sound, Ont. Names of contractors, J. E. Woolrich and R. H. Brigham of Owen Sound, Ont. Date of contract, August 11, 1927. Amount of contract (unit prices), approximate expenditure, $39,948.

Construction of a Laboratory at No. 1 Fort, Lévis, P.Q. Names of contractors, Paquet and Roberge, Limitée of Ste. Marie, Beauce, P.Q. Date of contract, August 17, 1927. Amount of contract, $9,200.

New roofing on the Armoury at London, Ont. Name of contractors, The A. B. Ormsby Company, Limited, Toronto, Ont. Date of contract, August 3, 1927. Amount of contract, $4,497.

Construction of a wharf at Egmont, P.E.I. Name of contractor, Henry Jas. Phillips of Charlottetown, P.E.I. Date of contract, August 1, 1927. Amount of contract (unit prices), approximate expenditure, $10,945.

Construction of an extension to the breakwater at New Harbour, Guysborough County, N.S. Name of contractor, Thos. P. Charleson, Ottawa, Ont. Date of contract, August 1, 1927. Amount of contract, approximate expenditure, $27,140.

Additions and alterations to Governor General's Quarters, Citadel, Quebec, P.Q. Name of contractors, A. Deslauriers, Limitée, Quebec City, P.Q. Date of contract, July 26, 1927. Amount of contract, $64,833.

Construction of an extension to the slip in front of the new plant of the Thunder Bay Paper Company, Limited, in Main Harbour, North Extension, at Port Arthur, Ont. Names of contractors, Chambers, McQuigge and McCaffrey Company, Limited, Toronto, Ont. Date of contract, August 15, 1927. Amount of contract (unit prices), approximate expenditure, $184,900.

Construction of a concrete apron adjoining Ontario Sluices of Timiskaming Dam (downstream side). Name of contractors, Arthur E. Farley, Ottawa, Ont., and Percy R. Grant, Hazeldean, Ont., firm "Farley and Grant". Date of contract, August 12, 1927. Amount

of contract (unit prices), approximate expenditure, $54,996.75.

Contract in Group "B" (Interior Fittings.)

Supply and installation of interior fittings in the Post Office at Rawdon, P.Q. Names of contractors, R. A. Sproule and Son, Ottawa, Ont. Date of contract, July 28, 1927. Amount of contract, $900.

Department of Railways and Canals

Contracts in Group "A" (Construction, etc.)

Construction of a concrete dam at Lock No. 24, about 6½ miles above Peterborough, on the Trent Canal, Ontario. Name of contractors, Construction and Engineering Limited, of the City of Toronto, Ont. Date of contract, August 1, 1927. Amount of contract, schedule rates, approximately $82,276.50.

Manufacture and delivery of Taintor Gate Valves required for Locks Numbers 2, 3, 4, 5, 6 and 7, and Stoney Gate Valves required for Weirs numbers 2, 3 and 6, Welland Ship Canal. Name of contractor, Montreal Locomotive Works, Limited, of the City of Montreal, Que. Date of contract, August 6, 1927. Amount of contract, schedule rates, approximately $187,209.86.

Post Office Department

The following is a statement of payments made in August, 1927, for supplies ordered by the Post Office Department, under contracts which are subject to the Fair Wages policy:

Nature of orders	Amount of orders
	$ cts.
Making metal dating stamps and type, also other hand stamps and brass crown seals	631 35
Making and repairing rubber stamps, daters, etc.	155 57
Making up and supplying letter carriers' uniforms, etc.	17,301 18
Stamping pads, ink, etc.	490 19
Bag fittings	24,560 68
Scales	3,638 95
Mail bagging	24,025 38
Letter boxes	388 58

Report of the Industrial Commission of Colorado

The ninth biennial report of the Industrial Commission of Colorado for the period December 1, 1924, to December 1, 1926, indicates industrial activities in Colorado. The Industrial Commission administers the Workmen's Compensation Act, the State Compensation Insurance Fund, the Industrial Relations Act, the Minimum Wage Law, and its activities have shown a steady increase during the past two years.

The report notes an increased number of industrial accidents. In 1922 there were 12,859 accidents while in 1926 there were 19,797; an increase of over 50 per cent during the four-year period. The premium income of the state compensation insurance fund in 1922 was $339,537 and in 1926, $587,253, an increase of 73 per cent. The Workmen's Compensation Act of Colorado cost the state $6,050,033 for compensation payments in 1925, the latest year for which figures are available. The Claim Department of the Commission is responsible for the detailed work required in carrying out the compensation law of Colorado. This Department handles and files all first reports of accidents; supplemental reports; physicians' reports; admission of liability for compensation; receipts for compensation; and conducts hearings relating to compensation claims or admission of liability as required by law. During the past two years, hearings have been held in the leading industrial cities every sixty days and in the outlying communities twice a year. Hearings at Denver are held continuously. During the past two years the Department received 11,391 claims for compensation; held 3,785 hearings; head 342 applications for lump sum compensation; granted 4,191 referee awards, and 1,152 commission awards.

The applications for lump sum settlement were for a variety of purposes. The greater number of those granted were for the purchase of real estate or the payment of indebtedness thereon. Of 131 applications granted in 1926, 43 were granted for the purpose of purchasing homes. A few were allowed for going into business. Some applications were granted for the purchase of horses, chickens, trucks and other means of making a livelihood. Applications for lump sum settlements to deposit in banks or for investment in securities of speculative value were invariably denied.

PRICES, RETAIL AND WHOLESALE, IN CANADA, AUGUST, 1927

Cost of Living, Prices of Staple Articles and Index Numbers

THE movement in prices during the month was slight, the weekly family budget in terms of retail prices and the Dominion Bureau of Statistics index number of wholesale prices being little changed from the levels of the preceding month.

In retail prices the cost per week of a list of twenty-nine staple foods for an average family of five in terms of the average retail prices in some sixty cities was $10.93 at the beginning of August, as compared with $10.92 for July; $11.10 for August, 1926; $10.84 for August, 1925; $10.19 for August, 1924; $10.53 for August, 1923; $10.44 for August, 1922; $11.44 for August, 1921; $16.42 for August, 1920; $16.92 for June, 1920 (the peak); $13.41 for August, 1918; and $7.68 for August, 1914. The slight advance was due mainly to seasonal increases in the prices of eggs, butter and cheese, though increases also occurred in the prices of rolled oats, evaporated apples, tea and veal; while declines occurred in the prices of beef, mutton, fresh and salt pork, bacon, rice, beans, sugar, prunes and potatoes. Including the cost of fuel and rent with that of foods the total budget averaged $21.11 at the beginning of August, as compared with $21.10 for July; $21.32 for August, 1926; $21.05 for August, 1925; $20.57 for August, 1924; $21.03 for August, 1923; $20.88 for August, 1922; $21.98 for August, 1921; $26.60 for August, 1920; $26.92 for July, 1920 (the peak); $21.20 for August, 1918; and $14.41 for August, 1914. Fuel and rent were practically unchanged.

In wholesale prices the index number calculated by the Dominion Bureau of Statistics, based upon the average prices of 236 commodities in 1913 as 100, and weighted according to the commercial importance of the commodities, was slightly higher at 152.3 for August, as compared with 152.0 for July; 154.0 for August, 1926; 158.9 for August, 1925; 156.8 for August, 1924; 153.5 for August, 1923; 151.7 for August, 1922; 165.5 for August, 1921; 250.2 for August, 1920; 256.7 for May, 1920 (the peak); and 202.8 for August, 1918. Fifty-six prices quotations were higher, forty-three were lower and one hundred and thirty-seven were unchanged.

In the grouping according to chief component materials five of the eight mains groups advanced, while three declined. The groups which advanced were: the Animals and their Products group, due mainly to substantial increases in the prices of eggs, butter, cheese and hogs, which more than offset lower prices for cattle, hides and fresh meats; the Fibres, Textiles and Textile Products group, due to higher levels for raw cotton, cotton products, flax, jute, and hessian; the Wood, Wood Products and Paper group, due mainly to advances in the prices of some lines of lumber; the Non-Ferrous Metals group, due to increased prices for copper, lead and brass sheets, which more than offset lower prices for antimony and silver; and the Chemicals and Allied Products group. The Vegetables and their Products group was considerably lower, due to lower prices for wheat, barley, rice, flour, potatoes and sugar, which more than offset increases in the prices of corn, oats, flax, shorts, tea and rubber. The Iron and its Products group and the Non-Metallic Minerals and their Products group both declined, the former mainly because of lower prices for pig iron, and the latter mainly due to lower prices for brick.

In the grouping according to purpose, consumers' goods advanced, while producers' goods declined. The increase in the former was due to higher levels for butter, cheese, eggs, fowl and tea, which more than counterbalanced lower prices for flour, potatoes, sugar and beef. In the latter group building and construction materials declined, lower prices for brick, cast iron pipe and linseed oil being more than sufficient to offset increases in the prices of glass and some lines of lumber. Materials for the textile and clothing industries were substantially higher, while materials for the fur industry, for the leather industry, for the metal working industries, for the meat packing industries, for the milling industry, as well as miscellaneous producers' materials, were lower.

In the grouping according to origin raw or partly manufactured goods and fully or chiefly manufactured goods were practically unchanged. In the former increases in the prices of corn, oats, hogs, eggs, tea, flax, cotton, jute, rubber, copper and spelter offset declines in the prices of wheat, barley, potatoes, sugar, dried fruits, cattle, fresh beef, pig iron, silk, silver and antimony; while in the latter increases in the prices of butter, cheese, oatmeal, rolled oats, cotton products, glass and copper sheeting were offset by declines in the prices of flour, sugar, canned vegetables, bricks and cast iron pipe. Domestic farm products and articles of mineral

origin were somewhat lower, while articles of marine origin and articles of forest origin advanced slightly.

EXPLANATORY NOTE AS TO WHOLESALE PRICES

The index number calculated by the Dominion Bureau of Statistics is based upon the prices of 236 commodities, price levels in 1913 being taken as the base, that is equal to 100, the figures being weighted according to the commercial and industrial importance of each article included. The index number has been calculated by years back to 1890, being unweighted, however, for the period of 1890 to 1913 and has been calculated by months from 1919 to date for all groupings and from 1913 to date for the principal grouping. Summary tables of the Bureau's index number may be found in the supplement to the LABOUR GAZETTE for January, 1925, January, 1926, and in greater detail in the Report on "Prices and Price Indexes 1913-24," issued by the Bureau. A description of the methods used in the construction of the index number appears in the LABOUR GAZETTE for June, 1923.

The accompanying table gives the index numbers of the Dominion Bureau of Statistics by the principal groups in the three methods of classification and with those of the classification according to purpose or use in detail for the current month and for certain preceding dates.

EXPLANATORY NOTES AS TO RETAIL PRICES

The table of retail prices and rentals shows the prices at the beginning of August of seventy-one staple foodstuffs, groceries, coal, wood and coal oil and the rent for six-roomed houses in some sixty cities throughout Canada. All prices are for delivered goods. The exact quality, for which the quotation is given is set forth in the case of each commodity, and every effort has been made to ensure that the quotations in each case refer to the same class of commodity in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The prices of foods and groceries in each city, except milk and bread, are the averages of quotations reported to the Department and to the Dominion Bureau of Statistics by a number of representative butchers and grocers in each. The prices of fuel and the rates for rent are reported by the correspondents of the LABOUR GAZETTE.

Statistics similar to these were published each month from 1910 to 1920, the figures during this period being secured at the middle of each month by the correspondents of the LABOUR GAZETTE resident in each locality from dealers doing a considerable business with workingmen's households. From 1910 to 1915 the table contained a list of only the twenty-nine foods included in the family budget, with laundry starch, coal, wood, coal oil and rent. In 1915 when monthly publication of the budget in the LABOUR GAZETTE was begun, it was decided to extend the list of foods to 40, and in 1920 the list of foods and groceries was still further extended to include over 100 items.

Beginning with October, 1922, a number of commodities were dropped from the list, and in the case of a number of articles the average prices of the grades most sold have been given, owing to the impossibility of securing prices for uniform grades for the various cities from month to month.

Oleomargarine was dropped in March, 1924, the provision for its manufacture and sale since 1917, notwithstanding the Dairy Act, expired at the end of February, 1924.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workingmen. The first class is of houses in good condition, favourably located in such districts with good modern conveniences. The second class is of houses in fair condition less desirably located, but still fairly central, without modern conveniences.

The weekly budget of a family of five, calculated in terms of the average prices in the cities for which reports are received, includes twenty-nine staple foods, laundry starch, coal, wood, coal oil, and rent, these being the items for which statistics have been obtained each month and published in the LABOUR GAZETTE since January, 1910. The quantities of each commodity included are modifications of those employed in similar calculations by various authorities. For some articles comparatively large quantities are included owing to the absence of other important items of the same class. For instance, the only fruits are evaporated apples and prunes, and the only fresh vegetable is potatoes. But as market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportions of expenditure on the various classes of foods tends to be maintained. At times when the price of an article heavily weighted for this purpose rises, or falls (abnormally) the increase (or decrease) in food prices so indicated is exaggerated, and this should be taken into account in using the budget as an indicator of changes in the cost of living. In fuel and lighting the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the differences in the heating value of the various fuels. It was estimated, when the budget was first published in 1912 in the report on wholesale prices in Canada for 1911, that these calculations represented from sixty to eighty per cent of the expenditures of an ordinary family, according to the total income. For the average family of five the expenditure on these items of food, fuel, light and rent would be perhaps two-thirds or about sixty-five per cent of the total income.

While the budget serves to show the increase or decrease from time to time in the cost of the items included, it does not purport to show the minimum cost of food and fuel supplies for an average family in the Dominion or in any one province. The quantities of meats, dairy products, cereals, etc., included were adopted as affording a liberal supply for the healthy family of a man at hard physical work. On the other hand an average family with an income sufficient to do so would buy less meat, etc., but more fruit, fresh and canned vegetables, etc., so that comparative expenditure would be little changed.

‡The budget is intended to show the changes in the cost of the items included, not to show the minimum cost for an average family. See text. †December only. §Kind most sold. *For electric light see text.

‡‡An allowance for the cost of clothing and sundries would increase the figures by about 50 per cent: see text.

Index Number of Changes in the Cost of Living

In March, 1921, the Department published in the LABOUR GAZETTE a table of percentages of changes in the cost of living since 1913 as a tentative cost of living index number, using the figures of the above mentioned budget for the calculation for food, fuel and rent, with preliminary figures for clothing and sundries added and this table has been brought down to date at intervals since. The calculation of a comprehensive cost of living index number covering all items of workingmen's family expenditure in progress since 1918 has been

sufficiently advanced to enable the publication of preliminary figures by groups in a supplement to the LABOUR GAZETTE for January on Prices in Canada and in Other Countries, page 9. This table gives figures for June and December each year from 1914 to 1926, inclusive. Figures are now available also for March and September each year since 1917 and the accompanying table gives figures for December each year from 1914 to 1917, quarterly figures 1918 to 1926, and monthly figures for 1927. As stated in the above mentioned supplement the figures in the food group in the family budget are still used to show the changes in food prices but in the other groups the percentage changes in the prices of each article have been weighted according to workingmen's average family consumption, and in the fuel and light group, gas and electricity have been included.

CHANGES IN THE COST OF LIVING IN CANADA FROM 1913 TO 1927*

*The figures for "all items" were calculated by giving the following weights to each group: Food 35%; Fuel 8%; Rent 18½%; Clothing 18½%; Sundries 20%.

Cost of Electric Current and Gas for Householders

With rates in 1913 as 100, index numbers of electric light rates were 1900, 141.4; 1905, 135.6; 1910, 118.1; 1911, 113.4; 1912, 109.1; 1913, 100.0; 1914, 96.5; 1915, 90.8; 1916, 87.6; 1917, 87.2; 1918, 85.8; 1919, 85.8; 1920, 84.2; 1921, 84.9; 1922, 82.7; 1923, 79.5; 1924, 79.2; 1925, 75.6; 1926, 75.6.

The above figures were arrived at by converting to the base of 1913 as 100, an index number of electric current costs from 1900 to 1913 constructed for the Board of Inquiry into the cost of living in Canada, 1914-15 (Report, Vol. 2, page 318) and bringing the figures down to 1926. The figures are unweighted. The Dominion Bureau of Statistics has recently issued an index number of electric current rates for household consumption as follows: 1923, 73.8; 1924, 72.2; 1925, 69.9; 1926, 68.7. This index number is weighted according to consumption in each city. When the above index number, 1900-1926, is weighted according to population in each city covered for the years 1923, 1924, 1925 and 1926, the figures are substantially the same as those recently issued by the Bureau.

The following are index numbers of rates for manufactured and natural gas for the years 1913 to 1926 issued by the Dominion Bureau of Statistics (revised, Prices and Price Indexes, 1913-1926): Manufactured gas, 1913, 100; 1914, 98.3; 1915, 98.1; 1916, 96.3; 1917, 100.7; 1918, 107.4; 1919, 111.1; 1920, 125.4; 1921, 143.6; 1922, 140.6; 1923, 135.7; 1924, 134.6; 1925, 131.6; 1926, 131.1. Natural gas, 1913, 100; 1914, 109.6; 1915, 112.8; 1916, 112.8; 1917, 113.6; 1918, 114.2; 1919, 116.2; 1920, 123.8; 1921, 143.0; 1922, 163.1; 1923, 162.9; 1924, 162.6; 1925, 178.7; 1926, 172.2. For the years 1900 to 1913 two index numbers of gas costs, calculated for the Cost of Living Inquiry in 1914-1915, have been averaged and converted to the base of 1913 as 100, as follows: 1900, 125.8; 1901, 125.8; 1902, 125.8; 1903, 125.2; 1904, 123.9; 1905, 120.1; 1906, 107.5; 1907, 108.8; 1908, 106.9; 1909, 105.7; 1910, 103.8; 1911, 99.4; 1912, 100.6; 1913, 100.0.

Retail Prices

Prices of beef continued toward somewhat lower levels, sirloin steak averaging 32.4 cents per pound in August, as compared with 33 cents in July; round steak 26.8 cents in August and 27.4 cents in July; rib roast 24.4 cents per pound in August and 25 cents in July; and shoulder roast 17.9 cents per pound in August and 18.7 cents in July. Somewhat lower prices were reported from most localities. Veal was slightly higher at an average price of 20.2 cents per pound. Prices in the prairie provinces and in British Columbia were, on the whole, lower, but these declines were more than offset by advances in the eastern provinces. Mutton was slightly lower at 29.8 cents per pound, as compared with 30.1 cents in July. Both fresh and salt pork averaged lower, the former at 28 cents per pound in August, as compared with 28.2 cents in July, and the latter at 26.3 cents per pound in August, as compared with 26.6 cents in July. Bacon was also lower at an average price of 38.5 cents per pound. Lard was unchanged at an average price of 21.5 cents per pound.

Eggs showed a seasonal advance, fresh averaging 40.3 cents per dozen in August, as compared with 37.8 cents in July and 36.2 cents in June, and cooking averaging 36.7 cents per dozen in August, 34.3 cents in July and 33.1 cents in June. Higher prices were reported from practically all localities. Milk was unchanged in the average. Seasonal increases occurred in the prices of butter, dairy averaging 37.4 cents per pound in August, as compared with 37 cents in July, and creamery averaging 42.1 cents per pound in August as compared with 41.9 in July. Cheese was up from an average price of 30.7 cents per pound to 30.9 cents.

An increase in the price of bread was reported from Victoria. Soda biscuits and flour were unchanged in the average. Rolled oats advanced from an average price of 6.1 cents per pound in July to 6.3 cents in August. Rice was slightly lower averaging 10.7 cents per pound. Canned vegetables showed little change. Beans were slightly lower at 8.1 cents per pound. Onions declined from 9.1 cents per pound in July to 8 cents in August. Potatoes averaged $2.40 per ninety pounds in August, as compared with $2.43 in July. Higher prices were reported from many localities in the western provinces, but these increases were offset by declines in the eastern provinces. Evaporated apples showed little change at 19.3 cents per pound. Prunes were down from an average price of 15.1 cents per pound in July to 14.9 cents in August. Raisins and currents showed little change. Raspberry jam was up from an average price of 78.1 cents per four pound tin in July to 79.3 cents in August. Granulated sugar was lower in many localities, the price declining from 8.4 cents per pound in July to 8.2 cents in August. Tea was slightly higher, averaging 71.4 cents per pound. Both anthracite coal and bituminous coal were practically unchanged, the former averaging $16.19 per ton, and the latter $10.14. Hardwood was slightly lower at $12.07 per cord. Coal oil was down from an average price of 31.3 cents per gallon in July to 31.2 cents in August. No changes were reported in rent.

Wholesale Prices

The following is a summary of a statement of wholesale prices changes during the month issued by the Dominion Bureau of Statistics.

Wheat declined, the monthly average price for No. 1 Manitoba Northern cash wheat, Fort William and Port Arthur basis, being $1.597 as compared with $1.62 in July. The upward movement in corn continued, American yellow being up from $1.13 per bushel to $1.19. Flaxseed rose from $1.95 per bushel to $2, and western oats from 65¾ cents per bushel to 66½ cents. Western barley was down from 89½ cents per bushel to 84¼. Flour at Toronto was down from $8.94 per barrel to $8.72. Oatmeal was up from $4.78 per ninety-eight pound sack to $4.98, and rolled oats from $4.10 per ninety-pound sack to $4.30. Shorts advanced from $34.85 per ton to $36.25. Raw sugar was down from $4.09 per hundred to $4.02, and granulated from $6.31¾ to $6.12¾. Tea was up from 51½ cents per pound to 53½ cents. Lower prices for potatoes prevailed in practically all markets, Ontario varieties at Toronto being down from $2.38 per bag to $1.56, and Manitoba potatoes at Winnipeg from $1.35 per bushel to $1.26. Canned peas declined from $1.50 per dozen tins to $1.45. Oranges advanced from $7-$7.50 per case to $8-$8.50. Prunes declined from 10-11 cents per pound in July to 9-10 cents in August. Evaporated apples advanced from 12 cents per pound to 12¾ cents. Rubber was slightly higher, Ceylon being up from 35 cents per pound to 35¼ cents. Western cattle at Winnipeg declined from $8.33½ per hundred pounds to $7.34, and choice steers at Toronto from $8.55½ per hundred pounds to $8.23¾. Hogs averaged higher at $11 per hundred pounds, as compared with $9.75 in July. Choice sheep were up from $5.50 per hundred pounds to $6. Meats followed the trend in live stock, dressed beef, hindquarter, at Toronto, being down from $18.40 per hundred pounds to $18, while dressed hogs ad-

vanced from $15.05 per hundred pounds to $15.38. Finest creamery butter at Montreal advanced from 37 cents per pound to 38 cents, prints at Toronto from 39 cents per pound to 41 cents, and solids from 37 cents per pound to 40½ cents. Cheese at Montreal advanced from 24 cents per pound to 25 cents. Fresh eggs at Montreal were substantially higher, being 47-50 cents per dozen in August, as compared with 37-40 cents in July. Canned salmon, due to the prospect of a smaller pack, advanced. Beef hides at Toronto fell from 18-19 cents per pound to 17-18 cents and calf skins from 19-20 cents per pound to 18-19 cents. Raw cotton at New York was considerably higher at 20 cents per pound, as compared with 18 cents in July. The higher price was said to be due to unfavourable weather conditions and reports of damage by boll weevil. The advance in raw cotton was also reflected in higher prices for cotton goods and yarns. Flax fibre advanced from 22-25 cents per pound to 24 cents. Jute rose from $9.17 per hundred pounds to $9.90, and hessian from $10.75 to $11.25. Raw silk continued to decline, the price being down from $5.20 per pound to $4.90. Foundry pig iron at Montreal was down from $26.50 per ton in July to $26-$26.50 in August, while basic pig iron fell from $21 per ton to $20. White pine advanced from $53 per M ft. to $55, and hemlock from $28 per M ft. to $30. In non-ferrous metals copper advanced from $14.45 per cwt. to $15.50, copper sheets from 20¼ cents per pound to 21 cents, wire from 17 cents per pound to 17¾ cents, and zinc from $7.73 per cwt. to $7.95. Silver declined from 56¼ cents per ounce to 54½ cents, and antimony from 12½ cents per pound to 12¼ cents. Pressed brick was down from $30.40 per thousand to $26.03.

PRICES IN GREAT BRITAIN AND OTHER COUNTRIES

THE following notes and the accompanying tables give the latest information available as to the movements of prices in Great Britain and other countries. The index numbers of retail prices are from official sources unless otherwise stated. The authorities for the wholesale prices index numbers are named in all cases.

Great Britain

Wholesale Prices.—The Board of Trade index number, on the base 1913=100, was 141.1 for July, a decline of 0.5 per cent for the month. There was a decline of 1.6 per cent in foodstuffs, and an advance of 6.2 per cent in non-foods. There were declines in all food groups. Rises in cotton and other textiles and in the miscellaneous group were almost balanced by falls in iron and steel and in other metals and minerals.

The *Statist* index number (in continuation of Sauerbeck's figures) was 122.0 in July, showing a decline of 0.9 per cent on the June level. During the month the foodstuffs index declined 3.4 per cent, with a decline of 5.1 per cent in vegetable foods, owing to lower levels for potatoes, English wheat and flour; a decline of 2.9 per cent in animal food, owing to lower prices for beef, mutton and Irish bacon; and a decline of 0.7 per cent for sugar, coffee and tea. Materials rose 0.9 per cent with a decline of 1.2 per cent in minerals, and the same in sundries, and an advance of 5.4 per cent in the textile group, raw cotton, wool, flax and jute being higher. The general trend of prices is described as follows in the *Statist*, August 13:

> The price-level has now been trending steadily downwards since about the end of 1924, when the preparations were being made for a return to the gold standard. The fall, indeed, has been practically continuous except for the period of the coal strike of last year, when conditions were wholly abnormal. The July index is lower than the lowest point touched during the great depression period, and is the lowest on record since the end of 1915. It indicates a level of prices only 43½ per cent above the average of the three years 1912-1914.

The *Times* index number, on the base 1913=100, was 142.2 in July, showing a decline in the general level of 0.1 per cent. The index for foods declined 2.8 per cent from 149.0 to 144.9. For industrial materials the index rose 1.5 per cent from 138.6 to 140.7. There was a rise of 8.9 per cent in cotton. In cereals, wheat and flour prices declined while barley, oats and maize were dearer. A seasonal drop in the price of potatoes caused a sharp fall in the group "other food." There were downward movements in iron and steel and in copper, tin and coal.

Austria

Wholesale Prices.—The index number of the Federal Statistical Office was 19,102 in August on the base prices in kronen, first half of 1914=1, as compared with 20,430 in June and 20,096 in July. During the two months food prices declined 10 per cent and industrial materials rose 1.1 per cent.

Cost of Living.—The official index number on the base July, 1914=1 was 15,160 in August,

a decline of 1.3 per cent for the month. The level of food prices was lower and all other groups were unchanged.

Denmark

COST OF LIVING.—The index number of the Statistical Department, now published quarterly, was 176 for the beginning of July, a decline of two points from the level three months earlier on the base July, 1914=100. Foods rose one point to 153; clothing declined one point to 192; fuel and light declined 5.2 per cent to 201; taxes and dues declined about 6 per cent to 237 and housing and sundries were unchanged at 189 and 172.

France

WHOLESALE PRICES.—The index number of wholesale prices published by *Statistique Générale,* on the base July, 1914=100, was almost stationary in June, being 633, a decline of three points. Native products declined 1.9 per cent and imports rose 2.2 per cent. All foods declined slightly and all materials rose slightly, the most noticeable changes being a decline of 4.3 per cent in vegetable foods and a rise of 4.6 per cent in textiles.

Germany

WHOLESALE PRICES.—The index number for July on the base 1913=100, was 137.6, a decline for the monthly average of 0.2 per cent. The index of agricultural goods declined 1.7 per cent to 137.5 while that of industrial raw materials and semi-manufactured goods rose 0.5 per cent to 132.2 and that of industrial manufactured goods rose 0.8 per cent to 147.1.

COST OF LIVING.—The official index number, on the base 1913-14=100, rose 1.6 per cent from the June level to 150.0 in July. Foods rose 2.6 per cent to 156.8 owing to seasonal changes in potato prices, following the inclusion of new potatoes, and to increased prices of eggs. Heat and light rose 0.9 per cent owing to the cessation of summer rates for domestic fuel. Rent and clothing showed no change.

Italy

WHOLESALE PRICES.—The index number of the Milan Chamber of Commerce, on the base 1913=100, was 491.35 in July, a decline of 3.5 per cent for the month. Considerably large declines were shown by all the group indexes. The index of all foods fell 4.3 per cent and that of industrial materials fell 3.2 per cent.

Spain

WHOLESALE PRICES.—The index number of the Director-General of Statistics, on the base 1913=100, was 168 in July as compared with 171 in June. The index number for the foods section declined three points to 178 and that for materials declined one point to 159. The movements were slight with the exception of animal foods and vegetable foods which fell considerably. All materials groups declined or remained unchanged except textiles and leather which rose one point.

RETAIL PRICES.—The official index number of retail prices, Madrid, on the base 1914=100, was 189 in July, a rise of 10 points or 5.6 per cent for the month. Animal foods rose 8.2 per cent; vegetable foods declined slightly and fuels and miscellaneous articles rose 11.2 per cent.

Sweden

COST OF LIVING.—The quarterly index of the Department of Social Affairs, on the base July, 1914=100, was 169 at July 1, a decline of one point for the three months period. Foods declined one point; fuel and light declined 4 points; clothing declined one point and housing, taxes and sundries were unchanged.

Switzerland

COST OF LIVING.—The official index number, on the base June, 1914=100, showed no change in July from the June level of 160. Foods and clothing were unchanged; fuel and light declined one point and rent rose one point.

United States

WHOLESALE PRICES.—The index number of the Bureau of Labour Statistics, on the base 1913=100, was 144.6 for July, compared with 143.7 for June, an increase of two-thirds of one per cent. There was an increase of 1⅔ per cent in the group "farm products." Clothing materials and miscellaneous commodities averaged higher, while there were slight decreases shown by foods, fuels, metals, building materials and chemicals and drugs. No change was reported for the group house-furnishing goods.

Bradstreet's index number, showing the cost of a list of 106 commodities was $12.9015 on September 1, a gain of 2.5 per cent over August 1. There were advances in textiles, especially cotton and cotton goods, and in live stock, provisions, oils, and naval stores. There were declines in fruits, hides and

leather, metals, building materials and the miscellaneous group. Other groups showed little change.

Cost of Living.—The index number of the National Industrial Conference Board, on the base July, 1914=100, was 162 in July, a decline of 3 points from the June level. The food index declined 6 points to 153, shelter declined one point to 168, sundries rose one point to 173 and clothing and fuel and light were unchanged for the month at 169 and 160 respectively.

The index number of the Massachusetts Special Commission on the Necessaries of Life was 158.6 for July, on the base 1913=100, a decline of 0.7 per cent from the June level. Foods dropped nearly two per cent. Clothing declined about 1.8 per cent. Fuel rose slightly, increase in the price of coal being partially offset by lower prices of kerosene and gas.

The index number of the Bureau of Labour Statistics, on the base 1913=100 was 173.4 in June, a decline of 1.3 per cent from the December figure, 175.6. Foods declined 2.2 per cent to 158.5; clothing declined 1.1 per cent to 164.9; housing declined 1.3 per cent to 162.1; fuel and light declined nearly 4 per cent to 180.8; furniture declined 1.2 per cent to 205.2, and the miscellaneous group rose 0.3 per cent to 204.5.

RECENT LEGAL DECISIONS AFFECTING LABOUR

Wages not yet Earned cannot be Garnisheed

THE Cast of *Thoreson et al versus Board of Trustees, Blairmore School District,* which was reported in the Labour Gazette, June, 1927, (page 693), was followed by another action brought against the same trustees by three of the teachers who were involved in the first case. It will be recalled that under the decision of Mr. Justice Boyle the trustees obtained a judgment dismissing the action for wrongful dismissal brought against them by certain teachers. The trustees sought later to obtain payment in part of the costs in that case by garnisheeing the salaries due to the teachers for February, 1927. The garnishee summons was issued on February 26, but the salaries for that month were not due for payment until February 28. Three of the teachers applied to the Master in Chambers at Edmonton to set aside the summons on the ground that the wages for February, not being payable until the end of the month, were not earned at an earlier date and could therefore not be garnisheed. The Master refused the application, holding that, although the salaries were not due for payment until February 28, there was nevertheless an accrual of wages from day to day, and that this accumulated portion of the wages owed for February could in fact be garnisheed. The teachers appealed in the Alberta Supreme Court, which reversed the Master's decision. For the trustees it was argued that the sections of the School Act relating to wages contemplated an indebtedness accruing from day to day, on the principle that as each day passes there is a present debt, the payment of which may be postponed to the end of a period not greater than one month. In taking the opposite view the Court cited a British decision of 1877 (Hall versus Pritchett, 3 Queen's Bench Division, 215) to the effect that, where a salary is paid by the month, the future unearned salary for the month is neither a debt owing nor accruing, as there is no debt but only a possible liability, "because if the judgment debtor, in the interval before the next monthly payment became due, were to absent himself from his duties or be guilty of misconduct, the money would not be earned," and it was therefore held that the future salary could not be attached.

The appeal was allowed and the garnishee summons set aside, with costs to the applicants.*

—(*Alberta—Thoreson versus Board of Trustees, Blairmore School District.*)

Wage Contract with Bona Fide Intention on both Sides is Binding

A school teacher in New Brunswick, who had been engaged for two years in the same school, was visited shortly before the termination of her contract by two of the trustees, who discussed with her the question of re-engaging her for a third term. She declined to make a new contract for the same salary as formerly, and asked for an increase from $410 to $450. The two trustees agreed to this increase and accordingly a new contract was drawn up as required by the School Act, and signed by the two trustees and the teacher. After signing the contract the two trustees pro-

* Dominion Law Reports, Sept. 1, 1927, page 641.

ceeded to call on the third trustee, who refused his consent to the new arrangement. When, after two months, the school opened, the teacher on presenting herself at the school house was met by two of the trustees who refused her admission. She sought to obtain employment in other districts, but was informed by the inspector that there was no vacancy. She therefore brought an action for the recovery of the salary called for by the contract, or at least for four months at $45 per month. The case was tried in the County Court before a jury, who gave a decision in favour of the plaintiff for the amount claimed. This decision was affirmed on appeal by the Appeal Division, New Brunswick Supreme Court. The question at issue was whether or not there was a contract which could be sued upon; and if so, whether it was the contract of the defendant corporation. The court found, as to proceedings of the two trustees in consulting the third member of the Board, that there was a sufficient compliance with the provisions of the School Act which require a full meeting of the Board, and that there was evident intention on the part of the trustees to make the contract which was entered into with the plaintiff.

—(New Brunswick—Des Rosiers versus School District No. 1 Balmoral and Dalhousie.)

Lumber Camp Cooks classed as "Lumbering" employees

Two men employed as cooks by a lumber company in British Columbia claimed that they were entitled to be paid the minimum wage of forty cents per hour, as fixed by the first order of the Board of Adjustment under the Male Minimum Wage Act of the Province, governing the lumbering industry. The case was heard at Fort George by the County Court Judge, who held that the men were not so entitled, as employment of this nature was not included in the order made by the Board. The legal argument in the case turned upon the question of whether the occupation of a cook was "incidental to" the lumbering industry. The plaintiffs laid the circumstances before the Board of Adjustment, stating that while they were dissatisfied with the ruling of the County Court Judge and desired to enter an appeal, they were not financially in a position to do so. Judging that it was desirable to have an authoritative decision on the matter, the Board instructed counsel to argue the case on behalf of the plaintiffs in the Court of Appeal. This Court, consisting of Chief Justice Macdonald, Mr. Justice McPhillips, Mr. Justice Galliher, and Mr. Justice M. A. Macdonald, unanimously reversed the decision of the County Court Judge, and held that the plaintiffs were entitled to be paid the legal minimum wage as laid down in the order affecting the lumbering industry.

Definition of Agricultural Employees

The British Minister of Labour recently referred to the High Court of Justice (King's Bench Division) the question whether persons employed in the distribution of farm products should be considered as agricultural employees and therefore as not being insurable under the Unemployment Insurance Act, 1920, farm workers being exempt from the operation of this Act. Mr. Justice Roche formulated a working rule on this subject as follows:—

Persons are employed in agriculture and horticulture when employed upon any operations done about the production, preparation, or transfer of the products of farm or garden or orchard in the best saleable condition to a first buyer or to a salesman or agent for sale if one be employed, or to a distinct business under one proprietorship as in Daniel's case. But if the industrial status and occupations of the employed persons are such that, though they are working about or in connexion with a farm or garden or orchard, they may properly be said to be essentially pursuing their own special occupations, they are not employed in agriculture or horticulture within the meaning of this rule.

A signalman employed by a construction company in Quebec sustained serious injuries from the fall of a hoisting apparatus under which he was working. He claimed $17,545 in compensation, alleging that as the result of his injuries he would be unable to work for one year, and that his earning capacity would be reduced by 85 per cent for the rest of his life. A settlement, however, was reached out of court by which he agreed to accept $2,616 in full discharge of his claim and this settlement was ratified by the court at Montreal.

VOLUME 27] OCTOBER, 1927 [NUMBER 10

NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

Monthly Summary

A CONTINUED improvement in the employment situation in Canada was shown at the beginning of September, according to returns received by the Dominion Bureau of Statistics from 6,079 firms, each with a minimum of fifteen employees, representing practically every industry except agriculture, fishing, and highly specialized business operations. These firms employed 905,756 persons, as compared with 900,621 in the preceding month. The increase was rather larger than that noted on September 1 last year, and greatly exceeded the gain indicated at the same date in 1925. The employment index number (with January, 1920, as base= 100) stood at 109.7, continuing to be considerably higher than in any other month since the record was commenced in 1920. On August 1, 1927, the index was 109.2, and on September 1, 1926, 1925, 1924, 1923, 1922 and 1921, it stood at 104.9, 96.6, 93.1, 100.0, 93.7 and 88.7, respectively. Reports received from the offices of the Employment Service of Canada showed a marked increase in the volume of business transacted by them during August, owing to harvesting operations, but this seasonal increase was less than that of last year. At the beginning of September the percentage of unemployment reported among the members of local trade unions stood at 3.7, as compared with percentages of 3.3 at the beginning of August and 2.5 at the beginning of September, 1926. The percentage for September is based on returns received by the Department of Labour from 1,602 labour organizations, with an aggregate membership of 170,024 persons.

The average cost of a weekly family budget of twenty-nine staple foods was $10.87 at the beginning of September, as compared with $10.93 for August; $10.94 for September, 1926; $10.81 for September, 1925; $10.28 for September, 1924; $10.46 for September, 1923; $10.28 for September, 1922; $11.82 for September, 1921; $15.95 for September, 1920; $16.92 for June, 1920 (the peak); $13.31 for September, 1918; and $7.83 for September, 1914. In wholesale prices the index number calculated by the Dominion Bureau of Statistics, based upon prices in 1913 as 100, was slightly lower at 151.0 for September, as compared with 152.3 for August; 152.5 for September, 1926; 156.2 for September, 1925; 153.9 for September, 1924; 154.6 for September, 1923; 147.5 for September, 1922; 161.7 for September, 1921; 245.5 for September, 1920; 256.7 for May, 1920 (the peak); 213.7 for September, 1919; and 205.0 for September, 1918.

The time loss due to industrial disputes in September, 1927, was less than during August, 1927, and less than during September, 1926. Twelve disputes were in existence at some time during the month, involving 2,616 workpeople, and resulting in a time loss of 9,611 working days. Corresponding figures for August, 1927, were: thirteen disputes, 4,894 workpeople and 13,339 working days, and for September, 1926, fourteen disputes, 2,347 workpeople and 20,922 working days.

Industrial Disputes Investigation Act, 1907

During September the Department received the report of the Board of Conciliation and investigation in connection with a dispute between the Dominion Power and Transmission Company and certain of its employees in the Hamilton branch of the Canadian Electrical Trades Union. One new application was received during the month, but the dispute in this case was settled later through the intervention of the Minister of Labour, and it was unnecessary to establish a Board. A full account of the proceedings under the Act during the month will be found on page 1040.

Recent Vocational Education Bulletins

The Technical Education Branch of the Department of Labour has recently issued Bulletins 22, 23 and 24 of the Vocational Educational Series.

Bulletin 22, entitled "Apprenticeship and Vocational Schools," consists of four papers read at the second annual convention of the technical section of the Ontario Education Association at its meeting held in Toronto during Easter week. They deal with the following subjects: Apprenticeships in the

Building and Construction Industry, by J. M. Pigot; Apprenticeship and Labour Organizations, by J. T. Marsh; Co-operative Apprentice Training, by R. V. Russell; and Co-ordination of Drafting and Shopwork, by J. B. Temple. These papers were published by the Department at the request of the conference. Complete proceedings of this convention are not printed, and it is felt that the papers comprising this bulletin are of sufficient interest and value to teachers and others interested in vocational education to warrant their publication.

Bulletin 23, entitled "Metal Trades," was compiled from material contributed by teachers in the metal trades departments of representative vocational schools throughout the Dominion. It is divided into three parts. The first part consists of outlines of courses in machine shop practice given to day and evening students; the second part deals with forge work, foundry practice and welding; and the third part with sheet metal work and plumbing. Each of these sections contains a list of textbooks and references suitable for students following the courses.

Bulletin 24, entitled "Electricity and Printing," was compiled from material contributed by teachers of these subjects in representative vocational schools throughout the Dominion. The bulletin is divided into two parts. The first part consists of outlines of the various courses in electricity given in day and evening classes, together with list of textbooks and reference on electricity. The second part consists of courses on printing. A list of text-books and references suitable for students following the courses in printing is also given.

Canadian safety expert at Geneva

The International Labour Office at Geneva recently extended an invitation to R. B. Morley, General Manager, Industrial Accident Prevention Associations of Ontario, to attend a conference of safety experts who will prepare material for discussion at the General Conference in May, 1928. Dr. W. A. Riddell, Canadian Advisory Officer at Geneva, made a strong effort to have one of the Overseas safety experts included in the committee work, and Mr. Morley was selected by the governing body of the International Labour Office. Mr. Morley leaves during October for Geneva to collaborate in the important work which the committee will have in hand. He is the only representative from Canada and the United States attending the conference.

Workmen's compensation within the British Empire

The Parliament of Great Britain, at its last session enacted the Workmen's Compensation (Transfer of Funds) Act, 1927 (17 and 18 Geo. V, cap. 15), to give effect, as far as Great Britain is concerned, to a resolution adopted by the Imperial Conference last year. This resolution recommended that arrangements should be made between the different parts of the Empire whereby any sums awarded under the law relating to workmen's compensation in one part of the Empire to beneficiaries resident or becoming resident in another part of the Empire may, at the request of the authority by which the award is made, be transferred to and administered by a competent authority in that part of the Empire in which such beneficiaries reside.

For the purpose of giving effect to this resolution the Act provides that, in the event of any such arrangement being made between Great Britain and any other part of His Majesty's dominions, rules of court may be made for the transfer of moneys to that part of His Majesty's dominions, and for the receipt and administration by a County Court, of moneys transmitted therefrom.

Quebec examines compensation commission system

The Government of the Province of Quebec has appointed the Hon. Walter Mitchell, K.C., formerly provincial treasurer, and Mr. Louis Demers, K.C., of Quebec, to conduct an inquiry into the working of workmen's compensation boards in the neighbouring provinces. The Hon. Premier Taschereau in announcing this appointment, stated that the government desired to study this question in order to ascertain once and for all whether the commission system of administration would best suit conditions in the Province of Quebec in regard to workmen's compensation. Moreover the government desired to implement the promise made to labour representatives early this year that the subject would be finally dealt with at the forthcoming session of the legislature (Labour Gazette, April, 1927, page 346).

Massachusetts Commission on Compensation

A special commission appointed in the State of Massachusetts in 1926, to investigate the operation of the Workmen's Compensation law of the State, rejected a proposal to establish an exclusive state fund administered by a commission, and to exclude all insurance companies from the field of compensation. The report was signed by four commissioners,

while the fifth recommended the establishment of a so-called "monopolistic" state fund. The majority report, while opposing exclusive state control, declared that "there is nothing theoretically impossible or wrong in the exclusion of the insurance companies from workmen's compensation. They have no vested right in the business of insuring employers against the payment of compensation. Nor is there anything impossible or wrong in the State taking over this function. Nothing is gained by calling such a step monopolistic, nor is anything gained by calling the suggestion socialistic. A form of insurance which the law practically, though not legally, requires of employers by depriving them of their common law defenses is not a purely private business. The State may properly supply its citizens with what it requires of them. . . . Perhaps the best test," the report continues, "of the efficient operation of a workmen's compensation law is the speed with which the first payment of compensation is made to the employee; that is, the average number of days which elapses between the date of the injury and the receipt of the first payment."

Applying this test the commission found that in Ohio, which is regarded as the leader among the States having an exclusive state fund, the average period between the date of the injury and the payment of compensation to the employee is 37 or 38 days. In Massachusetts, the record of stock and mutual insurance companies showed that the average time between the day of injury and the first payment was 18.9 days. The commission considered further that "the board or commission which manages a monopoly of the insurance and at the same time hears and adjudicates claims, tends to be less liberal in its settlements, more technical in denying compensation, more narrow in its determination of injury, and on the whole less favourable and sympathetic to the employee. This tendency seems to be simply the natural and inevitable result of making the same board or commission both judge and insurer. It alone represents the employer at its hearings. It alone holds and administers the employer's fund. It naturally finds itself forced to take the employer's part and argue his case."

The minority report consisted of a draft act "to establish an exclusive state fund for the protection of those engaged in industrial pursuits and to allow employers to insure their own risks, under conditions, directions and control of a state industrial commission."

Progress in industrial safety

Further light on the recent increase of industrial accidents is given by Mr. Arthur W. Whitney, manager of the Bureau of Casualty and Surety Underwriters of the United States, in connection with a new safety movement now being organized. Some theories to explain this increase were noted in the Labour Gazette, June, 1927, page 593. Mr. Whitney believes that while there has been an absolute increase in accidents to workmen in recent years, yet if the factor of production is considered there has been a relative decrease. "While there has been a recent increase in the hazard of industry per man-hour, production per man-hour has increased so much more rapidly that the hazard in terms of production has decreased. Today, a barrel of flour, a pair of shoes, an automobile, or a barrel of cement can be made with less loss of life and limb than ever before."

Further evidence that the extensive work carried on for promoting safety and health in industry has not been without result was afforded by Dr. Frederick L. Hoffman, consulting statistician of the Prudential Insurance Company, in an address on the "Decline in lead poisoning," delivered at the Health Congress of the Royal Institute of Public Health, at Ghent, Belgium, last June. Declaring that "it is always a gratifying experience to be able to present facts and figures suggestive of progress in the vast field of industrial hygiene," Dr. Hoffman stated that in the United States, where regulation is the rule in most of the States, the rate of deaths from chronic lead poisoning in proportion to the total population have declined 40 to 50 per cent during the past decade. This decline was almost uniform for every section of the country separately investigated. "Considering the enormous industrial activity of the United States in all branches of lead using industries, it is certainly highly significant that during 1925 there should only have been 142 recorded deaths from lead poisoning, of which a fair proportion were attributable to non-industrial conditions." Dr. Hoffman states that, aside from improvements in the industrial hygiene of lead working establishments, the main causes of the reduction in fatal forms of lead poisoning is to be found in the better nutrition of the workman, in the lesser frequency of gross intoxication, in the shorter working hour, and in the decidedly improved methods of personal hygiene.

Federal commission on Maritime fishing industry

The decision of the Federal Government to appoint a commission to investigate conditions in the fishing industry in the Maritime Provinces was noted in the August issue of the Labour Gazette (page 829). During September the names of the commissioners were announced as follows:— Mr. Justice A. K. MacLean, president of the Exchequer Court of Canada, chairman; Mr. H. R. L. Bill, Lockeport, N.S.; Hon. Joseph Monbourquette, L'Ardoise, N.S.; Professor Cyrus MacMillan, McGill University, Montreal, and Mr. J. G. Robichaud, Shippegan, N.B. Mr. E. S. Carter, of St. John, N.B., has been selected to act as secretary to the commission

The Royal Commission on Maritime Claims (the "Duncan Commission") in their report published last year, referred to the great value of the maritime fishing industry, and mentioned some of the disabilities under which it is now carried on.

"The average value of the catch in the Maritime Provinces during the five years from 1920 to 1924 inclusive, was approximately $16,000,000, or over 36 per cent of Canada's total catch during that period. During the year ending March 31, 1925, the capital invested in the Maritime Provinces in equipment for fishing, such as boats, nets, traps, and general gear, was over $12,000,000, or 52 per cent of the total capital invested in Canada in such equipment. The capital invested in factories and curing establishments was $5,500,000, or 30 per cent of the total amount invested in all Canada in such establishments. Thus the total investment in the fishing industry of the Maritime Provinces in primary operations and manufacturing was over $17,500,000, or 40 per cent of the total Canadian investment in the fishing industry. The total number of persons employed in the fishing industry in the Maritime Provinces during the year ending March 31, 1925 was over 34,000, or 50 per cent of the total number employed in this industry in all Canada. The success of the fishing industry may, therefore, be regarded not only as a matter of the utmost importance to the Maritime Provinces, but also as a most valuable asset to Canada."

The "Duncan Commission" stated that there was an "underlying fear" in all the witnesses who appeared before them "that the Dominion authorities were giving so much thought to the development of industrial and manufacturing activities that they were neglecting the development also of natural products." The fishermen and dealers asked that the Dominion Government should endeavour to secure a wider market for the products of the industry, particularly in the United States. The commissioners believed that there was need for educational work in regard to fisheries, similar to the work now carried on by the Department of Agriculture for the benefit of the farming industry.

Cost of transporting coal from Prairie Provinces to Ontario

By an order in council dated February 13, 1926, the Board of Railway Commissioners for Canada was directed to make a report as to the cost of transporting coal per ton in full capacity train-load quantities from producing points in Western Canada to consuming points in Ontario. The findings of the Board on this reference are given in full in its fortnightly publication of "Judgments, Orders, Regulations and Rulings" (Volume XVII, No. 15). The opinion of the three members of the Board was not unanimous. Chief Commissioner H. A. McKeown and Assistant Chief Commissioner S. J. McLean gave the following estimate of the cost of transportation:

The out of pocket cost at..	$ 7.22 per ton.
The inclusive cost at.....	10.07 per ton.
Inclusive cost plus the element of profit.....	12.20 per ton.

Commissioner Frank Oliver estimated the cost as follows:

The out of pocket cost at..	$ 6.50 per ton.
The inclusive cost at..	Unable to draw definite conclusion from evidence submitted.
Inclusive cost plus profit	

The report contains detailed reasons and calculations upon which both opinions are based.

Co-operation as factor in economic reconstruction

At the 12th congress of the International Co-operative Alliance, held at Stockholm, Sweden, during August, vice-president Poisson commented on the important and significant fact that co-operative organizations were officially called to take part in the recent International Economic Conference (Labour Gazette, July, 1927, page 769, etc.) "Not only were two of our members appointed to the preparatory committee," he said, "but, in addition to the co-operative delegates from various countries, the Alliance itself was represented at the Conference and was recognized by the League of Nations and by the whole economic world. It was thus ranked among the greatest international economic organizations and represented as such. Here, then, co-operation is

considered from the point of view of general interests of humanity, as an institution which, through its consumers' and agricultural organizations, serves to promote public welfare and proper economic organization."

The congress passed a resolution placing on record its appreciation of the recognition given by the Council of the League of Nations to the International Co-operative Alliance as testifying to the widespread acceptance of the utility of the co-operative principle as a factor in the solution of world-wide economic problems and the re-establishment of economic peace.

Impressions of industrial conditions in United States

During the past two years several delegations from other countries have been visiting the United States in order to gain first-hand knowledge of industrial conditions, and to learn some lessons from American prosperity that might be applied in their own countries. The report of a delegation appointed by the British Government was outlined in the Labour Gazette, May, 1927. Similar delegations returned lately to Germany and Australia. The last issue of this Gazette contained a brief summary of a general report on industrial conditions in the United States, written by Mr. H. B. Butler, the deputy director of the International Labour Office, Geneva. The *Manchester Guardian* discussed the reports of some of these visitors in its issue of September 8. English observers are impressed chiefly by the extent of co-operation between employers and workmen. "The United States employers pool their information and give particulars about costs, prices, production, and other matters to their associations and to the United States Chamber of Commerce far more freely than is the habit in other countries. In this spirit a new movement has been launched. It is still in its infancy, but it is significantly strong in the most important industries. Employers call in their workpeople, set up works councils, give them functions and responsibilities, and seek to put the personal and corporate relations of the industry upon a basis of good will and confidence. The trade unions, on their side, have met this movement halfway. The trade unions represent, of course, a much smaller proportion of workers in the United States than in Britain, and they include as a rule only the small class of skilled and well-paid labour. They do not renounce the desire of a new and better ordering of industrial society, but they are ready to co-operate in increasing production."

English visitors are impressed also by the limits of trade union organization on this continent. The *Guardian* quotes Mr. Butler's remark that with two striking exceptions —the miners and the garment workers—trade union organization is almost confined to the "upper and medium strata among the native and Americanized wage earners." Of the trade unions in the United States the clothing workers are regarded as being the most interesting because they have sought to solve this particular problem and have achieved success in spite of special difficulties.

Clothing Workers' constructive policy

The "industrial strategy" of the Amalgamated Clothing Workers of America, to which reference was made in the preceding note, is described by the President Sydney Hillman, in a recent series of articles in the *Advance,* the organ of the Union. The union's policy consists, first, in carrying the fight into the territory of the "open shop" employees; and second, in co-operating with the employers of union labour. "The union is obliged to co-operate with the employers in maintaining the highest efficiency compatible with the maintenance of union standards . . . In opposing demands of the employers for breaking down union standards, the union have an open mind toward suggestions that will bring relief to the employer without endangering the interests of the union membership. The union cannot take the place of an outsider in relation to the industry; it must fight for a place in the councils of industry, a place of power as well as responsibility. Having achieved that place the union must proceed to utilize its new position. Proper union co-operation will place the union house at a great advantage in the field of competition . . . . . In numerous instances it has been possible for the union, through its experts, to point out actual shortcomings in the manufacturing process or show the way toward real improvement. We have co-operated to give to the employer the kind of garment that the market demands. It is hard for the outsider to understand, first, to what extent this kind of policy assists the employer, and second, to what extent the union thereby gains new power to use for the protection of the interests of its members."

Discussing the problem of unemployment in the industry President Hillman states that "by far the chief factors responsible for the lessened degree of work in the industry are the introduction of machinery and new methods of production, both of which make for greater efficiency and a larger output per person . . .

The continuous substitution of workers by machines has created a new national problem. We are confronted today not only with the permanent unemployment of larger numbers of people but also with the resulting decrease of the purchasing power of the community. How can we meet these problems? The proper solution is the reduction of hours of work and the adoption of unemployment insurance in all the industries of the country. Our organization since its inception has succeeded in reducing the number of hours of work in the clothing industry from 54 to 44. And further reduction from 44 hours to 40 would be a constructive change that would meet the need of the workers as well as of the industry."

President Hillman concludes that "there appears a joint interest of the union workers and the employer under contract with the union, both against the non-union employer. This situation, it is evident, offers great opportunities for the best as well as the worst of demagogues. It is in this connection that irresponsible and unscrupulous busybodies direct against the union co-operating with the employer, the charge of class-collaboration and other meaningless phrases which are likely to cause a good deal of confusion and demoralization."

Industrial arbitration in Australia

The Australasian Council of Trade Unions recently took exception to a wage award made by a judge for the engineering industry under the Commonwealth Conciliation and Arbitration Act, and resolved to ask for the enactment of legislation to provide for the substitution of the Industrial Peace Act of 1920 for the Arbitration Act. Objection was taken to the system of arbitration under the latter act, under which it was stated that the workman is required to appear before a judge in order to prove that he is entitled to a certain rate of pay. The Industrial Peace Act provides for the setting up of industrial councils consisting of representatives of the employers and workers, with an independent chairman. The provisions of this Act were outlined in the LABOUR GAZETTE, March, 1921 (page 296). It is now in operation in the coal mining industry.

The various Commonwealth and State laws for the regulation of wages and terms of contract are described in the following paragraph, which is taken from the *Official Year Book* of the Commonwealth of Australia, No. 16, 1923.—

Two systems, based upon different principles, exist in Australia for the regulation of wages and general terms of contracts of employment. A "Wages Board" system exists in Victoria and Tasmania, and an Industrial Arbitration Court in Western Australia. In the industrial legislation of New South Wales, Queensland, and South Australia, both systems are embodied, Industrial or Wages Boards, as well as Industrial Courts, being instituted. In accordance with the provisions of the Acts in New South Wales and Queensland, the Industrial Courts in these States have been exercising the functions of Wages Boards, and the work of the existing Boards has been greatly curtailed. Practically all the awards in these States during recent years have been made by the Industrial Courts. In Victoria, Wages Boards' decisions may be reviewed by the Court of Industrial Appeals. There is also the Arbitration Court of the Commonwealth, which has power, however, to deal with matters extending beyond the limits of a single State. The Arbitration (Public Service) Act, assented to on the 7th October, 1920, provides for the appointment of an arbitrator whose duties are to determine all matters submitted to him relating to salaries, wages, rates of pay, or terms or conditions of employment of officers or employees of the Commonwealth Public Service. This Act superseded that of 1911, under which Commonwealth Public Servants had access to the Commonwealth Court of Conciliation and Arbitration. The Industrial Peace Act 1920, which was assented to on 13th September, 1920, applies to industrial matters in relation to conciliation and arbitration for the prevention and settlement of industrial disputes extending beyond the limits of any one State. Provision is made for the appointment by the Governor-General of special tribunals for the prevention and settlement of any industrial disputes.

Public intervention in industrial relations

The principle of public intervention in matters affecting the conditions of labour is discussed, from the side of the employers, in a recent report of the German Federation of Employers' Associations, the principal conclusions of which will be found in *Industrial and Labour Information*, a weekly publication of the International Labour Office, in its issue of September 12. Briefly stated, this view acknowledges that State interference in economic affairs is justified and indeed necessary so far as it is concerned with the protection of the weak, the prevention of developments prejudicial to the general well-being, and the settlement of differences, the immediate solution of which, by agreement between the parties, is not possible or is possible only at the cost of injury to the public interests. If this principle be accepted it follows that the more abnormal the conditions of existence, the more necessary is Government interference, and *vice versa*. The report admits that the situation immediately after the war was extremely abnormal and that the period of transformation is not yet over; at the same time it contends that undue interference by the State—and this, it

is thought, is now proceeding—involves the risk of weakening the feeling of responsibility on the part of employers and workers, disturbing their relations and hindering the transition from arbitrary Government to democracy which is taking place in the social sphere as well as elsewhere. Following up this point, the report examines the possibilities of promoting co-operation between employers and workers. Such co-operation is impeded not by real conflicts of interest, but by differences as to the means to be employed to achieve the same end. In view of this it is necessary to bring about a closer attention to facts and respect for the honest convictions of those who do not agree, but who should not on that account be regarded as enemies. The Federation also suggests that, without prejudice to the collective representation of the interests of the workers, the labour organizations should allow the development of relations between undertakings and their workers, which it regards as complimentary rather than obstructive to the work of the trade unions.

The human factor in industry

An article in the July, 1927, number of the *International Molders' Journal* (the official organ of the International Molders' Union of North America, Cincinnati, U.S.A.), draws attention to the recent change in the trend of scientific management in industry.

When scientific management first appeared in the industrial field, it was concerned solely with the machinisation of work and worker. Latterly, it has become evident to the experts or "efficiency engineers," that human problems must enter into their calculations as much as, or more than, machinery. "The attitude of these efficiency engineers, these industrial experts, supports the position which the trade-union movement took from the beginning, that industrial wastes should be eliminated, that the most efficient methods of production should be applied, but that in doing these things, management and capital must co-operate with labour, for without this co-operation, an effort to force upon labour methods of production which tend to enslave it was to commit an industrial sin, the price of industrial sin being failure."

The advisory board of farmers' institutes, representing the farmers of British Columbia, recently passed a resolution approving of a proposal made at a meeting of the Canadian Chamber of Commerce at Vancouver, to the effect that a joint council of farmers and manufacturers should be established to discuss national problems. The resolution states that "no more important step could be taken to promote the welfare of the Dominion of Canada." Copies were sent to the headquarters of the Canadian Chamber of Commerce at Montreal and to the premiers of the four western provinces.

The Department of Health of Canada has published a Confederation Diamond Jubilee edition of "The Canadian Mother's Book" (Little Blue Books—Mother's Series, Number 1). This edition embodies the most modern ideas, and contains numerous illustrations and diagrams.

The Toronto *Globe* states that in 1921 the Toronto Teachers' Council put into operation a group life insurance plan, under which some 1,100 teachers were insured, and in 1926 this plan was revised and continued on very favourable terms for another five-year period. In 1926 the Secondary Teachers' Federation put into operation a sick benefit insurance scheme, which has been most successful.

The Nova Scotia Workmen's Compensation Board announced during September that it would be called to set aside a quarter of a million dollars in order to care for the widows and dependants of Nova Scotia fishermen who have lost their lives at sea this year. Four schooners bearing approximately 80 men were lost in a storm on August 24, and of these crews at least 64 were Nova Scotians who would come under the Workmen's Compensation provisions. Last year when 44 Nova Scotia fishermen were lost the amount necessary for this purpose was $160,000.

The Alberta committee on workmen's compensation which was appointed last June in pursuance of a resolution passed by the legislature at its last session (Labour Gazette, July, 1927, page 700) has been engaged during the past summer in gathering information from other provinces of the Dominion and from other countries in respect to compensation legislation and methods, including rates of payment under various conditions and on different working scales. This material will be considered by the committee, which is composed of five members of the legislature, five employers, and five representatives of the employees. A report is to be brought in for submission to the legislature, and it is expected that a number of changes in the present Alberta law will be recommended.

GENERAL REVIEW OF THE INDUSTRIAL SITUATION

THE employment situation at the end of September was reported by the superintendents of the Employment Service of Canada to be as follows:—

In the province of Nova Scotia the farming community was engaged in finishing up the grain harvest and harvesting roots; potatoes were not a very good crop owing to rot. The fishing industry reported good catches. The demand for workers in the logging industry had not really opened up to any great extent. Building construction was reported from Halifax and New Glasgow as fair. Manufacturing industries continued on a favourable basis. Coal production was being continued at a relatively high level. Transportation was fair. There were numerous orders registered at the offices for women domestic workers.

Except for potatoes the crops in the province of New Brunswick were reported to have been good. The fishing industry reported satisfactory catches, the catch of oysters being particularly good, with the price favourable to the fishermen. The logging industry in this province was fairly quiet, although there were some demands for piece workers. Building and construction were rather busy, with a substantial volume of buildings being proceeded with. Manufacturing industries appeared to remain normal. Trade was good, while transportation was reported to be active. There was a good demand for women domestic workers.

In the province of Quebec the employment offices reported that the demands for farm workers had decreased substantially. Orders for bushworkers exceeded the number of applicants, although numerous placements were being made. While the boot and shoe trade appeared to be decreasing in activity, other lines of manufacturing, including metals, textiles, clothing, printing and rubber, appeared to be maintaining a very satisfactory level of activity. Building and construction, including highway construction, was reported to be brisk; building tradesmen, generally speaking, were well employed, and there continued to be some demand for building labourers. Transportation and trade were both reported to be active. The decrease in the number of tourists visiting the province caused a falling off in the demand for women domestic workers. Throughout the province of Quebec the favourable situation earlier reported had continued, and prospects for the immediate future were bright.

In Ontario the demand for farm workers was fair for the season, and most of the offices reported their ability to place all workers of this class making application. With an encouraging volume of building under way, some increases in the numbers of workers engaged were noticeable, and most building mechanics were employed. After a slight recession largely due to stocktaking, manufacturing industries again showed a tendency toward expansion, and fairly full time was generally reported. The iron and steel industry at Sault Ste. Marie, however, furnished an exception, as a substantial decrease in activity there was reported. The demands for logging workers in the northern section of Ontario were gradually increasing in anticipation of the winter cut, and some offices reported that applicants, who were not plentiful, could all be placed. The mining industry maintained steady activity. There was a pronounced shortage of cooks-general throughout the whole province.

In Manitoba threshing was being finished as weather permitted, and no shortage of farm workers was reported. Farmers were starting ploughing and other fall work, but men were reticent about hiring for it in view of the possibility of securing further work at the threshing. Building construction was busy throughout the province, particularly in Winnipeg, where practically all trades appeared to be employed. While there was a good demand for casual labour the supply was amply sufficient. The demand for women domestic workers was fair, with the number of applicants about equal to it.

Throughout Saskatchewan harvest workers were generally sufficient, although there were some slight local shortages. Threshing continued where the weather was not interfering with it. In this province orders for general labour for jobs of short duration were not easy to fill, owing to so many workers being engaged in the agricultural industry. The construction industry was fairly busy. The supply of and demand for women domestic workers were about equal. Conditions generally were very busy just at this particular season, due to the stimulus given by the harvesting operations.

In Alberta favourable weather was hoped for in order that the grain still to be cut might be attended to. Men for harvesting were rather scarce, but satisfactory progress had been made. Building and railroad construction were both brisk, with tradesmen well employed and the demands for unskilled labour exceeding the applicants available at the moment. Due to a shortage of orders for

coal the mines were late in getting under way. However, men were not available in all cases to accept such vacancies as were offering, miners being engaged to a large extent at harvesting. There were a few calls toward the close of September for bush workers. Women domestic workers were scarce, but there was a surplus of harvest cooks.

In the logging industry in the province of British Columbia there were some demands for workers and some shortages of applicants, the latter being probably due to workers having left for the harvest in the Prairie Provinces. The metal mining industries in this province remained normal. Fair activity was reported in the building and construction group, some centres reporting all tradesmen employed. The manufacturing industries remained much the same, although canneries were showing greater seasonal activity. Conditions generally throughout the coast province were rather encouraging and unemployment appeared to be at a minimum.

Employer's Reports

There was continued improvement in the employment situation at the beginning of September, when the 6,079 firms reporting to the Dominion Bureau of Statistics showed a combined working force of 905,756 persons, as compared with 900,621 in the preceding month. This increase was rather larger than that noted on September 1 last year, and greatly exceeded the gain indicated on the same date in 1925. The index number standing at 109.7, continued to be considerably higher than in any other month since the record was commenced in 1920. On August 1, 1927, it was 109.2 and on September 1, 1926, 1925, 1924, 1923, 1922 and 1921 it was 104.9, 96.6, 93.1, 100.0, 93.7 and 88.7, respectively.

Somewhat larger payrolls were reported in Quebec, Ontario and the Prairie Provinces, while employment in the Maritime Provinces and British Columbia declined moderately. In the Maritime Provinces, there was a slackening of activity, chiefly in the mining, transportation and highway construction divisions, while practically no change, on the whole, was noted in manufacturing. In Quebec, there were further gains in building and highway construction and in services, logging and mining, while manufactures showed no general change. In Ontario, manufacturing as a whole employed fewer operatives, while logging camps, construction, services, trade, transportation and mining showed improvement. In the Prairie Provinces, manufacturing, mining, transportation and highway construction afforded heightened employment, but railway construction was seasonally slacker. In British Columbia, there was a reduction in employment, chiefly in fish-preserving, sawmilling and non-ferrous metal factories and in construction, while logging reported improvement.

An analysis of the returns by cities shows that employment in Montreal, Quebec, Toronto, Windsor and Winnipeg advanced; in Ottawa, the situation was practically unchanged, while in Hamilton and Vancouver curtailment was registered. In Montreal, manufactures showed general improvement, except in iron and steel works, and construction, transportation and services were also considerably busier. In Quebec, most of the gains took place in construction and manufacturing. In Toronto, manufacturing, services and trade recorded heightened activity. In Ottawa, slight increases in manufactures were practically offset by similar declines in construction. In Hamilton, iron and steel and building construction released help, while other industries showed little general change. In Windsor and the other Border Cities, quarrying and transportation were rather more active, while employment in automobile factories remained quiet. In Winnipeg, manufacturing, communications and trade registered most of the improvement. In Vancouver, reductions in personnel in lumber mills accounted for most of the contraction, although construction was also slacker.

Within the manufacturing group in the Dominion as a whole, there were declines in iron and steel, lumber, fish-canning and building material plants, while vegetable food, electrical apparatus, electric current, boot and shoe, textile and some other industries reported greater activity. Logging, mining, communications, transportation, building construction, services and trade, on the whole, also reported increased employment.

An article elsewhere in this issue gives in some detail the employment situation as at the beginning of September.

Trade Union Reports

The volume of unemployment among local trade unions at the close of August was slightly in advance of that recorded in the previous month, as was indicated by the returns received from 1,602 organizations with a combined membership of 170,024 persons. Of these, 3.7 per cent were without work on August 31, as against percentages of 3.3 in July, and 2.5 in August last year. The situation among the New Brunswick and Saskatchewan

unions was slightly more favourable in August this year than in the preceding month; in Manitoba the same percentage of idle members was indicated in both July and August, while in the remaining provinces there were offsetting reductions. When comparing with the returns for August last year Quebec, Ontario, Manitoba and British Columbia unions reported moderate declines and the remaining provinces small increases in activity.

A summary of unemployment as reported by local trade unions at the close of August will be found elsewhere in this issue.

EMPLOYMENT OFFICE REPORTS

During the month of August, 1927, the offices of the Employment Service of Canada referred 56,164 workers to positions, and made a total of 54,624 placements. Of these the placements in regular employment were 44,776, of

*Figures for end of previous months. †Bradstreet. ‡*Maclean Building Review*. §For group figures see articles elsewhere in this issue. **Figures for four weeks ending October 1, 1927, and corresponding previous periods. ***The index of the physical volume of business includes, forestry, mining, manufacturing, employment in wholesale and retail trade, imports, exports, car loadings, shares traded and bank debits. Industrial commodity production includes forestry, mining, manufacturing and construction. Manufacturing includes consumers' goods and producers' goods. ††Preliminary. (1)Excluding lines east of Quebec. (2)Including lines east of Quebec.

which 39,703 were of men and 5,073 of women. The placements in casual work numbered 9,848. Employers notified the Service of 58,858 vacancies, of which 47,729 were for men and 11,129 for women. The number of applicants for work was 64,282, of whom 52,440 were men and 11,842 were women. A marked increase is shown in the volume of business transacted when the above figures are compared with those of the preceding month, due to harvest operations in the west, but a decline is registered when a comparison is made with the corresponding month last year, the reports for July, 1927, showing 31,955 vacancies offered, 38,684 applications made, and 29,521 placements effected, while in August, 1926, there were recorded 77,501 vacancies, 78,519 applications for work, and 70,980 placements in regular and casual employment. A report in detail of the work of the offices for the month of August, 1927, may be found elsewhere in this issue.

Production in certain Industries

Some figures indicating the recent movement of trade and industry are given in the table on page 1036.

The Dominion Bureau of Statistics reported that the physical volume of business in Canada was practically maintained in August as compared with the preceding month. The index was 138.0 in August as compared with 138.6 in July, month-to-month comparison being facilitated by adjustment for seasonal tendencies. The report states further that "favorable weather during the last two months did much to offset the handicap of a backward seeding season, and the harvesting of one of the largest crops on record has brightened the economic outlook for the next twelve months. The physical volume of business was less in the third quarter of the present year than in the second. The reaction was moderate, however, and the movement of the new crop to ultimate markets will tend to expand many of the factors which enter into the Canadian volume of business. In the manufacturing division the production of newsprint reached a new record in August and the primary iron and steel industry was more active than in July. Automobile production was in greater volume than in the preceding month, but much below the level of last year. Activity in the mining industry was nearly maintained, while contracts awarded in the construction industry were in lesser amount. The movement of freight was in greater volume, the revenue carloading showing a substantial increase in August.

"The index of industrial production maintained in the Bureau is designed to measure the trend of industrial activity in the four branches of construction, mining, forestry and manufacturing. The index in August showed a drop of about eight points, due chiefly to the falling off in the volume of construction contracts, though the statistics of building permits indicate the projected construction in cities and towns was at at high level in August. The mining index was slightly lower in the month under review in spite of increases in gold, asbestos and coal; the first of these is measured by comparing from month to month the exports and the receipts at the Royal Mint and the Vancouver assay office; the exports of asbestos and employment in coal mining are used as an indication of the production in these lines. Heavier output by the pulp and paper industry resulted in an increase in the forestry index, the exports of lumber being at a lower level than for some time. In the manufacturing division an uneven development was in evidence, the declines slightly more than offsetting the gains. The primary iron and steel and automobile industries were somewhat more active compared with the preceding month; the inspected slaughterings were also in greater volume and the sugar refineries reported a larger output.

"The high level of 109.7 reached by the index of industrial employment confirms the comparatively high level of the indexes of physical volume, though the employment series is inclined to lag behind the production index for several months. The seasonal nature of the employment index tends to obscure the real trend of the index, and comparisons may only be satisfactorily made after adjustment for seasonal tendencies. After such adjustment the index of employment was 107.9 in August compared with 107.5 in July. These adjusted indexes were only exceeded in recent years by April and June, when the corrected indexes were 108.9 and 108.0 respectively."

The output of coal from Canadian mines during July decreased 15 per cent from the production for the preceding month, but it was 29 per cent greater than the average for July in the past five years. The figures were 1,229,104 tons in July as against 1,443,405 tons in June and an average of 953,549 tons during the five preceding years. All the coal producing provinces showed a decrease in production as compared with the preceding month, and the provinces of Saskatchewan, New Brunswick, and British Columbia showed decreases as compared with the average for the month in the five preceding years.

Men employed in the coal mines of Canada during July numbered 26,237, of whom 20,223 worked underground and 6,014 on surface,

as compared with a total of 25,717 in June, of whom 19,739 worked underground and 5,978 on surface. Production per man was 46.8 tons in July as against 56.1 tons in June. During July the production per man day was 2.3 tons, as compared with 2.4 tons in June. The tonnage lost was largely due to "lack of orders."

Building Permits and Contracts Awarded

According to a report prepared by the Dominion Bureau of Statistics, the value of the building permits issued by the municipal authorities in sixty-three cities in Canada during the month of August 1927, amounted to $29,651,888, as compared with $16,511,011 in July, 1927, and $11,672,599 in August last year.

The *McLean Building Review* estimates the total value of the construction contracts awarded in Canada in September, 1927, at $32,787,700. Of this amount $16,975,200 was for business building; $9,951,700 for residential building; $4,097,300 for engineering construction, and $1,763,500 for industrial building. The apportionment of contracts awarded, by provinces, during September, 1927, was: Ontario, $18,212,600; Quebec, $9,810,500; Prairie Provinces, $2,400,700; British Columbia, $1,954,200, and the Maritime Provinces, $409,700.

The "contemplated new construction" in Canada during September, 1927, according to the same *Review,* totalled $30,675,800, $11,051,500 of this amount being for residential building; $8,532,900 for business building; $2,709,500 for industrial building, and $8,381,900 for engineering construction (including bridges, dams and wharves, sewers, watermains, roads, streets and general engineering.

The total value of construction contracts awarded in the Dominion during the January-September period, 1927, was $304,873,700, and was classified as business building, $110,898,800; residential building, $90,979,400; public worke and utility, $70,944,300, and industrial undertakings, $32,051,200. The distribution by provinces during the same period was: Ontario $138,863,000; Quebec, $96,826,800; the Prairie Provinces, $39,588,300; British Columbia, $22,500,100, and the Maritime Provinces, $7,095,500.

External Trade

A summary of Canadian trade prepared by the Department of National Revenue shows that in August, 1927, the merchandise entered for consumption amounted to $99,348,340, as compared with $91,368,667 in July, 1927, and $89,669,575 in August, 1926. The domestic merchandise exported amounted to $94,216,194 in August, 1927, as compared with $79,395,041 in July, 1927, and $90,621,419 in August, 1926.

The chief imports in August, 1927, were: iron and its products, $23,310,387; fibres, textiles and textile products, $16,688,079, and non-metallic minerals and products, $15,056,410.

The chief exports in the same month were in the group of agricultural and vegetable products, mainly foods, $26,878,059; wood, wood products and paper, $26,817,198, and animals and animal products, $16,032,696.

In the five months ending August, exports of agricultural and vegetable products, mainly foods, were valued at $167,620,826; wood, wood products and paper, $118,988,784, and animals and animal products, $59,983,365.

Strikes and Lockouts

The time loss due to industrial disputes in September, 1927, was less than during August, 1927, and less than during September, 1926. There were in existence during the month twelve disputes, involving 2,616 workpeople, and resulting in a time loss of 9,611 working days, as compared with thirteen disputes in August, involving 4,894 workpeople, and resulting in a time loss of 13,339 working days. In September, 1926, there were in existence fourteen disputes, involving 2,347 workpeople and resulting in a time loss of 20,922 working days. Three of the strikes and lockouts commencing prior to September terminated during the month and one of the strikes and lockouts reported as commencing during September also terminated during the month. At the end of September, therefore, there were on record eight strikes and lockouts, effecting 178 workpeople, not including those strikes and lockouts in which employment conditions were reported to be no longer affected but which had not been formally called off.

Prices

The cost per week of a list of twenty-nine staple foods for an average family of five in terms of the average retail prices in some sixty cities was $10.87 at the beginning of September, as compared with $10.93 for August; $10.94 for September, 1926; $10.81 for September, 1925; $10.28 for September, 1924; $10.46 for September, 1923; $10.28 for September, 1922; $11.82 for September, 1921; $15.95 for September, 1920; $16.92 for June, 1920 (the peak); $13.31 for September, 1918; and $7.83 for September, 1914. The decline was due mainly to a substantial seasonal fall in the price of potatoes, although the prices of beef, mutton, beans, evaporated apples, prunes, yellow sugar and tea were also somewhat

lower. Seasonal increases occurred in the prices of eggs, milk, butter and cheese. Including the cost of fuel and rent with that of foods the total budget averaged $21.05 at the beginning of September, as compared with $21.11 for August; $21.15 for September, 1926; $21.02 for September, 1925; $20.65 for September, 1924; $20.97 for September, 1923; $20.90 for September, 1922; $22.37 for September, 1921; $26.38 for September, 1920; $26.92 for July, 1920 (the peak); $21.11 for September, 1918; and $14.33 for September, 1914. Fuel was slightly higher, due to increases in the prices of anthracite coal. No changes were reported in rent.

In wholesale prices the index number calculated by the Dominion Bureau of Statistics was slightly lower at 151.0 for September, as compared with 152.3 for August; 152.5 for September, 1926; 156.2 for September, 1925; 153.9 for September, 1924; 154.6 for September, 1923; 147.5 for September, 1922; 161.7 for September, 1921; 245.5 for September, 1920; 256.7 for May, 1920 (the peak); 213.7 for September, 1919; and 205.0 for September, 1918. In the classification according to chief component materials three of the eight main groups declined, three advanced, while two were unchanged. The Vegetables and their Products group was substantially lower, due mainly to lower prices for grains, flour, potatoes, rubber, hay and straw. The Non-Ferrous Metals group declined somewhat, because of lower prices for copper, lead, tin and spelter, while silver and zinc sheets were higher. The Chemicals and Allied Products group also declined. The Animals and their Products group and the Fibres, Textiles and Textile Products group advanced, the former mainly because of advances in the prices of milk, butter, cheese, eggs, hides, leather, boots and shoes; and the latter due mainly to higher prices for cotton, gingham, cotton bags, sash cord, and hessian. The Non-Metallic Minerals group advanced, chiefly because of higher prices for anthracite coal. The Wood and Wood Products group and the Iron and its Products group were unchanged.

Empire Marketing Board

The Empire Marketing Board, appointed in the early summer of 1926 upon the recommendation of the Imperial Economic Committee, has published its first annual report. The object of this organization is to further the marketing of Empire produce throughout the British Empire, its membership including representatives of every part of the Empire. The work of the Empire Marketing Board includes the active advertisement in the United Kingdom of the Empire produce home and overseas, but such publicity is regarded as the last stage only in the attempt to promote the organization of Empire production and Empire marketing. Scientific Research constitutes the first work of the Board. It has striven to strengthen and perfect existing scientific institutions rather than to establish new institutions. Research work has been carried on in the tropical and sub-tropical parts of the world, and efforts have been made to eliminate the pests and diseases of plants and animals. Financial assistance to this end has been given to the Imperial College of Agriculture at Trinidad and to the Amani Institute in Tanganyika. The Low Temperature Research Committee at Cambridge is working on the development of coal storage processes upon which the successful marketing of overseas produce depends. Animal breeding and fruit growing have been the object of special investigations designed to improve present methods.

The Board's work in the economic field concerns the efficient organization of Empire marketing and the elimination of waste in its various stages. Special investigations have been conducted into the marketing of fruit, dairy produce, and Indian ground nuts with a view to the elimination of unnecessary waste.

Publicity, the last stage in the promotion of Empire marketing, embraces newspaper advertising, posters, exhibitions, empire shopping weeks, window dressing competitions, and lectures. The report mentions the co-operation of the retailer as essential to the success of the publicity work, and expresses the hope that an increasing number of retailers will join the endeavour being made to place before the consumer the variety of excellent produce that the Empire can provide.

The National Conference of Friendly Societies (Great Britain), at a recent convention, adopted a resolution recommending the inclusion of a new miners' disease in the schedule of industrial diseases under workmen's compensation. This disease consists of a contraction of the dense tissue known as the palmar fascia, which is found in the palm of the hand under the skin, extending to the bases of the fingers. It is often the result of work in mines.

PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907, DURING THE MONTH OF SEPTEMBER, 1927

DURING the month of September the Department received the report of the Board of Conciliation and Investigation established to deal with a dispute between the Dominion Power and Transmission Company and certain of its employees, being linemen, high tension trouble men, groundmen, shopmen, armature winders, machinists, wiremen and helpers, members of the Canadian Electrical Trades Union, Hamilton Branch.

Application Received

One application for the establishment of a Board of Conciliation and Investigation was received during the month from locomotive engineers in the employ of the Canadian National, Canadian Pacific and Temiskaming and Northern Ontario Railways. Seven thousand employees were stated to be directly affected by the dispute, which related to the men's request for a 15 per cent wage increase. The Honourable Mr. Heenan, Minister of Labour, requested representatives of the railways and of the union concerned to meet him in Ottawa, where a conference, over which he presided, was held. As a result of the conference, it was agreed that suggestions made by the Minister as to a basis of settlement of the dispute would be considered by the railway companies and the men. Pending the outcome of these efforts to effect an amicable agreement, no steps were taken looking to the establishment of a Board of Conciliation and Investigation.

Other Proceedings under the Act

The Board established to deal with a dispute between the British Columbia Electric Railway Company, Limited, and certain of its employees, members of Divisions 101, 109 and 134, Amalgamated Association of Street and Electric Railway Employees of America, was completed during September by the appointment of the Honourable Mr. Justice D. A. McDonald, of Vancouver, B.C., the appointment being made by the Minister of Labour in the absence of a joint recommendation from the other members of the Board, Messrs. A. G. McCandless and Percy R. Bengough, Vancouver, B.C., nominees of the employing company and employees, respectively.

Report of Board in Dispute Between the Dominion Power and Transmission Company and Its Electrical Workers

A report was received from the Board established to deal with a dispute between the Dominion Power and Transmission Company, Ltd., and certain of its employees, being linemen, high tension trouble men, groundmen, shopmen, armature winders, machinists, wiremen and helpers, members of the Canadian Electrical Trades Union, Hamilton Branch. The board had been completed during the month by the appointmtnt of Mr. J. M. Godfrey, K.C., Toronto, Ontario, as chairman, on the joint recommendation of the other two members of the Board, Messrs. Colin G. Snider, K.C., and John L. Counsell, K.C., Hamilton, Ontario, nominees of the company and employees, respectively. The dispute related to wages and working conditions, sixty employees being directly affected and three hundred indirectly. The report was signed by the three board members, Mr. Snider dissenting, however, regarding a certain point.

Report of Board

In the Matter of the Industrial Disputes Investigation Act, 1907, and of a Dispute Between, The Dominon Power and Transmission Company (Employer) and certain of its Employees being linemen, high tension trouble men, ground men, shopmen, armature winders, machinists, wiremen and helpers, etc., members of the Canadian Electrical Trades Union, Hamilton Branch, (Employees).

To the Honourable PETER HEENAN.
Minister of Labour.
Ottawa, Canada.

SIR,—The Board of Conciliation appointed in connection with the said dispute held sessions on the 15th, 16th, 19th, 23rd and 30th of September and first of October. The employers were represented by Messrs. George E. Waller and W. G. Angus, and the employees by A. M. Barnetson, Albert Wild and Alexander Jenkins.

All parties to the dispute were given full opportunity to present arguments and make

such statements as would be helpful to the Board in arriving at a conclusion.

After giving due consideration to said statements, arguments and the evidence presented, the Board unanimously agree and join in recommending that the agreement as to wages and conditions made between the parties on the first day of April, 1922, be restored and continue in force until the first day of May, 1928.

The Chairman and Mr. John L. Counsell, a member of the Board, further report that the employees have based their claim for increased wages on the fact that the Hamilton Hydro Commission has recently made substantial increases to their employees doing the same kind of work.

A comparison of the rates of pay and working conditions of the two companies discloses that the per diem wages earned by both groups of employees are practically the same, but that the daily working hours of the Hamilton Hydro Commission are now eight hours whereas the employees of the Dominion Power and Transmission Company work nine hours a day. The employees of the Dominion Power and Transmission Company believe that their daily working hours could be reduced to eight hours and paid for at the present per diem rate without substantially increasing the payroll of the company. The Chairman and Mr. Counsell recommend that, when wages and working conditions are being negotiated after the expiration of the agreement of the first of April, 1922, if the Company's application to the Ontario Railway Board for increased fares be granted, the employees of the Dominion Power and Transmission Company be placed in the same position as the employees of the Hamilton Hydro Commission with regard to hours and wages.

Mr. Colin G. Snider does not join in this recommendation, or in any way agree thereto.

Dated the 1st day of October, A.D. 1927.

(Sgd.) Jno. M. Godfrey,
Chairman,
J. L. Counsell,
Colin G. Snider

CANADIAN RAILWAY BOARD OF ADJUSTMENT No. 1

SEVENTEEN new decisions of the Canadian Railway Board of Adjustment No. 1 have been received by the Department. This Board was established under an Order in Council, dated July 11, 1918, while the war was still in progress, its purpose being to secure uninterrupted service on the railways. The Board consists of six representatives of the railway companies and six representatives of labour, one for each of the railway brotherhoods. Earlier cases were outlined in the Labour Gazette for August, 1927, and in previous issues. The new decisions are as follows:—

Case No. 293—Canadian National Railways (western region) and Order of Railway Conductors.

The employees protested against the assessment of demerit marks against the record of a conductor who had the rear end of his train struck by another train while standing on the tracks. The Board sustained the action of the company, which was taken on the ground that the conductor took no precautions to protect his train while standing on a sharp curve.

Case No. 294—Canadian National Railways (western region) and Order of Railway Conductors.

A conductor was dismissed from service for attempting to collect credit for mileage earned when he was booked "off duty." The employees claimed that there were doubts as to the evidence that he was so booked, and submitted contrary evidence. As a matter of leniency the company subsequently reinstated the conductor, the time off duty being entered in his record as "suspension." The employees claimed payment for this period at the rate of 100 miles per day.

The claim of the employees was not sustained.

Case No. 295—Canadian National Railways (western region) and Order of Railway Conductors.

Conductors of crews in freight service at a certain point are required, to walk about one mile to deliver bills and register their train after it has been placed on the designated track in the yard. They claimed that the time so spent should be paid for as "terminal time," in addition to the miles and hours made on the trip. The Railway contended that this point had been decided already in connection with Case No. 262 (Labour Gazette, October, 1925, page 965), and that the terminal time rule did not apply unless the yard is blocked or a similar delay occurs. The alleged grievance of the mile walk, moreover, occurred at all other points where the yard office is at the extreme end of the yard. In the opinion of

the Board the case was in substance a request for a new rule.

The contention of the employees was not sustained.

Case No. 296—Canadian National Railways (western region) and Order of Railway Conductors.

Rule 5, article 5, of the conductors' schedule provides that conductors "deadheading", or travelling as passengers in the course of their duties, are to be paid at the same rates as the conductor on the train by which they travel, except a conductor who is "deadheading" to take a preference run or promotion to which he is entitled by change of time table, etc. In this case a conductor claimed "deadhead mileage" from his distant terminal, the train by which he usually returned having been cancelled by a change in the time card. The company denied the claim on the ground that the circumstances were similar to those prevailing when new runs are created, no "deadheading" being paid in the latter case. Evidence at the hearing showed that the conductor was "deadheading" in order to exercise his seniority rights.

The contention of the employees was not sustained.

Case No. 297—Canadian National Railways (western region) and Order of Railway Conductors.

This case concerned a controversy as to the payment of a monthly guarantee to trainmen in freight service. Article 3, clause E of the Canadian Northern Trainmen's schedule provides that conductors employed on regular through and way freight trains are to be paid for a minimum of 3,000 and 2,800 miles respectively a month. A conductor followed a regular through-freight car for an entire month, but the distance covered was 40 miles short of the minimum guaranteed. He claimed for the 40 miles to make up the guarantee, but payment was refused by the company, it being alleged that the conductor had booked an unnecessary amount of rest and that he had had ample opportunity to make his guaranteed mileage during the month. In view of these circumstances the claim of the employees was not sustained.

Case No. 298—Canadian National Railways (western region) and Order of Railway Conductors and Brotherhood of Railroad Trainmen.

A regularly assigned train crew failed, owing to a derailment, to reach their headquarter station in time to take out their train, and another crew was ordered to relieve them. The employees claimed that the relieving crew should be paid for this trip as unassigned service, and not as part of the regular assignment. The company on the other hand contended that the relieving crew were subject to the conditions of the assignment. Under the circumstances the Board sustained the claim of the employees.

Case No. 299—Canadian National Railways (western region) and Order of Railway Conductors, and Brotherhood of Railroad Trainmen.

A conductor and crew were called to proceed to the scene of a fire. For this duty they presented time tickets at through-freight rates, but the company reduced them to work-train rates. The mileage of the crew was thus cut from 169 "through-freight miles" to 100 "work train miles." The company pointed out that there was nothing in the schedule to justify the employees' claim, and that crews ordered to take out equipment for the purpose of fighting fires had always been considered as being engaged in work train service and paid accordingly. The claim of the employees was not sustained.

Case No. 300—Canadian National Railways (western region) and Order of Railway Conductors, and Brotherhood of Railroad Trainmen.

A controversy arose on the question as to the moment when "detention time" starts when crews are delayed at terminals or "turn around" points. The conductors' and trainmen's schedules provide for payment for such delay at through-freight rates in addition to the mileage or hours made on the trip. The employees contended that detention time starts from the moment of the first stop inside the yard limits. The railways contended, on the other hand, that it starts when the train is placed on the designated track in the yard, and that a stop for the purpose of throwing the switch to enable the train to reach the designated track does not constitute a delay calling for detention pay. The Board ruled that detention pay is not due when crews are not delayed on entering the yard at turn around points. The claim of the employees was not sustained.

Case No. 301—Canadian National Railways (western region) and Order of Railway Conductors and Brotherhood of Railway Trainmen.

The conductor and crew of a freight train were assigned to special service calling for considerable work during their trip. They arrived late at the distant terminal the de-

lay bringing them under the special "road detention" rates of pay. After their arrival at the terminal they had their regular duties to perform in yarding, delivering the engine and bills and registering the train. For this work they claimed straight time on an hourly basis from the time of starting to work until they were actually relieved of duty at the distant terminal. This claim was in accordance with the conductors' schedule which provides that a crew making less than 12½ miles per hour shall be paid overtime on a basis of 12½ miles per hour. The company contended however that the schedule provided for certain exceptions to this rule and that it did not cover the present case.

The Board sustained the claim of the employees under the special conditions of the case the crew being on overtime.

Case No. 302—Canadian Pacific Railway (western lines) and Brotherhood of Railroad Trainmen.

A conductor was discharged for irregularities in the performance of his duties while in charge of a passenger train. He had fallen into a trap prepared for him by three "operatives" who boarded the train, two of them paying full fares, while the third offered him 50 cents, the correct fare being 90 cents. The conductor accepted the offer in presence of the three operators, who reported the transaction to the local superintendent. The case was subsequently heard before the general superintendent, the conductor being accompanied by the local chairman of the Order of Railway Conductors. The conductor was soon afterwards dismissed. An agreement was reached later to submit the case to the Board. The employees contended that the charges were not proved as required by Article 10 of the conductors' schedule. The contention of the employees was not sustained by the Board.

Case No. 303—Canadian National Railways (central region) and Brotherhood of Railroad Trainmen.

A switch tender was demoted from his position in consequence of an accident and was assigned a position of crossing flagman at a lower wage. The employees protested against the demotion, and asked that the man should be restored to his former position and paid for any time lost through no fault of his own. The company contended that the man had not the qualifications required for this position. The claim of the employees was not sustained by the Board.

Case No. 304—Canadian National Railways (western region) and Order of Railway Conductors and Brotherhood of Railroad Trainmen.

A conductor and crew were dismissed from service for booking rest on arrival at their terminal, thereby holding up loading of stock. They were reinstated after four days, but each member of the crew was assessed 20 demerit marks. The employees claimed payment for lost time, and also the removal of demerit marks. They stated that their action in booking rest was justified by Rule 27 of the conductors', and Rule 32 of the trainmen's schedule which provide that conductors or trainmen on arrival at terminals are not to be called for immediate duty if they want rest, and that they are to be judges of their own condition. The rule states that "required rest must be booked on arrival and will be given complete before being called." The company contended that this rule had never been construed to mean that crews would not be required to do certain important yard work or switching on arrival at terminals where no switch engine is employed. On investigation it was found that the crew had been on duty only for nine hours and 45 minutes before they arrived at the terminal.

The Board found that the conductor and crew should have rendered the service required before going off duty, and the claim of the employees was not sustained.

Case No. 306—Canadian National Railway (western region) and Brotherhood of Railroad Trainmen.

The trainmen's schedule (clause D article 1) provides that trainmen on passenger trains who are required to accompany engines to or from the shop tracks at certain specified points are to be paid for this service at overtime rates, with a minimum of 20 minutes in addition to other payments. In the case of a trainman who was required to perform this service, the company used the time required for the work to make up the monthly guarantee of 4,500 miles, considering that this practice did not conflict with the above rule. The employees contended, on the other hand, that the rule expressly required this time to be allowed "in addition to other payments."

The Board sustained the contention of the employees.

Case No. 307—Canadian National Railways (western region) and Brotherhood of Railroad Trainmen.

This case concerned the interpretation of the rule governing the payment of "detention time." The trainmen's schedule guarantees

payment for monthly mileage of a 4,500 miles "exclusive of detention." The company contended that this expression referred to "terminal detention," while the employees claimed that the company had not the right to include any detention time to make up the monthly guaranteed mileage, as had been done in the case of a particular trainman. The Board sustained the contention of the employees.

Case No. 308—Canadian National Railways (western region) and Brotherhood of Railroad Trainmen.

A Grand Trunk Pacific passenger trainman submitted a claim for the payment of "preparatory time" under Article 3 of the trainmen's schedule, which requires passenger trainmen to be on duty for 15 minutes before a train is due to leave, payment being made "for terminal detention *pro rata* at detention rates from time train is due to leave until it departs." Terminal delays after arrival are paid for on the same basis from time of arrival until the crew is relieved from duty. The employees stated that at some points trainmen are required to report for duty 30 minutes or more before starting, but 15 minutes of this time is always deducted by the company and not paid for. The company contended that the article quoted clearly meant that passenger trainmen are not to be paid for the first 15 minutes that they are required to be on duty before the train is due to leave. This practice had always been followed, without any protest from the men until this case. The contention of the employees was not sustained.

Case No. 309—Canadian National Railways (western region) and Brotherhood of Railroad Trainmen.

Rule 10, article 5 of the trainmen's schedule provides that train baggagemen and freight brakemen handling government mail on regular runs are to receive payment at the rate of $10 per month for this service, while those handling such mail only intermittently are to receive 50 cents per trip, with a maximum of $10 per month. The trainmen on a certain run handled government mail regularly twice a week and every time they were required to do so, and for their service they claimed to be entitled to payment at the monthly rate. The company held that the word "intermittently," as used in the rule, was applicable to the case, and paid the men 50 cents per trip.

The contention of the employees was not sustained.

Case No. 310—Canadian National Railways (western region) and Brotherhood of Railroad Trainmen.

Two assistant yardmasters, formerly employees of the Grand Trunk Pacific Railway, claimed standard wages for the period since the amalgamation of that railway with the Canadian Northern Railway in September, 1920. The application to the Board was made *ex parte*, the general manager of the system having declined to take part in the proceedings. The employees stated that these assistant yard masters, since the amalgamation received $40 per month less than the Canadian Northern employees of the same class who were employed at the same terminals. Prior to January 1, 1918, the assistant yard masters on the Canadian Northern received $135, and this amount was increased to $150 per month on January 1, 1918. The McAdoo award later raised the rate to $205 per month, but the Grand Trunk Pacific assistant yard masters did not participate in that advance. The Chicago award came into effect in 1920, giving these employees an increase of $35 per month, bringing the Canadian National Railways yard masters up to $240 and the Grand Trunk Pacific yard masters up to $200.

The Board found that there was no violation of agreement on the part of the Railway Company and that there was no schedule rule involved in the case. Under these circumstances the case was not properly within the Board's jurisdiction.

The Army and Navy Veterans in Canada, at a convention held at Edmonton in September, considered a draft bill submitted by the Winnipeg unit to provide unemployment insurance on a federal basis. The draft bill was referred by the convention to all units in Canada for further consideration, and also to all units of the Canadian Legion, with a recommendation that the principle contained therein should be approved. According to press reports, the proposed measure would require the compulsory payment of contributions to an unemployment fund by employers and workers, supplemented by contributions from the provincial and federal governments. The benefit provided would be at the rate of $6 per week for single persons and $10 per week for married persons, these rates after the first year to be raised respectively to $12 and $30. The bill proposes that state insurance 10 cent stamps should be on sale at all post offices.

STRIKES AND LOCKOUTS IN CANADA DURING SEPTEMBER, 1927

THE number of strikes and lockouts in existence in Canada during September was twelve, as compared with thirteen during the preceding month. The time loss for the month was less than during September, 1926, being 9,611 working days as compared with 20,922 working days during the same month last year.

Date	Number of disputes	Number of employees involved	Time loss in working days
Sept. 1927	12	2,616	9,611
Aug. 1927	13	4,894	13,339
Sept. 1926	14	2,347	20,922

The record of the Department includes lockouts as well as strikes, but a lockout, or an industrial condition which is undoubtedly a lockout, is rarely encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout, included as such in the records of the Department, is a cessation of work involving six or more employees at its commencement and lasting at least one working day. Disputes of less than one day's duration, and disputes involving less than six employees, are included in the published record only when ten days' or more time loss is caused, but a separate record of such disputes is maintained in the Department, and the figures are given in the annual review.

The figures printed are inclusive of all disputes which come to the knowledge of the Department, and the methods taken to secure information practically preclude probability of omissions of a serious nature. Information as to a dispute involving a small number of employees, or for a short period of time, is frequently not received until some time after its commencement.

Nine disputes, involving 1,486 workpeople, were carried over from August, and three disputes commenced during September. Three of the strikes and lockouts commencing prior to September terminated during the month, and one of the strikes and lockouts commencing during September also terminated during the month. At the end of September, therefore, there were on record eight strikes and lockouts, as follows: bakers, Montreal, P.Q.; ladies' clothing factory workers, Toronto, Ont.; men's clothing factory workers, Montreal, P.Q.; electrotypers, Toronto, Ont.; blacksmiths, Saskatoon, Sask.; stonecutters, Montreal, P.Q.; pulpwood cutters, Sudbury, Ont., and District; and sheet metal workers, Montreal, P.Q.

The record does not include minor disputes such as are described in a previous paragraph, nor does it include disputes as to which information has been received indicating that employment conditions are no longer affected, although the unions or organizations concerned have not yet declared them terminated. Information is available as to two such disputes, namely, fur workers at Winnipeg, Man., September 25, 1926, and plumbers at Windsor, Ont., April 5, 1927. The dispute of cigarmakers at Montreal, P.Q., in existence since March 24, 1925, and the dispute of men's clothing factory workers in Montreal, P.Q., in existence since July 28, 1926, are reported to have lapsed.

Of the disputes which commenced during the month, two were for increases in wages and one was against a decrease in piece rates. Of the four strikes and lockouts which terminated during the month two were in favour of the employers and two resulted in a compromise.

The following paragraphs give particulars in regard to certain disputes, in addition to information given in the tabular statement.

Coal Miners, New Aberdeen, N.S.—The miners in one of the collieries were involved in a cessation of work from August 30 to September 6, owing to a demand of the drivers for extra pay for taking the horses to the stables. The miners decided to return to work pending negotiations between the executive of the union and the management. In negotiations which followed it was arranged that the stables would be placed nearer the working places.

Bakers, Montreal, P.Q.—Toward the end of September an agreement was reported between some of the employers involved in this dispute, providing for increases in wages substantially as demanded. At the end of the month there were still on strike twenty-six of the seventy-three employees involved at the beginning.

Men's Clothing Factory Workers, Montreal, P.Q.—A number of the strikers involved in this dispute secured work elsewhere, reducing the number from forty-two at the beginning of the month to ten at the end.

Blacksmiths, Saskatoon, Sask.—The number of employees involved in this dispute increased during the month from four to nine, some who had secured work elsewhere being again unemployed.

Lathers, Montreal, P.Q.—This dispute, beginning June 6, 1927, for an increase in wages, was reported as having lapsed during September, none of the strikers demands being secured.

Electrical Workers, Vancouver, B.C.—The cessation of work occurred on July 14, 1927, the employees demanding an increase in wages to $9 per day and a five-day week, 40

STRIKES AND LOCKOUTS DURING SEPTEMBER, 1927

Industry, occupation and locality	Number of employees involved	Time loss in working days	Remarks
(a) Strikes and Lockouts occurring prior to September, 1927.			
MINING—			
Non-ferrous smelting and quarrying—			
Coal miners, Aberdeen, N.S...	1,250	3,750	Commenced August 30, 1927, for change in working conditions. Work resumed Sept. 6, 1927, in negotiations following employees partially successful.
MANUFACTURING—			
Vegetable Foods—			
Bakers, Montreal, P.Q.....	54	1,040	Commenced May 1, 1927, for increase in wages. Unterminated.
Clothing (including knitted goods)—			
*Ladies clothing factory workers, Toronto, Ont.....	3	78	Alleged lockout, commenced June 30, 1926; enforcement of non-union conditions. Unterminated.
Men's clothing factory workers, Montreal, P.Q.....	42	676	Commenced June 4, 1927, against change to piecerate system and to maintain union conditions. Unterminated.
Printing and Publishing—			
*Electrotypers, Toronto, Ont.	3	78	Commenced Dec. 20, 1926, against discharge of employees for union activity. Unterminated.
Iron, Steel and Products—			
*Blacksmiths, etc., Saskatoon, Sask.....	9	234	Commenced May 17, 1927, for increase in wages and recognition of union. Unterminated.
Non-Metallic Mineral Products—			
Stonecutters, Montreal, P.Q..	80	1,560	Commenced June 10, 1927, for increase in wages. Unterminated.
CONSTRUCTION—			
Buildings and Structures—			
Lathers, Montreal, P.Q.....	.....	.....	Commenced June 6, 1927, for increase in wages. Lapsed during September. In favour of employers.
Electrical workers, Vancouver, B.C.....	45	270	Commenced July 14, 1927, for increase in wages and shorter hours. Terminated Sept. 8, 1927. In favour of employers.
(b) Strikes and Lockouts commencing during September, 1927.			
LOGGING—			
Pulpwood cutters, Sudbury District, Ont.....	65	325	Commenced Sept. 24, 1927, for increase in wages. Unterminated.
FISHING AND TRAPPING—			
Salmon fishermen, New Westminster, B.C., and district....	1,000	1,000	Commenced Sept. 21, 1927, against decrease in price of fish. Work resumed Sept. 22. Compromise.
CONSTRUCTION—			
Buildings and Structures—			
Sheet metal workers, Montreal, P.Q.....	65	600	Commenced Sept. 1, 1927, for an increase in wages. Unterminated.

*Reports indicate that the strikers have been replaced but there are still a number of employees out and on the strike benefit list of the union.

hours. On September 8 the strikers returned to work on the same conditions as before the strike, namely $1 per hour and eight hours per day, forty-four hours per week.

Salmon Fishermen, New Westminster, B.C., and District.—A dispute was reported in the press, involving salmon fishermen on the Fraser river in a cessation of work on September 21, 1927. It was reported that the canneries had reduced prices from 75 cents per fish for sockeye salmon to 40 cents, and from 8 cents to 4 cents for pink salmon. It was arranged that the price would be 50 cents for sockeye and 8 cents for pink salmon.

Pulpwood Cutters, Sudbury, Ont., and District.—A number of pulpwood cutters demanded an increase in the rate from $2.25 per cord to $2.50, which was refused by the employers, the men ceasing work and seeking work elsewhere. Some firms, however, were reported to have granted the increase. At the end of the month the dispute was still unterminated.

Sheet Metal Workers, Montreal, P.Q.—A number of sheet metal workers in various shops ceased work when certain employers refused to sign agreements presented by the union similar to that signed by several other employers (Labour Gazette, September, 1927, p. 1003). One employer was involved from September 1 and five from September 21. By the end of September forty-three out of the sixty-five employees on strike had secured work elsewhere.

STRIKES AND LOCKOUTS IN GREAT BRITAIN AND OTHER COUNTRIES

THE latest available information as to strikes and lockouts in various countries is given in the Labour Gazette from month to month, bringing down to date that given in the issue for February, 1927, as an addendum to the review of strikes and lockouts in Canada during 1926. The latter review included a table summarizing principal statistics as to strikes and lockouts since 1918 in the several countries for which such figures were available. Many countries publish these statistics only once each year, the figures being issued in some cases after an interval of as much as two years, so that for such countries the latest figures are not for relatively recent dates.

Great Britain and Northern Ireland

The number of new disputes reported during August was 22, and 12 were still in progress from the previous month, making a total of 34 disputes in existence during the month. The number of workpeople involved (directly and indirectly) in all disputes in progress in the month was 19,000, and the time loss 169,000 working days.

Of the 22 disputes beginning in the month, 6 were against proposed reductions in wages, 5 over other wages questions, 4 on questions respecting working arrangements and 7 on other questions. Settlements were made in the cases of 20 disputes, 6 in favour of workpeople, 6 in favour of employers and 8 ended in compromise, leaving 14 disputes unterminated.

The strike of 2,000 coal miners which began in May, when the miners refused to work one shift on Saturday rather than two shifts on alternate Saturdays, the dispute involving stoppages of work on Saturdays only, had not been settled at the end of August.

Another coal mining dispute, involving directly and indirectly, about 1,650 workpeople, began on August 26 against proposed reduction in rates of wages and of piece-work rates. No settlement had been made at the end of the month.

The general lockout of slipper operatives at Rossendale, which began July 20, was withdrawn on September 7, and an agreement reached, establishing a conciliation board for the industry.

Australia

For the year 1926, the number of disputes reported was 360, involving 803 establishments and 113,034 workpeople, of whom 80,768 were directly and 32,266 indirectly involved. The time loss for all disputes in progress was 1,310,261 working days, and the estimated loss in wages £1,415,813.

In the first quarter of 1927, the number of disputes reported was 110, involving 277 establishments and 63,604 workpeople, of whom 44,992 were directly and 63,604 indirectly involved. The time loss for all disputes in progress was 792,645 working days, and the estimated loss in wages £810,071.

The railway service in the State of Queensland was completely tied up for a week owing to an industrial dispute. A strike of sugar mill employees against the employment of European labour took place, and the cane cutters' union induced the railway union to refuse to handle

freight to or from the mill involved. The railway system in Queensland is state owned, and on September 3, the Government dismissed the entire staff of 18,000 railway workers and stated that it would re-employ only those who would obey the instructions of the Railway Commissioner. Motor transportation services were organized by the Government and were reported to be operated successfully. A large number of railway workers reported for work during the week, on the terms of the government. On September 10 the dispute was declared at an end, and by September 12, normal service was resumed. The strike of sugar mill employees continued.

South Africa

In the year 1923 two disputes began, involving 50 workpeople, and resulting in a time loss of 740 working days with an estimated loss in wages of £960.

In 1924, seven disputes began, involving 1,856 workpeople and resulting in a time loss of 10,129 working days, with an estimated loss in wages of £20,958.

In 1925 there were no disputes involving stoppages of work.

United States

The number of strikes and lockouts beginning in July was 62, of which 42 involved 32,876 employees, making the average number of employees per dispute 783. Of the 62 disputes, 16 were in building trades, 16 in the clothing industry, 9 in coal mining and the others in various other industries.

The strike of 2,000 labourers and hod carriers in Rhode Island, who went out on June 1, for an increase in wages, had not been settled at the end of July.

A dispute regarding jurisdiction between the bricklayers' and plasterers' unions was the cause of a cessation of work by 6,000 building trades workers in Baltimore, Maryland, from July 12 to July 25.

About 6,000 teamsters and truckdrivers in New York City went out on strike on September 7 for an increase of the average wage from $40 to $45 per week, with an 8-hour instead of a 9-hour day. A settlement was reached granting the $5 increase with a continuance of the 9-hour day, and work was resumed September 12.

Bituminous Coal Miners' Dispute.—After two unsuccessful attempts to settle this dispute in Illinois by joint conferences, the third conference, convened on the suggestion of union officials, succeeded on October 1 in reaching an agreement by which work would be resumed at the same rates as prevailing before the stoppage. This agreement is to be in force until April 1, 1928. In the meantime a joint commission of four, consisting of two operators and two union representatives was provided for, to make a study of the wage question, and their report was to be the basis of negotiations for a new agreement to come into force on April 1, 1928. In Indiana a similar agreement was reached on October 7.

In the other states comprising the "Central Competitive Field," namely, western Pennsylvania and Ohio, no settlement was reached. Minor disturbances occurred both in western Pennsylvania and Ohio, and new court injunctions were granted restraining union members from interfering with the operation of the mines, and certain restrictions were placed on picketing. Protected by these injunctions, open-shop operations continued and production was reported to have increased. In Indiana, it was reported at the middle of September that 55 per cent of the mines were in operation under the terms of the former agreement.

In the Southwest field (Missouri, Kansas, Arkansas, Oklahoma and Texas) an agreement was signed on October 6 by operators and union representatives, providing that work be resumed on practically the same scale as before the suspension of work.

Belgium

During July, 9 strikes began and 14 disputes were still in progress from the previous month, making a total of 23 disputes in progress during the month. The number of workpeople involved was 10,039 and the time loss 180,288 working days. Of the 9 disputes beginning in the month, 5 were over wages question. Sixteen disputes were terminated, 6 in favour of workpeqople, 6 by compromise and 4 in favour of employers.

Germany

During the first quarter of 1927, 83 strikes and 7 lockouts were terminated, involving 1,012 establishments. The total number of workers affected was 132,727, of which 130,952 were directly affected. The time loss for all workers involved in disputes was 1,038,760 working days. Classified according to causes, 37,923 workers were involved in disputes concerning wages, 92,489 in disputes concerning hours, and 2,287 in disputes over other questions. Classified by results, 119,731 workers were involved in disputes which ended in favour of workers, 9,130 in disputes which ended in compromise and 2,091 in disputes which ended in favour of employers.

Netherlands

During July, 22 disputes began, involving 967 workpeople.

AGREEMENT CONCERNING CONCILIATION MACHINERY FOR RAILWAY SHOPMEN IN GREAT BRITAIN

AN agreement was signed on August 15, 1927, between the British railway companies and the trade unions which include in their membership employees in the railway workshops, providing for the establishment of machinery for dealing with questions affecting wages, hours and conditions of service of male wages staff employed under shop conditions. The unions which are signatories to the agreement are the National Union of Railwaymen, the Amalgamated Engineering Union, the Electrical Trades Union, the United Patternmakers' Association, the National Society of Coppersmiths, Braziers and Metal Workers, the National Union of Foundry Workers, the United Operative Plumbers and Domestic Engineers' Association, the Workers' Union, the Amalgamated Machine, Engine and Iron Grinders and Glazers' Society, the Amalgamated Union of Building Trade Workers, the Shipconstructors' and Shipwrights' Association and the Federation of Engineering and Shipbuilding Trades.

The agreement provides for the establishment of a shop committee in each shop where not less than 75 workpeople are employed, consisting of a number of representatives of the employees, and of representatives of the company not exceeding the number of employees' representatives. Provision is made for the grouping of shops for the same purpose where less than 75 workers are employed. At any works or depot where, in the same department, there is more than one shop committee, a works committee is to be set up. A third type of body, a line committee, is also to be established for each department, for the purpose of dealing with matters affecting detached bodies of workers in the same department at centres where the number of employees is not large enough to enable a shop committee to be formed.

Any employee, or group of employees, desiring to raise a question within the scope of the scheme, may make representations in the first place to the foreman of the shop. If the answer is not satisfactory reference is to be made to the shop committee, or if there is no such committee the question may be discussed with the local management. Matters not settled by a shop committee may be referred to the works committee or discussed between the district staff officer of the trade union and the local management or referred by the shop committee to the head of the department. At places where there is no shop committee the question may be referred to the line committee. If the employees in two or more shops desire to raise a general question the matter is referred to the local management, and failing satisfaction, to the works committee. Employees at different centres where there are no shop or works committees wishing to raise a question collectively are to refer in the first place to the head of the department, and failing satisfaction, to the line committee. Matters which are not settled by the works or line committees may be discussed between the district staff officer of the union and the local management, or between headquarter officials and the general manager of the company. If the trade unions wish to raise a question of a national character they are to take up the matter with the general managers, and a national railway shopmen's council is to be established to deal with such matters. Any questions which the company or companies may wish to raise are to be referred to the employees' secretary of the appropriate committee or of the national council. Provision is made for the expediting of cases referred to the new bodies, and also that, where the parties concerned desire to submit a question to arbitration, the reference is to be to the Industrial Court. No withdrawal of labour or unauthorized action is to be taken pending negotiations on the lines set out in the agreement.

The *Engineering and Mining Journal* (New York), discussing the "turnover" problem in its issue of September 10, made the following suggestion: "First in the course of investigating an excessive turnover is to find out why the employees quit. The method of doing this is simple—ask them. The exit interview, as it has been called, is of much importance. Conducted by a third person it serves as a check upon the shift boss or foreman or whoever has been the immediate superior of the employee who is throwing up his job. It may show that the man has not been assigned to the work for which he is best fitted. Tact and courtesy in most cases will bring out the real reason for the man's dissatisfaction. Also, even though he persists in his intention to go elsewhere, he will have kinder feelings toward his late employer."

ADOPTION OF OLD AGE PENSIONS IN BRITISH COLUMBIA

Agreement Executed by Dominion Government With Provincial Government Under The Old Age Pensions Act

REFERENCE was made in the September issue of the LABOUR GAZETTE (pages 925-926) to a proclamation which was issued by the government of British Columbia on August 25 authorizing the provincial government to enter into an agreement with the government of Canada pursuant to the Old Age Pensions Act of the Dominion Parliament (Statutes of 1927, Chapter 35), and pursuant also to a provincial statute respecting Old Age Pensions (Chapter 50 of the Statutes of British Columbia, 1926-27) for the establishment of a system of old age pensions in British Columbia, the cost of such pensions to be divided equally between the Dominion Government and the provincial authorities. Reference was also made to an Order in Council which had been adopted by the government of British Columbia entrusting the administration of the proposed old age pensions system to the provincial Workmen's Compensation Board.

A federal Order in Council was approved during the month of July entrusting the administration of the Old Age Pensions Act, 1927, to the Minister of Labour. The Honourable Peter Heenan, federal Minister of Labour, conferred with the provincial government of British Columbia during the month of August in regard to the inauguration of the proposed system of old age pensions there. On September 28, shortly after the return of the Minister of Labour to Ottawa, an Order in Council was approved authorizing the Minister of Labour to enter into an agreement with the province of British Columbia for the inauguration of a system of old age pensions there under the terms and conditions which had been provided in the federal Act of Parliament of last session on this subject. The agreement with the government of British Columbia was accordingly signed by the Minister of Labour on the same day. It had previously been approved by the provincial authorities and signed on their behalf by Honourable A. M. Manson, the provincial Attorney General and Minister of Labour. British Columbia is, therefore, the first province in which the old age pension system, which was approved by the Dominion Parliament last session, will go into effect.

The Dominion-provincial agreement in question provides that old age pensions will be payable from September 1, 1927, It is provided in the Dominion-provincial agreement that,—

(1) On, from and after the first day of September, 1927, the Province agrees to pay to each person who, upon application by such person, is found by the pension authority to be entitled to receive a pension under the provisions of the Dominion Act, the sum of two hundred and forty dollars yearly, each of such payments to be subject to reduction as provided by the Dominion Act, and all of such payments, whether as to amount or otherwise, to be subject to and governed by the provisions of the Dominion Act.

(2) The Province further agrees on its part to comply with all the provisions, stipulations, provisoes and conditions contained in the Dominion Act.

(3) The Dominion agrees to pay to the Province quarterly in accordance with and subject to the provisions of the said Dominion Act an amount equal to one-half of the net sum paid out during the preceding quarter by the Province, pursuant to the provisions of this agreement.

Instructions to intending applicants for old age pensions in British Columbia have been issued by the Old Age Pensions Department of the provincial Workmen's Compensation Board, Vancouver, in the terms following:—

Under the Act an application may be submitted by any person who is a British subject, or, being a widow, who is not a British subject, was such before her marriage has attained the age of seventy years; has resided in Canada for the twenty years immediately preceding the date of proposed commencement of pension; has resided in the province in which the application for pension is made for the five years immediately preceding the said date; is not an Indian as defined by the Indian Act; is not in receipt of an income of as much as three hundred and sixty-five dollars ($365) a year; and has not made any voluntary assignment or transfer of property for the purpose of qualifying for a pension.

It will be necessary for any applicant to prove his or her age and nationality. Useful documents for that purpose are a certificate of birth, or certificate of baptism, certificate of marriage showing age, certificate of service in any of His Majesty's Forces, certificate of naturalization or entries in a family Bible or other genealogical record or memorandum of the family. Satisfactory proof of age and nationality should be filed with the application.

Proof of residence in Canada for the period of twenty years immediately preceding the date of commencement of pension and proof of exact period of residence in this Province are essential in determining the eligibility of the applicant and the amount of pension payable. The proofs you propose to file covering this twenty year period of residence should accompany the application. State what other proofs you can secure as to the exact period of residence in this Province and period in Canada.

An application for pension cannot be considered until proofs of residence, age and nationality are produced.

THE PROBLEM OF OLD AGE PENSIONS IN INDUSTRY

Results of Study by Pennsylvania Old Age Pension Commission

THE report of the Pennsylvania Old Age Pension Commission, made public early this year, was noted in the Labour Gazette, March, 1927 (page 246). After an exhaustive study of pension plans in existence in the United States, the commissioners found that these plans were inadequate and insecure, and unanimously expressed the opinion that "a state system of old age pensions or insurance is by far superior, from every point of view, to any of the existing forms of aged relief." The commission has lately published a summary, prepared by Mr. Abraham Epstein, research director, of the facts and figures revealed in the course of the inquiry. Some of the findings are summarized in the following paragraphs.

The United States Census of 1920 reported a population of approximately five million persons 65 years of age and over, and this figure was estimated to have increased by half a million in 1925. Of this number it is estimated that between 15 and 20 per cent are dependent upon private or public relief, while 20 per cent in addition are dependent upon children or relatives for their support. If the ratio of dependence that exists in Massachusetts were true for the entire country it would follow that about 1,800,000 persons 65 years of age or over are now dependent on others for their support in old age.

The commission rejects the opinion that this widespread condition of dependence on others is the result of improvidence during the past working life of the aged. "All theories about thrift and independence," it is stated, "and all objections to paternalism notwithstanding, employers of labour have found that, in practice, the average wages paid in most industrial establishments have proved insufficient to provide for those periods of life when the wage earner is no longer able to participate actively in industry. Even when the worker succeeds in accumulating considerable savings he is frequently deprived of these through some circumstance over which he has no control, and is left dependent in old age, despite his conscientious practice of thrift." Few wage-earners, it is pointed out, are able to continue at work until the end of their days. Moreover the employment of elderly persons in industry is becoming more difficult. The percentage of persons over 65 who were recorded as gainfully employed has declined nearly 20 per cent in the course of the last thirty years.

Many employers have been impressed by the problem of old age, and have established private industrial pension systems for the benefit of their employees. The report describes the most typical plans now in effect, and estimate their value as a means of solving the national problem. The total number of persons in receipt of pensions from all industrial concerns in the United States does not exceed 100,000, this number being only 5 or 6 per cent of all the needy aged persons. The average amount of the pension thus provided is about $485 per year. About four-fifths of all the pension systems in existence are in the public utilities and metal industries group. Seventy-two per cent of all the concerns which notified the commission that they were operating old age pension systems employ over 1,000 workers each. That the pension systems are mainly confined to the large employing firms is evident from the fact that the bulk of wage earners in the country are still employed by comparatively small concerns, the census of 1920 showing that only six per cent of all industrial establishments employ 101 workers or more.

The report describes the various types of private pension systems now in existence. These types include (1) provision of lighter jobs and informal gratuities for old employees; (2) formal discretionary plans, in which the employer retains full power in regard to the working and continuance of the plan; (3) formal limited contractual plans, in which the employer relinquishes the right to abandon the pension allowance where pensions have actually been granted; (4) contributory pension plans; (5) single premium deferred annuities; (6) modified deferred annuity premiums; (7) employee-managed pension funds.

Discussing these types of pension the report notes that in nearly all the benefits provided are precarious and insecure. "Hardly any pension fund now in force provides legal guarantee of the continued payment of pensions to all the employees in the service of the concern operating the fund. With their long service requirements, stringent character provisions and disciplinary clauses, these funds can only apply to a small proportion of all the workers." Extensive studies of labour turnover, conducted by the United States Bureau of Labour Statistics show that only 3.4 per cent of male workers and 2.4 per cent of female workers remain with the same concern over 20 years. The deferred single premium plan (that is, the service annuity granted from year to year without long service requirements, which becomes the pro-

perty of the employee whether he stays or leaves the concern), is obviously the most equitable of all the plans, but apparently American industry does not see its way to pay the heavy cost of this plan.

In regard to the financial structure of the existing plans the report states that "one of the most important disclosures of this study is the lack of financial provision to meet the pension payments. With rare exceptions, the concerns having pension plans have not set aside special funds to take care of the pensions as they fall due, but expect to meet these liabilities simply out of operating expenses. Almost none of the companies which established pension systems made scientific calculations in advance of the probable cost to themselves over a period of years of these pension systems. And in the case of the companies which are establishing new pension systems this habit of largely trusting to luck that future pension costs will be within their capacity to pay, is still being adhered to. The fallacies of this system have been repeatedly pointed out by actuaries and all those who have studied the problem. None of the American systems have yet reached, or have nearly approached the peak of costs, and it is simply on account of this fact, the experts declare, that most concerns have found it possible to continue operating their pension systems without finding the outlay involved a serious financial burden.

"Actuaries contend that it is difficult to make a mathematically reliable estimate of the probable liabilities which an industrial establishment undertakes when establishing a pension system without constant revision and checking. Insurance companies and independent authorities criticize the whole principle of allowing private firms which are not subject to public regulation in this respect to engage in what amounts to the business of writing annuities."

In proof of the uncertainty of even the best contractual plans the report refers to the failure of the pension fund of Morris and Company. This well-known packing firm established a separate fund in 1909 on basis of contributions from employees and the company. The workers' contributions were at the rate of three per cent of their wages and were deducted from their pay, while the company contributed $25,000 a year, setting its maximum liability at $500,000. When Armour and Company merged with Morris and Company, the liabilities of the Morris pension fund to its 600 retired pensioners alone had grown to a sum over $7,000,000. Armour and Company refused to assume this responsibility and the Morris and Company employees were left "high and dry." The former employees took the case to the Circuit Court of the State of Illinois, which ruled that the pension plan, as actually drawn up, created no contractual liability on the part of Morris and Company.

At one time it was believed that industry in the United States would gradually work out the problem of the aged workers and that the voluntary provision of private pensions would obviate the need for public pensions. These expectations have not been realized. "The earlier hopes that the introduction of a pension plan would greatly lessen the labour turnover, increase the loyalty and stability of the service, etc., have, after a number of years of experience not been realized." The report concludes as follows:

"Perhaps the failure of a few more pension plans is necessary to awaken public opinion to the dangers inherent in the present condition. But it would seem inescapable that some provision for the great mass of workers who are unable to qualify under the strict requirements of the private pension plans, cannot for long be delayed. Modern old age dependency is a direct hazard of industry. The principles underlying workmen's compensation laws must also apply in the case of old age pensions.

"Fortunately, many employers of labour with pension plans of their own, are coming to recognize, as expressed by the president of one large concern, that sooner or later we must face the necessity of adopting a scientific system under state control. Whether this should take the form of a contributory or a non-contributory pension plan need not be discussed at this juncture. What does seem obvious and inevitable from this investigation is the immediate necessity of some program of state action."

The first conference between officials and men of the London, Midland and Scottish Railway Company, the largest railway in Great Britain, was held at London in September. It concluded with resolutions declaring that the company's policy of co-operation with labour is in harmony with the trade union policy, that other meetings will be arranged, and that every possible assistance to the furtherance of the object of the movement which is to restore the prosperity of the railroads and ensure a maximum of co-operation between employees and owners.

LABOUR LEGISLATION IN NEW BRUNSWICK, PRINCE EDWARD ISLAND AND YUKON TERRITORY IN 1927

New Brunswick

DURING the last session of the New Brunswick Legislature, which opened on March 10 and closed on April 21, 1927, several measures of interest to labour were enacted.

The Mechanics and Wage Earners' Lien Act consolidates and considerably amends the law of the province on this subject, bringing it more into harmony with the laws in force in other provinces. Municipal corporations and railways are expressly included in the list of organizations whose property is subject to lien. The percentage to be retained by the owner is twenty per cent of the contract price, unless the price exceeds $15,000, when the percentage retained is fifteen per cent. A workman, labourer, servant, mechanic or other person employed in manual labour may not, unless his wages exceed $10 per day, waive his right to benefit under the Act. The lien of a mechanic or labourer for wages has, to the extent of thirty days' wages, priority over all other liens, derived through the same contractor or sub-contractor, on the percentage to which contractor or sub-contractor is entitled, all such mechanics and labourers ranking equally. A wage earner may enforce a lien in respect of an uncompleted contract and may serve notice of motion on the proper parties returnable in four days. If the contract is not completed when the lien is claimed by the wage-earner, the percentage is calculated on the value of the work done or materials furnished by his employer. A contractor or sub-contractor who makes default in completing his contract may not, as against a wage-earner claiming a lien, apply the percentage to the completion of the contract or the satisfaction of a claim or for any other purpose. Every device by an owner, contractor or sub-contractor to defeat the priority given to a wage-earner for his wages, and every payment made for the purpose of defeating or impairing a lien, are declared by the Act to be null and void.

A claim for lien for wages may be registered at any time during the performance of the work or within thirty days after its completion. A lien for which a claim has been registered expires ninety days after the completion of the work or service or the placing of the materials or the expiry of the period of credit whichever date is latest, unless an action is commenced to realize the claim and a certificate thereof is registered.

A lienholder may, at any time, make a demand in writing for information regarding the terms of the contract, the state of the accounts or the terms of a mortgage.

The sections dealing with actions to realize claims give the judge wide powers to ensure the equitable treatment of all parties concerned. The form of a judgment may be varied by the judge in order to meet the circumstances of the case, so as to afford any party to the proceedings any right or remedy to which he may be entitled. All cases are appealable except those in which the aggregate amount of the claims of the plaintiff and all other persons do not exceed $100. In the latter case, however, the judge who tried the action may, upon application within fourteen days after judgment, grant a new trial.

The Mining Act as revised and amended contains the same provisions as the old law with regard to grants of land to coal miners for the erection of dwelling houses. These provisions were enacted in 1907.

An amendment to the Vocational Education Act extends the time during which vocational committees may be reimbursed for expenditures on buildings or parts of buildings to June 30, 1927.

Prince Edward Island

The General Assembly of Prince Edward Island, which was opened on March 15 and closed on April 12, 1927, passed a new Public Health Act containing several provisions of labour interest which were not included in the Act of 1908. A "house" is defined to include a factory, which is thus subject to inspection and regulation under the Act. The Provincial Board of Health (which is the Lieutenant-Governor in Council) is charged with the duty of inquiring into the causes of varying rates of mortality and the effects of localities, employments, conditions, habits and other circumstances upon the health of the people. Regulations may be made governing various matters, among which is included the licensing of plumbers. No person may establish, conduct or maintain a camp or boarding house for the accommodation of his employees without a written permit from a local medical officer of the district in which such camp or boarding house is to be established, stating that the sanitary conditions of the house or camp are satisfactory. This permit may be revoked at any time by the medical health officer if he considers the sanitary conditions are unsatisfactory or that any occupant not

immune to vaccination against smallpox has not been successfully vaccinated within five years.

Yukon Territory

The Yukon Council at its recent session passed an Ordinance Respecting Old Age Pensions which empowered the Gold Commissioner to negotiate and make an agreement with the Federal Government for the purpose of putting into effect in the territory or otherwise obtaining the advantages of any Act respecting old age pensions, which has been passed or may be passed by the Parliament of Canada.

NEW YORK STATE LABOUR LAWS OF 1927

THE State of New York Department of Labour has published a special bulletin (No. 151) giving the text of the labour laws enacted in 1927, together with the text of the federal Longshoremen's and Harbour Workers' Compensation Act, effective July 1, 1927 (Labour Gazette, April, 1927, page 397). The latter act was modelled upon the New York Workmen's Compensation law, and is in some respects more liberal in its terms. It affects a large number of employees on the waterfronts in New York City, Buffalo and elsewhere, covering injuries to workmen employed on navigable waters, including rivers, canals and drydocks.

Workmen's Compensation.—The main group of state laws enacted this year was that of workmen's compensation. Consideration of this subject is the main function of the State Industrial Board, a body to be composed henceforth of five instead of three members, two each representing the employers and workmen, and one being an attorney. The maximum weekly compensation for total disability was increased from $20 to $25. For temporary disability the maximum was raised from $3,500 to $5,000 for total, and $4,000 for partial disability. Sixty weeks' compensation was granted for loss of hearing of one ear, the loss of hearing of both ears only having been compensated previously. The Board may now reclassify a disability within a year after the accident that has caused it, upon proof of error, injustice, or change in condition. Uninsured employers are made liable for payment of $500 to the special fund for the compensation of employees totally and permanently disabled by accidents occurring at separate times and by unrelated causes, and in case of death for the payment of $1,000 to the Commissioner of Taxation and Finance. Compensation was provided for volunteer foremen, a class hitherto held to be exempt.

Hours of Labour.—In regard to the 8-hour law provision was made for investigations, under judicial procedure, of hours of labour under public work contracts. Penalties for wilful violation consist of fine, imprisonment and forfeiture of contract. For women and female minors the working week was limited to 48 hours daily, except that 78 hours of overtime is permitted in the course of the calendar year. The hours per day may be adjusted to permit one short working day each week. These new hour limits supersede the 9-hour day and 54 hour week that have prevailed in factories since 1912 and in shops since 1913-14. Prior to those dates the state had a 10-hour day dating for factories from 1886, and for shops from 1896.

Fair Wages on Public Works.—Provision was made that wages on public works shall not be less than the rate prevailing in the locality where such work is carried on. Employees may take action to recover the difference between the actual payment and the determined rate. In addition the employer refusing to pay such rate is subject to fine, imprisonment and forfeiture of contract. This legislation follows a decision of the United States Supreme Court enjoining criminal prosecution under the similar law of Oklahoma on the ground that the terms "current rate" and "locality" were too indefinite. The amending act defines "locality" as the town, city, village or other civil division where the work is being done, and "prevailing rate" as the rate in said locality for a majority or forty per cent plurality of workmen, labourers or mechanics in the same trade or occupation.

Mrs. Adam Shortt resigned during September from the Ontario Mothers' Commission, of which she was vice-chairman. She had been a member of the Commission since its establishment in 1920.

ANNUAL REPORT OF THE MINIMUM WAGE BOARD OF ONTARIO FOR 1926

THE sixth annual report of the Minimum Wage Board of Ontario, recently published, in detailing the work for the past year, emphasizes the fact that it has "enjoyed the favourable co-operation of both the employers and the employees of the province." Since the first conference with a group of employers, the Board has been in constant touch with them and their successors, and at the present time, in the words of the report, "they regard us as their friends." According to the report, the cordial relationship with the employers has resulted as follows:

> They tell us that their industry, as a whole, is in a sounder state, with increased production from the workers and a higher efficiency in management, and they generously give us credit for having helped them to reach this happy condition.
>
> All of the forty-three orders we have issued have been framed in a similar fashion, in collaboration with representative employers, and their effect upon the several industries has been likewise beneficial. The better employer has been protected against his unsocial rival. The bewildering variety of wage rates has been brought to some degree of semblance and conformity. Some employers, whose aim had simply been to reduce wage-cost, have learned the wiser plan of assessing wage cost as against production cost. Best of all, those workers whose wages had been below the line of decent support have been lifted into independence.

Dealing with the relationships of the Board with the employees and organized labour, the report continues:

> The workers whom we exist to protect are almost entirely without organization or any means of framing and expressing their opinions as a class. This has made it difficult for us to consult them, and every conference held respecting any trade presents the problem of selecting and gathering representative employees. They are numerous, widely scattered, unknown to each other, and comparatively helpless in the midst of the turmoil and haste of the industrial arena they have entered. Yet after six years they and we have come to know each other, and the readiness with which they turn to us when in trouble is the best evidence possible that they have accepted us as their protectors.
>
> Organized labour, while largely male in membership, is yet keenly alive to the interests of women who work. We have to acknowledge much assistance from trade unions. There are some trades where the men are organized but not the women, and other trades partially organized without reference to sex lines. We have always asked the help of whatever organization exists. It has been freely given, affording us an intimate and sympathetic knowledge of the problems involved. Moreover, in the enforcement of our orders, we are much helped by labour councils and public-spirited members of unions.

The Board determines the minimum wage levels by studying the cost of living in the workers' place of residence. The cost of living budget of an average working woman at Toronto is first estimated as a basis for these calculations, the budgets of workers in other localities being adjusted in proportion to a recognized variation in the cost of living as between large and small cities, towns, villages and country districts. The budget for Toronto as revised to October, 1926, allows $364 per year or $7 per week for board and lodging; $124.65 per year for clothing; $162 for sundries (including laundry, doctor, dentist, car fare, amusement, church, etc.), making a total of $650.40 for the year. The weekly budget for Toronto is therefore as follows: Board and lodging, $7; clothing, $2.39; sundries, $3.11, making a total of $12.50 per week. The figure thus arrived at is taken as the minimum wage required to provide a female worker at Toronto with the necessities of living.

The Board has been gathering information during the past five years regarding the employment of married women in Ontario, and this section of its report is as follows:

> There are in Ontario (census of 1921) 1,451,772 females, or about 49.5 per cent of the total population. Of these about one half are of the working age (between fifteen and fifty). Of these again, perhaps 140,000 are gainfully employed, and about 100,000 are under the orders of the Board. Nearly 80 per cent of the women who have reached the age of twenty have been married, for we are one of the most married communities in the world.
>
> In the five years for which we have figures it is impossible to discern either increase or decrease in the proportion of married women working for wages. There can be no doubt, however, that women do not now always quit their jobs when they get married. This is a fact of great moment as all will recognize. Without giving details, our information shows that married women at work are more likely to be found in the larger cities than in the smaller cities and towns. They are most prominent in hotels, restaurants and laundries, making up about one third of the female working force in these employments. They are present in all the other trades, and on the whole make up from ten to twenty per cent of the female workers.

In regard to administration, the procedure followed is outlined. The Board gathers each year from all firms in the factory trades, and from a considerable number in other trades, particularized wage sheets as to their female employees. From these returns statistical tables are compiled, and these enable the Board to

discover whether or not its orders are being obeyed. Each sheet is analyzed and, where any deviations appear, the firm is interrogated. Sometimes the deviations are explained away. Sometimes they represent inadvertencies on the part of foremen or accountants and are at once set right. In respect to deviations, the report observes that as a rule such oversights are corrected as soon as pointed out. "Another type is of the employer—none too efficient himself and none too prosperous in his business—who would save himself by reckless wage-cutting. Others again are newcomers to Ontario, and have not learned to appreciate the wholesome standards of living which have made this province one where it is desirable to live and do business. Thus we have some cases which involve considerable negotiations."

AVERAGE WEEKLY WAGES AND HOURS OF FEMALE EMPLOYEES IN VARIOUS INDUSTRIES IN ONTARIO

—	Firms	Female Employees		Average Weekly Wage		Average hours per week	Minimum wages (experienced adults)
		Over 18	Under 18	Over 18	Under 18

†Excepting seasonal canneries).

The Board has collected during the year arrears of wages due a number of female workers. Twenty-nine firms have made such payments to ninety-five workers. The total sum collected was $4.899.31. In no case was it necessary to prosecute.

During the year covered by the report two orders were issued. One of these covers the custom millinery trade in the city of Toronto, and is known as Order 41. The other covers hair-dressing and similar establishments in the same city and is listed as Order 42.

The tables in the report give particulars of wages, hours, and the numbers employed in each of the industries covered by Minimum Wage Orders. The table on page 1056 gives some particulars concerning each industry for the year 1926.

"A PRACTICAL PHASE OF UNEMPLOYMENT INSURANCE"

A Recent issue of *Canadian Finance* in commenting on the fact that "suggestions have been made that insurance companies add unemployment to their list of risks," quoted Mr. Haley Fiske, President of the Metropolitan Life Insurance Company, as being in favour of insuring against unemployment and at the same time pointing out that special legislation would be required in both Canada and the United States before any of the great companies could undertake it as a private venture.

In connection with this endorsation of unemployment insurance in insurance circles, it may be of interest to recall that in an interview published in the *New York Evening World* on December 7, 1925, Mr. Fiske stated that the Company "is willing to experiment with unemployment insurance.....and it already has formulated rough plans on which to work, once the Legislature has given us the requisite laws."

These "rough plans" of which Mr. Fiske spoke are outlined in a pamphlet entitled "A Practical Phase of Unemployment Insurance" by Reinhard A. Hohaus, assistant actuary of the Metropolitan Life Insurance Company, the pamphlet being an enlargment of remarks made at the Round Table on "Unemployment Insurance" at a joint meeting of the American Association for Labour Legislation and the American Economic Association in December 1925.

At the commencement of his treatise Mr. Hohaus stated as follows:

> It will be assumed that the question of the advisability of this type of insurance has been settled and that insurance companies are permitted to offer protection against unemployment. It will be further assumed that the coverage will be offered on a basis similar to that of group life insurance that is, a contract made with the employer covering all of his employees, or a class thereof determined by conditions pertaining to employment.

Dealing with one of the chief objections against unemployment insurance—that of the possibility of malingering—the report continues:—

> One of the first objections always raised against unemployment insurance is that there would be a great amount of malingering because it is "a voluntary act." If this be true it is a very powerful objection. However, the claim that "malingering will occur as it is a voluntary act" can be raised against almost every kind of insurance. A voluntary act on the part of the insured can cause the occurrence of the contingency insured against in life, health, fire, surety, property, and other kinds of insurance. Rain insurance is a rare exception where the insured is powerless to do so. To prevent the occurrence of such voluntary acts is the function of underwriting and a purpose of the contract.
>
> It is an axiom of health insurance that the benefit payable should be less than the income received by the insured while actively at work. Obviously the reason is to reduce malingering so that the insured will not be able to remain disabled without suffering financial loss. Likewise any unemployment insurance benefit should be less than the wages received while actively at work, and the maximum benefit would be limited to a percentage of salary—say 66.2-3 per cent—with a further maximum as to the amount in dollars and cents. Both the percentage and the maximum amount might vary according to the type of industry and employment involved. A weakness of the present British plan is that the weekly benefit is a flat amount for everybody, so that for some the benefit may be larger than the wages received at active work.

Touching further on this phase of the problem, Mr. Hohaus advocates a short waiting period before the payments of benefits, and suggests the incorporation of the following feature in any scheme of unemployment insurance:—

> As a matter of expediency and saving of expense in administration, a waiting period would be satisfactory as that would eliminate a great amount of the short duration unemployment for which the expense and trouble of paying claims would be very great. It might be suggested that the benefit be made retroactive after six days of unemployment. However, until sufficient experience is obtained, it would be wise to disregard the retroactive feature. An insured who has been unemployed for four or five days might be tempted to remain unemployed for another day or two in order to be

entitled to benefit. It is probable that practical experience will furnish a satisfactory method of protection against abuse of this nature and allow the benefits to be retroactive.

Meeting this situation from another angle, Mr. Hohaus points out that if desired by the employer, proportional benefits would be payable for part-time employment, and the waiting period would be an amount of partial unemployment equivalent to six days of complete unemployment. A standard working day—for example 8 hours—would be agreed upon, and that standard would determine the amount of unemployment.

Referring to the conditions governing payment of benefits, the report outlines these as follows:—

The amount of benefit would be a function of all or some of the following: salary, years of service, incidence and duration of employment, and would be determined by a formula which would preclude individual selection. Any scheme of benefit which varies according to the marital status, the number of children, or other such provisions would probably be avoided.

No employee would become eligible for coverage until he had completed a certain period of service—one year, for example. Obviously the purpose is to eliminate "drifters, floaters, casuals, etc.," from the benefits and, therefore, from the cost. Moreover, the average employee who remains in service generally proves more satisfactory to the employer not only mechanically but probably morally, so that a probationary period may be expected to have some effect as an automatic selection of risks.

Co-operation on the part of the employer is considered as essential to the success of unemployment insurance. On this factor in the problem Mr. Hohaus says:—

Probably the most important factor in the underwriting of this type of insurance is the co-operation of the employer. If he gives the insurance company active and sincere co-operation, the insurance should be a success. If his co-operation is only passive and half-hearted, the insurance may quite easily prove a failure. In order to encourage full co-operation, the insurer would require that the employer pay all or a substantial share of the cost of the insurance, so that he will have a considerable financial "stake" in the success of the plan. This "stake" is especially emphasized as part of the cost may be returned to him through dividends, if his claim experience be satisfactory.

The co-operation of the employer is very essential in devising a procedure for paying claims. The British requirement is that claimant for benefits must be capable of, and available for, work, but unable to obtain suitable employment. As this requirement puts the burden of proof upon the individual, an elaborate organization with employment exchanges, various judicial bodies, etc., has been developed in England, and it is quite likely that if the insurance company had the same requirement a similar organization would have to be developed. It is always advisable to have a claim dependent as much as possible upon fact, and as little as possible upon opinion. "Suitable" is, of course, a matter of opinion and hence causes much disagreement.

The primary requirement of the insurance company would be that the benefit be based upon unemployment caused by the inability of the employer to provide employment. This is a matter of fact—either the employer can provide work or he cannot—and so there is not the field for disagreement as in the English requirement. Of course, this inability would be limited to trade depression, and will specifically exclude unemployment caused by trade disputes, misconduct, voluntary separation, disability, etc. The claimant would also be excluded from benefit while he is an inmate of any institution because of ill-health or action of law, or is a resident, whether temporarily or permanently, outside the United States.

The underlying thought of such requirement is that if the previous employer cannot give the employee work, it is not likely that any other employer can give him suitable employment and he should not be discouraged in taking temporary work at something else—such as snow shovelling.

As a basis for the calculations of premiums, the three elements which should determine the scale of premiums are given as:—

1. The rate of unemployment for which benefits are payable.
2. The rate of interest.
3. Expense of administration.

Commenting on the first of these factors, Mr. Hohaus considered that it is affected by three separate influences—cyclic, seasonal and age. The cyclic influence is ascribed to variations occurring at the different stages of the business cycle, the rate of unemployment being low in times of prosperity, and high in a period of depression. As regards the seasonal influence, the building and clothing industries are classed as being considerably affected by it. While the available material indicates that the rate of unemployment increases with age, it is pointed out that "there is a strong possibility that the increase stops temporarily about age 30 or 35 and that the rate decreases for about ten years, at which time it increases again. Mr. Hohaus considers that while all these influences should be carefully measured and used in the premium calculations, the material by which they can be accurately measured does not exist, and that the problem resolves itself into a search for available data.

Developing his tentative plan, Mr. Hohaus states that as the rates of unemployment vary widely by industry, the premiums charged should reflect this variation, and that each industry should pay a premium commensurate with the risk in that industry. The Metropolitan Life Insurance Company believes that it is "highly advisable to have the scale of premiums vary by industry and would adopt such a scale in actual practice."

Dealing with the expense of administration, Mr. Hohaus observes that "in view of the comparatively large premiums which would have to be charged, it seems reasonable to assume that the business can be administered, after the pioneer work has been completed, by an insurance company for a cost of not more than 10 per cent or 15 per cent of the income."

The ultimate purpose of the plan is thus defined:—

> The purpose of the insurance should be more than the payment of an indemnity when a contingency occurs; it should also try to prevent the occurrence of the contingency. Therefore, the insurance plan should be one that will induce the employer to reduce unemployment—especially seasonal. Probably the best inducement is to make it to the direct financial advantage of the employer to do so. Consequently the cost of the insurance will be subject to a reduction—either in the form of dividends or reduced premium—and the amount of reduction will be determined primarily by the employer's own experience. It is felt that this method, which in other branches of insurance is known as experience rating, should have the desired effect as it has had in other branches of insurance.

In conclusion, the faith of the company in the feasibility of unemployment insurance is stated as follows:—

> At least one insurance company feels that the problems of writing unemployment insurance are not insurmountable, and it is optimistic about the practicability of this type of insurance. As soon as the insurance laws are amended so that it may offer this type of coverage, it will do so.

UNEMPLOYMENT INSURANCE IN GERMANY

After a considerable amount of preparatory work extending as far back as 1919, a bill dealing with compulsory unemployment insurance has passed the last stages of parliamentary procedure in Germany and has become law by the decision of the Reichstag. The act, which came into force on October 1, sets up a system of compulsory unemployment insurance, closely co-ordinated with the work of the public employment exchanges, and covering more than 16,000,000 workers. The system is founded on the basis of financial contributions from the employers and the insured persons, supplemented in emergency periods by grants from the authorities. The original draft of the Act entrusted the administration of unemployment insurance to district unemployment funds, attached and subordinated to the provincial employment exchanges, but the solution finally adopted was not on the lines of decentralization, but of concentration.

Central Insurance Institute.—A new central autonomous administration of insurance is set up by this act, a kind of federal employment exchange and unemployment insurance institute with a legal personality, which also controls vocational guidance and the placing of apprentices. To this federal institute are also attached the existing public employment exchanges, which constitute, according to their importance, provincial administrative organizations. Each municipality must be served by an employment exchange.

Joint Basis of System.—In all their degrees the various administrative organizations, which are appointed for five years, are constituted on a joint basis, including an equal number of the representatives of the government, the employers and the workers. One at least of the latter must represent the interests of the employees. In the administrative councils of the municipal offices, each of the three groups must include at least five representatives. The number must be seven in the councils of the provincial offices and ten on the council of the central institute. The Act provides for the participation of women in all councils.

Technical Sections and Conciliation Councils.—The employment exchanges must be subdivided into technical sections for various occupations according to requirements. Means are provided for the settling of disputes. It will be the duty of the central institute and its various organs to supervise the work of private employment exchanges, both fee-charging and other. Fee-charging employment agencies will be prohibited from January 1, 1931, but those whose license dates as far back as June 2, 1910, will, when they are abolished, receive an indemnity to be determined by a special Act. Even before January 1, 1931, the Minister of Labour may abolish fee-charging agencies for certain occupations. Fee-charging vocational guidance is prohibited.

Scope and Benefits of the System.—The benefits of the unemployment insurance system are cash benefits, sickness relief for the unemployed, and preventive measures connected with the campaign against unemployment

47968—3½

Scope.—The scope of the unemployment insurance system coincides with that of sickness insurance including the special insurance system for employees, and thus extends to more than 16,000,000 workers. The categories of workers excluded are almost the same as those at present excluded, and include among others, the following:

(1) Workers in agriculture and forestry who:

(*a*) possess or work a certain area of land which allows them to supply the essential requirements of their family; or

(*b*) are employed under a written labour agreement with a minimum duration of one year, or involving for the employer the obligation of giving three months' notice before dismissal, save in the event of bad conduct. (This written agreement must be produced at the moment of the request for exemption); or

(*c*) are boarded and lodged by their employer, and in his household;

(2) Fishermen employed in coastal fishing, or those remunerated on a share basis;

(3) Apprentices with a written contract of apprenticeship of at least two years' duration (the exemption lapses six months before the expiry of the contract).

Similarly, manual workers whose annual income exceeds 3,600 marks, and employees whose earnings exceed 6,000 marks per year, are excluded from the compulsory insurance system. On the other hand, domestic servants, who have hitherto been excluded, are now insured under the new act, as also are seamen, who were previously under a special system. The law also allows an employer who has himself set up a system of unemployment insurance for his workers, providing insured persons an allowance higher than that fixed in the act, to demand for his workers exemption from the general system.

Conditions of Grant of Allowance.—The conditions required of the unemployed person before the grant to him of the unemployment allowance are, that he should be both capable and desirous of working. The criterion of capacity to work is the fact that the worker can, by work corresponding to his occupational knowledge and physical strength earn, at least one-third of what workers, sound in mind and body, can earn in the exercise of the same occupation in the same district. Refusal to work on the part of an unemployed person is justified only when he is not paid at the usual wage rate, or when the work offered him does not correspond to his previous training or his physical capacity, or when the post in question is vacant as the result of a strike or a lock-out, or finally, when the post offered is such as to endanger the physical or moral health of the worker or to prevent him from supplying adequately the needs of his family.

After receiving unemployment allowance for nine weeks, an unemployed person may no longer refuse work for the sole reason that it does not correspond to his occupational training.

For workers under 21 years of age, and for workers of all ages who are in receipt of the emergency allowance, the grant of the allowance may be made conditional on the performance of some work which is in the public interest, and which corresponds to the age and state of health of the person concerned and constitutes no obstacle to his re-engagement in normal employment. If, without good reason, an unemployed person refuses to undergo a re-education or vocational guidance course calculated to restore him to employment, he is deprived of his allowance for the four weeks following his refusal. The same is the case with the worker who has lost his employment through his own fault.

Strikes and Lock-outs.—Workers whose unemployment is the result of a strike or lock-out on German territory lose their right to the allowance for the duration of the dispute. Nevertheless, when the unemployment is the indirect result only of the dispute, and in particular when the dispute arises outside the undertaking in which the unemployed person concerned was occupied, or outside the occupation to which he belongs, or away from his place of residence, the allowance may be granted if, in the view of the authorities, the withholding of it would be an undue hardship.

Duration of Allowance.—In order to be entitled to the allowance, the unemployed person must have been insured for 26 weeks during the year preceding his application. The maximum duration of the allowance is, in principle, 26 weeks per period of twelve months. The right to the allowance is, in principle, only renewed when a further stage of 26 weeks has been completed. In exceptional cases the administrative council of the central institute may prolong the duration of the allowance to 39 weeks, limiting this, if necessary, to certain districts or to certain occupations. In periods of acute and prolonged unemployment, the Minister of Labour may, on the advice of the authorities concerned, institute a special system of allowance known as the emergency allowance. This exceptional allowance, which is in addition to the normal period, applies only to unemployed persons in distress. Generally speaking, the provisions governing this part of the act are in accordance with existing legislation.

Composition of Allowance.—For this purpose the Act sets up eleven classes with weekly

wages ranging from ten marks to sixty marks and upwards, and total allowances ranging from eighty per cent in the first and second classes to sixty per cent in the four top wage groups. The allowance is granted for six working days a week. The waiting period is seven full days. During the period of allowance the unemployed person is insured against sickness, and sick pay is, when necessary, automatically substitued for unemployment insurance.

Partial Unemployment.—Insurance against partial unemployment is not provided as a right, but may be granted in particular cases by decision of the administrative authorities.

Prevention of Unemployment.—One of the main objects of the act is the prevention of unemployment, and in default of this, the return of the workers to employment as soon as possible. In this connection the object is to develop, as far as possible, the activity of the public employment exchanges. The act maintains all the provisions at present in force regarding the payment of journey money in the event of employment being found away from home, the distribution of working clothes, tools, etc., and the organization of relief works, which are already well known in Germany under the title of "productive unemployment relief."

General provisions.—An unemployed person who wishes to claim his right to an allowance must present himself personally at the employment exchange of his place of residence. Similarly, an unemployed person who is in receipt of an allowance must present himself regularly at the employment exchange in search of employment. After nine weeks' allowance the unemployed person is no longer allowed to limit his search for work to the technical section connected with his own occupation, but must accept any employment offered him.

Reciprocity Arrangement.—It is the duty of the Minister of Labour to determine to what extent the rights acquired from foreign legislation on unemployment insurance can be granted in Germany. Assimilation is only allowed when the benefits of the foreign system are equivalent to those under German law, and when there is a reciprocity agreement between Germany and the foreign State in question.

The act abrogates all previous provision concerning public employment exchange work and unemployment relief.

CANADIAN PACIFIC RAILWAY COMPANY'S PLAN OF EMPLOYEES' STOCK OWNERSHIP

THE Canadian Pacific Railway Company recently offered to those in its employ the opportunity to subscribe for shares in its ordinary capital stock under the following terms and conditions:—

1. Fifty thousand shares of Stock are offered at a price of $150 per share.

2. Subscriptions will be received until October 20, 1927.

3. One or more shares may be subscribed for. The maximum number of shares for which an employee may subscribe shall not exceed one share for each $200 of his annual rate of pay at the time of subscription, based on his average earnings for the three months immediately preceding the month in which subscription is made, and in no event shall subscription be made for more than twenty shares.

4. The Stock shall be paid for in monthly instalments to be deducted from the pay of the subscriber. The first instalment shall be deducted from the November, 1927, payroll. Where payrolls are semi-monthly, deductions shall be from the payroll for the second half of the month. Subscribers may indicate the amount of the monthly instalment to be deducted upon the payroll, but no instalment shall be less than $5 per share or more than $15 per share. Instalments must be in even dollars.

5. Interest at the rate of six per cent per annum will be allowed and credited to the employee's account quarterly on amounts deducted from employee's wages from the dates of the respective credits until the date when dividends will begin to accrue upon the Stock when issued after the subscription is fully paid.

6. Subscription for the Stock will be cancelled upon the happening of any of the following events:

(1) Upon termination of service of the subscriber voluntarily or by discharge.
(2) Upon pledge or assignment by the subscriber of his rights under the subscription.
(3) Upon discontinuance of payments by the subscriber without the consent of the Company for three consecutive months. See Paragraph 7.
(4) Upon termination of service by death or permanent disability, except as otherwise provided in Paragraph 7.

A subscription may not be cancelled in part. The cancellation of a subscription forfeits all right and interest of the subscriber, and all persons claiming under or through him, in and to the Stock subscribed for. The Company will thereupon refund the full amount of the payments made on the subscription so cancelled with the accrued interest.

7. In the following circumstances the required monthly payments shall be made directly to the Treasurer of the Company.

(1) If the subscriber is granted leave of absence.

(2) If the subscriber is temporarily disabled.

(3) If the employment of the subscriber is suspended temporarily.

In any such case the monthly payments required under a subscription may, at the option of the subscriber given in writing to his employing officer, be suspended for the period during which his name is off the payroll, not, however, exceeding three months.

The subscription of a subscriber whose service is terminated by permanent disability or death may at the election in writing of such subscriber, or, in case of death, at the written option of the estate of such subscriber, be continued until the full price of the Stock subscribed for has beeen paid; the required monthly payments under such subscription to be made directly to the Treasurer of the Company.

8. The subscriber may, by written notice to the Treasurer of the Company at any time and from time to time, prior to the issuance of a certificate of Stock to him, designate a beneficiary or beneficiaries to whom in the event of his death he desires the Company to pay all amounts to which his estate would otherwise be entitled under his subscription, and the Company will make payment of all such amounts in accordance with the designation so made, subject to any limitation imposed by law.

9. All subscriptions shall be subject to the following express conditions and agreements:—

(1) That allotments of Stock for which subscriptions are received hereunder will not be made until immediately after expiration of the subscription period.

(2) That if subscriptions are received for more than 50,000 Shares the entire 50,000 Shares hereby offered will be allotted, but the Company reserves the right in its discretion to allot to a subscriber either (a) less than the full number of shares subscribed, or (b) the full number of shares subscribed.

All questions concerning subscriptions or allotments and interest thereunder shall be decided by the President and his decision shall be final and conclusive.

10. Subscriptions shall be delivered to the immediate employing officer of the subscriber, by whom it shall be forwarded to Mr. J. Leslie, Vice-President and Comptroller, Montreal.

11. For the purposes of this Circular Letter and accompanying subscription form officers and employees of the following Companies will be regarded as being in the employ of the Canadian Pacific Railway Company: Canadian Pacific Express Company; Canadian Pacific Steamships Limited; Dominion Atlantic Railway Company; Esquimalt & Nanaimo Railway Company; Fredericton & Grand Lake Coal and Railway Company; Grand River Railway Company; Kettle Valley Railway Company; Lake Erie and Northern Railway Company; New Brunswick Coal and Railway; Quebec Central Railway Company.

Trade Union Report on the Indian Textile Indusry

The United Textile Factory Workers' Association of Great Britain recently published the report of an investigation made on behalf of the Association by Mr. J. Hindle and Mr. M. Brothers, who were appointed to visit India in 1926. The report showed that, taken as a whole, the mills in India compare favourably as regards building construction, modern machinery, and up-to-date labour-saving devices, with the mills in Lancashire. Eighty per cent of textile operatives are men or boys. Women as a rule are only employed as reelers and winders. Four times the number of operatives per loom or spindle are employed in mills in India that are necessary in Lancashire, the Indian textile operatives lacking the skill, stability and stamina of the British work-people. With very few exceptions, the textile mills have a sixty-hour working week of ten hours per day for six days, but the report states that it is questionable if more than eight hours' productive labour is obtained from the individual operatives, as time is allowed for prayers, bathing, smoking, etc. The system of recruiting labour lends itself to many abuses, and operatives have often to pay bribes to obtain or retain their employment. It is said that ninety per cent of operatives are in debt to money lenders, who charge interest at the rate of from 150 to 300 per cent per annum.

The Indian workers have no national unemployment or health insurance Acts, and there are no minimum wage Acts or standard lists, nor are there any agreements between employers' and employees' associations. A workmen's compensation Act became effective in 1924. Trade Unionism is not at the moment making progress, and is at a very low ebb. The Trade Union Act, by which trade unions are for the first time recognized as within the law, has only recently been placed upon the Statute Book.

NOTES ON TECHNICAL EDUCATION AND APPRENTICESHIP

Apprentice Classes at Saskatoon

A TRAINING class for carpenter apprentices will be conducted this winter by the Saskatoon Vocational Committee, students being given training in academic subjects as well as practical shop work. This is stated to be the first attempt in Saskatchewan to supply a full apprentices' course. At a recent meeting of the vocational committee it was pointed out that the builders employ apprentices during the summer and give them practical work, but it is compulsory for these apprentices to follow out this school course for a period of three years to secure their papers. It is the desire of the builders that the apprentices receive training during the winter in necessary academic subjects, such as English, mathematics, drawing and the theory of the trade, as well as in practical shop work.

The arrangement so far is that accommodation for the study of the academic subjects will be provided at Bedford Road Collegiate Institute, and it is anticipated that students will receive their shop work at Cushing's mill. The classes will start when the building season ends.

The question was raised as to whether or not the committee could afford to extend this training to bricklayers' and plasterers' apprentices, to which it was replied that the committee is very anxious to make this first training class a success, and while it would be willing that bricklayer and plasterer apprentices might take academic classes at the collegiate, the committee would not undertake to provide any practical winter training for them. A program of studies for the classes during the winter is being worked out and will be ready before winter. Already the Builders' Exchange has apprentices enrolled, and ten at least will be ready to start the classes at once and others are expected.

Conference on Rural Education in Nova Scotia

Some months ago a standing committee was appointed to collaborate with Dr. Munroe, the Superintendent of Education, in the matter of rural education. The committee consists of three men appointed by the Department of Education, three by the Department of Natural Resources and three by the Nova Scotia Farmers' Association. This committee met in Truro on September 15 and devoted a full day to the discussion of rural education. The superintendent of education presented the problems to be considered, suggesting certain remedies. The deliberations of the committee crystallized into the following three resolutions which were passed unanimously:—

1. Whereas the problems, experience, interests and environment of rural pupils are somewhat different from those of the cities and towns, therefore resolved that rural teachers should have special training in the interpretation and handling of rural problems, such training to include a knowledge of agricultural science, home economics, social activities and the organization of rural community life.

2. Whereas the curriculum now prescribed for rural schools is the same as that for the town schools, and whereas it is interpreted by teachers with a grading examination uppermost in mind; resolved that the rural curriculum be so modified that a fair portion of school work be based on rural life activities; and that rural pupils be graded on useful, intelligent performance rather than solely on the regularly recognized academic tests.

3. Resolved that school grounds shall be sufficiently large (approximately two acres) to provide ample facilities for supervised play.

Loans to Workers in the United States

A study carried out by the United States Department of Labour of 4,000 loans to workers made by American credit unions shows that these loans were most commonly required to meet the expenses of illness (including dental treatment and childbirth), 37 per cent of the women's loans, and nearly 19 per cent of the men's, being for this purpose. Coal bills were responsible for the second largest number of claims—generally in order to enable purchasers to avoid the expense and inconvenience of small quantity buying. "Family expenses," and "various bills," covering ordinary household expenditure, came next on the list; and these four groups included 80 per cent of all the loans granted. The remaining 20 per cent was composed of loans for the purchase, improvement and repair of houses; for investment; that is, the purchase either of securities, or of stock-in-trade for small shopkeepers; and for education. Only 5 per cent of the men, and 1 per cent of the women asked loans for educational purposes.

NOTES ON INDUSTRIAL SAFETY AND HEALTH

New Safety Magazine for Quebec

The Province of Quebec Safety League recently published the first number of a monthly pictorial magazine, the *Safety Signal* (*Signal de Sécurité*).

The new magazine is devoted to accident prevention, with special reference to Quebec. Its editor in chief is Mr. Arthur Gaboury, the secretary of the League, who is assisted by an advisory board of expert safety engineers representing the safety movement in Canada. The *Safety Signal* is an attractive publication with numerous illustrations, and gives promise of becoming a very useful agent for furthering the work of the Quebec League and of its parent organization, the Canadian National Safety League. Subscriptions and inquiries regarding rates, etc., are to be addressed to Signal Publishing Company, Box 176, Station "H", Montreal.

Neglect of Machine Guards in Certain Factories

Several of the district factory inspectors in Ontario, in their annual reports to the Factories Branch note that the mechanical safeguards provided under the regulations are not properly used. One report states that "one of the biggest difficulties to be contended with is workmen removing the guard to adjust some part and neglecting to replace it in its proper position. No class of machines require more protection than those used in wood working factories, as proven by the large number of accidents that occur in these places even with guards on machines. Very few of the operators will keep them in their proper position, and in one factory visited every saw guard was two inches at least from the top of the saw. In taking up this matter with the operators they claimed that they wanted a full view of the saw and that the change in the class of work came so often that they could not take time to adjust them, as they were working piece work."

The inspector in another district states that "more than persuasion is necessary sometimes, employers often objecting to modern safety equipment being placed on their machines, fearing it will retard production and guards which have been provided by employers and managers are found cast aside. In some cases this has been done during repairs to the machine, but they are promptly replaced when attention is drawn to the fact that they are placed there for the protection of life and limb. This shows how necessary it is to carry on persistent education on Safety First. It is probably not generally known that where an employee persists in removing a safeguard from the machine which he or she operates after being warned not to do so, it is within the power of the inspector to prosecute the employee concerned. Accidents are sometimes caused by employees disregarding rules laid down for safety."

A third inspector notes that "guards may often have to be removed so that easy removal and reinstatement are important considerations, and if the guard interferes in any way with the working of the machine, there will be an inclination to leave it off the machine. The proper type of guards are those which keep the worker's hands out of any danger zone or push them out if left there too long."

Poisons Affecting Eyes of Industrial Workers

Eye injuries caused by working with methanol and with lead and lead compounds are described by Mr. J. E. Hannum, research engineer of the Conservation Council of America. "This group of eye injuries is rapidly increasing in importance owing to the enormous increase in recent years in the production of dye-stuffs and other chemicals and the consequent growth of the chemical industry.

Methanol he calls 'probably the most deadly of industrial poisons.' Widely used in many industries, it is said to produce such serious effects upon the retina and optic nerve that total blindness almost invariably develops and it may cause blindness if taken internally. Industrial groups exposed to the hazards of methanol include art-glass workers, artificial-silk makers, bronzers, celluloid makers, dimethyl sulphate makers, dye makers, felt-hat makers, gilders, incandescent-lamp makers, ink makers, japan makers, linoleum makers, perfume makers, shellac makers, soap makers and methanol distillers.

Lead and lead compounds are considered among the most dangerous industrial poisons, producing, among other things, atrophy of the optic nerve. Permanent blindness is the outcome of complete atrophy.

Lead, it is said, demands special consideration because it is used in more than 125 operations employing amber workers, babbitters, dry and storage battery makers, brass polishers, colour makers, dye makers, gal-

vanizers, lead burners, lead miners, lead smelters, painters, paint makers, petroleum refiners, rubber workers, zinc smelters and other classes.

Poisons were found to enter the body most frequently through the respiratory system in the form of gas, vapour or dust. They may, however, enter by absorption through the skin, and in some instances they are carried into the body by food that has come in contact with the poison on the hands of the worker."

"The big problem in safety work," the report adds, " is gaining the co-operation of the workmen. This is especially true in providing effective eye protection, for in most instances the safe guards must be worn by the workers."

Recommendations of American Engineering Council

The American Engineering Council published early in September the results of a study of industrial safety and production, undertaken at the cost of the National Bureau of Casualty and Surety Underwriters, the latter body having found evidence of an alarming increase in the number of severity of accidents. The investigation covered 13,898 companies, 122,028 company years, 2,454,413 employees, 13,142,569 man-years, and 54,430,707,000 man-hours. A. W. Beresford, of Detroit, past President of the American Institute of Electrical Engineers, was Chairman of the investigating committee.

During the last decade, the report says there has been amazing increase in the productivity of the individual American industrial worker, and an accompanying decrease in the accident cost assessed against each unit of product. The hazard per man-hour, it is asserted, has increased and is a cause of serious disquiet.

The following six general recommendations are made:

" That the same executive direction and control be given to decreasing industrial accidents as is given to increasing productivity.

" That those agencies which collect and disseminate accident statistics adopt uniform terminology and standardize their records so that they may be compiled on a comparable national basis.

" That the executives of these plants having accident frequency and accident severity rates initiate, direct, and control ways and means of lowering such rates to at least the low rates obtained by other plants in their industry.

" That industrial trade associations, engineering societies and other agencies, concerned with the improvement of industrial operation, bring to the attention of their members the necessity of improvement in safety performance as a vital step in the strengthening of their industrial position.

" That industrial trade associations secure, compile and analyze accident statistics for the purpose of determining the lowest accident rates possible of attainment for their respective industries.

" That industrial trade associations endeavour to secure such action on the part of executives of their industries as will result in each plant having the lowest accident rates obtainable."

November No-accident Month for Electric Railways

A meeting of the committee on safety and accident prevention of the Canadian Electric Railway Association was held at Montreal on September 12 under the chairmanship of R. M. Reade, superintendent of the Quebec Railway Light, Heat and Power Company Limited. Those present were : H. MacLean, superintendent, New Brunswick Power Company; W. R. Robertson, superintendent of Hydro Electric Railway Company of Ontario; J. F. H. Wyse, general manager of the Canadian National Safety League; and A. Gaboury, general manager of the Province of Quebec Safety League. There was also present on special invitation, D. E. Blair, past president of the Canadian Electric Railway Association, and general superintendent of the Montreal Tramway Company; Ed. Quinn, chairman of transportation and traffic section of the Province of Quebec Safety League; E. A. Cunningham, efficiency engineer of the Canadian Pacific Railway, and vice-president of the league.

The chairman explained that the object of the meeting was to draft a program of the committee for the coming twelve months. It was unanimously resolved that a safety trophy, along with gold, silver and bronze medals should be established to serve as a stimulant to the safety movement throughout Canada.

The various member companies of the association are to be asked to sponsor the adoption, in their respective cities, of standard traffic rules and regulations. The member companies will be asked to adopt a standard form of accident classification.

The month of November was designated as a no-accident month, this month being chosen as being the worst month during the railway year owing to falling leaves, greasy rails and sudden changes in temperature.

The question of posters specially adaptable to the railway companies was fully discussed

and it was suggested by Manager Gaboury that the accident hazard in the railways should be staged and photographed and that special posters be made showing special risks.

Safety Contest in New York

In order to decrease in the number of industrial accidents in New York, the Merchants' Association is about to inaugurate an industrial safety contest among metal manufacturing factories. Any metal manufacturing shop which is a member of The Merchants' Association may enter the contest. Shops will be grouped according to the degree of hazard involved in their business, and a cash prize of $100 will be awarded to the shop having the best record and showing the greatest successful effort for improvement from September 1 to December 31. This prize will be given to the employees of the winning shop to be used as they see fit. In addition, certificates will be awarded by the Merchants' Association to all shops having a no-accident record for the period ending December 31. The metal industry was selected as the field of the first contest because of the frequency of industrial accidents in it.

If the present contest is successful new prizes will be offered for 1928, and similar competitions will be started in other fields of industry.

International Mine Rescue Contest

The Sixth International Firt Aid and Mine Rescue Contest was held recently at Pittsburgh, Pa., under the auspices of the United States Bureau of Mines, the highest honours being won by the team from the Penelec mines at Seward, Pennsylvania. The competing mine-rescue teams were composed of five men provided with oxygen breathing apparatus and other necessary equipment used by rescue crews in coal and metal mines following fires and explosions. The teams were required to work out in a specially prepared gas-tight, gas enclosed room, filled with unbreathable gas, practical problems such as might be encountered in underground rescue operations. After leaving this smoke room, the team entered an outdoor area roped off to represent mine workings. At various points, signs were placed indicating conditions encountered, such as "bad roof" "gas" or "entry caved tight, hot gases issuing from crevices." The crew entered the imaginary mine, testing the roof as they proceeded and frequently testing for gas with a safety lamp. At several points, a gas box was placed which contained carbon monoxide or natural gas. The team captain used his safety lamp in examining the atmosphere of each box, also testing with a carbon monoxide detector and a canary. When a "victim" was found, oxygen breathing apparatus was adjusted on him and he was removed to fresh air and "revived."

Safety Codes for Various Industries

The annual report of the International Association of Industrial Accident Boards and Commissions shows that there are now thirty-six active members of the Association including the following Canadian representatives: the Department of Labour of Canada, and the Workmen's Compensation Boards of Manitoba, New Brunswick, Nova Scotia and Ontario. To date the United States Bureau of Labour Statistics has published the following safety codes in the formulation of which the Association took part:—

Bulletin No. 331—Code of Lighting: Factories, Mills, and Other Work Places.

Bulletin No. 336—Safety Code for the Protection of Industrial Workers in Foundries.

Bulletin No. 351—Safety Code for the Construction, Care and use of Ladders.

Bulletins 364.—Safety Code for Mechanical Power-Transmission Apparatus.

Bulletin 375—Safety Code for Laundry Machinery and Operations.

Bulletin 378—Safety Code for Wood-working Plants.

Bulletin 410—Safety Code for Paper and Pulp Mills.

Bulletin 433—Safety Codes for the Prevention of Dust Explosions.

Bulletin 436—Safety Code for the Use, Care, and Protection of Abrasive Wheels.

Bulletin 447—Safety Code for Rubber Mills and Calendars.

Copies of these codes, it is stated, can be obtained on request from the Bureau of Labour Statistics.

Hazard of Benzol Poisoning

A treatise entitled "Benzol Poisoning as an Industrial Hazard" written by Leonard Greenburg, Associate Sanitary Engineer of the United States Public Health Service, which appeared in a recent bulletin issued by that body, details the result of studies on this subject conducted by the Public Health Service in co-operation with the Sub-Committee on Benzol of the Committe on Industrial Poisoning of the National Safety Council.

The first section of the report consists of a review of the chemical and industrial uses of benzol (commonly called Benzene) as well as of the existing literature of benzol poisoning.

In order to ascertain the extent of the benzol hazard in industry in the United States a preliminary list was prepared of 324 industrial establishments, which, from the nature of their products, might be expected to use benzol. The six largest users included three rubber companies and three chemical concerns. It was noted that out of 15 companies reporting cases of benzol poisoning, only 2 were among those using less than 100 gallons of benzol per week; 4 were among those using between 100 and 1,000 gallons; 3 were among the 6 firms using over 1,000 gallons; while 6 were among the 36 firms giving no information as to the amount of benzol used. Out of 23 establishments with 10 or more employees exposed to benzol poisoning, 8 were rubber factories, 5 were chemical works, 4 were paint and varnish makers, 3 were gas plants making benzol as a by-product, and 3 were plants of other types. Out of 44 establishments with less than 10 employees exposed to benzol poisoning only 4 reported having experienced cases of poisoning. Of 17 firms with from 10 to 49 employees exposed, 6 had experienced cases of poisoning, while of the 6 firms with more than 50 persons exposed to benzol all but one had experienced industrial poisoning by benzol.

The report observes that "the result of this preliminary study was to indicate that the industrial firms using benzol were generally alive to the dangers involved and had in most cases taken definite precautions for the protection of their employees."

In its general conclusions the report states in part as follows:—

Benzol is used in industry under more or less distinct sets of conditions. In the manufacture of benzol from coal and coal tar, in the blending of motor fuels, and in the chemical industries the solvent is necessarily handled in closed containers and pipe systems. Here chronic poisoning is unlikely to occur and the chief hazard arises from acute poisoning due to carelessness in the cleaning of tanks, breaks in the apparatus, and similar accidents. With regard to this type of process it seems certain that with proper care in construction, maintenance, and operation, the use of benzol can be made sufficiently safe to warrant its employment. . . . .

In the rubber industry, in artificial leather manufacture, in sanitary-can manufacture, in dry cleaning, and in the use of paints and varnishes benzol is employed as a solvent or vehicle under conditions which, almost of necessity, permit more or less evaporation of the solvent into the atmosphere. Here there is relatively little danger of acute benzol poisoning but very great danger of chronic poisoning, arising from prolonged or repeated exposure to the fumes. In order to minimize such hazards as far as possible there are two general types of precautions which should be taken, tending (1) to decrease the degree of exposure and (2) to detect and control incipient poisoning in its earliest possible stages.

The Civil Service Association of Ottawa

The Civil Service Association of Ottawa held its annual general meeting on October 8, 1927. The officers and executive council of the Association reported the results of their year's work, which may briefly be summarized by saying that representations were made to the Government under the headings of salary revision, superannuation and civil service councils. Subsequent to representations being made on the subject of salary revision, it was stated, the Government had placed the sum of $2,700,000 in the supplementary estimates in order to provide a flat increase of $120 to civil servants. While all civil servants had not participated in this increase, the majority of the members of the Association fell within those classes to which the advance was made. The suggestion before the Government regarding superannuation and civil service councils were still under consideration. The adoption of the annual report of the executive constituted an endorsement by the members of the Association of the executive's action and an authorization to proceed further along the same lines.

A proposal laid before the meeting to change the name of the organization to "Civil Service Association of Canada" and to extend eligibility of membership to civil servants situated at points other than Ottawa was discussed at length, but finally withdrawn, the meeting deciding that the Association should continue on its present basis of organization. The membership reports showed the membership at well over 3,000.

The following officers were elected: President, W. J. Callaghan; vice-presidents, Miss Jane McInnes, R. T. Montgomery, A. S. Richardson; secretary, V. L. Lawson; treasurer, J. Lawson.

NOTES ON LABOUR UNION ACTIVITIES

International Typographical Union of North America

THE seventy-second convention of the International Typographical Union was held in the National Guard Armoury in Indianapolis, Indiana, on August 8, 1927, this being the seventy-fifth anniversary of the organization, which was established at Cincinnati, Ohio, on May 3, 1852.

Those who addressed the convention were: Frank Morrison, Secretary, American Federation of Labour; George L. Berry, President, International Printing Pressmen and Assistants' Union; John J. Manning, Secretary-treasurer, union label trades department of the A. F. of L.; John B. Haggerty, President, International Brotherhood of Bookbinders; James C. Shanessy, President, Journeymen Barbers' International Union; Daniel J. Tobin, President, International Union of Teamsters and Chauffeurs, and W. T. Keegan, President, International Stereotypers and Electrotypers Union.

The report of President Howard covered the period from November 1, 1926, to May 31, 1927, and recommended that sections of the constitution and general laws of the organization be amended or clarified so as to eliminate any ambiguity that might exist. To guarantee against irregularities and undue influence in connection with election of officers the president suggested that a new code of laws be drafted; he favoured the idea that conservative provisions be made for the recall of elective officers. The president also recommended numerous changes in the keeping of accounts and records so as to conform strictly with business practices. A detailed report was given of the wage scales negotiated during the period under review. According to the report of J. W. Hays, secretary-treasurer, there were as at May 31, 1927, 807 local unions with a membership of 74,829, an increase over last year of 2,125. The balance to the credit of the union in the several funds amounts to $5,245,683.30.

Some of the amendments to the constitution, which are to be voted on by the membership on Wednesday, October 26, 1927, are: (1) To dissolve the Mailers' Trade District Union and place mailers unions on the same basis as other locals; (2) Changing the date of the convention from the second Monday in August to the second Monday in September; (3) To make two years the terms of representatives appointed by the president with the approval of the executive council, and providing that their terms shall expire with that of the president appointing them, and also setting forth how representatives may be removed; (4) Specifying the manner in which vacancies in any elective offices other than the executive council may be filled; (5) Setting a rate of dues for all classes of members and requiring every member working to contribute to the support of the pension and mortuary funds. A number of additions and amendments were also made to the general laws.

Among the resolutions adopted were the following: (1) Expressing the thanks of the convention to the Hon. Peter Heenan, the Hon. G. D. Robertson and the Hon. J. G. Taylor, "trade unionists in the Canadian Parliament," in connection with the securing of amendments to the Trade Mark and Designs Acts; (2) Dissolving trade district unions now in existence and preventing future organizing and functioning of these unions; (3) Sustaining the action of President Howard in the matter of removal of representatives and disallowing claims for services and expenses; (4) Requesting the officers of the American Federation of Labour and affiliated organizations to urge Congress to adopt a labour policy for the government printing office that four hours shall constitute a day's work on Saturday of each week; (5) Instructing the delegates of the International Typographical Union to the convention of the American Federation of Labour to introduce a motion appealing to the Congress of the United States to provide for federal pensions to industrial veterans; (6) Endorsing the program of the joint conference on retirement for a maximum annuity for government civil service employees of not less than $1,200 per annum, with graduated annuities for all who come within the purview of the civil service retirement law, and optional retirement after thirty years of service to all groups; (7) Ordering that congratulations be sent to the Right Hon. W. L. Mackenzie King, Prime Minister of Canada, upon the occasion of the diamond jubilee celebration of the confederation of the Dominion of Canada.

Charleston, S.C., was chosen as the convention city for 1928.

International Photo-Engravers' Union of North America

The International Photo-Engravers' Union of North America held its twenty-eighth annual convention August 15-21, 1927, in Kansas City, Mo., with 52 delegates present, representing 31 locals or 6,750 members, approximately 85 per cent of the total membership.

President Woll, speaking of wage standards attained and maintained, stated that "the effectiveness of a trade union is largely measured by the success experienced in maintaining standards of compensation during periods of depression and of elevating these standards in a time of prosperity. Thus a gradual and progressive advancement is realized in the economic and social life of the workers and their dependents, and the trade union organization which realizes these ends may fairly be said to have been consistently successful." The president informed the delegates that measured by the standard referred to above it would show that the Photo-Engravers' organization had been exceptionally fortunate in the successes achieved. A list of the new commercial agreements was presented and showed very conclusively that substantial increases had been secured by the majority of locals negotiating while the others retained their former scale. The delegates were further informed that all agreements entered into included a maximum work week of 44 hours for day workers and with a constant lessening of hours of work per week for night workers. In fact it was the opinion of the president that from the present tendency the 40-hour work week as a maximum standard for all night workers seemed assured in the near future. President Woll stated that "during the past year increasing interest has been aroused in the further shortening of the maximum work week standard to 40 hours per week distributed over five days of the week. This enlarged vision of labour has been presented thus far more in terms of future attainment than for immediate accomplishment, though it must be said that a number of trades, especially in localities where a large portion of the membership is of Jewish faith, the five day week of 40 hours per week has been established more or less throughout the year." As what might be an approach in the right direction in the reduction of hours worked per week it was suggested by the speaker that the members seek a vacation period of one-half day each week during the summer months, a suggestion which was given without thought of a compulsory procedure, but merely as a guide that should influence the attitude and conduct of the members upon the subject. Speaking on the subject of apprentices, President Woll stated that "if there was need for a change in our apprentice provisions then such change should more properly take the form of a greater rather than a lesser restriction." Almost every activity of the union was touched on in the report of the president.

According to statistics presented by Henry F. Schmal, secretary-treasurer, the total receipts for the year were $150,980, expenditure $136,995, while the grand total balance on hand June 1, 1927, was $202,297.

Some of the amendments to the constitution adopted were: (1) That moneys received through the official journal shall be placed in a special journal fund, while all moneys derived from monthly *per capita* tax shall be divided into three separate funds as follows: 55 per cent to the general fund, 25 per cent to the Defense Fund, and 20 per cent to the tuberculosis fund; (2) Any amendments which has for its purpose the removal of any existing law, an increase of taxation, the increase of any designated fund or increase in international officers' salaries, must be submitted to a referendum vote of the individual members; (3) That no member shall educate or indenture any person in the work of a photo-engraver without first having received the sanction of the International executive council.

Among the resolutions adopted were: (1) Instructing the executive council to devise ways and means whereby ex-members may retain some kind of a connection with the organization by paying a nominal sum, thereby entitling them to the death benefit feature; (2) Providing that in future no member shall be admitted to the gravure branches under any other condition than that prevailing for photo-engravers.

The following officers were elected: President, Matthew Woll, Washington, D.C.; First Vice-president, E. J. Volz, New York City, N.Y.; Second vice-president, Frank H. Glenn, Philadelphia, Pa.; Third vice-president, C. H. Horrocks, Seattle, Wash.; Secretary-treasurer, Henry F. Schmal, St. Louis, Mo. The Canadian representative is Wm. C. Golby, 67 Day Ave., Toronto, 10, Ont.

Cincinnati, Ohio, was the convention's choice for the 1928 annual meeting.

United Garment Workers of America

The twenty-first regular and first quinquennial convention of the United Garment Workers of America was held in the assembly room of the Fort Wayne Hotel, Detroit, Michigan, August 8-13, 1927, and was attended by approximately 190 delegates. In the report of president T. A. Rickert, reference was made to many subjects of interest which had engaged the attention of the general executive board since the previous convention. Mention was made of the dispute which had arisen between a manufacturer in the City of Montreal and the International Union over the use of a certain label other than that recognized by the union. The dispute was settled out of court and an agreement signed which was acceptable to both parties (Labour Gazette, May, 1927, page 587). Earlier in the year, it was stated, the Federal Government amended the Trade Mark and Design Acts whereby trade unions may register their labels (Labour Gazette, April, 1927, page 380). The report drew attention to the use of prison-made goods to compete against goods made by free labour and in this respect cited the efforts being put forth by Canada to prevent the importation of prison-made goods into that country. Reference was also made to the secession which had taken place in the ranks of the union since the Nashville convention in 1914, and also to the revocation of charter of local union No. 26, St. Louis, Mo., which had taken place recently. The president informed the delegates that the executive officers had placed the question of the five-day week before the Union-Made Garment Manufacturers' Association and stated "that at a favourable opportunity would urge that organization to grant this change." In conclusion president Rickert stated "that since the last convention the international union has suffered no setbacks or losses of any kind. It has made continued progress in securing many changes beneficial to the general membership. It has accepted no general reduction in wages anywhere, and secured increases in many markets. It has successfully established and put into operation the forty-four hour work week, the death benefit fund and with it many changes that have made for a stabilized membership and a stronger international union. It has initiated and carried out with much success a campaign of publicity and advertising in favour of union-labelled products and against prison-made and non-union made products. It has resisted all attempts of the secession movement to make inroads upon our membership, carefully safe-guarded and managed the finances and affairs of the organization, and your officers feel that they have the right to believe from the lack of complaints and the cordial spirit of co-operation that seems to exist throughout the international union, that they come to this convention believing that the management and conduct of the affairs of the international union has met with the approval of the rank and file."

According to the report of A. B. Larger, general secretary, there were, as at June 30, 1927, total assets of the union amounting to $519,950.34, an increase in total assets since the last convention of $278,238.51.

Among the resolutions adopted were: (1) Instructing the general executive board to take up with the Overall Manufacturers of Winnipeg the question of working conditions so that wages will not be reduced by the practice of forcing old operators to share work, in slack times, with new help taken on for rush work; (2) Instructing the general secretary to address a fitting communication of thanks and appreciation to Hon. Peter Heenan, Minister of Labour, Hon. G. D. Robertson, Hon. J. D. Taylor and all others who assisted in securing amendments to the Canada Trade Mark and Designs Act; (3) Asking that a better way be planned and devised to create a demand for union label goods; (4) Recommending that the union label of the United Garment Workers of America be made of such material and printing that it will not fade out. Other resolutions presented to the convention referred to the general executive board for attention.

The officers elected were: President, Thomas A Rickert, Chicago, Ill.; Secretary, B. A. Larger, New York, N.Y.; Treasurer, Henry Waxman, New York, N.Y., W. F. Bush, Greenwood, Ontario, was re-elected member of the general executive board.

Kansas City, Mo., was chosen the city for the next meeting.

Cigar Makers' International Union

Approximately 170 delegates, representing 336 local unions attended the 26th convention of the Cigar Makers' International Union, which was held in Chicago, Ill., August 8-19, 1927, President I. M. Ornburn presiding.

The president in his address suggested that there should be amendments made to the constitution and changes in the strike laws, and that the initiative and referendum system be replaced by one more workable and

up-to-date in its application. The attention of the delegates was drawn to the passing of the individually-owned small and medium-sized shop in practically all industries, but particularly in the cigar and tobacco trade, which has been supplanted by stock-owned corporations, operating under different and modern means of production, such as mass production and mass distribution. The Cigar Makers' International Union, in the opinion of president Ornburn, must adopt methods that will co-ordinate with and be workable under these changes.

A great number of amendments, as well as many new provisions in the constitution were recommended by the Committee on Constitution, the majority of which were adopted by the convention. Some of the most important changes made were: (1) Providing for the payment of $350 death benefit for all members who have complied with the laws and requirements; (2) Elimination of sick benefits; (3) Providing for one year agreements and the signing of contracts; (4) The payment of monthly dues of $2; (5) Centralization of funds; (6) The holding of quadrennial conventions; (7) Election of officers to take place on the last day of convention. (The nominations and election shall take place under this law in 1931 and every four years thereafter.)

Before the close of the convention the president announced that those portions of the proposed revised constitution such as sick benefits, death benefits and dues when submitted to a referendum vote would be combined in one proposition.

Among the resolutions adopted were the following: (1) Asking for the establishment of a Department of Labour for the Island of Porto Rico; (2) Endorsing the movement for the establishment of the five-day work week; (3) Instructing delegates to convention of Label Trades Department to prepare and submit a plan to that body whereby a general trade-mark in the form of a distinct emblem or distinguishing mark of the A. F. of L. may be adopted; (4) Recommending that a representative be present at the convention of the Mexican Federation of Labour and that that body be asked to organize the cigar makers all along the Mexican border; (5) Asking that the laws of the American Federation be amended so as to require all labour unions affiliated with the federation to affiliate with city central bodies; (6) Instructing the president to visit the Island of Porto Rico some time during the year 1928; (7) Endorsing the day work plan and the establishing of a minimum wage scale for all machine work; (8) Recommending the moving of the headquarters of the Cigar Makers' International Union from Chicago, Ill., to Washington, D.C.

Hotel and Restaurant Employees' International Alliance and Bartenders' International League of America

President Edward Flore presided over the twenty-fourth general convention of the Hotel and Restaurant Employees' International Alliance and Bartenders' International League of America which was held in Portland, Oregon, August 8-12, 1927. The convention was attended by 180 delegates from 98 local unions, representing a membership of 26,318, or approximately two-thirds of the total membership of the organization.

The president in his report urged the members to make a closer study of conditions of production, capital, profit, dividends, markets, distribution and other factors in the make-up of food and beverage costs and sales, in order to place themselves in a strong position when negotiating wage scales and working conditions. President Flore strongly advocated the principle of arbitration and mediation in all trade disputes. The delegates were informed that the international union had thirteen locals in Canada, with a membership of 1,219.

According to the report of J. L. Sullivan, secretary-treasurer, there were situated in thirty-eight states, the District of Columbia, Canal Zone and the Dominion of Canada, two hundred and seventy local unions with a total membership of 39,880, an increase of 1,453 over that reported at the last convention in 1925. The total receipts for the two years, including the cash balance as at April 30, 1925, amounted to $507,977, while the expenditure, together with investments, amounted to $308,481.70, leaving a cash balance of $199,495.30. The report also showed that the international union stood eighteenth in the voting strength at the last convention of the American Federation of Labour.

Some of the amendments to the constitution were: (1) Death benefits will be paid where the deceased has been in continuous good standing at least six months immediately preceding death; (2) That all organizers of the international union be under the direction of the president; (3) Increased the salary

of the president from $400 to $500 per month and the secretary-treasurer from $450 to $500 per month; (4) The agreement blank to be amended so that the employer agrees to employ his help through the office of the local.

Among the resolutions adopted were: (1) Recommending that organizing campaigns be carried out on the basis of organizing the entire establishment at the same time; (2) Authorizing the appointment of a commissioner to interview the directors of the Canadian National Railways and Canadian Pacific Railway Company for the purpose of securing recognition of our organization in Canada; (3) Appointing the president or one other member of the General Executive Board to represent the international union at the convention of the Trades and Labour Congress of Canada; (4) Recommending the appointment of a permanent Canadian Organizer whose full time will be devoted to organizing work in Canada; (5) Authorizing the setting aside of $5,000 for organization work in Los Angeles and that an international organizer be stationed in that city for a period of one year; (6) Instructing the delegates of the international union to the convention of the American Federation of Labour to endeavour to record that body as favouring the withdrawal of American soldiers from Chinese territory.

Among the officers elected were: President, Edward Flore, Buffalo, N.Y.; Secretary-treasurer, Jere L. Sullivan, Cincinnati, Ohio.

Kansas City, Mo., was chosen as the next convention city.

Amalgamated Civil Servants of Canada

The fourth biennial convention of the Amalgamated Civil Servants of Canada was held at Winnipeg on September 1-3, was attended by approximately fifty officers and delegates, amongst whom were representatives from the three new branches located respectively at Halifax, N. S., Toronto, and Hamilton, Ont. President F. Knowles, in his address, called attention to the efforts that has been made at co-operation with other civil servants' organizations. These efforts had one object in view, namely one united organization for all civil servants. The president was of the opinion that the uniting of civil servants of Eastern Canada into one organization could not be effected through existing organizations but only by establishing local councils of the A.C.S. of C. in the east,. He referred to the request of the Winnipeg local council for the appointment of a Royal Commission for the purpose of investigating the operation of the Winnipeg Post Office as it affects the working conditions of the employees. President Knowles suggested that a serious effort be made by all delegates to conventions of the A.C.S. of C. to obtain leave of absence with pay and thus materially reduce the cost of conventions.

The report of secretary-treasurer Gardner showed that the membership of the organization was steadily increasing having 700 in 1923, 1,400 in 1925 and 2,700 in 1927. Total receipts together with balance from last audit amounted to $10,158.05 while the expenditure totalled $6,488.38, leaving a balance in the bank of $3,669.71.

A letter was received from the All-Canadian Congress of Labour suggesting that the Amalgamated Civil Servants' organization should affiliate with that body. This suggestion was not concurred in by the convention.

Among the resolutions adopted were: (1) Asking for a minimum salary of $100 per month for full time adult labour, with an increase in the maximum of $300 per annum over the salary adjustment of 1924; (2) Reducing representation at conventions to one delegate for 150 members or less, 2 delegates for 151 to 300 members, 3 delegates for 301 to 500 members, and 4 delegates for over 500 members; (3) Asking the Government to add a clause to the Superannuation Act granting a gratuity of one year's pension to widows on re-marrying; (4) Requesting the Board of Railway Commissioners to consider the granting of half-fare vouchers on the Canadian National Railways to all full time Dominion Government employees; (5) Requesting the Government to class the staffs of the Department of Soldiers' Civil Re-establishment, Soldiers' Settlement Board, and Dominion Income Tax Branch as permanent civil servants effective from the date that their services commenced; (6) Recommending that all branches of the Public Works Department be granted the same privileges as to hours of labour, statutory holidays, and statutory increases in salaries; (7) Requesting that all overtime performed by any class of civil servant be paid at the rate of double time on Sundays and legal holidays and time and one-half on other days; (8) Recommending that the payment of civil servants' salaries be made semi-monthly; (9) Asking the Government to give effect to the 44-hour week throughout the service; (10) Recommending that entrance into the civil service be ac-

quired through competitive examinations; (11) Urging that all vacancies in upper grades be filled from the ranks of employees already in the service who may be occupying lower grade positions but who are eligible and competent to fill same.

The officers elected were: President, F. Knowles, Vancouver, B.C.; Secretary-treasurer, Charles Gardner, Regina, Sask.; Vice-presidents: Harold Baker, E. E. O'Connell, E. Eggleston, P. C. Shaw, J. E. Hanson and S. A. Prudhomme.

Trade Unions in Sweden

The International Federation of Trade Unions has issued Bulletin No. 6 of the International Trade Union Library, on the Trade Union Movement in Sweden, by Sigfrid Hansson. In this booklet of 56 pages, the author gives a graphic description of the very close co-operation between the political and industrial sides of the Swedish labour movement, its educational activities, the organization of the intellectual workers and civil servants, etc. The chapter dealing with the form of organization indicates the importance which the question of organization by industry has attained in Sweden, and that in spite of exhaustive discussions and decisions taken at previous Congresses, it has as yet been impossible to arrive at a solution satisfactory to all parties. Sweden is one of the few continental countries where the trade union movement has remained immune from the effects of dissension generally occasioned through diversity of race and language or through political and religious views. At the end of October, 1926, the membership of the unions affiliated with the National Centre numbered over 400,000, while that of the organizations outside of the National Centre amounted to about 100,000.

Copies of the booklet may be obtained from the Publication Department of the Trades and Labour Congress of Canada, Ottawa, price 20 cents.

Death of R. S. Ward

Mr. R. S. Ward, of Winnipeg, Man., died in his compartment on the Canadian National Railways train while proceeding from Moncton to St. John, N.B., where he was attending the annual sessions of the Associated Workmen's Compensation Boards of Canada, which had concluded its business a few days previously. The deceased was chairman of the provincial bank and a member of the Manitoba Workmen's Compensation Board since its inception. He went to Winnipeg from Moncton in 1904, having secured a position as a machinist in the shops of the Canadian Northern Railways in Fort Rouge. As an active union man in Winnipeg branch No. 189 of the International Association of Machinists, he became its secretary, then president, and later secretary of district lodge No. 2 of the Machinists with offices in Winnipeg. In 1910 he was elected to the presidency of the Winnipeg Trades and Labour Council. The funeral service was held in the Winnipeg Labour Temple, and interment made in Elmwood cemetery.

THE TRADES UNION CONGRESS OF GREAT BRITAIN

THE fifty-ninth annual Trades Union Congress* was held at Edinburgh on the 5th September and the five following days. The President was Mr. G. Hicks, Chairman of the General Council.

The number of delegates appointed to attend the Congress, as shown in the Statistical Statement compiled by the General Council, was 646; the number of organizations affiliated to the Congress (including those organizations, with a membership of about 98,000, which did not appoint delegates) was 170, with a membership of approximately 4,164,000, comprising the following groups: Agriculture, 30,000; Mining and Quarrying, 830,355; Metals, Machines, Conveyances, etc., 549,329; Textile, 423,251; Clothing, 162,288; Woodworking and Furnishing, 56,408; Paper, Printing, etc., 95,277; Building, Public Works Contracting, etc., 299,564; Food, Pottery, and other manufacturing industries, 47,202; Railway Service, 433,803; Other Transport, 397,142; Commerce and Finance, 164,652; Government, 167,916; Entertainments and Miscellaneous, 34,189; General Labour, 472,618.

The Chairman, in his opening address, reviewed the progress of the trade union movement for the past year. Amongst other matters he touched upon the desirability of much fuller use being made of the machinery for joint consultation and negotiation between employers and employed.

Considerable space in the General Council's Report was devoted to the Trade Disputes and Trade Unions Act (Labour Gazette,

* This account of proceedings is taken from the Ministry of Labour Gazette, September, 1927.

September, 1927, page 944); and on this question the General Council submitted one resolution, while other resolutions, and an amendment to the General Council's resolution, were submitted by various trade unions. The first and the last two paragraphs of the General Council's resolution (which was passed unanimously, the amendment having been withdrawn) were as follows:—

"This Congress emphatically protests against the action of the Government in its attack upon the Labour Movement by forcing the Trade Disputes and Trade Unions Bill through the House of Commons without any attempt at impartial preliminary inquiry or mandate from the people.

* * * *

"This Congress hereby affirms its determination to maintain in their entirety the rights and liberties which the past efforts of the organised workers have secured, including the full right of combination by all workers, and the application of the strike, to be used as and when and in what manner may be found necessary, either to secure improvements in their working conditions, to establish a rightful status of labour in the economic life of the country, or to resist any attempts to depress the workers' economic conditions.

"This Congress pledges itself to work steadfastly for the repeal of this iniquitous measure, and calls upon the working class of Great Britain to exercise its fullest political power to remove from office the present Government, which, dominated by organised capital and hereditary class privilege and prejudice, has so unscrupulously used its position to injure the industrial and political organization of the workers."

Six resolutions had been submitted on the question of trade union organization; but the debate took place on a report from the General Council, which had had the matter under consideration for some three years on a reference instructing them to examine the problem of organization by industry. This report showed that careful consideration had been given to the matter, and concluded by stating that "it is impossible to define any fixed boundaries of industry." The advocates of this form of organization sought to have this point referred back, but were defeated on a membership ("card") vote by 2,062,000 to 1,809,000.

A resolution on unemployment was carried, in the following terms:—

"That this Congress views with grave concern the continued failure of the Government to deal with the problem of unemployment; it reiterates its firm conviction that the problem can be satisfactorily dealt with only by drastic economic changes on the lines laid down by the Labour Movement; pending a satisfactory solution of the problem it demands full recognition of the principle of work or maintenance.

"This Congress further protests against the exclusion of home and out-workers from the benefits of the Unemployment Acts, and instructs the incoming General Council to support legislation that will enable such workers to participate in the benefits of these Acts on an equality with workers employed on the premises of the employer."

The question of the British trade union movement's relation to the Russian movement was very fully discussed. The question arose on the consideration of a supplementary statement which was submitted by the General Council during the sittings of the Congress. The statement dealt at some length with the proceedings of the Anglo-Russian Joint Advisory Council. It reviewed the great difficulties under which consultations had been conducted, because of the apparent inability on the part of the Russian representatives on this Council to give any heed to the democratic basis upon which British trade unionism was built; also to the abuse which followed any difference of opinion expressed by the British representatives. Under the circumstances, the General Council "advised the Congress that no useful purpose will be served by continuing negotiations with the All Russian Council of Trade Unions so long as their attitude and policy are maintained." The reference back of this statement was defeated by 2,551,000 votes to 620,000. The statement was then endorsed.

Another resolution, deploring the breaking off of diplomatic relations and the termination of the trade agreement with Russia, was passed unanimously.

An official reply to the Prime Minister's appeal for fuller co-operation between employers and workers was submitted by the General Council and carried, after a discussion in which the proposer and seconder spoke of the possibility of those engaged in the various industries meeting together for the discussion of their own problems. Its terms were:—

"This Congress, having noted the repeated appeals of the Prime Minister to the leaders of Labour on the subject of collaboration for industrial peace, points out that no section of the community is more desirous of industrial peace than the workers. It is compelled, however, to inform Mr. Baldwin that the greatest hindrance to a response to these appeals is the legislative and industrial policy pursued by him and his Government, and especially their attacks on the wage standards and liberties of the workers, their action in lengthening the miners' hours, and the deliberate class bias displayed in the Trade Disputes and Trade Unions Act.

"The immediate repeal of such repressive legislation would be the best evidence of the sincerity and honesty of Mr. Baldwin and his

Government. Failing this, Congress declares that the country should be given an immediate opportunity of pronouncing a verdict upon the present Government's policy."

On the question of the Blanesburgh Report (Labour Gazette, March, 1927, page 284), a strongly worded resolution was passed protesting against the action of the Labour representatives on the Blanesburgh Committee (the Committee on Unemployment Insurance) in signing the Report. One of the members of the committee defended her action, but the resolution was carried by 1,836,000 votes to 1,419,000.

A resolution condemning the Government for their continued refusal to ratify the Washington Hours Convention was carried unanimously.

The Chairman submitted a recommendation, which was adopted, to the effect that, in view of the situation that had arisen out of the Paris Conference of the International Federation of Trade Unions, the General Council should be given power to review the whole question of the international relationships of Congress and to take such action as the Council might deem necessary. Another resolution, pledging the Congress to assist in the setting up of one United Trade Union International, and protesting against the attitude of the International Federation of Trade Unions, was rejected by 2,211,000 votes to 1,068,000.

A resolution was passed unanimously calling on the General Council to approach the Government with a view to obtaining alterations and amendments to the Factories Bill, to secure, among other objects, a maximum working week of 48 hours. Resolutions were also adopted refusing to allow the affiliation of "break-away" trade unions.

The National Union of Boot and Shoe Operatives submitted a resolution requesting the General Council, in conjunction with the Labour Party, to conduct an inquiry into all aspects of the importation of commodities manufactured in other countries under conditions that are below those obtaining in this country. The resolution was carried unanimously. Other resolutions were carried on the question of the effect of tariff restrictions on trade, etc., and on trusts and cartels.

A debate arose on a motion which sought to instruct the General Council to further a policy having for its object the creation of a European public opinion in favour of Europe becoming an economic entity. On a card vote this was agreed to by 2,258,000 to 1,464,000 votes.

An attempt to suspend Standing Orders so that the action of certain unions in giving financial support to the miners' non-political union might be discussed was, on the initiative of the General Council, defeated on a show of hands by 291 votes to 63. The question was left to the General Council.

Other resolutions dealt with the observance of the Fair Wage Clause in contracts for public bodies; the establishment of municipal banks; the proposed abolition of the Ministry of Transport; the undermanning of trailers attached to mechanically propelled vehicles; the admission of trades councils to Congress; employment of blind persons; proposed deputation to India to report on labour conditions; codification of factory legislation; extension of Workmen's Compensation Act; health research; repeal of Coal Mines act, 1926; improvement of young workers' conditions; shop hours; abolition of night baking; continuance of the Rent Act; encouragement of building of houses "to let"; and the amendment of the Theatrical Employers' Registration Act.

The election of the General Council resulted in the return of all the old members, with the exception of Mr. Robert Smillie, M.P., representing the mining and quarrying group, who retired and was replaced by Mr. A. J. Cook.

During the week, the annual Conference of Trade Union Women was held, when resolutions dealing with factory legislation were adopted, condemning the Factories (No. 2) Bill, and urging the adoption of a maximum of 48 hours per week, the prohibition of overtime (subject to certain conditions), the abolition of the two shift system for women and children, and the provision of proper welfare arrangements. Another resolution called attention to the necessity for improved organization of women.

The Board of Adjustment which administers the Male Minimum Wage Act of British Columbia has undertaken an inquiry into conditions of employment in hotels, restaurants and rooming houses, with a view to extending the provisions of the act to cover these occupations. Mr. J. D. McNiven, deputy minister of Labour, and chairman of the Board, announced recently that the Board would be reconstituted so as to comprise members familiar with this branch of industry. The existing orders relate to all branches of the lumbering industry (Labour Gazette, October, 1926, page 948, etc.).

"THE TRADE UNION MOVEMENT IN SOVIET RUSSIA"

THE International Labour Office at Geneva has recently issued a book of 287 pages entitled "The Trade Union Movement In Soviet Rusisa." It is stated in the preface that for the purposes of the Tenth Session of the International Labour Conference, which met in May and June 1927, the International Labour Office prepared a comparative study of the situation in various countries as regards freedom of association, this question being one of the items on the Agenda of the Conference. During the course of this work, it became evident that, so far as Russia was concerned, it was impossible to treat the subject on the general plan adopted for other countries, and "that a simple comparison, restricted by the limits of this plan, between the legal status of workers' associations in U.S.S.R. and that of the trade unions in other countries might result in misleading readers not fully cognisant with the fundamental principles of Soviet trade unionism." Furthermore, it was pointed out that in Russia the very conception of trade unionism and all that is entailed thereby depends so directly upon the doctrines of the Soviet regime that no direct comparison with other countries is possible. Hence the presentation of this study in separate form.

The first part of the volume is devoted to an account of the trade union theories professed by the Russian Communist Party, and the application of such theories during the strictly "communist period" from 1917 to 1921. The second and third parts deal with the organization and activities of the trade unions after the introduction of the New Economic Policy. This study is based on a wide range of sources, chief among them being documents received by an exchange arrangement from the All-Russian Central Trade Union Council.

In a conclusion summarizing the development of the Russian trade union movement both prior to and since the revolution of 1917, several interesting observations are made on the various phases and transitions of such development. In the few years prior to the war, such trade unions as did exist led a harassed existence, and when the world war broke out their activities were brought to an immediate end by the declaration of martial law. However, with the development of wartime industry, a field of activity was open up for the workers' movement, particularly after the formation of Industrial Committees of National Defence, for which the workers were authorized to choose their own representative. In each of these committees a workers' group was constituted to protect the interests of the wage earners. These groups seized the opportunity of getting the workers together and encouraging among them habits of trade union organization. Consequently, while trade unionism did not function as such, yet actually the working classes of Russia found themselves on the eve of the revolution in February, 1917, if not completely organized, at least prepared to enter into an organized movement. Immediately after the overthrow of the Czarist regime, the working class movement was thus able to develop rapidly. The Provisional Government which came into power at the revolution in February 1917, supported the movement by authorizing trade unions to register with the local courts, and by granting the workers full freedom of association and combination, with the result that by July, 1917, the number of trade unionists was estimated to be 1,500,000, comprised in about 1,000 organizations. The author then points out that while the February revolution encouraged the development of trade unions, the Communist revolution of October, although resulting in a further extension of the movement, imposed such changes of policy that the whole nature of the movement was changed. From October onwards the duty of the trade unions was "to group the proletariat in a single organization which, under the direction of the Communist Party, would apply the dictatorship of the working classes." Accordingly, the Communist Party "took immediate steps to gain control of most of the unions then existing, but this was not accomplished without a certain amount of resistance. In many cases force had to be used, especially against those workers whose occupations were of an intellectual character, such as civil servants, bank clerks, etc." Then "to facilitate the creation of a single arganization the formula 'one undertaking—one union' was advanced, and all administrative and financial activities strictly centralized." The workers were enrolled automatically by the factory committees, and, after a certain lapse of time, their contributions were automatically deducted from their wages.

Detailing the development of this policy, the author states that while it resulted in a vast increase in membership, the moral results were "the estrangement of the members from their unions and a total distortion of the minds of the leaders." He states the condition of the Russian worker and the trade union movement at that time as follows:

The worker, forcibly enrolled in a union and having no influence on his union's policy, came to regard the trade union organization as a newly-created and badly-managed administration which afforded him no protection against industrial risks and fatigue, which moreover, had increased owing to the disastrous economic situation of the whole country; an administration which not only did not obtain for him the barest necessities of daily life but even opposed any increase in wages; an institution of a military character which at any moment could despatch him to the front or to a far distant factory; an administration which, after having promised all sorts of educational facilities had, in fact, permitted the destruction of the greater part of the educational institutions previously existing or created by the workers themselves in the early days of the revolution.

The trade union movement had become undoubtedly very widespread and important, but to maintain this position it was necessary, according to Seniuschkin, "to apply persuasion and even force to the more backward elements of the working classes."

Conditions forced a modification of policy, and "the realization of hard facts led to the evolution of a definite program" which ushered in the New Economic Policy (N.E.P.). The writer tells of the first effects of the N.E.P. on the trade union movement as follows:

The outstanding features of this new phase of the proletarian dictatorship were the return to capitalist methods of production and a consequent clash between the interests of the workers and the requirements of commercially managed industry.

It was necessary to convince the workers that the real object of unions was to protect their interests.

The first step in this direction was obviously to grant the workers full freedom to form their unions themselves, and thus it came about that the principle of trade union freedom was re-established, though only after a whole year's hesitation. At the same time the Communist conception of trade union freedom only went so far as to admit the workers' right to join or remain outside the existing unions. The unions themselves were not free agents and had to follow the general policy of the trade union movement taken as a whole.

The second step was to get the unions to curtail their zeal in regard to the protection of the workers' interests. This compelled them to renounce their exclusive competence as regards questions of wages, and in general to separate their activity from that of economic departments and the managements of the undertakings. To all intents and purposes this change of policy meant that the action of the unions was confined to being a party to collective agreements.

To put it briefly, liberty of the individual and action by means of collective agreements may be said to be the lines along which the trade union movement developed from 1922 onwards.

The return to freedom of affiliation led at once to a reduction of almost 50 per cent in trade union membership, but from 1923 the situation changed and by 1926 the unions had a total membership of over 9 millions. Freedom of affiliation was gradually completed by a return to the system of voluntary payment of contributions, and this necessitated the complete re-organization of the whole administrative and financial machinery of the unions. Three years were necessary to re-introduce order in this domain, special difficulties being encountered in accustoming the unions to depend only on the members' contributions.

The first friction occurred over the matter of wage questions: "It is certain that during the first months following the reforms of 1922, the trade union leaders successfully endeavoured to extract a number of promises from the Government authorities; but it is as certain, when it came to realizing these promises, that the position changed. This change was most noticeable as regards wage questions. Although trade union leaders had succeeded in getting included in collective agreements special clauses relating to the payment of wages at fixed dates and had made efforts to guarantee wages against the depreciation of the currency, the economic organizations none the less continued to delay payments in order to reduce the real value of wages."

The workers temporarily abandoned their claims for wage increases, and even accepted a certain decrease in order to facilitate financial reform but not for long. Soon, especially in 1925, a certain effervescence was to be observed among the working classes which after the great efforts they had made, failed to find any improvement in their situation and believed themselves deceived by their leaders. This agitation gave rise to great uneasiness in trade union circles, which uneasiness became evident for the first time in a speech made by Andreev, one of the most influential persons in the trade union movement, to a plenary sitting of the Central Committee of the Railwaymen's Union held in March, 1925. This speech sounded a real note of warning, Andreev declaring bluntly that the moral position of the trade union movement was distinctly bad, that the workers were tired of paying contributions without receiving in return the right to express themselves on questions which closely concerned their welfare, that the unions would soon be permeated by discontent and that it was time to set their house in order, to call to order the trade union leaders who had again fallen into the habits of the Communist period, and, to put it briefly, to introduce the new trade union policy which had been promised in 1922.

The operation of the principle of "one undertaking—one union," also proved difficult in practice. How this problem developed is described as follows:

The strict application of this principle has resulted in the grouping of most diverse classes

of workers who belong to trades having no connection one with the other. Some unions are organized according to the character of production, others according to the aims of production, others according to the raw materials used, and still others according to the finished products manufactured. The chemical workers' union includes, besides chemical workers, all those engaged in the india-rubber industry, petroleum refineries, pottery and glass works, etc. The food and drink workers' union includes, in addition to those working in foodstuffs properly so-called, all persons engaged in tobacco factories, distilleries, the Astrakan fisheries, etc. The inclusion of such a diversity of trades in each union obviously makes the satisfaction of the economic and general requirements of the whole union a very difficult problem, and this is further accentuated by the fact that the members of the union are spread over vast territorial areas.

While not repudiating the principle of the "single union," the leaders of the All-Russian Central Council of Trade Unions asked the Seventh Trade Union Congress to encourage the organization of trade sections, which hitherto have always been considered as an evidence of individualistic tendencies and only suitable for the technical trades.

The proposals made by the A.C.C.T.U. at the Congress met with some opposition from certain trade unionists, who feared that they would result in a complete transformation of the present system of organization. The leaders of the A.C.C.T.U. have endeavoured to dispel these fears, but the role and character of the proposed sections have not yet finally been determined. Tomsky admitted that although the formation of sections was likely to promote closer relations between the unions and the masses, it nevertheless tended to break up the unity of the organization. At the same time, after considering the pros and cons, he decided in favour of the organization of sections.

On the problem of private undertaking the report states that latterly the trade unions have found themselves faced by a rather delicate question, namely, that of defining their attitude in private undertakings and in concessions. In undertakings of this class the number of workers affiliated to trade unions has in recent years shown a tendency to increase, being 198,915 in April 1925 and 207,189 on April 1, 1926. In conceded undertakings only 12 per cent of the foreign workers are trade unionists, and this percentage is considered unsatisfactory in trade union circles. In general the mass of the workers in the undertakings is still "impotent, ignorant, and oppressed." The workers are afraid to expose their conditions of labour to the representatives of the union and avoid giving any information as regards the amount of wages earned, the length of the working day, contraventions of collective agreements, etc.

The employer, moreover, has managed to get the workers into his power by instilling into them his own ideas and by advancing them wages and loans. The worker, perpetually in debt, is entirely dependent on his employer, whom he considers as a sort of benefactor who helps him when necessary and whom he supports against the unions. Again, owners of private undertakings make every endeavour to satisfy their workers by loyally carrying out their obligations and according them certain privileges.

Faced with the advent of foreign capital into the Soviet State, the All-Russian Central Council of Trade Unions issued in December, 1926, certain instructions in a circular letter to the factory committees. These committees were authorized "in view of the inadequacy of trade union action in privately owned undertakings, to cease all attempts to collaborate with the managements." At the same time the circular went on to say that it was in the interests of the workers and the Soviet State to attract foreign capital into the Soviet Union, as far as this was compatible with the general policy of the State, and "for this reason the trade unions ought not to make claims which might lead to the closing of private undertakings."

Another problem was the absorption of a large number of non-industrial workers. Economic conditions in the provinces were forcing country workers to seek employment in the towns, and one Communist writer, Senuishkin, was reported to have declared that "the workers coming from the country are entirely devoid of all class consciousness."

Stating the actual position of the trade union movement in Russia at the present time, the author of the volume declares that the improvement in the economic situation in the country has resulted in a considerable increase in number of wage earners, the total now being nearly ten million. In July, 1926, the number of persons affiliated to the trade unions, including 1,200,000 unemployed, was 9,278,000, these being grouped in 23 national unions, several of which have over a million members.

Summing up the condition of the trade union movement, the author of the study states as follows:

> It is in a matter of internal organization that must be seen the characteristic which separates the Russian trade union movement from similar movements in other countries. The term trade unionism, with the idea of individual freedom and consent which it suggests, serves very inadequately to describe the grouping of the workers as understood by the leaders of the Russian trade union movement.
>
> Every wage earner, says the Soviet legislation, is entitled to be represented by a trade union organ, and the State intervention in the movement stops here. At the same time, workers who desire to unite to form a union are not free to do so outside the structure of the existing movement, that is to say the Com-

munist movement. If a union, on formation, does not meet with the approval of the higher authorities, it is refused the title of trade union and all the privileges attached to such organizations. In practice the policy of exclusiveness is even more complete than is suggested, for not only is the worker not free to choose the union he joins—this being decided for him by the undertaking by which he is employed—but he has no option but to join it.

Having made this fundamental point, the State grants the unions far greater prerogatives than those received by trade unions in other countries. In social affair, without actually possessing legislative powers, the unions play a predominant part, while in economic matters, although they no longer hold the guiding reins, they must be, and insist on being consulted. In exchange for these privileges, the State, or the party in power, counts on them to govern the working masses and to lead them to work in harmony with society as a whole.

The author quotes Tomsky's statement at the Seventh Trade Union Congress, who in defining this point said: "We do not conceal from anyone that the trade union movement has been, is, and will be, directed by the Communist Party in the most centralized fashion."

The volume concludes with the following statement:

"To sum up, although the idea of trade union freedom was practically abolished during the Communist period, it has shown a distinct tendency to revive during the last few years. We use the word 'idea' because, in the first place, trade union liberty depends entirely on the leaders, who are to all intents and purposes, chosen by the Communist Party, and secondly, because, as a result of labour being abundant and the workers virtually obliged to join the unions in order to obtain the privileges of membership, individual liberty, and hence trade union liberty, is still greatly restricted."

Consumers' Co-operation in Soviet Russia

A pamphlet entitled "Consumers' Co-operation in the Union of Socialist Soviet Republics," published by the Co-operative Printing Society of Great Britain, was reviewed in a recent issue of the *Co-operative News* (Manchester). The writer, N. I. Popoff, states that in four years Russian co-operative trade has increasd fourfold, and now amounts to 44 per cent of the total trade of the country, the state doing 34 per cent and private trade 22 per cent. The first consumers' societies began in the early 'sixties of last century, but from then even until after the revolution of March, 1917, they were mostly in the hands of the bourgeois rather than the peasant class. After the suppression of the revolution of 1905 efforts were made to place the co-operative movement on a more popular basis. During the revolution of 1917 the movement held somewhat aloof. However, under the stress of civil war the Soviet Government adopted the policy of utilizing the co-operative societies to the utmost for the organization of the distribution of food, and by the decree of March 20, 1919, recognized them as the principal organs of distribution in the country. With the adoption of the new economic policy the state permitted a decree of private enterprise, but holds the key positions of industry and the credit system.

The Soviet Co-operative movement is a non-party movement. The overwhelming majority of its members are workers and peasants who belong to no political party. As a result of its previous evolution the whole system of consumers' co-operation was by 1927 made up of the following links:—

(*a*) A network of rural consumers' co-operative societies, numbering 26,697, and having between them 44,052 co-operative stores.

(*b*) A network of town and industrial workers' co-operative societies, numbering 1,556, and having altogether 14,712 co-operative stores.

(*c*) A network of railway workers' co-operative societies, numbering 38, and having in all 1,958 co-operative stores.

These in turn are linked up with district unions, regional unions, five central unions, and then the all-embracing Centrosoyus.

There were 6,552 accidents reported to the Ontario Compensation Board in September including 31 fatalities, and benefits awarded by the Board amounted to $461,983.59. These figures show a decrease from August, when 7,010 accidents, including 53 fatalities, were reported, but in September, 1927, there were more accidents reported than in the same month of 1926, the increase being 372. Up to the end of September, the Workmen's Compensation Board awarded in 1927 a total of $4,526,629.52, an average of about $500,000 for each month. The total number of accidents reported in the first nine months of the year was 53,463, including 305 fatalities. These figures include many traffic accidents, some of them fatalities and others of lesser severity. The accidents on the highway included salesmen, drivers for bakeries and dairies and truck drivers. It is hoped that the present campaign against highway accidents will have a material effect on accidents of this type.

LEAGUE OF NATIONS INTERNATIONAL LABOUR ORGANIZATION

Minimum Wage Fixing Machinery

AT its Thirtieth Session held in January, 1926, the Governing Body of the International Labour Office decided to place the following question on the Agenda of the Tenth Session of the International Labour Conference:—

Minimum wage fixing machinery in trades in which organization of employers and workers is defective and where wages are exceptionally low, with special reference to the home working trades.

Under the new double-discussion procedure which was to come into operation for the first time at the Tenth Session of the Conference this question had only to be dealt with at that Session by way of a first discussion. The double-discussion procedure is regulated by the provisions of paragraphs 4 to 8 of Article 6 of the Standing Orders of the Conference. In accordance with these provisions the Office submitted to the Conference a preliminary report setting out the law and practice in the different countries on the subject covered and this report contained a draft questionnaire. To consider the question, the Conference appointed a Committee of 42 members, which held 12 sittings. The Committee took as the basis of its discussion the draft questionnaire prepared by the Office, and as a result of its work it submitted to the Conference in its report a draft questionnaire which differed somewhat from the scheme of the Office's draft. After some discussion the Conference adopted the Committee's draft and then decided to put the question on the agenda of the 1928 Session.

In the contemplation of the Governing Body the question submitted to the Conference referred solely to minimum wage fixing "machinery," and the Governing Body itself made it clear that there was no question of actually fixing a minimum wage and still less, of course, of fixing an international minimum. But, although the question was thus limited to the institution of machinery, that is, systems, for fixing minimum wages, there was still a considerable divergence of opinion in the Governing Body as to the scope of application of such systems. A number of members suggested that the question should be gone into on a comprehensive basis and that the solutions which might be proposed should be applicable to any trade in which wages are exceptionally low and organization of employers and workers is defective. Other members, however, were of opinion that as a beginning the question should be considered with reference to a particular case, namely, home working trades. The wording of the item as finally adopted by the Governing Body was a compromise between these two standpoints: the question was raised in general terms, but there was a special reference to home work.

The Committee of the Conference adopted the Office's draft as a basis of discussion. But on so complicated a question it was difficult to avoid certain differences of opinion as to the meaning and scope of the question being manifested during the discussion. In the result the Committee made certain modifications, some of considerable importance, in the draft proposed by the Office, its object being to leave the Governments the greatest possible latitude not only as regards the application of the rules to be eventually proposed, but also as regards the form which the ultimate decisions of the Conference might take.

The following is the questionnaire as it was adopted by the Conference and submitted to the various Governments:—

1. Do you consider that the Conference should adopt proposals dealing with methods of minimum wage-fixing in home working and other trades or in parts of such trades in which:
   (*a*) No arrangements exist for the effective regulation of wages by collective agreement or otherwise, and
   (*b*) Wages are exceptionally low?

2. Do you consider that a definition of (*a*) home-working trades, and (*b*) other trades, should be included in any proposals which may be adopted by the Conference? What definitions do you propose?

3. Do you consider that it is for the Government of each country to decide, having regard to the conditions of the country, which are the home-working and other trades covered by Question I?

4. What criteria (if any) would you propose to adopt for determining in which trades there are:
   (*a*) No arrangements for the effective regulation of wages.
   (*b*) Exceptionally low wages?

5. Do you consider that some provision should be made for a basis for fixing minimum wages? If so, what basis do you suggest?

6. Do you consider that the Conference should
   (*a*) Lay down the method or methods upon which the minimum wages should be fixed? If so, what method or methods do you propose? Or
   (*b*) Confine itself to laying down general principles? If so, what principles do you suggest?

7. If not, do you consider that it is for the Government of each country to decide, having regard to the administrative practice of the country, the method or methods to be introduced

in fixing minimum wages in the home-working and other trades covered by Question I?

8. Do you consider that any such method should make provision for full preliminary consultation with representatives of the trade concerned, including representatives of organizations of employers and workers (if any), and with any other persons specially qualified by their trade or functions to be usefully consulted?

9. Do you consider that employers and workers should be represented on the wage-fixing body. If so, do you consider that they should be represented in equal numbers?

10. Do you consider that any minimum wage-fixing body should contain an independent person or persons?

11. What methods do you consider should be adopted in selecting and appointing:
(a) The representatives of employers and workers,
(b) The independent person or persons?

12. What systems of inspection, general supervision and enforcement do you propose for ensuring the payment of wages in the trades concerned at not less than the rates fixed?

13. Do you consider that the Governments should communicate to the International Labour Office, either in the annual report furnished in accordance with Article 408 of the Treaty or otherwise in the case of a Recommendation, the list of trades in which the system of fixing minimum wages has been applied, together with the approximate number of workers covered, and a general statement on the minimum rates of wages and other conditions established in the trades concerned?

14. Do you consider that the Conference should proceed by way of a Draft Convention or a Recommendation or both? If the latter, in what respects should either form of decision be adopted?

When the answers of the different Governments have been received to this questionnaire, a report will be issued by the International Labour Office based thereon, and containing the text of a Draft Convention or Recommendation for consideration of the 1928 Session of the Conference.

(The last issue of the Labour Gazette contained a brief outline of a recent publication of the International Labour Office, describing the systems of wage fixing existing in various countries.)

Occupation and Health

Two further brochures of *Occupation and Health*, the encyclopaedia of hygiene, etc., which is in course of publication by the International Labour Office, have recently appeared. The first relates to Nitrous Fumes (Oxides of Nitrogen); Air—Hot and Humid Atmospheres; Air (Liquid); Air—Testing in Workrooms; Agricultural Labourers (Occupational Diseases of); Nitrocellulose; Abattoirs-Slaughterhouses.

The subjects dealt with in the second brochure include: Celluloid; Jewellery Industry; Buttons (Manufacture of); Arsenic (Poisoning by); Pitch; Electric Lamps.

The Evolution of a Wage-Adjustment System

Some generally acceptable system of principles governing the settlement of wage disputes is generally regarded as indispensable to a satisfactory scheme of arbitration and conciliation. The study of wage principles involves, however, many problems of a highly controversial nature concerning which no clear and final solution would as yet seem possible. The International Labour Office contributes to this question by publishing in the *International Labour Review* the results of an independent study by Mr. J. R. Bellerby, a member of its staff. His conclusions are given in the issues of July, August and September, under the title "The Evolution of a Wage-Adjustment System."

At the outset, the author states that the problem of the evolution of a "wage-adjustment system" divides itself into two parts: the first relates to the actual principles, or criteria, for showing the most advantageous wage position; and the other to the problem of machinery. Next he gives attention to the procedure for devising a body of principles for the guidance of wage-fixing authorities—principles which would sufficiently protect the interests of the community as a whole—after which he considers the arbitration and conciliation processes necessary to secure the application of the principles in wage decisions throughout industry. The final article includes a brief review of various systems of machinery in force in Italy, Australia, New Zealand, Germany and Great Britain, a study of which seemed to show that the existing machinery of conciliation was apparently adequate, with but slight additions, to satisfy all the requirements of a wage-adjustment system. The writer states in conclusion:—

"If industrial peace and justice depended solely on machinery, these would already have largely been attained. Clearly, however, no matter how elaborate may be the organization for the settlement of trade disputes, this can give no good result unless its use is guided by a body of principles carefully designed to secure the interests of the community. To set up machinery of adjustment without a basis of principles would be equivalent to the setting up of courts of law without statutes or principles of law to guide the judges. Thus, the evolution of wage prin-

ciples is essentially the first step in any program for securing peace in industry.

"Then, in turn, the principles themselves can be of little purpose unless there is a very general acceptance of and compliance with them. This involves not merely their adoption by official organs of the state, but a general undertaking on the part of independent wage-determining associations that they will have due regard to the accepted principles in all the voluntary decisions which they make.

"It is, in fact, upon the voluntary agreements that the central interest of a wage-adjustment system rests. If a considerable proportion of independent groups are in a position to secure advantage over the rest of the community, and if they pursue their local interests regardless of the effect on others, the remainder, less powerfully entrenched, must inevitably suffer. The injustice done to them cannot be remedied by mere compulsion to bring their case before the courts. Compulsory arbitration in such a case can only repress; and the effect of repression may ultimately be to breed a revolution. Compulsion is, in fact, a dangerous remedy unless it is applied to every wage decision throughout the land. And since this is inconceivable in present times, the only satisfactory alternative is a universal voluntary agreement on the part of trade associations to apply, in every wage decision which they reach, an accepted body of wage-adjustment principles."

Functions of an Employment Department in Industry

The Merchants' Association of New York, in a leaflet lately issued, describes the duties of the "employment department" in a modern industrial establishment.

One of the most important features of an industrial relations policy is the establishment of an employment department and the centralization therein of responsibility for the recruiting, selection, placement, follow-up and discharge of employees.

Under proper organization, the employment department becomes a service bureau where foremen and department heads may come for assistance in handling their personnel; where employees may turn for advice and assistance in matters affecting their work or home conditions: and where prospective employees may learn of the opportunities for work within a company, of its requirements from the standpoint of training and general fitness, and of the policies of the company toward its employees. It should stand for absolute honesty and fair dealing between management and men and for the creation within the group of employees of high morale and good fellowship.

The centralization of employment control brings numerous advantages, as follows:—

1. Employees are selected according to fitness and ability.

2. Knowledge of sources of supply is gained and used in times of need.

3. The time of department heads and foremen is saved by relieving them of the burden of recruiting new employees.

4. Foremen are kept informed of the earnings and progress of their employees

5. Employees look upon the employment department as a place where advice and assistance may be secured.

6. Fair dealing is secured to employees.

7. Through termination interviews, many desirable employees are held in the service of the company.

8. Through constant association with the employment department, department heads and foremen are acquainted with modern employment methods.

The arguments usually advanced against a centralized employment department are:—

1. Department heads and foremen, because of their intimate knowledge of work requirements, are better able to select new employees than an employment manager.

2. Foremen resent the creation of an employment department because it takes away some of the things for which foremanship has always stood.

There is no doubt that foremen and department heads have a comprehensive knowledge of work requirements and should be able to select new employees shrewdly. Actually they are poor interviewers and waste considerable time at the task. A tactful employment manager can win their confidence easily and they are invariably glad to be relieved of the burden of interviewing.

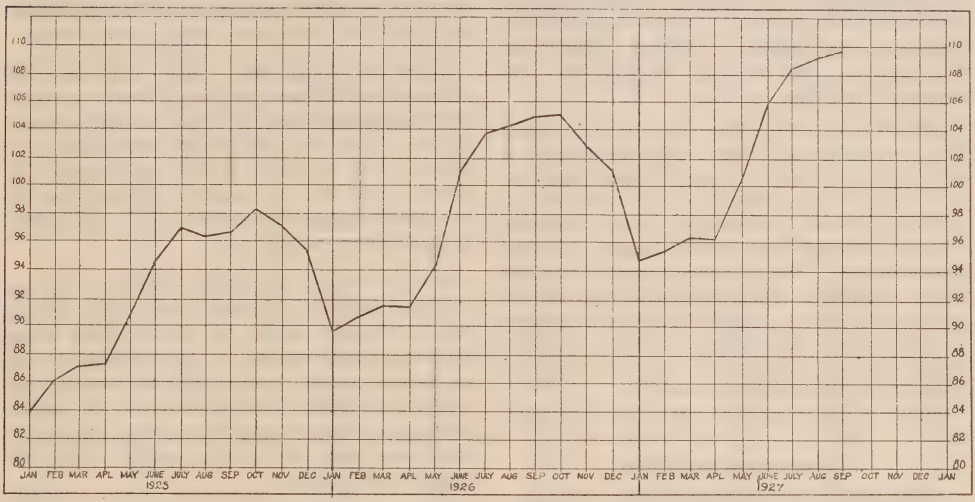
It is also true that the employment department takes away some of the things for which foremanship has always stood. So does the planning department, the purchasing department and the time study department. But the things that are taken away are responsibilities with which foremen never should have been burdened.

EMPLOYMENT SITUATION IN CANADA ON SEPTEMBER 1, 1927, AS REPORTED BY EMPLOYERS MAKING RETURNS TO THE DOMINION BUREAU OF STATISTICS

HERE was continued improvement in the employment situation at the beginning of September, when the 6,079 firms reporting to the Dominion Bureau of Statistics showed a combined working force of 905,756 persons, as compared with 900,621 in the preceding month. This increase was rather larger than that noted on September 1 last year, and greatly exceeded the gain indicated on the same date in 1925. The index number, standing at 109·7; continued to be considerably higher than in any other month since the record was commenced in 1920. On August 1, 1927, it was 109·2 and on September 1, 1926, 1925, 1924, 1923, 1922 and 1921, it stood at 104·9, 96·6, 93·1, 100·0, 93·7 and 88·7, respectively. If employment follows the trend usually indicated during the autumn, further expansion may be expected in the next monthly report.

Logging and transportation showed the most pronounced gains, but there were also important advances in trade, services, building and mining. On the other hand, manufactures recorded a slight falling off.

Employment by Economic Areas



Quebec, Ontario and the Prairie Provinces reported improvement in the situation, while employment in the Maritime Provinces and British Columbia declined moderately.

Maritime Provinces.—As on September 1 of most years of this record, there was a slackening in activity in the Maritime Provinces, chiefly in the mining, transportation and highway construction divisions; on the whole, practically no change was noted in manufacturing. Statistics were received from 532 firms, whose staffs aggregated 74,231 workers, compared with 74,955 in the preceding month. The index of employment was several points higher than on the corresponding date last year.

Quebec.—Further gains were noted in building and highway construction and in services, logging and mining, while manufactures showed no general change. Within the last named, there were gains in leather, rubber, textile and electric current plants, but lumber mills were seasonally quiet and employment in iron and steel works decreased. The working force of the 1,289 co-operating employers stood at 257,823 persons, as against 256,254 on August 1. Contractions were registered at the beginning of September, 1926, when the index was lower.

EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

Note.—The curve is based on the number of employees at work on the first day of the month, as indicated by the firms reporting, in comparison with the number of employees they reported in January, 1920, as 100.

Ontario.—Increases on practically the same scale as on September 1 a year ago were recorded in Ontario, where 2,800 firms enlarged their staffs by 4,191 employees to 369,461 on the date under review. Manufacturing as a whole employed fewer operatives, largely on account of losses in iron and steel and building material plants, while there were gains in the electrical apparatus, electric current, food and several other divisions. Logging camps reported considerable seasonal activity, and construction, services, trade, transportation and mining also showed improvement. The situation was decidedly more favourable than in the early autumn of 1926.

Prairie Provinces.—The trend of employment continued to be upward, the expansion being rather greater than on the same date last year, when the index was much lower. Returns were tabulated from 776 employers of 122,406 workers, as compared with 121,599 at the beginning of August. Manufacturing (especially the iron and steel, food, pulp and paper groups), mining, transportation and highway construction afforded heightened employment, but railway construction was seasonally slacker.

British Columbia.—For the first time since the beginning of this year there was a reduction in employment in British Columbia; this took place chiefly in fish-preserving, saw-milling and non-ferrous metal factories, and in construction, while logging showed improvement. The working force of the 682 firms furnishing data declined from 82,543 persons on August 1 to 81,835 at the beginning of September. Moderate gains were recorded on the corresponding date in 1926, but the index then was slightly lower.

Table I gives numbers by economic areas.

Employment by Cities

Employment in Montreal, Quebec, Toronto, Windsor and Winnipeg advanced; in Ottawa the situation was practically unchanged, while in Hamilton and Vancouver curtailment was registered.

Montreal.—In contrast with the downward movement noted on September 1, 1926, there was an increase in Montreal on the date under review, 1,673 workers being added to the pay lists of the 668 co-operating firms, who employed 118,631. Manufactures, except iron and steel works, showed quite general improvement; construction, transportation and services were also considerably busier. The index was higher than at the beginning of September of any other year on the record, which for this city goes back to 1922.

Quebec.—Continued advances were indicated in Quebec, according to 91 employers of 11,004 persons, as compared with 10,702 in the preceding month. Most of the gain took place in construction and manufacturing. Employment was at its maximum for the last three years.

Toronto.—Manufacturing, services and trade registered heightened activity, bringing the index to the highest point reached in the six years' record for Toronto. Statements were received from 795 firms with 106,496 workers, or 1,887 more than on August 1. Rather smaller increases had been indicated on the corresponding date a year ago.

Ottawa.—The situation in Ottawa showed practically no change, slight increases in manufactures being offset by similar declines in construction. The 128 firms furnishing returns reported 11,648 employees, compared with 11,599 in the preceding month. On September 1, 1926, the tendency was unfavourable and the index was many points lower.

Hamilton.—Iron and steel and building construction released help in Hamilton, while other industries showed little general change; 200 employers recorded 29,588 persons on their payroll, as against 30,699 on August 1. Employment was in smaller volume than at the beginning of September a year ago, when improvement was shown.

Windsor and the Other Border Cities.—Another moderate advance was noted in the Border Cities, where 94 co-operating firms reported 9,682 workers, as against 9,615 in the preceding month. Quarrying and transportation were rather more active. A minor decline had been indicated on the same date last year, but the index number then was considerably higher.

Winnipeg.—Employment in Winnipeg continued to increase, the gains being on a larger scale that at the beginning of September, 1926, when the situation was not so favourable. Manufacturing, communications and trade registered most of the improvement. An aggregate working force of 29,721 persons was reported by the 277 employers whose returns were received, and who had 28,731 employees in the preceding month.

Vancouver.—There was a further falling off in activity in Vancouver, according to statements received from 240 firms employing 25,957 workers, as against 26,429 on August 1. Reductions in personnel in lumber mills accounted for most of the contraction, although

construction was also slacker. Employment was in smaller volume than on the corresponding date a year ago.

Index numbers by cities are given in Table II.

Manufacturing

Iron and steel, lumber, fish-canning, and building material plants showed curtailment, partly seasonal in character, while vegetable food, electrical apparatus, electric current, boot and shoe, textile and some other industries reported greater activity. Statements were received from 3,822 manufacturers employing 486,342 operatives, or 705 fewer than on August 1. Employment on September 1, 1926, had advanced, but the index then was lower than on the date under review.

Animal Products—Edible.—Continued losses were reported in fish-preserving establishments, and dairies were also slacker, but improvement was shown in meat-preserving plants. The payrolls of the 210 co-operating factories aggregated 18,382 employees, as compared with 18,793 in the preceding month. Practically all the decline took place in the Maritime Provinces and British Columbia, the trend in Ontario being favourable. Employment on September 1, 1926, had shown a considerable increase, but the index number then was lower.

Fur and Products.—Complete recovery from the reductions noted in the preceding month was reported in fur factories, 27 of which added 110 workers to their forces, bringing them to 1,226 on the date under review.

Note.—Number employed by the reporting firms in Jan. 1920=100 in every case. The "Relative Weight" shows the proportion of employees in the indicated area to the total number of employees reported in Canada on the date under review.

Relative Weight of Employment by districts and in Manufacturing as at Sept. 1, 1927	100·0	8·2	28·5	40·8	13·5	9·0	53·7

Practically all the gain was made in Ontario. The situation was much the same as on the corresponding date a year ago.

Leather and Products.—Further and more extensive improvement was shown in leather factories, the increases being decidedly larger than at the beginning of September last year, when the index was several points lower. Statements were received from 189 manufacturers having 17,600 persons in their employ, as against 17,133 on August 1. Quebec and Ontario reported most of the additionally employed workers, who were largely absorbed by boot and shoe plants.

Lumber and Products.—The commencement of seasonal inactivity in saw-mills caused a substantial reduction in employment, and match and vehicle factories also released help. The decreases, which were reported to a considerable extent in Quebec and British Columbia, greatly exceeded those noted on September 1, 1926; the index number then was rather higher. A combined working force of 56,204 persons was reported by the 704 establishments from which returns were received and which employed 57,402 in their last report.

Musical Instruments.—The trend of employment was upward in musical instrument factories, repeating the movement indicated on the corresponding date a year ago, when the situation was rather better. Statistics were compiled from 39 plants employing 3,168 workers, or 141 more than at the beginning of August. The bulk of the gain took place in Ontario.

Plant Products—Edible.—Biscuit, confectionery, chocolate and cocoa plants and fruit and vegetable canneries reported heightened activity, the improvement being on a much larger scale than on the corresponding date last year. Data were compiled from 306 firms in the vegetable food group, whose pay rolls rose from 28,974 on August 1, to 29,620 at the beginning of September. All provinces shared in the upward movement.

Pulp and Paper Products.—Although the additions to staffs were on a smaller scale than those indicated on the corresponding date

last year, the index number was several points higher than at that time. The forces of the 460 co-operating establishments included 60,291 persons, as compared with 60,106 in the preceding month. A large proportion of this advance took place in Ontario and the Prairie Provinces.

Textile Products.—Some recovery from the losses noted in preceding reports was made in textile factories, 515 of which had 74,815 workers, as against 74,502 on August 1. Improvement was shown chiefly in Quebec while the tendency in Ontario was unfavourable. Cotton, woollen and garment factories regis-

TABLE III.—INDEX NUMBERS OF EMPLOYMENT IN CANADA BY INDUSTRIES (JAN. 1920 = 100)

Industries	[1]Relative Weight	Sept. 1 1927	Aug. 1 1927	Sept. 1 1926	Sept. 1 1925	Sept. 1 1924	Sept. 1 1923

[1]NOTE.—The "relative weight" column shows the proportion that the number of employees in the indicated industry is of the total number of employees reported in all industries by firms making returns on the date under review

tered most of the expansion, but knitting mills released employees. Employment on the corresponding date last year was in much smaller volume; practically no change in the situation was then reported.

Tobacco, Distilled and Malt Liquors.—Further moderate advances were noted in this industry on September 1, when 182 persons were added to the payrolls of the 106 co-operating factories, which employed 12,947 operatives. A large share of the gain took place in Quebec. The level of employment was much higher than at the beginning of September a year ago.

Clay, Glass and Stone Products.—Glass factories released a considerable number of workers, while the trend was also unfavourable in brick and stone works. Statements were received from 118 plants, having 10,651 employees, as against 11,073 in the preceding month. Ontario registered the bulk of the contraction. Practically no change had been noted on the corresponding date last year and the index number then was slightly higher.

Electric Current.—Continued expansion was shown in electric current plants, 87 of which employed 13,702 persons compared with 13,149 in their last report. Quebec and Ontario recorded most of the increase. The index number stood at the highest point so far reached in the record of eight years.

Electrical Apparatus.—Employment in this group increased substantially on September 1, when 633 workers were added to the forces of the 41 co-operating establishments, which had 10,918 employees. This advance took place mainly in Ontario; it greatly exceeded that noted on the corresponding date in 1926, when the index was over eight points lower.

Iron and Steel Products.—Agricultural implement, railway car, ship building and some other branches of the iron and steel group recorded reductions in employment, while the iron and steel fabrication, wire, small hardware and a few other groups showed improvement. The result was a reduction of 1,838 persons in the forces of the 636 co-operating firms, who employed 124,997 employees. Employment decreased in all except the Western provinces. The trend of employment on September 1, 1926, was favourable, and the index number then was slightly higher than on the date under review.

Mineral Products.—There was a small falling off in the number of persons employed in this group, chiefly in Quebec and Ontario. Statistics were received from 72 manufacturers with 10,027 employees, as compared with 10,221 in the preceding month. Employment was in greater volume than on September 1, 1926.

Logging

The commencement of seasonal operations in logging camps caused a larger increase in employment than on the corresponding date of 1926 or 1925, when the indexes were lower than in the early autumn this year. The 218 co-operating firms reported 18,291 workers, compared with 15,870 in the preceding month. A very large proportion of the improvement took place in Ontario, although the trend was upward in all except the Prairie Provinces.

Mining

Coal.—Data were received from 88 operators having 26,545 men on their payrolls, as compared with 26,689 in the preceding month. Curtailment was shown in the Maritime Provinces, while there were small gains in the Prairie Provinces. Although considerable improvement had been registered on the corresponding date a year ago, the index number then was between four and five points lower.

Metallic Ores.—Employment in metallic ore mines continued to advance, according to returns from 56 firms, whose forces rose from 12,986 persons on August 1 to 13,119 at the beginning of September. Ontario and British Columbia recorded most of the increase. Practically no change in the situation was shown on September 1, 1926, when the index number was over 20 points lower.

Non-metallic Minerals (Other than Coal).—Seventy employers in this division reported 7,539 workers, as against 7,267 at the beginning of August. This gain contrasts with the loss noted on the same date last year, when the index number was nearly nine points lower. Asbestos mines and quarries in Quebec and Ontario, respectively, showed most of the increase, although there was also some improvement in the latter in the Prairie Provinces.

Communications

Further moderate gains were noted in this division, chiefly on telephones. Statistics were compiled from 186 companies and branches employing 25,923 persons, compared with 25,799 in their last report. Employment continued to be in greater volume than on the corresponding date in 1926.

Transportation

Street and Electric Railways and Cartage.—Considerable expansion was shown in local transportation on the date under review, when 435 employers were added to the forces of the 112 firms furnishing data, who had 21,232 in their employ. A large proportion of this advance was made in the Prairie Provinces. The index number was nearly five points higher than at the beginning of September, 1926; the gain then indicated was less extensive.

Steam Railways.—There was an increase in the number employed in steam railway operation on September 1, according to the 100 companies and branches from which returns were received and which reported 79,859 employees. The index number was slightly higher than on the same date last year, although the improvement then was more pronounced. Practically all the gain took place in the Prairie Provinces.

Shipping and Stevedoring.—There was a further slight decrease in employment in water transportation, in which activity was rather less than on the corresponding date in 1926. Statements were received from 60 employers of 14,988 workers, as compared with 15,184 in the preceding month. Most of the reduction was reported in the Maritime Provinces.

Construction and Maintenance

Building.—Further important expansion was shown in building construction, the gains being larger than on September 1 of any other of the last eight years, while the index number, standing at 215·3, was at its highest point since this series was instituted in 1920. Data was received from 460 contractors whose payrolls rose from 43,011 on August 1 to 44,910 persons on the date under review. The trend was favourable in all provinces except British Columbia.

Highway.—There was a small decrease in personnel in this group, 133 men being released from the forces of the 157 co-operating employers, who had 33,976 workers. Improvement in Quebec and the Prairie Provinces was offset by declines in the Maritime Provinces and Ontario. Curtailment on a larger scale was registered on September 1 a year ago, when the index number was lower.

Railway.—A further seasonal contraction in employment was indicated by the 39 firms furnishing data in this division, who employed 51,371 persons, as against 52,703 in the preceding month. There were advances in Ontario and the Maritime Provinces but in the Prairie Provinces and Quebec the trend was downward. Considerably more pronounced losses had been noted on the corresponding date in 1926; the index number then was some ten points lower.

Services

This group recorded greater gains than are usually indicated at the beginning of September, mainly in the hotel and restaurant and personal service divisions in Quebec and Ontario. Employment on the date under review was at the highest level so far reached in this record. The 175 establishments furnishing returns reported 17,887 assistants, as against 17,113 on August 1.

Trade

The additions to staffs on the date under review were larger than have usually been registered at the beginning of September; employment continued at a higher level than in the autumn of any other year of the record, which was instituted in 1920. Returns were received from 536 retail and wholesale houses employing 63,774 persons, compared with 62,984 at the beginning of August. The advance took place in wholesale trade, retailers releasing some employees.

Table I, II and III give index numbers of employment in economic areas, leading cities and industries, respectively. The columns headed "Relative Weight" show the proportion that the number of employees reported in the indicated area or industry is of the total number of employees reported in Canada by the firms making returns on September 1, 1927.

During September Mayor Médéric Martin, of Montreal, addressed a letter to public bodies, industrial and mercantile establishments and other employers, urging them when engaging help to give preference to ratepayers and residents of the city. The letter mentions in particular the conditions in the building industry, which is affected by the considerable number of unoccupied dwellings in the city. In order to effect economies many proprietors of stores and shops in the past have engaged outsiders at a somewhat lower rates of wages than they would be obliged to pay to residents. The mayor points out that this is a bad policy in the long run, as it increases unemployment, and ultimately re-acts on those who follow this practice.

UNEMPLOYMENT IN TRADE UNIONS AT THE CLOSE OF AUGUST, 1927

UNEMPLOYMENT as used in the following report has reference to involuntary idleness due to economic causes. Persons who are engaged in work other than their own trades, or who are idle because of illness are not considered as unemployed. Unions involved in an industrial dispute are excluded from these tabulations. As the number of unions making returns varies from month to month, with consequent variation in membership upon which the percentage of unemployment is based, it should be understood that such figures have reference only to the organizations reporting.

PERCENTAGE OF UNEMPLOYMENT AS REPORTED BY TRADE UNIONS

There was a further though nominal increase in the volume of unemployment reported at the end of August by the 1,602 local trade unions from which returns were tabulated. The membership of their unions aggregated 170,024 persons, and of these, 6,210, or a percentage of 3.7, were without work on August 31, as compared with 3.3 per cent at the close of the previous month. Less employment was afforded than in August last year when the percentage of idleness stood at 2.5. The changes throughout the various provinces as compared with July were slight; New Brunswick and Saskatchewan alone reported small increases in employment; the Manitoba situation remained stationary, and in the remaining provinces there were moderate declines in employment. As compared with the return for August last year the Nova Scotia, New Brunswick, Saskatchewan and Alberta unions were afforded a slightly greater volume of work, but the reductions in the remaining provinces more than offset these gains. The changes, however, were not particularly noteworthy in any one province.

A separate record is kept of trade union conditions existing in the largest city of each province, with the exception of Prince Edward Island. Little variation from the July level of employment in each city used for comparative purposes was shown at the close of August, Halifax, St. John, Regina and Edmonton indicating slight improvement, while Montreal, Toronto, Winnipeg and Vancouver showed minor reductions. In comparison with the returns for August last year employment was more plentiful during the period under review for unions in Halifax, St. John and Edmonton, but not so brisk in the remaining cities.

The accompanying chart indicates the trend of unemployment by months from June, 1921, to date. The course followed by the curve in August was a slight continuation of the upward July trend. The level at the close of August was somewhat above that of the same month last year, indicating slightly greater degree of unemployment.

From unions in the manufacturing group of industries 433 returns were tabulated, with a combined membership of 49,032 persons, 5.9 per cent of whom were without work on August 31, as compared with an unemployment percentage of 4.8 at the end of July. Iron and steel workers, especially moulders and railway carmen, were chiefly responsible

for this slight increase in unemployment, though considerable depression was also indicated among metal polishers and glass workers. Cigar makers, paper makers and printing tradesmen in addition all registered somewhat less activity. Textile, hat and cap and brewery workers, on the other hand, were afforded a greater volume of work. In comparison with the returns for August of last year, when 3.6 per cent of the members were idle, the most noteworthy contractions were among cigar makers, metal polishers, garment, leather, iron and steel and glass workers.

Reports received from 33 unions of coal miners with 14,613 members showed an unemployment percentage of 2.9 in August, as against .4 per cent in July. Conditions were slightly less favourable in both Nova Scotia and Alberta coal mines, but in British Columbia all members were reported at work as in July. The level of employment in the coal mining regions during August, however, was higher than in the same month last year when the percentage of idleness stood at 4.1 per cent. In this comparison the change in Nova Scotia was merely nominal in character; in Alberta the situation improved slightly, and in British Columbia no unemployment was registered in either of the months under comparison. The volume of unemployment afforded asbestos miners in Quebec during August was sufficient for the number of available members.

Unemployment in the building and construction trades during August as registered by 174 labour organizations with 18,183 members was slightly greater than that of the previous month, 8.5 per cent of idleness being recorded at the end of August as compared with 6.9 per cent in July. The most noteworthy reductions in employment were indicated by bricklayers, masons and plasterers, in Quebec and Ontario especially, followed by declines of lesser magnitude among bridge and structural iron workers, painters, decorators and paperhangers and hod carriers and building labourers. The situation for carpenters and joiners was unchanged and the remaining tradesmen were more actively employed. Greater unemployment was indicated in the building trades as a whole when compared with the returns for August last year, due, for the most part, to slackness among bricklayers, masons and plasterers, though several of the other trades contributed in a smaller share to the inactivity.

The transportation industry showed a more favourable trend during August to that of the previous month and about the same level of unemployment as in August last year. For August returns were tabulated from 651 unions with 57,801 members, these showing 1.9 per cent of idleness as compared with 2.8 per cent in the previous month and 1.8 per cent in August last year. Navigation workers reported a much smaller percentage of idleness during August than in July, although there was considerable short time registered among the Quebec workers. The situation as compared with August of last year in the navigation divisions was slightly more favourable. Unemployment in the steam railway division, whose returns constitute over 81 per cent of the entire group membership reporting, was on exactly the same level in August as in the previous month, and also in August last year, the percentage of idleness in all three months standing at 2.1. The street railway situation improved over July, but was the same as reported in August last year, while teamsters and chauffeurs indicated a nominal percentage of idleness in August, in comparison with the fully active condition of the previous month and August last year.

TABLE I.—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY PROVINCES

From longshore workers whose returns are tabulated separately, 14 reports were received comprising a membership of 7,166 persons, and showed an unemployment percentage of 14.0, practically the same as that indicated in July. There was slight improvement, however, over August last year, when 14.4 per cent of the members were idle.

In the governmental service group 137 reports received with 12,353 members showed a minor reduction in employment during August as compared with the previous month but slightly greater activity than in August last year. The changes throughout were not of particular note either in the Federal or the civic employees division.

Reports were tabulated from 110 labour organizations of miscellaneous groups of tradesmen comprising a membership of 5,042 persons, 245 of whom, or a percentage of 4.9 were without work at the end of August, as compared with 4.4 per cent in July and 4.0 per cent in August last year. Hotel workers were not so actively engaged as in July, and there were minor contractions among stationary engineers and firemen. Among theatre and stage employees the situation improved slightly over July, and employment for barbers was in greater volume. As compared with August last year hotel and restaurant employees and stationary engineers and firemen were not afforded quite so much work, but the situation for barbers and theatre and stage employees remained almost stationary.

Fishermen reported a slightly larger percentage of inactivity during August than in July, but smaller than in August last year. In no month, however, were the percentages of idleness very substantial. The lumbering industry was very good, no unemployment being reported in any month used here for comparative purposes.

Table I summarizes the returns by provinces for August of each year from 1919 to 1924 inclusive and for each month from January 1925 to date and table II indicates the percentages of unemployment registered in the different groups of industries for the same months.

EMPLOYMENT OFFICE REPORTS FOR AUGUST, 1927

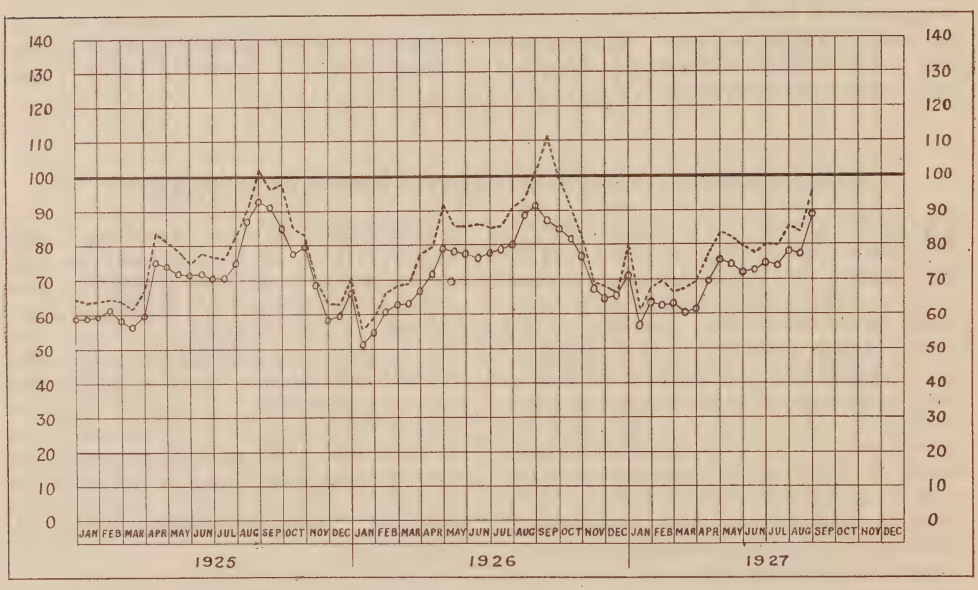
DURING the month of August 1927 the reports from the offices of the Employment Service of Canada showed an increase of 71 per cent in the average daily placements over that of the preceding period, while a decline of 25 per cent was registered when a comparison is made with the average daily placements effected during the corresponding month a year ago. This loss was almost entirely due to decreased farm placements, though lesser declines were registered in manufacturing and transportation. These, however, were partly offset by increased placements in logging, construction and maintenance, services and trade, the gain in logging being the most pronounced.

The accompanying chart shows the trend of employment since January 1925, as represented by the ratio of vacancies notified and of placements effected for each 100 applications for work registered at the offices of the Service throughout Canada, the computations being made semi-monthly. It will be seen that the curve of vacancies in relation to applications declined slightly during the first half of the month, while that of placements remained practically steady. Both, however, showed a marked upward trend during the latter half of the period under review, this being due to the heavy demand for harvesters in the Prairie Provinces, though the curves this year did not attain the high level registered at the close of August a year ago, when the demand for workers in some parts of the west exceeded the supply. The ratio of vacancies to each 100 applications was 83.9 and 95.7 during the first and second half of August, 1927, in contrast with the ratios of 93.8 and 101.5 during the same period in 1926. The ratios of placements to each 100 applications during the periods under review were 77.5 and 89.0 as compared with 88.6 and 91.5 during the corresponding month a year ago.

The offices reported that an average of 1,723 applications for employment was received daily during the first half of August, in comparison with 1,550 daily during the preceding period and with 2,414 daily during the corresponding period of 1926. During the latter half of August applications for work averaged 2,993 daily, in contrast with 3,540 daily during the same period last year.

The average number of vacancies reported by employers to the Service daily was 1,446 during the first half and 2,862 during the latter half of the month, in comparison with 2,265 and 3,595 daily during the corresponding periods of August, 1926. During the latter

half of July, 1927, the average number of vacancies registered daily was 1,322.



The average number of placements made daily by the offices of the Service during the first half of August was 1,335, of which 992 daily were in regular employment, and 343 daily were in casual work. This is in comparison with the daily average of 1,213 placements during the preceding period, and with 2,139 daily during the corresponding period a year ago. During the latter half of the month placements averaged 2,663 daily (2,278 regular and 385 casual), in contrast with 3,238 during the same period a year ago.

ing table gives the placements effected to date by the offices of the Employment Service of Canada:—

Year	Regular	Casual	Totals
1919 (10 months)	268,001	37,904	305,905
1920	366,547	79,265	445,812
1921	280,518	75,238	355,756
1922	297,827	95,695	393,522
1923	347,165	115,387	462,552

1925	306,804	106,021	412,825
1926	300,226	109,929	410,155
1927 (8 months)	170,323	69,128	239,451

POSITIONS OFFERED AND PLACEMENTS EFFECTED FOR EACH ONE HUNDRED APPLICATIONS FOR EMPLOYMENT

Applications ——— Vacancies - - - - - - - - - - - - Placements o—o—o—o—o—o

During August, 1927, the officers of the Service referred 56,164 persons to vacancies and affected a total of 54,624 placements. Of the latter, 44,776 were in regular employment and 9,848 in casual work. Placements in regular employment numbered 39,703 men and 5,073 women. The Service received notification of 58,858 opportunities for employment, of which 47,729 were for men and 11,129 for women workers. Applications for employment numbered 52,440 from men and 11,842 from women, a total of 64,282. The follow-

Nova Scotia

During the month of August, 1927, positions offered to employment offices in Nova Scotia were nearly 13 per cent higher than in July, but over 2 per cent lower than in August last year. Placements, however, showed a gain under both comparisons, being about 13 per cent above July, and over 3 per cent in excess of August, 1926, all the changes under the latter comparison being of minor importance. Placements by industrial groups included: manufacturing, 79; logging, 52; farm-

ing, 53; construction and maintainance, 72; trade, 53; and services, 280, of which 210 were of household workers. During the month regular employment was secured for 151 men and 70 women.

New Brunswick

There was an increase of nearly 13 per cent in the number of positions offered through offices in New Brunswick during August, when compared with the preceding month, but a decrease of 9 per cent in comparison with the corresponding month last year. Placements were over 9 per cent higher than in July, but almost 4 per cent less than in August, 1926. Increased placements were recorded in the construction and maintenance and services groups, but these were more than offset by declines in manufacturing, logging, farming and transportation. Industrial divisions in which most of the placements were effected during the month were: manufacturing, 50; logging, 41; farming, 37; transportation, 34; construction and maintenance, 146; services, 405, of which 280 were of household workers. Placements in regular employment numbered 274 of men and 98 of women.

Quebec

The demand for workers, as indicated by orders listed at offices in Quebec during August, increased 19 per cent over the preceding month, and nearly 6 per cent above the corresponding month last year. Placements also showed a gain under both comparisons, being 14 per cent higher than in July and nearly 4 per cent more than in August, 1926. A substantial gain was shown in logging, which was counteracted, however, by a decline of like degree in construction and maintenance. Minor gains were also recorded in farming, mining and services, while decreases were registered in manufacturing and transportation. Placements by industrial groups included: manufacturing, 238; logging, 902; farming, 95; transportation, 76; construction and maintenance, 779; trade, 69; and services, 534, of which 304 were of household workers. During the month under review 2,230 men and 458 women were placed in regular employment.

Ontario

During August, orders received at employment offices in Ontario called for 19 per cent more workers than in the preceding month, and 2 per cent more than in the corresponding month last year. There was an increase of practically 13 per cent in placements over July, and of 3 per cent when compared with August, 1926. Manufacturing, mining, transportation and finance were the only groups to register declines, and these, with the exception of manufacturing, were only of minor importance, and were more than offset by gains in logging, farming, communication, construction and maintenance, services and trade, that in logging being the most pronounced. The number of placements effected during the month under review by industrial divisions included: manufacturing, 1,682; logging, 1,434; farming, 1,563; mining, 122; transportation, 545; construction and maintenance, 3,494; trade, 373; and services, 3,622, of which 1,926 were of household workers. There were during the month 7,918 placements of men, and 1,328 placements of women in regular employment.

Manitoba

Orders listed at employment offices in Manitoba during August called for 58 per cent more workers than those in the preceding month, but there was a decline of 42 per cent from the total of the corresponding month last year. There was also an increase of 75 per cent in placements when compared with July, but a decline of 33 per cent when compared with August, 1926. This decrease from last year was almost entirely due to fewer placements in farming, the decline in that group representing over 90 per cent of the net loss. Gains were reported in the logging, services, and construction and maintenance groups, that in the railway division in the latter being the most marked, but not sufficient to counteract the decline mentioned above. Industries in which most of the placements were effected were: manufacturing, 209; logging, 100; farming, 3,490; construction and maintenance, 1,052; trade, 250; and services, 1,781, of which 1,347 were of household workers. Regular employment was supplied for 4,360 men and 685 women.

Saskatchewan.

Opportunities for employment as indicated by orders received at offices in Saskatchewan during August were 338 per cent higher than in the preceding month, but 40 per cent less favourable than in the corresponding month last year. Placements increased more than 283 per cent over July, but declined 37 per cent when compared with August, 1926. Though nearly 80 per cent of the total placements for the province were in farming, still they were considerably less than last year, and were mainly responsible for the reduction under this comparison. As in Manitoba,

construction and maintenance showed a considerable increase, the placements in that division being more than double those recorded during August last year, railway construction being chiefly responsible for the gains shown. Placements by industries included: manufacturing, 172; farming, 10,486; transportation, 67; construction and maintenance, 1,061; trade, 258; and services, 1,234, of which 849 were of household workers. Regular employment was procured for 11,482 men and 697 women during the month.

Alberta

There was an increase of 173 per cent in the number of positions offered through employment offices in Alberta during August, when compared with the preceding month, but a decrease of over 28 per cent in comparison with the corresponding month last year. Placements showed an increase of nearly 157 per cent when compared with July, but were 24 per cent less than in August, 1926. The bulk of the placements effected during the month was in farming, in which industry employment was secured for 6,114 workers, as compared with 9,287 during the same month last year. Other industrial groups in which employment was found for the majority of workers included: manufacturing, 389; mining, 93; transportation, 104; construction and maintenance, 1,018; trade, 233; and services, 983, of which 645 were of household workers. Placements in regular employment numbered 7,452 of men and 488 of women.

British Columbia

Employment opportunities as indicated by orders received at employment offices in British Columbia during August, were more favourable than those shown the preceding month and the corresponding month last year, there being an increase in the demand for workers of nearly 57 per cent and 12 per cent for the earlier period respectively. Placements showed an increase of almost 139 per cent over July, but were 25 per cent lower than in August, 1926. The greater part of the placements effected during the month were transfers of harvesters to the prairie provinces, but the number was less than in August a year ago. Declines were also noted in manufacturing, transportation, construction and maintenance, and services, which also contributed, though in a lesser degree, to the total decline registered above, logging and trade alone showing increases, but these being nominal counterbalanced only in a small degree the decreases reported in the other groups. Placements by industrial divisions included: manufacturing, 629; logging, 542; farming, 5,078; mining, 125; transportation, 140; construction and maintenance, 687; trade, 226; and services, 960, of which 556 were of household workers. During the month 5,836 men and 1,249 women were placed in regular employment.

Movement of Labour

During August, 1927, the offices of the Employment Service of Canada made 44,776 placements in regular employment, of which 36,070 were of persons for whom the employment found was outside the immediate locality of the offices at which they were registered. Of the latter 5,596 were granted the Employment Service reduced transportation rate, 3,550 travelling to points within the same province as the despatching office and 2,046 to other provinces. The reduced transportation rate, which is 2.7 cents per mile with a minimum fare of $4, is granted by the railway companies to *bona fide* applicants at the Employment Service who may desire to travel to distant employment for which no workers are available locally.

The Quebec offices issued reduced transportation certificates to 342 persons, 126 of whom went to employment within the province and 216 to other provinces. The Quebec city offices transacted the bulk of the business provincially, transferring 119 bushmen to points within its own zone. Of the remainder, 5 bushmen and one mechanical adjuster went from Montreal to employment within its own zone and one bushman from Hull to employment within the Hull zone. The interprovincial transfers were all of bushmen, 210 going from Montreal to lumber operations around Sault Ste. Marie, and 6 journeying from Hull to points within the vicinity of North Bay.

The number of workers travelling at the reduced rate from Ontario centres was 1,187, of whom 1,129 received certificates to points within the Province, and 58 to other provinces. Of the former, North Bay issued certificates to 132 carpenters, 125 railway construction labourer, 33 bushmen, 21 highway construction labourers, 2 painters, 2 survey men, 2 cooks, 2 general labourers and one pulp mill labourer for the Timmins zone, 98 railway construction labourers, 2 cooks, 2 cookees, one carpenter and one blacksmith for Cobalt, 2 farm hands for Pembroke, one bricklayer for Hamilton and 3 bushmen and one railway construction labourer for points within the North Bay zone. From Toronto, Cobalt received one miner, Sudbury 84 bush-

men and one carpenter, Sault Ste. Marie 233 bushmen and 3 carpenters, Sarnia 9 carpenters, Port Arthur one crane operator, Kingston one metal polisher and Timmins one electrician. The Pembroke office transferred 4 carpenters to Sault Ste. Marie, one blacksmith to Sudbury, and 2 bushmen to Timmins, while the Sudbury office sent 23 railway construction labourers to Cobalt, one miner to Ottawa and 179 bushmen, 28 mill men and one cook within its own zone. Those who travelled from Fort William to points within its zone included 42 building construction workers, 26 bushmen, 7 carpenters and one baker, and from Port Arthur 13 bushmen, 15 highway construction labourers, 3 building construction labourers and one sawyer received certificates for points within the Port Arthur zone. Hamilton transported 8 carpenters to Sault Ste. Marie and 2 carpenters and one bricklayer to North Bay, Cobalt one blacksmith to Port Arthur. St. Catharines one millwright to Chatham and Windsor 4 carpenters to Sarnia. Of the transfers to other provinces North Bay shipped 14 bricklayers, 2 carpenters, 2 plumbers, one miner, one railway construction labourer, one cook, one electric welder and one labourer to employment in the Hull zone, 30 farm hands to Saskatchewan districts and 3 farm labourers to points in Alberta. In addition 2 farm hands travelled from Fort William to points around Saskatoon.

Manitoba transportation vouchers numbered 1,802, of which 734 were for provincial points and 1,068 for other provinces. All certificates were issued by the Winnipeg office, the provincial transfers to Brandon including 27 teamsters, 7 cooks, 5 female hotel workers, 2 carpenters, 2 construction labourers, 2 cookees and one porter and to Dauphin 9 steel workers, 4 bushmen, 2 porters, 1 fireman, one timekeeper and one hotel cook, while 5 teamsters and 2 construction labourers went to districts within the Winnipeg zone. For harvest operations within the province 615 harvest hands and 48 farm domestics received transportation to the various farming areas. The greater part of the interprovincial movement was also to the harvest fields, 853 harvesters and 25 farm household workers going to employment on Saskatchewan farms, 22 harvest hands and one farm domestic travelling to Alberta and one farm housekeeper to British Columbia. To the Regina zone were despatched 4 carpenters, 2 female hotel workers, 2 bricklayers and one golf links foreman, to Moose Jaw 6 bricklayers, to Prince Albert 9 construction labourers, to Saskatoon 2 carpenters and one harness maker, to Estevan one house general, one female hotel worker and one cook and to Melfort 2 pulp wood cutters. The Winnipeg office also transferred 117 bushmen, one bush fireman, 5 carpenters, one construction labourer, one harness maker, 4 cooks, one porter and one hotel kitchen worker to points around Port Arthur and 3 structural iron workers to the Timmins zone.

From Saskatchewan offices 402 persons benefited by the Employment Service reduced rate, 401 of whom went to points within the province. Of these 363 were harvest hands and 4 farm domestics for farms within the province, the majority receiving transportation from the Saskatoon and Moose Jaw offices. Moose Jaw in addition issued certificates for 3 labourers, one blacksmith and one teamster going to Swift Current, 3 carpenters to Estevan and 2 teamsters, one porter and one waitress to points within the Moose Jaw zone and Saskatoon transported 15 bushmen and one porter to Prince Albert. From the Prince Albert office 6 bushmen went to camps within its own zone. The one interprovincial transfer was of a farm domestic who travelled from Regina to employment in the Brandon zone.

The Alberta offices granted 1,295 certificates of reduced transportation, 906 provincial and 389 interprovincial. Provincially, the Edmonton offices transferred 29 mill hands, 6 track men, one pipe-fitter, one packer, one pumpman, one mine mechanic, 5 teamsters, 4 fishermen, one blacksmith, 3 miners, one dairyman, 2 engineers, one edgerman, one carpenter, one painter and 23 hotel and household workers to points within the Edmonton zone, one line man to Calgary and 661 harvest workers and 3 farm domestics to various parts of the province. From Calgary, one porter travelled to Drumheller, one housekeeper to Edmonton, one cook to employment within the Calgary zone and 154 harvesters and 3 farm household workers to the farming areas in the Province. Those receiving transportation to Saskatchewan points from Edmonton included 3 housekeepers and one waiter going to Saskatoon and 354 harvesters and 3 farm domestics to employment on Saskatchewan farms. The remainder of the movement outside the province took place from Calgary, 6 carpenters being carried at the reduced rate to Weyburn, 3 housekeepers to Saskatoon, 3 cooks to Winnipeg and 16 harvester workers to various Saskatchewan agricultural districts.

Of the 568 persons who benefited by the Employment Service reduced rate in British Columbia 254 were for provincial points and 314 for other provinces. Provincially the majority of the transfers were from Vancouver, the Kamloops zone receiving 54 bushmen, 23 labourers, 5 miners, 3 muckers, 2 cooks, one truck-driver, one farm labourer

and 2 flunkies, the Kelowna zone 67 cannery workers and one fruit inspector and the Penticton zone 5 saw mill labourers, 5 miners, 4 general labourers, 4 station men, 4 carpenters, one cannery worker, one cook, one blacksmith and 2 engineers. In addition one miner, one carpenter and one bricklayer travelled to Nelson from Vancouver, 4 bricklayers to Cranbrook, one engineer to Prince George and 14 labourers, 6 cannery workers, 4 miners, 2 farm labourers, 2 plumbers, one hoist man, one mechanic, one trimmer man, one cook, one carpenter and one engineer to various points within the Vancouver zone. The Prince George office transferred 4 bushmen and 2 mill men to the Prince Rupert zone and 2 bushmen, one teamster and one fireman within the Prince George zone, the Nelson office despatched 4 miners to Revelstoke and 2 lumber pilers within its own zone and New Westminster, 4 fruit pickers to Kelowna. Included in the balance of the provincial movement were one steel sharpener, 2 miners and one bull cook going from Prince Rupert and 2 bushmen from Kamloops to points within their respective zones. Of those going outside the province the Nelson office issued 3 certificates to bushmen destined for the Lethbridge zone and 3 to labourers for Moose Jaw and the Vancouver office issued transportation to one carpenter and 2 millwrights going to Calgary. In addition 144 harvest workers and 78 farm domestics went to employment in Alberta, 65 farm hands and 13 farm household workers to points in Saskatchewan and 2 farm labourers and 3 farm domestics to Manitoba districts, the majority of whom travelled from Nelson.

Of the 5,596 persons who benefited by the Employment Service reduced transportation rate 2,087 were carried by the Canadian National Railways, 2,876 by the Canadian Pacific Railway, 305 by the Temiskaming and Northern Ontario Railway and 23 by the Pacific Great Eastern Railway.

In addition to the transportation facilities afforded the workers through the 2.7 cents per mile rate referred to above, the railway companies during August granted special harvest excursion rates to the Prairie Provinces. The fares to Winnipeg for harvest hands are $15 from points in Ontario and Quebec and $20 from the Maritime provinces, the return journey in each case being $5 higher. Holders of excursion tickets can secure transportation beyond Winnipeg at a one-half cent per mile rate. All such reduced transportation is secured by direct application to the agents of the railway companies, although employment office officials meet all excursion trains at Winnipeg in order to give information to the workers of available employment. The movement of the harvest hands to the Prairie provinces from British Columbia is recruited entirely by the Employment Service and a special rate is granted by the railway companies to all applications upon presentation of a certificate furnished by the Employment Service. Such certificates entitle the holder to a rate of $11 from Victoria and $10 from Vancouver or other British Columbia offices (except Cranbrook, Revelstoke and Nelson, where the 2.7 cent per mile rate was in effect) to Calgary or Edmonton beyond which points the fare is one-half cent per mile. The British Columbia offices transferred 5,972 persons at this special harvest rate to the Prairie Provinces including 1,873 harvest hands and 244 farm household workers for various Alberta points, and 3,516 harvest workers and 339 farm domestics for Saskatchewan districts. Of these 2,379 were transported by the Canadian National Railways and 3,593 by the Canadian Pacific Railway.

Legislation and Industrial Health

The *Labour Leader,* Toronto, in its issue of October 7, referred to the progress that has been made in "curbing industrial poisons." At a recent meeting of doctors at Yale University one of the speakers pointed out that lead remains the most deadly industrial poison, with the possible exception of carbon monoxide. He stated that workers in more than 200 industries are exposed to lead poisoning. "There has been a decrease in the number of industrial etoxication cases, due, it would seem, to better nutrition of the working man and improved ventilation and personal conditions in the shop. Our compensation laws and increased insurance rates have compelled the manufacturer to eliminate every source of possible poisoning within his power." At the same gathering the head of the health department of Yale University declared that "there is no longer any excuse for using lead in paints that are sheltered from the weather, and that the deadly metal can be abolished from all sprayed paint, as of automobiles."

Commenting on this statement the *Labour Leader* says: "If this be true, then one of the deadliest of industrial poisons can be driven from many of its strongholds by legislation. Phosphorus poisoning among match workers was ended by taxing the deadly form of phosphorus so highly that it was cheaper to use the safe form. Lead poisoning in paint works, it would seem, can be done away with in similar fashion. The needed laws cannot be introduced too quickly."

REGENT INDUSTRIAL AGREEMENTS AND SCHEDULES OF WAGES

A summary is given below of the more important industrial agreements and schedules of wages and working conditions that have recently been received by the Department. Such agreements are summarized each month in the Labour Gazette. In the majority of cases the agreements are signed by both the employers and employees. Verbal agreements, which are also included in the records, are schedules of rates of wages and hours of labour and other conditions of employment agreed upon between the parties concerned, and in effect though not signed. In additions to these, important schedules of wages are summarized, including civic schedules. In the case of each agreement or schedule, the rates of wages for the principal classes of labour are given, with other information of general interest.

Mining, Non-ferrous Smelting and Quarrying: Structural Materials

Graniteville, Que.—Quarry Masters and International Union of Paving Cutters, Local No. 60.

Agreement to be in effect from January 1 to December 31, 1927, with three months' notice of change.

Blocks 3½ to 4½ inches by 4½ to 5 inches deep by 7 to 10 inches long (Toronto size), $30 per thousand.

Blocks, 4 inches cube, $17 per thousand.

Other blocks to be equivalent in price to yardage price for Toronto size blocks.

Day work, $1 per hour, if this is in effect on other jobs.

Hours, 8 per day; 4 on Saturdays.

If average paving cutter cannot make a standard rate through rough stone or other cause, prices will be adjusted.

Masters to furnish air and air tools, or a ten per cent increase on above prices.

Tools are to be kept in working order by a competent blacksmith.

Only union members are to be employed. Extra staff shall be obtained through union.

Manufacturing: Pulp, Paper and Paper Goods

Kenora, Ont.—Kenora Paper Mills Limited and International Brotherhood of Papermakers, Local No. 238.

Agreement to be in effect from May 1, 1927, until April 30, 1928, and for another year unless 30 days' notice of change is given.

Membership to include operators employed by the company in the following positions: boss machine tenders, machine tenders, back tenders, third, fourth, fifth and sixth hands, re-winder men, oilers and beatermen.

When company hires new men, preference to be given to members of the union.

New employees shall join the union within 15 days.

Paper machines shall operate between 8 a.m. Monday and 8 a.m. Sunday.

Certain specified maintenance and repair work shall be done on Sunday, time and one-half.

Regular crew shall prepare machines for making paper at 7.30 a.m. Monday.

If wire has been cut off on Sunday it is permissable to get equipment ready to commence putting wire on at 8 a.m.

Hours for tour workers, 8.

An employee may not leave his post until relieved unless arrangements have been made.

No employee shall be expected to work more than sixteen consecutive hours.

Employees not intending to report for their shift must notify the boss machine tender.

Overtime other than tour work, time and one-half.

Tour workers putting on wires, if after regular hours, shall report at hour specified by boss machine tender, being dismissed for refusal to do so.

Seniority according to length of service, competency being also considered.

Hours for day workers, 8 per day, 6 days per week.

Overtime, time and one-half. At least four hours' pay for repair work.

Hours for tour workers, 8 per day.

Work from 8 a.m. Sunday and 8 a.m. Monday, time and one-half.

Overtime other than tour work, time and one-half.

Holiday work on Dominion day, Labour day and Christmas day, time and one-half. No unnecessary work to be done.

Labour saving devices that will improve efficiency of the plant are desired.

Where members of the union are eliminated by installation, employees will be given preference for any position that may be open.

Vacancy shall exist when a member leaves the employ of the Company through discharge or voluntarily. If such vacancy exists after two weeks, time and one-half shall be paid to members working overtime until vacancy is filled.

Grievances shall be reported in writing to the superintendent; if he fails to adjust same they shall be taken up in conference, and then if necessary referred to arbitration, decision to be binding.

In case the two arbitrators cannot agree on a third, same shall be selected by the provincial Minister of Labour.

Any employee proving to have been unjustly discharged shall be reinstated and paid for time lost.

Wage schedule: rates per hour depend on speed of machines. Minimum rates for No. 1 machines: machine tender, from $1.51 to $1.66; back tender, from $1.33 to $1.48; 3rd hand, from $1.00 to $1.10; 4th hand from 65 cents to 68 cents; 5th hand, from 55 cents to 58 cents; 6th hand, from 41 cents to 44 cents.

Minimum rates for No. 2 machine: machine tender, from $1.54 to $1.69; back tender from $1.36 to $1.51; 3rd hand from $1.02 to $1.12; 4th hand from 65 cents to 68 cents; 5th hand, from 55 cents to 58 cents; 6th hand, from 41 cents to 44 cents. Head clothing men, $1.10 per hour; re-winder men, 65 cents; head oiler, 70 cents; oilers, 59 cents. Mixermen, 86 cents per hour, with an additional 2 cents per hour

if average production for 1927 is 225 tons. Rates for boss machine tenders, 10 cents per hour over highest paid machine tender for each machine.

Construction: Buildings and Structures

Ottawa, Ont.—Ottawa Master Plumbers' Association and United Association of Plumbers and Steamfitters of the United States and Canada, Local No. 71.

Agreement to be in effect from August 1, 1927, to April 30, 1929, and from year to year unless notice of change is given by either party not later than January 2 in any year.

Hours: 8 per day for five days and 4 hours on Saturdays.

Minimum wages for all journeymen, 90 cents per hour from August 1, 1927 to December 31, 1927, and 95 cents thereafter.

Overtime, after 5 p.m. and Saturday afternoons, time and one half: after midnight and Sundays and certain holidays double time.

Men working out of town shall have their fare and board paid; travelling time at regular rate up to 9 p.m. Sleeper to be provided if travelling at night.

Men not laid off at end of previous half day and reporting for work and then laid off shall be paid one half day's pay.

Only union men to be employed when such are available and union members to work only for members of Plumbers' Association when there is work.

All apprentices to serve four years, after which time they shall pass an examination before a Joint Examining Board. After beginning to use tools, an improver shall be paid 50 cents per hour for first 6 months and 65 cents for second 6 months, after which time, if he passes an examination, he will be a journeyman.

Not more than one apprentice to each journeyman to be employed and only one apprentice to each 3 journeymen to try the examination in any one year.

All disputes which cannot be adjusted to be referred to a Joint Arbitration Board consisting of 3 masters and 3 journeymen, which board will have full power to settle grievances and appoint an arbitrator, if necessary.

If a dispute is not settled by the Joint Arbitration Board, no strike or lockout shall take place until reference is made to the General Office of the United Association and a decision given.

No sub-contracting or jobbing to be done by members after regular working hours.

Toronto and Vicinity, Ont.—The Sewer Contractors and Building Contractors of the City of Toronto and Vicinity and the International Union of Steam and Operating Engineers, Local No. 793.

Agreement to be in effect from June 15, 1927, for Sewer Contractors and from September 1, 1927 for Building Contractors to June 15, 1928, and thereafter unless changed on 60 days' notice by either party.

Hours: 8 per day on all sewer work except where engineers are required to raise steam before operating, then one hour shall be allowed at straight time. Fifty-six hours per week for sewer work and 44 per week for building work.

All jobs working 24 hours shall be worked three shifts of 8 hours each.

Overtime: time and one half except in emergency cases when regular rate will be paid. If required to work less than 8 hours a day, 5 cents an hour additional to regular rate will be paid.

Union members only to be employed.

Wages: 95 cents an hour for the operation of hoisting machines and sewer work (except steam and power shovels), 90 cents an hour for the operation of compressors, pump, concrete mixers or other machines.

Regina, Sask.—Association of Construction Industries of Regina and United Brotherhood of Carpenters and Joiners of America, Local No. 1867.

Agreement to be in effect from June 1, 1927, to June 1, 1928, and from year to year thereafter unless changed on 3 months' notice by either party.

Hours: 9 per day for five days, 5 on Saturdays.

Overtime and work on New Year's Day, Dominion Day and Christmas Day, time and one quarter.

Wages: $1 per hour.

Vancouver and Vicinity, B.C.—Certain Employing Plumbers and the United Association of Journeymen Plumbers, Gas, Steam and Sprinkler Fitters and Helpers, Local No. 170.

This agreement was drawn up as a settlement of the strike mentioned in the Labour Gazette for July, 1927.

Only union members to be employed.

A joint board of arbitrators consisting of 5 representatives of each party to be established to settle all disputes between the parties to the agreement and the decision to be binding. If no decision is reached, the matter must be referred to the general office of the United Association and an investigation made before any strike or lockout is declared.

Hours: 8 per day with 5-day week.

Overtime and work on Saturdays, Sundays and certain holidays, double time with the exception of emergency work on Saturday mornings, which may be done at the regular rate.

Minimum wages: $9 per day for journeymen, $7 per day for junior plumbers and steamfitters when they begin to use tools with an increase of 50 cents per day each six months.

One junior plumber or one junior steamfitter may be employed in a shop where one plumber or one steamfitter is employed, and for each additional three journeymen, one junior plumber or steamfitter may be employed. One apprentice is allowed for each shop employing one journeyman and one apprentice for each additional 5 journeymen.

For all work outside the city, fare and board to be paid. Travelling time to be paid at regular rate and sleeper to be provided for night travelling.

Transportation and Public Utilities: Electric Railway

Port Arthur and Fort William, Ont.—Cities of Port Arthur and Fort William and Amalgamated Association of Street and Electric Railway Employees of America, and other Employees in the Street Railway Department.

Agreement to be in effect from May 1, 1926, until May 1, 1928.

The manager will interview employees or any committee of them duly appointed on any subject for mutual benefit.

No objection to employees having union membership; management to have right of discharge and discipline of employees for sufficient cause.

Disputes or disagreements shall be submitted to a joint committee or if necessary to the Commission, whose decision shall be final. Employees exonerated shall be paid for lost time and reinstated.

An employee of six months' service, leaving after giving reasonable notice shall be furnished with a reference.

An employee discharged shall be furnished with a letter stating the reason.

Leave of absence up to three months to be granted without remuneration.

Seniority to be in accordance with continuous service.

Extra work to be divided evenly among spare men.

Hours to be in accordance with the requirements of the Ontario Statutes governing street railways.

Wages, transportation department, per hour —first six months, 45 cents; next 18 months, 48 cents; over two years, 50 cents. Operators of one-man cars, 7½ cents extra per hour. Time and one-half for work on regular day off, and certain holidays. Overtime, straight time. Operators on extra, special or work car, not less than 3 hours' pay. Operators reporting on request and then not required shall receive two hours' pay.

Wages in car barns, per hour: carpenters, 62 cents; painter, 58 cents; machinist and blacksmith, 62 cents; first class pitman, 57 cents; second class pitman, 52 cents; new employees and car cleaners, 45 to 50 cents. Time and one-half for Sunday and holiday work and for overtime over ten hours. For emergency work after regular working hours, minimum of three hours will be paid.

Wages for track men, per hour-track bonder, 49 cents; track greaser and labourers, 42 to 47 cents. Sundays, and holidays and overtime over ten hours on regular days, time and one-half.

Spare men, working less than five hours in a day, 60 cents per hour. Free transportation to all employees; seats for all operators; heaters in vestibules; provisions for supply of uniform, suits, caps and overcoats.

Saskatoon, Sask.—By-Law to Regulate Wages and Working Conditions of Employees of the Municipal Street Railway.

See under—Service, Public Administration.

Transportation and Public Utilities: Electricity and Gas

Hamilton, Ont.—Hamilton Hydro-Electric Commission and Employees, Members of International Brotherhood of Electrical Workers, Local No. 138.

Agreement to be in effect from July 26, 1927, until cancelled by either party giving 30 days' notice in writing.

The Commission is not to discriminate against any employees because of membership in the union.

Differences are to be adjusted by a grievance committee, but in case of failure of the same, no cessation of labour shall take place until the highest officials of both parties have met in an endeavour to reach a settlement, and if necessary the matter shall be settled by arbitration.

Hours, 8 per day; 4 on Saturdays.

Overtime, first five hours, time and one-half; thereafter and Sundays and holidays, double time. Minimum of 3 hours pay for work outside regular working hours.

Wages per hour, foremen, 78 cents; 1st class linemen and cablemen, 73 cents; 2nd class, 68 cents.

No time shall be lost on account of adverse weather. Men called on to work out in wet weather on trouble or emergency shall be provided with rubber coats, boots and hats.

All linemen and cablemen shall be paid for Good Friday, Dominion Day, Labour Day and Christmas Day.

Men are to report defective material.

Moderate safety-first kits to be placed in each truck. Safety-first lectures to be arranged when weather is bad.

Transportation and Public Utilities: Water Transportation

Montreal, Que.—Various Steamship Companies and the Association of the Syndicated Longshoremen of the Port of Montreal.

Schedule of working conditions in effect from August 2, 1927, until December 31, 1927.

Anything contained in this schedule incompatible with or contradictory to the terms and conditions of the wage agreement of April 22, 1927, (summarized in the Labour Gazette for June, 1927), shall supersede such contradictory or incompatible terms of the agreement.

Foremen shall be under control of Company's Superintendent and or contracting stevedore, but men must be discharged through the foremen who engaged them.

Men found smoking in the hold, pilfering or under influence of liquor while at work shall be discharged at any time.

Orders shall be given to men through foremen.

Any extra men called during the forenoon or during afternoon will be paid from 7.30 a.m. or from 1.30 p.m., until noon or 6 p.m., except when whole gang is discharged.

Such extra gang men can be shifted from gang to gang if necessary.

When a gang has to go from one place to another they shall be paid from time order is issued to do so.

Disputes shall be taken up by the Union's representative on wharves with the Company's superintendent and or contracting stevedore, and not with the men.

The schedule gives details of approximate numbers of pieces and packages in sling loads in loading and unloading a ship.

Hatch beams must be taken off or bolted when men are working in the hatch and using a winch.

Ships in course of loading or unloading, one or two walking bosses per pier, at option of superintendent and or contracting stevedore.

When cargo in bags is piled more than 7 bags high, one extra man shall be employed.

Weights per sling may be increased in certain instances provided extra men are employed.

In case of disputes, men shall continue to work, disputes to be referred to a Board of Arbitration of three members, a majority decision to be final and binding.

Service: Public Administration

Moose Jaw, Sask.—The Corporation of the City of Moose Jaw and the Saskatchewan Brotherhood of Steam and Operating Engineers, Local No. 2.

Agreement in effect from April 1, 1927, to April 1, 1928, and thereafter unless 60 days' notice of change is given by either party.

Hours: 8 per day: 6 day week.

Overtime in excess of 8 hours per day and not exceeding 12 hours, time and one-half. Overtime in excess of 12 hours and work on Sundays and statutory holidays, double time except in the cases of shift engineers, stoker operators, oilers and conveyor operators who shall work at regular rate for regular 8 hours worked on Sundays or holidays, and for work on seventh day of week to relieve other employees and for second shift worked in one day when necessary in changing shifts. No overtime rates for ash conveyor or coal conveyor operators for work on Sundays or holidays.

All employees after 12 months' continuous service to have 2 weeks holidays each year with full pay and to be allowed 3 weeks sick leave per year on furnishing medical certificate.

Seniority to be considered in filling vacancies.

One month's notice of leaving or of dismissal to be given.

Wages: Shift engineers $45.25 per week, stoker operators, $35.15 per week. Oilers from $45 per month for first 6 months to 120 per month after 3 years' service with second class certificate; master mechanic, $195 per month; repairmen, 67½ cents per hour; boiler washer, 62½ cents per hour; coal conveyor operator, $31.50 per week; ash conveyor operators, 57½ cents per hour.

Saskatoon, Sask.—By-Law to Regulate the Working Conditions and Wages of Linemen of the Electrical Department of the City of Saskatoon.

By-law in force July 4, 1927, until January 1, 1928.

Hours: 8½ hours per day for 5 days; 4½ hours on Saturdays.

Overtime to 10 p.m. time and one-half; overtime from 10 p.m. to 8 a.m. and on holidays, double time.

If called out after 5.30 p.m. any lineman shall be paid for at least 3 hours unless notified before going off duty that he will be required.

Any lineman shall be considered a journeyman after 3 years' experience and after passing a test.

Not more than one apprentice to every two journeymen and apprentices not to work on high voltage wires or primaries.

Seniority of service to be considered in filling vacancies.

After one year's service, one week's holidays with full pay to be given; after two years' service, two weeks' holidays each year; after one year's service, sick leave not exceeding 2 weeks each year with full pay may be allowed on presentation of medical certificate.

Wages: line foreman, 97½ cents per hour; journeyman lineman, 1st class 92½ cents per hour; 2nd class 75½ cents. Apprentices from 57 to 70 cents per hour graded according to length of service.

Saskatoon, Sask.—By-Law to Regulate the Working Conditions and Wages of Employers of the Pumping Plant and Electrical Department of the City of Saskatoon (Excepting Linemen).

By-law in force July 4, 1927, until January 1, 1928.

Outside workers: hours 8½ per day for 5 days; 4½ hours on Saturdays.

Overtime to 10 p.m. time and one-half; overtime from 10 p.m. to 8 a.m. and on holidays double time. If called out after 5.30 p.m. any worker shall be paid for at least 3 hours unless notified before going off duty that he will be required.

Seniority of service to be considered in filling vacancies.

Wages: wiremen (electrician) 79 cents per hour; street light patrolman 72½ cents per hour; relief light patrolman, 67 cents; meter installers 72½ cents; tungsten patrolman 60½ cents; groundsman 57 cents.

Power house workers: hours, 9 per day for 5 days, 4½ on Saturdays.

Overtime under same conditions as for outside workers except when a double shift of men is ordered in case of trouble. No overtime shall be allowed for first nine hours of the night shift.

Any worker called out after the completion of a regular day's work shall not be paid for less than three hours unless notified before leaving work that he will be required.

All workers on the monthly basis shall not work over 8 hours per day except in the event of breakdown in the plant.

All workers to be allowed one day off in seven if possible, but if not, overtime to be paid for seventh day.

Seniority of service to be considered in filling vacancies.

Wages: station electricians, 84 cents per hour, skilled mechanics, 74 cents, blacksmith, 68 cents; foreman boiler cleaner and spare fireman, 67 cents; boiler cleaner, ash men, coal handlers and mechanic's helpers, 57 cents. Others paid by the month.

Pumping station workers: All workers on monthly basis shall not work over 8 hours per day except in the event of breakdown in the plant.

All workers to be allowed one day off in seven if possible, but if not overtime to be paid for seventh day.

Seniority of service to be considered in filling vacancies.

Hours: 9 per day for 6 days except from April to September when 4½ hours will be worked on Saturdays.

Wages: chief engineer, $203.50 per month; shift engineer, $157.50 per month; spare engineer $144.50; fireman, $134.50; oiler and cleaner, $118.

All tradesmen employed to work union hours and to be paid union wages.

Overtime under same conditions as power house employees.

All workers under this by-law who are paid on a monthly basis after one year's service shall be allowed 14 days' holidays with pay every year, with exception of chief engineer, assistant chief engineer and construction firemen who will be allowed 21 days.

All hourly workers after 1 year's service shall be allowed one week's holidays and after 2 years' service, 2 weeks per year.

Two weeks sick leave per year allowed to all workers after one year's service on presentation of medical certificate.

SASKATOON, SASK.—BY-LAW TO REGULATE THE WORK AND WAGES OF MEMBERS OF THE FIRE DEPARTMENT OF THE CITY OF SASKATOON.

By-law in force July 4, 1927, until January 1, 1928.

Two shift system to be used, day shift 10 hours, night shift 14 hours except in case of emergency.

Seniority of service to be considered in filling vacancies.

All employees to be entitled to 14 days holidays after one year's service and to 21 days after 2 years' service.

Changes which employees wish to make in wage schedule to be submitted through their organization before December 1 in each year and any new schedule which may be agreed to by the Council will take effect from January 1 of the following year.

Wages: fire alarm and police telegraph supervisor, $180.75 per month, senior captain, $172.50; captains, $152.50; motor mechanic, $152.50; lieutenants, $147.50; firemen, from $122.50 first year to $142.50 third year and after.

SASKATOON, SASK.—BY-LAW TO REGULATE THE WAGES AND WORKING CONDITIONS OF EMPLOYEES OF THE MUNICIPAL STREET RAILWAY OF THE CITY OF SASKATOON.

By-law in force July 4, 1927, to January 1, 1928.

Wages of motor conductors and inspectors (one-man cars), 58 cents per hour for first six months to 68½ cents for third year and after.

Sunday work to be paid at time and one-quarter. Work on specified holidays and after regular schedule, time and one-half.

If any worker is suspended or discharged for insufficient reason and later reinstated he will be paid for all time lost.

No discrimination to be made against any worker for being or not being a member of any street railway employees' union.

Seniority subject to efficiency to be given preference in selecting runs.

Runs to be arranged to conform as nearly as possible to 8 hour day. Inspectors shall work 9 hours.

All cars to be fully equipped, equipment to include air brake in addition to hand brake, curtains, approved stools, and vestibules to be heated and made as comfortable as possible during winter months.

Motor conductors to be allowed 20 minutes to make change and to inspect cars before runs.

One week's holiday after one year's service and two weeks holidays every year after two years' service.

Two weeks sick leave per year after one year's service on presentation of medical certificate.

Uniforms to be provided.

Motor conductors to be supplied with $35, cash or tickets.

Proper officials of the city shall at all times deal with motor conductors or a committee of them on any subject in their interests or in the interests of the city.

All complaints or grievances shall be heard by these officials, but if satisfaction is not obtained, appeal may be made to the mayor, commissioner or city council.

Mechanical Department, wages: linemen, 92 cents per hour; arc welders, 83 cents; lineman's helper and armature winders, 80½ cents; blacksmith, 70 cents; junior mechanic, 69½ cents; skilled mechanic, 75½ cents; senior pitman, 65½ cents; pitmen, 59 cents in first year to 62½ cents in third year and thereafter, general worker, 59 cents; car cleaner and helper, 53½ cents; night foreman, $150 per month, track foreman, 60 cents per hour, leading hand, 52 cents; permanent trackman and greaser, 49½ cents; flagman, $4.16 per day.

Hours of car barn men, shopmen and linemen generally 8 hours per day. One day off in seven. Regular Sunday work time and one-quarter.

Overtime and on holidays time and one-half.

If called to work on day off, worker shall be paid double time, unless notified the previous day, in which case he will be paid time and one-half.

New employees to be paid according to ability.

After one year's service, one week's holidays. After two years, two weeks per year.

Two weeks' sick leave per year allowed on presentation of medical certificate.

For the office staff, rates of wages as in 1926 with no payment for overtime work and 3 weeks holidays per year after one year's service.

EDMONTON, ALBERTA—CORPORATION OF THE CITY OF EDMONTON AND THE CANADIAN ELECTRICAL TRADE UNION, EDMONTON BRANCH.

Agreement in effect from January 1, 1927, to January 1, 1928, and from year to year until a new agreement is negotiated, wage schedule in effect from April 1, 1927.

Telephone, light and power electrical employees: Hours 8 per day, 4 on Saturdays for hourly employees, and 8 hours per day for monthly employees.

Overtime rates from 5 p.m. to 10 p.m. and Saturday afternoon time and one-half. From 10 p.m. to 8 a.m. and Sundays and holidays, double time.

All monthly employees to be given 2 weeks' vacation after one year's service. Hourly employees, one week's vacation after one year's service and two weeks per year each year after two years' service.

Two weeks' notice of resignation and dismissals to be given after one year's service.

Preference of employment to those of British nationality.

Two weeks' sick leave per year after one year's service.

No discrimination against any employee for being or not being a member of any organization.

Seniority to be considered in making promotions and in laying off workers.

Any employee who has been suspended, superseded or discharged shall have right to have his case investigated by a committee of employees or of the organization and the committee may appeal to the Superintendent, or if necessary to the City Commissioners or Council or further to a Board of Conciliation. If reinstated, the employee will be paid for time lost.

Telephone employees on night service to be allowed 4 nights off each month.

Telephone employees required to work on Sundays shall be allowed equal time off, but shall not work more than one Sunday in two. Monthly employees working additional Sunday duties or holidays will be paid double time in addition to monthly pay.

Wages: switches— apprentices $80 to $105 per month (3rd year); journeyman $136 to $174 (3rd year); service men and rack men $107 to $160 (4th year); inspectors $136 to $160 (3rd year); night service man, $112 to $131 (3rd year); senior mechanic $169 per month, mechanics, 46 cents per hour for first year to 68 cents per hour in 3rd year.

Installer and linemen—apprentice 43 cents and 52½ cents; journeymen, 64 to 82 cents (3rd year); installation sub-foreman, 87 cents; cable splicers apprentices, 65 to 84 cents per hour; cable splicer helpers, 58½ cents; journeymen 95 cents, cable foreman, $1.05 per hour; foreman-branch office sub-foreman 1st 6 months $178 per month, $192 thereafter, P. B. X. and Exchange Const. sub-foreman $192, wire chief, $212.

First year apprentice only rated as such after 6 months' work in some branch of the trade. All apprentices to serve four years. Only one apprentice may be employed to every 3 journeymen.

Outside troublemen working in excess of 8 hours to be paid overtime rate.

Wages: Light and power electrical employees: Line construction and maintenance-foreman lineman, line inspector and repairman, 93 cents per hour; journeyman lineman, 85 cents; apprentices, 55 cents to 75 cents (4th year); groundman, 52 cents. Meter section: foreman, $172 per month; equipment mechanic, 89 cents per hour; test relief man, meter repairman and meter installer, 85 cents. Street light section: foreman, $172 per month; repair and patrolmen from $106 in the first year to $141 in 4th year; journeymen repair and patrolmen, $162; wiring inspector, $172; Power house electricians, 85 cents per hour; Power house operators sub-station, $148; relief operator, $154.

GENERAL PROVISIONS OF TRADE UNION AGREEMENTS

THE United States Bureau of Labour Statistics recently published Bulletin 448, entitled "Trade Agreements, 1926," being the third bulletin devoted entirely to the subject of collective agreements. The number of such agreements is not known, and according to the Bulletin "the majority of them are not reduced to writing, but are simply verbal understandings." The following paragraphs are taken from the introduction to the new publication:—

Wages.—Scarcely an agreement exists that does not state the wages to be paid, which are always considered as a minimum, however; the lowering of existing higher wages to the minimum rate is generally forbidden, but higher rates are permitted to be paid. Lower rates are authorized to be paid workers handicapped in some manner.

Wages are frequently stated by the hour in building and metal trade agreements, but by the week in agreements in most other occupations. Generally they are paid in cash weekly, but often at a stated hour on a specified day. Occasionally payment by check is allowed.

The giving of a bonus is frequently forbidden, as is also the adoption of a piecework system. When the latter prevails, prices are often settled by a committee consisting of representatives of the employers and employees.

Contractors who have been unable to meet the payroll in the past must furnish bond to meet it in the future. Security for the faithful performance by the employer of the terms of the agreement is occasionally demanded, but taking security from the employee is often prohibited.

Hours.—The hours of work are always stated in the agreement, which also frequently specifies the exact hour of beginning and of ending work and the period to be allowed for the noonday meal.

The 8-hour day is very generally observed. The 44-hour week is practically the rule in several trades, notably building, clothing, longshoremen, metal and stone, and to a certain extent in the printing trade.

There are several instances of a 9-hour day, or a 54-hour week, but the general tendency is in the direction of shortening the working hours. There are cases of a 46½-hour week, a 45-hour week, 7½-hour day, and a 42-hour week, while moving-picture operators rarely

work over 6½ hours per day. Sometimes 48 hours are worked in 5½ days, or 45 hours in 5 days. There are several instances of a 40-hour week worked in 5 days all the year round, or for part of the year. Where printers are obliged to work on holidays, 5 or 6 hours frequently constitute a day's work.

A week is almost invariably defined as six days. Sunday is usually observed as the weekly day of rest, though in continuous industries any day may be so observed. State holidays are frequently observed by unions as rest days.

As a rule men are not paid for a holiday when no work is performed, but the practice is becoming increasingly common, outside the building trades, to pay for holidays, or for some of them at least. Furthermore, vacations with pay are provided for in several agreements. The usual provision is for one week's vacation after one year of service, but the vacation period may be 10 days or two weeks.

Overtime.—Some unions charge the overtime rate of time and a half in all cases; others charge the overtime rate of double time always. Sometimes the provisions are time and a half for the first two or three hours of overtime and double time thereafter, or before 9 o'clock and after, or before midnight and after. Sometimes triple time is required for Sundays and holidays.

Overtime work is opposed by the unions and many provisions are made to reduce the amount of it. In some cases no overtime work is allowed until the union officials have been notified, and permission granted by a business agent, a joint arbitration board, a joint committee representating the union and the employer, or the officers of the union or the employers' association, such consent to be in writing in one agreement.

Overtime is permitted generally in case of emergency, to save life or property, when a shop has no vacant room for additional workers, or the union is unable to furnish the needed help. In other cases the amount of overtime is strictly limited.

In continuous operations and in trades where night work exists regularly or the employees work in shifts, overtime rates do not apply. Instead there is often a separate scale prepared for such cases, which calls for either a slight increase in wages over the day scale or a decrease in the number of hours worked per shift. There are instances where night work and Sunday work are expressly forbidden.

Arbitration.—Unions endeavour to settle grievances by conciliation if possible, resorting to arbitration only when conciliation fails. Grievances are handled in the first place by the employee affected and his foreman, and then by succeeding higher officials or committees of the union and of the employer. Frequently a grievance committee, known by various names, consisting of an equal number of employers and employees, is provided for, to adjust disputes which cannot be settled by the employer and employees, and if the committee is unable to agree it frequently has the right to add an extra man to its number.

Many agreements contain clauses in regard to arbitration. Generally an arbitration board consists of an equal number of representatives from each side with a chairman appointed by the other members of the board. The decision of the board is always final and binding on both sides.

Strikes and lockouts are frequently forbidden during the life of the agreement, especially when a grievance is being considered, unless ordered by the national organization or a general strike exists. The refusal of union men to work with non-union men, or on an unfair job or on non-union material, or on work destined for an unfair employer, or because the employer supplies work or goods to anyone whose employees are on strike or who is in arrears in payment of wages is not generally considered a breach of the agreement, though such stoppage does not generally occur when non-union men in other trades are working for the same employer on other jobs. Sympathetic strikes are allowed when ordered by the proper officials, but jurisdictional strikes are forbidden.

Apprenticeship.—Many agreements contain apprenticeship provisions. Under these an apprentice is articled to a certain employer, is registered with the union, serves a stated length of time, and is admitted as a journeyman on passing an examination given by a committee of the union, frequently in conjunction with a committee representing the employers. The apprenticeship period varies with the occupation. It is mostly 4 or 5 years, but often less.

Employers are limited as to the number of apprentices they may employ. The number varies from one apprentice for each three journeymen employed to one for each 15 journeymen. The wages of apprentices vary from year to year.

Employers are often given the right to maintain schools for the training of apprentices, and apprentices are frequently obliged to attend evening school. They are often forbidden to be employed upon the night force or to work overtime except with a journeyman

or in case of emergency. One agreement forbids the employment of apprentices.

Unemployment.—Outside of these five main provisions—union shop, wages, hours, arbitration, and apprenticeship—many matters appear in the various agreements, though not uniformly. An important one is that of unemployment. Various attempts have been made to tide over the slack seasons of work. The usual method has been to discharge the superfluous help and keep at work only as many as are needed, in which case the agreement generally provides that the older employees shall be retained and those with a shorter term of service shall be discharged first, and when the force is again increased the men are to be taken back according to their seniority and upon resumption of work former employees shall be engaged before new ones. Another method is to distribute the work as equally as possible or to lay off the men in rotation or to shorten the length of the working-day. A third is a system of unemployment insurance, which is perhaps more thoroughly worked out in the clothing industries than in others.

BUILDING PERMITS ISSUED IN CANADA IN AUGUST, 1927

THERE was an increase of $13,140,877 or 79.6 per cent in the value of the building permits issued during August, 1927, as compared with the preceding month, while the total, which was 154.0 per cent higher than in August, 1926, was also greater than in the same month of any other year since the record for the 63 cities was commenced in 1920. The cities co-operating in the survey granted authority for building estimated at $29,651,888 during the month under review, as compared with $16,511,011 in July, 1927, and $11,672,599 in August last year. The pronounced gains this August were due to an unusually large total in Montreal, where one permit alone accounted for $12,000,000 of the aggregate; in fact, the August total considerably exceeded that of any other month of the 18 years for which records for Montreal are available.

Some 50 cities furnished detailed statistics, showing that they had issued nearly 1,100 permits for dwellings estimated to cost approximately $4,000,000 and over 2,500 permits for other buildings valued at almost $19,500,000. During July, authority was granted for the erection of about 1,500 dwellings and 2,200 other buildings estimated at approximately $6,000,000 and $7,000,000, respectively.

Quebec reported the especially noteworthy gain of $16,840,677 as compared with July 1927, but there were also advances in Alberta and British Columbia. Of the reductions elsewhere registered, those in Ontario of $3,091,080 or 34.3 per cent were most marked.

Nova Scotia, Quebec, Ontario, Manitoba and Alberta reported higher aggregates of building permits than in August last year, Quebec showing the largest increase of $17,684,709. Saskatchewan registered the greatest decline, of $966,722 or 47·1 per cent.

Of the larger cities, Montreal, Toronto and Vancouver showed improvement as compared with both July, 1927, and August, 1926, while in Winnipeg there was a decrease as compared with the preceding month, but an increase over the corresponding month of 1926. As already stated, the August, 1927, aggregate for Montreal was the highest reported for any month since the record for this city was commenced in 1910. Of the remaining centres, Three Rivers, Chatham, Guelph, Hamilton, Kingston, Kitchener, Ottawa, St. Thomas, Brandon, St. Boniface, Moose Jaw, Edmonton, Lethbridge, Medicine Hat, Kamloops, Nanaimo, New Westminster, North and South Vancouver recorded gains in both comparisons.

Cumulative Record for First Eight Months, 1927.—The following table gives the value of the building authorized by 63 cities during August and in the first eight months of each year since 1920. The average index number of wholesale prices of building materials in the first eight months of the years since 1920 are also given (1913=100).

Year	Value of permits issued		Average indexes of Wholesale prices of building materials in first eight months
	In August	In first eight months	
	$	$	
1927	19,651,888	127,609,318	147·4
1926	11,672,599	109,211,942	150·0
1925	9,511,008	88,223,328	154·0
1924	9,406,733	81,762,083	162·6
1923	11,425,031	97,551,074	166·8
1922	18,158,932	105,181,416	161·8
1921	10,928,039	77,665,614	192·1
1920	10,805,846	86,303,601	214·6

The aggregate for the first eight months of this year was 16·8 per cent greater than in 1926, the previous high level of the record, while the average index numbers of wholesale prices of building materials continued to be lower than in any other year since 1920.

The accompanying table gives the value of the building permits issued by 63 cities during July and August, 1927, and August, 1926. The 35 cities for which records are available since 1910 are marked with asterisks.

Manufacturers' Program for Child Legislation in U.S.A.

The Board of Directors of the National Association of Manufacturers (United States) have approved the following principles for future legislation for the protection of children between 14 and 15 years of age. The program was prepared by the Junior Education and Employment Committee of the Association:

(*a*) An employment certificate issued under state authority for each job applied for under a different employer.

(*b*) A physical examination by physicians designated by the State, and a certificate that the individual is physically fit to enter the employment applied for.

(*c*) The completion of the sixth grade, after allowing two years for adjustment after the passage of the statute in states not already having an educational qualification, with proper provision for vacation permits.

(*d*) The requirement of a minimum of four hours a week of continued education, either in continuation schools or under shop plans approved by properly constituted state authority which should have the power to release individuals incapable of further education or to excuse any child until proper continuation schools have been established.

(*e*) The limiting of the hours of labour of all children under sixteen years, employed in manufacturing, mining, transportation or commercial occupations, of not to exceed forty-eight hours per week, with a prohibition of night work before 7 a.m. or after 9 p.m.

(*f*) The strengthening of laws forbidding the employment of children in hazardous occupations by more carefully defining the specific hazards.

WELLAND SHIP CANAL CONSTRUCTION

Amended Wage Rates Sanctioned by Minister of Labour for Certain Classes of Workmen

SOME weeks ago representatives of the various contracting companies engaged in the construction of the Welland Ship Canal assembled in Ottawa at the invitation of the Honourable Peter Heenan, Minister of Labour, to meet representatives of certain classes of the workmen employed on this work, for the purpose of adjusting, if possible, by a joint agreement, certain wages questions which had arisen previously, following the course which had been adopted in the spring of 1923. At this meeting an indication was given of wage increases which were desired by certain classes of employees, and it was agreed that a statement should be furnished to the contractors showing the grounds on which these proposals were made. A second meeting was held subsequently between the contractors and the labour representatives in the Department of Labour at the invitation of the Minister of Labour, but without any definite agreement being reached. During the summer the Departmental Fair Wages Officer, who has had to do with wages matters on the Welland Ship Canal since the inception of the work, made an inquiry into the existing wages situation in the district. The Minister of Labour also visited the Canal personally and had the opportunity of meeting a number of those concerned.

In view of the dispute which had arisen as to the labour conditions observable on the work as evidenced by the proposals submitted by the employees' representatives and their rejection by the contractors, and after very careful consideration, the Minister of Labour notified the various contractors on September 13, 1927, of certain changes in the existing schedule of wages rates which had been approved by him under the authority of the fair wages clauses of the several contracts. The wages changes in question which have been approved by the Minister were made effective from August 1, 1927, and are shown in the table following, together with the rates which have been in force heretofore for the respective classes of service involved.

Trade or class of labour	Rates of wages not less than:	
	Cents per hour effective Aug. 1, 1927	Cents per hour 1925
Carpenters	·85	·80
Machinists	·70	·65
Steam Shovel Engineers	1·00	·92
Steam Shovel Cranemen	·80	·73
Steam Shovel Firemen	·65	·55
Steam Hoist and Derrick Engineers	·75	·70
Locomotive Crane Operators	·80	·75

Notices have since been posted by the Fair Wages Officer on the various sections of the Welland Ship Canal containing the above mentioned amended rates of wages.

The contracts for the construction of the several sections of the Welland Ship Canal contain fair wages clauses requiring the payment to workmen of the current rates of wages in the district and adherence to the current hours, or if no current rates and hours exist in the district for any trade, then fair and reasonable rates of wages and hours. Schedules have been approved by the Minister of Labour from time to time setting out the wages rates and hours of labour which were observable on the canal construction under the authority of the terms of contract. The last of these schedules was sanctioned in April, 1925, covering practically all classes of workers employed on the Canal.

FAIR WAGES CONDITIONS IN DOMINION GOVERNMENT CONTRACTS

THE Department has recently received information regarding certain contracts executed by the Government of Canada which included among their provisions the fair wages conditions sanctioned by Order in Council for the protection of the labour to be employed. The contracts (Group "A") awarded in connection with the works of construction contained the following fair wages clause:—

1. All mechanics, labourers, or other persons who perform labour in the construction of the work hereby contracted for, shall be paid such wages as are generally accepted as current from time to time during the continuance of the contract for competent workmen in the district in which the work is being performed for the character or class of work in which they are respectively engaged, and if there be no current rates in such district, then fair and reasonable rates, and shall work such hours as are customary in the trade, in the district where the work is carried on, or if there be no custom of the trade as respects hours in the district, then fair and reasonable hours, unless for the protection of life and property, or for other cause shown to the satisfaction of the Minister of Labour, longer hours of service are required. The Minister of Labour may at any

time and from time to time determine for the purposes of this contract, what are the current or fair and reasonable rates of wages and the current or fair and reasonable hours, and may from time to time rescind, revoke, amend, or vary any such decision, provided that his determination and any amendment or variation shall not be operative prior to the period of three months immediately preceding the date thereof.

Two of the contracts above mentioned contained schedules of rates and hours based on the current standards of the district in these respects. The schedules are given below.

Two contracts were awarded for interior fittings (Group "B") containing the general fair wages clause, and other conditions for the protection of the labour employed, as sanctioned by the Fair Wage Order in Council which reads as follows:—

All workmen, labourers, or other persons who perform labour in the construction of the work hereby contracted for, shall be paid such wages as are generally accepted as current from time to time during the continuance of the contract for competent workmen in the district in which the work is being performed, and if there be no current rate in such district, then a fair and reasonable rate, and shall work such hours as those fixed by the custom of the trade as respects hours in the district where the work is carried on, or if there be no custom of the trade as respects hours in the district then fair and reasonable hours, except for the protection of life and property, or on due cause shown to the satisfaction of the Minister of Labour. In the event of a dispute arising as to what is the current or a fair and reasonable rate of wages or what are the current hours fixed by the custom of the trade or fair and reasonable hours it shall be determined by the Minister of Labour, whose decision shall be final; payment may also be withheld of any moneys which would otherwise be payable to the contractor until the Minister of Labour's decision has been complied with.

By the term "current wages" and the term "hours of labour fixed by the custom of the trade" in the foregoing are meant respectively the standard rates of wages and hours of labour either recognized by signed agreements between employers and workmen in the district from which the labour required is necessarily drawn or actually prevailing, although not necessarily recognized by signed agreements.

A statement was also received as to supplies ordered by the Post Office Department subject to the regulations for the suppressing of the sweating system and the securing of fair wages, etc.

The general labour conditions sanctioned by the Fair Wages Order in Council are as follows:—

Where there are special circumstances which in the judgment of the Minister of Labour make it expedient that he should do so, he may, in the manner and subject to the provisions hereinabove set forth, decide what are the current or fair and reasonable rates of wages for overtime, and what is the proper classification of any work for the purposes of wages and hours. Immediately upon receipt of notice of any decision of the Minister of Labour hereunder the Contractor shall adjust the wages and hours and classification of work so as to give effect to such decision. In case the Contractor shall fail so to do, or to pay to any employee or employees for any services performed or for any hours of labour, wages according to the rates fixed therefor by the Minister of Labour, the Minister of Labour may authorize and direct the Minister to pay any such wages at the rates so fixed and to deduct the amount thereof from any moneys owing by the Government to the Contractor and any such payment shall for all purposes as between the Contractor and the Government be deemed and taken to be payment to the Contractor, and the Contractor shall be bound in every particular by any such authority, direction and payment as aforesaid. The powers of the Minister of Labour hereunder shall not be exercised as to any employee or employees where it is established to his satisfaction that an agreement in writing exists and is in effect between the Contractor and the class of employees to which such employee or employees belong or the authorized representatives of such class of employees fixing rates of wages, overtime conditions and hours of labour.

2. The Contractor shall post and keep posted in a conspicuous place on the premises where the contract is being executed, occupied or frequented by the workmen, the Fair Wages Clause or Schedule inserted in his contract for the protection of the workmen employed, also any decision of the Minister of Labour under the preceding paragraph.

3. The Contractor shall keep proper books and records showing the names, trades, and addresses of all workmen in his employ and the wages paid to and time worked by such workmen, and the books or documents containing such record shall be open for inspection by the Fair Wage Officers of the Government at any time it may be expedient to the Minister of Labour to have the same inspected.

4. The Contractor shall not be entitled to payment of any money which would otherwise be payable under the terms of the contract in respect of work and labour performed in the execution of the contract unless and until he shall have filed with the Minister in support of his claim for payment a statement attested by statutory declaration, showing (1) the rates of wages and hours of labour of the various classes of workmen employed in the execution of the contract; (2) whether any wages in respect of the said work and labour remain in arrears; (3) that all the labour conditions of the contract have been duly complied with; nor, in the event of notice from the Minister of Labour of claims for wages, until the same are adjusted. The Contractor shall also from time to time furnish the Minister such further detailed information and evidence as the Minister may deem necessary in order to satisfy him that the conditions herein contained to secure the payment of fair wages have been complied with, and that the workmen so employed as aforesaid upon the portion of the work in respect of which payment is demanded have been paid in full.

5. In the event of default being made in payment of any money owing in respect of wages of any workmen employed on the said work and if a claim therefor is filed in the

office of the Minister and proof thereof satisfactory to the Minister is furnished, the said Minister may pay such claim out of the moneys at any time payable by His Majesty under said contract and the amounts so paid shall be deemed payments to the Contractor.

6. These conditions shall extend and apply to moneys payable for the use or hire of horses or teams, and the persons entitled to payments for the use or hire of horses or teams shall have the like rights in respect of moneys so owing them as if such moneys were payable to them in respect of wages.

7. With a view to the avoidance of any abuses which might arise from the sub-letting of contracts it shall be understood that sub-letting, other than such as may be customary in the trades concerned, is prohibited, unless the approval of the Minister is obtained; sub-contractors shall be bound in all cases to conform to the conditions of the main contract, and the main contractor shall be held responsible for strict adherence to all contract conditions on the part of sub-contractor; the contract shall not, nor shall any portion thereof be transferred without the written permission of the Minister; no portion of the work to be performed shall be done at the homes of the workmen.

8. All workmen employed upon the work comprehended in and to be executed pursuant to the said contract shall be residents of Canada, unless the Minister is of opinion that Canadian Labour is not available or that other special circumstances exist which render it contrary to the public interest to enforce this provision.

Department of Public Works

Contracts in Group "A" (Construction, etc.)

Laying of concrete sidewalks, Parliament Hill, Ottawa, Ont. Name of contractors, Grant Brothers Construction Company, Limited, Ottawa, Ont. Date of contract, September 2, 1927. Amount of contract, $9,500.

Trade and Class of Labour	Rates of wages not less than	Hours per week

Deepening areas at the wharf on both sides of the head block at Rivière du Loup, P.Q. Name of contractors, National Dock and Dredging Corporation, Limited of Quebec, P.Q. Date of contract, August 31, 1927. Amount of contract, approximate expenditure, $10,205.

Drilling and blasting at Amherst Harbour, Magdalen Islands, P.Q. Name of contractors, The Halifax Dredging Company Limited, Halifax, N.S. Date of contract, September 1, 1927. Amount of contract, approximate expenditure, $16,950.

Removal of shoal at Wilson Channel, Algoma West, Ont. Names of contractors, A. B. McLean, R. A. McLean, John McLean, firm "A. B. McLean and Sons" of Sault Ste. Marie, Ont. Date of contract, August 25, 1927. Amount of contract, approximate expenditure, $2,700.

Deepening the channel approach to Government wharf at Sault Ste. Marie, Ont. Names of contractors, A. B. McLean, R. A. McLean, John McLean, firm "A. B. McLean and Sons" of Sault Ste. Marie, Ont. Date of contract, August 25, 1927. Amount of contract, approximate expenditure, $16,800.

Dredging areas 2 and 3 at Sault Ste. Marie, Ont. Name of contractors, The Soo Dredging and Construction Company, Limited, Sault Ste. Marie, Ont. Date of contract, August 29, 1927. Amount of contract, approximate expenditure, $136,000.

Dredging channel and slip at elevator at Sarnia, Ont. Name of contractors, National Dock and Dredging Corporation, Limited, Quebec, P.Q. Date of contract, September 23, 1927. Amount of contract, approximate expenditure, $115,805.

Reconstruction of the wharf at Ste. Anne de Beaupré, P.Q. Names of contractors, E. Cloutier and P. Gaudreau of Trois-Saumons, P.Q. Date of contract, August 23, 1927. Amount of contract, unit prices, approximate expenditure, $13,176.

Construction of an extension to the breakwater at St. Simeon (Rivière Noire) Charlevoix County, P.Q. Names of contractors, J. Beaumont and Philippe Têtu, Montmagny, P.Q. Date of contract, August 29, 1927. Amount of contract, approximate expenditure, $2,590.50.

Construction of a Public Building at Durham, Ont. Name of contractors, Britnell Contracting Company, Limited, Toronto, Ont. Date of contract, August 25, 1927. Amount of contract, $17,401.

Construction of a breakwater at Green Point, Gloucester County, N.B. Name of contractors, The E. F. Powers Construction Company, Fredericton, N.B. Date of contract, August 31, 1927. Amount of contract, unit prices, approximate expenditure, $39,969.

Construction of a new roofing for the Armoury at Prince Albert, Sask. Name of contractor, Wm. George, West Prince Albert, Sask. Date of contract, September 1, 1927. Amount of contract, $4,200.

Alterations and additions to the heating plant at Fort Osborne Barracks, Winnipeg, Man. Name of contractors, The James Ballantyne Company, Limited, Winnipeg, Man. Date of contract, September 6, 1927. Amount of contract, $35,397.

Repairs to landing wharf, at Father Point, P.Q. Names of contractors, E. Cloutier and P. Gaudreau, Trois Saumons, P.Q. Date of contract, September 13, 1927. Amount of contract, unit prices, approximate expenditure, $7,669.80.

Extension to Breakwater at Escuminac, N.B. Names of contractors, K. McLaggan and John R. Young, North Devon, N.B. Date of contract, September 6, 1927. Amount of contract, unit prices, approximate expenditure, $47,252.

Extension to breakwater at Point Sapin, N.B. Names of contractors, Kenneth McLaggan and John R. Young, North Devon, N.B. Date of contract, September 10, 1927. Amount of contract, unit prices, approximate expenditure, $9,100.

Repair of the outer portion of the breakwater, Rustico Harbour, P.E.I. Name of contractor, Andrew Martin, Bloomfield, P.E.I. Date of contract, September 8, 1927. Amount of contract, unit prices, approximate expenditure, $21,584.

Erection of a public building at Baie St. Paul, P.Q. Name of contractor, Joseph Dorval, Lauzon, P.Q. Date of contract, September 12, 1927. Amount of contract, $16,300.

Exterior painting of the Military Building at Ste. Anne de Bellevue, P.Q. Name of contractors, Johnson and Lamarre Limited, Montreal, P.Q. Date of contract, September 15, 1927. Amount of contract, $4,611.

Rebuilding of part of south breakwater at Scott's Bay, Kings County, N.S. Name of contractor, Halle B. Bigelow, Canning, N.S. Date of contract, September 26, 1927. Amount of contract, unit prices, approximate expenditure, $9,045.

Construction of a breakwater at Hopetown West, (Millar and Mann Road) Bonaventure County, P.Q. Names of contractors, Arthur Nadeau and J. Edgar Nadeau, St. Godfroi, P.Q. Date of contract, September 24, 1927. Amount of contract, unit prices, approximate expenditure, $5,942.16.

Construction of a passenger elevator—Champlain Dry Dock, Quebec Harbour, P.Q. Name of contractors, Turnbull Elevator Company, Limited, Toronto, Ont. Date of contract, September 22, 1927. Amount of contract, $4,517.

Repairs to harbour works, Saugeen River, Ont. Name of contractor, R. M. Hunter, Kincardine, Ont. Date of contract, September 13, 1927. Amount of contract, $31,320.10.

Construction of a breakwater at Ruisseau Leblanc, P.Q. Name of contractor, Arthur Nadeau, Chandler, P.Q. Date of contract, September 14, 1927. Amount of contract, unit prices, approximate expenditure, $12,315.81.

Reconstruction of portion of wharf and construction of an extension to wharf at Mechins, Matane County, P.Q. Names of contractors, E. Cloutier and P. Gaudreau, Trois-Saumons, P.Q. Date of contract, September 10, 1927. Amount of contract, unit prices, approximate expenditure, $36,378.60.

Protection of cribwork at Grindstone, Magdalen Islands, P.Q. Name of contractor, Ludger Lemieux, Limitée, Ste. Marie de la Beauce, P.Q. Date of contract, September 13, 1927. Amount of contract, unit prices, approximate expenditure, $33,917.40.

Erection of a wharf at Colonie des Grèves, Verchères County, P.Q. Name of contractor, François de Sales Gervais, Contrecœur, P.Q. Date of contract, September 21, 1927. Amount of contract, unit prices, approximate expenditure, $7,210.

Extension to the public wharf at Meteghan, N.S. Names of contractors, S. F. Comeau, Eddie Gaudet and J. W. Comeau, Comeauville, N.S. Date of contract, September 14, 1927. Amount of contract, unit prices, approximate expenditure, $6,562.86.

Extension to wharf at Petite Vallée, Gaspé County, P.Q. Name of contractors, Ludger Lemieux, Limitée, Ste. Marie de la Beauce, P.Q. Date of contract, September 16, 1927. Amount of contract, unit prices, approximate expenditure, $7,151.04.

Contract in Group "B" (Interior Fittings).

Construction of new offices in the Supreme Court Building, Ottawa, Ont. Name of contractor, Thomas Charles James, Ottawa, Ont. Date of contract, September 19, 1927. Amount of contract, $2,550.

Department of Railways and Canals

Contracts in Group "A" (Construction, etc.)

Manufacture, delivery and erection of the superstructure of Bridge No. 20 over the Welland Ship Canal at Port Colborne, Ont., on the line of the Canadian National Railways' Buffalo to Goderich Division. Name of contractors, The Hamilton Bridge Works Company, Limited, Hamilton, Ont. Date of contract, September 3, 1927. Amount of contract, schedule rates, approximately $368,251.

Erection of a station building at Springhill Junction. Name of contractors, Rhodes, Curry Company, Limited, Amherst, N.S. Date of contract, September 20, 1927. Amount of contract, $13,660.

Erection of a Customs Examination and Waiting Room Building at the Halifax Ocean Terminals, city of Halifax, N.S. Name of contractors, Standard Construction Company, Limited. Date of contract, September 20, 1927. Amount of contract, $139,660.

Contract in Group "B" (Interior Fittings)

Supply and installation of a complete plumbing and heating system in Transit Shed No. 21 Halifax Ocean Terminals, City of Halifax, N.S. Name of contractors, W. E. Emerson and Sons, Limited, St. John, N.B. Date of contract, September 8, 1927. Amount of contract, $37,499.

Department of Indian Affairs

Contracts in Group "A" (Construction, etc.)

St. Phillip's Indian Residential School, near Kamsack, Sask. Name of contractors, Wyndels Construction Company, St. Boniface, Man. Date of contract, July 19, 1927. Amount of contract, $50,630.

Onion Lake Indian Residential School, Onion Lake, Sask. Names of contractors, Brown and Hudson, Winnipeg, Man. Date of contract, June 1, 1927. Amount of contract, $79,891.

Lytton Indian Residential School, Lytton, B.C. Name of contractors, Adkison and Dill, Vancouver, B.C. Date of contract, July 8, 1927. Amount of contract, $139,000.

Central School, Caughnawaga, P.Q. Name of contractors, MacKenzie and Genest, Ottawa, Ont. Date of contract, July 9, 1927. Amount of contract, $44,847.

Post Office Department

The following is a statement of payments made in August, 1927, for supplies ordered by the Post Office Department, under contracts which are subject to the Fair Wages policy:—

Nature of Orders	Amount of orders
	$ cts.
Making metal dating stamps and type, also other hand stamps and brass crown seals	764 22
Making and repairing rubber stamps, daters, etc.	219 36
Making up and supplying Letter Carriers' uniforms, etc.	1,969 10
Stamping pads, ink, etc.	177 50
Bag fittings	6,369 95
Scales	847 80
Mail bagging	65,228 61
Letter boxes	452 60

Among the amendments made in the Alberta Mines Act at the last session of the provincial legislature (Labour Gazette, July, 1927, page 723) was one providing that "from and after September 30, 1927, no person shall work at the working face in any mine unless he is the holder of a certificate of competency as a coal miner." To obtain such a certificate miners are required to pass mine tests, and considerable difficulty was experienced in examining all the miners and furnishing them with certificates before the date mentioned in the act. The operators therefore appointed a committee to interview the premier with a view to having the working of the act temporarily suspended in order to enable them to keep the mines open until the examinations could be concluded.

PRICES, RETAIL AND WHOLESALE, IN CANADA, SEPTEMBER, 1927

Cost of Living, Prices of Staple Articles and Index Numbers

PRICES moved to somewhat lower levels during the month, both the weekly family budget in terms of retail prices and the Dominion Bureau of Statistics index number of wholesale prices being slightly lower than in August.

In retail prices the cost per week of a list of twenty-nine staple foods for an average family of five in terms of the average retail prices in some sixty cities was $10.87 at the beginning of September, as compared with $10.93 for August; $10.94 for September, 1926; $10.81 for September, 1925; $10.28 for September, 1924; $10.46 for September, 1923; $10.28 for September, 1922; $11.82 for September, 1921; $15.95 for September, 1920; $16.92 for June, 1920 (the peak); $13.31 for September, 1918; and $7.83 for September, 1914. The decline was due mainly to a substantial fall in the price of potatoes. The prices of beef, mutton, salt pork, beans, evaporated apples, prunes and tea were also somewhat lower, while substantial seasonal advances occurred in the prices of eggs and butter, with less important advances in the prices of milk, cheese, veal and fresh pork. Including the cost of fuel and rent with that of foods the total budget averaged $21.05 at the beginning of September, as compared with $21.11 for August; $21.15 for September, 1926; $21.02 for September, 1925; $20.65 for September, 1924; $20.97 for September, 1923; $20.90 for September, 1922; $22.37 for September, 1921; $26.38 for September, 1920; $26.92 for July, 1920 (the peak); $21.11 for September, 1918; and $14.33 for September, 1914. Fuel was slightly higher, due to an increase in the price of anthracite coal. No changes were reported in rent.

In wholesale prices the index number calculated by the Dominion Bureau of Statistics, based upon the average prices of 236 commodities in 1913 as 100, and weighted according to the commercial importance of the commodities, declined to 151.0 for September, as compared with 152.3 for August; 152.5 for September, 1926; 156.2 for September, 1925; 153.9 for September, 1924; 154.6 for September, 1923; 147.5 for September, 1922; 161.7 for September, 1921; 245.5 for September, 1920; 256.7 for May 1920 (the peak); 213.7 for September, 1919; and 205.0 for September, 1918. Forty-two prices quotations declined, fifty-three advanced, while one hundred and forty-one were unchanged.

In the grouping according to chief component materials three of the eight main groups declined, three advanced and two were unchanged. The Vegetables and their Products group was substantially lower, due mainly to lower prices for grains, flour, potatoes rubber, hay and straw. The Non-Ferrous Metals group was slightly lower, increases in the prices of silver and of zinc sheets being more than offset by declines in the prices of copper, lead, tin and spelter. The Chemicals and Allied Products group was also slightly lower. The Animals and their Products group and the Fibres, Textiles and Textile Products group were both considerably higher, the former due mainly to advances in the prices of milk, butter, cheese, eggs, hides, leather, boots and shoes; and the latter due mainly to increases in the prices of cotton, gingham, cotton bags, sash cord and hessian. The Non-Metallic Minerals group advanced slightly due to an increase in the price of anthracite coal. The Wood, Wood Products and Paper group and the Iron and its Products group were unchanged.

In the grouping according to purpose consumers' goods advanced, increases in the prices of milk, butter, cheese, eggs, pork, coal and boots more than offset the declines in the prices of flour and potatoes. Producers' goods declined, due to lower prices for materials for the milling industry, for the meat packing industries, for the chemical using industries, for the metal working industries, as well as miscellaneous producers' materials. Materials for the textile and clothing industries and for the leather industry advanced, as did also producers' equipment.

In the grouping according to origin raw or partly manufactured goods declined, lower levels for grains, potatoes, live stock, rubber, hay, straw, jute, copper, lead, tin and spelter more than counter-balancing advances in the prices of milk, eggs, raw sugar, cotton, hides, pork, coal and silver. Fully or chiefly manufactured goods were unchanged. In this group the most important increases occurred in the prices of butter, cheese, leather, boots and cotton manufactures, while the most important declines were in flour, turpentine and non-ferrous metal products. Domestic farm products declined; articles of marine origin and of mineral origin advanced; while articles of forest origin were unchanged.

‡The budget is intended to show the changes in the cost of the items included, not to show the minimum cost for an average family. See Text. †December only. §Kind most sold. *For electric light see text.
‡‡An allowance for the cost of clothing and sundries would increase the figures by about 50 per cent; see text.

EXPLANATORY NOTE AS TO WHOLESALE PRICES

The index number calculated by the Dominion Bureau of Statistics is based upon the prices of 236 commodities, price levels in 1913 being taken as the base, that is equal to 100, the figures being weighted according to the commercial and industrial importance of each article included. The index number has been calculated by years back to 1890, being unweighted, however, for the period of 1890 to 1913 and has been calculated by months from 1919 to date for all groupings and from 1913 to date for the principal grouping. Summary tables of the Bureau's index number may be found in the supplement to the LABOUR GAZETTE for January, 1925, January, 1926, and in greater detail in the Report on "Prices and Price

INDEX NUMBERS OF WHOLESALE PRICES (WEIGHTED) CALCULATED BY THE DOMINION BUREAU OF STATISTICS (Average Prices 1913=100)

Indexes 1913-24," issued by the Bureau. A description of the methods used in the construction of the index number appears in the Labour Gazette for June, 1923.

The accompanying table gives the index numbers of the Dominion Bureau of Statistics by the principal groups in the three methods of classification and with those of the classification according to purpose or use in detail for the current month and for certain preceding dates.

EXPLANATORY NOTES AS TO RETAIL PRICES

The table of retail prices and rentals shows the prices at the beginning of September of seventy-one staple foodstuffs, groceries, coal, wood and coal oil and the rent for six-roomed houses in some sixty cities throughout Canada. All prices are for delivered goods. The exact quality, for which the quotation is given is set forth in the case of each commodity, and every effort has been made to ensure that the quotations in each case refer to the same class of commodity in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The prices of foods and groceries in each city, except milk and bread, are the averages of quotations reported to the Department and to the Dominion Bureau of Statistics by a number of representative butchers and grocers in each. The prices of fuel and the rates for rent are reported by the correspondents of the Labour Gazette.

Statistics similar to these were published each month from 1910 to 1920, the figures during this period being secured at the middle of each month by the correspondents of the Labour Gazette resident in each locality from dealers doing a considerable business with workingmen's households. From 1910 to 1915 the table contained a list of only the twenty-nine foods included in the family budget, with laundry starch, coal, wood, coal oil and rent. In 1915 when monthly publication of the budget in the Labour Gazette was begun, it was decided to extend the list of foods to 40, and in 1920 the list of foods and groceries was still further extended to include over 100 items.

Beginning with October, 1922, a number of commodities were dropped from the list, and in the case of a number of articles the average prices of the grades most sold have been given, owing to the impossibility of securing prices for uniform grades for the various cities from month to month.

Oleomargarine was dropped in March, 1924, the provision for its manufacture and sale since 1917, notwithstanding the Dairy Act, expired at the end of February, 1924.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workingmen. The first class is of houses in good condition, favourably located in such districts with good modern conveniences. The second class is of houses in fair condition less desirably located, but still fairly central, without modern conveniences.

The weekly budget of a family of five, calculated in terms of the average prices in the cities for which reports are received, includes twenty-nine staple foods, laundry starch, coal, wood, coal oil, and rent, these being the items for which statistics have been obtained each month and published in the Labour Gazette since January, 1910. The quantities of each commodity included are modifications of those employed in similar calculations by various authorities. For some articles comparatively large quantities are included owing to the absence of other important items of the same class. For instance, the only fruits are evaporated apples and prunes, and the only fresh vegetable is potatoes. But as market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportions of expenditure on the various classes of foods tends to be maintained. At times when the price of an article heavily weighted for this purpose rises, or falls (abnormally) the increase (or decrease) in food prices so indicated is exaggerated, and this should be taken into account in using the budget as an indicator of changes in the cost of living. In fuel and lighting the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the differences in the heating value of the various fuels. It was estimated, when the budget was first published in 1912 in the report on wholesale prices in Canada for 1911, that these calculations represented from sixty to eighty per cent of the expenditures of an ordinary family, according to the total income. For the average family of five the expenditure on these items of food, fuel, light and rent would be perhaps two-thirds or about sixty-five per cent of the total income.

While the budget serves to show the increase or decrease from time to time in the cost of the items included, it does not purport to show the minimum cost of food and fuel supplies for an average family in the Dominion or in any one province. The quantities of meats, dairy products, cereals, etc., included were adopted as affording a liberal supply for the healthy family of a man at hard physical work. On the other hand an average family with an income sufficient to do so would buy less meat, etc., but more fruit, fresh and canned vegetables, etc., so that comparative expenditure would be little changed.

Index Number of Changes in the Cost of Living

In March, 1921, the Department published in the Labour Gazette a table of percentages of changes in the cost of living since 1913 as a tentative cost of living index number, using the figures of the above mentioned budget for the calculation for food, fuel and rent, with preliminary figures for clothing and sundries added and this table has been brought down to date at intervals since. The calculation of a comprehensive cost of living index number covering all items of working men's family expenditure in progress since 1918 has been sufficiently advanced to enable the publication of preliminary figures by groups in a supplement to the Labour Gazette for January on Prices in Canada and in Other Countries, page 9. This table gives figures for June and December each year from 1914 to 1926, inclusive. Figures are now available also for

March and September each year since 1917 and the accompanying table gives figures for December each year from 1914 to 1917, quarterly figures 1918 to 1926, and monthly figures for 1927. As stated in the above mentioned supplement the figures in the food group in the family budget are still used to show the changes in food prices but in the other groups the percentage changes in the prices of each article have been weighted according to workingmen's average family consumption, and in the fuel and light group, gas and electricity have been included.

CHANGES IN THE COST OF LIVING IN CANADA FROM 1913 TO 1927*

*The figures for "all items" were calculated by giving the following weights to each group: Food 35%; Fuel 8%; Rent 18¼%; Clothing 18¼%; Sundries 20%.

Cost of Electric Current and Gas for Householders

With rates in 1913 as 100, index numbers of electric light rates were 1900, 141.4; 1905, 135.6; 1910, 118.1; 1911, 113.4; 1912, 109.1; 1913, 100.0; 1914, 96.5; 1915, 90.8; 1916, 87.6; 1917, 87.2; 1918, 85.8; 1919, 85.8; 1920, 84.2; 1921, 84.9; 1922, 82.7; 1923, 79.5; 1924, 79.2; 1925, 75.6; 1926, 75.6.

The above figures were arrived at by converting to the base of 1913 as 100, an index number of electric current costs from 1900 to 1913 constructed for the Board of Inquiry into the cost of living in Canada, 1914-15 (Report, Vol. 2, page 318) and bringing the figures down to 1926. The figures are unweighted. The Dominion Bureau of Statistics has recently issued an index number of electric current rates for household consumption as follows: 1923, 73.8; 1924, 72.2; 1925, 69.9; 1926, 68.7. This index number is weighted according to consumption in each city. When the above index number, 1900-1926, is weighted according to population in each city covered for the years 1923, 1924, 1925 and 1926, the figures are substantially the same as those recently issued by the Bureau.

The following are index numbers of rates for manufactured and natural gas for the years 1913 to 1926 issued by the Dominion Bureau of Statistics (revised, Prices and Price Indexes, 1913-1926): Manufactured gas, 1913, 100; 1914, 98.3; 1915, 98.1; 1916, 96.3; 1917, 100.7; 1918, 107.4 1919, 111.1 1920, 125.4; 1921, 143.6; 1922, 140.6; 1923, 135.7; 1924, 134.6; 1925, 131.6; 1926, 131.1. Natural gas, 1913, 100; 1914, 109.6; 1915, 112.8; 1916, 112.8; 1917, 113.6; 1918, 114.2; 1919, 116.2; 1920, 123.8; 1921, 143.0; 1922, 163.1; 1923, 162.9; 1924, 162.6; 1925, 178.7; 1926, 172.2. For the years 1900 to 1913 two index numbers of gas costs calculated for the Cost of Living Inquiry in 1914-1915, have been averaged and converted to the base of 1913 as 100, as follows: 1900, 125.8; 1901, 125.8; 1902, 125.8; 1903, 125.2; 1904, 123.9; 1905, 120.1 1906, 107.5; 1907, 108.8; 1908, 106.9; 1909, 105.7; 1910, 103.8; 1911, 99.4; 1912, 100.6; 1913, 100.0.

Retail Prices

The downward movement in beef prices continued, sirloin steak averaging 31.7 cents per pound in September, as compared with 32.4 cents in August; round steak 26 cents per pound in September and 26.8 cents in August; rib roast 23.9 cents per pound in September and 24.4 cents in August; and shoulder roast 17.4 cents per pound in September and 17.9 cents in August. The declines were more pronounced in the western provinces. Veal advanced in the average from 20.2 cents per

pound in August to 20.6 cents in September. Prices in most localities in the western provinces were lower, but these declines were more than offset by advances in Ontario, Quebec and New Brunswick. Mutton was down in the average from 29.8 cents per pound in August to 28.8 cents in September. Fresh pork was slightly higher at 28.4 cents per pound. Bacon and ham showed little change. In fresh fish cod steak declined, while halibut and white fish advanced slightly. Salt cod and finnan haddie were slightly higher. Lard was up in the average from 21.5 cents per pound in August to 21.8 cents in September.

Eggs were substantially higher, fresh averaging 46.3 cents per dozen in September, 40.3 cents in August and 37.8 cents in July; and cooking averaging 42.2 cents per dozen in September, 36.7 cents in August and 34.3 cents in July. Increases were reported from all localities. Higher prices for milk were reported from Oshawa, Toronto, Hamilton, Windsor and Sudbury. A general increase occurred in the price of butter, dairy averaging 39.3 cents per pound in September, as compared with 37.4 cents in August, and creamery averaging 44.1 cents per pound in September, as compared with 42.1 cents in August. Cheese rose from an average price of 30.9 cents per pound in August to 31.2 cents in September.

Bread and soda biscuits were unchanged, the former at an average price of 7.8 cents per pound and the latter at 18.3 cents per pound. Flour and rolled oats were steady, increases in some localities being offset by declines in others. Canned vegetables showed little change, tomatoes averaging 16.2 cents per tin, peas 16.6 cents and corn 16.2 cents. Onions declined in nearly all localities and averaged 6.1 cents per pound in September, as compared with 8 cents in August. Potatoes declined from an average price of $2.40 per ninety pounds in August to $1.78 in September. Some increases were reported from Nova Scotia but these were more than offset by declines in practically all other localities. Evaporated apples and prunes were lower, the former averaging 19 cents per pound and the latter 14.7 cents per pound. Raisins and currants showed little change. Raspberry jam was down from 79.3 per four pound tin in August to 77.1 cents in September. Granulated sugar was unchanged at an average price of 8.2 cents per pound, while yellow was slightly lower at 7.8 cents per pound. Anthracite coal was up from an average price of $16.19 per ton in August to $16.26 in September. Higher prices were reported from St. Hyacinthe, Montreal, Belleville, Toronto, Hamilton, Brantford, Guelph and London. Bituminous coal and wood showed little change in the average. No changes were reported in rent.

Wholesale Prices

The following is a summary of a statement of wholesale prices changes during the month issued by the Dominion Bureau of Statistics.

Grain prices were generally lower during September, No. 1 Manitoba northern cash wheat, Fort William and Port Arthur basis, averaged $1.45 ⅓ per bushel, as compared with $1.59¾ in August. The high price for the month was $1.55⅜ reached on the 2nd, and the low $1.39⅞ reached on the 17th. The lower prices were said to be due mainly to the estimates of a very large Canadian crop. Coarse grains followed the trend in wheat, western barley declining from 84¼ cents per bushel to 79 cents; western oats from 66½ cents per bushel to 64¾ cents; flax seed from $2 per bushel to $1.95; corn from $1.19 per bushel to $1.13; and Ontario peas from $1.60 per bushel to $1.55. Lower prices for wheat were reflected in the prices of flour, which declined at Toronto from $8.72 per barrel to $8.25. Hay was down from $15 per ton to $14-$14.50 and straw from $10.04 per ton to $9.18. Raw sugar rose from $4.02 per hundred to $4.33. Potatoes declined, Quebec grades at Montreal being down from $1.57 per bag to $1.19; Ontario grades at Toronto from $1.56 per bag to $1.33; Manitoba potatoes at Winnipeg from $1.26 per bushel to 92 cents; and New Brunswick potatoes at St. John from $3.09 per barrel to $2.89. Turpentime was slightly lower at $1.02 per gallon. Rubber was again lower, a grade of Ceylon being down from 35¼ cents per pound to 33¾ cents. Western cattle at Winnipeg were steady, the price being $7.35 per hundred pounds in September, as compared with $7.34 in August. Choice steers, however, at Toronto declined from $8.24 per hundred pounds in August to $8.03 in September. Hogs were unchanged at $11 per hundred pounds, while choice sheep advanced from $6 per hundred pounds to $6.38. Beef hides were up from 17-18 cents per pound to 19-20 cents. Sole leather advanced from 35 cents per pound to 36 cents. Boots and shoes followed the advance in raw materials, men's heavy grain boots being up from $2.50 per pair to $2.55 and box calf from $3.90 per pair to $4. The price of milk at Toronto to producers advanced from $1.90 per eight gallon can to $2.20, and the wholesale price from 35 cents per gallon to 37 cents. Finest creamery butter at Montreal rose from 38 cents per pound to 41 cents, creamery prints at Toronto from 41 cents per pound to 42 cents; solids from 40½ cents per pound to 41½ cents; and dairy prints from 32½ cents to 34 cents. Cheese at Montreal advanced 1 cent per pound to 26 cents. Fresh eggs at

Montreal showed a substantial seasonal increase, being up from 47-50 cents per dozen to 52-56 cents. Raw cotton at New York again advanced from an average of 20 cents per pound in August to 21.9 cents in September. The high price for the month was 23.9 cents reached on the 8th and the low 20.5 cents on the 19th. The increase was said to be due to the poor crop conditions. Printed cotton bags advanced from $152.70 per thousand to $171. Raw silk rose from $4.90 per pound to $5.05. Sash cord was up from 48 cents per pound to 52 cents. Western range wool was slightly higher at 27-28 cents per pound. Non-ferrous metals for the most part were lower tin being down from 65 cents per pound to 62¾ cents; lead from $6.40 per cwt. to $6.15; copper from $15.15 per cwt. to $15.05; zinc from $7.95 per cwt. to $7.85; and solder from 38 cents per pound to 36¾ cents. Silver advanced from 54½ cents per ounce to 55⅓ cents. Anthracite coal was up from $13.27 per ton to $13.52. Sulphuric acid declined from $2 per cwt. to $1.75.

Juvenile Unemployment in Great Britain in 1926

A REPORT on the work of the Advisory Committees for Juvenile Employment during the year 1926 has been issued by the British Ministry of Labour for Great Britain. These committees are appointed by the Ministry of Labour in most of the areas in which the ministry is responsible for the work of advising boys and girls on the choice of employment and of administering unemployment insurance for juveniles. The committees' functions are to advise on the management of the employment exchanges in relation to juvenile applicants for employment and to give information and advice to boys and girls and their parents with regard to the choice of employment. The committees interpret their functions widely and engage in many related activities.

The work of advising boys and girls on the choice of employment is usually carried out in one of two ways at school conferences, or through "rota" committees. At the conference the boys or girls leaving school are interviewed either by the secretary or by a member of the committee, with the co-operation of the head teacher. The parents are invited to be present, "skeleton" registrations are taken at the conference, and the boy or girl is told to come to the exchange for further help if he or she finds any difficulty in obtaining employment in the occupation selected. The other method is to invite boys or girls about to leave school to come with their parents to the exchange for a talk with one or two members of the committee. The invitations are so distributed that ample time can be given to each one, and it is frequently arranged that boys or girls wishing to enter a particular occupation meet members of the committees who possess a special knowledge of the occupation desired. Committees which have had experience of both methods invariably prefer school conferences.

Although the actual placing of boys and girls in employment is carried out by the officers of the Juvenile Departments of the Exchanges, the committees take a close interest in this important work. They receive periodical statements showing the number of boys and girls registered and the number of vacancies filled. They also assist in the work of placing by arranging interviews of individual members or groups of members with employees, by the issue of letters, and by enlisting the support of local employers' associations.

During 1926 the total number of boys and girls for whom employment was found in those parts of England and Wales, for which the Ministry is directly responsible, and in Scotland, was 128,382. Early in 1925 all the committees were invited to prepare formal schemes for looking after and keeping in touch with the boys and girls whom they had advised on leaving school or had placed in employment. The main feature of the schemes presented is that inquiry should be made three months or so after the boy or girl has received the help of the committees, and, subsequently, at reasonable intervals until he or she has settled down. The general experience of the committees seems to be that the most effective method of keeping in touch is by visiting the employers with whom the boys or girls are working.

Other sections of the report deal with the special steps taken by some committees to meet the needs of boys and girls from secondary schools, and with apprenticeship.

Some committees refer to the reluctance of boys to bind themselves as apprentices, or to difficulties in finding openings for boys who wish to become apprentices. On the subject of oversea settlement, it is mentioned that some of the committees have assisted during the year in the recruitment of boys and girls under schemes approved by the Oversea Settlement Committee. Many committees reported that they had been able to take little or no effective action in the matter, and in London in particular, there appears to be a strong prejudice against the emigration of boys and girls.

PRICES IN GREAT BRITAIN AND OTHER COUNTRIES

THE following notes and the accompanying tables give the latest information available as to the movements of prices in Great Britain and other countries. The index numbers of retail prices are from official sources unless otherwise stated. The authorities for the wholesale prices index numbers are named in all cases.

Great Britain

Wholesale Prices.—The Board of Trade index number, on the base 1913=100, was 140.9 for August, a slight decline from the July level. Foods declined 1.5 per cent, there being slight advances in cereals and meat and fish and a decline in other foods. Industrial materials were dearer by 0.7 per cent, with a rise of 4.9 per cent in cotton and slight changes in the other groups. On the base "average prices in 1924=100", the index number for August was 84.8.

The *Statist* index number (in continuation of Sauerbeck's figures) was 122.8 in August, showing a slight advance. Foods advanced 0.6 per cent, with slight advances in vegetable food and in sugar, coffee and tea, and a decline in animal food. Materials advanced 0.5 per cent, there being advances in textiles and sundries and a decline in minerals.

The *Economist* index number was 185.0 in August, on the base 1901-05=100, an increase of 1.7 per cent for the month. Cereals and meat rose 1.3 per cent; other foods rose 3.4 per cent; textiles rose 4.0 per cent; the miscellaneous group rose very slightly and minerals declined 1.7 per cent.

The *Times* index number, on the base 1913=100, was 144.8 at the end of August, an increase of 1.8 per cent for the month. Both foods and materials rose, although there were slightly lower index numbers for iron and steel, other metals and minerals and miscellaneous materials. There was a rise of 8 per cent in cotton owing to the poor outlook for the American cotton crop. Cereals rose 2.7 per cent and "other food" rose 4.2 per cent.

Cost of Living.—The index number of the Ministry of Labour, on the base of July, 1914=100, was 165 at September 1, as against 164 at August 1. Foods rose one point to 157 and all other groups showed no change.

Belgium

Wholesale Prices.—The index number of the Ministry of Industry, Labour and Social Affairs, on the base April, 1914=100, was 845 in July, a decline of 0.7 per cent from the June level. There were declines in food products, petrol and products, fertilizer, fats, paper products and raw rubber; advances in fuels, tar and products, textile products, resin products and hides and leather, and little or no change in other groups.

Cost of Living.—The official index number of cost of living of a working-class family of moderate income, on the base 1921=100, was 202.20 in August, a decline of 2.7 per cent from the July level. Foods and heat and light declined, the former over 4 per cent, and rent and lodging, clothing and sundries advanced slightly.

Denmark

Wholesale Prices.—The index number of the Department of Statistics, on the base 1913=100, was 153 in August, an increase of one point over the July level. There were slight advances in the groups animal foods, fodder, lime, etc., wood and paper, textiles, and chemicals; slight declines in vegetable foods, fertilizers, fuel and lubricating oil and metals and metal products, and no change in hides, leather and footwear.

France

Wholesale Prices.—The index number of *Statistique Générale,* on the base 1914=100, was 631 in August, showing a slight decline from the July level, 633. Native products declined 1.3 per cent to 603, and imports advanced nearly 0.9 per cent to 680. Foods declined 2.0 per cent with declines in all groups and materials rose 0.7 per cent, owing to higher prices for minerals and metals.

Germany

WHOLESALE PRICES.—The index number of the Federal Statistical Office, on the base 1913=100, was 137.9 in August, on the monthly average, an increase of 0.2 per cent on the previous month. There was a slight decline in prices of agricultural products, due to a favourable change in weather, and a slight advance in industrial raw materials and semi-manufactured goods. Producers' goods advanced 0.2 per cent and consumers' goods advanced 0.1 per cent, so that all manufactured goods rose 0.8 per cent.

COST OF LIVING.—The official index number for August was 146.6, as against 150.0 in July, a decline of 2.3 per cent. This change was due to sharp declines in prices of potatoes and other vegetables, and a decline in sugar prices owing to reduction in the duty on sugar. The food group index declined 4.1 per cent. Heat and light and clothing each advanced 0.8 per cent; sundries advanced 0.2 per cent, and rent showed no change.

Italy

WHOLESALE PRICES.—The index number of the Chamber of Commerce, Milan, on the base 1913=100, was 485.48 in August, 1.2 per cent below the level for July. Foods fell 3.7 per cent with declines in both groups; industrial materials were almost unchanged, declines in chemicals, minerals and metals, construction materials, and the miscellaneous

group being offset by increases in textiles, and vegetable products.

Switzerland

Cost of Living.—The official index number, on the base June, 1914=100, was 160 in July, showing no change from the previous month's level. Of the 64 articles in the budget, 43 showed no change, 12 rose and 9 declined in price. None of the groups showed change in index number.

India

Wholesale Prices.—The index number of the Labour Office, Government of Bombay, on the base July, 1914=100, was 147 in July, showing no change from the June level. Foods declined 2 points with declines in all groups except sugar, which rose one point. Non-foods showed no change, declines in oil-seeds, textiles other than cotton and metals being offset by advances in raw and manufactured cotton, hides and skins and miscellaneous goods.

Cost of Living.—The official index number of cost of living, Bombay, on the base July, 1914=100, was 157 in August, an increase of one point for the month. Foods rose one point, with increases in the index numbers of pulses and miscellaneous foods and no change in cereals. Clothing rose 3 points to 152 and fuel and lighting and house rent were unchanged at 166 and 172.

WHOLESALE PRICES.—The index number of the Census and Statistics Office, on the base average annual aggregate expenditure, four chief centres, 1909-13=1,000, was 1,538 in July, an advance of 3 points over the June level. Foodstuffs of vegetable origin, textiles, and non-metallic minerals and their products rose slightly while wood and wood-products, animal products, metals and their products and chemicals and their products declined slightly.

United States

WHOLESALE PRICES.—Bradstreet's index number, showing the cost of a list of 106 commodities, was $13,2647 on October 1, an increase of 2.8 per cent over the preceding month. Provisions accounted for most of the gain. There were also increases in live-stock, provisions, fruits, hides and leather, textiles and oils. Seven groups were lower, including breadstuffs, metals, coal and coke, naval stores, building materials, chemicals and drugs and miscellaneous products.

COST OF LIVING.—The index number of the Special Commission on the Necessaries of Life, showing changes in the cost of living in Massachusetts, was 158.0 in August, on the base 1913=100. This was a slight decline from the July level. There were slightly lower prices for food and shelter and slight increases in clothing and fuel. Sundries were unchanged.

RECENT LEGAL DECISIONS AFFECTING LABOUR

Workmen's Compensation Board as Preferred Creditor

AN INDUSTRIAL establishment in Ontario was adjudged bankrupt in 1925. The debts of the firm included one to the Workmen's Compensation Board for assessments levied for the years 1924 and 1925, amounting in all to $1,301.95. The debtor proposed a settlement to his creditors whereby the preferred creditors were to be paid in full, and the unsecured creditors were to receive 25 cents in the dollar without interest. This proposal was approved by an order of the court. However, the debtor was was unable to carry out his proposal and a receiving order was issued. The Board then filed their claim with the trustee, relying on the amendment made in 1921 to the Dominion Bankruptcy Act (Statutes of 1921, chapter 17), which added to subsection 51 of that Act (which enumerates the debts having priority over ordinary and general claims) the following words:—

and all indebtedness of the bankrupt or authorized assignor under any Workmen's Compensation Act.

The trustee disallowed the Board's right to rank as a preferred creditor, and the Board moved in the Ontario Supreme Court in Bankruptcy by way of appeal. The trustee first asked relief on equitable grounds, alleging remissness on the part of the Board in advancing its claim, but the court denied this petition on the ground that any delay that might have occurred was the result of the debtor's failure to make good the proposal which he himself had made.

Counsel for the trustee next contended that the 1921 amendment to the federal act constituted an invasion of provincial rights by the Parliament of Canada. On this point the court made the following pronouncement:—

"This amendment, instead of interfering with or diminishing the rights of the province, enlarged the Board's rights by giving to the Board a preference for all indebtedness owing by an insolvent at the date of the receiving order or the making of an authorized assignment. Counsel for the trustee does not argue that the Dominion has not the right under section 91 of the British North America Act, 1867, to legislate with respect to bankruptcy and solvency, and also, as ancillary, the right to provide (as it does by the Bankruptcy Act) for the administration and distribution of an insolvent's estate, and to determine the priority of creditors whether secured or insecured. It has been decided over and over again that section 51 of the Bankruptcy Act, under which the rights of secured creditors are reserved, is not *ultra vires*, or an interference with provincial law."

Another contention by counsel for the trustee involved the question of the interpretation of section 98*a*, subsection (3) of the Ontario Workmen's Compensation Act, as reenacted by Statutes of Ontario, chapter 24, section 28, which provides that:—

Priority in respect of any individual claim for compensation shall not exceed $500.

The trustee submitted that this subsection limited the Board's claim to the amount mentioned. The court however decided that the subsection had nothing to do with the Board's claim, since it referred to individual claims for compensation against the Board and not to claims for assessments made by the Board.

Finally, counsel for the trustee contended that in any event the priority of the Board under section 51(1) of the Bankruptcy Act (Statutes of Canada, 1919, chapter 36) was limited to three months. This section defines the order of priority of claims including—

Thirdly, all wages, salaries, commission or compensation of any clerk, servant, travelling salesman, labourer or workman in respect of services rendered to the bankrupt or assignor during three months before the date of the receiving order or assignment.

On this point the court ruled that the limitation of three months applies only to the wages earned by the classes named in the section, and does not apply to "all indebtedness of the bankrupt or authorized assignor under any Workmen's Compensation Act." "These words," the court added, "were by the amendment added to the section, and in terms include the whole of the indebtedness, and are not in any way restricted to three months or any other aliquot part of its claim."

The appeal of the Board was allowed with costs.*

—(Ontario—Syer, ex parte Workmen"s Compensation Board)

Dominion Fish Canning Licenses Declared Ultra Vires

The Somerville Cannery Company Limited, engaged in fish canning in British Columbia, was prosecuted in the District Police Court for refusing to obtain a license as re-

* Dominion Law Reports, 1927, Part 8, page 804.

quired by section 7A of the Fisheries Act, 1914. This section was added to the Act in 1917, and provides:—

7A. No one shall operate a fish cannery for commercial purposes without first obtaining an annual license therefor from the Minister (i.e. of Marine and Fisheries). Where no other fee is in this act prescribed for a cannery license, the annual fee for each license shall be one dollar.

Section 18 of the Fisheries Act, 1914 (consolidating previous acts), provides:—

18. No one shall operate a salmon cannery or salmon curing establishment in British Columbia for commercial purposes except under a license from the Minister.

'2. The annual fee for such a license shall be $50 (1-2-Geo. V., chapter 9, section 2).'

Although the provision contained in section 7A was enacted in its present form in 1917, the right of the Dominion to license fish canneries has been exercised for nearly 60 years under similar legislation, and had never been challenged before.

The magistrate acquitted the accused of an infraction of the Fisheries Act, but stated a case for subsequent hearing in the Supreme Court.

Mr. Justice M. A. Macdonald, in giving his decision in the Supreme Court, having summarized the contentions advanced on behalf of the Dominion Government and the company respectively, concluded as follows:—

"In my opinion, the 'Dominion,' in enacting that part of the Fisheries Act which provides for licensing and taxing canneries, has exceeded its powers under the British North America Act. The portion of the act in question is not 'truly ancillary' to legislation with respect to the fisheries which are within the jurisdiction of the Dominion. It is not by any reasonable implication necessary to the proper or effectual regulation or 'policing' of such fisheries. It is legislation as to civil rights and as such appropriate to the province."

Shortly after Mr. Justice Macdonald's decision was announced a federal order in council was passed asking the Supreme Court of Canada to give an opinion regarding the validity of sections 7A and 18 of the Fisheries Act. The Supreme Court is also asked to pass on the discretionary powers of the federal minister in respect to the regulation of the issuance of licenses to Japanese fishermen in British Columbia waters. The practice of the department has been rigidly to curtail these licenses in proportion to the number of licenses issued to other fishermen in the same waters.

Waiver Signed in Ignorance Held Invalid

A labourer employed by a rolling mill company at Montreal sustained an injury in the course of his employment, resulting in his total disability for a period of nine weeks, and necessitating treatment at the general hospital. He received from the company the sum of $29 as compensation, and in consideration of this payment he gave the company a full discharge of all claims on account of his disability. Later he petitioned in court for permission to sue for the sum of $1,750 for compensation, stating that the discharge was given in ignorance of the extent of his legal rights under the Workmen's Compensation Act. Mr. Justice Bruneau, who heard the application granted the workman leave to sue under the Act.

Scope of United States Longshoremen's and Harbour Workers' Act

The United States Longshoremen's and Harbour Workers' Compensation Act, which became effective on July 1 this year (LABOUR GAZETTE, April, 1927, page 397) does not apply to the work of breaking up a vessel for the purpose of salvaging the material. The United States Employees' Compensation Commission, which administers the Act, in making this decision, stated that a vessel becomes a vessel as soon as it is launched, and continues to be a vessel until wholly incapable of navigation. The work of raising sunken vessels for salvage is maritime employment, but the employees engaged in such work are not included within the meaning of the Act. However, if there be on board employees not members of the crew, such employees would be included within the provisions of the Act. The commission states

that, "if the construction of a vessel does not involve a maritime contract and is without the jurisdiction of an admiralty court as has been so consistently decided by the highest courts, the breaking up of a vessel for the salvaging of the materials of which it is constructed, thus permanently destroying it as a vessel, does not involve a maritime contract."

According to another decision employees of steamship companies who are required to board ships for conference with ship officers or for inspection are considered as employees in maritime employment, and are entitled to compensation under the Act.

The crew of dredges and barges in sand and gravel dredging operations, and employees operating stationary winch engines upon floats alongside of and attached to sand and gravel docks in connection with loading operations are not covered by the Act. The commission will take no action at this time against employers of men serving on said sand and gravel dredges and herein considered as exempt from the law, if such employers decide not to cover by insurance or by self-insurance such liability as they may have under the Act for injuries to these employees.

Compensable Accident must be due to Employment Conditions

While an employee in a gasoline station in Louisiana was attending to his work a pistol in the hands of a fellow employee was accidentally discharged and he was killed. His parents brought action for compensation under the Employers' Liability Act of the State. The claim was denied by the trial court, this judgment being later affirmed by the State Supreme Court, which quoted the words of the Massachusetts Supreme Court in a similar case, as follows:—

"It is sufficient to say that an injury is received in the course of employment when it comes while the workman is doing the duty which he is employed to perform. It arises out of the employment when there is apparent to the rational mind, upon consideration of all the circumstances, a causal connection between the conditions under which the work is required to be performed and the resulting injury. Under this test if the injury can be seen to have followed as a natural incident of the work and to have been contemplated by a reasonable person familiar with the whole situation as a result of the exposure occasioned by the nature of the employment, then it arises 'out of' the employment.* * * The causative danger must be peculiar to the work and not common to the neighbourhood. It must be incidental to the character of the business and not independent of the relation of master and servant. * * *"

Reference is also made to the opinion of the Court of Appeal in the instant case to the following effect:—

"Conaway (the victim) was shot in the course of his employment by a careless fellow servant. There is no causal relation between the source of his injury and the character of his employment. Conaway's employment did not expose him to the danger of accidental shooting, nor is there any allegation that the revolver from which the shot was fired belonged to Conaway's employer and was kept on the premises for protection and possible use in defence of defendant's property. * * * It happened that he was shot while at work. He was no more exposed to such injury while at work than otherwise and elsewhere. That it should happen was providential."

Liability for Compensation for Lead Poisoning

A painter contracted lead poisoning in the course of his employment as a painter in the Royal Navy. He was discharged from the Navy in 1918, and afterwards worked as a painter for various civilian employers. In 1924 he was forced by illness, which was diagnosed later as lead poisoning, to give up work. He made a claim for compensation against his last employers.

The employers contended that the disease had been contracted some years before, when the claimant was employed in the Navy, and that they should not be required to provide compensation in respect to his disablement in consequence. They submitted further that the claimant had failed to show that the

poisoning was brought to a head or aggravated while in their employment.

The County Court made an award in favour of the employers, and this decision was confirmed later by the Court of Appeal.

On further appeal by the claimant the House of Lords reversed the decision of the lower courts, and allowed the appeal. It was held that it was not necessary for a workman suffering from a scheduled disease to prove that it was the employment with the last employer which, in fact, caused his disablement or suspension. In the course of his judgment Lord Atkinson said:—

"It will, I think, be sufficient for him to prove that his work with his last employer during the twelve months immediately preceding his disablement was of the same nature and character as the work to which his disease is due."

—(House of Lords—Blatchford versus Staddon and Founds)

A workman on a sailing schooner on the St. Lawrence at Quebec City sustained injuries to his hand in the course of his employment, and claimed $2,177 for compensation from the owner of the vessel. The Superior Court disallowed the claim on the ground that the Workmen's Compensation Act of the Province does not cover this occupation, the Act having been amended in 1918 (chapter 71, section 1) to provide that "it shall not apply to agricultural industries or to navigation by means of sails."

PREPARED AND EDITED IN
THE DEPARTMENT OF LABOUR, OTTAWA, CANADA

VOLUME 27] NOVEMBER, 1927 [NUMBER 11

NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

Monthly Summary

FOR the first time since the beginning of April, industrial activity in Canada showed a slight decline on October 1, according to statements received by the Dominion Bureau of Statistics from 6,241 employers each with a minimum of fifteen employees, whose staffs aggregated 904,880 persons, as compared with 909,229 in the preceding month. Employment during September last year showed a small advance, but the situation at the beginning of October in earlier years of the record, was not so favourable as on October 1, 1927, when the index (with January, 1920, as the base—100) stood at 109.0, as compared with 109.7 on September 1, and with 105.2, 98.3, 93.9, 99.5, 94.6 and 90.2, on October 1, 1926, 1925, 1924, 1923, 1922 and 1921, respectively. These returns are representative of all industries except agriculture, fishing, hunting and highly specialized business. Reports received from the offices of the Employment Service of Canada showed a marked increase in the volume of business transacted during September, the daily placements registering a gain of nearly 53 per cent over those of the previous month, and of 48 per cent over September, 1926. The gain over last year was largely due to the heavy demand for harvesting operations in the West, and also to activity in logging. At the beginning of October the unemployment percentage reported by the members of local trade unions stood at 3.1 as compared with percentages of 3.7 at the beginning of September and 3.3 at the beginning of October, 1926. The percentage for October is based on reports received by the Department of Labour from 1,601 labour organizations comprising a membership of 171,435 persons.

The average cost of a weekly family budget of twenty-nine staple foods was $10.99 at the beginning of October, as compared with $10.87 for September; $10.93 for October, 1926; $10.89 for October, 1925 $10.31 for October, 1924; $10.65 for October, 1923; $10.23 for October, 1922; $11.48 for October, 1921; $15.83 for October, 1920; $16.92 for June, 1920 (the peak); $13.54 for October, 1918; and $7.99 for October, 1914. In wholesale prices the index number calculated by the Dominion Bureau of Statistics, based upon prices in 1913 as 100, was slightly higher at 152.4 for October, as compared with 151.4 for September; 151.3 for October, 1926; 156.0 for October, 1925; 157.0 for October, 1924; 153.1 for October, 1923; 148.1 for October, 1922; 155.6 for October, 1921; 236.3 for October, 1920; 256.7 for May, 1920 (the peak); and 206.9 for October, 1918.

The time loss due to industrial disputes in October, 1927, was greater than during September, 1927, and October, 1926. Twenty-one disputes were in existence at some time during the month, involving 4,058 workpeople, and resulting in a time loss of 46,844 working days. Corresponding figures for September, 1927, were: Twelve disputes, 2,616 workpeople and 9,611 working days, and for October, 1926, eight disputes, 705 workpeople and 12,142 working days.

Industrial Disputes Investigation Act, 1907

During October the Department received three new applications for the establishment of Boards of Conciliation and Investigation under the Industrial Disputes Investigation Act, 1907, and in one of these cases a Board was appointed during the month. A Board was appointed also in connection with a dispute for which an application had been received last April, this application having lain in abeyance pending the outcome of direct negotiations. In another dispute, in which the employees applied for a Board during September, a settlement was effected by negotiations between the parties concerned, through the mediation of the Minister of Labour. Full particulars of proceedings under the Act during the month will be found on page 1157 of this issue.

Combines Investigation Act, 1923

The report of the commissioner appointed to conduct an investigation into the Proprietary Articles Trade Association, was completed on October 24, and was published by the Department in pamphlet form. It was alleged

that the Association was a combine of wholesale and retail druggists and manufacturers, for the purpose of fixing and maintaining resale prices of proprietary medicines and toilet articles. The commissioner's report which confirms the findings of the Registrar of the Act (LABOUR GAZETTE, October, 1926, page 945), is outlined on page 1165 of this issue.

"The Way to Industrial Peace"

The Right Honourable Philip Snowden, M.P., who was Chancellor of the Exchequer in the Labour Government in Great Britain in 1924, recently delivered the John Clifford Memorial lecture under the auspices of the Brotherhood movement, on "the Way to Industrial Peace." Mr. Snowden stated that "the method of avoiding strikes and lock-outs by joint conciliation, before a stoppage of work has taken place, is used to a far greater extent than is generally known. In the last ten years no less than 11,000 disputes have been settled by conciliation and compromise under the auspices of the Ministry of Labour. The number of differences which have been settled by direct negotiations between the parties concerned is not known, but it must be very large. There are many notable instances on record where trade unions have secured substantial advantages by methods of conciliation, which they certainly never would have obtained by resorting to a fight of endurance. . . . A strike always leaves the relations between the two parties strained. The party which is beaten nurses a grievance: the party which has won is apt to be arrogant and dictatorial. Each party waits for an opportunity to 'get its own back.' Every workman who has taken part in a dispute knows that, after the strike, conditions in the workshop are not the same as before. After the strike a number of workmen are marked men, and sooner or later a reason is found for their dismissal.

"Exactly the same process," Mr. Snowden continued, "is going on in regard to the abolition of war and the abolition of industrial warfare. Nations still retain their fighting forces, but the League of Nations has been created to avoid war and to act as a court of conciliation and arbitration. It is still a weak instrument for that purpose, but its existence is evidence of the growing desire to substitute reason for force. So the extensive machinery which has been created in recent years for dealing with industrial disputes—the Industrial Court, the Joint Conciliation Boards, and agreements which have been made by trade unions and employers in many industries—show that reasonable opinion among both the trade unions and the employers' federations is groping for some other way of settling wage questions than the strike and the lock-out."

Proceedings under Railroad Labour Act in United States

The *Monthly Labour Review,* published by the United States Department of Labour, in its issue for October, summarizes the results of arbitration proceedings under the Railroad Labour Act during the first year of its operation (the provisions of this act were outlined in the LABOUR GAZETTE, May 1926, page 423).

Under the terms of the railroad labour act of 1926 a board of mediation of five members was appointed. This board began operation in July, 1926. The act provides means for both mediation and arbitration of labour disputes. Disputes between carriers and men upon which the parties are unable to reach an agreement may be submitted for mediation to the United States Board of mediation. If mediation fails, a special board of arbitration may be set up, consisting of one or two representatives each of men and management, and one or two, "neutral" arbitrators agreed upon by the other representatives. If the parties fail to agree upon the neutral arbitrator or arbitrators these may be appointed by the board of mediation. The parties bind themselves to accept the decision of the arbitrators.

Up to the 17th of September, 289 cases were submitted to the United States Mediation Board, and a settlement was reached in 145 of these cases. Up to September 1, 1927, many arbitration proceedings had been entered into under the new act, involving blacksmiths, clerks, conductors and trainmen, firemen and enginemen, maintenance-of-way employees, telegraphers, train dispatchers, etc.

In the main, it is stated, the men have been successful in obtaining increases in wages, though usually these were not so large as were asked for. The smallest rate of increase granted was given in the case of the maintenance-of-way employees on the two railroads—the Louisville and Nashville and the Chicago and North Western—for which the trackmen's cases have been decided. The increases in these two cases ranged from one-half cent to 3 cents per hour, or from $1.04 to $6.24 per month.

The outstanding case in which an upward adjustment of wage rates was denied was that of the conductors and trainmen on some 55 western railroads. This action on the part of

the arbitration board came as a surprise, especially since these classes of employees on the railroads of the East and Southeast had just been granted an increase of 7½ per cent.

Mine Workers co-operate with owners in Nova Scotia

The *Canadian Mining Journal* comments on the new spirit evident in the coal mining industry in Nova Scotia, which, it states, has changed the relationship between the miners and operators from one of mistrust and open hostility to one of good will and confidence. "This augurs good for the next agreement which is the most important matter pending in the coal industry." The existing agreement between the Dominion Coal Company and the United Mine Workers will not expire until February, but it is stated that negotiations are already in progress for a new contract. "The good feeling that exists," the *Journal* continues, "has been specially marked of late by the joint action of the executive officers of the Mine Workers' coal-pit committees travelling the mine together with the president, mine superintendents and other colliery officials, for the purpose of ascertaining and removing if possible all cause of complaint. In the course of their travels through the mine many helpful suggestions were made both by the affected workmen and the joint committee of Union and mine officials, which led to an easy solution of many outstanding grievances. Having tackled the most dissatisfied colliery first, the same procedure was followed in others with similar results. This method has now been established for the settlement of all minor disputes." The *Journal* points out that to discuss a mine grievance right on the spot underground is a very different thing from debating it in an open union meeting "where reason is often swayed by passion and side issues enter to stir up and inflame the mind. Free from all distracting influence disputed questions can be viewed from all angles, the very discussion of them in such a place by the best minds acting as a challenge to settle them there and then."

Early in October Dr. A. C. Jost, provincial Health Officer, invited President John W. McLeod and other officials of the United Mine Workers to co-operate with the Department of Health in bringing about an improvement in the sanitary conditions of the mining districts, with special reference to the danger of a recurrence of infantile cholera next year. The union officials readily promised to co-operate with the Department in this important work.

Manitoba Commission on seasonal unemployment

In accordance with the promise made at the last session of the Manitoba Legislature (Labour Gazette, March, 1927, page 248) the provincial government has appointed a special commission to investigate seasonal unemployment with a view to providing employment for workmen during the slack season in the various branches of industry. The commission is composed of the following members: Dr. R. W. Murchie, Professor in the Manitoba Agricultural College; Mr. W. H. Carter, President of the Carter-Halls-Aldinger Company, contractors, Winnipeg, and Mr. F. J. Dixon, a former labour member in the Manitoba Legislature.

The commission has already held several conferences with employers in the province, and has made suggestions regarding the possibility of winter building operations and the benefits that would result if manufacturers endeavoured to obtain orders in advance, so as to enable them to spread their activities over the year. In connection with winter building operations the Labour Gazette, February 1927, quoted a statement from the *Canada Lumberman* to the effect that experience in Montreal had already demonstrated the practicability of winter construction, though at an increased cost; "but against this can be set the more settled conditions of employment, the spreading of overhead over a longer period of activity and the keeping together of the staff." *Industrial Canada*, the monthly magazine of the Canadian Manufacturers' Association, referring to the inquiry in Manitoba, states that "one of the outstanding things discovered is that notwithstanding the usual understanding to the contrary, building operations, especially large operations, can be successfully conducted throughout the winter season in Western Canada. Not alone is this so, but it has been stated by experienced contractors that the work can be done at slightly lowered cost."

The commission, it is stated, has noted the fact that many firms, particularly large corporations, and municipal and provincial governments, do not consider their season's requirements sufficiently in advance to place orders during the dull season, with the result that employment is greatest at the season of the year when every available man is required for harvest work. As an example of unconsidered distribution of work throughout the year, reference was made to the extension of a central steam heating service by a municipality in August, September and October, which might have been undertaken in May, June and July. The commission has requested the

co-operation of manufacturers to make special effort to secure orders in advance so as to keep the factories in operation during the dull season as much as possible. The employers are said to have complied with this suggestion.

Unemployment problem not insoluble

In an article contributed to the October issue of the *American Federationist*, the monthly magazine published by the American Federation of Labour, Mr. Sumner H. Slichter points out ways in which trade unions may help to reduce unemployment. One of these ways is to establish research departments for the purpose of making reports on business conditions, and supplying information that could be used to check one of the main causes of industrial depression, namely: speculative buying by industrial concerns in times of prosperity. Another suggestion is that central employment offices might be maintained in the larger industries, either by the union concerned, or jointly by the union and the employers, for the purpose of arranging the transfer of workers from the slack to the busy factories.

The writer considers unemployment to be remediable, and denies that the steady mechanizing of industry will continue to make the problem increasingly difficult in the future. "On the contrary," he says, "it seems quite likely that within a generation unemployment will be a problem of secondary importance. This is a surprising statement to make, and yet there is good reason for it. The reason is that the business men seem at last to be waking up to the fact that the cost of unemployment falls in a substantial degree upon them. Unemployed men mean unemployed machines. As the process of production becomes more and more mechanized, the overhead on idle machines becomes greater and greater. In addition, unemployed men are poor customers. Hence every firm which lays off men is diminishing the market of every other enterprise. Finally, the necessity of laying off or of working them only part time often means the loss of valuable employees who can only be replaced at great expense."

Unemployment insurance changes in Great Britain

An unemployment insurance bill will be brought before the British Parliament at the autumn session, the proposed measure being based to some extent on the report of the committee of enquiry on this subject (the "Blanesburgh report") which was outlined in the LABOUR GAZETTE, March, 1927, page 284. This committee recorded their opinion that an unemployment insurance scheme must now be regarded as "a permanent feature of our code of social legislation." The proposed measure makes all unemployment benefit payable as of right on fulfilment of the requisite conditions. In future there would only be one form of benefit, and not, as at present, two forms, the "standard" and the "extended." With the disappearance of this distinction the discretionary power of the Minister of Labour to place restrictions on the grant of benefit would cease also. The bill would create a new class of insured persons, that is, those between the ages of 18 and 21, in respect of whom new rates of contribution (and of benefit) are prescribed, intermediate in amount between the rates for persons over 21 years of age and the rates for boys and girls under 18 years of age. It is proposed that at least once in five years there shall be an investigation into the financial condition of the Unemployment Fund. A revised scale of benefits (which was not among the recommendations of the committee) is proposed in the bill, the weekly rate of benefit for men with no adult dependants to be reduced from 18s to 17s; while the rate of benefit in respect of an adult dependant would be increased from 5s to 7s. Thus a man over 21 with an adult dependant would receive 24s., that is, an increase of one shilling on the present rate; while a man over 21 years without an adult dependant would receive 17s, that is, a decrease of one shilling on the present rate. Two shillings would be paid as at present in respect of each dependent child. The new class of young men and young women between 18 and 21 years of age, who are to pay a lower rate of contribution than at present, would receive 10s and 8s respectively, whereas at present they receive the same rate of benefit and pay the same rate of contribution as persons over 21 years of age. Boys and girls between 16 and 18 years of age would receive 6s and 5s respectively, instead of their present rates of 7s, 6d. and 6s.

A section of the bill introduces modifications in the trade dispute disqualification. At present persons who are not themselves participating in or financing, or directly interested in, a trade dispute which causes a stoppage of work at the premises where they were employed, may nevertheless be disqualified from benefit if other members of the grade or class to which they belong are participating or financing, or directly interested in, the trade dispute. such disqualification may be imposed although the other members in ques-

tion may not have been employed at the same premises or even in the same district as the persons disqualified. The effect of the first part of the clause is to secure that in such circumstances the disqualification will not apply to persons who are not themselves participating in, or financing, or directly interested in, the trade dispute, unless there are other members of their grade or class at the same premises as themselves who are so participating or financing or directly interested.

Progress of industrial insurance

The Metropolitan Life Insurance Company has arranged with the Leads and Northrup Company of Philadelphia an old age retirement plan which differs from the usual industrial premium system in having a guarantee that every provision it contains will be fulfilled, the employer making a large deposit with the insurance company in order that the retroactive provision of the contract may be made effective. Employees may increase their retirement income by making small monthly deposits themselves, whereupon the employer will make additional contributions in order to produce a still larger income for the depositor. Based on a system of differed annuities purchased by the employer for employees with at least five years' service to their credit, the retirement plan provides monthly income, payable at the ages of 70 for men and 65 for women. By mutual consent, however, an employee may retire at an earlier age and receive a proportionately reduced income for the remainder of his life.

The progress of industrial insurance during the past twenty-four years was described by Dr. Frederick L. Hoffman, consulting statistician of the Prudential Insurance Company, in an address delivered last June before the Eighth International Congress of Actuaries. He stated that the aggregate number of industrial policies throughout the United States was 11,201,085, while by 1910 this had increased to 23,044,162 policies and by 1925 to the stupendous total of 73,727,163. It should be said, however, that the American business includes business in Canada, transacted by the Metropolitan and the Prudential. Separating the Canadian business of American companies from the domestic business, it appears that the total number of industrial policies in force carried by United States companies in Canada in 1925 was 3,023,473. Adding the figures for Canadian companies, there was a total of about 3,350,000 industrial policies in force in Canada as compared with 70,703,690 for the continental United States.

Dr. Hoffman claimed that industrial insurance has become one of the important thrift agencies. "It is no small thing" he said, "for wage-earners of the United States and Canada to pay annually the colossal sum of $500,000,000 in Industrial premiums for the benefit of surviving members of the family. A considerable proportion of the insured have been policy-holders for more than a quarter of a century. The business has, therefore, become solidified and rests now upon a substantial basis of fifty years' experience."

Success of exclusive state compensation in Ohio

The Ohio Industrial Commission, which administers the Workmen's Compensation Board of the State, was able to reduce the rates of assessment for the current year in a number of industries, the employers having been successful in reducing the cost of accidents. Thirty-five per cent of the classified industries received a reduction, 17 per cent received an increase owing to an unfavourable accident record, while 48 per cent remained unchanged. A reduction was also made in the rate levied for industrial disease from 1½ cents to 1 cent per hundred dollars of payroll. It will be recalled that Ohio is frequently mentioned as being the leader among the States of the American Union in the "exclusive state fund" type of Workmen's Compensation. The *American Labour Legislation Review* points out that that the reduction of rates in Ohio has special significance in view of the fact that "employers in many states are concerned with the steadily increasing cost of workmen's accident compensation insurance carried on by commercial insurance companies." The *Enquirer,* of Cincinnati, Ohio, remarks that the latest report of the commission "marks another step in the development of the 'Ohio idea' in workmen's compensation. With the compensation plan for the care of those injured and dependant of those killed now under complete control and functioning smoothly, the commission is to devote its greatest attention to the prevention of accidents."

Causes of increase of industrial accidents

A further analysis of the industrial accident record of Ontario is made by Professor H. Michell in *Industrial Canada* for October. A previous article by the same author on this subject was noted in the Labour Gazette, June, 1927, page 593. In the present article Professor Michell reaches certain conclusions as to

the practical effects of the "Safety First Campaign", these conclusions being based on the detailed classification of industrial accidents in the annual reports of the Ontario Workmen's Compensation Boards. He pays a tribute to the "most admirable" form in which these reports are given from year to year. Further study of these reports has confirmed the writer in his conclusion that the more serious and the fatal industrial accidents are relatively declining, and that the apparent increase is largely explained by the fact that medical attention is now promptly given even to the smallest accidents, these being officially reported where formerly they would have had only local "first aid", and would not have been included in the records.

Professor Michell analyzes the accident records of Ontario as they are classified by the Board according to causes. These records show that accidents due to machinery have shown a remarkable decline since 1918. On the other hand the classes of accident attributed to "stepping on or striking objects" and "tools" showed a steady increase during the same period. That these movements are not fortuitous is shown by their correspondence with similar changes in Nova Scotia and other provinces in Canada. Professor Michell draws the following conclusions from the study. "The only one that can possibly be found is that the improved fencing of machinery is bearing fruit and the proportion of accidents due to machinery is steadily falling, while accidents which rise from personal factors—carelessness, inattention, lack of skill—are steadily rising. It is easy to see", he continues, "that the decrease proportionately in the accidents from machines must be due to better methods of safeguarding the worker and fencing the machines. But are we to suppose that accidents arising from carelessness or some personal factor are steadily increasing through some increasing inability of the individual to take care of himself? Is it possible that the strain of modern large scale production is becoming so great that we see a progressive deterioration in the physical fibre of the worker? It is impossible to answer these questions definitely, but we have shown enough to indicate that here is a problem very well worth further investigation. Is it possible that the mechanical perfection of our engines is outstanding the human factor? This is not the first time the question has been asked, and the evidence here adduced goes far towards shedding fresh light upon it." (The report of the Nova Scotia Factories inspector for 1926, reviewed on another page of this issue, shows a decline in fatalities, with a slight increase in all accidents.)

Ineffective lumber camp regulations

Standard requirements for lumber camps have been in force in Ontario for about five years, and similar requirements were laid down in the Province of Quebec by a series of provincial health by-laws issued in 1924 (LABOUR GAZETTE, May, 1924, page 354). According to the report of the Medical Officer for District No. 6 of Ontario, which includes the northern section of the province, the regulations in respect to the proper construction of lumber camps are not being observed in every case. "The standard forms for camps are not being complied with, neither can they be," this officer states, "for in order to save the camp regulations as a whole from the general disrepute into which they have fallen, it is advisable that those regulations making standard forms compulsory be amended so that they appear as recommendations or suggestions. This will enforce on lumbermen in unorganized territory sound and sane principles of sanitation without the arbitrary interpretation of the present standard forms. Lumbermen will be placed, in regard to sanitary principles, on the same level as other employers of labour in such territory. A camp which is sanitary in all but one particular cannot have that weakness corrected unless the form is in accordance with those prescribed in the standards. Authority should be placed on sanitary inspectors to make necessary corrections and enforce principles without having to close the camp and put the men out of work because of this lack of form. Previous camp regulations provided that owners or their agents must make their camps comply with the regulations to the satisfaction of the inspector of the Department. Indeed, the inspectors are exercising this authority without the necessary legal provision. Such provisions could be inserted in the amendments above mentioned."

International Association for Social Progress

The International Association for Social Progress held its general meeting at Vienna on September 13-18. This Association resumed in 1925 the work begun thirty years ago for the furtherance of international labour legislation, unemployment prevention and social insurance. Its independent activities supplement and support the work of the International Labour Organization. Delegates from thirteen Governments and from the International Labour Office were present at the convention. The results of the meeting emphasized the close relation between economic and social problems, particularly in discussing unemployment.

The Association suggested the stabilization of the general level of prices as a means of reducing an important factor in economic fluctuations. The meeting also discussed "rationalization"* and its social consequences—diminished unemployment, progressive reduction of hours of work, and the increase in real wages derived from increased production. Foreseeing, however, that in spite of all efforts a certain lack of employment would persist, the Conference laid down the general principles of an extensive programme of unemployment insurance. The important problem of family welfare was also approached. It was found necessary to study the social needs and economic possibilities of the extension of social insurance, not only to maternity and sickness benefits for members of the family of the insured person, but also to the cost of educating his children. The Association decided to continue the study of this question, and also to consider the prolongation of the period of compulsory education.

Geneva Committee on Child Welfare

The Assembly of the League of Nations, at its Eighth Ordinary Session, adopted a resolution on September 20, 1927, expressing its appreciation of the work of the Child Welfare Committee and requesting it to continue on the lines indicated in the latter's report on the work of its third session. The third session of the Child Welfare Committee took place in Geneva in May last and Government delegates were present from the British Empire, Belgium, France, Italy, Denmark, Germany, Japan, Poland, Roumania and Spain. Miss Charlotte Whitton, Executive Secretary of the Canadian Council on Child Welfare, who was unable to be present at this meeting, was represented by Dr. W. A. Riddell, Canadian Advisory Officer to the League of Nations at Geneva.

Among the subjects considered at the conference were the following: Effects of the Cinematograph on the Mental and Moral Well-Being of Children; Protection of Life and Health in Early Infancy; Mental and Physical Recreation of Children and Young Persons; Alcoholism in Relation to the Welfare of the Child; Family Allowances; Juvenile Courts; Blind Children; the Illegitimate Child.

*A definition of this term was given by the president of the International Economic Conference (Labour Gazette, July, 1927, page 770).

The eight-hour day in France

Industrial and Labour Information, the weekly publication of the International Labour Office, publishes in its issue of September 26, 1927, a summary of recent reports appearing in the *Bulletin of the Ministry of Labour and Health* (France) on the extent to which conditions of production and labour have adapted themselves to the Act of April 23, 1919, on the eight-hour day. The reports are founded on information collected by the French factory inspectors and show that the average daily output in the following industries has been maintained, and in many instances increased, since the introduction of the shorter working day: boot and shoe industry; cotton industry; oil-cloth; foundries; china-clay; paper, rubber; cardboard; saw-mills; and brickyards. The increase in output has been attained by the introduction of improved machinery, by the application of more rational methods of work, by better utilization of workers' capacities, by the introduction of bonuses for certain operations, by improved conditions of labour, better wages, etc.

Industrial Code in Poland

An administrative decree was promulgated in Poland on June 7, 1927, introducing a new industrial code which will come into operation six months after its publication and will cancel all conflicting legislation. The code is divided into ten parts, as follows: (1) Fundamental principles, (2) Industries having permanent premises, (3) Industries not having permanent premises, (4) Markets and fairs, (5) Associations and federations of associations, (6) Apprentices in industry, (7) Penal clauses, (8) Industrial authorities, (9) Craftsmen, (10) Transitional and final provisions.

For the purposes of the Decrees the word "industry" includes all trades and establishments engaged in producing, transforming, selling or buying goods, or rendering services. The following occupational groups are not included: (1) Agriculture, horticulture and forestry, (2) Pisciculture and game preservation, (3) Industries covered by mining legislation, (4) Undertakings pertaining to a State monopoly, (5) Railway and shipping companies, (6) Migration agencies, (7) Electric power stations, (8) Educational establishments, (9) Sanatoria, surgeries, etc., (10) Banks, credit, insurance and guarantee establishments, (11) Offices of solicitors, engineers, architects, etc., (12) Literary and artistic professions, the publication and sale of newspapers and periodicals, (13) The professions of physician,

dentist, midwife, etc., (14) Pharmacies, bacteriological laboratories, etc., (15) Stock-brokers' offices, (16) Places of entertainment, (17) Homework, (18) Employment exchanges, (19) Detective offices, (20) Public scriveners' offices, (21) Commerce in war materials, (22) Land agents' offices engaged in allotment and settlement schemes outside the confines of towns.

Every Polish citizen is free to carry on an industry, unless the Decree states otherwise, foreigners having the same rights as Poles, provided the principle of reciprocity be observed.

The Manitoba Workmen's Compensation Board received reports during October of 992 accidents, including two fatalities.

The Factory Inspection Branch of the Province of Ontario reports a total of 435 accidents during the month of October, 1927. Of this number, 199 were stated to be injuries to the upper extremities, hand, fingers, thumbs, arms, shoulders, wrists and elbows. Accidents classified as "trunk" injuries amounted to 56; and those classed as injuries to the lower extremities totalled 92. The industries in which these accidents occurred were as follows: Pulp and paper trades, 82; metal trades, 158; rubber and rubber goods, 38; textiles, 15; food, 22; lumber, 11; chemicals, 2; conveyances, etc., 18; transportation, 48; clay, glass and stone, 3; unclassified trades, 19; leather goods, 4; woodworking and wearing apparel, 15.

The *Canadian Mining Journal,* in its issue for October 28, contains an instructive description of mine safety appliances contributed by Mr. E. H. Sykes, of the Mine Safety Appliances Company of Pittsburgh, Pennsylvania. The article describes modern systems of underground illumination, methods of rock dusting, gas masks, oxygen-breathing apparatus, proper methods of resuscitation, gas indicators and detectors, and first aid equipment.

At an inquest into the death of a miner at Drumheller, Alberta, resulting from injuries caused by a blast of coal on October 12, the coroner's jury found that shots had been fired without regard to the requirements of the Alberta Mines Act. They recommended that the act "be lived up to in its entirety at this mine, and a permanent shot lighter holding at least a third-class certificate, be employed; that all shooting be done at different periods in different districts so as to avoid confusion and that a proper report be made out by the shot lighter."

Correction

Attention is drawn to a statement in the August issue of the LABOUR GAZETTE on page 887 with reference to agreements between the railroad telegraphers and the principal railways providing for increases in wages, in which it was erroneously stated that linemen were given an increase of $10.82 per month, instead of $5 per month as for certain other classes.

Fishermen's Proposals in Maritime Provinces

At the first session of the Royal Commission on the Maritime fishing industry (LABOUR GAZETTE, October, 1927, page 1030), the fishermen of Nova Scotia submitted the following suggestions:

The establishment of a separate department of fisheries with a minister from the Maritime Provinces.

The appointment of inspectors who are practical fishermen.

Expansion of markets, both home and foreign, which would involve advertising and increased activity by Canadian commissioners.

Abolition of steam trawlers. This, Mr. Ernst said, was the most vexed question which would come before the commission.

Intensification of scientific research.

Encouragement in the form of bonus to private enterprise for the establishment of plants to utilize fish by-products and dog fish.

Restoration of the modus vivendi.

Imposition of a duty on foreign fish. Mr. Ernst said this was aimed particularly at Newfoundland.

Lower transportation charges, especially with respect to shipments of live lobsters.

Fishermen's insurance on smaller boats and gear.

Long term loans to fishermen.

Radio broadcasting of weather reports.

Readjustment of the bounty to fishermen.

GENERAL REVIEW OF THE INDUSTRIAL SITUATION

THE employment situation at the end of October was reported by the Superintendents of the Employment Service of Canada to be as follows:—

In the Province of Nova Scotia farm workers were engaged at the usual fall work. Fair catches were reported by the fishing industry, but the weather was somewhat adverse. While construction work was slackening off in other districts, at Halifax it was brisk, with several large projects, including two hotels, under way and with prospects of a continuance of a large volume of work during the winter months. The manufacturing industries remain normal with only the usual seasonal fluctuations reported; in anticipation of Christmas business, confectionery and some other lines were busier. A start had been made in the logging industry. Coal production was rather good for the season. While passenger traffic had fallen off, freight was heavy. Trade was good, while collections were fair.

The agricultural industry in New Brunswick likewise was engaged at fall work. The logging industry was getting its fall and winter work under way, and some placements were being made by the employment offices. The fishing industry in this Province showed fair activity. While no large construction jobs were being carried on, work on smaller undertakings was progressing satisfactorily and continuing to afford considerable employment to workers in this industry. Manufacturing industries showed very little fluctuation. Transportation showed favourable activity, while trade was reported to be fairly good.

Orders for farm workers being received at the Quebec employment offices were not very numerous. Although logging camps had taken on a number of workers, vacancies were still being notified and an increasing number of placements were being effected. Throughout this Province manufacturing industries maintained satisfactory activity; this general statement is applicable to practically all industries at all important centres. Judging by the number of vacancies for building and construction workers still being received at the employment offices, activity in these lines had not begun the regular fall curtailment. Freight traffic was reported as being very heavy, while trade was stated to be excellent. The usual shortage of female domestic workers was reported. Reviewing the Province generally, it might be said that the employment situation was very satisfactory.

The demands for farm workers in the Province of Ontario showed a very considerable falling off in comparison with the month previous; applicants appeared to be about as numerous as vacancies. With no sign of slackening activity, manufacturing industries maintained their rather high levels of production, and there were some demands for additional workers, which were easily met. Throughout the Province building and construction were rapidly drawing to a close, and in consequence of this fact the demands for such workers had fallen off considerably. Vacancies for logging workers were fairly heavy and some slight temporary shortages of workers were reported from Northern Ontario. With no labour fluctuations of consequence, mining remained normal. Fair demands and practically no shortages were the features of the situation as far as female domestic workers were concerned.

Harvesting in the Province of Manitoba having been practically completed, vacancies notified to the Employment Service were not numerous, and were chiefly for experienced men for fall work. Brisk demands for workers for the logging industry were being registered, and Winnipeg was making many placements. Building and construction maintained a satisfactory level of activity, especially at Brandon and Winnipeg. As usual the calls for casual labourers were not numerous and were very easily met. There was a lessened demand for women domestic workers.

In Saskatchewan threshing was being finished up and there were few demands for workers. Some vacancies for men for fall farm work were being notified to the offices and sufficient men were available. Although building and construction was closing down to some extent, slight demands were still coming in, and workers were being despatched to fill them. There were numerous requests for experienced workers for logging camps. The demand for general labourers was very small, with the usual surplus of applicants. The number of women making application for domestic work equalled the requirements of such workers.

With considerable threshing yet to be done in some parts of Alberta, labour was rather plentiful throughout the Province, due to the influx from Saskatchewan and Manitoba. There was still some call for railroad labour. Bush workers were being asked for to some extent with local shortages of experienced men reported. Some vacancies for coal miners were opening up; the strike in this industry in the Drumheller district was affecting the situation there. As in Saskatchewan, the demands for and the number of women domestic workers practically coincided.

A few orders for bush and logging workers were being received at the various British Columbia employment offices, but no general improvement in this industry was reported. A fair volume of construction work was progressing satisfactorily and most building tradesmen were employed. Railroad construction labour was still being taken on. The metal mining industries remained normal. Manufacturing industries were commented upon as being fair. Generally speaking, conditions in the Coast Province were rather good and unemployment was comparatively small for the season.

EMPLOYERS' REPORTS.

Industrial activity for the first time since the beginning of April, showed a slight falling off on October 1, according to statements tabulated by the Dominion Bureau of Statistics from 6,241 employers, whose staffs aggregated 904,880 persons, as compared with 909,229 in the pre-

MONTHLY STATISTICS REFLECTING INDUSTRIAL CONDITIONS IN CANADA

*Figures for end of previous months. †Bradstreet. ‡*Maclean Building Review*. §For group figures see articles elsewhere in this issue. **Figures for four weeks ending October 29, 1927, and corresponding previous periods. ***The index of the physical volume of business includes, forestry, mining, manufacturing, employment in wholesale and retail trade, imports, exports, car loadings, shares traded and bank debits. Industrial commodity production includes forestry, mining, manufacturing and construction. Manufacturing includes consumers' goods and producers' goods. ††Preliminary. (1)Excluding lines east of Quebec. (2)Including lines east of Quebec.

ceding month. Although employment on the same date last year had shown a small advance, the situation then, as at the beginning of October of earlier years of the record, was not so favourable as on the date under review, when the index stood at 109.0, compared with 109.7 on September 1, and with 105.2, 98.3, 93.9, 99.5, 94.6 and 90.2 on October 1, 1926, 1925, 1924, 1923, 1922 and 1921, respectively. The number of persons employed by the reporting firms in January, 1920, is taken in every case as the base equal to 100.

Ontario firms afforded greater employment, while elsewhere there were contractions, of which the most marked were in the Maritime and Prairie Provinces. In the Maritime Provinces there were further large losses, involving more workers than those registered on the corresponding date last year, when, however, the index was slightly lower. Construction and transportation reported the bulk of the decline, although the tendency was also unfavourable in manufacturing logging and services. In Quebec, manufacturing and highway construction registered most of the decrease, while logging, mining, transportation, building and railway construction and trade afforded more employment. In Ontario, continued improvement was indicated, particularly in manufacturing, logging and trade. On the other hand, there were marked losses in construction and smaller reductions in transportation. In the Prairie Provinces, the falling off in employment was in contrast with the gain reported on the corresponding date last year; the index number then, however, was lower. The curtailment took place chiefly in construction, but also in manufacturing and services, while mining, transportation and trade were more active. In British Columbia, further moderate contractions were noted, mainly in construction, services and fish-canning, but logging and shipping reported heightened activity.

The trend of employment was upward in Montreal, Quebec, Toronto, Ottawa, Hamilton and Vancouver, but downward in Windsor and the Other Border Cities, and Winnipeg. In Montreal, transportation, building and trade reported the bulk of the gain, while little general change was noted in manufactures. In Quebec, practically all the advance took place in construction. In Toronto, manufacturing, particularly of textile products, was much busier, as were trade, services and communications; construction, on the other hand, was slacker. In Ottawa, manufacturing and trade were rather more active, while in transportation and construction there were small declines. In Hamilton, improvement was registered in construction and trade, other industries showing little general change. In Windsor and the Other Border Cities, the falling off in the number employed was mainly in automobile plants (in which considerable short time was also reported), and in transportation and construction. In Winnipeg, trade was decidedly more active, but there were reductions in building, communications and manufactures. In Vancouver, shipping was busier, and small gains were noted in manufactures as a whole, but services and some other industries reported losses.

There was a further small contraction in manufactures, largely in fish-preserving and sawmilling plants, although there was also a falling off in rubber, building material and iron and steel works. In the last-named group, considerable short time was reported. On the other hand, vegetable food factories showed important seasonal improvement, and there were also large gains in textile and electrical apparatus plants. Logging, mining, transportation and trade registered pronounced seasonal gains, but in construction and services there were extensive losses. An article elsewhere in this issue gives in some detail the employment situation as at the beginning of October.

Trade Union Report.

The situation among local trade unions at the close of September, as indicated by the returns tabulated from 1,601 labour organizations with an aggregate membership of 171,435 persons, was slightly more favourable than in August, the September unemployment percentage standing at 3.1 as against a percentage of 3.7 in the previous month. The change was very slight in comparison with the returns of September of last year, when 3.3 per cent of the members were idle. Manitoba and Saskatchewan alone reported small reductions in the volume of work afforded when compared with August, while all other provinces shared in the offsetting increase in employment. In comparison with the conditions of September last year improvement was apparent among New Brunswick, Quebec, Alberta and British Columbia unions, the change in Quebec being most pronounced, while in the remaining provinces there was slight curtailment of activity.

A report in more detail of the conditions among local trade unions at the close of September will be found elsewhere in this issue.

EMPLOYMENT OFFICE REPORTS.

Reports of the Employment Service of Canada for the month of September, 1927, showed 78,967 references to positions and a total of 77,242 placements, of which 65,503 were in regular employment and 11,739 in casual work. Regular placements totalled 60,579 for men and 4,924 for women. Vacancies reported to the Service numbered 88,426, of which 76,391 were for men and 12,035 for women. Applications for work were received at the offices from 73,169 men and 13,628 women, a total of 86,797. A marked increase due to the active demand for harvest workers in the west is recorded in the volume of business transacted when the figures are compared with those of the preceding month, and also with those of September a year ago, reports for August, 1927, showing 58,858 vacancies offered, 64,282 applications made, and 54,624 placements effected, while in September, 1926, there were recorded 64,106 vacancies, 60,692 applications for work, and 52,150 placements in regular and casual employment. In another section of this issue may be found a detailed report of the work of the offices for September, 1927, and for the quarterly period July to September of the current year.

PRODUCTION IN CERTAIN INDUSTRIES

Some figures indicating the recent movements of trade and industry are given in the table on page 1152.

The Dominion Bureau of Statistics reported that the physical volume of business in Canada, after seasonal adjustment, was maintained in September, the index published in the *Monthly Review of Business Statistics* being 144.1 in September, as well as in the preceding month. Mining and construction were more active in September, while the export of lumber and the production of newsprint, indicating the trend in the forestry division, were in slightly lesser volume. Most of the manufacturing industries showed moderate recession. Retail and wholesale trade was well maintained, and merchandise exports were somewhat greater. The increase in carloadings was not sufficient to counterbalance the seasonal adjustment. Bank debits were greater than in the corresponding month of any year since the record was first compiled, but heavy speculative trading was the principal cause of the marked increase.

Most lines of manufacturing enterprise showed a recession in September, the preliminary index—a weighted average of the physical volume of 16 important commodities used as raw materials or constituting finished products—was 144.1 compared with 156.6 in August. The index for September, 1926, was 145.8, being slightly greater than in the month under review.

The primary iron and steel industry was less active in September and the output of automobiles was, after seasonal adjustment, at a low level, the decline being due in part to the suspension of production by a large manufacturer pending the introduction of a new model.

The output of coal from Canadian mines during August increased 6 per cent over the production for the preceding month, and was 19 per cent greater than the average for August in the past five years. The figures were 1,313,856 tons in August as against 1,229,104 tons in July, and an average of 1,098,698 tons during the five preceding years. All the coal producing provinces except New Brunswick, showed an increase in production as compared with the preceding month, and the provinces of Saskatchewan, New Brunswick and British Columbia showed decreases as compared with the average for the month in the five preceding years.

Men employed in the coal mines of Canada during August numbered 27,210, of whom 20,917 worked underground and 6,293 on surface, as compared with a total of 26,237 in July, of whom 20,223 worked underground and 6,014 on the surface. Production per man was 48.2 tons in August as against 46.8 tons in July. During August the production per man-day was 2.3 tons, being the same as in July. The tonnage lost was largely due to lack of orders.

BUILDING PERMITS AND CONTRACTS AWARDED

According to a report prepared by the Dominion Bureau of Statistics, the value of the building permits issued by the municipal authorities in sixty-three cities in Canada during the month of September, 1927, amounted to $14,410,212, as compared with $29,651,888 in August, 1927, and $11,047,503 in September, 1926.

The *McLean Building Review* estimates the total value of the construction contracts awarded in Canada in October, 1927, at $47,135,400. Of this amount $18,693,900 was for business building; $15,886,900 for residential building; $9,535,600 for public works and utilities, and $3,019,000 for industrial building. The apportionment of contracts awarded, by provinces, during October, 1927, was: Ontario, $20,356,300; Quebec, $18,794,500; British Columbia, $3,777,000; Prairie Provinces, $2,686,000, and the Maritime Provinces, $1,521,600.

The "contemplated new construction" in Canada during October, 1927, according to the same *Review,* totalled $49,734,700, $17,662,100 of this amount being for residential building, $18,949,300 for business building; $3,760,500 for industrial building, and $9,362,800 for engineering construction (including bridges, dams and wharves, sewers, watermains, roads, streets and general engineering.

The total value of construction contracts awarded in the Dominion during the January-October period, 1927, was $352,009,100, and was classified as business building, $129,592,700; residential, $106,866,300; public works and utilities, $80,479,900 and industrial undertakings, $35,070,200. The distribution by provinces during the same period was: Ontario, $159,219,300; Quebec, $115,621,300; Prairie Provinces, $42,274,300; British Columbia, $26,277,100, and the Maritime Provinces, $8,617,100.

EXTERNAL TRADE.

A summary of Canadian trade prepared by the Department of National Revenue shows that in September, 1927, the merchandise entered for consumption amounted to $91,802,777, as compared with $99,348,340 in August, 1927, and with $85,562,911 in September, 1926. The chief imports in September, 1927, were: Iron and its products, $20,652,653; non-metallic minerals and products, $14,884,015, and fibres, textiles and textile products, $14,032,649. The domestic merchandise exported amounted to $97,412,316 in September, 1927, as compared with $94,216,194 in August, 1927, and with $92,224,610 in September, 1926.

The chief exports in the same month were in the group of agricultural and vegetable products, mainly foods, $29,140,941; wood, wood products and paper, $25,423,419, and animals and animal products, $16,608,027.

In the six months ending September, 1927, exports of agricultural and vegetable products, mainly foods, were valued at $196,761,773; wood, wood products and paper, $144,412,203, and animals and animal products, $76,575,468.

Strikes and Lockouts

The time loss due to industrial disputes in October, 1927, was greater than during September, 1927, and October, 1926. There were in existence during the month twenty-one disputes, involving 4,058 workpeople, and resulting in a time loss of 46,844 working days, as compared with twelve disputes in September, involving 2,616 workpeople and resulting in a time loss of 9,611 working days. In October, 1926, there had been recorded eight disputes, involving 705 workpeople and resulting in a time loss of 12,142 working days. One of the strikes and lockouts commencing prior to October terminated during the month and nine of the strikes and lockouts reported as commencing during October also terminated during the month. At the end of October, therefore, there were on record eleven strikes and lockouts, affecting 1,705 workpeople, not including those strikes and lockouts in which employment conditions were reported to be no longer affected but which had not been formally called off.

Prices

The cost per week of a list of twenty-nine staple foods for an average family of five in terms of the average retail prices in some sixty cities was $10.99 at the beginning of October, as compared with $10.87 for September; $10.93 for October, 1926; $10.89 for October, 1925; $10.31 for October, 1924; $10.65 for October, 1923; $10.23 for October, 1922; $11.48 for October, 1921; $15.83 for October, 1920; $16.92 for June, 1920 (the peak); $13.54 for October, 1918; and $7.99 for October, 1914. The increase was due mainly to seasonal advances in the prices of eggs, milk and butter, although slight advances occurred in the prices of mutton, pork, bacon, lard, cheese, rolled oats, rice and beans. The most important decline occurred in the price of potatoes, while there were slight declines in the prices of beef, veal, flour, evaporated apples and yellow sugar. Including the cost of fuel and rent with that of foods the total budget averaged $21.18 at the beginning of October, as compared with $21.05 for September; $21.14 for October, 1926; $21.11 for October, 1925; $20.67 for October, 1924; $21.16 for October, 1923; $20.87 for October, 1922; $22.01 for October, 1921; $26.46 for October, 1920; $26.92 for July, 1920 (the peak); $21.48 for October, 1918; and $14.48 for October, 1914. Fuel was slightly higher, due to an increase in the price of anthracite coal. Rent was also slightly higher.

In wholesale prices the index number calculated by the Dominion Bureau of Statistics was slightly higher at 152.4 for October, as compared with 151.4 for September; 151.3 for October, 1926; 156.0 for October, 1925; 157.0 for October, 1924; 153.1 for October, 1923; 148.1 for October, 1922; 155.6 for October, 1921; 236.3 for October, 1920; 256.7 for May, 1920 (the peak); and 206.9 for October, 1918. In the classification according to chief component materials two of the eight main groups advanced, two moved downward, and four were practically unchanged. The Animals and their Products group and the

Textile and Textile Products group advanced, the former due to increases in the prices of butter, milk, eggs, sole leather, mess pork and cattle, which more than offset declines in the prices of fresh meat, fowl, bacon and muskrat skins; and the latter due to higher prices for cotton textiles, raw wool and hessian, which more than offset slight declines in the prices of raw cotton, silk and jute. The Vegetables and their Products group was somewhat lower, declines in the prices of grains, flour, shorts, raw sugar, rosin, turpentine and straw more than offsetting advances in the prices of foreign fruits, rubber, cocoa beans, coffee and potatoes. A decline in the price of steel sheets caused a decrease in the Iron and its Products group. In the Non-Ferrous Metals group lead, tin, spelter and solder declined, while silver and some copper products advanced. The group was unchanged. The Wood and Wood Products group, the Chemicals and Allied Products group, and the Non-Metallic Minerals group were also practically unchanged.

The Coal Situation in Europe

In a leading article on "The Outlook for Coal," the *South Wales Journal of Commerce* of September 8 said: "This year's European coal production is at the rate of over 150 million tons per annum in excess of that in 1926, and over 70 million tons greater than that in 1925. This great increase is the deadweight which more than anything else accounts for the depression in the European mining industry, and particularly that of the United Kingdom."

The prospects of any agreement between coal-producing countries appear more remote than ever, although the *Präger Presse* reports a rumour from Berlin of the creation of an international commission to study the situation in the coal trade. This Commission will, it is said, include Germany, Czechoslovakia, Switzerland, Austria and probably also Holland, Belgium and Poland. Negotiations are said to be taking place to secure the adherence of England and France.

In reporting the Paris meeting of the International Miners' Executive, *Vorwaerts* (Berlin) of August 10 stated that "The International Miners' Executive intends to give every encouragement to the formation of an international coal entente and to complete the statistical data already at hand. By this means the numerous difficulties in the way of an international coal agreement, as recently exposed in the British House of Commons during a debate, when a Labour representative urged the summoning of an international conference of coal-producing countries for the formation of an organ of control for world export prices, will be more easily overcome."

However, in England there does not appear to be any desire to arrive at an understanding. The *Times Trade and Engineering Supplement* stated in an article of July 30 that: "For the British coal mining industry to consent at the present time to enter into anything in the nature of an international coal cartel would be most foolhardy. To do so would virtually mean allowing Germany to capitalize the whole of her Reparations supply and other nations to fund that portion of their production which has expanded purely as a result of our own troubles and the creation of artificial barriers against the entry of British coal. When we have won back a considerable portion of our pre-war custom in the European markets, it will be soon enough to enter into such *pourparlers*, although it may be only under the most severe pressure that British coal-owners will consent to enter into engagements designed to interfere with the free access of coal to its natural markets or to set up arbitrary price-levels against consumers. But it may be desirable to anticipate that day by giving the industry a rather more composite structure so as to enable it to act in unison on those and other questions which affect our trade."

Mr. F. G. Morehouse, president of the Nova Scotia Teachers' Union and principal of Cumberland County Academy, in a recent address, suggested that special grants should be made to teachers who devote themselves to the service of rural schools; that the standard of teachers' qualifications should be raised, and that an adequate pension scheme should be provided for teachers. Mr. Morehouse stated that a committee of five active teachers was engaged in investigating the pension systems in Great Britain and other countries, and would present a report early next year regarding a pension scheme for teachers in the province. About 1,400 teachers in the province are now members of the union. The teachers organizations in Saskatchewan and British Columbia are asking for provincial legislation on the same lines.

PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907, DURING THE MONTH OF OCTOBER, 1927

DURING the month of October three applications for the establishment of Boards of Conciliation and Investigation under the terms of the Industrial Disputes Investigation Act, 1907, were received in the Department of Labour, as follows:—

(1) From the underground employees of the Western Fuel Corporation of Canada, Limited. The dispute arose in connection with negotiations concerning a new wage agreement, the employees requesting the restoration of a daily bonus of 60 cents, which had been deducted in June, 1925; also the readjustment of wage rates and working conditions. Mr. F. E. Harrison, representative of the Department of Labour, resident in Vancouver, and Mr. J. D. McNiven, Deputy Minister of Labour for British Columbia, conferred at Nanaimo with the disputing parties, but were unsuccessful in effecting a settlement. Application for a Board of Conciliation and Investigation was then made by the employees, and the Minister of Labour established a board composed as follows: His Honour Judge C. H. Barker, Nanaimo, B.C., chairman, appointed by the Minister in the absence of a joint recommendation from the other two members, Messrs. D. S. Wallbridge, Vancouver, B.C., and Joseph Hitchin, Nanaimo, B.C., nominees of the company and employees respectively.

(2) From certain employees of the Toronto, Hamilton and Buffalo Railway Company, being freight shed foremen, freight checkers, truckers, clerks, messengers, etc.

(3) From certain workmen, being linemen and cable splicers, employed by the Hydro Electric System of the city of Winnipeg.

Other Proceedings under the Act

An application was reported in the May issue of the Labour Gazette as having been received from clerks employed in the mechanical departments, car and locomotive foremen's offices, being members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees. The dispute concerned certain proposals submitted by the employees looking to an agreement as to rates of pay and working conditions, and including a request for increased wages. The number of employees directly affected by the dispute was given as 275. Action looking to the establishment of a board was held in abeyance during the summer pending the outcome of direct negotiations. Efforts made by the parties concerned to bring about a satisfactory adjustment of the dispute proving fruitless, the Minister of Labour during October established a board, and appointed members thereto as follows: Professor Edouard Montpetit, Montreal, chairman, appointed on the joint recommendation of the other two members of the Board; Sir William Stavert, Montreal, appointed by the Minister in the absence of a recommendation from the employing company; and Mr. J. T. Foster, employees' nominee.

The May issue of the Labour Gazette contained the text of the report of the Board of Conciliation and Investigation which dealt with a dispute between the Shipping Federation of Canada and the Canadian Pacific Steamships Limited and certain of their employees, being checkers and coopers, members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees. The board was composed of Mr. Farquhar Robertson, Montreal, chairman, appointed on the joint recommendation of the other two members; Sir William Stavert, Montreal, appointed by the Minister in the absence of a recommendation from the employers; and Mr. J. T. Foster, Montreal, nominee of the employees. Two hundred and twenty-five employees were stated to be directly affected by the dispute, which related to the employees' request for increased wages and changed working conditions. The report of the board was unanimous, and recommended an increase of three cents an hour to the employees concerned. This recommendation was accepted by the employees but rejected by the shipping interests. Word reached the Department recently, however, to the effect that the shipping interests had notified their respective employees of an increase of three cents per hour to the checkers, coopers, etc., effective as from October 1 of this year.

Reference appeared in last month's Labour Gazette to the receipt in the Department of an application for the establishment of a Board of Conciliation and Investigation to deal with a dispute between the Canadian National, Canadian Pacific and Temiskaming and Northern Ontario Railways, and certain of their employees, being locomotive engineers, members of the Brotherhood of Locomotive Engineers. The application was made on behalf of 7,000 employees, who requested a fifteen per cent wage increase. During the

last week of September, the Honourable Mr. Heenan, Minister of Labour, requested representatives of the railways and of the union concerned to meet him in Ottawa, where a conference, over which he presided, was held. It was agreed at the conference that certain suggestions made by the Minister as to a basis of settlement of the dispute would be considered by the railway companies and the men. The negotiations, however, which continued for a couple of weeks, proved unsuccessful, and the Minister of Labour proceeded to Montreal to consult further with the various parties concerned. Mr. Heenan held several conferences with the railway and union officials, and with his assistance a settlement was reached whereby the locomotive engineers secured a wage increase averaging five per cent, effective as from July 1, 1927.

CONCILIATION AND ARBITRATION BOARDS IN BELGIUM

CONCILIATION and arbitration boards for the prevention or settlement of collective disputes between employers and workpeople were established in Belgium last year, the order for their establishment taking effect in June, 1926. An account of the first year's working of the new boards was given in a recent issue of the *Revue du Travail* (Belgium).

The Boards are of two kinds, "official" and "free". The former are set up by the Minister of Industry, Labour and Social Welfare in any district in which it is considered necessary. Each official board consists of a chairman, a vice-chairman, a secretary, three members representing the employers and three representing the workpeople. A deputy member must be appointed for each full member to act in the absence of the latter. The employers' and workers' representatives are appointed by the minister from lists of candidates submitted by the respective organizations in the district concerned. "Free" conciliation and arbitration boards are set up under agreements concluded between employers and workers in an undertaking or a group of undertakings, or between associations of employers or workpeople. These boards must be approved by the Minister of Industry, Labour and Social Welfare, who may introduce into the agreement such modifications as he may consider necessary, defining especially the competence of the board, the undertakings or associations to which it is applicable, and the method of election of members. Approved boards deal with disputes between the parties to the agreement instituting the board. Any difference with regard to the terms of the agreement is referred to the "official" board, which declares whether it is to be dealt with by the approved board or whether it is itself the competent authority to deal with the matter.

If a dispute arises which is likely to result in a strike or a lock-out, one of the parties must inform the chairman of the competent board, who, within five days, must convene a meeting of the board and invite the parties or their representatives to attend. The board hears the statements of the parties, makes any necessary inquiries and invites the parties to make proposals with a view to conciliation. If all attempts at conciliation fail the board will then suggest that the dispute be settled by arbitration, offer its services for this purpose and invite the parties to select an arbitrator. If arbitration is agreed on, the parties must sign a document indicating the points for arbitration and containing an undertaking to accept the findings of the arbitrator. If the offer of arbitration is rejected by one or both of the parties, the minutes of the proceedings of the board, together with a statement dealing with the questions in dispute, means for settling the dispute, and the extent of the responsibility of each party for the failure of conciliation, are to be sent to the Minister of Industry, Labour and Social Welfare.

During the first year of the working of the new system, that is, up to June 30, 1927, the official boards were called upon to deal with 285 disputes, 255 of which related to wage questions. The results of the intervention of the boards were as follows:—

Conciliation effected in 120 disputes; arbitration accepted in 11 disputes; no conciliation effected in 66 disputes; arbitration refused in 45 disputes; outside province of board, 12 cases; results unknown in 31 disputes. Total, 285.

Painters in Winnipeg recently asked the city council to provide for the licensing of painters in the city as a means of keeping this work in the hands of responsible workmen. The request was referred to a committee but it was pointed out that the city charter gives no authority to the council to issue licenses to painters in the city.

STRIKES AND LOCKOUTS IN CANADA DURING OCTOBER, 1927

THE number of strikes and lockouts in existence in Canada during October was twenty-one, as compared with twelve during the preceding month. The time loss for the month was greater than during October, 1926, being 46,844 working days as compared with 12,142 working days during the same month last year.

Date	Number of disputes	Number of employees involved	Time loss in working days
Oct. 1927..	21	4,058	46,844
Sept. 1927.....	12	2,616	9,611
Oct. 1926.....	8	705	12,142

The record of the Department includes lockouts as well as strikes, but a lockout, or an industrial condition which is undoubtedly a lockout, is rarely encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout, included as such in the records of the Department, is a cessation of work involving six or more employees at its commencement and lasting at least one working day. Disputes of less than one day's duration, and disputes involving less than six employees, are included in the published record only when ten days' or more time loss is caused, but a separate record of such disputes is maintained in the Department, and the figures are given in the annual review.

The figures printed are inclusive of all disputes which come to the knowledge of the Department, and the methods taken to secure information practically preclude probability of omissions of a serious nature. Information as to a dispute involving a small number of employees, or for a short period of time, is frequently not received until some time after its commencement.

Nine disputes, involving 914 workpeople, were carried over from September. One of the strikes and lockouts commencing prior to October terminated during the month, and nine of the strikes and lockouts commencing during October also terminated during the month. At the end of October, therefore, there were on record eleven strikes and lockouts, as follows: pulpwood cutters, Northern Ontario; bakers, Montreal, P.Q.; ladies' clothing factory workers, Toronto, Ont.; men's clothing factory workers, Montreal, P.Q.; electrotypers, Toronto, Ont.; blacksmiths, Saskatoon, Sask.; stonecutters, Montreal, P.Q.; sheet metal workers, Montreal, P.Q.; plasterers, Vancouver, B.C.; carpenters, Toronto, Ont.; and building trades, Toronto, Ont.

The record does not include minor disputes such as are described in a previous paragraph, nor does it include disputes as to which information has been received indicating that employment conditions are no longer affected, although the unions or organizations concerned have not yet declared them terminated. Information is available as to two such disputes, namely, fur workers at Winnipeg, Man., September 25, 1926, and plumbers at Windsor, Ont., April 5, 1927.

Of the disputes which commenced during the month, two were against the dismissal of an employee, two for union wages and working conditions, one against alleged violation of agreement, one for recognition of union, one for increase in wages, three for union shop and two were in sympathy with another strike. Of the ten strikes and lockouts which terminated during the month five were in favour of employers and five in favour of the employees.

The following paragraphs give particulars in regard to certain disputes, in addition to information given in the tabular statement.

Pulpwood Cutters, Northern Ontario.—During September, as stated in the October issue of the Labour Gazette, a number of loggers ceased work near Sudbury, demanding an increase in wages, and later the dispute spread throughout the northern part of Ontario, involving numbers of loggers at different camps. Reports indicated that in some cases the employers complied with the demands of the men, and in others attempted to replace the strikers, who in turn tried to secure work elsewhere.

Bakers, Montreal, P.Q.—In connection with this dispute which commenced in May it was reported that some of the strikers had secured work elsewhere during the month but that the strike was still unterminated.

Men's Clothing Factory Workers, Montreal, P.Q.—In this dispute, commencing June 7, 1927, a number of the strikers were reported to have secured work elsewhere during the month, leaving the number on strike at three.

Stonecutters, Montreal, P.Q.—It has been reported that a number of the strikers secured work elsewhere during the month, bringing the number involved down from forty at the beginning of the month to twenty at the end.

Sheet Metal Workers, Montreal, P.Q.—In this dispute it was reported that most of the strikers had secured work in other shops under the conditions and at the wages demanded by the union, and at the end of October there were still three on the strike list.

Elevator Erecters, Toronto, Ont.—Employees of three firms manufacturing and installing elevators ceased work on September

29 in order to secure a signed agreement between their employers and the union providing for an increase in wages and an agreement with the union. The union had begun negotiations with the employers early in the year, and had been unsuccessful. The dispute affected work being done by the firms at Ottawa and several other cities. On October 31 work was resumed, agreements having been signed providing for wages as at $1 for mechanics and 70 cents per hour for helpers, also eight hours per day and forty-four hours per week as before the strike.

COAL MINERS, NEW WATERFORD, N.S.—An employee, a boy, having been dismissed for cause, the miners in the colliery ceased work on October 11, so that the mine was idle for one day. The following day the strikers returned to work. The company undertook to carry out some repairs, which it was claimed the employees had been requesting, so that the regular work was not resumed for some time. Some of the employees affected claimed that this was done as a punishment for going on strike, and the provincial Deputy Minister of Mines came and inspected the colliery.

COAL MINERS, DRUMHELLER, ALTA.—Employees in certain of the mines in the neighbourhood of Drumheller ceased work on October 18, 1927, in order to secure recognition of their union, the Mine Workers' Union of Canada. Other mines in the neighbourhood, employees of which belonged to the United Mine Workers of America, were not involved. Some of the operators involved filled their orders for coal from other mines in the Red

STRIKES AND LOCKOUTS DURING OCTOBER, 1927

Industry, occupation and locality	Number of employees involved	Time loss in working days	Remarks
(a) Strikes and Lockouts occurring prior to October, 1927			
LOGGING—			
Pulpwood cutters, Northern Ontario	700	7,000	Commenced Sept. 24, 1927, for increase in wages. Not reported terminated.
MANUFACTURING—			
Vegetable Foods—			
Bakers, Montreal, P.Q.	26	624	Commenced May 1, 1927, for increase in wages. Unterminated.
Clothing (including knitted goods)—			
*Ladies' clothing factory workers, Toronto, Ont.	4	104	Alleged lockout, commenced June 30, 1926; enforcement of non-union conditions. Unterminated.
Men's clothing factory workers, Montreal, P.Q.	10	182	Commenced June 4, 1927, against change to the piece rate system and to maintain union conditions. Unterminated.
Printing and Publishing—			
*Electrotypers, Toronto, Ont.	3	78	Commenced December 20, 1926, against discharge of employees for union activity. Unterminated.
Iron, Steel, and Products—			
*Blacksmiths, etc., Saskatoon, Sask.	9	224	Commenced May 17, 1927, for increase in wages and recognition of union. Unterminated.
Non-Metallic Mineral Products—			
Stonecutters, Montreal, P.Q.	40	780	Commenced June 10, 1927, for increase in wages. Unterminated.
CONSTRUCTION—			
Buildings and Structures—			
Sheet metal workers, Montreal, P.Q.	22	312	Commenced September 1, 1927, for increase in wages. Unterminated.
Elevator erecters, Toronto, Ont., and certain other cities.	100	2,470	Commenced September 29, 1927, for increase in wages and union agreement. Terminated October 3, 1927, in favour of employees.
(b) Strikes and Lockouts commencing during October, 1927.			
MINING—			
Non-ferrous smelting and quarrying—			
Coal miners, New Waterford, N.S.	655	655	Commenced October 11, 1927, against dismissal of employee. Terminated October 12, 1927, in favour of employer.

*Reports indicate that the strikers have been replaced but there are still a number of employees out and on the strike benefit list of the union.

STRIKES AND LOCKOUTS DURING OCTOBER, 1927—*Concluded*

Industry, occupation and locality	Number of employees involved	Time loss in working days	Remarks
(b) Strikes and Lockouts commencing during October, 1927—*Concluded*			
MINING—*Concluded*			
Non-ferrous smelting and quarrying—Concluded			
Coal miners, Robb, Alberta..	42	336	Commenced October 12, 1927, for increase in wages. Terminated October 22, 1927, in favour of employees.
Coal miners, Drumheller, Alberta.....	600	6,400	Commenced October 18, 1927, for recognition of union. Terminated October 31, 1927, in favour of employers.
MANUFACTURING—			
Clothing (including knitted goods)—			
Hat makers, Toronto, Ont....	30	60	Commenced Oct. 7, 1927, against discharge of employee. Terminated Oct. 10, 1927, in favour of employer.
Men's clothing factory workers, Montreal, P.Q.....	32	220	Commenced Oct. 3, 1927, for union wages and working conditions. Terminated Oct. 14, 1927, in favour of employees.
CONSTRUCTION—			
Buildings and Structures—			
Terrazzo workers, Toronto, Ont.....	60	120	Commenced Oct. 3, 1927, against alleged violation of agreement. Terminated Oct. 5, 1927, in favour of employees.
Plasterers, Vancouver, B.C...	36	380	Commenced Oct. 3, 1927, to enforce employment of union helpers. Unterminated.
Carpenters, Toronto, Ont.....	927	22,248	Commenced Oct. 5, 1927, for closed shop. Unterminated.
Plumbers, electricians and hoisting engineers, Toronto, Ont.....	30	75	Commenced Oct. 6, 1927, in sympathy with dispute of carpenters. Terminated Oct. 10, 1927, in favour of employers.
Carpenters, Vancouver, B.C...	7	126	Commenced Oct. 11, 1927, for employment of a union hoisting engineer. Terminated Oct. 31, 1927, in favour of employees.
Building trades, Toronto, Ont..	600	4,200	Commenced Oct. 24, 1927, in sympathy with dispute of carpenters. Unterminated.
TRANSPORTATION—			
Water—			
Longshoremen, Toronto, Ont..	125	250	Commenced Oct. 21, 1927, for increase in wages and improved working conditions. Terminated Oct. 25, 1927, in favour of employers.

Deer Valley operated by them, and attempts were made by the strikers to have employees in other mines join in the strike. The employees refused. Toward the end of the month several of the operators re-opened the mines with a small number of men working. Explosions causing some damage to surface equipment occurred on October 31 at two of these mines, and there were rumours that men on strike had caused them, but it was reported that the police had failed to find any clues as to the guilty parties. On October 31 the strike was called off, and the following day the men resumed work under the same conditions as before the strike, all the mines resuming operations except one of those damaged.

COAL MINERS, ROBB, ALTA.—The employees ceased work on October 12 in order to secure an increase in wages, and on October 22 as a result of negotiations an agreement was signed by the unions concerned, the Mine Workers' Union of Canada, and the employing company, providing for a higher wage scale.

HAT-MAKERS, TORONTO, ONT.—Certain employees ceased work on October 7 because the foreman had been dismissed owing to the introduction of new methods of work for which he was considered not suitable. The following day most of the employees returned to work.

MEN'S CLOTHING FACTORY WORKERS, MONTREAL, P.Q.—The employees ceased work in

several establishments in Montreal on October 3 in order to secure or to maintain the wages and working conditions provided in the union agreement with the various employers, demanding higher wages and the maintenance of the forty-four hour week. By the end of the month the employers concerned signed agreements in accordance with the demands of the union.

TERRAZZO WORKERS, TORONTO, ONT.—Employees of several contractors in Toronto ceased work on October 3, alleging that the employers had violated the agreement. On October 5 they returned to work, the employers having undertaken to abide by the agreement in respect to the conditions complained of which was said to be in connection with helpers.

PLASTERERS, VANCOUVER, B.C.—Employees of certain firms ceased work on October 3 in order to enforce a provision of the union agreement that plasterers would accept material only from union helpers, the helpers having a similar agreement in their union agreement that they would supply material only to union plasterers. At the end of the month the dispute was still unterminated, but two of the employers involved had agreed to the demands of the union.

CARPENTERS, VANCOUVER, B.C.—Carpenters employed by one firm ceased work on October 11 to secure the dismissal of a non-union hoisting engineer who was alleged to have no qualifying certificate. Toward the end of the month it was reported that the employer had secured non-union carpenters. At the end of the month, however, the dispute was settled, the employer agreeing to employ a union hoisting engineer until the job was finished.

CARPENTERS AND SYMPATHETIC STRIKES OF BUILDING TRADES, TORONTO, ONT.—Carpenters employed by certain contractors in Toronto ceased work on October 5 to enforce a demand for a closed shop for the union to which they belonged, the United Brotherhood of Carpenters and Joiners of America, after January 1, 1928. The union had also proposed an increase in wages from 90 cents per hour to $1 on that date, to which the contractors had agreed. Some of the employers concerned were employing carpenters, members of the Amalgamated Carpenters of Canada, and had a signed agreement with that union which did not expire until December 31, 1927. This union was formed by certain locals of the Amalgamated Society of Carpenters and Joiners, a British union which had locals in Canada and the United States until 1925, when it withdrew from North America. The Minister of Labour, although the dispute had not been officially brought to the attention of the Department, in view of the important interests involved, instructed the resident officer of the Department in Toronto to see the parties involved and offer the machinery of the Department either through the Industrial Disputes Investigation Act or otherwise, in an effort to promote an agreement. On October 6 certain other building trades, plumbers, electricians and hoisting engineers, members of international unions, ceased work in sympathy with the carpenters on jobs where carpenters, members of the international union, were on strike. These trades were ordered back to work on October 10 by the officers of their unions. On the same day the Minister met the parties to the dispute at Toronto, but no settlement was reached. On October 24 other building trades unions were called out on jobs where carpenters were employed to take the place of carpenters on strike, the necessary authority having been secured from the unions concerned, which were affiliated with the Building Trades Council of Toronto and the Building Trades Department of the American Federation of Labour. The bricklayers' and stonemasons' union being parties to an agreement with the contractors which prohibited participation in sympathetic strikes, its members were not called out, but on many jobs it was considered inevitable that they would be unable to work in the absence of other employees. The number of men in these building trades affected was variously reported as between 200 and 1,000, the Building Trades Council reporting the number at 600. On October 27 the employers secured a temporary injunction from a judge restraining the officers of the unions from certain activities in carrying on the sympathetic strike. The Minister, at the request of the Mayor of Toronto, arranged to meet the parties to the dispute on October 28, but on his arrival he found that the officers of the unions on strike refused to attend the conference because the contractors had applied for and secured the injunction against them. After discussing the matter with the other parties to the dispute the Minister took the matter up with the officers of the unions on strike, and informed them that the contractors would have the injunction withdrawn if the unions would call off the sympathetic strike while further negotiations were carried on. The union officers refused this proposal. Under the terms of the injunction the unions were hampered in making effective the sympathetic strike. This situation continued until October 31

when the hearing before a judge to make the injunction permanent took place, the injunction being refused. Early in November negotiations were resumed, the Minister meeting the parties concerned at the request of the Mayor of Toronto, and a settlement proposed by the Minister was accepted. This provided for a resumption of work on November 8, all legal proceedings to be dropped, an agreement to be entered into between the contractors and the United Brotherhood of Carpenters and Joiners of America for one year from January 1, 1928, with wages at $1 per hour, 44 hours per week, questions of overtime working conditions, etc., to be agreed upon, all carpenters engaged by the contractors to be employed under the terms of the above agreement, all men on strike to be reinstated without discrimination, and a grievance committee consisting of representatives of the various parties, appointed by the Minister of Labour, to adjust possible disputes arising out of certain of the terms of settlement.

LONGSHOREMEN, TORONTO, ONT.—Employees on the docks of three shipping companies at Toronto ceased work on October 21 in order to secure increases in wages from 40 cents per hour to 45 cents and certain improvements in conditions. A number of them returned to work within a few hours and others from day to day, and on October 25 it was reported that practically all had returned to work, under the same conditions as before the strike.

STRIKES AND LOCKOUTS IN GREAT BRITAIN AND OTHER COUNTRIES

THE latest available information as to strikes and lockouts in various countries is given in the LABOUR GAZETTE from month to month, bringing down to date that given in the issue for February, 1927, as an addendum to the review of strikes and lockouts in Canada during 1926. The latter review included a table summarizing the principal statistics as to strikes and lockouts since 1918 in the several countries for which such figures were available. Many countries publish these statistics only once each year, the figures being issued in some cases after an interval of as much as two years, so that for such countries the latest figures are not for relatively recent dates.

Great Britain and Northern Ireland

The number of disputes reported as beginning in September was 18, involving (directly and indirectly) approximately 3,900 workpeople. In addition, 12 disputes were carried over from the previous month, making the total number of disputes in progress during the month 30, involving 15,200 workpeople, and resulting in a time loss of 84,000 working days. Of the 18 disputes beginning in the month, 7 arose on questions respecting wages, 5 on questions respecting the employment of particular classes or persons, 4 on questions of trade union principles, and 2 on other questions. Settlements were reached in 19 disputes, one in favour of workpeople, 7 in favour of employers, and 11 were compromised. In the case of two other disputes, work was resumed pending negotiations.

The strike of some 2,000 coal miners near Durham, which began in May when the miners refused to work one shift on Saturday, rather than two shifts on alternate Saturdays, the dispute involving stoppages of work on Saturdays only, had not been settled at the end of September.

Another coal mining dispute, involving about 1,650 workpeople which began on August 26 against a proposed reduction in rates of wages and of piece-work rates, was settled on September 24, when a modified reduction was accepted until December 31, pending further adjustments.

United States

The Bureau of Labour Statistics have adopted a new system of collecting data and of presenting statistics on industrial disputes in a more complete form than previously. The number of disputes in effect at the end of the month, as well as the number beginning during the month, the number of workers involved in these disputes and the number of "man-days" lost during the month, are now given. The following table is a summary of disputes for June, July, and August, with preliminary figures only for July and August.

Month and year	Number of disputes		Number of workers involved in disputes		Number of man-days lost during month
	Beginning in month	In effect at end of month	Beginning in month	In effect at end of month	
June, 1927	75	102	18,585	196,047	4,859,468
July, 1927	70	105	33,461	199,422	5,236,963
August, 1927	63	71	7,327	182,845	4,941,789

The strike of 2,000 labourers and hod carriers in Rhode Island, who went out on June 1, for an increase in wages, was reported to have terminated on August 25, but the terms of the settlement were not reported.

A dispute between theatre owners and their employees in Chicago was the cause of the closing down of some 350 theatres in that city from August 29 to September 5, thus throwing out of work about 15,000 employees. When the new proprietors of one theatre proposed to reduce the number of moving picture machine operators from four to two, a strike was threatened, whereupon the employers' association closed all the theatres. Demands had previously been made by various classes of employees. Negotiations resulted in the settlement of the dispute, granting the moving picture machine operators their demand, the stage hands receiving a partial increase in wages, while a compromise was reached with the musicians, who demanded that not less than a four-piece orchestra be installed in every theatre.

Bituminous Coal Miners' Dispute.—As mentioned in the LABOUR GAZETTE for October, this dispute was settled in all the other states with the exception of Pennsylvania and Ohio. In these two states little progress was made towards effecting a settlement in October. In Pennsylvania disorders contined, but in spite of this, production under non-union conditions was reported to be increasing. In Ohio a number of new court injunctions against union members were granted to prevent them from interfering with the operations of the mines and non-union production continued. The Coal Operators Association still held out against the demands of the union. In both of these two states, a number of the smaller operators signed agreements to continue at the Jacksonville agreement rates.

Lignite Coal Miners' Dispute, Colorado.—A strike of some 9,000 coal miners in Colarado began on October 18 for an increase in wages, tying up operations completely in the northern field and partially in the southern field. An injunction against picketing, effective on November 1, put an end to all picketing and resulted in a resumption of work by a few of the smaller mines. The miners are organized by the Industrial Workers of the World.

Belgium

During August, 15 strikes began and 9 disputes were still in progress from the previous month, making a total of 24 disputes in progress during the month, involving 7,500 workers. The time loss was 133,409 working days. Of the 15 strikes beginning in the month, 9 were over wages questions, 4 over discharge of workers and the remaiinng 2 over other questions. Fourteen disputes were settled during the month, 5 in favour of workers, 4 by compromise and 5 in favour of employers.

Finland

During August, 18 disputes were in progress, involving 97 establishments and 10,611 workpeople.

France

The number of disputes reported for January, 1927, was 24, involving 1,794 workers; for February, 30 disputes involving 1,959 workers; for March, 49 disputes involving 15,595 workers.

Wages were the chief cause of dispute, of 14 disputes in January, of 20 in February and of 35 in March, and the reinstatement of discharged workers the object of 5 disputes in January, 4 in February and 5 in March.

The results of disputes were as follows: in January, 4 were settled in favour of workers, 19 in favour of employers, one by compromise; in February, 11 in favour of workers, 13 in favour of employers and 6 by compromise; in March, 9 in favour of workers, 25 in favour of employers, 12 by compromise, and 3 were unterminated or the result unknown.

Germany

A strike of some 70,000 lignite coal miners took place in Central Germany on October 17, for an increase in wages of 15 per cent. The dispute was reported to have been settled on October 21 by reference to a board of arbitrators who granted an increase of 11½ per cent to the miners.

Switzerland

During the year 1925, there were 42 strikes and no lockouts. The number of workers involved was 3,299.

The Commissioner General of Immigration for the United States announced on October 28 that Canadians who "commute" across the border to work on the United States side will have to conform to the terms of the border ruling of the Immigration Department if they wish to retain their status after December 1. Canadian-born commuters will have to take out non-quota visas and passports, declaring themselves immigrants in the United States. Canadians born outside the Dominion will have to get entry under the quota or at least register themselves on the quota list of the country of their birth.

COMBINES INVESTIGATION ACT, 1923

Inquiry of Commissioner Into the Proprietary Articles Trade Association

THE report of the Commissioner appointed by the Minister of Labour under the Combines Investigation Act to inquire into the Proprietary Articles Trade Association (LABOUR GAZETTE, January, 1927, page 2) was received by the Minister on October 26 and was published on the following day. It will be recalled that following an interim report by the registrar of the Combines Investigation Act, published a year ago (LABOUR GAZETTE, December, 1926, page 1176; October, 1926, page 945), it was claimed by the Proprietary Articles Trade Association that the association had not had adequate opportunity to present its side of the case. A request was then made by the association to the Minister of Labour for a formal inquiry by a specially appointed commissioner. While expressing the view that the registrar's report had been made only after full consideration of both sides of the case, the minister stated that rather than take any course which could be considered as in any way unfair to the trade, he would comply with their request. Accordingly, Mr. L. V. O'Connor, barrister, of Lindsay, Ontario, was appointed commissioner, and Mr. A. R. McMaster, K.C., Montreal, was appointed by the Minister of Justice as counsel to conduct the investigation. Sittings were held in Montreal, Toronto and Winnipeg, and occupied 51 days, the evidence comprising about 5,500 pages.

"Evidence was given by five officers of the association, twelve manufacturers, nine wholesalers, forty-six retailers, three travellers, one editor, one economist, three farmers associated with co-operative societies in Western Canada, one workingman and two members of the Legislature of Manitoba, who were also members of the Independent Labour Party in that province. The commission also had the assistance of Messrs. McDonald, Currie and Company, chartered accountants, of Montreal, who made a searching investigation into the business of several members of the trade." The Association was represented throughout the inquiry by the late Sir William S. Glyn-Jones, and by Messrs. J. C. McRuer, Toronto, F. S. Mearns, Toronto, Alex. Cinq-Mars, K.C., Montreal, and Harry Hereford, Montreal. "The inquiry was thorough, counsel conducting the investigation, and those supporting the association expressing themselves as satisfied that all possible evidence pertaining to the trade in Canada had been adduced."

Mr. O'Connor reviews the evidence submitted to him during the investigation, and concludes his report with the following statement: "For the reasons above mentioned, and having in mind that persons engaged in the trade may legally organize for their mutual protection and advancement (so long as the interests of the public are not unduly impaired), I am thoroughly convinced that the P.A.T.A., all-embracing as it is, or as it is designed to be, in its control of the entire trade in nationally-advertised proprietary medicines and toilet articles, is an organization which has operated and is likely to operate to the detriment of and against the interest of the public". In this respect, his finding confirms the opinion of the registrar as expressed in the interim report. In the Commissioner's opinion, the public interest is detrimentally affected by the operations of the P.A.T.A., through its effect in enhancing prices, or preventing reductions of prices charged by certain types of retailers serving a substantial portion of the public; through imposing on all distributors, regardless of their costs of operation, the same margin of profit for each article; attempting to compel manufacturers to become members of the association; preventing retail druggists from securing the advantages of club buying; impeding the development of co-operative societies; and forcing goods through certain channels of trade.

The objects, constitution and names of the officers of the P.A.T.A. were noted in the LABOUR GAZETTE, October, 1926, in an article reviewing the interim report of the registrar. Mr. O'Connor sets them out fully in his report, referring to the first steps early in 1925 towards organization of the P.A.T.A., with the object of putting an end to price cutting on proprietary articles, which the trade regarded as a pressing evil. Briefly, the measures adopted by the association, which was modelled on a similar British organization, were the linking up of the three sections of the trade through agreements, binding them not to supply any article on the association's price list to any wholesaler or retailer who sold any one of these articles below the minimum price. By means of a stop-list circulated to its members, the trade was kept informed of those to whom supplies were to be refused. The first price list contained about 600 well-known proprietary articles, and the purpose was to extend the list to include ultimately the whole field of nationally-advertised proprietary medicines and toilet articles.

The association asserts that it does not fix prices, that "all it attempts to do is to cause the manufacturer to give to the wholesale and retail distributor a fair and reasonable reward for the distribution of his goods"; and that it is the manufacturer who fixes the resale price. This price, it is added, must of course permit a satisfactory return to the wholesaler and retailer, otherwise the article is refused a place on the association's list. The avowed aim of the association is a wholesale margin of 16⅔ per cent and a retail margin of 33⅓ per cent, but something less than these margins has been allowed on many articles previously cut. The Commissioner points out that, "in order to comply with the terms of the association in the matter of spread, the manufacturer whose hitherto fixed price has not been sufficient in the eyes of the association must advance the price to the public or must reduce his own sale price to the wholesaler and the retailer. In either event, the operation of the association leads to the enhancement of price to the consuming public or to loss and detriment to the manufacturer."

The P.A.T.A. comprises 157 manufacturers, or about one-third of the eligible number. The Commissioner expresses the opinion that "there does not seem to be any doubt but that the association purposes to compel the manufacturers to accept membership," the retailers being urged by the leaders of the association time and time again to push the sale of P.A.T.A. articles, and to decline to handle as far as possible non-P.A.T.A. goods. Mr. O'Connor states that there is "quite conclusive evidence that members of the association have actually put into effect these suggestions".

The commissioner notes the development of department stores, mail order houses, chain stores, and large individual businesses, and the competitive influence of such concerns buying in large quantities at large discounts, usually direct from the manufacturer, with a rapid turn-over, restricted credit, and, in the case of chain stores, limited delivery service, and, on the whole, lower operating costs reflected in lower prices. "This system of merchandising should not be readily suppressed. It acts as a spur to other members of the trade and gives to the consumer a chance to make a saving on the purchase of these goods. Certainly, no encouragement should be given to the predatory cut-rater, but the progressive merchant who can make a profit on a mark-up less than the average retail druggist should not be lightly interfered with."

Commissioner O'Connor deprecates as unfair the cutting of prices below cost: "Extreme or predatory cutting certainly is an evil; it gives a false impression to the public at large." On the other hand, the Commissioner states, "The predatory cut-rater is not by any means the dominant factor in the merchandising of proprietary articles. But in addition to curbing his activities, the association places a heavy handicap on the retailer whose lower prices represent lower operating costs." "Prior to the advent of the association, a very large part of the consuming public in Canada had been purchasing these goods at prices considerably less than those set out in the association's list."

Referring to the co-operative movement, Mr. O'Connor points out that the P.A.T.A. does not allow any bonus or dividend to be paid on purchases, thus striking at one of the fundamental principles of the movement. "Objection is taken by co-operative societies to the principle of the P.A.T.A. in what they claim is its attempt to interfere with their method of distribution of profits or savings. They fear that if the principle . . . . is established, it will spread to many other branded articles, such as groceries, boots and shoes, hardware and the like, and will be a decided detriment to the people of the middle west who are served by them."

The practice among retail druggists of forming buying groups in order to obtain larger quantity discounts is prohibited by the P.A.T.A., which thus, in the commissioner's opinion, "stands in the way of many retail druggists obtaining their goods at an advantageous price, and these retail druggists are in consequence the less able to compete with the large and financially strong retailer and with the cut-rater." Mr. O'Connor states that "the restrictions of the association in regard to club buying and the handling of P.A.T.A. goods by the methods ordinarily adopted by the retailers' co-operative companies are imposed solely for the benefit of the wholesaler. In my view this is not a reasonable regulation for the protection of the trade. It is an unnecessary interference with the retailer."

The commissioner recognizes the service to the community rendered by both retail and wholesale druggist, and the hardships under which they have been operating in the face of such competition as that of the department stores, the mail order houses and the chain stores. He also recognizes that the distributor is entitled to a fair return for his services, but he is satisfied that "there is of course no one uniform price which can be regarded as fair and reasonable. With operating costs varying from 18 per cent to 30 per cent, it is obvious that what is a reasonable

return to the man whose costs are at the maximum are unreasonably high for the man at the other extreme." The P.A.T.A. however, "imposes on all druggists one minimum price for each article, which price may represent an advance or may represent a reduction, according to the character of the particular business." It "projects itself between the retailer and the consumer, and by the instrument of the stop-list compels the retailer to demand from the consumer a price that the latter would otherwise not be required to pay. To endorse such an association would, in my view, be a retrograde step."

FACTORY INSPECTION IN NOVA SCOTIA IN 1926

THE nineteenth report of the Factories' Inspectors under the Nova Scotia Factories Act, covers the work of the year ending September 30, 1926. One of the features of the report is the statement that fatal accidents in the industrial establishments of the province were reduced during the year to the best record since factory inspection came into operation nineteen years ago. The report is chiefly devoted to the subject of accidents and their prevention.

Accidents.—Under this heading, the report details the accidents which occurred during the annual period covered. The number of accidents reported or ascertained during the year was 853, of which 4 were fatal. The record for the previous year was 820, 6 of which were fatal. The slight increase in the total number for the year just closed over the preceding year, which was the record year, is more than offset by the number of accident reports received from one large establishment. It is important to note that only four fatalities occurred in connection with the factories coming under the Factories Act. One of these was not actually in a factory, but was due to a workman falling from a wharf and being drowned. For the seventeen years previous to the last two years, the average number of fatal accidents was fourteen, the highest and lowest number for any one year being respectively twenty-six and nine.

Another prominent feature of the report is the remarkable record made by the steel companies. Commenting on this record, the report states: "For the first time since we began keeping records there has not been a fatal accident in this industry during a fiscal year. This remarkable record will be better understood when it is noted that for the fifteen years previous to the last three the average number of fatalities was 7.5, the highest number in any one year being 15."

The record regarding serious injuries resulting from accidents was very favourable throughout the year, there having been only one case of the loss of an eye and but one case of major amputation. Among the injured were 24 women and girls.

In saw-mills the number of accidents recorded for the past year was 188, one of which was fatal. This is a reduction of 16 accidents as compared with the previous year. The remaining industries in the wood-working group, including pulp mills, were responsible for 118 accidents, two of which were fatal. This is the lowest record in this group for a number of years. Other accidents were distributed by industries as follows: metal trades (except steel works), 77 accidents, no fatalities; car building, 22 accidents, no fatalities; steel works, 264 accidents, no fatalities; textile mills, 14 accidents, no fatalities; confectionery, food and bottling works, 61 accidents, no fatalities; cold storage, 62 accidents, no fatalities; miscellaneous, 47 accidents, no fatalities.

Accident Prevention.—Dealing with the subject of accident prevention, the report states that the records year after year in both the frequency and severity of accidents is the best evidence that the matter of accident prevention is receiving considerable attention in the industrial establishments. The reduction in the frequency and severity of accidents was attributed to better safeguarding and the discontinuance of certain dangerous practices. In addition to improved operating conditions and safety appliances, an important factor in the reduction of accidents is the progress of the organized safety movement, which is declared to be the only means of coping with about seventy per cent of all industrial accidents.

Child Labour.—This section of the report indicated that the law relating to child labour has been carefully enforced and precautions were taken to see that the regulations regarding the hours of labour were being complied with. Every opportunity had been taken advantage of to discuss with the employers matters of social importance outside the scope of the law, and to impress upon them the wisdom and justice of welfare activities. In this respect the report observes that "the progressive manager or employer will not be content with merely complying with the requirements of the law. He will be ahead of it by doing everything possible not only for the health and safety of his employees but also for their comfort and welfare."

DOMINION-PROVINCIAL CONFERENCE

Meeting of Representatives of Dominion and Provincial Governments, Ottawa, November 3-10, 1927

A DOMINION-PROVINCIAL Conference, composed of representatives of the Dominion Government and of the nine Provincial Governments, was held in Ottawa on November 3-10. The Right Honourable W. L. Mackenzie King, Prime Minister of Canada, acted as chairman and all the members of the Dominion Cabinet were in attendance. The following ministers were present on behalf of the governments of the respective provinces:—

Ontario:—Hon. G. H. Ferguson, Premier; Hon. W. H. Price, Attorney-General; Hon. J. D. Monteith, Treasurer.

Quebec:—Hon. L. A. Taschereau, Premier; Hon. Honoré Mercier, Minister of Lands & Forests.

Nova Scotia:—Hon. E. N. Rhodes, Premier; Hon. G. S. Harrington, Minister of Public Works & Mines; Hon. W. L. Hall, Attorney-General.

New Brunswick:—Hon. J. B. M. Baxter, Premier; Hon. C. D. Richards, Minister of Lands & Mines; Hon. A. Leger, Provincial Secretary; Hon. D. A. Stewart, Minister of Public Works; Hon. Lewis Smith, Minister of Agriculture; Hon. L. P. D. Tilley, President Executive Council.

Manitoba:—Hon. John Bracken, Premier; Hon. R. A. Hoey, Minister of Education; Hon. W. J. Major, Attorney-General.

British Columbia:—Hon. J. D. MacLean, Premier; Hon. A. M. Manson, Attorney-General.

Prince Edward Island:—Hon. A. C. Saunders, Premier; Hon. G. S. Inman, Attorney-General.

Saskatchewan:—Hon. J. G. Gardiner, Premier; Hon. J. A. Cross, Attorney-General; Hon. T. C. Davis, Minister of Bureau of Labour and Industries.

Alberta:—Hon. J. E. Brownlee, Premier; Hon. George Hoadley, Minister of Agriculture and Public Health; Hon. R. G. Reid, Provincial Secretary.

The Federal Prime Minister, in opening the proceedings, outlined the object in view, which was a bringing together of representatives of the Dominion and Provincial Governments in order to discuss matters of mutual interest. It was, he observed, a fortunate circumstance that the conference should be held when Canada was celebrating the diamond jubilee of Confederation.

The Conference adopted at its outset a resolution in the terms following:—

"The Prime Minister and other representatives of the Government of the Dominion of Canada and the Premiers and other representatives of the Governments of the provinces of the Canadian confederation assembled in conference at their first meeting and as their first official act desire to express their respectful greetings to the representative of the Crown in this country, His Excellency the Governor-General, and their fidelity to the King. They earnestly hope that His Majesty and Her Majesty the Queen may long be spared to strengthen the ties of affection and devotion which unite the various peoples of the British Commonwealth under the Crown."

Senate Reform

One of the first subjects on the agenda was that of Senate reform. Hon. Ernest Lapointe, Minister of Justice, in presenting this subject for consideration, reviewed the varied proposals which had been offered from time to time in relation to the Upper House, among which were: (1) abolition; (2) the adoption of the elective principle, direct or indirect; (3) a combination of both the appointive and elective principles; (4) a fixed and limited term of office; (5) an age limit with possible superannuation; and (6) the bringing of relations between the Canadian Upper and Lower Chambers into accord with the relations existing between the House of Lords and the House of Commons in Great Britain. The last-mentioned proposal had reference to the power of the Upper House in the matter of vetoing or amending money or general public bills.

The proposal for abolition met with unanimous opposition, but a comparatively small body of opinion favoured some change which might bring the Upper Chamber more closely in contact with the electorate, although this was regarded as at variance with the British system of government, upon which the Canadian system is based. As regards a fixed term of office and age limit, there was a wide divergence of opinion, these proposals not being generally regarded as vital when the question of reform is being considered.

The British system, under which in 1911 the powers of the House of Lords with respect to money and general bills initiated and

passed in the representative chamber were restricted, was dicussed at considerable length during the Conference, while reference was also made to the system existing in the other Dominions of the Empire. Throughout the discussion the right of the provinces to be consulted on such an important matter as this was frequently emphasized. While there was a strong body of opinion in favour of any reforms which might strengthen the general machinery of Parliament, there was no attempt on the part of any speaker to minimize the value of a second chamber.

Amendment of the British North America Act

The procedure to be followed in amending the British North America Act was discussed at considerable length. This item of the agenda was introduced through an opinion submitted for discussion by Hon. Ernest Lapointe, Minister of Justice. In effect the opinion in question was that Canada, in view of the equality of status which she now enjoys as declared at the last Imperial Conference, and in view further of the cumbersome procedure now required, should have the power to amend her own constitution, and that legislation should be asked for from the United Kingdom for that purpose. In order that adequate safeguards should be provided, it was proposed that in the event of ordinary amendments being contemplated, the provincial legislatures should be consulted and a majority consent of the provinces obtained, while in the event of vital and fundamental amendments being sought, involving such questions as provincial rights, the rights of minorities, or rights generally affecting race, language and creed, the unanimous consent of the provinces should be obtained.

Representatives of all the provinces were heard during the discussion, and every conceivable phase of the subject was dealt with. The Conference divided sharply on the proposal, a portion of the members being opposed to any change in the present procedure, while others either approved of the opinion expressed by the Minister of Justice in its entirety or with minor modifications.

In submitting his opinion the Minister of Justice pointed out that while there had been five amendments to the British North America Act, on only one occasion had the provinces been consulted. This was in 1907 when the subsidy question was up. On that occasion there was only one dissenting province namely, British Columbia. Amendments to the constitution could be divided into two classes; those which might have the effect of increasing the power of the Dominion Parliament or Government at the expense of the provinces; and those not affecting provincial autonomy or individual rights. In the past it had not been regarded as necessary to consult the provinces in connection with proposed amendments of the latter class. He pointed out that it had never been contended that the constitution could not be amended. The question was simply, therefore, as to the procedure which should be followed, and as to whether Canada should not have the same powers over its constitution as had the sister self-governing Dominions. The present method was not consistent with the Dominion's status. In view of the present usage of automatic acceptance of proposals made and of the practice in all the other Dominions, the Minister contended that it would be better if in the future amendments to the British North America Act should be made by legislation of the Dominion Parliament, subject to the conditions set forth. The questions on which unanimity of the provinces should be required might be specified under Sections 93 and 133 and Section 92, subsections 12, 13, 14 of the British North America Act.

Opponents of the proposal opposed it on various grounds. It was contended that there was no widespread demand for such a change; that if Canada had the right of herself to amend her Constitution all sorts of demands for changes would be made, that on no occasion had the Imperial Government refused a demand for amendment; that to submit all sorts of proposals to the provincial governments for approval would stir up local and party strife and arouse sentiment and feeling; that inasmuch as the Dominion's charter came from London, Canada should go to London for amendments thereto and that under the conditions as proposed amendments might become too easy to secure.

Supporters of the proposal put forward by the Minister argued strongly on its behalf, declaring that the change must come sooner or later if Canada were to keep abreast of her status. The constitution, they contended, could not be regarded as rigid and inflexible and must be subject to change with the changing times. It was, therefore, only a question of the best procedure to be adopted under the circumstances. It was held by one speaker that unity would not be furthered by the idea that Canadian questions could only be settled by an independent tribunal. The suggestion made by the Minister, he believed, would promote confidence and demonstrate to the world that the people of Canada were prepared to deal justly with their minorities. The declaration of the Imperial Conference was generally accepted as a definition

to the world of equal status. Canada should therefore keep pace with that status.

At the conclusion the Minister stated that the Government would carefully consider all the opinions on the subject, both pro and con.

International Labour Conference

The question of participation by the provinces in the International Labour Conferences at Geneva was introduced by Hon. W. J. Major, Attorney-General of Manitoba, who was supported by Hon. A. M. Manson of British Columbia. The proposal advanced by them was that one of the government delegates to the annual sessions of the Conference should be chosen by the provinces. At present provincial representatives are accorded the status of advisers to the government delegates who are chosen on behalf of the Dominion Government.

The Honourable Peter Heenan, Minister of Labour, pointed out that the policy advocated would not give direct representation to all the Provinces, because under this proposal one representative would be representing nine provinces, and as it was at present the Dominion delegate represented all the Provinces; but he welcomed any suggestion that would encourage more effective participation in the International Labour Conference, and stated that if the Provinces would get together and select one delegate he would appoint him as a Federal delegate.

The Federal Prime Minister suggested that the provinces might get together while here and select their men.

Industrial Disputes Investigation Act

Hon. Peter Heenan, Minister of Labour, directed attention to Section 2(a) of the Industrial Disputes Investigation Act, adopted in 1925, which permits the establishment of Boards of Conciliation and Investigation to deal with "any dispute which is within the exclusive legislative jurisdiction of any province and which by the legislation of the province is made subject to the provisions of this Act." He explained that five of the provinces, viz., British Columbia, Saskatchewan, Manitoba, New Brunswick and Nova Scotia, had enacted laws to avail themselves of this feature of the federal statute. The Minister directed the attention of the other provinces to this subject in order that uniformity of legislation might be secured on this important subject throughout the whole country.

Immigration

The subject of immigration was discussed by a number of the provincial representatives after which Hon. Robert Forke, Federal Minister of Immigration, made a comprehensive statement dealing with the activities of his department, its policies and problems. It was agreed that representatives of the provincial governments should confer with the Federal Minister of Immigration at the conclusion of the Dominion-Provincial Conference in an endeavour to secure the fullest co-operation as between the Dominion and the Provinces in the recruitment and placement of incoming settlers. In the course of his address before the Conference, the Minister of Immigration declared that the policy of his department was to secure the largest number of immigrants of a suitable character which could be assimilated with the best advantage. Quality rather than quantity was of supreme importance. He declared that following the recruiting of immigrants, direction and colonization must go hand in hand. Reference was made to the British Empire Settlement Scheme, under which the provincial governments and organizations approved by the Federal Department could nominate persons who might be brought to the Dominion and placed here. Most of the restrictions which had been imposed by the Department, and against which there had been some complaint, had been decided upon for the good of the immigrants themselves. With reference to land settlement schemes, several of the provinces had shown an inclination to participate. Losses sustained through the Assisted Family Scheme and Land Settlement Scheme had been infinitesimal. The Minister suggested that Canadian boys be encouraged to go on farms on a fifty-fifty loan basis as between the Dominion and the province. The Minister explained the policy pursued in connection with European immigrants in respect of their fitness and good health. As regards restrictions, he pointed out that there were none upon any British born subject who desired to come to Canada, provided he could pass the medical examination and, in the event of his not taking advantage of the assisted passage scheme which applies to agriculturists, could pay his fare.

Various views were expressed by the provincial representatives on the subject of immigration. The question of repatriation of Canadians in the United States was brought up, in connection with which the Minister of Immigration referred to the efforts which were being made by his department in that direction. In the opinion of certain of the

western delegates, immigration should be absolutely under the control of the Federal and Provincial authorities, and the activities of outside organizations should be very carefully supervised.

Unemployment Relief

The question of unemployment relief was dealt with briefly. With the possible exception of Manitoba, no speaker urged the granting of federal aid in this direction.

Technical Education

Representatives of all the provinces participated in the discussion of the subject of technical education and urged that the financial assistance granted by the Federal Government towards the development of technical education, under the authority of the Technical Education Act, 1919, should not be discontinued next year when this statute expires, but should be continued. It was stated that the provinces had established extensive technical schools and that the work of these institutions would suffer severely if the federal grant were withdrawn. The desire of the provincial governments was that federal grants of this kind should not be temporary but should be placed on a permanent basis. With the development of industry in Canada the necessity for technical education was constantly on the increase and it was urged that the instruction given in these schools was of great benefit to trade and industry throughout Canada. Several of the provinces favoured the inclusion of agricultural education in the courses of training given in technical schools and urged the necessity of financial assistance from the federal treasury towards this form of instruction.

Industrial Research

Hon. James Malcolm, Minister of Trade and Commerce, spoke of the consideration which was being given by the Dominion Government to the proposed establishment of national research laboratories and intimated that a plan commensurate to the development of Canadian industries was being evolved by the Dominion Government.

Dr. H. M. Tory, President of the National Research Council, made a statement on the work of this body and described the activities of other countries on lines of industrial research. He offered the prediction that should Canada establish a central organization, combining the functions of the Bureau of Standards at Washington, and the Mellon Institute at Pittsburg, there would be a saving to the nation in productive wealth that would equal in twenty-five years the entire national debt. The first country which had sensed the importance of industrial research and education was, he said, Germany. In 1900 the world began to wonder what had happened in Germany which was forging ahead on all lines. Prior to the war a stream of investigators from all parts of the world were flocking to the educational centres of Germany. It was only after the war that Great Britain sensed the real relation of education and research to industrial development. During the past few years she had, however, spent vast sums of money on these lines. On one item of research alone, namely, that of coal, which has not yet been completed, a saving had been made in by-products in Great Britain of no less a sum than £500,000.

The United States, Canada's greatest competitor in industry, had since the war accumulated such a force for research as had never been seen before. She had a Bureau of Standards, a Mines Research Council, graduate schools, scholarships, the Mellon Institute, the Rockefeller Foundation, and agricultural schools. Last year she had spent 200 million dollars in research, ten million dollars of which was on pure science. It was estimated that the Bureau of Standards saved to the country 600 million dollars annually.

When the National Research Council came into being in Canada in 1916 there had not been a single highly organized research institute in the country. All the work was done by individuals. The number of these had since been increased, scholarships had been founded, and 155 men had already been trained and were engaged in Canada. The Council itself had engaged in researches and by the end of January hoped to be able to demonstrate the way by which damp and tough grain could be dried without injuring its quality. This would mean a saving of millions to the country. Dr. Tory emphasized the need of a Bureau for the standardization of materials.

Concluding the discussion, the Minister of Trade and Commerce declared that a matter of such major importance could not be decided in a brief space of time and that the sympathetic support of the provinces and of industry would be necessary.

Old Age Pensions

Hon. Peter Heenan, Minister of Labour, drew the attention of the Conference to the Old Age Pensions Act which had been passed at the last session of Parliament and explained that the pensions system provided therein may be established by the individual provinces in agreement with the Dominion Government, the cost of pension payments

being divided equally between the central Government and the provinces. Continuing, the Minister recalled that under the advice of the Law Officers of the Crown, payment of old age pensions come within provincial jurisdiction. The subject had, however, been considered by a Committee of the House of Commons and it had been realized that it was difficult for any one province to formulate such a measure. The Committee recommended a co-operative system between the Dominion and the provinces and the Act of Parliament had been passed on this recommendation. When the Committee's report was submitted to the House of Commons an amendment had been proposed in favour of a purely federal scheme, but this amendment had been rejected on division by 139 votes to 17. The Old Age Pensions Act is now on the statute book and the Minister said he would like to see old age pensions introduced in all the provinces. If the Federal Act was not perfect in all its details, it might be amended in the light of future experience.

All of the Provincial Governments participated in the discussion of this subject. Hon. J. D. MacLean, Premier of British Columbia, expressed the view that the Federal Old Age Pensions Act was a real boon to the provinces, in that it relieved the latter of one-half of the financial obligation involved. The Provincial Legislature of British Columbia had adopted legislation to take advantage of the Federal Act and old age pensions were now being paid in the Pacific Coast province. So far as British Columbia was concerned, it was quite willing to bear the financial responsibilty involved.

Hon. John Bracken, Premier of Manitoba, advanced the view that the Dominion Government might well have borne the entire cost of old age pensions, but if it was not prepared to do more than was contemplated under the existing statute, it was the intention of his government to introduce an Act in the provincial legislature to take advantage of the Federal statute.

In the ensuing discussion, certain of the provinces contended that the financial burden of paying old age pensions was too great for them to bear. In other cases there was an inclination to have the Federal Government make its contribution without involving the provinces in a similar obligation. On behalf of the Province of Quebec, it was contended that the existing systems of relief for the aged and indigent were adequate. There was general agreement that the principle of old age pensions was sound.

Unemployment and Sickness Insurance

Hon. Peter Heenan, Minister of Labour, presented to the Conference copies of memoranda of information which had been compiled by the Department of Labour in relation to systems of unemployment and sickness insurance. In doing so, he intimated that the Law Officers of the Crown in Canada had advised that compulsory insurance of this nature was within provincial jurisdiction. He desired that the provinces would give attention to the same and expressed the hope that the memoranda of information would be of assistance to the provinces on these subjects.

Unemployment Insurance for Handicapped Veterans

Hon. A. M. Manson, Attorney-General for British Columbia, towards the conclusion of the Conference, discussed the subject of unemployment insurance for handicapped veterans, who, while receiving pensions, were almost incapacitated from industrial employment.

Oriental Immigration

Hon. Mr. Manson dealt also briefly with the problem of oriental immigration from the standpoint of his province and of the Dominion and invited the consideration of this matter by the Federal Government.

Provincial Subsidies

Representatives of all the provinces presented statements dealing with the financial requirements of their respective governments and urging the desirability of increased grants from the Dominion treasury in certain directions.

Financial Problems

The Hon. James Robb, Minister of Finance, on the conclusion of the discussion concerning financial problems, made a statement in the terms following:—

"The discussion which has taken place concerning the financial problems of the Dominion and of the Provinces has been fairly complete. On the one hand there have been requests by the Provinces, or some of them at least, that the Dominion should increase the amount paid to them in subsidies. There has also been the recommendation that the Dominion should assume certain service now undertaken by certain of the provinces. Broadly speaking I think it may be said that these services are considered to be unprofitable, in fact liabilities to the provinces and that if the Dominion were to take them over that for the moment at least their operation would involve an increase in expenditure on the federal treasury. From the viewpoint of the

Dominion it has been submitted that the duty of the Federal authorities is to see that the credit of Canada is maintained both at home and abroad and at the same time to reduce taxation so far as is possible in order that industry in all its varied branches may be encouraged.

"The recommendations of the provinces are double-edged. First, there is the demand for increased expenditures by the Dominion Government, and on the other hand that we should withdraw from certain fields of taxation and revenue. Recommendations have been made that subsidies should be increased, that certain expenditures for varied means of transportation should be undertaken, that the Old Age Pensions should be at the sole expense of the Dominion Government, etc. On the other hand it has been urged that the Dominion should withdraw from the Income Tax field and other direct taxation sources, that we should reduce the Customs and Excise duties on liquors, etc. I have not made a minute calculation, but off-hand would estimate that the varied recommendations involve either in expenditure or in the drying-up of sources of revenue, 100 millions of dollars annually.

"The Dominion Government has been able to reduce taxation and to no slight extent clear the field for the provinces, but our margin is none too broad considering obligations that we must meet year to year. The further we proceed the more it becomes apparent to all that in justice to the taxpayers, the Premiers and Ministers here assembled, having heard the varied recommendations, should give the whole matter their mature consideration. It is submitted that it would be unfair to the taxpayers of Canada were we of the Dominion Government immediately to attempt to lay down to-day a line of action that the Dominion Government is prepared to follow towards any part of Canada. The whole question we feel, must be given a thorough scrutiny before commitment of any nature should be given, and in the light of all representations made at this Conference we will carefully consider the problems."

The Conference concluded with expressions of thanks from the Provincial Ministers to the Federal Government and a statement by the Federal Prime Minister expressing the deep thanks of the Central Government for the valuable help which they had obtained from the frank, candid and sympathetic views expressed by all present. The provincial authorities were assured that most careful consideration would be given to all of the subjects which had been presented.

MINIMUM WAGES FOR FEMALE EMPLOYEES IN BRITISH COLUMBIA

Revision of Order Governing Mercantile Industry

DURING October the Minimum Wage Board of British Columbia published Order No. 18, relating to the Mercantile Industry. This order was the subject of Orders number 1, 2 and 3, published in 1919 (Labour Gazette, February, 1919, page 178). As the earlier orders were in force over one year the Board had authority, under the provisions of the Act, to reopen the question of wages in the industry affected without reconvening or calling any conference. The rates fixed by the new order are the same as those in the three orders of 1919.

The present order, which combines the three former orders, is as follows:—

1. Subject to the other provisions of this Order, the minimum wage for every employee in the mercantile industry (except women to whom a special license is issued under section 10 of the same Act)* shall be $12.75 a week of forty-eight hours, or 26 9/16 cents per hour.

2. The minimum wage for every girl under eighteen years of age employed in the mercantile industry shall be as follows:—

$7.50 a week during the first three months of such employment.
$8 a week during the second three months of such employment.
$8.50 a week during the third three months of such employment.
$9 a week during the fourth three months of such employment.
$9.50 a week during the fifth three months of such employment.
$10 a week during the sixth three months of such employment.
$10.50 a week during the seventh three months of such employment.
$11 a week during the eighth three months of such employment.

3. The minimum wage for every female apprentice eighteen years of age or over that age in the mercantile industry shall be as follows:—

$9 a week during the first three months of such employment.
$10 a week during the second three months of such employment.
$11 a week during the third three months of such employment.
$12 a week during the fourth three months of such employment.

* This section provides for the employment of physically defective women at lower rates of wages.

4. Licences must be obtained from the Board before such female apprentices eighteen years of age or over that age may be employed at the rates set forth in section 3 of this Order.

5. No woman or girl shall be employed in the mercantile industry for a greater number of hours than forty-eight in any one week unless a special permit in writing has been obtained from the Chairman or Secretary of the Board.

6. Every woman or girl employed for a greater number of hours than forty-eight in any one week shall be paid *pro rata* for such excess time according to the legal rate to which she is entitled as provided by sections 1, 2 or 3 of this Order.

7. Every woman or girl employed for a lesser number of hours than forty-eight in any one week may be paid *pro rata* for such time according to the legal rate to which she is entitled as provided by sections 1, 2 or 3 of this Order.

8. This Order shall not apply to employees who are governed by any other Order of the Board in force from time to time under the said Act.

9. This Order shall become effective on the first day of January, 1928, and shall be in substitution for the said Order No. 1, Order No. 2, and Order No. 3 hereinbefore referred to, which said Orders shall thereupon be rescinded.

MINIMUM WAGES FOR WOMEN IN QUEBEC

Order No. 3 Governing Female Employees in Printing, Bookbinding Establishments, Etc., in Montreal and District.

THE Women's Minimum Wage Board of the Province of Quebec recently approved of Order No. 3, governing female employees in printing, bookbinding, lithographing and envelope making establishments in the city and island of Montreal and a radius of ten miles around and beyond Montreal. This order will become effective at the opening of the new year.

The Board's method of procedure was outlined in the LABOUR GAZETTE for January 1926 on page 4. Order No. 1, governing laundries, dye works, etc., in Montreal and district was given in the LABOUR GAZETTE for December 1926, on page 1195. Order No. 2, governing laundries, dye works, etc., outside Montreal and district was detailed in the issue for March 1927, page 271.

Order No. 3, as approved reads as follows:—

"Order No. 3, governing female employees in printing, bookbinding, lithographing and envelope-making establishments in the city and island of Montreal and a radius of ten miles around and beyond the island.

"Minimum: No wage shall be less per week for the regular recognized working period of the establishment than is set forth in the following table:

"Experienced workers—$12.50.

"Apprentices—1st six months, $7; 2nd six months, $8; 3rd six months, $9.50; 4th six months, $11.

"Maximum of inexperienced workers: The number of inexperienced workers having less than twenty-four months of apprenticeship shall not exceed one-half of the total female working force.

"Overtime: Any female employee doing work in excess of the regular recognized working period of the establishment shall be paid for same at not less than the regular rates, but in all cases according to the prevailing custom of the trade.

"Lost time: Any female employee losing time during the regular recognized working period of the establishment will be paid proportionately for the actual number of hours worked.

"Deductions for absence: No deduction below the minimum wage line for absence shall exceed the value of the time lost, reckoned proportionately to the regular recognized working period of the establishment.

"Waiting: An employee required to wait on the premises shall be paid for the time thus spent.

"Permits: The Board may issue permits for lower wages on behalf of aged or handicapped workers. It may also grant permits of variation or suspension of any of these regulations in case of exceptional conditions. Employers and employees are invited to consult the Board regarding any problems which the order may concern."

Report of British Ministry of Labour for 1926

The third annual report of the British Ministry of Labour dealing with the work of Ministry during 1926, has been recently issued. This report, like its predecessors, covers a wide field, including industrial relations, employment and unemployment, unemployment insurance, the administration of the Trade Boards Acts, labour statistics, relations with the International Labour Organizations, and various temporary functions arising out of the war.

In the section dealing with industrial disputes, the total number of workers involved in all disputes during 1926 was given as 2,747,500, while the total number of working days lost during the same period was 162,784,000. The dispute in the coal mining industry, lasting from May to November, 1926, together with the general strike from May 4 to 12, was largely responsible for the abnormally high number of workers affected and the working days lost during the year as a result of disputes.

Referring to the effect of the general strike on the Joint Industrial Councils and on the Interim Industrial Reconstruction Committees, the Report states that these bodies "showed their value in providing a meeting ground for the discussion of the situation arising out of the strike, and still more in the spirit of reasonableness in which these discussions were almost invariably conducted."

The membership of the trade unions in Great Britain and Northern Ireland at the end of 1925 was given as 5,521,672, comprised in 1,144 unions. In 1924, the total membership was 5,534,005.

The history of employment in 1926 is, as the Report points out, largely the history of the general strike and the coal dispute. At the end of January, the proportion of insured workpeople unemployed was 11 per cent. This figure declined steadily to 9.1 per cent at the end of April, when for the first time since the post-war slump, the number of those registered at the employment exchange as unemployed was below a million. The general strike badly disturbed the growing confidence, and subsequently the increasing shortage of, and the high price of imported coal, which were due to the coal stoppage, completely checked the improvement, unemployment rising to 14.6 per cent by the end of June. From this period there was a slight improvement in the general position.

This great inflation of unemployment during 1926, the Report states, threw a very severe strain on the administration and finances of the unemployment insurance scheme. The question of unemployment in Great Britain was dealt with in the Blanesburgh Report, which is referred to elsewhere in this issue (page 1146).

EMPLOYEES' SUPERANNUATION IN CANADA

THE subject of employees' superannuation in Canada has been dealt with in previous articles appearing in the Labour Gazette. In the issue of February, 1924, page 127, the existing Provincial schemes for government employees' retirement insurance were outlined. Subsequently, in the issue for May, 1924, page 390, the provisions made by various municipalities in Canada for the retirement of municipal employees were detailed.

The present article gives some further particulars in regard to superannuation projects, either under consideration or in actual operation, in various municipalities. It supplements the previous articles, bringing the subject up to date as far as possible.

Vancouver and Victoria

As outlined in a previous article, the superannuation of civic employees is provided for under Part III of the British Columbia Superannuation Act of 1921. In Vancouver and Victoria, shortly after the enactment of this legislation, action was taken to secure the application of its provisions to the employees. Owing, however, to objections to some features of the Act by certain classes the question of adopting the provincial scheme was not pressed. During the last session of the Legislature the Superannuation Act was amended to provide that, upon application in writing from seventy-five per cent of all the employees or of the employees of any group of permanent employees, a municipality must adopt a superannuation scheme as provided by the Act, paying from the revenues all contributions required from it as an employer (Labour Gazette, April, 1927, page 362).

In Vancouver recently the city hall staff petitioned the city council to establish a pension fund under the provisions of the Act. As the petition was signed by ten per cent more than the requisite percentage of the total number of employees affected, the city council had no alternative but to take steps to introduce a pension scheme, which will become effective in respect of city hall employees on January 1, 1928. In the meantime the city council will approach the Legislature with a request that the Act be amended so as to permit the city to administer the superannuation fund. It is understood that the policemen, firemen and outside workers are also preparing petitions, requesting that the scheme apply to them on January 1.

In Victoria the city hall staff had requested the application of the provincial scheme, but representations were made, alleging that the enforcement of the provincial measure in its entirety would work a hardship upon the ratepayers. The city council proposed what was termed a "compromise pension plan" arranged by the superannuation committee of the city council, which would give the employees the same benefits as under the provincial Act, the pension fund however to be administered by the city, which would only assume liability for its share of the pension when it accrued. At a general meeting of city hall employees, held on October 6, it was decided to rescind the petition for the provincial scheme, and another resolution was passed,

accepting the city council's scheme. It was unofficially reported that the police department and the outside staff had taken a similar attitude, leaving only the fire department holding out for the provincial scheme.

Montreal

The question of employees' superannuation in the city of Montreal has been under study for some time, and several projects have been considered. Recent information indicates that the subject has been revived. At a meeting of the city council on October 10, Ald. J. A. A. Brodeur, chairman of the city executive committee, outlined a new pension scheme for municipal employees, excepting the firemen and police, who have their own retirement funds. The scheme, as drafted, proposes that all employees will pay a percentage, not yet determined, of their salaries and wages (the city to pay the balance) up to the age of 65 years, when the employee will be retired on pension, varying from $600 to $2,500 depending on time of service and earning power. Provision is made for the retirement on pension of employees who become incapacitated before the age of 65 years. The city will pay six per cent on all moneys paid in which will be added to the principal. It is understood that the city will immediately put the fund into effect.

Calgary

Announcement was recently made that a pension scheme for the members of the police force of Calgary would be put into effect by the end of October. According to the draft agreement, members of the police force will contribute from 3½ to 5 per cent of their salaries to the fund, depending upon the age of the participant. The annual cost to the city is estimated at $6,570, made up of interest on accrued liability of $2,750 and 3½ per cent of total salaries, $4,000. The compulsory entrance age is fixed at 25 years and the pension age at 60 years. The scheme also provides for a death benefit. It is possible that a similar scheme will be worked out in connection with members of the fire department.

Toronto

In Toronto, the firemen and police have a benefit fund, which was detailed in the LABOUR GAZETTE for May, 1924, page 393. Recently, the police department voted against a new proposal, recommended by the police commissioners, to raise the length of service for the men, and to increase the percentage of contributions paid by the men from 7 to 9 per cent. It is understood that the Civic Survey Report, recently tabled before the city council, emphasized the need for the establishment of a pension or superannuation fund for all civic employees so that a large number of aged employees may be retired and their places filled by younger men, in order to increase the efficiency of the service.

Ottawa

The fire department in the city of Ottawa has a superannuation fund, but according to the report of the superintendent of insurance for Ontario, this fund is not on a sound actuarial basis. The firemen at present pay 4 per cent of their wages into the fund and the city makes an annual contribution of $7,000. The question of adjusting the situation so as to place the fund on a sound basis is now under consideration.

Winnipeg

The city of Winnipeg established in 1921 a pension fund for its employees, the provisions of which were published in the LABOUR GAZETTE for May, 1924, page 390. Recently the city council approved certain recommendations of a special sub-committee on the pension by-law, among which was a provision making compulsory the retirement of a civic employee at the age of 65.

The first of the conferences between officials of the London Midland and Scottish Railway and representatives of the men, suggested by the president of the Company, for the joint consideration of matters relating to railway work, was held on September 20, 1927, at Liverpool. The purpose of the conferences is to secure the cordial co-operation of the company and the staff in promoting the efficiency and prosperity of the line. The first conferences will necessarily be preliminary. They will be held in each of 14 districts into which, for the purposes of the scheme, the line has been divided. Each conference will be attended not only by headquarters officials but also by local officials of the line and representatives of the men. Among the matters to be discussed are the competition of road motor transport, the cost of operating (in running, handling, carting, etc.), shunting operations as they affect speedy transit, damage to rolling stock, accidents to staff and methods of prevention. The joint conference will also be asked to consider means of attracting business to the line.

EMPLOYEES' BENEFIT PLANS OF CONSOLIDATED MINING AND SMELTING COMPANY OF CANADA, LIMITED, OF TRAIL, B.C.

PROPOSED medical and hospital agreements submitted to its employees early in the present year by the Consolidated Mining and Smelting Company of Canada were outlined in the Labour Gazette, June, 1927, page 744. The "Tadanac Medical and Hospital Agreements," as they are called (Tadanac being the site of an ore reduction plant of the Company), were accepted later by the parties concerned, and became effective on August 15, 1927. Medical aid is provided under the medical agreement in accordance with section 23 of the Workmen's Compensation Act (Revised Statutes of B.C., 1924, chapter 278), recognizing any existing plan for medical aid which, after investigation by the Board, is found on the whole to be not less efficient in the interests both of the employer and of the general body of workmen than the provisions for medical aid contained in this section." The agreements are between the medical practitioners of Trail and Rossland, B.C., the employees (as represented by their medical committee) and the company. Section 1 of the agreement reads as follows:—

1. The Company covenants and agrees with the doctors to pay to the doctors the sum of 15 cents per half calendar month for each deceased employee whose widow, minor children or other dependants are entitled to receive the benefits of this Agreement pursuant to Clause Eleven (11) hereof, and also the further sum of 15 cents for each pensioner resident in Trail, Rossland or Tadanac, and also the further sum of 15 cents for each employee employed at or in connection with the said smelter, metallurgical works and plants situated in or near the municipalities of Trail and Tadanac who has worked in the employ of the said Company more than three and one-half shifts in each half calendar month, and to retain and pay to the doctors from the moneys earned by each of such employees the sum of 64 cents per half calendar month, when such employee earns the minimum adult labourer's pay or more per shift for such half month, and a pro rata amount from each employee earning less than said minimum pay for such half month, such payments and deductions commencing with the half calendar month beginning on the 15th day of August, A.D. 1927, and said money to be paid over to the doctors at a date not later than eight days after the close of each half month.

The doctors, on their side, agree to provide the employees, their families and dependants, with proper medical and surgical treatment and supplies, provided that patients living more than four miles from the towns may be charged at a rate of 50 cents per mile. The doctors also agree to bear half the cost of treatment by specialists, where such treatment is necessary or is ordered by the Workmen's Compensation Board. The company agrees to bear half of the cost of specialist treatment of its employees, but not of their families or dependants. It will also supply crutches, artificial limbs, etc., for its employees as required. The doctors agree to perform all maternity work for the employees, their families and dependants, at a fixed charge of $12.50 for each confinement. Widows and other dependants of former employees who at any time lost their lives in the company's service are included in these benefits. Chronic ailments which existed before the employee entered the company's service, are not included. Disputes arising in connection with matters coming under the agreement are to be referred to the Workmen's Compensation Board. Any party may terminate the agreement after three months' notice, and the Board may at any time withdraw its approval. The company will terminate the agreement if requested by a majority of its employees to do so.

The parties to the Hospital Agreement are the Trail-Tadanac Hospital Society, the employees, and the company. Under its provisions the company deducts 26 cents from the half-month's earnings of each employee, this money to be paid to the hospital within eight days of the close of each half month. The Hospital agrees to provide treatment as approved by the Workmen's Compensation Board.

Plan of Group Life Insurance

The Group Life Insurance plan became effective on October 15, supplementing another plan which already existed. It was found that many employees relied exclusively on the inadequate protection afforded by the earlier plan, and the company therefore made an arrangement with the Sun Life Assurance Company for a larger scheme of group insurance. The plan is outlined in a circular sent by the company to each employee, as follows:—

Present Plan:—

1. All employees of six months' service receive $500.

2. $100 additional insurance is given for each 6 months' service until a maximum of $1,500 has been reached.

This is at the company's expense.

Proposed Plan:—

The employee may take $1,000 or $1,500 additional insurance.

Note: This means that an employee entitled to the maximum under both plans will have $3,000 insurance, half at the company's expense, and half at his own expense.

Monthly cost on $1,000, 90 cents, on $1,500, $1.35.

Benefits of Insurance:—

1. Full amount payable in event of death from any cause, either from sickness or accident, regardless of where it occurs.

2. Full amount payable in event of permanent and total disability, before reaching age of sixty.

Permanent and total disability is anything which totally and permanently disables an employee from working.

(a) Loss of both hands, both feet or sight of both eyes.

(b) Any sickness, such as advanced heart trouble, paralysis or consumption may be causes of permanent and total disability.

3. There is no medical examination. Every employee is entitled to this insurance regardless of what his physical condition is.

4. There is no age limit. Regardless of the employee's age they are entitled to the benefits of this coverage with the exception that any employee over the age of 60 will not be paid in event of permanent disability.

Details of Plan:—1. Each employee receives an individual policy under this plan.

2. The cost will be deducted monthly from your wages.

3. Each employee will fill in an application card giving full name, age and beneficiary.

Conversion:—In case an employee terminates his employment with the company he may convert his insurance into an individual policy in the Sun Life without medical examination if done within 30 days after termination. This applies also to the insurance paid for by the company if the employee wishes to continue it as well at his own expense.

This insurance in no way interferes with any insurance now carried, with the insurance the company is now giving or with Workmen's compensation.

It is a plan which enables each employee to obtain insurance at a rate approximately one third of the individual life insurance rate without medical examination and irrespective of age. It is necessary that at least 75 per cent of the employees decide to adopt the plan before it can be made effective.

Canadian Mail Carriers' Conditions of Employment

It is stated that the Canadian Mail Contractors' Association, before the next session of Parliament, will suggest to the government several changes in the conditions which now govern the employment of mail contractors. These changes would include the following:—

1. Abolition of the contract system, and substitution of regular salaries, at the rate of $70 per mile per year. (In the United States the rate of payment is $75 per mile per year, with clothes and running equipment.)

2. Payment of three times the present rates of wages for contractors operating between post offices and railway stations. These contracts represent a trifling income, but involve heavy responsibility.

3. Employment to be of a permanent nature while service is satisfactory, subject to two months' notice of termination.

4. Bonus for contractors operating since 1917.

5. Rural mail service to receive the balance of ten statutory holidays.

6. All rural mail boxes to be placed on right side of roads.

Recent studies of criminal statistics in the United States show a preponderance of convictions of persons of immigrant races who have not become adjusted to their new environment, and a similar increase in crimes attributed to negroes has followed the recent wholesale migration of coloured persons from the south to the north. The Joint Committee on Negro Child Study in New York City has just published a study of delinquent and neglected negro children before the New York City Children's Court, in which the statistics of this subject are analyzed, and recommendations are made for improving the conditions which now prevail among coloured children in the city.

AUSTRALIAN VIEW OF AMERICAN INDUSTRIAL CONDITIONS

REFERENCE has been made in previous issues of the Labour Gazette to the Industrial Mission which visited the United States during the past year, under the auspices of the Australian Federal Government, for the purpose of studying the conditions of American industry. More specifically the purpose of the Mission was to discuss the reasons for the prosperity of industry in the United States; to what extent this prosperity was shared by the worker; and finally, to what extent the industrial conditions under which American industry prospered might be reproduced in the Commonwealth of Australia. The Industrial Mission was composed of representatives of both employers and workers. Its official report has not yet been issued, but a summary of conclusions has been published by Mr. H. G. Adam, a well-known Australian journalist, who accompanied the Mission as a disinterested observer. Mr. Adam's conclusions are set forth in the following fifteen paragraphs:

1. The workers in the successful manufacturing industries in America are divided into two clear-cut groups—skilled and unskilled. This is a fundamental condition of the mass production methods to which America owes its industrial progress in the last ten years.

2. The proportions of these groups of workers in the manufacturing industries are—skilled, 5 per cent, unskilled, 95 per cent.

A worker classed as unskilled and paid on the unskilled rates may be operating an intricate machine performing an important process in manufacture, but his necessary actions have been reduced to such simplicity that the common labourer can be trained to the job in a few hours.

3. The average earnings of unskilled workers in America are between £5 and £6 for a week of 50 hours.

4. The average earnings of skilled workers are from £8 to £10 a week. At special periods, when the men may work 60 hours a week, they may go as high as £20.

5. The workers in the manufacturing industries are drawn from immigrant labour of all nationalities without any qualifications of experience or training. Skilled workers have until now mostly been imported from England, Germany, and France. That source of skilled labour is failing, and efforts are now being made to train workers in vocational schools and by systems of apprenticeship.

6. A wage of £6 a week in America would correspond in real wages to a wage of £4 a week in Australia.

7. Despite the immigration restrictions employers have not yet experienced any difficulty in obtaining all the unskilled labour that they require. It is generally admitted that for every job available in a manufacturing concern there will be three applicants.

8. The workers in the manufacturing industries, with the exception of the garment makers, have no industrial organizations comparable to the Australian trade unions. They have no voice in fixing wages, hours or conditions of labour. They have no defence against the arbitrary will of the employer.

9. Broken time and long enforced periods of idleness are common in most industries. A factory may work 24 hours a day for part of the year, and perhaps three days a week for the rest of the time. It is always possible to secure workers at short notice and to put them off without trouble, so that there is not much need for employers to attempt to stabilize their production.

10. The worker gets no pay for public holidays, and only in exceptional cases is there any provision for vacations. In most industries there is no extra pay for overtime for night work or for work on public holidays.

11. The pace at which the worker works is set by the machine, which is set by the management. If he cannot keep up the pace he is fired.

12. Piecework is universal wherever it is possible to apply it. It is accepted by the worker as an integral part of the industrial system and is undoubtedly the chief incentive to hard, fast work.

13. The American worker accepts many extras from his employer, such as insurance provision, housing, medical attention and recreation clubs, in lieu of their value in higher wages.

14. Although in a number of cases the workers participate in schemes to buy stock in the corporations that employ them, they regard that stock merely on its dividend-producing value, and not as giving them any share in the management or control of the corporation.

15. There is little or no evidence in American industry of spontaneous or reasoned co-operation between the worker and the employer for increased production. The planning, the initiative and the driving power all come from the management.

THE PROGRESS AND DEVELOPMENT OF SECONDARY VOCATIONAL EDUCATION IN CANADA

Paper by Mr. A. W. Crawford, Director of Technical Education, Department of Labour, Ottawa, read at the Annual Convention of the Canadian Education Association, Winnipeg, November 1-3, 1927

IN this paper an attempt is made to set forth as briefly as possible the development of secondary vocational education in Canada, giving a fairly complete summary of developments in each province during the past decade. The paper does not include engineering education and the professional training of teachers, doctors, dentists, etc., which, while vocational, are a part of college or university work and are not usually referred to as vocational education. Manual training and domestic science, which were pioneer subjects in the development of secondary vocational education, are not dealt with because these subjects are now established parts of the academic branch of school work. Agricultural education is merely referred to in passing, as until recently it has been almost wholly confined to agricultural colleges and the provincial departments of agriculture. Very little agricultural instruction of vocational value has been provided by the departments of education. The term secondary vocational education, as here used, refers to the work of the provincial departments of education on which federal grants are paid under the Technical Education Act.

The history of secondary vocational education in Canada may be divided into three ten-year periods. The first includes the years from 1900 to 1909, preceding the appointment of the Royal Commission on Industrial Training and Technical Education; the second is from 1910 to 1919, preceding the enactment of the Technical Education Act; and the last is the ten year period of the Act's duration, which terminates on March 31, 1929.

Prior to 1900, the development of vocational education was confined to work of college grade such as teacher-training, engineering education, scientific agriculture, and specialized training for other professions. Commercial courses were organized in a number of high schools, and evening classes of various types were established in Nova Scotia and in a few of the larger communities throughout the Dominion. No special organization was set up in any province to promote or develop vocational work of less than college grade, while day vocational schools, such as exist to-day in most large industrial centres, were unknown.

During the period from 1900 to 1909 special efforts were made to introduce manual training and domestic science into Canadian schools. Due to the personal interest and philanthropy of Sir Wm. C. Macdonald, assisted by Dr. Jas. W. Robertson, specially qualified manual training instructors were brought to Canada from Great Britain and placed in representative schools throughout the Dominion. Through the efforts of Mrs. Lillian Massey-Treble of Toronto and Mrs. Hoodless of Hamilton, domestic science was introduced into Ontario schools. Such efforts on the part of private individuals encouraged the provincial departments of education and local school boards to establish practical work in the school systems and started the movement which resulted in the present development of vocational education throughout the Dominion.

Early Developments

Nova Scotia was the first province to organize a program of vocational education of less than college grade. In 1907 the legislature passed the Technical Education Act, which provided for centralized control of all technical or vocational education in the province. A provincial director was appointed and provision was made for the inspection and supervision of evening schools throughout the province. It should be noted that Nova Scotia had conducted evening classes for coal miners since 1888, and classes for stationary engineers since 1899. Under the new act, the scope of these classes was enlarged and provision made for other types of work.

The first day vocational school in Canada to be operated in a separate building was opened in Toronto in 1901, and the first building erected specially for secondary vocational education was erected in Hamilton in 1909.

Royal Commission on Industrial Training and Technical Education

The appointment by the Dominion Government of the Royal Commission on Industrial Training and Technical Education in 1910, coincided with or possibly resulted from an active interest in vocational education

throughout the whole Dominion, and marked the beginning of the present development.

The commissioners, after carefully studying the existing conditions and requirements in Canada and inspecting the work being done in the United States, Great Britain, and parts of Europe, recommended a development policy and a complete system of secondary vocational education for Canada. This system, while retaining provincial control of education, provided for federal, provincial, municipal, and private financial contributions and close co-operation between schools and industry. The types of work suggested for urban communities were as follows:—

For those who are to continue at school—

Division I. Intermediate industrial classes (or schools).
" II. Co-ordinated technical classes (or schools).
" III. Technical high schools.
" IV. Apprentices' schools.
" V. Industrial and technical institutes.
" VI. Technical, home economics and fine arts colleges.

For those who have gone to work—

Division I. Continuation classes (or schools).
" II. Co-ordinated technical classes (or schools).
" III. Middle technical classes (or schools).
" IV. Apprentices' classes (or schools) in workshops.
" V. Industrial and technical institutes.
" VI. Correspondence-study courses.

Similar provisions were suggested for rural communities.

The commissioners recommended that the sum of $3,000,000 be provided annually for a period of ten years by the Parliament of Canada and paid into a Dominion Development Fund to be used for the following purposes:—

1. The service in each province of an adequate supply of persons (teachers, instructors, demonstrators, executive officers) properly qualified to carry on Industrial Training and Technical Education.
2. The establishment or extension and maintenance of classes, courses, schools or other institutions or means for Industrial Training and Technical Education.
3. The provision of suitable and adequate appliances, apparatus and equipment for teaching purposes, but not including school buildings, furniture or consumable supplies.
4. The provision of scholarships to equalize opportunities to young people and other workers to profit by classes, courses, schools or other institutions.
5. The provision of experts with experience in Industrial Training and Technical Education whose services for counsel would be available to provincial and local authorities.
6. The service of central institutions when and where required to supplement the work carried on by the several provincial and local development authorities either by providing and maintaining or by assisting in providing and maintaining such central institutions.
7. The promotion of scientific industrial and house-keeping research and the diffusion of knowledge resulting therefrom.

Royal Commission on Technical Education —Manitoba

Manitoba also appointed a royal commission in 1910 to make a study of vocational education in Canada and the United States. The findings of this commission determined the nature and scope of the technical high schools which were opened in Winnipeg two years later.

Dr. Seath's Report—Ontario

During the same year (1910) Ontario sent Dr. Seath, Superintendent of Education, to the United States and to Europe to study vocational education and to suggest methods of developing the work in that province. Practically all of the recommendations made by Dr. Seath have since been carried out and it is acknowledged that the Ontario system of vocational education is based on his report.

Agricultural Instruction Act

The Royal Commission appointed by the Dominion Government made its report in 1913 and in the same year Parliament passed the Agricultural Instruction Act under the provisions of which $10,000,000 were set aside to promote and assist agriculture and agricultural instruction during a ten year period. This money was paid to the provincial departments of agriculture, and was used to develop new branches of agricultural work which would directly and indirectly assist the farmers in their work and home life. Part of the money was used for school purposes in promoting agricultural education but most of it was spent in connection with demonstration work, clubs, experimental plots, etc. The Act expired in 1923 and was renewed for one year to give the provinces a chance to adjust the work so that they could assume the full financial burden. As this was considered to be impossible by some of the provinces a considerable part of the work was discontinued and much of it was never revived.

Technical Education Act

Owing to the war, it was not until 1919 that the Technical Education Act was passed setting aside the sum of $10,000,000 for the

promotion and development of technical or vocational education for persons entering or employed in industrial pursuits.

Under the provisions of this Act the Dominion Government assists in the promotion and development of vocational education of less than college grade by sharing equally with each provincial government approved expenditures on all branches of vocational education, except agriculture. The Act provides for the expenditure of $10,000,000 during the ten year period ending March 31, 1929. In order that the smaller provinces may earn a fair share of the grants, the sum of $10,000 is allotted to each province before dividing the balance of the annual appropriation in proportion to population.

Developments since 1919

In order to comprehend the development of vocational education since the Technical Education Act came into effect, it is necessary to consider each province separately. In no two provinces has the work been organized and developed in the same manner, although there are many features of the work which are common to all provinces. Statistics and written reports indicate in a general way the growth and scope of the work being carried on but they fail to reveal the local changes and peculiarities which must be understood to properly interpret the reports.

The accompanying tables give a fairly accurate indication of the growth of the work as a whole since 1919 and some idea of the expenditures in each province.

Perhaps the outstanding features revealed by these tables are the growth in day schools and the differences in the amounts earned by the various provinces.

The nature and scope of the work in each province is indicated by the following brief reviews of developments since 1919.

TABLE I.—VOCATIONAL SCHOOLS, TEACHERS AND PUPILS IN CANADA, 1919-1927

Year	Municipalities conducting classes		Number of Teachers				Number of Pupils			
	Day	Evening	Day	Evening	Correspondence	Total	Day	Evening	Correspondence	Total
1919–20	32	97	384	1,423	3	1,810	8,512	51,827	207	60,546
1920–21	45	149	573	1,605	4	2,181	11,683	44,441	620	56,744
1921–22	54	167	527	1,711	30	2,268	13,588	46,219	2,154	61,961
1922–23	54	156	752	1,883	39	2,674	16,242	53,080	978	70,300
1923–24	58	156	929	1,970	44	2,943	20,527	57,986	1,316	79,829
1924–25	65	156	1,057	2,273	28	3,158	24,137	62,249	1,638	88,024
1925–26	72	166	1,361	2,090	27	3,478	29,010	57,706	1,396	88,961
1926–27	.....	.....	.....	.....	.....	.....	.....	.....	.....	.....

TABLE II.—MONEY AVAILABLE AND MONEY PAID TO THE PROVINCES UNDER THE TECHNICAL EDUCATION ACT FOR THE FISCAL YEAR ENDED MARCH 31, 1927

Province	Annual appropriation	*Total amount available	†Amount paid to province
	$ cts.	$ cts.	$ cts.
British Columbia	70,374 35	180,673 97	56,627 03
Alberta	77,725 40	117,660 16	85,787 16
Saskatchewan	97,165 78	273,933 28	18,021 83
Manitoba	80,218 72	233,875 34	20,056 34
Ontario	347,636 30	347,636 30	347,636 30
Quebec	281,751 31	542,404 67	403,944 35
New Brunswick	54,640 80	113,348 02	76,208 59
Nova Scotia	70,288 60	221,973 27	31,494 87
Prince Edward Island	20,198 74	68,069 14	7,757 33
Totals	1,100,000 00	2,099,574 15	1,047,535 80

*The total amount available includes the annual appropriation and amounts carried forward from previous years. Not more than 25 per cent of the annual appropriation is carried forward. Any unearned balance in excess of this amount lapses.

†The amount paid to each province represents one-half of approved provincial government expenditures except for Ontario, where sufficient money was not available. In most provinces the expenditures by local authorities greatly exceed the amount expended by the provincial government.

Prince Edward Island

Vocational education in Prince Edward Island is a direct result of federal grants, and may be said to have started with the opening of the Agricultural and Technical School, at Charlottetown, in November, 1920. This school provided two year day courses in agriculture and motor mechanics, in addition to short-term and evening courses in various subjects. The cost of equipping and operating the school was shared equally by the provincial government, the Federal Department of Agriculture, under the provisions of the Agricultural Instruction Act, and the Federal Department of Labour, under the Technical Education Act.

Home economics classes were added in 1923. In 1924 the school had an enrolment of 97 pupils in day classes and 196 in evening classes, but owing to the expiration of the Agricultural Instruction Act which cut off one third of the school's revenue, the day classes were discontinued and evening classes were moved to cheaper quarters. Commercial classes were started in connection with the Prince of Wales College in 1925 and evening classes were opened in Georgetown.

The day work is still confined to Charlottetown, but evening classes are now operated in nine municipalities. The total enrolment in day classes for the school year ended June 30, 1927, was 191, and in evening classes 390.

Nova Scotia

No new developments have taken place in Nova Scotia since 1919, but the work has continued to make progress slowly, despite adverse industrial and financial conditions.

Day schools are confined to Halifax, where short-term courses of two months are provided for small groups of men from different industries.

Evening classes conducted in twenty-eight municipalities provide vocational instruction for approximately 2,400 pupils. These classes are divided into two groups, technical classes and coal mining classes. The latter serve the men engaged in the coal mines who desire to qualify for supervisory and official positions. The technical classes supply the needs of commercial workers, homemakers, and skilled workers in various industrial occupations.

Over 700 pupils from all parts of the province are enrolled in 42 vocational correspondence courses conducted by the provincial Department of Education. Correspondence classes were started in 1916 but were temporarily abandoned in 1917. The Federal grants made it possible to revive this work in 1921 and it has now become an established part of the education program.

The Nova Scotia College of Art, in Halifax, receives provincial and Federal grants and has an enrolment of over 160.

New Brunswick

It may be said that vocational education in New Brunswick started concurrently with Federal aid, since the vocational board, which controls the work in the province, was established in May, 1919. The first vocational school building was opened on November 1, 1919, in Woodstock. It was built with funds left for that purpose by the late Mr. L. P. Fisher and is maintained jointly by the town of Woodstock, the Carleton County Council, and the Provincial and Federal governments. The work undertaken in this school includes pre-vocational industrial classes, day vocational classes in commercial work and homemaking, part-time classes in agriculture, and evening classes in a variety of subjects. Evening classes were also started in two other municipalities during 1919.

Rapid progress has been made during the past eight years, and New Brunswick now has two purely vocational schools at Woodstock and Saint John and six composite high schools which provide pre-vocational, commercial, and homemaking courses, in addition to the regular high school curriculum. All of these schools, excepting Woodstock, were built at public expense. The vocational school in Saint John was opened in 1926 and cost approximately $500,000, complete.

Short-term courses for garage workers are conducted at different centres during the winter months and for several years an itinerant instructor conducted short intensive courses in marine engine and automobile troubles, in small centres during the summer months. The latter service was for fishermen and car owners who do their own repairing.

The total enrolment in all vocational classes in New Brunswick for the past school year was 3,088 of whom 1,056 were in full-time day classes. New Brunswick is now earning more than the annual appropriation and is using up the accumulated reserve.

Quebec

Quebec's system of education is unlike that of any other province. Provision is made for instruction in both French and English, and a large majority of the pupils are French-speaking. Only the industrial, commercial, and applied art branches of vocational education are included in the work on which federal grants are claimed. This work has grown

rapidly during the past five years, and since 1923 provincial government expenditures have been more than sufficient to earn the full appropriation under the Technical Education Act.

Two provincial schools of art in Quebec city and Montreal were opened in 1922 and 1923 respectively. Over 1,500 pupils are enrolled in day and evening classes in these schools, which teach various branches of pure and applied art.

Commercial education receiving federal grants is confined to certain branches of the work carried on by the School of Higher Commercial Studies, in Montreal. In addition to degree work in commerce, this school provides an extensive evening school program and correspondence courses for office workers and others in commercial life.

A pulp and paper school was established in Three Rivers in 1923. It is operated by the Department of Lands and Forests as a branch of the technical school, and provides full-time, part-time, and evening courses for workers in the pulp and paper industry. The part-time and evening pupils are employed in local plants.

A provincial school for forest rangers has been in operation at Berthierville since 1924. It also is operated by the Department of Lands and Forests.

A printing school for apprentices and journeymen was established in connection with the Montreal Technical School in 1925. This school is supported by the provincial government but is operated by an advisory council composed of representatives of the printing employees, the employers, and the provincial government. A similar school for the building trades is under consideration and may be opened during the present school year.

The Shawinigan Technical School was built and equipped by a local industry and, although it receives federal and provincial grants, it is supported mainly by the industries which it serves. The schools at Grand' Mère, La Tuque and Sherbrooke are taught by religious orders, but are open to any boy in these municipalities. The Council of Arts and Manufactures carries on evening classes in fifteen municipalities. All of the above mentioned institutions are recognized as a part of the provincial vocational education system.

The provincial technical schools, of which there are four, provide instruction for boys and men only, and have two types of day courses—a three-year technical course designed to prepare boys for supervisory and junior executive positions in industry, and two-year trade courses intended to train competent mechanics. These schools are supported jointly by the provincial and municipal authorities.

Day schools, receiving federal grants, are conducted in ten municipalities, and evening classes in twenty-one centres. The total enrolment in day classes during 1927 was 3,126 and in evening classes 8,345.

Ontario

Ontario's program of vocational education is the most diversified and highly organized in Canada. Cultural and academic subjects are given first place in vocational schools, and no attempt is made to produce skilled workers in any branch of industry. A broad foundational training is aimed at, rather than specialized training in any one branch of industrial or commercial life. The schools endeavour to maintain close contact with industry through evening classes, part-time and continuation classes, employment service for graduates, and occupational information. Apprenticeship is encouraged, and this year a provincial apprenticeship council for the building trades was established in Toronto.

Teacher-training is centralized in the Training College for Technical Teachers at Hamilton, but the staff of the college gives instruction to evening school teachers in various centres, during the winter months.

The College of Art, in Toronto, serves the whole province, while some of the larger technical schools have well organized art departments.

Commercial courses in the province vary from two-year courses in the high schools, which are not recognized as vocational, to the five-year courses of the Toronto High School of Commerce. Most vocational commercial courses cover three years' work and are organized as branches of the technical schools.

The larger cities have separate vocational or technical schools, but the smaller places usually organize vocational departments in connection with the other departments of a composite or cosmopolitan high school. The vocational work is divided into five branches: 1. Technical and industrial, 2. Commercial, 3. Home Economics, 4. Applied Art, 5. Agricultural. Federal grants are not paid on the agricultural work.

Vocational education in Ontario had become fairly well established by 1919. Day classes were operated in eleven cities, and evening classes were carried on in thirty-six municipalities. In 1927, day schools were

established in thirty-two municipalities, and evening classes were operated in fifty-seven centres. The enrolments in 1927 were 21,684 for day schools and 37,977 for evening classes. The total expenditures on all types of secondary vocational education in the province exceed $4,000,000 annually. During the three-year period from 1920 to 1922 the expenditures on new buildings exceeded $5,000,000, and the building program has not slackened since. The provincial government each year earns considerably more than the amount available under the Technical Education Act.

Manitoba

Vocational education became established in Manitoba in 1912, when two large technical high schools were opened in Winnipeg. These schools provided day and evening classes in commercial work, home economics, and general industrial education. The courses were of three years' duration and paralleled the regular high school courses.

By 1919, the work had been started in five municipalities. In Brandon, there were day classes in commercial work and home economics, and evening classes for the building trades. In the three other centres, the work was confined to day classes in home economics.

For various reasons, the work in Manitoba has not made progress. The day industrial courses in Winnipeg have become manual training high school courses. Commercial courses are conducted in Winnipeg and in two neighboring municipalities, while evening classes are confined to Winnipeg. Home economics is carried on in Winnipeg only.

The Winnipeg School of Art has undertaken certain work for the Department of Education since 1924, and is recognized as a part of the provincial system of vocational education.

The total enrolment in day classes during 1927 was 1,944, and in evening classes 1,174. In addition to these pupils, 32 men were enrolled for correspondence instruction in stationary engineering, a new development which started in 1926.

Saskatchewan

The Vocational Education Act of Saskatchewan was assented to on February 4, 1920, but, owing to lack of industrial development, the progress of the work has been very slow and no one has yet been appointed to organize and supervise vocational education throughout the province.

Commercial courses are successfully carried on in Regina, Saskatoon, and Moose Jaw. Instruction in industrial work and household science of a general nature is provided in day classes at Regina and evening classes in a variety of subjects are operated in Regina and Saskatoon. The total enrolment in day classes during 1927 was 727 and in evening classes 1765.

Alberta

A good beginning in vocational education had been made by the Province of Alberta before 1919. A pre-vocational school in Calgary provided industrial, commercial, and home economics courses in grades 7, 8 and 9. A technical school in Edmonton offered four types of work, viz., pre-vocational, industrial, technical matriculation, and special courses. Commercial schools were operated in three centres and evening classes were conducted in four municipalities.

Plans were completed in 1919 for the erection of the Provincial Institute of Technology and Art in Calgary, to take the place of the classes which had been carried on, since 1916, in temporary quarters. The new building was completed in 1922 and the work in this institution has grown steadily. A large wing was added to the shop buildings in 1926 and all classes are filled. The work is all of an industrial nature. The Institute provides full-time two-year courses, short-term winter courses, summer courses, and evening courses, for pupils from all parts of the province. It also conducts correspondence courses in stationary engineering and mining.

Day school work in Alberta, although slightly increased, is still confined to the four cities mentioned above. Evening classes have been operated in as many as twenty different centres, but owing to a period of depression, particularly in the mining districts, the classes have been discontinued in a number of centres. Nine municipalities were carrying on evening classes in 1927, with a total enrolment of 2,107 pupils. The total enrolment in day classes was 2,034.

Conditions have greatly improved during the past two years and the outlook for the future is very hopeful.

British Columbia

Vocational education in British Columbia had made a good start prior to 1919, but the greatest period of growth has occurred since 1923. In 1919, day classes were conducted in eight municipalities with a total enrolment of 990, and evening classes were held in twelve centres, with 2,448 pupils. In 1927 there were fifteen municipalities operating day schools with an enrolment of 3,292 pupils, while 39

centres carried on evening classes with a total enrolment of 5,176. The bulk of the day work consists of commercial classes, but industrial training is provided in four municipalities and home economics is carried on in three cities.

Teacher-training is centralized in Vancouver and is provided through summer courses, Saturday classes during the school terms, and correspondence instruction.

Approximately 200 pupils are enrolled in correspondence courses for mine operators, provided by the provincial Department of Education.

An apprenticeship council was formed in Vancouver in 1925 to foster and control the training of young workers in the building trades. A successful beginning has been made in the carpentry trade and all apprentices are required to attend special evening classes at the local technical school.

Arrangements are being made to erect a new technical institute for Greater Vancouver and it is expected that the next few years will witness a decided development in the work along the lines of special programs for the growing industries of the province.

Summary

One cannot review the developments in Canada during the past few years without being impressed by the rapidity with which secondary vocational education is becoming an established part of the provincial education systems, especially in the larger industrial centres.

It is scarcely to be expected that work which has developed so rapidly will be free from defects or weaknesses, and vocational education in Canada is no exception. The difficulty of securing trained leaders and teachers with industrial experience and a sympathetic understanding of the purpose and needs of vocational education is perhaps the greatest handicap under which the work had been carried on. The schools have not been accustomed to shape their programs to fit local conditions nor have they been in the habit of seeking the co-operation of leaders in industry when organizing courses of study. Industry, on the other hand, has not realized its obligation to the schools nor appreciated the value and limitations of school training. The need for close co-operation between the school and industry is only beginning to be understood and the ineffectiveness of vocational education in several centres is due to lack of such co-operation. Another weakness is the tendency on the part of those organizing new work to copy the methods and organization of other provinces or municipalities. We can and should profit by one another's experiences, but if progress is to be made there must be provision for the exchange of detailed information regarding the *why* as well as the *how* of methods and organizations being tried out in various parts of the Dominion.

It would seem that the greatest need of the immediate future is co-operation not only within the educational systems but in the relationship between schools and industry. Some promising developments along the line have been started within the past two or three years, and the outlook for the future is very encouraging. One is tempted to predict that the developments and progress of the next ten years will greatly exceed those of the past three decades.

NOTES ON VOCATIONAL EDUCATION AND APPRENTICESHIP

Growth of Vocational Education in Ontario

IN an address delivered at the annual convention of the Ontario Education Association at Toronto in April last, Mr. D. A. Campbell, Director of Technical Education for the Province of Ontario, described the purpose and nature of the work of the vocational schools throughout the province, giving illustrations of the rapid growth of such schools during the past few years. He pointed out that their growth had been one of the significant events in education during the past few years. The number of teachers employed in vocational work had grown in five years from 191 to 530, and during the same period the number of pupils had grown from 2,600 to 15,201. The increase during the past year was 3,706, or sufficient increase in number of pupils to fill 7 schools each holding over 500 pupils. At the present time the total enrolment in day vocational schools comprises approximately 25 per cent of the pupils enrolled in other secondary schools of the province with a promise of rapid growth for some years to come. The total number of full-time day schools open throughout the year was 30, not including at the present time 4 agricultural schools, nor including 3 full-time day schools in navigation and engineering open during January, February and March.

During the present year several cities have prepared plans for vocational schools, the latest being a school of mining at Timmins over 400 miles north of Toronto.

The purpose of the vocational schools, Mr. Campbell said, is to provide young people

with a good education, and in addition to prepare them to enter employment with sufficient initial training for business or industry to fit them for success, and increase their earning capacity, efficiency and productive power.

Referring to the results obtained, Mr. Campbell pointed out that on account of their quite recent establishment some schools are unable as yet to furnish concrete evidence that the purpose mentioned is being attained. However, many graduates are being readily accepted into business and industry. In various ways employers acknowledge the value and the soundness of the training given in the vocational schools, and it is to be noted that they are approved by organized labour associations. In Hamilton the apprentices in certain industries are required to attend the Hamilton Technical Institute for part-time instruction.

In Windsor the Ford Motor Company accepts in its tool making department only graduates of the Windsor-Walkerville Technical School. In Kitchener, one firm requires its apprentices to attend the evening classes of the technical school. In Ottawa, printing apprentices are in attendance at the technical school. Quite recently a province wide scheme has been organized by employers and organized labour comprising all those associated with all branches of the building construction industry to establish an apprenticeship system and to contribute funds to provide a wage of $2 per day for all their apprentices who are required to attend the technical school during periods of non-employment. The training given in the schools is very varied and prepares young people to earn a living whether at a lathe or bench in a machine shop, at a switchboard in a power plant, in a repair department of a garage, in an alteration or sales department of a dressmaking shop, in office work with financial companies, and in many other fields where vocational training and skill are required.

The Training of Apprentices in South Africa

Early in September an apprenticeship conference was held in Johannesburg at which were present representatives from 26 of the 29 existing Apprenticeship Committees from all parts of the Union. The conference was opened by the Minister of Labour, the Honourable T. Boydell, and in his opening remarks he made the following reference to the importance of apprenticeship. "The Labour Department has many activities, but there is no branch so inspiring, so encouraging, so satisfactory, so fruitful and of such far-reaching importance to the youth of South Africa as the work being done in connection with the placing of our boys and girls and their adequate training through Apprenticeship Committees. These last are rendering not only an immense service to these boys and girls, but are rendering also a national service which is bound to have a real beneficial effect on the future life of South Africa."

The American Vocational Association

The following announcement, recently published by the American Vocational Association, will be of special interest to persons engaged in vocational education work throughout Canada. A new organization, known as The American Vocational Association, meets in Los Angeles on December 17, 19 and 20, for its second annual convention. This organization results from the amalgamation of The Vocational Education Association of the Middle West and The National Society for Vocational Education. Its membership consists of persons interested in the vast change that has come over modern education wherein the need for a training for life employment has been recognized. It represents all those interested in trade and industrial education, home economics education, manual arts education, foreman training, retail store training, agricultural education, vocational rehabilitation, and vocational guidance. It is not only a national, but an international organization.

Speakers will be present at the convention representing the departments of education of both Canada and Mexico. Educational experts and industrial representatives will meet upon the same floor to discuss problems of common interests in the field of education as applied to the needs of the worker.

Everyone interested in any of the above branches of vocational education is invited to be present. The committee in charge of the convention assures all those attending that they will not only have an opportunity to make history in the field of education, but that they will also experience an enjoyable time as the guests of the City of Los Angeles.

Apprenticeship in Wisconsin

The Industrial Commission of Wisconsin has just published its Biennial Report for 1924-26. A section of the report is devoted to the work of the state department of apprenticeship which was organized in 1915, and the following information is given respecting this work. Since the organization of this department, every agency in a position to do so has

been called upon to assist in putting apprenticeship on a sound and systematic basis. Activities in this field are carried on in co-operation with individual employers, their associations, both city and state, labour unions, public schools and parents.

Briefly outlined, the Wisconsin apprenticeship system provides for the indenturing of learners in crafts or businesses requiring at least one year's training. The written apprenticeship agreement is made out on standard forms issued by the Industrial Commission in which the employer promises to give the learner a prescribed course of training, and the apprentice in turn agrees to remain with the employer for the duration of the term of training, which ranges from one to five years. The Industrial Commission supervises the training, arbitrates differences arising between the parties and in general enforces the terms of the contract. The Commission states that employers are convinced of the merits of apprenticeship and that they now co-operate with each other, with labour, with the schools and with the state. Ten concerns now employ full-time apprentice supervisors and several have engaged men for this purpose on a part-time basis. Since the percentage of completions of apprenticeship is high, it is an indication that the apprentices themselves are satisfied.

British Labour's Apprenticeship Program

The *Labour Press Service*, published by the Labour Party's publicity department, sets forth the education policy of the Labour Party in England as follows:—

Its aim is the development of public education to such a point that every normal child, irrespective of the income, class, or occupation of his parents, shall receive the instruction suited to his age and his own natural aptitudes and capacity, and enjoy throughout the school period the material surroundings and conditions necessary for health and physical growth. As immediate practical steps to this end the annual conference of the party is recommended by the national executive to adopt the following principle:—

1. All normal children shall pass about the age of eleven from the elementary school to some form of secondary school, and shall remain there until the age of fifteen, and ultimately until the age of sixteen.

2. Students who have reached a suitable standard of attainment shall have free access to the university or to a technical college.

3. It shall be the duty of the authority to provide adequate allowances for maintenance for children over fourteen attending a place of full-time instruction, the whole cost of such provision being met out of national funds.

4. Authorities shall be free to use their powers to grant allowances for maintenance to children under fourteen, whether attending elementary or secondary schools, where such children are in need of them.

5. The size of classes shall be reduced to a maximum of 40, and as soon as possible to a maximum of 30, and the Board shall in future withhold recognition from any but fully qualified teachers.

6. Authorities shall be required to organize sufficient and suitable open-air nursery schools for children over two and also special schools for children unable to profit from the ordinary school course, including schools for all mentally defective and open-air recovery schools for tuberculous, rheumatic, and other debilitated children.

7. Old insanitary or unsuitable buildings shall be rebuilt or remodelled on modern lines, a special non-recurrent grant being allocated by the Board for this purpose.

8. School meals shall be provided free for necessitous children and at cost for children whose parents or guardians are prepared to pay for same.

9. Medical treatment of every kind shall be given free of charge whenever there is need.

Child Labour Day will be observed throughout the United States for the twenty-first year on the last week-end in January. As in former years, this will be the occasion for religious and educational organizations, women's clubs and other interested groups to bring to the attention of their members the facts that the problem of child labour is not yet solved. It is pointed out that child labour involves more than the mere question of the age at which a child should be allowed to go to work. It includes the prohibition of all work for children under 14, and of dangerous work for children under 16; it includes the establishment of an 8-hour day and the prohibition of night work for children under 16; and evidence that the child is strong enough for work.

Few states have adequate protection in all these respects. In 14 states the law carries an exemption which makes it legal for children under 14 to work in factories or canneries, at least out of school hours; in 11 states children are permitted to work 9 to 11 hours a day; in 17 a physician's certificate is not required of a child starting work; in 28 children of 14 may work around explosives; in 22 they may run elevators; in 17 they may oil and clean machinery in motion.

AMERICAN FEDERATION OF LABOUR

Synopsis of the Proceedings of the 47th Annual Convention

PRECEDED by a procession of delegates to the convention hall, the 47th annual convention of the American Federation of Labour opened in Los Angeles, Cal., on October 3. The opening session was presided over by Mr. Collins Hardin, chairman of the local arrangements committee, who first called on the Right Rev. Monsignor McCarthy to deliver the invocation. The welcome of organized labour of the city was tendered by Mr. A. W. Hock, president of the Los Angeles Central Labour Council, and that for the State by Mr. John F. Dalton, president of the California State Federation of Labour. The civic welcome was given by Mr. Wm. G. Bonnelli, president of the City Council, while the Hon. C. C. Young, Governor, and the Hon. Burton Fitts, Lieutenant Governor, welcomed the delegates on behalf of the State of California. The Rev. E. P. Ryland, secretary of the Los Angeles Church Federation, welcomed the delegates in the name of the churches. Mr. Harvey E. Garland, chairman of the entertainment committee, and Mr. J. W. Buzzell, secretary of the local Central Labour Union, also made short addresses. Mr. W. Green, president of the federation, responded to the addresses of welcome.

The first order of business was the report of the credential committee, which showed 386 delegates entitled to seats at the convention, representing 92 international and national unions, 4 departments, 28 state federations, 68 trades and labour councils, 17 local trade and federal labour unions and 5 fraternal delegates, among the latter being Mr. Alf. Farmilo, representing the Trades and Labour Congress of Canada.

Following the adoption of the rules of order for conducting the business of the convention and the appointment of the customary committees, copies of the report of the executive council were distributed.

Summary of Report of Executive Committee

The following is a summary of the report of the executive council as read to the convention:—

Our report for the year 1927 is divided into sections corresponding to our various activities. The report of the Secretary and Treasurer of the American Federation of Labour show the sound condition of our movement. There has been a gain in total membership during the past year and an increase in the average membership of directly affiliated local trade and federal labour unions. Our finances have been wisely expended and administered, and the total balance on hand August 31, 1927, was $251,642.74. The report of the trustees of the American Federation of Labour Building showed a balance on hand at the close of the fiscal year of $26,164.78.

We begin our report on specific achievements with an enumeration of outstanding achievements, matters upon which policy would be formulated and a discussion of outstanding problems. Under "Achievements" we list progress toward mutual understanding, jurisdictional adjustments, a new goal—the five-day week, constructive activities of trade unions, union wage standards maintained, progress in educational work, the Pan-American labour congress, success in defeating communist efforts to control our movement.

We recommend formulation of policies with regard to income for old age and union investments.

Under "Outstanding Problems" we discuss the legal status of the union, how to organize highly machinized industries, how to maintain members' interest in union work, and company unions.

Under the section "Economic" we make documentary report of agreements reached between the Painters and Electrical Workers, the Machinists and Teamsters, Machinists and Engineers. An adjustment of the long-standing difficulty within the International Journeymen Horse Shoers Union, and an agreement between the Bricklayers and Plasterers are included. We also report agreements pending between the Electrical Workers and the Railway Signalmen, the Machinists and Street and Electric Railway Employees, the Tunnel and Subway Constructors and the Hod Carriers, Building and Common Labourers. We review the reorganization of the International Fur Workers under trade union control, progress in plans to extend trade union organization, and commend the loyal service of volunteer organizers.

Under the heading "History of Hours of Labour" we give a summary of progress in reducing hours of work since 1776.

With regard to labour banks, we urge extreme caution in conducting financial institutions, and declare it is unwise to experiment further until we know exactly which policies are safe and dependable.

Under Section 2, "Education," we report on work that has been accomplished during the past year by the American Federation of Labour Committee on Education. This committee is giving major consideration to compulsory school attendance laws in order to help local committees on education to raise standards for compulsory school attendance laws and their administration. The committee is also making a study of vocational education. A study of the selection of text books was made and published for the benefit of local committees.

Under "Publications" we list the books, pamphlets and other literature published recently by the American Federation of Labour.

The undertakings of the Workers' Education Bureau for the past year are reported, together with its Fifth National Convention. We recommend that all unions co-operate with the Bureau. We also recommend a change in the

constitution of the Workers' Education Bureau which will make trade union control more effective.

Under the heading "Memorials" we make a recommendation for a Samuel Gompers Memorial and report upon our co-operation with memorial foundations to Woodrow Wilson and Thomas Jefferson. We also urge appropriate observance of Labour's special memorial days.

Section 3, "Legislation." The outstanding laws in which labour was interested which were enacted during the past year were Workmen's Compensation for Longshoremen, Liberalization of Rates in the Federal Workmen's Compensation Act. Among the bills hostile to labour which were defeated were conscription legislation, registration of aliens blue laws for the District of Columbia, fixing of prices during suspension of mining and the Wadsworth-Garret amendment to the Constitution. We then make a detailed report upon all federal legislative activity and summarize labour legislation enacted by the various states, with a section devoted especially to our various effort to improve workmen's compensation legislation.

Section 4, "Legal," contains a report on the work of the Legal Information Bureau, a discussion of important legal decisions during the year concerned with injunctions, picketing, strikes, interstate commerce, trade unions, wages, workmen's compensation, conspiracy, trade union agreements, contempt and criminal syndicalism.

Section 5, "Political," contains a report on our non-partisan political activity.

Section 6, "Public Relations," reports on our co-operation with the Personnel Research Federation and the American Bar Association. We recommend continued co-operation with these two organizations.

Section 7, "Public Welfare," deals with relief for the Mississippi flood victims, modification of the Volstead Act, and the regulation of child labour.

Section 8, "Health," contains our report on co-operation in the observance of child health day and our efforts to secure information on health hazards from the use of the pneumatic hammer.

In Section 9, "International Relations," we report on the Mexican-American Labour Immigration Conference and submit the memorandum of agreement reached by the conference. We submit the report of the American Federation of Labour delegates to the Pan-American Federation of Labour Convention. We report correspondence with the International Federation of Trade Unions and our efforts to help Cuban labour. We submit the reports of the labour representative in the Third Pan-American Commercial Conference and the Adviser on Labour Questions to the International Economic Conference, as well as our efforts to help and advise the Australian Industrial Commission.

The executive council, in a supplemental report, made reference to the strike of the bituminous coal miners in United States coal fields, more than 250,000 miners being idle since April 1, 1927, and recommended that representatives of organizations affiliated with the American Federation of Labour meet with officers of the United Mine Workers at Pittsburgh on November 14 for the purpose of considering ways and means by which the federation and its affiliated bodies may be helpful in the strike situation.

Other supplemental reports of the executive council included (1) Agreement between the Amalgamated Association of Street and Electric Railway Employes and the International Association of Machinists, whereby a conference will be held to settle jurisdictional disputes; (2) Report on the investigation made into the relationship of the Mexican Federation of Labour and the Mexican Government; (3) Reports of fraternal delegates to the 1927 convention of the British Trades Union Congress and the Trades and Labour Congress of Canada.

The various clauses of the report of the executive council were referred to the appropriate committees for consideration and report.

Report of Committee on Executive Council's Report

The committee on the executive council's report approved of the warning given by the council in regard to union investments, and stated "Every financial error or failure in the handling of the finances of our movement has a tendency to impeach the business ability of the leaders in our movement. Repetition of past mistakes should be avoided."

The committee praised the work of the executive council in investigating the work of the communists in the International Fur Workers' Union and for the successful reorganization of the union.

The committee approved of the recommendation that a week during the month of February, 1928, be set aside and known as Gompers memorial week, and that trades and labour councils call upon local unions and members for contributions for the erection of a suitable memorial in Washington, D.C.

The executive council reported the defeat of the proposal for a workmen's compensation law for the District of Columbia. The committee advised continued efforts to secure this legislation, as well as compensation laws in those states where no such statute has been enacted.

Endorsation was given to the non-partisan political policy of the federation, reference to which was made by the executive council.

In regard to the Mississippi flood, the committee recommended that the executive council petition congress to work out a plan whereby a recurrence of a flood of this character will be prevented, if humanly possible, and this regardless of the cost.

The committee endorsed the recommendation of the executive council for a conference

in connection with the strike of the bituminous coal miners, and urged a large attendance of representatives.

In regard to a resolution asking that the word "typewriters" be changed to "typists" in the title of bodies known as Stenographers, Typewriters, Bookkeepers and Assistants' Unions, the committee on executive council's report recommended that the request be referred to the executive council for consideration.

A resolution was submitted by the Journeymen Tailors' Union protesting against the American Federation issuing charters to cleaners, dyers and pressers' Unions until such time as final determination of the jurisdictional lines of the Tailors' Union is reached. The committee disapproved of the resolution and recommended that if any further dispute arises arrangements should be made whereby said dispute be presented to the executive council for consideration and decision.

The recommendations of the committee on report of the executive council were adopted.

Finances and Membership

The report of the secretary, Mr. Frank Morrison, showed receipts, including the balance from the previous year, of $736,676.70 and the expenses $485,033.96, leaving a balance on hand of $251,642.74.

The secretary reported on the education fund, which is designed to promote co-operation on the Rochdale plan, the receipts to which during the period from April 1, 1918, to August 31, 1927, amounted to $4,432.41, and expenses to $3,331.92, leaving a balance of $1,100.49.

For the Woodrow Wilson memorial building fund the contributions and interest now amount to $1,606.66.

The amount in what is termed the flag fund amounts to $542.54, and for the Gompers' memorial fund $98.50 has been contributed.

Contributions in response to the appeal for the United Textile Workers from October 16, 1926, to August 31, 1927, amounted to $34,414.99, all of which had been forwarded to the secretary-treasurer of the union.

The appeal for funds to aid the International Ladies' Garment Workers' Union netted, from October 21, 1926, to August 31, 1927, the sum of $24,806.37, all of which was turned over to the garment workers' union.

In response to the appeal for assistance for the striking miners of Great Britain there had been contributed from July 12, 1926, to August 31, 1927, the sum of $83,869.33, all of the money being forwarded to the Miners' Federation of Great Britain.

The report of the trustees of the A.F. of L. building located in Washington, D.C., showed receipts of $49,785.38, and expenses of $23,620.30, leaving a balance of $26,164.78.

During the fiscal year, 28 trade unions and 15 federal unions had been chartered, making 97 charters issued; for the same period one international union—the Elastic Goring Weavers' Association—had dissolved; 19 trades and labour councils were also dissolved, 31 were suspended and 10 reinstated; 9 local trade unions had dissolved, 64 were suspended, 2 joined international organizations and 5 were reinstated; 3 federal labour unions had dissolved, 20 were suspended; 4 were reinstated, and 2 joined international organizations.

At the close of the fiscal year of the federation there were 106 national and international organizations in affiliation, as well as four departments, 49 state federations, 742 local department councils, 794 city central bodies, 365 local trade and federal labour unions, the whole comprising 29,394 local unions, the average paid-up membership being 2,812,407, an increase of 8,441. As the affiliated international organizations are required to pay only per capita tax upon their fully paid-up membership, the membership reported did not include all the members involved in strikes or lockouts, or those who were unemployed during the fiscal year, and who if counted, the secretary pointed out, would give a total membership of 3,312,407.

The reports together with that of the treasurer, were referred to the Audit Committee and were subsequently approved by the convention.

Report of Committee on Law

A resolution referred to the Committee on Law was from the Newsboys' Union, No. 15834, of Seattle, Washington, proposing that members under 16 years of age of directly affiliated unions pay a *per capita* tax of only five cents per month instead of the regular tax of 35 cents per month. The committee recommended non-concurrence in the resolution, believing that the change would be impracticable and unsatisfactory, and would be similar to class legislation. The committee, however, suggested that the executive council should look into the matter, and if they can find a way in which some relief could be given to this union in accordance with the constitution, that the relief should be granted. This recommendation was adopted.

The Committee on Law submitted a resolution to amend section 1 of Article IV of the constitution, defining the basis of representation by adding the following:

> Only those persons whose local unions are affiliated with central bodies or with state branches and who are delegates to said central bodies and state branches shall be eligible to represent city central bodies or state branches in the conventions of the American Federation of Labour.

In explaining the purpose of the amendment the chairman of the committee stated that "under the present system in recent years undesirables have come here as delegates who could not be elected in their own central bodies or in their own organizations. What the amendment proposes to do is to say that only those individuals can represent central bodies or state branches in this federation whose local unions are affiliated with the central bodies or state branches in the districts where the individuals are delegates to such central bodies or state branches." The amendment was unanimously adopted.

An amendment was made to Article V, Section 1, which provides for the election of officers taking place on the last day of convention, by adding the words "unless otherwise determined by the convention."

Report of Committee on Legislation

To the Committee on Legislation were referred the references in the report to the executive council on legislative matters which had engaged its attention, as well as a number of resolutions in favour of proposed legislation. Referring to the statement of the executive council on the work of the 69th congress the committee commended the executive council for its vigilance in regard to legislation and urged a continuance of its opposition to obnoxious measures should they be again introduced in the next Congress.

The executive council report on immigration outlined the measures which had been before Congress on this subject, and in connection with which the committee recommended that the executive council watch very carefully immigration developments in the next Congress, so that any legislation enacted will reflect as closely as possible the ideas of the membership as heretofore expressed and repeatedly reaffirmed by preceding conventions, favourable to rigid restriction.

The committee approved of the efforts of the executive council to secure preferential status for American citizens in Government work, and recommended a continuance of activity until this is secured. The committee also approved of continual efforts to (1) bring into the light for public scrutiny and judgment the business methods of the so-called bread trust, "which seemingly has heretofore flouted the federal statutes": (2) to prevent the smuggling of immigrants into the United States as seamen; (3) in behalf of legislation providing pensions for Civil War veterans and widows of deceased veterans.

The committee regretted the many involvements injected into the Muscle Shoals proposition, and recommended that the executive council watch this situation, to the end that whatever legislative action is proposed it will conform to organized labour's idea and be for the best interests of the public.

The committee approved of the action of the executive council in keeping before Congress the proposed amendment to the constitution providing for a change in the date of the commencement of the terms of the president and vice-president of the United States and the members of Congress.

Approval was also given to the proposal that steel cars be used exclusively in the postal railway service, as well as to a proposal for a law that would subject all convict-made goods sent into a state or territory to the laws of such state or territory, to the same extent and in the same manner as though they had been manufactured therein, and for both measures the executive council was instructed to continue its efforts.

The committee recommended that the executive council lend its assistance to the affiliated organizations of postal workers in an endeavour to secure a readjustment of the existing postal wage rates. A resolution asking that the federation use its influence to have Congress pass legislation granting $150 a year increase to post office labourers, watchmen and messengers, was referred to the executive council.

In regard to the retirement of United States government employees the committee approved of the executive council's endeavours to secure more favourable conditions for retired civil servants, and also supported a proposal that the executive council co-operate with the representatives of affiliated organizations of Government employees to have the government recognize in a practical way, appropriate to the needs of each group, the hardships of night work.

In connection with the reference to postal rates in the report of the executive council, the committee considered a resolution proposing that the postal service of the United States should be operated for service and not

for profit, and asked support in having Congress declare a definite postal policy to this effect.

The committee also approved of resolutions in favour of (1) Elimination of speeding up practices in United States Government employment; (2) United States civil service court of appeals; (3) Extension of Saturday half-holiday for United States government workers; (4) A.F. of L. initiating effort to have more adequate appropriations allotted to the bureaus of the United States Department of Labour; (5) Granting self-governing power to the people of Porto Rico; (6) Special retirement legislation for Panama Canal employees; (7) More equitable salaries for United States government employees; (8) Abolition of and transfer of functions of the personnel classification board to the United States Civil Service Commission; (9) Investigation by United States Department of Labour into economic conditions and their relation to social and industrial problems.

The report of the Committee on Legislation was adopted.

Report of Committee on Labels

The Committee on Labels recommended concurrence in a resolution requesting that the officers and delegates attending the convention wear union-made collars and all other products of union labour where procurable.

Approval was also given to a demand that the executive council continue efforts to secure from Congress protection against the development of a bread monopoly in the United States, and urging the affiliated membership to purchase only bread bearing the label of the Bakery and Confectionery Workers' International Union.

Support was recommended to the campaign of the Full-Fashioned Hosiery Workers' Union for the purpose of educating the members of organized labour and their friends to purchase only full-fashioned hosiery made under union conditions.

Two resolutions, (1) Requesting that international unions discontinue use of union label to firms unfair to other trades, and (2) proposing that the use of the union label be restricted to firms that are fair to all unions whose trades are employed, were reported by the committee to have been withdrawn. It was pointed out that if adopted as presented the effect would be an invasion of the charter rights of affiliated unions. The committee, however, recommended that, if in harmony with their policy, the organizations interested be requested to confer, with the object of eliminating the conditions complained of, and if necessary that the service of the executive council be solicited to secure a satisfactory adjustment.

The committee approved of a resolution seeking a more rigid enforcement in certain districts of the existing laws against tenement house and home work, and asking that members of organized labour everywhere request the union label of the Journeymen Tailors' Union on custom made clothes.

The committee expressed satisfaction with the progress reported by the Union Label Trades Department in the matter of the increased demand for the union label, shop card and working button, and commended the department for making use of the radio in advising the public of the aims and ideals of organized labour.

The committee commended the address of President Wm. Green on the opening day of the convention, advocating legislation for the protection of women and children in industry and made a plea on behalf of the passage of a federal child labour law.

The committee made a strong demand on members of organized labour to patronize union made products, and stressed the opinion that the burden of increasing the drive for union made commodities rested upon the union members.

The committee expresses satisfaction with the amendments made by the Parliament of Canada to the Trade Marks and Designs Act, legalizing and protecting the various union labels, and extended thanks to the Trades and Labour Congress of Canada, the Union Label Trades Department and the various international organizations who co-operated to secure the passage of the amendments.

The committee concluded its report by commending the work of the Women's International Union Label League and asked that every possible support be given to the work of the organization.

The report of the committee was adopted.

Report of Committee on State Organizations

The executive council under the caption "Legislation in the States," gave a summary of laws enacted and defeated in certain of the State Legislatures. These references were submitted to the committee on State Organizations, which in its report stated: "The achievements of both affirmative and negative are a great tribute to the alertness, efficiency and proficiency of our several state federations of labour." The committee while commending the work which had been done, urged even greater attention in the future on the part of the state federations in the

field of beneficial legislation. After pointing out the importance of local unions affiliating with the state federations of labour, the report recommended that the executive council continue to urge the national and international officers to have their local branches identify themselves with these bodies.

The committee recommended that a resolution asking that a full-time organizer be maintained in Louisiana for a period of twelve months be referred to the executive council to act as the funds of the federation will permit.

The report of the committee was adopted without discussion.

Canadian Immigration

The following resolution was presented by the delegate from the New York State Federation of Labour:

Whereas, the United States, through the Immigration Department, is supposed to stop aliens from free entry to this country; and

Whereas, there was enacted into law a bill known as the Johnson Immigration Act, which intended to stop free entry to this country through Canada, as well as other ports; and

Whereas, the Department of Labour issued a general order, No. 86, which would stop all commuters from Canada entering the border cities in free opposition to American workers; and

Whereas, little attention is being paid to the provisions of the law by the immigration officials and thousands of immigrants are entering the United States through Canada every day and returning at night; and

Whereas, the living conditions are different from the American standards, and recent investigations showed that this element is tearing down the standards of American wages and conditions; therefore, be it

Resolved, that the American Federation of Labour cause an investigation to be made into the true conditions existing in New York State and to take such action as will force action for the protection of the thousands of men and women that are unemployed and are American citizens, while those commuters enjoy the freedom of free entry.

The Committee on Resolutions in reporting on the resolution said:

In relation to the subject matter of Resolution No. 5, it should be understood that the quota restrictions of the immigration laws cannot be lawfully evaded by those to whom the quota provisions should apply simply by entrance to the United States through Canada, and we believe that all necessary steps should be taken to prevent violation of law in that respect. The committee, however, does not believe that quota restrictions should be enacted against Canadians, large numbers of whom are members of international unions affiliated with the American Federation of Labour and whose standards of living are in harmony with those which prevail in the United States. There should be proper enforcement of the contract labour laws which prohibit the importation of labour under contract or agreement. With this understanding, the committee recommends that the resolution be referred to the Executive Council with instructions to take such other action as may, in the judgment of the council, seem best calculated to protect the interests of the American workers.

The report of the committee was adopted.

Mexican Immigration and Emigration

The executive council presented a copy of an agreement reached between representatives of the American Federation of Labour and the Mexican Federation of Labour on August 6, 1927, in relation to Mexican immigration and emigration as affecting the two countries. The agreement contemplates that not only shall the existing laws of the United States be properly enforced, but that the Mexican government is to be petitioned by the Mexican Federation of Labour "to consider and to enact a restrictive emigration policy, which in substance shall conform to the immigration law requirements of the United States." It was stated that although the agreement was signed only about two months ago the representatives of the Mexican Federation of Labour have reported that the Department of the Interior of Mexico has already perfected plans to discourage Mexicans from emigrating to the United States and Canada. The report after some discussion was adopted, and the executive council and the Mexican representative were commended for their work in the matter.

A resolution was presented in favour of legislation to place Mexico under the quota requirements of the immigration law. The Committee on Resolutions, to which the resolution was referred, recommended non-concurrence in view of the above mentioned agreement, the effect of which has not yet become apparent. The committee recommended referring to the executive council for investigation a resolution which requested restriction of immigration from Latin-American countries. The committee also recommended approval of a resolution asking for legislation prohibiting Asiatic labourers from the Philippine Islands from migrating to the United States either by direct route or via the territory of Hawaii. The report of the committee was adopted.

Another resolution which was adopted was one requesting the United States Congress to amend the artists' section of the Immigration Act, "so as to make its future application and interpretation more just to American workers."

Legal Status of Trade Unions

Under the heading of "Legal Status", the executive council stated that "unions are finding their work seriously handicapped by interpretation of existing law and by procedure in equity courts." The council cited cases "which indicate the seriousness of the present situation and which constitute grounds for seeking legislative relief." The council pointed out that "in order to give the trade unions not only legal existence, but the right to exercise their normal functions two legislative remedies must be enacted: amendment of anti-trust and anti-combination legislation to prevent restriction of normal union activity, as is possible under present law, and definition of the jurisdiction of equity courts."

The council also declared that the use of the "yellow dog contracts" has not decreased, employers in many states compelling their employees to sign contracts not to belong to unions as a condition of employment. In other instances, it was stated, "we find employers requiring their workers to belong to 'company unions'". It was also declared that in some states efforts have been made to secure legislation declaring the "yellow dog contracts" contrary to public policy.

The Committee on Resolutions, to which this section of the report was referred, reported in part as follows:—

The necessity for clearly defining the jurisdiction of the equity courts, as recommended by the Executive Council, transcends even the need for a change in the so-called anti-trust laws. The misuse of injunctions in labour disputes has become so notorious that unless a remedy is found the entire equity system will ultimately break under the increasing burden of disrepute which is attaching itself to it because of the misuse of injunctions against labour. The mere statement of the fact that in equity proceedings involving labour controversies the successful complainant's chair is invariably reserved for the employer or his representative, and that labour is always the defendant, should be sufficient to show the utter injustice of the present situation.

The use of equity proceedings as a means of setting aside law and denying the safeguards which the law provides are, in our opinion, a grave and dangerous violation of the letter and spirit of the constitution. The unwarranted seizure of jurisdiction by injunction judges is nothing short of judicial piracy which unfortunately has in some instances been authorized by the United States Congress and state legislatures. The equity court must be restricted to its proper field and this, the Council advises, necessitates the enactment of a statute defining the jurisdiction of the equity courts.

One of the recommendations of the committee was:—

That the President and the Executive Council take steps to bring to the attention of all affiliated organizations the need for participating in the nomination and election or selection of judges and that the candidates and their supporters be called upon to account for the misuse of the equity power. Require them to meet the issue in the open field of public discussion during campaigns for the nomination and election of judges within the states and when federal judges are being selected. It is true that this policy has been carried out to some extent in the past. It should be applied with greater persistency in the future.

The "yellow dog contract", the committee averred, is a grave menace; they stated that "the alleged 'contract' serves as a subterfuge upon which to base injunction to prevent workers from organizing in trade unions." The committee was in accord with the hope expressed by the council that state legislation would be secured declaring the alleged contract contrary to public policy, and therefore void. With these observations the committee approved of the report of the executive, which after a lengthy discussion was adopted.

The committee approved of a resolution denouncing decisions of Federal courts depriving workmen of the right to quit work, and recommended referring to the executive council a resolution endorsing a bill designed to limit the jurisdiction of courts of equity. Similar action was taken in regard to a resolution demanding the immediate repeal of the Sherman anti-combination law.

The convention approved of the holding of a conference of trade union representatives and representatives of such other groups as the executive council deems advisable, to meet in Washington at a date to be selected, for the purpose of considering plans to secure the passage of the legislation on the above mentioned questions.

Subsequent to the foregoing decisions of the convention, announcement was made that one of the judges in Western Pennsylvania had issued an injunction against the striking coal miners (members of the United Mine Workers) in that district, which was stated to be one of the most sweeping federal court injunctions in the history of labour disputes.

Jurisdictional Adjustments

In the report of the executive council reference was made to the jurisdictional agreements which had been effected between (1) the Brotherhood of Painters and the International Brotherhood of Electrical Workers, (2) International Association of Machinists and International Brotherhood of Teamsters, and (3) International Association of Machinists and International Union of Steam Engineers. Report was also made of an amalgamation of two local branches of the Journeymen Horseshoers' Union and of the result of an arbi-

tration award in the controversy between the Bricklayers, Masons and Plasterers' International Union and the Operative Plasterers' and Cement Finishers' Association and the agreement reached between the two unions subsequent to the award.

Disputes it was stated were still pending between (1) International Brotherhood of Electrical Workers and the Brotherhood of Railway Signalmen. (2) International Association of Machinists and the Amalgamated Association of Street and Electric Railway Employees, and (3) Tunnel and Subway Constructors' International Union and the International Hod Carriers, Building and Common Labourers' Union.

The committee on executive council's report, to which the above was referred, stated that "your committee can conceive of no one thing that augurs more for the betterment of the trade union movement than harmony and mutual understanding between the members of the various crafts." For this reason the committee congratulated the officers of the organizations who had settled their jurisdictional differences, and other unions which have misunderstandings were urged to adjust them.

At the fourth day's session the executive council reported that an agreement had been entered into by the International Association of Machinists and the Association of Street Railway Employees providing for the appointment of a committee to meet at A.F. of L. offices with a view to adjusting the controversy.

Subsequently the Committee on Adjustment reported that after hearing both parties in the dispute between the Tunnel and Subway Constructors and the Hod Carriers an agreement had been made to hold a conference in Washington within 90 days and endeavour to effect a settlement.

In the controversy between the Electrical Workers and the Railroad Signalmen the Committee on Adjustment recommended for adoption the proposition made by President Green to the signalmen at a conference held in June, 1927, in which a division of work was defined, and further recommended that if the Railroad Signalmen refuse or fail to agree to comply with the decision within 90 days the executive council was authorized to suspend the Railroad Signalmen if and when it deems said action necessary. One of the representatives of the Signalmen offered a substitute defining the jurisdiction of his union. The recommendation of the committee was adopted.

Referred to the executive council was a resolution from the American Flint Glass Workers' Union asking that the International Association of Machinists conform to the decision previously rendered in the making of moulds for glassware.

The "Volstead Act"

Under the caption "Modification of the Volstead Act" the executive council reported at length upon its efforts to secure a modification of the law mentioned, and recommended that the federation emphatically reaffirm its declarations of the past and insist upon Congress amending the Volstead Act to permit the manufacture and sale of wholesome beer. The convention without discussion approved of the action of the executive council.

To Investigate Old Age Pensions

On the subject of old age pensions the executive council recommended a comprehensive study of all plans of old age pensions in order that suggestions and advice may be made available for the use of the officers and members of all organizations affiliated with the A.F. of L. This clause, as well as two resolutions were referred to the committee on report of the executive council. One of the resolutions was an instruction to the executive council "to make, cause to be made, or support, if conducted by other competent authority, public or private, a thorough investigation and study for the establishment of an American system of invalidity and old-age pensions; to assist in the preparation of suitable legislation for the accomplishment of such purpose; and to promote its enactment by the creation and development of an earnest and enduring public opinion in favour thereof." The other resolution was an instruction to the executive council to have prepared the draft of a general bill for adoption in the several states providing for the establishment of uniform old age pension laws.

The committee on report of the executive council endorsed the recommendation of the executive council for a study of old age pension plans, and recommended that the two resolutions be referred to the executive council with the suggestion that an investigation be made and a complete report be presented to the next convention of the federation. These recommendations were adopted by the convention.

Refusal to have Certain Text-Books Barred

A resolution was introduced asking for the condemnation of the Ely Institute for Research in Land, in Economics and Public Utilities, on the ground that the propaganda of the Institute is not in accordance with the principles of the American Federation of Labour, and further requested that affiliated bodies put forth efforts to have all text and reference books prepared by the institute barred from the tax-supported schools, colleges and universities of the United States.

The Committee on Resolutions recommended non-concurrence, believing that to adopt the resolution would not only be a dangerous denial of free speech and free press, but would also be a very serious violation of the principle of academic freedom.

After some opposition to the report of the committee, the recommendation was adopted. It was then moved that the entire question be referred to the executive council for further investigation; which, however, was voted down.

Thanks Tendered Executive Council

The delegates from the International Fur Workers' Union presented a resolution outlining (1) the activities of the Workers (Communist) Party in the organization, and the calling of a general strike in New York city; (2) how the union requested the A. F. & L. to investigate the strike; and (3) how the union was reorganized, the resolve expressing the thanks of the Fur Workers' Union to the executive council for "the success in breaking the power of the Moscow agents" and bringing about a re-organization of the New York branches of the union and the joint council in that city. The resolution was adopted.

The International Ladies' Garment Workers' Union also extended thanks to the executive council for the assistance rendered "in the fight to save their union from the attack of the union-disruptive Moscow agents." Another resolution from the same union thanked the organizations which had given financial assistance in the struggle to save "their union, their only bulwark of defence against sweat shop conditions of misery and exploitation, from complete destruction by communist political adventurers."

Committee on Shorter Work Day

The Committee on Shorter Work Day recommended concurrence in a resolution in favour of an eight-hour day for New York city firemen, and also approved of a shorter work day and work week, not to exceed eight hours per day and six days per week, in the petroleum industry in the United States.

Also referred to the committee were the references of the executive council to (1) the New Goal—Five Day Week; (2) History of hours of labour; and (3) Forty-four hour week. The committee commended the executive council for the data which had been submitted on the shorter work day, and recommended that the council continue to incorporate in its reports information "which will increase our knowledge concerning the development of the shorter work day and work week." Concluding its report the committee stated:

> We must carry out our work of education until the shorter week has become universal, and in our efforts to accomplish this end we will be contributing to the social, moral and the economic benefit of our country. Man was made to earn his bread by the sweat of his brow, but he was not created to be a beast of burden. It is our trade union movement which has lifted labour from the type of man depicted by the painter Millet—the slant-browed man with the hoe—to the type of citizenship which our workers now give to our nation.

Committee on Education

Many sections of the report of the executive council were referred to the Committee on Education, among which were those under the following headings: (1) outstanding achievements; (2) report of committee on education; (3) free text books; (4) continuation schools; (5) The handicapped and the rural school; (6) nursery schools; (7) publications; (8) labour press; (9) Workers' Education Bureau of America; (10) week-end conference; (11) Passaic workers' education program; (12) labour institutes and summer schools; (13) research; (14) Fifth National Convention (Workers' Education Bureau); (15) affiliations; (16) memorials; (17) special days; (18) public health; (19) health; (20) trade marks, and (21) child labour.

The committee expressed agreement with the council on the various matters reported upon, and in some instances made recommendations with a view to furthering their accomplishment. The concluding clause of the report of the committee on the section referring to Child Labour was as follows:—

> To make our work to bring about the ratification of the child labour amendment more effective, we recommend that the American Federation of Labour be empowered to enlist the fullest moral and financial support of its members in their efforts to rouse the conscience of America against the evil of child slavery.

The committee recommended concurrence in resolutions: (1) In favour of organized labour being properly represented on admin-

istrative and advisory boards directing vocational educational programs; (2) Asking for federal aid to re-establish public schools in flood stricken areas. The committee recommended referring to the executive council a resolution urging organizations to deposit records of trade union history at A.F. of L. headquarters for availability to students and authors, and to the permanent committee on education a resolution opposing legislation retricting teaching in public schools.

Under the head of "Creative Education" the committee stated "After a survey of our educational system the A.F. of L. believes the time has arrived for a thoroughgoing reconstruction of our educational aims, methods and curricula so as to bring them in harmony with present-day life. Such a change will make it possible for our schools to function more effectively in the preparation of boys and girls for social living." The committee therefore recommended "the sympathetic but critical study of individual members and of educational committees of such modification of traditional curricula, subject matter and methods as tend toward allowing the child more indvidual development and toward developing in him social awareness and civic conscience." The recommendations of the committee were adopted.

International Labour Relations

The report of the executive council contained a synopsis of the proceedings of the convention of the Pan-American Federation of Labour held in Washington in July, 1927. This was submitted to the Committee on International Labour Relations which reported approval of the actions of the delegates of the American Federation.

The executive council reported that no satisfactory basis had been reached for reaffiliation of the federation with the International Federation of Trade Unions, The Committee on International Labour Relations recommended that the executive council continue its efforts to reach satisfactory arrangements by which the federation may reaffiliate.

The committee recommended for perusal the report of the delegate of the federation to the Geneva Economic Conference. The committee commended the action of the executive council in bringing to the proper authorities the treatment accorded members of organized labour in the Republic of Cuba.

The committee approved of the executive council participating in the Third Pan-American Commercial Conference and also in receiving the Australian Industrial Commission on its visit to Washington during the past year. The report was adopted without discussion.

On the last day of the convention the executive council presented a communication in connection with the supplemental report dealing with the investigation made by the council of the relations between the Mexican Federation of Labour and the Mexican Government. The letter was from the office of President Calles of Mexico declaring as spurious an agreement which it had been alleged "by those unfriendly to Mexico" had been made between the Mexican Federation and the Government. A denial of the existence of the agreement was also made by L. Morones, secretary of Industry, Commerce and Labour of Mexico.

Report of Committee on Boycotts

To this committee six resolutions were submitted, the first of which requested that the executive council be directed to attempt to secure a settlement of a strike in a Chicago factory which involved members of the Metal Polishers' International Union; failing to secure an adjustment the secretary of the federation was to send official communication to the countries in which the wares of the company are exported, notifying them of the "unfair" attitude of the company in question.

Another request was that the executive council endeavour to bring pressure on a Louisville concern to adjust its differences with the Metal Polishers' Union. The committee recommended that the resolution be referred to the executive council for consideration and action.

The committee concurred in a resolution asking for the condemnation of "the tactics" of two firms whose employees, it was alleged, are intimidated from joining the Full-Fashioned Hosiery Workers' Union. A motion was made to include in the resolution the name of a Minneapolis company, the employees of which had been locked out.

A resolution asking that a woollen mills company be declared unfair was recommended to be sent to the executive council for investigation and such action as may be deemed advisable.

Approval was given to a resolution endorsing the position of the unions of moulders, polishers and stone mounters in their controversy with a South Pittsburg Company.

The committee recommended that the secretary of the federation circularize all affiliated unions as to the attitude of a stone company in Hamilton, Ohio.

The report of the committee was adopted without discussion.

Report of Committee on Resolutions

In addition to the various resolutions which were submitted to the Committee on Resolutions a number of subjects from the report of the executive council were referred, among which were those under the following heads: (1) The record of the year's work; (2) Progress towards mutual understanding (denoting a favourable change in public opinion towards the trade union movement); (3) Constructive activities of the trade union (illustrative of the growing tendency on the part of trade unions to adopt improved systematic methods in dealing with their various problems; (4) Union wage standards maintained; (5) How to organize highly machinized industries; (6) How to maintain members' interest; (7) Company unions; (8) Labour and banking; (9) Registration of aliens. (10) Porto Rico; (11) Conscription; (12) Military training; (13) Radio; (14) Legal Information Bureau; (15) Court decisions; (16) Personnel Research Federation; (17) American Bar Association. With all of the statements of the executive council on the above subjects the committee was in accord.

Besides other resolutions reported upon by the Committee on Resolutions, there were the following, all being adopted:

(1) Instructing the executive council to continue its efforts to secure as convention hotel quarters in the convention city the most satisfactory hotel available from the viewpoint of trade union organization.

(2) Supporting a demand that organized labour patronize the product of a certain Massachusetts cotton company, whose employees are 100 per cent union.

(3) Urging co-operation with the international golden rule committee of the Near East Relief.

(4) In favour of a United States merchant marine.

(5) In favour of employment of seamen through the United States shipping commissioner's office.

(6) In favour of the passage of a law providing for the supervision of employment of seamen to insure safety at sea.

(7) Urging enactment of a law to prevent the smuggling of immigrants disguised as seamen.

(8) In favour of eight-hour day for sailors employed on United States merchant vessels.

(9) In favour of granting independence to the Filipino people.

(10) Instructing the executive council to use their judgment as to the procedure best calculated to secure the release of Thomas J. Mooney and Warren K. Billings, and that all affiliated bodies be guided solely by the declarations of the federation regarding the matter.

(11) In favour of the executive council preparing a suitable uniform badge for Labour Day.

(12) Re-affirming opposition to Fascism in America, and calling attention to the proper government officials to the work and purpose of the Fascist League of North America.

(13) Opposing the Navy Department of the United States adopting the central drafting office method for plans for ships, and urging stipulation in all contracts that only American citizens shall be employed upon public works.

(14) Disapproving the contract system of employment of municipal governments which fails to pay a living wage to employees.

(15) In favour of national and international unions creating funds for the support of a chain of broadcasting radio stations operated by organized labour.

(16) In favour of co-operation with farmers' organizations in finding constructive plans and policies.

(17) In favour of unions obtaining information from the president of the federation before responding to requests for contributions from other than affiliated bodies.

(18) Condemning the secession movement among iron workers on the Pacific coast.

(19) Protesting against the Seattle Labour Temple Association's housing a dual group of iron workers.

(20) Opposing the awarding of a contract for the proposed British embassy building in Washington, D.C., to an "unfair" construction company.

Resolutions Referred to Executive Council

Resolutions on the following subjects were referred to executive council for consideration on the recommendation of the Committee on Resolutions:

(1) Proposing a labour commission to visit Latin-American countries for the purpose of explaining the ideals of democracy, justice and goodwill of the American Federation of Labour.

(2) Denouncing pacifist doctrines as imperilling peace and the perpetuation of American principles.

(3) Urging legislation to secure wage standards for material sorters, trimmers, and handlers of New York city.

(4) Approving of the transfer to the Department of Labour of the enforcement of navigation laws.

(5) Three resolutions on the Colorado river system, in which the rights of states are involved.

(6) A request that the federation declare its purpose to have all contracts calling for the expenditure of public money, city, county, state or the Federal Government contain a clause stipulating the employment of American citizens, "to prevent the unjust exploitation of low-priced foreign labour."

(7) Commending the *WCFL Radio Magazine*.

(8) Rehabilitation plans for the Mississippi flood sufferers.

Fraternal Addresses

At the morning session of the third day of the convention the fraternal message from the British Trades Union Congress was delivered by Mr. Arthur Pugh, general secretary of the Iron and Steel Trades Federation, and Mr. Will Sherwood, national industrial officer of the General and Municipal Workers. The fraternal greetings from the Trades and Labour Congress of Canada were presented at the morning session of the fourth day by Mr. Alf. Farmilo, of Edmonton, Alta.

At the morning session of the fifth day Mrs. Ethel A. Holmes and Miss Anna B. Fitzgerald presented the fraternal greetings of the Women's International Union Label League.

At a subsequent session of the convention the fraternal delegates from Great Britain and Canada were presented with a gold watch suitably engraved, as a good-will offering of all the delegates. The wives of the British fraternal delegates were presented with similar gifts, and to the delegate from Canada who was unaccompanied by Mrs. Farmilo, a watch was given to take to his wife as a token from the delegates. The fraternal delegates tendered their thanks for the hospitality which had been rendered to them.

Others who at later sessions addressed the delegates included (1) the Hon. James J. Davis, United States Secretary of Labour, who presented greetings from President Coolidge; (2) Mr. E. Guy Talbot, representing the Near East Relief Committee; (3) Mr. Richard Cappack, general secretary of the National Federation of Building Trades Operatives of Great Britain; (4) Mr. Jokes P. Grey, newly-elected secretary of the Metal Trades Department of the A.F. of L.; (5) Mr. Jackson Ralston, a former attorney for the American Federation of Labour; (6) Mr. Spencer Miller, Jr., executive secretary of the Workers' Education Bureau; (7) Mr. Geo. Barnes, chairman of the Board of Governors of the Green Cross Organization; (8) Mr. Edward J. Evans, vice-president of the International Brotherhod of Electrical Workers; (9) Major General Summerall, chief of staff of the United States Army. (10) Attorney Hope Thompson, of Chicago, Ill.; (11) J. B. Maddrill, manager Union Labour Life Insurance Company; (12) Capt. Wm. J. Shirley, of the Disabled American Veterans of the World War.

Mrs. Sara Conboy, secretary of the United Textile Workers, at one of the early sessions, tendered thanks to the delegates for the financial assistance contributed as a result of the appeal made last year for the Passaic textile strikers.

Tribute to Mr. J. E. Giles

At the morning session of the sixth day President Green announced that word had been received from Washington of the death of Mr. J. E. Giles, who for eighteen years had been in the employ of the American Federation of Labour as an assistant in the office of Secretary Morrison. The delegates stood in silence for a brief space as a mark of respect to the deceased.

At a later session, as is the custom, the delegates honoured the memory of 21 departed members of affiliated organizations by standing in silence for a few moments.

Election of Officers

The election of officers resulted in all former office holders being re-elected as follows:—

President, William Green;
First vice-president, James Duncan;
Second vice-president, Frank Duffy;
Third vice-president, T. A. Rickert;
Fourth vice-president, Jacob Fisher;
Fifth vice-president, Matthew Woll;
Sixth vice-president, Martin F. Ryan;
Seventh vice-president, James Wilson;
Eighth vice-president, James P. Noonan;
Treasurer, Daniel J. Tobin;
Secretary, Frank Morrison.

Delegates to the 1928 convention of the British Trades Union Congress, Michael F. Greene and William B. Fitzgerald.

Fraternal delegate to the Trades and Labour Congress of Canada, Joseph W. Morton.

New Orleans, La., was chosen as the convention city for 1928.

NOTES ON LABOUR UNION ACTIVITIES

Canadian Brotherhood of Railroad Employees

THE fourth biennial and fourteenth regular convention of the Canadian Brotherhood of Railroad Employees was held in Montreal on September 19-24, 1927, with 137 delegates present, representing 103 local branches.

President A. R. Mosher, in his address to the Convention, touched on many topics of special interest to the membership, including (1) General labour conditions, more particularly with respect to the United Kingdom, the United States and Canada; (2) Progress of the Brotherhood; (3) Formation of the All-Canadian Congress of Labour; (4) Relationship to affiliated labour organizations; (5) Attitude towards United States unions; (6) Unemployment insurance, life insurance, and sick and accident insurance; (7) the Canadian National Railways' pension fund; (8) the convention of the International Transportworkers' Federation; (9) Political action; (10) Research; (11) Education; (12) Organization of Maintenance-of-Way Employees. In the course of his remarks, Mr. Mosher stated that "The Brotherhood has no objection to fair competition among the labour unions operating in Canada. The Canadian worker should be allowed to choose the type of union which he thinks will best serve him, but it is obvious that the basic principles of organization of the Brotherhood are different from those of United States controlled unions, and it is our duty to see that every railroad employee understands the difference. We believe that the Brotherhood is the logical labour union for every railroad worker in Canada, and, in spite of opposition and misrepresentation, we shall go forward steadily toward the goal of 100 per cent organization. At the same time, we should recognize that the ripest field for our efforts at the present time is that of the great body of workers, probably as large as our present membership, who are covered by our schedules, and upon whom no other union has any claim in that regard. That group of unorganized workers, who are at the present time a dead weight to be carried by the organized, must be converted from their attitude of indifference; they must be educated in the principles of unionism, and shown the possibilities which would result if they were united with their fellow-workers in the Brotherhood." In discussing the American unions, the president expressed the opinion "that they (the American unions) should confine their activities to the United States, and that their present branches in Canada should assert their independence." One of the significant events in the history of the organization, according to President Mosher, was the formation of a board of adjustment on the Canadian National Railways. This board was created to deal with grievances which could not be settled by direct negotiations between the Brotherhood general committees and the railway officers. In this way, co-operation had been brought about between the two parties.

The report of the Secretary-Treasurer for the two-year fiscal period ended April 30, 1927, showed that receipts from all sources, exclusive of insurance premiums collected, amounted to $252,844.79, while expenditures totalled $236,317.44, leaving a net balance of $16,527.35, increasing the assets of the grand division to $78,757.80. According to this report, the number of local branches of the Brotherhood had increased by twenty during the period under review, the total now being 179, with a total membership as at July 31, 1927, of 14,267, representing a gain of over two thousand. The report further showed that the number of members insured under the group contract of the Brotherhood with the Metropolitan Life Insurance Company was 1,047, while the total amount of insurance in force was slightly over a million dollars.

One of the most important of the proposed amendments to the constitution was that submitted by President Mosher, which provided for meetings of Grand Division every four years, and for meetings of General Grievance Committees at the same intervals, in such a way that every two years there would be a meeting of either Grand Division or the General Grievance Committees. Although the Committee on Constitution and Laws concurred in the proposed amendment, it did not meet with the approval of the Convention. It was, however, decided to hold the meetings of General Grievance Committees every three years, commencing January, 1929.

Another resolution not concurred in by the Convention was one sponsored by London division, No. 96, which sought to provide that wives of members would become automatically eligible for membership in the Brotherhood, with full voting power and privileges in all division meetings.

Among the resolutions adopted were the following: (1) Protesting against the breaking-off of trade relations with Russia, and urging that immediate steps be taken to renew the previously existing friendly relations, and to extend substantial credits to be used in the purchase of goods manufactured in Canada;

(2) Recommending that the seniority principle be fully maintained; (3) Protesting against the laying-off of employees who have reached the age of 65 years, and requesting the executive board to take any action possible to have such employees reinstated in their positions; (4) Asking the executive board to take steps to organize employees not already members of the Brotherhood, but particularly those belonging to "company unions"; (5) Requesting the Dominion Government through the Prime Minister, the Minister of Labour and the Minister of Railways to appoint a member of the Brotherhood to act as a technical advisor to the Canadian delegation to the conference to be held by the International Labour Office in Geneva in 1928; (6) Recommending that the attention of the management of the Canadian National Railways be directed to the alleged loss of business resulting from the methods adopted following the recommendations of so-called "efficiency experts", and requesting that no change be made without a thorough study of local conditions.

The officers elected were:—

President, A. R. Mosher, P.O. Box 395, Ottawa, Canada.

Secretary-Treasurer, M. M. MacLean, P.O. Box 395, Ottawa, Canada.

Vice-president, M. McLeod, 233 Richmond St., Charlottetown, P.E.I.

Executive Members, C. H. Minchin, 321 25th Ave., Calgary, Alberta, and William Allen, 123 Agricola St., Halifax, N.S.

Board of Trustees: T. McGregor, 264 Martin Ave., Winnipeg, Man.; R. A. Dumais, 3955 St. André St., Montreal, Quebec, and J. E. McDonough, 33 Ward St., Toronto, Ont.

M. M. McLean was elected as delegate to the 1928 congress of the International Transportworkers' Federation, to be held in Stockholm, Sweden, in September, and also to the convention of the All-Canadian Congress of Labour, in November, 1928. The second delegate to the latter is Joseph Wall, Brotherhood organizer, of Montreal.

Amalgamated Association of Street and Electric Railway Employees of America

The twentieth biennial convention of the Amalgamated Association of Street and Electric Railway Employees of America was held in Birmingham, Ala., September 12-19, 1927, with a large number of delegates present, President W. D. Mahon presiding. Among those who addressed the convention at its opening session were: Congressman Huddleston, Attorney J. W. Altman, J. M. Driver, president Birmingham Trades Council; J. L. Hurst, president, Alabama State Federation of Labour; J. M. Jones, president of the City Commission of Birmingham.

The president in his address referred to the first convention of the organization, which was held thirty-five years ago, and stated that "so far as he could learn he was the only remaining member of the association that participated in the work of that convention." Reviewing rates of wages and working conditions prevailing about the time of the first convention, the president stated that "Thirty-five years ago the street and electric railway workers of North America were working from 12 to 18 hours per day for a wage varying from $1.25 to $1.60 per day. There was no such thing as overtime or compensation for any extra or delayed time that might prevail in addition to these long hours of labour."

Comparing conditions of to-day with those prevailing during the early days of the organization, Mr. Mahon stated that "thousands of our members are to-day working an eight-hour day, with compensation for any overtime, and they are receiving a wage far beyond anything dreamed of by the pioneers who established this association; and they are working under conditions, while some of them are not as good as we would like to have, and which we hope to improve, yet the conditions prevailing to-day would have been considered a paradise by the 'old timer' of thirty-five years ago.

Reviewing the activity of the association during the past two years, President Mahon informed the delegates that there were 584 agreements negotiated, of which 452 were renewals of former agreements; 127 provided for wage increases and five for decreases.

During this same period there had been carried on a constant agitation for one day's rest in seven, and already some of the larger divisions had obtained this objective, and that further efforts with this end in view be continued, was the president's advice to the membership. President Mahon intimated that the policy of arbitration of the association had been continued during the past two years, with the result that twenty-eight cases which could not be mutually adjusted between local divisions and the employing companies were submitted to arbitration.

The report of the general executive board contained the proceedings of the five regular

semi-annual and two special meetings of the board. It also contained a detailed account of all cases submitted to it for ruling and direction. The four audits which had taken place during the past two years were presented in this report, the final audit as of July 31, 1927, showing a balance on hand of cash and assets to the credit of the association of $1,772,794.49; an increase of $444,682.05 within the two-year period.

During the morning session of the third day, addresses on "Safety First" were delivered by Col. Edward Perkins, manager of the St. Louis Railways, St. Louis, Mo.; Mr. Thomas Fitzgerald, general manager, Pittsburgh Railways Company, Pittsburgh, Pa., and Mr. T. G. Brabston, superintendent of transportation, Birmingham Electric Company, Birmingham, Ala.

Among the resolutions adopted were: (1) Favouring a sick and disability fund provided by the employers and to be embodied in all contracts and agreements wherever it is possible to put it into effect; (2) Recommending that in the "Order of Business" of the various unions there be added the "Label Order of Business"; (3) Suggesting that the book issued yearly by the international president containing wage scales, etc., in various cities, also contain the following: (a) The population of the cities listed, (b) The rate of fare paid in said cities, (c) The type of cars and motor coaches used; (4) Recommending that a vote of appreciation be extended the street railway managers who came to address the convention and that part of the proceedings of the convention dealing with the "Safety First" question be printed in pamphlet form and sent to the street railway managers whose companies have agreements with the Amalgamated Association; (5) Urging Major Geo. L. Berry, president, International Printing Pressmen and Assistants' Union, to become a candidate for president of the United States, and pledging him the association's full and complete support; (6) Favouring the preferential or choice ballot system of voting in election of officers in all divisions with a membership exceeding two hundred.

In the election of officers, Wm. D. Mahon, 260 Vernor Highway East, Detroit, Mich., was re-elected president, while among others re-elected were: John M. Parker, 189 River Road, Niagara Falls, Ont., Vice-president; Magnus Sinclair, 1872 Queen St. E, Toronto, Ont., and Fred A. Hoover, 2409 Clark Drive, Vancouver, B.C., executive board members.

Seattle, Wash., was selected as convention city for 1929.

Ontario Command, Dominion Postal Clerks' Association

The third annual conference of the Ontario Command, Dominion Postal Clerks' Association was held in Guelph, Ontario, on September 3, 1927, with approximately 75 officers and delegates present. President Helm extended greetings to all present and explained the purpose for which the conference was called. Vice-president A. Goss, Secretary Duncan and Treasurer Ness of the Dominion organization addressed the conference. The question of holding a Dominion convention was brought up and Mr. Ness stated "that he did not think they would be able to hold a convention this year."

In order to ensure the election of Dominion officers to carry on until the next convention a resolution was adopted whereby the conference recommended that a vote be taken by mail, first getting authority from the other Provincial Conferences.

Among the other resolutions adopted were: (1) Requesting the amending of Section 6 of the Superannuation Act to permit an employee receiving superannuation based on his official salary rate during his last completed year of service; (2) Recommending that speed tests be abolished; (3) Urging the appointment of a superintendent of branch offices in cities having several postal stations and sub-offices; (4) Recommending the formation of a Dominion-wide organization of postal employees; (5) Favouring association dues being deducted from the salary cheques of its members; (6) Recommending that the scope of the Civil Service Insurance Act be extended so that employees may obtain some form of insurance surrender policies.

General Executive Board, Amalgamated Clothing Workers of America

The quarterly meeting of the General Executive Board of the Amalgamated Clothing Workers of America was held in Toronto, Ontario, on October 15-17, 1927, and was attended by President S. Hillman, Secretary-treasurer J. Schlossberg, Assistant Secretary-treasurer J. S. Potofsky and twelve board members. Representatives of the Yiddish organ, the *Fortschritt,* and the Bohemian organ, *Prace,* were also present.

At the opening session President Hillman reviewed the situation in the larger centres, and referred to the steps taken to see that the national reserve fund assessment, ordered by

the Montreal convention and later ratified by referendum vote, was put into effect before the coming convention.

Following the president's address the situation in the various centres was discussed in detail by members best acquainted with conditions in the respective cities.

Reference was made to the situation in Montreal, where until recently it was stated conditions were anything but satisfactory, but as a result of recent elections "officers were elected who were working whole-heartedly with the active members in the task of extending the influence of our organization, and regaining for our members the conditions which had been frittered away as a result of chaotic conditions caused by factionalists within our ranks."

In the course of considering the problems of the Toronto organization the general executive board heard an appeal of Mr. Blugerman against the decision of the Toronto joint board declaring him disqualified to run for office of joint board secretary because of various charges brought against him. During the hearing of the appeal Mr. Blugerman admitted "that he had failed to pay to clothing firms various sums due them from him" and also "that he was a member of the Trade Union Educational League." When asked if he would obey the decisions of the Trade Union Educational League Mr. Blugerman's reply was that after thinking the matter over he would decide. The decision on this appeal will be made known by the general office. Industrially the situation in Toronto was reported as favourable.

The condition of the Amalgamated Banks of Chicago and New York was reported upon, as was also the co-operative housing project in New York, where members will have modern apartments in a beautiful section of the city at rentals approximately one-half of those prevailing in that section of the city.

International Federation of Trade Unions

The fourth annual congress of the International Federation of Trade Unions was recently held in Paris. Among the decisions reached by the congress was one urging the trade union movement throughout the world to stimulate the formation of unions of non-manual workers and civil servants, and to induce such unions to affiliate with the I.F.T.U. In unionizing non-manual workers and civil servants, it was pointed out that "attention should be paid to their special position, their working conditions, their social status and their mentality," and that "these workers should not against their will be incorporated into organizations of manual workers," although "co-operation should be encouraged in cases in which manual and non-manual workers have already formed successful joint organizations."

The congress urged its affiliated organizations to take all the steps that in their judgment might seem appropriate to maintain or recover the eight-hour day, and demanded that governments take measures to ratify the Washington Draft Convention on that subject. Strong opposition was expressed to separate agreements between governments on the eight-hour day without reference to the International Labour Office, and to the practice of some nations in permitting numerous exceptions when ratifying the Washington convention was strongly condemned.

Another decision of the congress was to carry on a perpetual peace propaganda. A special appeal was made to mothers and teachers to imbue the rising generation with the spirit of universal peace in order that international brotherhood may soon become a living reality."

International Transport Workers' Federation

A meeting of the Advisory Committee of the Seamen's Section of the International Transport Workers' Federation was held at Copenhagen on September 15 and 16, 1927, to discuss the national and international propaganda campaign for securing the legal regulation of working hours at sea, and a proposal was submitted by the German Transport Workers' Federation asking the secretariat of the International Federation to get into touch with organizations which are not yet affiliated, with a view to ascertaining what their attitude would be in the event of a strike being declared by a seamen's union affiliated to the Federation.

After the close of the meeting, Mr. J. Henson, representing the British seamen on the Joint Maritime Commission, stated to the press that the Maritime Session of the International Labour Conference to be held in 1929 had formed the main topic of discussion at the meeting. Fears were expressed that the legal limitation of hours of work on board ship would again be defeated as a result of

the hostile attitude of the shipowners, and the possibility and expediency of declaring a world-wide strike of transport workers in that eventuality was discussed. The various national representatives present explained their respective positions, but no actual decision was taken. It was agreed, however, that in the event of the 1929 Conference rejecting any proposals for the legal limitation of hours of work on board, all transport workers' organizations must be prepared for the possibility of an international transport strike.

According to a press communication of the International Transport Workers' Federation, dated September 23, the Advisory Committee decided to pursue energetically the action already begun for the introduction of the 48 hour week on board ship. It further decided to organize an international day of protest and propaganda during which the question of the eight hour day for seamen will be brought to the fore simultaneously throughout the world in about fifty of the principal ports.

At the Fifth Triennial Convention of the Brotherhood of Locomotive Engineers, held during the early summer of 1927, the delegates authorized the levying of a special assessment to be applied to the strength of the organization's financial undertakings. However, the October issue of the *Locomotive Engineer's Journal* announces that owing to the "remarkable response" of the membership in purchasing "Loyalty Loan Certificates" the levying of this assessment may not be necessary.

"SEVEN YEARS OF LABOUR BANKING"

IN an article appearing in the October issue of the *American Federationist*, entitled "Seven Years of Labour Banking", Mr. J. Douglas Brown, Director of the Industrial Relations Section, Princeton University, analyzes the history of this recent phase of the organized labour movement in North America (The sixteenth annual report on Labour Organization in Canada, published this year by the Department of Labour, contains a chapter outlining the development of labour banks).

Mr. Brown states that in the seven years since the first labour bank was opened forty such banks have been organized, of which thirty-three now still "remain as labour banks." Of the seven that have disappeared from the roll, four have been purchased or gradually absorbed by other than trade union interests, two have failed, and one has been liquidated.

After pointing to the experiences of the clothing workers' and engineers' banks in Philadelphia, (where, due to the widespread development of building and loan associations and the competition of a powerful bank, which seeks to attract wage-earners' salaries, the deposits available were limited) the writer observes that the availability of funds for capitalization is not alone sufficient to warrant the establishment of a labour bank. He considers that the essential need of labour banks or of other enterprises is for customers, and that a bank is peculiar in its need for both a lending and a borrowing clientèle. Admitting that the situation in Philadelphia was unusual, Mr. Brown lays down the general rule that before establishing a labour bank, labour groups must look carefully to the potential supply of deposits and demands for safe loans, as well as to the supply of capital.

In the writer's opinion the financial advantages which a labour bank can offer to the small depositor are limited both by the overhead in this type of banking, and by the keen competition faced by the bank in placing its fund in safe and profitable investments. Offsetting this, however, "experience has shown that the labour bank enters most communities with a marked advantage in its favour on account of its appeal to wage-earners, organized and unorganized", and that this appeal has proved sufficient to cause not only a transfer of deposits from competing banks, but to establish the habit of the use of banks among people unwilling to use commercial institutions. On the other hand Mr. Brown considers it questionable whether there is sufficient solidarity among labour groups in all communities "to guarantee that a bank operated by a single union, no matter how strong that union is nationally, may expect large deposits by members of other unions." He admits that labour banks sponsored by single unions have in several large cities been very successful, and the reason given is that "these are cases where the local membership in those cities is large."

Some of the advantages of the group or federation type of labour bank are stated as follows:—

> Many of the strongest labour banks, because of the number of local unions which have sponsored their establishment, have not had to face this possible difficulty of limited appeal. These institutions are closely associated with

the labour movement as a whole in their particular cities and in turn bring about increased solidarity among the various organizations which are responsible for their existence and growth.

What appears to be another advantage of the group or federation type of labour bank, in addition to its appeal to depositors, is its separation from control by any one labour organization. Too close a connection between a union and a bank is liable to create a strain upon the executive officers of both the union and the bank, especially if these are the same individuals. This day of division of labour requires concentration of energies. The professions of trade union leadership and banking are both exacting. A bank is necessarily a highly specialized institution, and the details of banking policy must be determined by experts, who should be isolated from the influences of group psychology. A trade union is, by contrast, peculiarly a democratic institution which must be responsive to the group in its policies. In many banks such separation has been sufficiently assured, but the experience of the engineers shows that this has not always been the case. Where a group of unions is interested in the labour bank, the officers of the bank are more apt to be relieved of the responsibility of union leadership. As bankers they are primarily concerned with the safety and efficiency of their institutions to the end that the labour movement as well as their clientèle and stockholders will profit.

In regard to the objection that since labour banks are aimed to prevent the use of labour's money by labour's enemies it would be "unwise to dilute too much of labour's authority in the direction of the banks," Mr. Brown states that "it has been found that a majority control of stock and of directorships assures that labour's interests will be protected against labour's enemies"; adding that "expert advice and community interest have not only aided in safeguarding labour's money and in strengthening labour's banks, but in making and retaining many friends for labour." Mr. Brown concludes that "the future of labour banking seems assured if union officers and membership are satisfied with slow and cautious growth. Funds are probably available in hundreds of communities for capital and deposits, provided the appeal of the labour movement is made effective. But such labour banks must be both safe and democratic. In most cities and towns they will have to be community enterprises controlled by labour groups in partnership with trained bankers, able advisers and all thrifty wage-earners. Through such institutions labour will be able to assure the neutrality of capital, if not its assistance, in the promotion of labour's best interests."

Cotton Industry in North Carolina

The 35th report of the Department of Labour and Printing of the State of North Carolina calls attention to the rapid development of the cotton textile industry in the state, especially during the past two years. There are now 49,792 men working in the mills, 30,582 women and 3,144 children. The first two figures indicate an increase during the biennial period 1925-1926, while the latter shows a decrease. The children employed in the mills are between the ages of fourteen and sixteen years of age. The average high wage paid males is now $5.71 and the low average is $2.12; these figures being an increase. The high average wage paid females is $3.08, and the low average is $1.88 the former being a decrease and the latter an increase. In 1924, at the close of the biennial period, the average maximum wage for the males was $5.20 and the low average was $2; for the females the high average was $3.25 and the low average was $1.30. In 1916 the average high wages for the males was $3.05 and the low average was 97 cents, while the high average for the females was $1.50 and the low average was 85 cents. The average working day is ten hours and the majority of the mills run full time, some operating both night and day. During the last few months operations have been on a more reduced basis, and in some instances running time has been reduced to four and five days a week, but the feeling is hopeful and a material improvement is expected during the coming months when prices at which the new cotton may be purchased is determined.

The Montreal representative of the International Moulders' Union recently made an appeal for the appointment of at least five additional inspectors for foundries and other establishments in the Province of Quebec. He stated that while the existing law was excellent in its safety provisions, the legal requirements in this respect could not be carried out without a large force of expert inspectors.

NOTES ON INDUSTRIAL SAFETY AND HEALTH

Industrial Hygiene in Ontario in 1926

THE forty-fifth annual report of the Department of Health of Ontario details the work conducted during 1926 by the various divisions of the Department. These divisions are concerned respectively with Preventable Diseases; Industrial Hygiene; Child Hygiene; Sanitary Engineering; Vital Statistics; Dental Services; Laboratories; Public Health Education.

In the section of the report relating to the division of industrial hygiene it is stated that sickness and accident are responsible for 75 per cent of all absence from work. Touching on the financial losses entailed as a result of accidents, and ill-health, the report states that the employer pays directly for accidents in Ontario to the extent of seven or eight million dollars a year, while sickness causes three to five times as much loss in time as accidents. Wage earners in Ontario lose about thirty million dollars a year in wages on account of ill-health in addition to all the anxiety and suffering. Occupational diseases are included in this estimate, but it is largely made up of the group of illnesses to which the general population is subjected—colds, bronchitis, pneumonia, rheumatism and sore throat. The report stated that about one half of the lost-time caused by these illnesses could be prevented by the application of the same methods as would be used to reduce waste in any other direction. The methods advocated were: periodic examination of employees, healthy conditions of work, and treating illness in its early stages. In this respect it is stated that the number of employers in Ontario who recognize the importance of making medical services for the prevention of sickness readily available to their employees continues to increase.

Dealing with occupational diseases, the report outlines the work of the Department in this direction, summarizing its efforts in connection with some of these diseases, as follows:—

Lead.—In regard to lead poisoning the work among storage battery plants in Ontario is encouraging. The storage battery industry, which in Great Britain leads all other industries in the number of cases of lead poisoning produced, shows considerable progress in the control of this hazard in Ontario. All the larger manufacturing plants in Ontario have voluntarily made provision for periodic physical examination of workers exposed to lead, and for frequent visits to the plant by company physicians, who are using accepted methods for the early detection of lead poisoning. Some cases of lead poisoning still occur in these plants. There have been a few which developed rapidly following some inter-current illness, for example, influenza, indicating that lead had been absorbed and that it only required a change in metabolism brought about by the inter-current infection to throw lead into the circulation and produce symptoms. This shows that the conditions of work are not such as entirely to prevent men from receiving lead into the system.

Touching on another phase of lead poisoning, the report states:—

> Ethyl gasoline, advertised as an anti-knock compound for gasoline motors, was placed on the market in Ontario on September 18, 1926. This gasoline contains tetra-ethyl lead roughly in the proportion of one part of tetra-ethyl lead to 1,300 parts of gasoline. Lead in this form is absorbed through the skin. When received into the body in this manner, or by inhalation or ingestion it produces serious poisoning. The hazard exists in its manufacture, in mixing, and in distribution. It is mixed and distributed in Ontario. The mixing operations are carried under enclosed conditions with strict medical supervision of the workers employed in this operation. In its distribution two groups of workers are exposed to the lead hazard: (1) Workers at gasoline filling stations; (2) garage workers employed in repairing motors in which ethyl gasoline has been used. Workers at these points of hazard are being observed with a view to determining whether the conditions of work are safe.

Silicosis.—During the past two years the Division of Industrial Hygiene, working with the Tuberculosis Division of the Department, conducted a survey of the mines and quarries in Ontario to determine the extent to which silicosis has occurred in these industries. During 1926, 1040 miners in the different mining camps in Northern Ontario were given a physical examination with X-ray. The amount of silica in the rock varies in the different camps, and, as was to be expected, the number of cases of silicosis developing in the different camps varies also. In April, 1926, the Workmen's Compensation Act of Ontario was amended defining silicosis along the lines of the Act relating to Miners' Phthisis in South Africa. Since that time the Division has received from the Workmen's Compensation Board reports of ninety-seven cases of silicosis in its different stages which have been compensated. Considerable attention has been paid to this condition. It is pointed out that the most desirable method for control lies in the collection of this fine silica dust,

which is formed during mining operations, before it permeates the air which the men breathe. Up to this date this has been found to be impracticable. Free use of water in the drills, at the points of blasting and on the rock surfaces, together with good general ventilation, has done much to reduce the hazard, but has not succeeded in eliminating it. (An account of this disease was given in the LABOUR GAZETTE, June, 1926, page 574.)

Caisson Disease.—The report indicates that the amount of work carried on in the province under compressed air is increasing, necessitating investigation of conditions under which this work is being done. This investigation showed that the work is hazardous and requires strict supervision. Of prime importance in this connection is the length of hours in relation to the pressures in use and the strict adherence to what has been determined as the safe length of time to be occupied in coming from under the different pressures to the atmosphere. These essential features for the prevention of the condition, along with many others, have been included in a code of regulations which was drafted and incorporated in legislation and placed with the Department of Labour for enforcement. (LABOUR GAZETTE, November 1926, page 1079.) Caisson disease has also been added in Schedule 3 of the Workmen's Compensation Act to the list of diseases for which compensation is paid. The Division has received reports of fifty cases and three deaths from caisson disease which have been compensated under this arrangement. Under the new conditions, states the report, there have been very few cases and these of a mild nature.

Nickel Rash.—The report of the investigation of nickel rash has been published. As the preventive measures in small electroplating rooms depend mainly on improved ventilation, this improvement is withheld pending the results of other investigations in ventilation which are being conducted by the Division.

Infected Injuries From Cutting Oils, etc.—At the request of a large plant working iron and steel, Dr. D. T. Fraser, assistant director of the Connaught Laboratory, undertook on behalf of the Division to determine the antiseptic properties of a well-known disinfectant to be used with cutting compound and cutting oils. It was determined that this disinfectant was effective in concentrations which were practicable for cutting compound and slightly less satisfactory for cutting oils. The plant reports that for the six months ending December 31, 1926, "in no case have we had an infected injury to anyone who has been using a cutting oil or compound mixed with the disinfectant."

Fumigation.—Under this heading, the report observed that six visits had been made to Northern Ontario to different large operating companies to instruct picked men in the use of cyanogen chloride for the fumigation of bunkhouses. The method was said to be very effective but dangerous, and all precautions have been taken to ensure that the work will be done in a safe manner.

Labour's Interest in Health Promotion

Mr. Bert Mason, of the Toronto Railway Employees' Union, in the course of an address delivered recently at a "Health and Hygiene" exhibition at Toronto, spoke of the vital interest of labour in health problems. "Most of our trades unions to-day have sick benefit departments," he said, "and the illness of our members is costing us huge sums of money. In addition to that our members and all other workers are confronted with a loss of time. Statistics show that over 20,000,000 working days per year are lost through sickness in Canada. If we say that half the workers in Canada lose time when they are sick—and I think half is a very fair number—and we take $5 as a day's pay, we get $50,000,000—that means $50,000,000 less in our pay envelopes. That is an enormous sum of money. Not only does the loss of money affect us, but the anxiety in the home, apart entirely from feeling for the sick person, is a matter of concern to us, especially in the case of prolonged sickness, as the smaller pay envelope means that often the real necessities of life have to be given up, not only during the sickness, but afterwards, so as to pay for it, and that kept up may mean a sick wife or under-nourished children. With these things and others before us, we have been striving, then, to study cause.

"Most prominent among these causes, we find, are unsanitary homes and workshops; the inhaling of poisonous gases and dust, etc.; long hours of work under such conditions; low wages, which prevent the buying of the necessities of life; child labor, and especially the employment of the young girls, whom we are looking forward to as the mothers of tomorrow, for too long a period each day. In this connection, you may be interested to know that under our Ontario law of to-day, it is permissible to work women and girls 60 hours per week, with a maximum of 72 hours under permit, and many are doing it. Another cause is the making up of the things we wear

and use, in homes, that are often far from sanitary. Unemployment, too, plays a very definite part in sickness. If the wage earner is not earning, then the family is not buying, and among the things they are not buying is proper food and clothes or simple cures for ailments which are allowed to get worse. Having found out these causes, we have naturally sought and supported laws that will eliminate them. As a concrete example of what has been done by one of our trades unions, the Typographical Union, by the shortening of hours and bettering the working conditions by more sanitary workshops, etc., have added 15 years to the life of the average printer. Many other organizations have made similar progress."

Main Causes of Coal Mining Accidents

The *Canadian Mining Journal* for October 7, in an article on the "Prevention of Coal Mining Accidents," points out that "safety" is one of the three major problems of coal mining, the others being the winning of the coal, and its utilization. "At least half of the mining accidents arise from two principal causes,—falls and haulage work. There is very little improvement in the number of haulage accidents and those caused by falls. Each year the proportion of accidents to men employed is about the same. In Nova Scotia the percentage from these two causes runs about forty-five. In most other mining countries the rate is higher, if non-fatal accidents are considered. For this reason the cause of these two classes of accidents have been earnestly studied and investigated. In addition to the normal settlement taking place the mine advances it has been suggested by the British research committees that seismic disturbances cause roof falls. There may be some truth in this statement, but it is a remarkable thing that accidents by falls and on haulage ways vary little from year to year.

"If we get it firmly fixed in our minds that the settlement of the upper measures is sure to follow the sapping of their foundations, more care might be taken and roof supports would be more promptly placed to give the needed protection. Waiting for a more convenient moment has been the cause of many deaths physically and morally. The want of experience does not contribute to accidents by falls for the older miner is often caught. Even when the greatest care has been taken and the best judgment used, accidents have occurred. But there is yet a strong belief that many more could be avoided and so the preventive work goes on.

"The young men of the mines suffer most from haulage accidents. By reason of their youth they are best fitted to perform this work which requires an active body and an alert mind. A glance at the haulage statistics shows that about 25 per cent of all mine accidents occur in this class of labour. Some one has pointed out that the very activity of youth has swelled the accident rate. Be this as it may, it is the aim of the 'safety first' movement to educate all men to feel that they are responsible for themselves and their brothers and to see that all workmen have that direct training which enables them to do their daily work with greater personal safety.

"The Government of Nova Scotia set itself the task of making the mines safer and reducing accident; the coal companies laid their plans and are faithfully carrying them out. It remains to be seen at the end of the year how far success has crowned their efforts, and whether all their lines of action have been practical."

Water Danger in Mines

A departmental committee of the Mines Department of Great Britain was appointed in 1924 to inquire into the prevention of dangers arising in mines from accumulations of water. In its report, recently presented, the committee makes a large number of recommendations with regard to the keeping, and the accessibility, of plans of workings, the maintenance of adequate barriers, the methods of approach to accumulations of water or old workings, and the building of dams. Abandoned and waterlogged workings are chiefly a danger when their location is not known. To meet this danger the Mines Department has nearly ready a new catalogue of plans of disused mines, but the committee warn miners that too much reliance must not be placed on the completeness of the list. The committee suggest what they describe as a first step. That is the compulsory notification to the divisional inspector of mines of the approach of any working within a hundred yards of the lessee's boundary. Encroachment either on other mines or on agreed barriers is obviously a grave matter, and the committee recommends that to conceal an encroachment should be made an offence under the Coal Mines Act.

University Safety Course

A course in accident prevention was begun in New York University at the commencement of the present session on October 4, and

will be continued as a permanent feature of the university teaching. The course is open to all men and women who have any connection or direct interest in accident prevention. This includes active or prospective insurance safety inspectors, government officials and employees, industrial safety inspectors and committeemen, and students at the university. There are no academic entrance requirements.

The subjects included in the course on industrial safety are as follows:—

Present conditions in industry; what has been accomplished in accident prevention; the fundamental principles of industrial safety.

What the chief executives of a plant can do to promote safety.

Making the plant physically safe; mechanical guarding, good housekeeping; proper lighting.

The foreman as the keyman; his interest and leadership indispensable.

What a foreman must do to make his department safe.

Workmen's safety committees.

Qualifications and duties of the safety engineer.

Meetings of workmen; general and departmental.

Visualizing safety through the use of the bulletin board.

The printed word in accident prevention; plant publications; the local press; direct-mail educational propaganda.

First aid.

The use of accident statistics in promoting safety.

Accident prevention as a factor in improving employee relations.

Field work, including visits to the American Museum of Safety, and to industrial plants where effective safety work is being done.

Effect of Safety Movement in Iowa

The last biennial report of the Bureau of Labour of the State of Iowa notes a decrease in the number of industrial accidents, which is attributed to successful safety propaganda:

"That the number of accidents in industrial establishments of Iowa has been reduced is creditable, and is contrary to the experience of most states. For some time following the war our Iowa experience was similar to that of other states. The cause for the rather large increase was incident to disruption of forces during and incident to the war which necessitated many changes in employment personnel, in fact in many cases wholly new personnel. Because of inexperience of these new employees and the time required to build up a new factory morale and supervision, accidents were bound to increase.

"During the last two years a decided progress has been made with safety committees, and general safety programs resulting in eliminating many of the former hazards, also in bringing employees to realize that it is the worker who suffers, and suffers to a degree for which the benefits of Workers' Compensation Laws do not at all compensate. The employer from his own, and the experience of other progressive and up-to-date concerns, is now appreciative of the cost of accidents exclusive of the actual monetary amounts paid either directly or through accident insurance."

At the 16th annual Congress of the National Safety Council, held at New York in October, Mr. A. P. Costigane, of the Ontario Pulp and Paper Makers' Association, was elected vice-president of the organization and general leader and adviser on safety work for the pulp and paper industry in Canada.

According to reports appearing in the press in October, miners who were refused employment in Northern Ontario by company doctors on the ground that they were suffering from industrial disease, were crossing the border into Quebec to work in the Rouyn area mines. It was stated further that at the next session of the Quebec Legislature, legislation will be sought to control the situation. The disease in question is silicosis, a fibroid condition of the lungs induced by the inhalation of silica dust said to lead in many cases to tuberculosis. At the 1926 session of the Ontario legislature a special amendment to the Ontario Workmen's Compensation Act was adopted to include this malady among the industrial diseases under the Act.

The Technical Education Branch of the Department of Labour has recently issued bulletin No. 25 of the Vocational Education series. The bulletin is entitled "Automobile Mechanics, Gas and Steam Engineering." It described the courses of study given in various schools throughout the Dominion, and also gives a trade analysis of motor mechanics. A list of suitable equipment and textbooks for use in vocational schools is appended to the bulletin.

LEAD PAINT REGULATIONS IN GREAT BRITAIN

THE following Regulations, dated September 6, 1927, have been made by the Secretary of State (Great Britain) under the Lead Paint (Protection against Poisoning) Act, 1926, and came into force on October 1. They are designed to prevent danger from lead paint, that is, painting material containing at least five per cent of soluble lead compound, to persons employed in the painting of buildings. It is provided that the Regulations 4, 5, 7, 9, 11 and 12 are not applicable to persons working 26 normal working days in a calendar year, or less, and whose ordinary work does not include the painting of buildings. The controversy as to the clause of this Act prohibiting the employment of women in the painting of buildings with white lead paint, was noted in the LABOUR GAZETTE, September, 1927 (page 926) and in a previous issue.

REGULATIONS

PART I.—*Duties of Employers.*

1. (*a*) Lead paint shall not be used or procured for use for the painting of buildings except in the form of paste or of paint ready for use. Provided that red lead may be procured for use and used in the raw or dry state to such extent as may be necessary for preparing stopping or filling material and for no other purpose.

(*b*) Lead paint for use in the painting of buildings shall not be procured or stored, whether at the employer's premises or at any place where painting is being done, otherwise than in receptacles legibly marked as containing lead.

2. Lead paint shall not be applied in the form of spray in the interior painting of buildings.

3. (*a*) No painted surface other than that of iron or steel work shall be rubbed down or scraped by a dry process.

(*b*) No painted surface of iron or steel work shall be rubbed down or scraped by a dry sandpapering process.

(*c*) All débris produced by rubbing down or scraping of any painted surface shall be removed before it becomes dry.

(*d*) No contravention of the foregoing provisions shall be deemed to have taken place in respect of any painted surface, if the employer proves that such painted surface contained no lead paint.

4. There shall be provided for the use of persons employed in or in connection with the painting of buildings and liable to come into contact with lead paint a sufficient supply of water, soap, nail brushes and towels and at least one bucket or basin for every five persons so employed.

5. Suitable arrangements shall be made to prevent clothing taken off during working hours by persons employed in or in connection with the painting of buildings, being soiled by lead paint. Where practicable the accommodation so provided shall be outside any apartment in which painting is being carried on.

6. Where the Chief Inspector of Factories is satisfied that the incidence of lead poisoning among the persons employed by any employer in or in connection with the painting of buildings with lead paint is excessive, he shall give notice thereof in writing to such employer, and such employer shall forthwith make arrangements for the periodic medical examination of all persons so employed by him and for the suspension from employment in or in connection with painting with lead paint of such persons whose health is or appears likely to be injuriously affected thereby, in accordance with such conditions as the Chief Inspector of Factories may prescribe.

7. (*a*) The employer shall give to each person employed by him in or in connection with the painting of buildings when he is engaged, and subsequently if still employed as aforesaid, on the first pay day in each calendar year, a copy of the prescribed leaflet containing special health instructions as to the use of paint.*

(*b*) A printed copy of these Regulations shall be posted in the workshop and paint store, and on all jobs on which more than 12 persons are employed in painting operations, in any apartment in which the paints are mixed.

8. Where any person, whose ordinary employment does not include the painting of buildings, is occasionally employed in or in connection with the painting of buildings, the employer shall keep a record of the periods with dates during which such person is so employed by him, and such record shall be open at all reasonable times to the inspection of H.M. Inspector of Factories.

For the purposes of these Regulations, the employment of such person as aforesaid for a period of less than half of a normal working day shall be deemed to be half-a-day and of less than a whole normal working day but more than half-a-day shall be deemed to be a whole day.

PART II.—*Duties of Persons Employed.*

9. Overalls shall be worn during the whole of the working period by every person employed in or in connection with the painting of buildings and liable to come into contact with lead paint, and shall be washed at least once a week. They shall not be worn at meal times.

10. Every person employed in rubbing down or scraping any painted surface shall carry on his work in accordance with the requirements of Regulation 3 hereof.

11. Every person employed in or in connection with the painting of buildings shall so deposit his clothing taken off during working hours as to prevent it being soiled by lead paint, and for this purpose shall as far as practicable make use of the accommodation provided in pursuance of Regulation 5 hereof.

12. Every person employed in or in connection with the painting of buildings and liable to come into contact with lead paint shall carefully clean and wash his hands before partaking of food or leaving the premises.

13. Every person employed in or in connection with the painting of buildings and liable to come into contact with lead paint shall present himself at the appointed time for medical examination when so required in accordance with Regulation 6.

* This leaflet is reprinted on page 1211.

Copy of Leaflet mentioned in Regulation 7 (b)

Painter's Colic: How Caused and how best Prevented

Lead poisoning from breathing the dust given off in dry rubbing down is the main occupational risk among painters.

In the five years 1910-1914, 1,079 cases of lead poisoning among painters (by no means all that must have occurred) came to the knowledge of the Factory Department, including 169 deaths, and in addition to these there must have been a large number of painters suffering from the effects of lead in a less degree.

The symptoms in the painter are usually colic and constipation, and, less frequently "drop wrist" (loss of power to extend the fingers and wrists), although painters seem to suffer from this form of paralysis rather more than lead workers do in general presumably because of the special strain the work places on the forearms. After years of work the constitution becomes undermined from the slow action of lead on the blood vessels and kidneys (chronic Bright's disease).

Remember these symptoms in the painter follow only on breathing in dust. What happens is that the dust sticks on the moist surfaces inside the mouth and is either swallowed or passes into the air tubes. You breathe 16 times a minute, and in and out the dust goes, but always a little less out than in. So long as paint ready mixed with oil is used, and in a cleanly way, painting operations involving no dry sand papering ought to be harmless and not give rise to any poisoning. *You may be quite certain about this.*

Lead paint never enters the system directly through the pores of the skin, but it can, of course, collect on the hands and under the finger nails and be eaten by very careless painters. Incidentally, it may be said, evidence is lacking that breathing in dust from dry rubbing down zinc paints is hurtful.

A painter can help himself to keep fit. He should pay scrupulous attention to keeping his hands and teeth clean. Too much stress cannot be paid on the part played by bad teeth in lowering the health.

Never commence work on an empty stomach; foods containing fat, such as bacon and milk, are suitable.

Where there is a tendency to constipation, aperient medicine, such as Epsom salts (one to two teaspoonfuls in water) can be taken with advantage once or twice a week.

Overall suits should never be shaken to rid them of dust, as this causes more dust in the air you breathe; they require washing at least once a week.

Medical advice should at once be sought if signs of lead poisoning present themselves. Wrist drop will always incapacitate a man for months, and may prove *permanent* unless electrical treatment is obtained *in time.*

Though lead poisoning is the most serious risk to which painters are exposed, turpentine vapour also—as every painter knows—causes headache and giddiness and (when working in confined spaces) sometimes sickness and pains which may occasionally be confused with lead colic. These symptoms nearly always quickly disappear on going into the fresh air, and do not occur when the ventilation is good. Fresh air and good ventilation, therefore, constitute the antidote of fumes of turpentine, Turpentine has action on the kidneys, but chronic Bright's disease from it is not proven.

Standard System of Accident Reporting

The Statistics Committee of the National Safety Council (United States) has published, under the title "Accident Facts, 1927," a report on the accident situation during the past year. Industrial accidents are not considered in detail in the statistics, being fully covered by other special reports. However, information as to general accidents— their causes, distribution, incidence, etc.— will be read with interest, as supplementing existing material on accidents in industry.

The functions of the National Safety Council, on the statistical side, are two-fold—(1) to devise and present adequate and accurate methods of obtaining accident reports, and to encourage the use thereof by cities, states and other jurisdictions that are in a position to carry on this type of work; (2) to serve as a clearing house for the information thus obtained and for other information about accidents that may have been collected according to some other system than that suggested by the Council.

The Standard Accident Reporting System was developed in 1925 by the Statistics Committee of the National Safety Council as an approach to uniformity in the field of public accident reporting. This committee included state and city officials as well as statisticians and safety engineers. The system was put in operation in 1925.

Approximately 90,000 people were killed in accidents in the United States during the year 1926, according to the estimate of the Statistics Committee. The report states that the death rate per 100,000 from railroad accidents, including collisions with automobiles, decreased from 13.0 in 1911 to 6.6 in 1925; the death rate from street car accidents similarly dropped from 3.2 to 1.6; the death rate from automobile accidents (excluding collision with railroad and street cars) increased from 2.2 in 1911 to 17.0 in 1925. The causes of deaths which have shown an increased rate since 1911 are few, and the exceptionally large increase in the automobile deaths rate has prevented a more substantial decline in the total death rate.

LEAGUE OF NATIONS INTERNATIONAL LABOUR ORGANIZATION

Thirty-Seventh Session of the Governing Body

THE Governing Body of the International Labour Office held its 37th session at Berlin from October 11 to 14 at the invitation of the German Government. The plenary sittings were held in the premises of the Federal Ministry of Labour and were attended by the Federal Minister of Labour, the Under Secretary in the Ministry and a number of high officials of that department. The session was marked by demonstrations of the sympathy with which German authorities, employers and workers follow the work of the Organization and share in its achievements.

As a tangible proof of his Government's devotion to the policy of national and international social reform, the German Minister of Labour handed over to the Governing Body the instrument of ratification by Germany of the Washington Convention concerning the employment of women before and after childbirth. At the same time he announced that the Government had recently introduced a Bill for the ratification of the Conventions concerning sickness insurance for industrial and agricultural workers. Finally, he described a number of other measures calculated to bring about the application of other Conference decisions by the amendment of existing legislation.

Representatives of large federations of employers' associations and trade unions also expressed their eagerness to participate in the work of national and international social reform.

The date of the opening of the Eleventh Session of the International Labour Conference was fixed as May 30, 1928, the following items being definitely placed on the agenda:

(1) Methods of fixing minimum wages (second discussion).

(2) Prevention of industrial accidents, including coupling accidents on railways (first discussion).

The Governing Body also gave consideration to the agenda of the 1929 session of the Conference. This session will have to discuss, at the second stage, the question of prevention of industrial accidents, which, as mentioned above, is to undergo first discussion at the 1928 Conference. Four new questions were laid before the Governing Body—those of forced labour, unemployment insurance, hours of work of salaried employees, and the determination of the contract of service of salaried employees. It was decided by 14 votes to 7 to place on the agenda the question of forced labour, but as regards the other three questions, the Governing Body suspended final decision until next January's session, when it will definitely fix the agenda for 1929, after consideration of reports to be prepared by the office on the present situation with regard to each of these three questions.

The Governing Body rejected by 12 votes to 6 a proposal to instruct the International Labour Office to prepare also with a view to the 1929 conference, a report on old age and invalidity insurance, embodying information as to legislation in force and the methods of the enforcement, on the lines of the reports which, in accordance with the rules of procedure, have to be presented to the governing body on questions proposed to be placed on the agenda of a session of the Conference. Later, however, it was decided that the question of old age and invalidity insurance should be the subject of a report with a view to the possibility of its inclusion in the agenda of the 1930 Conference, also that a report on the question of hours of work of salaried employees should be submitted to the Governing Body at its session next January.

On the proposal of Dr. Sitzler, representative of the German Government, supported by Mr. Wolfe, representative of the British Empire, Mr. Arthur Fontaine, French Government representative, was unanimously re-elected chairman. Mr. Jules Carlier (Belgium) and Mr. Jan Oudegeest (Netherlands) were unanimously re-elected vice-chairmen, the former representing the employers' and the latter representing the workers' group.

Advisory Committee on Intellectual Workers

In accordance with a decision taken by the Governing Body of the International Labour Office at its session of last April, the nucleus of an Advisory Committee on Intellectual Workers which is to be established has been formed. It consists of three members of the Governing Body and of two members nominated by the International Committee of the League of Nations on Intellectual Co-operation, with the approval of the Council of the League. These five members are to be asked to meet shortly in order to draw up proposals for the composition and functions of the Committee, which will be submitted later to the Governing Body. It is hoped that the Committee may be finally constituted and

enter upon its task early in the coming year.

Full effect will thus presently be given to a desire which found expression in the International Labour Conference as long ago as 1921, when attention was called to "the duty of the Organization to assist those who derive their means of existence from imaginative or intellectual work to obtain better conditions of life." It may be remembered that, following the discussion which arose at that Session, the International Labour Office was authorized to assist in the work of the Committee of the League on the International Co-operation of Intellectual Workers, and that at the instance of that Committee the Office undertook the study of the living and working conditions of musicians. It has also carried out research work in connection with the position of engineers and technicians in industry, chemists and journalists—work which has earned the warm commendation of the International Federation of Intellectual Workers and other organizations concerned.

The Ratification of Draft Conventions

The total number of ratifications of Draft Conventions registered with the Secretary-General of the League of Nations on August 31 was 230. At the same date, the number of Draft Conventions of which ratification had been authorized by the competent authority in the country concerned, but had not yet been registered with the Secretary-General of the League, was 36.

The most important information with regard to ratification that came to the attention of the International Labour Office during the month of August relates to legislation in the Netherlands. Three Acts, dated June 30, 1927, approved the ratification of the Draft Conventions concerning workmen's compensation for accidents, equality of treatment for national and foreign workers as regards workmen's compensation for accidents, and the simplification of the inspection of emigrants on board ship. Another Act promulgated on July 2, 1927, reserved to the Crown the right to ratify the Draft Convention concerning workmen's compensation for occupational diseases.

Belgium and the International Labour Conference

The Secretary-General of the League of Nations has recently registered the ratification by Belgium of five Conventions adopted by the International Labour Conference, namely: (1) Concerning workmen's compensation for accidents; (2) Concerning workmen's compensation for occupational diseases; (3) Concerning equality of treatment for national and foreign workers as regards workmen's compensation for accidents; (4) Concerning seamen's articles of agreement; and (5) Concerning the repatriation of seamen.

Belgium has now to her credit more ratifications than any other country, for, in addition to adhering to the Berne Convention concerning the use of white phosphorus in the manufacture of matches, she has ratified in all seventeen of the twenty-five Conventions adopted by the International Labour Conference, 1919-1927, including the Hours Convention. Further, she has the distinction of being the first State to ratify the two Draft Conventions adopted by the Maritime Session of the Conference last year. It will be interesting to note which of the Member States will be the second to ratify these Draft Conventions and thus, in accordance with the standard clause in the Conventions, bring them into force.

The International Labour Organization and Economic Problems

The September number of the *International Labour Review*, published by the International Labour Office, contains an analysis of the resolutions adopted by the International Economic Conference from the point of view of the International Labour Organization.

The world of labour has long realized the close interdependence of economic and social problems. At the Washington Conference in 1919 the workers' group raised the question of the international distribution of raw materials; in 1920 the Governing Body of the Office decided to undertake an international enquiry into production; in 1921 and 1922 the International Labour Conference discussed unemployment and the work of the Genoa Economic Conference; more recently, it will be remembered, the International Labour Office took a direct and active part in the work of the Preparatory Committee of the Conference. These few instances show the sustained interest which the organization takes in important economic problems, the solution of which may undoubtedly contribute to that of social problems. This interconnection was emphasized by speakers representing all groups at the last session of the International Labour Conference, which immediately followed the International Economic Conference. There was general agreement on the one hand that there could be no solid economic reconstruction except on a basis of social justice, and on the other hand that

there could be no solid social reconstruction except on the basis of economic justice.

The close relation between the two groups of problems is brought out by the analysis of the work of the recent Economic Conference. The resolutions which it adopted lay the foundation of the co-operation of the International Labour Office in the international economic activities initiated by the Conference.

The International Labour Office as a World Centre of Information

The scientific work of the International Labour Office is now universally known and esteemed. At each conference delegates of the countries represented are unanimous in proclaiming its value, and the states which are not members of the organization also recognize the soundness, the objectivity, and the interest of the information in the possession of the office. The importance of the International Labour Office as a centre of information is increasing from year to year.

During 1926 the requests for information received from governments numbered 136 and dealt with conditions of labour, including hours of work; questions of health and industrial safety; and social insurance. From employers' organizations 42 requests were received, concerning wages; scientific management, and conditions of labour, while 125 requests emanated from workers' organizations with regard to general labour conditions; social insurance, labour legislation, trade union question, industrial hygiene, weekly rest and holidays with pay.

Report on Use of White Lead in Painting

A report has been issued by the International Labour Office on the subject of white lead, comprising data collected in regard to its use in the painting industry. It embodies the substance of and the report drawn up by the International Labour Office when the Draft Convention on white lead was discussed, and subsequently adopted by the Third Session of the International Labour Conference held at Geneva in 1921. The original report has been corrected, revised and considerably expanded in the light of medical and scientific data collected by the International Labour Office since that date. It is pointed out that the present time is opportune for the publication of an impartial survey of the facts, devoid of any controversial matter, for although the question is still the subject of lively discussion in some countries, the success of the Draft Convention clearly shows that agreement is gradually being reached on a question which was the source of so much controversy. At the beginning of 1927 the White Lead Convention had been ratified by 13 countries: Austria, Belgium, Bulgaria, Chile, Czechoslovakia, Esthonia, France, Greece, Latvia, Poland, Rumania, Spain and Sweden. Ratification had been authorized in three countries —Hungary, Italy and the Netherlands—and recommended in five—Argentina, Cuba, Denmark, Germany and Uruguay.

In such circumstances an impartial survey of the facts cannot but be useful in countries which have already ratified, or are inclined to ratify the Convention, while in other countries it may assist toward the creation of an informed and definite body of opinion. The report first deals with the nature of white lead and the question of the danger which its use may involve. This is discussed on the basis of the medical and statistical data assembled by the Office, with a view to ascertaining whether the use of white lead is or is not a source of danger. Next, the technical aspect of the problem is considered in the light of information secured by committees of enquiry, reports of associations and experts who have taken up the problem of white lead, the object of this discussion being to discover if it is true that other materials can be substituted for white lead, or if, on the contrary, as is sometimes asserted, neither zinc white nor any other substitute can fully take its place, technically and economically. Reference is made in this part of the report to the results of practical experience in the painting of coaches and carriages, ships, bridges, etc.

The third subject discussed is the efficacy of restrictive regulation in the painting trades. Regulations of this kind have been in force for a long time in some countries, and they are sometimes thought and said to be preferable to complete prohibition of the use of white lead. The object of this section is to ascertain whether more or less severe regulation can take the place of total prohibition.

The last section of the report is devoted to certain special points which were laid before the Governments by the questionnaire of the International Labour Office in 1921. It includes the replies given by the Medical Sub-Committee of the White Lead Committee of the Conference to the questions put to it, while in the Appendices is given a full report of the discussion which took place in plenary session at the International Labour Conference in 1921.

Measures in Favour of Armenian and Russian Refugees

The report of the Fifth Committee to the Assembly of the League of Nations points out that the problems of Russian and Armenian refugees have occupied the attention of successive Assemblies of the League of Nations for some years. They have been dealt with jointly by Dr. Nansen, the High Commissioner for Refugees, and by the International Labour Office with great vigor, and both are congratulated on the very useful results which have attended their efforts. In the original stages, a serious problem was presented by the influx of large numbers of disorganized and destitute refugees into countries where the machinery of government was in process either of reconstruction or of creation. This aspect of the problem has now entirely passed away, and the greatest praise is due to the energy and self-sacrifice of the Refugee Service, whose patient and unremitting work over a long period has, with the help of the League and of the Governments concerned, reduced the whole question to one of comparatively small dimensions.

The problems were attacked as follows:—

1. The anomalous status of the refugees was dealt with by the issue of identity certificates, to overcome passport difficulties, etc. These certificates have proved, as can be well imagined, of the utmost use to the refugees, who have gratefully recognized their value.
2. The destitution and unemployment were dealt with by the transfer of the refugees to countries, largely in Europe but also overseas, where opportunities for employment presented themselves. In this manner, approximately 200,000 were placed in a position to support themselves.
3. Land settlement schemes were drawn up to deal with a proportion of the remaining refugees.

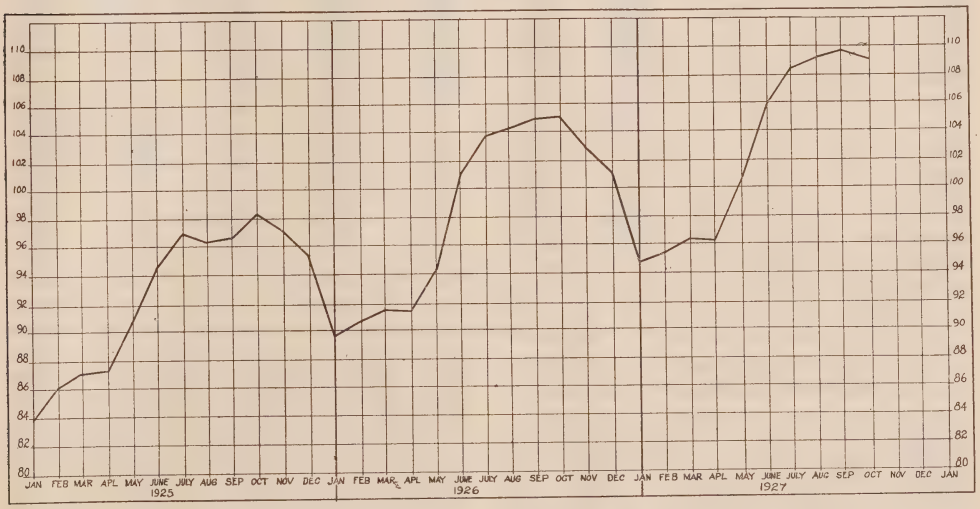
Last year, in its survey, the Fifth Committee reported to the Assembly that the statistics supplied by the International Labour Office indicated the existence of not less than 1,000,000 Armenian and Russian refugees in 26 different countries. As the records for some countries had not been received, the Committee considered the total might be safely estimated at 1,500,000. Of these, it is estimated that 250,000 were unemployed. There are therefore 1,250,000 placed and the problem now before the Committee is that of the last 20 per cent.

Company of Master Mariners

The first annual meeting of the Company of Master Mariners was held at London recently. The Company includes among its members commanders and officers of the most famous ships, marine superintendents, managers, and high officials in practically all British leading shipping companies, and harbour authorities, master mariners nolding administrative positions in every branch of the maritime life of the nation and the Empire. Elder Brethren of Trinity House, shipowners, business men, Government officials and Members of Parliament—all of them master mariners who mostly spent their boyhood in the old school of the sailing ship. The only service or professional qualification required for membership is that the candidate should be British, and should have held for not less than five years a Board of Trade certificate as a master mariner. The company is designed to provide for master mariners a body that will take its place with dignity among the other services, professions, and crafts of the country. There are many cases which the pension systems of the great shipping companies cannot reach, and the company will have the chance to administer relief to wives and dependents of master mariners who are in need. Under the heading of professional advancement they have set up a committee to study the matter of the education of boys who are to become officers in the merchant service. The company has been asked by the Board of Trade to appoint a representative on a committee which was being set up to examine the question of examination of masters and mates for certificates of competency.

EMPLOYMENT SITUATION AT THE BEGINNING OF OCTOBER, 1927, AS REPORTED BY THE EMPLOYERS MAKING RETURNS TO THE DOMINION BUREAU OF STATISTICS

FOR the first time since the beginning of April, industrial activity showed a slight slowing up on October 1, according to statements received by the Dominion Bureau of Statistics from 6,241 employers, whose staffs aggregated 904,880 persons, as compared with 909,229 in the preceding month. Although employment on the same date last year had shown a small advance, the situation then, as at the beginning of October of earlier years of the record, was not so favourable as on the date under review, when the index stood at 109.0, compared with 109.7 on September 1, and 105.2, 98.3, 93.9, 99.5, 94.6 and 90.2, respectively, on October 1, 1926, 1925, 1924, 1923, 1922 and 1921.



Employment by Provinces

Ontario firms afforded greater employment, while elsewhere there were contractions, of which the most marked were in the Maritime and Prairie Provinces.

Maritime Provinces.—Further and larger losses were indicated in the Maritime Provinces, where 529 employers reduced their payrolls from 74,290 persons on September 1 to 71,640 at the beginning of October. This curtailment involved rather more workers than that recorded on the corresponding date last year, but the index then was slightly lower. Construction and transportation reported the bulk of the loss, although the tendency was also unfavourable in manufacturing, logging and services.

EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

NOTE.—The curve is based on the number of employees at work on the first day of the month, as indicated by the firms reporting, in comparison with the number of employees they reported in January, 1920, as 100.

Quebec.—There was a small decrease in employment in Quebec, repeating the downward movement noted on October 1, 1926, when employment was not so brisk. Statistics were compiled from 1,395 firms employing 259,350 workers, compared with 259,928 at the beginning of September. Manufacturing and highway construction registered the bulk of the decline, while logging, mining,

The most pronounced curtailment was in construction, in which it was seasonal in character; activity in this group, however, continued much greater than in the autumn of any other year since the record was commenced in 1920. Manufactures showed reductions, chiefly in lumber mills where the season's cut was approaching completion, while the personnel of summer hotels was also reduced. On the other hand, logging, mining, transportation and trade registered improvement.

NOTE.—Number employed by the reporting firms in January, 1920=100 in every case. The "Relative Weight" shows the proportion of employees in the indicated area to the total number of employees reported in Canada on the date under review.

transportation, building and railway construction and trade afforded more employment.

Ontario.—Continued improvement in the situation was indicated in Ontario, according to 2,860 employers of 372,805 persons, or 2,188 more than in the preceding month. Additions to staffs had also been noted on October 1 a year ago, but employment then was in smaller volume. Manufacturing, particularly of food products, logging and trade showed considerable advances, but there were marked losses in construction and smaller decreases in transportation.

Prairie Provinces.—In contrast with the gains reported on the corresponding date in 1926, there was a falling off in employment in the Prairie Provinces at the beginning of October, chiefly in construction, but also in manufacturing and services. On the other hand, mining, transportation and trade were more active. Returns were received from 789 firms with an aggregate working force of 120,091 employees, compared with 122,617 on September 1. The index was higher than on October 1 last year.

British Columbia.—Employment in British Columbia showed further moderate curtailment, mainly in construction, services and fish-canning, while logging and shipping reported heightened activity. Data were tabulated from 668 employers whose payrolls declined from 81,777 persons on September 1 to 80,994 at the beginning of October. Losses on a large scale were registered on the same date in 1926, when the index was slightly lower.

Table I gives index numbers by economic areas.

Relative weight of employment by Cities as at Oct. 1, 1927	13·6	1·3	11·9	1·3	3·3	1·0	3·3	2·9

Employment by Cities

The trend of employment was upward in Montreal, Quebec, Toronto, Ottawa, Hamilton and Vancouver, but downward in Windsor and the other Border Cities and Winnipeg.

Montreal.—Continued improvement in the situation was indicated in Montreal, where the 741 co-operating firms employed 123,024 persons, or 1,245 more than on September 1. Transportation, building and trade reported the bulk of the gain, while little general change was noted in manufactures. Employment had declined on the corresponding date last year, when the index was lower.

Quebec.—Employment in Quebec showed its eighth consecutive increase at the beginning of October, 276 workers being added to the forces of the 100 employers whose returns were compiled, and who had 11,444 on their paylists on the date under review. Practically all the advance took place in construction. The index was much higher than at the beginning of October, 1926.

Toronto.—Further expansion was indicated in Toronto, according to 810 firms employing 107,717 persons, compared with 106,793 in their last report. Manufacturing, particularly of textile products, was much busier, as were trade, services and communications. Construction, on the other hand, was slacker. Additions to staffs on a smaller scale were reported on October 1 a year ago, and the situation then was not so favourable.

Ottawa.—Manufacturing and trade were rather more active, while in transportation and construction there were small declines. The forces of the 135 employers furnishing data aggregated 11,817 workers, or 64 more than on September 1. Employment was better than on the corresponding date in 1926, when small gains were also noted.

Hamilton.—Improvement was registered in construction and trade, other industries showing little general change. Statements were tabulated from 202 firms with 29,743 employees, compared with 29,640 in the preceding month. The index number at the beginning of October last year was slightly higher, although the trend of employment was then downward.

TABLE III.—INDEX NUMBERS OF EMPLOYMENT IN CANADA BY INDUSTRIES (JAN. 1920 = 100)

Industries	[1]Relative Weight	Oct. 1 1927	Sept. 1 1927	Oct. 1 1926	Oct. 1 1925	Oct. 1 1924	Oct. 1 1923

All Industries	100·0	109·0	109·7	105·2	98·3	93·0	99·5

[1]NOTE.—The "relative weight" column shows the proportion that the number of employees in the indicated industry is of the total number of employees reported in all industries by firms making returns on the date under review.

Windsor and the other Border Cities.—There was a falling off in the number employed in the Border Cities, mainly in automobile plants (in which considerable short time was also reported), and in transportation and construction. Ninety-four establishments recorded 9,089 employees, as against 9,348 on September 1. Employment on October 1, 1926, was in greater volume, despite the fact that the losses then registered were on a larger scale.

Winnipeg.—Employment in Winnipeg declined on October 1, when 204 workers were released from the forces of the 284 co-operating firms, reducing them to 29,589. Trade was decidedly more active, but there were reductions in building, communications and manufactures. Although additions to staffs had been indicated at the beginning of October a year ago, the index then was lower than on the date under review.

Vancouver.—Very little change in the situation was recorded in Vancouver, according to 231 employers with 25,834 persons on payroll, compared with 25,782 on September 1. Shipping was busier, and small gains were noted in manufactures as a whole, but services and some other industries reported reductions. Large losses were recorded on October 1, 1926, when the index stood at 119.7, as compared with 119.0 at the beginning of October this year.

Index numbers by cities are given in Table II.

Manufacturing

There was a further small reduction in manufacturing plants, 3,895 of which reported 487,296 operatives, compared with 488,763 in the preceding month. Similar declines were noted on October 1, 1926, when the index number was slightly lower. Seasonal losses in fish-preserving and sawmilling factories caused most of the decrease, though there was also a falling off in activity in rubber, building material and iron and steel works; in the last named group there was also considerable short time. On the other hand, vegetable food factories showed important seasonal improvement, exceeding that registered on October 1 in most years of the record, and there were also large gains in textile and electrical apparatus plants.

Animal Products—Edible.—There were continued losses in fish-preserving establishments and in dairies, while meat packing plants afforded rather more employment. Statistics were received from 202 manufacturers, employing 17,921 persons, as compared with 18,498 in the preceding month. This contraction, which took place chiefly in British Columbia, was on a smaller scale than that registered on the corresponding date last year, when the index number was over seven points lower.

Leather and Products.—Tanneries and miscellaneous leather good factories reported heightened activity, but boot and shoe plants were slacker. The result was an increase of 27 workers in the staffs of the 196 establishments furnishing returns, which employed 17,763 on October 1. More extensive improvement was noted at the beginning of October, 1926, but the index number then was practically the same as on the date under review.

Lumber and Products.—Further reductions in personnel on a larger scale than in the autumn of last year were indicated in the lumber group, in which employment then was in greater volume than on the date under review. The losses took place almost entirely in rough and dressed lumber mills, while furniture factories were somewhat busier. A combined working force of 54,287 persons was reported by the 723 co-operating manufacturers, as compared with 56,971 at the beginning of September. Although the largest contractions were in Ontario, the tendency was downward in all provinces except British Columbia.

Musical Instruments.—Continued additions to staffs on practically the same scale as on October 1, 1926, were registered in musical instrument plants, but conditions were not quite so good as during last autumn. Thirty-nine establishments reported 3,295 employees, as compared with 3,166 in the preceding month. Practically all the gain was made in Quebec.

Plant Products—Edible.—Fruit and vegetable canneries, flour and cereal, chocolate, cocoa and confectionery factories afforded heightened employment, while there was a falling off in the sugar and syrup division. The staffs of the 318 reporting firms aggregated 33,132 persons, or 3,269 more than in the last report. Employment was better in all except the western provinces, Ontario showing the most pronounced expansion. This gain exceeded that registered on the corresponding date in most years of the record, in all of which the index was lower than on October 1, 1927.

Pulp and Paper Products.—There was an insignificant reduction in the number reported by 477 employers in this group, who had 60,823 workers on pay roll, as compared with 60,913 at the beginning of September. Pulp and paper mills released some employees, but the production of paper goods showed an advance. In the Maritime Provinces, Ontario and British Columbia there were small increases, while the tendency elsewhere was unfavourable. Very decided curtailment had been indicated at the beginning of October a year ago, and the index number then, as well as in the autumn of earlier years since the record was commenced in 1920, was lower.

Rubber Products.—Although employment in rubber goods showed a decrease on October

1, 1927, as compared with the minor increase recorded on the same date in 1926, the level of employment continued considerably higher. Data were compiled from 32 firms with 14,050 employees, as against 14,438 in their last report. A large proportion of this curtailment was in Quebec.

Textile Products.—Garment and personal furnishing and knitting mills reported increased activity, but the production of miscellaneous textile goods showed a falling off; 513 manufacturers enlarged their payrolls from 74,750 to 75,426 workers on the date under review. Quebec and Ontario recorded the bulk of this expansion. Although more pronounced improvement had been noted at the beginning of October last year, the situation then was not so favourable.

Tobacco, Distilled and Malt Liquors.—As on the corresponding date in 1926, there was a falling off in employment in these industries, 204 persons being released from the staffs of the 110 establishments furnishing statistics, which employed 12,831. Employment, however, continued in greater volume than in the autumn of other years for which statistics are available. Firms in Quebec recorded most of the decrease.

Clay, Glass and Stone Products.—Continued seasonal contractions were indicated in building material plants, in which activity was less than on October 1, 1926. The forces of the 122 employers from whom information was received declined by 352 persons to 10,429 at the beginning of October. The largest reductions took place in Quebec, although the tendency was generally downward, except in Ontario.

Electric Current.—After seven months of uninterrupted expansion in employment in electric current plants, there was a decline at the beginning of October, when 88 establishments reported 13,305 workers, compared with 13,680 on September 1. There were general losses except in British Columbia and the Maritime Provinces. Similar contractions were indicated on the corresponding date last year, and the index number then was over eleven points lower.

Electrical Appliances.—Further additions to staffs were made in electrical apparatus works, 39 of which had 11,093 employees, or 239 more than in their last report. This improvement was not quite so pronounced as that noted on the same date in 1926, when however, the index number was, several points lower.

Iron and Steel Products.—The crude, rolled and forged, foundry and machine shop and hardware divisions of the iron and steel group registered reductions in employment, while there were small advances in heating appliance, land vehicle, pipe and some other branches. Statements were received from 646 manufacturers, whose payrolls aggregated 124,452 persons, as compared with 125,297 in the preceding month. Employment declined in Ontario, Quebec and the Prairie Provinces, but the losses in the first named province were the most noteworthy. Considerably greater curtailment had been indicated at the beginning of September last year, when the index number was much the same as on the date under review. Some large automobile plants were working on short time.

Non-Ferrous Metal Products.—The lead, tin, zinc and copper division of this group reported decreases, while smelters and refineries were somewhat busier. A combined working force of 16,182 persons was reported by the 105 co-operating employers, who had 16,343 employees at the beginning of September. Most of the reduction was in Ontario, while in British Columbia the trend was upward. The situation was much more favourable than in the autumn of earlier years of the record.

Mineral Products.—This group showed a further contraction, according to 73 firms whose payrolls declined from 10,064 workers on September 1 to 9,883 at the beginning of October. There were minor recessions in all except the maritime provinces. The index number continued to be slightly higher than on October 1, 1926.

Logging

Statements were tabulated from 222 logging companies, whose staffs were enlarged by 4,658 workers to 22,740 on the date under review. This advance was on a greater scale than in the early autumn of previous years of the record, in most of which the index was rather lower. Camps in Quebec and Ontario absorbed most of the extra men.

Mining

Coal Mining.—There was a moderate increase in coal mines, in which employment was in greater volume than on October 1, 1926, although the improvement then recorded was much more pronounced. Returns were received from 87 operators employing 26,827 workers, as compared with 26,529 in their last report. Practically all the advance was in the Prairie Provinces.

Metallic Ores.—Employment in this group showed on October 1 its seventh consecutive increase since the spring; 56 employers reported 13,350 workers, or 231 more than at the beginning of September. Quebec and Ontario registered most of the improvement, while in British Columbia the tendency was unfavourable. Smaller gains had been noted on the corresponding date last year when the index number was over 20 points lower.

Communications

Practically no change was shown in communications, slight increases on telephones being offset by decreases on telegraphs. The 189 companies furnishing data reported 26,009 employees, or 47 more than on September 1. The index continued to be higher than in any other month since the record was commenced in 1920.

Transportation

Railway.—Statistics were tabulated from 101 employers in the steam railway operation group, whose payrolls rose from 79,890 on September 1 to 80,002 at the beginning of October. This gain was much smaller than that recorded on the corresponding date last year, when the index number was about two points higher. Losses in the Maritime Provinces and Ontario were offset by expansion in Quebec and the Prairie Provinces.

Shipping and Stevedoring.—Additions to staffs on a somewhat larger scale than those registered on the same date in 1926, were made in the water transportation group, in which 61 companies employed 15,772 workers. This was an advance of 752 over their payrolls in the preceding month. Quebec reported the most pronounced improvement; in British Columbia there were smaller gains, while in Ontario the tendency was downward. Although less extensive increases had been noted on October 1 last year, the index number then was rather higher.

Construction

Building.—For the first time since the beginning of February there was a falling off in employment in building, 309 persons being released from the forces of the 493 co-operating contractors. They had 44,996 employees, a number considerably in excess of that reported at the beginning of October a year ago, when seasonal curtailment was also indicated. In the Maritime Provinces, Quebec and British Columbia there was further improvement, but the trend was unfavourable in Ontario and the Prairie Provinces.

Highway.—Work on highways and streets declined, as is customary at this time of year, but the decreases, like the increases which preceded it, involved a larger number of workers than in the early autumn in previous years of the record. Statements were tabulated from 162 employers, whose staffs, standing at 30,417, were smaller by 3,484 persons than on September 1. The most marked contractions were in the Maritime Provinces and Quebec, although there were also losses in Ontario and British Columbia; in the Prairie Provinces, on the other hand, considerable expansion was noted.

Railway.—Continued reductions in employment on railway construction was reported, especially in Ontario and the Prairie Provinces. The forces of the 37 companies and divisional superintendents furnishing returns declined from 51,334 persons on September 1 to 46,071 at the beginning of October. Although this shrinkage was more extensive than that registered on the corresponding date in 1926, the level of employment then was practically the same as on October 1, 1927.

Services

The closing of summer hotels largely accounted for a decrease of 644 persons in the staffs of the 176 firms in this group whose returns were received, and who employed 17,171 on October 1. The reductions indicated on the same date last year involved a corresponding number of workers, but the index then was much lower.

Trade

For the seventh consecutive month, trade showed an increase, in which both retailers and wholesalers shared; 576 establishments reported 65,444 employees, compared with 64,691 in the preceding month. The situation was better than in the autumn in any other year of the record which was instituted in 1920.

Tables I, II and III give index numbers of employment by economic areas, leading cities and industries, respectively. The columns headed "Relative weight" show the proportion that the number of employees reported in the indicated area or industry is of the total number of employees reported in Canada by the firms making returns on October 1, 1927.

UNEMPLOYMENT IN TRADE UNIONS AT THE CLOSE OF SEPTEMBER, 1927

THE term unemployment as used in the following report has reference to involuntary idleness due to economic causes. Persons engaged in work other than their own trades, or who are idle because of illness, are not considered as unemployed. Unions involved in an industrial dispute are excluded from these tabulations. As the number of unions making returns varies from month to month with consequent variation in membership upon which the percentage of unemployment is based, it should be understood that such figures have reference only to the organizations reporting.

PERCENTAGE OF UNEMPLOYMENT AS REPORTED BY TRADE UNIONS

Unemployment at the end of September, according to returns tabulated from 1,601 local unions with 171,435 members, showed a slight decline both as compared with the returns of the previous month and of September last year. The percentage of idleness for the month under review stood at 3.1, as against percentages of 3.7 at the close of August, and 3.3 in September, 1926. All provinces except Manitoba and Saskatchewan contributed a quota to the total improvement reported over August, though the changes in Nova Scotia and New Brunswick were almost negligible. The gain in Quebec was due to the greater volume of employment afforded workers in the manufacturing industries, which was, however, partly offset by losses among navigation workers. The increase in activity evidenced among steam railway employees in Ontario was mainly responsible for the improvement in that province; in Alberta the improvement was due to the higher trend of employment in the coal mining regions, and in British Columbia to the more favourable situation existing in the manufacturing industries. The decline registered in the province of Saskatchewan was for the most part attributable to a falling off in employment in the maintenance branch of the steam railway division, while in Manitoba there was but a nominal adverse change. In comparison with the returns for September last year, New Brunswick, Quebec, Alberta and British Columbia unions showed a favourable tendency sufficient to overcome the contractions in the remaining provinces.

A separate tabulation is made of trade union conditions in the largest city of each province except Prince Edward Island. Vancouver, with 5.7 per cent of inactivity, showed the largest percentage of unemployment of any of the cities used in this comparison, though the situation was better in that city than in the previous month, when the unemployment percentage stood at 7.4. Montreal, with 5.1 per cent of idleness, followed next, showing an improvement of 1.4 per cent over the previous month. Toronto reported the same percentage of idle members as in August, namely, 3.3 per cent. The Regina unions were the most actively engaged, only .3 per cent of their members being without work. In comparison with the returns for September last year the situation was better during the

period under review in all centres except Winnipeg, Regina and Edmonton, where nominal declines in employment occurred.

The accompanying chart illustrates the trend of unemployment by months from 1921 to date. The curve traces a slightly downward course during September, showing a trend toward somewhat greater employment contrary to that which had existed in the previous two months. The level of the curve, however, at the end of September varied very little from that of the same month last year.

The tendency in the manufacturing industries as a whole, as shown by the returns received from 432 labour organizations with 49,473 members, was more favourable during September than in the previous month, the percentage of idleness on September 30 standing at 4.0, as compared with an unemployment percentage of 5.9 in August. Large percentage increases, though not involving a number of workers sufficient to sway the percentage for the manufacturing industries very perceptibly, were recorded among cigar makers, metal polishers and wood workers. Among iron and steel tradesmen, whose membership is over 45 per cent of the entire membership reported for the group, a small gain in the number of members employed was shown, followed by improvement among garment workers, pulp and paper makers, printing tradesmen, leather and glass workers. The adverse changes were few and not pronounced. In comparison with the returns for September last year, when 6.8 per cent of the members were without work, the increases in activity were rather generally distributed throughout the various trades with the exception of the glass, leather and pulp and paper trades where greater inactivity prevailed.

From the coal mining unions 36 reports were tabulated, indicating a membership of 14,947 persons, 110 of whom were idle on September 30, or a percentage of .7 as compared with unemployment percentages of 2.9 in August and .7 in September last year. That the percentage idle is smaller than in August may be ascribed to better working conditions existing for miners in Alberta, whose returns, although they show no actual unemployment, still indicate considerable short time. There was a nominal gain in employment registered by Nova Scotia miners, and in British Columbia all members were at work as in August. The situation as compared with September last year improved in Alberta, while in Nova Scotia it was slightly less favourable and in British Columbia all members were reported busy in both months.

The building trades showed little divergence from the August level of employment, the small change registered being for the better, though conditions were not so good as those reported in September last year. For the month of September returns were tabulated from 173 local unions, comprising a membership of 17,768 persons, 8.3 per cent of whom were unemployed as against 8.5 per cent in August and 5.5 per cent in September last year. Improvement over August was registered among bricklayers, masons and plasterers, carpenters and joiners and painters, decorators and paperhangers; the situation for steam shovel and dredgemen remained stationary, and among the remaining tradesmen less activity was reported. In comparison with the returns for September last year painters, decorators and paperhangers indicated a much higher level of employment, followed by small gains for steam shovel and dredgemen and electrical workers, while of the

reductions the most noticeable were among bricklayers, masons and plasterers, bridge and structural iron workers, hod carriers and building labourers and granite and stone cutters.

Transportation on the whole employed slightly smaller working forces than in August or September last year. The returns tabulated for September this year numbered 655, including a membership of 59,355 persons, 1,485 or 2.5 per cent of whom were idle. Employment in the navigation division, especially in Quebec was considerably lower than in August, due to the approaching slack season, but the reductions in the steam railway division, where the membership was almost 82 per cent of the entire group membership reporting, was merely nominal. Among street and electric railway employees and teamsters and chauffeurs there was practically no change. When compared with the returns for September last year, when 1.7 per cent of the members were idle, conditions in navigation were quite slack. The steam railway division employed a slightly smaller number of workers, while in the local transportation division, which includes street and electric railway employees and teamsters and chauffeurs, there was no change in the percentage of idle members.

Longshore workers, whose returns are tabulated separately, reported a reduction of over 4 per cent in comparison with August and a small adverse change in comparison with the returns for September, 1926. Reports for September this year were received from 8 unions of longshore workers, comprising 4,730 members, 862 of whom or a percentage of 18.2 were without work.

From federal and civic government service unions 136 returns were tabulated in September, these unions having 12,592 members, .1 per cent of whom were idle in September, as compared with no inactivity in August and .1 per cent in September last year. Federal government employees were reported fully engaged both in August this year and in September, 1926, while the change among civic employees for the three months under review was not particularly noteworthy.

Reports tabulated from 105 local unions in the miscellaneous group of trades, with 4,823 members, indicated an unemployment percentage of 5.2, as against 4.9 per cent in August. Employment among hotel and restaurant and theatre and stage employees was in somewhat greater volume than in August, while among barbers and stationary engineers and firemen conditions were slightly less favourable. In comparison with the returns for September last year the situation for hotel and restaurant employees improved slightly, while among barbers, stationary engineers and firemen and theatre and stage employees there were small declines in the amount of work afforded.

In the fishing industry the percentage of inactivity was small in September, though slightly above that of August. The level, however, was unchanged in comparison with September last year. The logging industry reported no idle members as in August, though there was considerable unemployment in September last year.

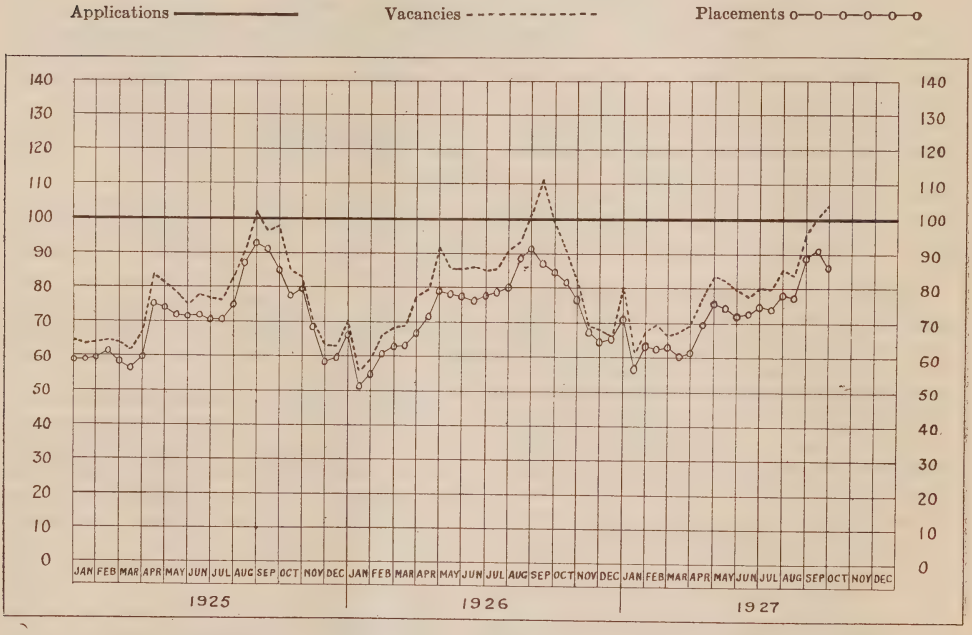
Table I on page 1225 summarizes the returns by provinces for September of each year from 1919 to 1924 inclusive and for each month from January, 1925, to date, and table II on page 1226 gives the percentages of unemployment registered in the different groups of industries for the same months.

EMPLOYMENT OFFICE REPORTS FOR SEPTEMBER, 1927

THE volume of business transacted by the offices of the Employment Service of Canada during the month of September, 1927, showed a marked increase in the average daily placements over that of the preceding period, and also over that of last year, registering a gain of nearly 53 per cent in the former, and of 48 per cent in the latter comparison. This gain over last year was largely due to the heavy demand for workers in the harvest fields of the west, though increased placements in a marked degree were recorded in logging and in services, where harvest conditions also called for an additional supply of domestics in the farm household division. Trade and finance also showed slight gains, while minor reductions occurred in manufacturing, mining, communication, transportation, and construction and maintenance.

The accompanying chart shows the trend of employment since January, 1925, as represented by the ratio of vacancies offered, and of placements effected for each 100 applications for work registered at the offices of the Service throughout Canada, computations being made semi-monthly. It will be seen that the curve of vacancies in relation to applications showed a continued upward trend throughout the month, the marked expansion

shown during the latter half of the period being mainly in the Prairie Provinces where an active demand for harvesters in some localities exceeded the supply. The curve of placements in relation to applications rose slightly during the first half of the period under review, followed by a decline of 5 points during the latter part of the month, but was still slightly higher than the level shown at the end of September, 1926. The ratio of vacancies to each 100 applications was 100.2 and 104.4 during the first and second half of September, 1927, in contrast with the ratios of 111.6 and with 99.1 during the same periods in 1926. The ratios of placements to each 100 applications during the periods under review were 91.0 and 86.0, as compared with 87.1 and 84.7 during the corresponding month a year ago.



The average number of applications for employment received by the offices of the Service throughout Canada was 4,298 daily during the first half of September, as compared with 2,993 daily during the preceding period, and with 2,642 daily during the corresponding period of 1926. Applications for work during the latter half of the month registered 2,710 daily, in contrast with 2,231 daily during the latter half of September a year ago.

The average number of vacancies reported by employers to the Service daily was 4,305 during the first half and 2,829 during the latter half of the month under review, as compared with a daily average of 2,949 and 2,210 vacancies during the month of September, 1926. Vacancies offered to the Service during the latter half of August, 1927, averaged 2,862 daily.

The average number of placements made daily by the offices of the Service during the first half of September was 3,913, of which 3,445 were in regular employment and 468 in work of one week's duration or less, as compared with a total average placement during the preceding period of 2,663 daily and with 2,300 daily during the first half of September, 1926. During the latter half of the month under review placements averaged 2,331 daily (1,860 regular and 471 casual) as compared with an average of 1,889 daily during the corresponding period last year.

During the month of September, 1927, the offices of the Service referred 78,967 persons to vacancies and effected a total of 77,242 placements. Of these the placements in regular employment numbered 65,503, of which 60,579 were of men and 4,924 of women, while placements in casual work totalled 11,739. Opportunities for employment reported by

POSITIONS OFFERED AND PLACEMENTS EFFECTED FOR EACH ONE HUNDRED APPLICATIONS FOR EMPLOYMENT

employers numbered 76,391 for men and 12,035 for women, a total of 88,426, while the number of applications for work was 86,797, of which 73,169 were from men and 13,628 from women.

The following table gives the placements effected to date in the offices of the Employment Service of Canada:—

Year	Placements		
	Regular	Casual	Totals
1919 (10 months)	268,001	37,904	305,905
1920	366,547	79,265	445,812
1921	280,518	75,238	355,756
1922	297,827	95,695	393,522
1923	347,165	115,387	462,552
1924	247,425	118,707	366,132
1925	306,804	106,021	412,825
1926	300,226	109,929	410,155
1927 (9 months)	235,826	80,867	316,693

Nova Scotia

There were declines of over 20 per cent and 17 per cent respectively in the number of positions offered through offices in Nova Scotia during September, when a comparison is made with the preceding month and with the corresponding months last year. Placements were 22 per cent less than in August and over 6 per cent less than in September, 1926. Reductions occurred in all groups except farming, communication and services, where the gains were only nominal and in trade and finance, which remained unchanged. Placements by industrial groups included: manufacturing, 29; farming, 26; transportation, 25; construction and maintenance, 51; trade, 49; and services, 271, of which 220 were of household workers. Regular employment was found for 63 men and 72 women.

New Brunswick

The demand for workers as indicated by orders listed at offices in New Brunswick durin September was 3 per cent less than in August and 8 per cent less than in September, 1926. Placements, however, were over 4 per cent higher than in August, but were practically unchanged from September last year, no outstanding changes being registered in any one group. Industrial groups in which most of the placements were effected during the month included: manufacturing, 57; farming, 30; construction and maintenance, 160; and services, 447, of which 355 were of household workers. Placements in regular employ ment numbered 229 of men and 72 women.

Quebec

During September, offices in Quebec received orders for nearly 10 per cent more workers than in August, and almost 12 per cent more than during September last year. Placements were 22 per cent higher than in August, and about 21 per cent in excess of September, 1926. All industrial divisions except farming, construction and maintenance and trade showed increased activity, that in logging being the most pronounced, while the declines recorded were only of minor importance, and had little effect on the total gains reported in all other groups. Divisions in which employment was found for over 100 workers included, manufacturing, 203; logging, 1,280; transportation, 102; construction and maintenance, 1,052; and services, 613, of which 404 were household workers. During the month 2,788 men and 520 women were placed in regular employment.

Ontario

Orders listed at employment offices in Ontario during September called for 1 per cent more workers than in August, but showed a decline of 5 per cent from September last year. Placements likewise showed a gain of over 2 per cent in the first comparison and a reduction of like proportion in the second. Increased placements were recorded in communication, services, trade and logging, the most noteworthy being in the latter group, but these were more than offset by contractions in manufacturing, farming, mining, transportation and construction and maintenance. Industrial divisions in which most of the placements were effected included: manufacturing, 1,512; logging, 2,262; farming, 1,269; transportation, 604; construction and maintenance, 2,625; trade, 449; and services, 4,288, of which 2,691 were of household workers. There were 7,227 men and 1,487 women placed in regular employment during the month.

Manitoba

Opportunities for employment as indicated by orders listed at employment offices in the Province of Manitoba during September were over 70 per cent higher than in August, and over 28 per cent in excess of last year. Placements also showed a gain of nearly 50 per cent when compared with the preceding month, and of 27 per cent in comparison with September, 1926. More than 2,000 more placements were effected in farming than in the corresponding month last year due to the later harvest demand. Services and construction and maintenance also showed gains, while the declines recorded were small and affected only in a minor degree the total gain registered by the province. Placements by industrial divisions included: manufacturing, 225; logging, 106; farming, 6,920; construction and mainten-

ance, 517; trade, 396; and services, 2,122, of which 1,682 were of household workers. Placements in regular employment totalled 7,137 men and 590 women.

SASKATCHEWAN

An increase of 86 per cent was noted in the number of requests for workers registered at the offices of the Service in Saskatchewan during September when compared with August, and of over 50 per cent when compared with September, 1926. Placements showed a gain of 80.3 per cent under both comparisons. The bulk of the placements throughout the province was in farming, employment being secured for 22,171 workers in this industry, or over 88 per cent more than in September a year ago. Harvesting also had a favourable effect on the service group as increased placements were recorded in the household division, and particularly in that branch pertaining to the placement of women for domestic work on farms, where more than double the number of workers placed last year secured employment. Placements in industries other than farming included: manufacturing, 115; construction and maintenance, 289; trade, 204; and services, 1,153, of which 880 were household. Positions were secured for 22,372 men and 610 women in regular employment during the month.

ALBERTA

Employment opportunities as indicated by orders received in offices in Alberta during September increased more than 118 per cent over August, and over 137 per cent when compared with the corresponding month last year. Placements also showed a gain of 86 per cent in the first comparison, and of 111 per cent under the latter review. A heavy demand for farm workers was the determining factor in the pronounced gain recorded above, over 14,000 workers being placed in that group alone, in comparison with 5,639 farm placements effected during September last year. Construction and maintenance, services and trade also registered gains, though on a much smaller scale, while declines were shown in manufacturing, mining and transportation. Industrial divisions in which the major part of the placements were effected included: manufacturing, 278; farming, 14,181; construction and maintenance, 765; trade, 317; and services, 994; of which 707 were of household workers. Regular employment during the month was secured for 15,234 men and 549 women workers.

BRITISH COLUMBIA

During the month of September positions offered through British Columbia offices declined nearly 26 per cent from the preceding month, and almost 10 per cent from last year. Placements recorded practically no change when compared with August, but showed a favourable percentage of gain, namely 59 per cent, in comparison with September a year ago. As was the case in Manitoba, Saskatchewan and Alberta, the bulk of the placements was in farming, where nearly 4,000 workers were transferred for work in the harvest fields of the Prairie Provinces, while over 500 domestics were also sent to points within the area of harvest operations to assist with work in connection with farm household service. Logging showed a minor gain but other groups including manufacturing, mining, transportation, construction and maintenance, and trade showed declines, those in manufacturing and construction and maintenance being the largest. Placements in industrial groups included: manufacturing, 499; logging, 439; farming, 4,638; mining, 76; transportation, 186; construction and maintenance, 636; trade, 277, and services, 1,557, of which 1,113 were in household service. There were 5,529 men and 1,024 women placed in regular employment during the month.

Movement of Labour

During September, 1927, the offices of the Employment Service of Canada effected 65,503 placements in regular employment, of which 57,338 were persons for whom the employment located was outside the immediate locality of the offices at which they were registered. Of these latter 5,858 were allowed the Employment Service reduced rate of transportation, 3,829 travelling to points within the same province as the despatching office and 2,029 to other provinces. The reduced transportation rate, which is 2.7 cents per mile with a minimum fare of $4, is granted by the railway companies to bona fide applicants at the Employment Service who may desire to travel to distant employment, for which there are no available workers locally.

The labour movement within and from the Province of Quebec during September was entirely toward lumbering camps and logging activities, 614 persons receiving certificates of transportation, 266 of whom went to provincial points, and 348 to employment outside the province. All of the latter were for Northern Ontario logging districts in the vicinity of Sudbury, Sault Ste. Marie and North Bay, and

were despatched by the Hull and Montreal offices. Provincially, Montreal sent 70 bushmen to the Quebec zone, 73 within its own zone, and the Quebec City office issued transportation to 123 workers for employment within its zone.

From the Ontario offices 1,105 persons took advantage of the Employment Service reduced rate, 1,086 going to points within the province and 19 to outside districts. Within the province Toronto transferred 1 miner and 1 steamfitter to Cobalt, 3 farm hands to Chatham, 1 watchman to North Bay, and 1 blacksmith to Port Arthur. North Bay despatched 57 railroad construction labourers, 1 cook, 1 cookee, 27 carpenters, and 1 waitress to Timmins, and 84 railroad construction labourers, 5 cooks and 1 carpenter to Cobalt. From Fort William 55 building construction labourers and 1 farm hand went to points within the zone; from Pembroke 1 cook travelled to Sudbury and 1 drill sharpener to Cobalt, and from Port Arthur 6 farm labourers and 1 miner were destined to stations within the Port Arthur zone. The Cobalt office transferred 1 hoistman to Port Arthur, the Ottawa Office 1 plumber to Cobalt and the Sudbury office 1 cook for employment within its own zone. The remaining transfers provincially totalling 834 were for bush operations within the province, principally around Fort William, Port Arthur, Sudbury, Sault Ste. Marie and Cobalt. Of those going outside the province 8 were carpenters and 1 a plumber for the Hull zone, and 1 was a carpenter for Montreal, all transferred from North Bay. In addition 1 carpenter received transportation from Toronto to North Bay, and Fort William issued certificates to 1 harvester for work in Alberta, 5 harvesters for Saskatchewan district and 2 harm hands for Manitoba points.

The Manitoba offices granted 2,578 certificates of reduced transportation, 1,291 provincial and 1,287 interprovincial. The Winnipeg offices made all the transfers provincially, 1,244 of which were of harvest hands and 31 of farm household workers for farms within the province. The remainder were 7 teamsters and 5 hotel and household workers going to Brandon, 1 baker and 1 fisherman to Dauphin, and 2 carpenters within the Winnipeg zone. Of those travelling to other provinces the Brandon office was instrumental in transporting 4 harvesters to Saskatchewan points and 2 harvesters to Alberta, and the Winnipeg offices in shipping 1,080 harvesters and 20 farm domestics to stations in Saskatchewan, and 61 harvest workers and 2 farm domestics to employment in Alberta. Prince Albert received 1 cook, Regina 2 hotel workers and 1 bricklayer, Weyburn 1 hotel general and Vancouver 1 chemist also from Winnipeg. For Port Arthur and the surrounding districts 112 certificates were granted by the Winnipeg offices to 95 bushmen, 8 lath cutters, 5 cooks, 2 porters, 1 engineer and 1 general.

The number of transportation vouchers issued by Saskatchewan offices were 249 in number, 244 of which were provincial, and the remainder for other provinces. Of those travelling within the province 224 were harvest hands and 7 farm household workers who were sent to various agricultural parts, the majority of whom were transferred by Moose Jaw and Saskatoon offices. Saskatoon in addition, issued transportation to 1 bushman for the Prince Albert zone and 3 railroad construction teamsters and 2 cooks for points within its own zone. The Prince Albert zone also received 1 bushman from Regina and 1 handyman sent by the Prince Albert office. The remaining 5 transfers were hotel workers for several different centres within the province. To Manitoba points Moose Jaw despatched 3 harvesters and Regina 1 harvest hand, while from Regina also 1 fruit picker journeyed to Vernon.

Workers benefiting by reduced rate certificates from Alberta offices totalled 890, of which 756 were for points within the province, and 134 for other provinces. A heavy demand for harvest help featured the Alberta situation, Edmonton transferring provincially 612 harvesters and 10 farm domestics, and Calgary 69 harvest workers and 7 farm domestics. Edmonton also effected transfers of 8 building labourers, 7 carpenters, 5 mining labourers, 5 teamsters, 4 bushmen, 3 miners, 2 mill hands, 2 cookees, 1 labourer, 1 mining engineer, 1 cement labourer, 1 clerk, 1 machinist, 1 mine cook, and 4 hotel workers for the Edmonton zone, 5 carpenters and 1 chambermaid for Calgary, and 1 hotel cook and 1 dish washer for Drumheller. The Calgary office in addition sent 2 elevator construction workers to Drumheller, 1 line man to Lethbridge, and 1 auto mechanic within the Calgary zone. Among those going to other provinces 126 were harvesters, and 2 were farm domestics for various Saskatchewan points, shipped by the Edmonton office; 3 were harvesters going from Calgary to points in Saskatchewan and 3 were carpenters travelling to Cranbrook also from Calgary.

The business transacted by British Columbia offices involved an issue of 422 special rate certificates, 186 of which were for provincial centres, and 236 for outside points.

Of the former, Vancouver granted certificates to 34 female cannery workers, 76 bushmen, 4 miners, 3 cooks, 2 labourers, 1 blacksmith, 1 flunkey, 1 carpenter, 1 engineer, and 1 edgerman going to Kamloops, 10 miners, 3 flunkeys, 1 baker, 1 farm labourer, 1 apple picker, and 1 female hotel worker going to the Penticton zone, 3 labourers, 1 bricklayer, 1 carpenter and 1 waitress to Nelson, 2 female apple pickers to Kelowna, 3 bushmen to Prince George and 6 farm hands, 3 miners, 1 electrician and 2 cooks to employment within the Vancouver zone. The Nelson office despatched 3 miners to Cranbrook, 1 cook to Revelstoke, 1 miner to New Westminster, and 2 bushmen within its own zone, and New Westminster sent 3 apple pickers to Kelowna. From Prince Rupert 2 bushmen went to Prince George, and 3 bushmen within its own zone, while from Penticton 1 farm hand and from Prince George 6 bushmen were transferred to points within their respective zones. The interprovincial movement included 123 prospective farm labourers, who coming over from the United States were met at the British Columbia border by Alberta superintendents and directed to the Alberta farm areas. Alberta received in addition 87 farm hands and 5 female domestics, and Saskatchewan 21 farm hands all transported at the reduced rate from the Vancouver, Cranbrook, Revelstoke and Nelson offices.

Of the 5,858 persons who benefited by the Employment Service reduced transportation rate, 2,872 were carried by the Canadian National Railways, 2,772 by the Canadian Pacific Railway, 207 by the Temiskaming and Northern Ontario Railway, and 7 by the Kettle Valley Railway.

In addition to the 2.7 cent rate referred to above the special harvest transportation facilities from British Columbia to the Prairie Provinces afforded by the railway companies during the latter part of August and mentioned in the report for that month extended until the 7th of September. Under this arrangement the railway companies granted a special harvest rate to all applicants upon presentation of certificates furnished by the Employment Service. Such certificate holders were entitled to a rate of $11 from Victoria and $10 from Vancouver or other British Columbia offices (with the exception of Cranbrook, Revelstoke and Nelson where the 2.7 cent rate prevailed) to Calgary or Edmonton, beyond which points the fare was one-half cent per mile. From the various British Columbia offices 1,346 persons travelled at this special harvest rate to the Prairie Provinces, 535 farm hands and 78 farm domestics going to employment in Alberta, and 676 farm labourers and 57 farm domestics to Saskatchewan points. The Canadian National Railways transported 522 of these workers, and the Canadian Pacific Railway 824. The number of persons who took advantage of this special harvest rate from August 15 when it came into effect until September 7, the concluding date, was 7,318, of whom 2,408 farm hands and 322 farm household workers went to Alberta points, and 4,192 farm labourers and 396 farm domestics to Saskatchewan agricultural districts. Of these 2,901 travelled over the Canadian National Railways and 4,417 over the Canadian Pacific Railway.

REPORT OF THE EMPLOYMENT SERVICE OF CANADA FOR THE PERIOD JULY TO SEPTEMBER, 1927

EMPLOYMENT conditions as indicated by the volume of business transacted by the offices of the Employment Service of Canada during the quarter July to September, 1927, showed little change from that of the corresponding quarter last year. There was a nominal decline only in vacancies, while placements in regular and casual employment showed a reduction of about 3 per cent. More favourable conditions were shown in logging, farming, services and trade both in positions offered and in placements effected, that in farming being the largest. The adverse changes under both comparisons in the remaining industrial divisions slightly more than counterbalanced the gains shown. Alberta was the only province to report increased vacancies, while Quebec, Saskatchewan and Alberta recorded more placements, all other provinces reporting declines in this respect. The accompanying table gives the vacancies and placements of the Employment Service of Canada by industrial groups in the various provinces during the period July to September, 1927.

From the chart on page 1228, which accompanies the article on the work of the employment offices for the month of September, it will be noticed that the curve of vacancies representing the ratio of vacancies to applications showed a continuous upward trend throughout the period, with the exception of

a slight decline at the close of August. During the last month of the quarter the demand exceeded the supply of workers available, this being due to the many calls for harvesters in the prairie provinces. The curve of placements in relation to applications showed varied fluctuations, an upward trend being registered during July, followed by a very slight decline the first half of August, again following an upward course until the middle of September, when there was recorded during the latter part of the month a decline of five points. The level then reached was, however, slightly higher than that shown at the close of September a year ago. During the period July to September, 1926, there was an average of 98.6 vacancies and of 86.3 placements for each one hundred applications for employment as compared with 94.5 vacancies and 85.0 placements for one hundred applications during the period under review. The average number of applicants registered daily during the present quarter was 2,465, of positions offered 2,328 and of placements effected, 2,096, in contrast with the daily average of 2,364 applications, 2,331 vacancies and 2,041 placements in regular and casual employment during the same quarter of 1926.

During the three months July to September, 1927, the offices reported that they had made 165,985 references to positions, and had effected a total of 161,387 placements, of which 131,682 were in regular employment and 29,705 in casual work. Of the placements in regular employment 117,836 were of men and 13,846 of women, while casual work was found for 17,363 men and 12,342 women. Comparison with the same period of 1926 shows that 157,100 placements were then made, of which 128,172 were in regular employment and 28,928 in casual work. Applications for employment during the period under review were received from 154.277 men and 35,486 women, a total of 189,763, in contrast with a registration of 181,974 persons during the same period of 1926. Employers notified the Service during the quarter July to September, 1927, of 179,239 vacancies, of which 147,518 were for men and 31,721 for women as compared with 179,458 opportunities for work during the corresponding period a year ago.

In another section of this issue will be found a report in detail of the transactions of the employment offices for the month of September, 1927.

AGREEMENTS AS TO WAGES AND WORKING CONDITIONS FOR LOCOMOTIVE ENGINEERS AND FIREMEN ON RAILWAYS IN CANADA

REFERENCE was made in the August issue of the LABOUR GAZETTE, pp. 887-888, to agreements settling disputes between the various classes of employees and the principal railway companies in Canada, providing for increases in wages on substantially the same basis as in the case of disputes settled earlier in the year and in December, 1926, namely increases averaging about six per cent but varying according to the rate for each class. A correction in the above article as to the increase for linemen is noted on vage 1150.

Agreements as to wages and working conditions for firemen, firemen's helpers, hostlers and hostlers' helpers were reached in May, but information as to these was not received in the Department until recently. In the meantime negotiations as to changes in wages and working conditions for engineers were resumed and a settlement reached on October 14 through the mediation of the Minister of Labour as mentioned elsewhere in this issue on pages 1157-8. The settlement provided for increases of 24c. per 100 miles in passenger service, 36c. per 100 miles in freight service, and 32c. per day in yard service, with a minimum of $7 per day for passenger service. There were also certain changes in the rules as to working conditions. The increases in rates for firemen, hostlers, etc., were similar.

On eastern lines, in passenger service rates for engineers were advanced from $5.92-$6.92 per 100 miles to $6.16-$7.16 and for firemen from $4.32-$5.52 per 100 miles to $4.56-$5.76. In freight service rates for engineers were advanced from $6.48-$8.40 per 100 miles to $6.84-$8.76 and for firemen from $4.64-$6.15 per 100 miles to $5.00-$6.51. In yard service rates for engineers rose from $6.40-$7.72 per 100 miles to $6.72-$8.04 and for firemen from $4.96-$6.32 to $5.28-$6.64. Rates for hostlers rose from $4.96-$5.60 per 8-hour day to $5.50-$6.10 and hostlers' helpers from $4.40 per day to $4.90. Similar increases were made for western lines.

RECENT INDUSTRIAL AGREEMENTS AND SCHEDULES OF WAGES

A SUMMARY is given below of the more important industrial agreements and schedules of wages and working conditions that have recently been received by the Department. Such agreements are summarized each month in the Labour Gazette. In the majority of cases the agreements are signed by both employers and employees. Verbal agreements, which are also included in the records, are schedules of rates of wages and hours of labour and other conditions of employment agreed upon between the parties concerned, and in effect though not signed. In addition to these, important schedules of wages are summarized, including civic schedules. In the case of each agreement or schedule, the rates of wages for the principal classes of labour are given, with other information of general interest.

Manufacturing: Pulp, Paper and Paper Products

Kenora, Ont.—Kenora Paper Mills, Limited, and International Brotherhood of Pulp, Sulphite and Paper Mill Workers, Local No. 133.

Agreement to be in effect from May 1, 1927, to April 30, 1928, and one year thereafter or with 30 days' notice of change.

Membership in the union shall include operators in positions not now occupied by members of the Brotherhood of Paper Makers. Union men to have preference of employment when competent members are available.

New employees must join the union within 15 days.

Hours for tour workers, 8 per day. Employees may not leave post at end of tour until relieved unless so arranged, subject to dismissal, but any employee shall not be expected to work more than 16 consecutive hours except in emergencies.

Hours for other employees, 8 per day, with time and one-half for overtime.

Groundwood mill to be in operation six days per week and longer when necessary.

Seniority to be considered according to length of service with regard to promotion; competency being taken into consideration.

Hours for day workers, 8 per day, 6 days per week.

Overtime, time and one-half. Repair work at least 4 hours' pay.

Tour workers hours to change at 8 a.m., 4 p.m. and 12 midnight. Work from 8 a.m. Sunday to 8 a.m. Monday, time and one-half, except salaried steam engineers and firemen. Tour workers working overtime other than on tour work, time and one-half.

Necessary work on holidays (Dominion Day, Labour Day and Christmas Day) time and one-half.

Labour saving devices improving efficiency are desirable. In case of installation of such, it is to be agreed upon that members eliminated by the installation will be given preference in any position open, at scale of wages for the occupation taken over.

In case of a vacancy existing after two weeks members working overtime because of such shall be paid time and one-half.

Grievances to be reported to the superintendent in writing. If adjustment is not satisfactory, matter shall be taken up by general manager or president and president or representative of the organization. If not settled within 10 days, matter shall be referred to arbitration.

Wage schedule per hour —Wood room: saw filer, 72 cents; oiler, 42 cents; sawyer, 45 cents; all other, 40 cents. Groundwood: stone sharpener, 58 cents; grinder man, 45 cents; magazine loaders, 42 cents; decker and screen men, 43 cents; bull screen men, ground wood beater men, 40 cents; wet machine tender, 43 cents; roll skinner, 42 cents; wet room trucker, 40 cents; hydraulic pressmen, 41 cents; clean up men, 40 cents; oilers, 45 cents.

Boiler houses: engineers paid by the month, at $145, $151 and $156; firemen, $122. Per hour, mechanics 72 cents; helper 50 cents (one day off each week to both); ash handlers, (also doing furnace repair) 42 cents; skip hoist operator (to splice iron cables), 55 cents; coal lorrie operator, 42 cents; coal conveyor men, 40 cents; locomotive crane engineer, 70 cents; locomotive crane fireman, switchmen, 50 cents; turbine engineers, 75 cents.

Beater men: brake beater men, 42 cents; sulphite beater men, 41 cents. Finishing room: roll finishers and heading machine, 45 cents; electric truck operators, 50 cents; loaders, 40 cents, weigher, coreman, 45 cents; coreman helper, 40 cents. Yard men: permanent yard men, 40 cents; teamsters, 40 cents. Mechanics: minimum rate, 72 cents; helpers, 59 and 50 cents. One day off in seven.

Electricians: switchboard operator and maintenance, 72 cents. Sulphite mill: cooks, 78 cents; cook's helper, 50 cents; acid makers, 65 cents; acid makers' helpers, 44 cents; stock runner, 45 cents; blow pit man, 44 cents; lead burner, 72 cents; labourers, 40 cents.

Chipper room: foreman, 55 cents; oiler, knife grinder, 45 cents; chipper man, 43 cents; labourer, 40 cents.

Construction: Buildings and Structures

Vancouver, B.C.—Two Electrical Contractors and the International Brotherhood of Electrical Workers, Local No. 213.

This agreement was drawn up in settlement of the strike mentioned in the Labour Gazette for October, 1927.

Agreement to be in effect from September 7, 1927, to April 30, 1928, and thereafter until ninety days' notice of change is given by either party.

Only union members to be employed, and only through the union office. Members not to work with non-union workers of any craft, except under instruction of the Local Union Executive Board.

Hours: 8 per day with 44-hour week.

Overtime and work on Saturday afternoons, Sundays and certain holidays, double time.

Men working out of town to have their fare and board paid.

At least two journeymen to work together on high voltage wires.

Not more than one apprentice to five journeymen and not more than two apprentices to one shop. Apprentices to work only under direct supervision of journeyman. Apprenticeship to be for three years, after which time an examination must be passed before an apprentice becomes a journeyman.

Wages: $8 per day, helpers $5 per day.

MONTREAL, QUE.—THE GEORGE A. FULLER COMPANY AND THE INTERNATIONAL UNION OF STEAM AND OPERATING ENGINEERS, LOCAL NO. 588.

Agreement to be in effect from October 7, 1926, to September 1, 1927, and thereafter until 60 days' notice of change is given by either party.

Only union members to be employed when any are available.

Hours: 10 per day with 55-hour week.

Overtime and work on Saturday afternoons, time and one half: work on Sundays and legal holidays, double time, except in cases of shift engineers who work seven days per week, who shall be paid 75 cents per hour for all time worked.

Wages: minimum for all members, 75 cents per hour with the exception of engineers on steam, electric or gasoline shovels, who shall be paid $55 per week: master mechanic $50 per week.

In the case of any dispute, there shall be no cessation of work pending reference to arbitration.

Transportation and Public Utilities: Telegraphs and Telephones

MANITOBA TELEPHONE SYSTEM AND THE INDEPENDENT BROTHERHOOD OF TELEPHONE WORKERS.

Agreement regarding working conditions and schedule of wages in effect from May 1, 1927, until April 30, 1928, changes or amendments to be effected by negotiation, upon notice being given 30 days prior to expiration; in case of failure to effect such arrangement, question to be submitted to the Council of Industry.

No discrimination against employees for any union membership, activities or affiliation.

Grievances to be considered by the management and a committee of the employees.

Provision made for jurisdiction of work.

Hours: on city and exchange work, 44 per week, 8 for five days and 4 on Saturdays.

Shift work, straight time for any 8 consecutive hours, 44 hours per week. Combination inspectors shall work an 8-hour shift on Saturday and have four hours off duty in the same week. Combination inspectors shall rotate on this shift.

Overtime, time worked over bulletin hours, time and one-half. From midnight until 8 a.m., and Sunday and legal holidays, double time, with the exception of men on monthly rates.

Office foremen to be paid overtime only on special occasions.

After twelve months' service, one week's holiday with pay; after two years, two weeks.

After five years continuous service, one week's sick pay (on production of medical certificate) per year; after ten years, two weeks. Continuous service to mean not losing more than four weeks in a year.

Employees who are householders to receive exchange telephone service at half current rate.

Apprentices to be over seventeen and under twenty-two years.

Apprenticeship period leading to journeymen to be four years, in at least four grades of telephone work.

Increase in salary and promotions to be granted in periods of one year from date of entry, if warranted by ability, promotion to carry a probation period of one month, with one-half the increase in wages.

Seniority to be governed by approved lists for promotion, reversion and lay-off. Employees laid off in shortage of work shall be given preference according to seniority when staff is increased. Lines of promotion are specified in the agreement.

Allowance for work away from headquarters, $2.50 per day for board and lodging. When permanently moved, employee to receive transportation for himself and family and household.

Men required to do automatic maintenance repair or construction work to be given a practical course of at least three months tuition.

Assignment of work may be changed for emergency purposes for a period up to 60 days.

This agreement to apply to work done by contract or otherwise.

Any employee suspended, superseded or discharged, or laid off, may have case investigated by a committee of employees or of the union, with right of appeal to the superintendent. If the latter decides that the employee has been unjustly dealt with, he shall be reinstated and paid for time lost.

Wages, per hour—Apprentices, first year, 35 cents; second year, 45 cents; third year, 58 cents; fourth year, 70 cents. Journeymen: rackmen and installers, 88 cents; combination inspectors, test clerks and P.B.X. installers, P.B.X. inspectors, 92 cents; P.A.X. inspectors, 94 cents; switchmen, 96 cents; shopmen, 92 cents, 89 cents and 87 cents. Other journeymen paid monthly rates.

Service: Hotels and Restaurants

VANCOUVER, B.C.—CERTAIN PROPRIETORS OF HOTELS AND BEER PARLOURS AND THE HOTEL AND BEER PARLOUR EMPLOYEES, UNION LOCAL NO. 676.

Agreement to be in effect from July 15, 1927, to July 15, 1928, and thereafter until 3 months' notice of change is given by either party.

Hours: 8 per day with 6 day week. No shift to be less than 4 hours.

Wages: tap men $33 per week, floor men $27 per week and combination men $30: short shift men $2.25 for 4 hours and 75 cents for each additional hour.

BUILDING PERMITS ISSUED IN CANADA DURING SEPTEMBER, 1927

THE value of the building permits issued by 63 cities during September stood at $14,410,212; this was a decline of $15,241,676 or 51.4 per cent as compared with the exceptionally large total of $29,651,888 reported in August, but it was an increase of $3,362,709 or 30.4 per cent over the September, 1926, aggregate of $11,047,503. As was mentioned in the last issue, the high aggregate in August was chiefly due to authorizations for several unusually large undertakings in Montreal. The cumulative total for the first nine months of this year exceeds by nearly $22,000,000 that for the same months in 1926, the previous high level of this record which was commenced in 1920.

Some 50 cities furnished detailed statistics, showing that they had issued over 1,500 permits for dwellings estimated to cost approximately $7,000,000 and nearly 3,000 permits for other buildings valued at almost $7,000,000. During August, authority was granted for the erection of about 1,100 dwellings and 2,500 other buildings estimated at approximately $4,000,000 and $17,500,000, respectively.

Nova Scotia, New Brunswick, Ontario and Manitoba reported increases in the estimated value of building as compared with August, 1927, Ontario showing the greatest advance of $1,234,133, or 20.8 per cent, of the declines in the remaining provinces, that in Quebec of $15,842,505 or 80.3 per cent was most pronounced.

As compared with September, 1926, there were gains in New Brunswick, Quebec, Ontario, Manitoba and Alberta, of which that of $1,759,155, or 32.6 per cent, in Ontario was largest. In Nova Scotia, Saskatchewan, and British Columbia there were reductions, that of $639,141, or 58.8 per cent in Saskatchewan being most noteworthy.

Of the larger cities, Toronto, Winnipeg and Vancouver registered higher totals of permits issued than in either the preceding month or the corresponding month of last year, while in Montreal there was a decrease in the former comparison, but an increase in the latter. Of the other centres, New Glasgow, Sydney, Saint John, Quebec, Sherbrooke, Westmount, Belleville, Galt, Guelph, London, Oshawa, Ottawa, Peterborough, Port Arthur,

Cumulative Record for First Nine Months, 1927.—The table on page 1239 gives the value of the building authorized by 63 cities during September, and in the first nine months of each year since 1920. The average index numbers of wholesale prices of building materials in the first nine months of the years since 1920 are also given (1913-100).

The aggregate for the first nine months of this year was 13.2 per cent greater than in 1926, the previous high level of the record, while the average index numbers of wholesale prices of building materials continued to be lower than in any other year since 1920.

1920	9,842,677	96,146,278	215·1

FAIR WAGES CONDITIONS IN DOMINION GOVERNMENT CONTRACTS

THE Department has recently received information regarding certain contracts executed by the Government of Canada which included among their provisions the fair wages conditions sanctioned by Order in Council for the protection of the labour to be employed. The contracts (Group "A") awarded in connection with the works of construction contained the following fair wages clause:—

1. All mechanics, labourers, or other persons who perform labour in the construction of the work hereby contracted for, shall be paid such wages as are generally accepted as current from time to time during the continuance of the contract for competent workmen in the district in which the work is being performed for the character or class of work in which they are respectively engaged, and if there be no current rates in such district, then fair and reasonable rates, and shall work such hours as are customary in the trade in the district where the work is carried on, or if there be no custom of the trade as respects hours in the district, then fair and reasonable hours, unless for the protection of life and property, or for other cause shown to the satisfaction of the Minister of Labour, longer hours of service are required. The Minister of Labour may at any time and from time to time determine for the purposes of this contract, what are the current or fair and reasonable rates of wages and the current or fair and reasonable hours, and may from time to time rescind, revoke, amend, or vary any such decision, provided that his determination and any amendment or variation shall not be operative prior to the period of three months immediately preceding the date thereof.

Four of the contracts above mentioned contained schedules of rates and hours based on the current standards of the district in these respects. The schedules are given below.

Three contracts were awarded for interior fittings (Group "B") containing the general fair wages clause and other conditions for the protection of the labour employed, as sanctioned by the Fair Wage Order in Council which reads as follows:—

All workmen, labourers, or other persons who perform labour in the construction of the work hereby contracted for, shall be paid such wages as are generally accepted as current from time to time during the continuance of the contract for competent workmen in the district in which the work is being performed, and if there be no current rate in such district, then a fair and reasonable rate, and shall work such hours as those fixed by the custom of the trade as respects hours in the district where the work is carried on, or if there be no custom of the trade as respects hours in the district then fair and reasonable hours, except for the protection of life and property, or on due cause shown to the satisfaction of the Minister of Labour. In the event of a dispute arising as to what is the current or a fair and reasonable rate of wages or what are the current hours fixed by the custom of the trade or fair and reasonable hours it shall be determined by the Minister of Labour, whose decision shall be final; payment may also be withheld of any moneys which would otherwise be payable to the contractor until the Minister of Labour's decision has been complied with.

By the term "current wages" and the term "hours of labour fixed by the custom of the trade" in the foregoing are meant respectively the standard rates of wages and hours of labour either recognized by signed agreements between employers and workmen in the district from which the labour required is necessarily drawn or actually prevailing, although not necessarily recognized by signed agreements.

A statement was also received as to supplies ordered by the Post Office Department subject to the regulations for the suppressing of

the sweating system and the securing of fair wages, etc.

The general labour conditions sanctioned by the Fair Wages Order in Council are as follows:—

Where there are special circumstances which in the judgment of the Minister of Labour make it expedient that he should do so, he may, in the manner and subject to the provisions hereinabove set forth, decide what are the current or fair and reasonable rates of wages for overtime, and what is the proper classification of any work for the purposes of wages and hours. Immediately upon receipt of notice of any decision of the Minister of Labour hereunder the Contractor shall adjust the wages and hours and classification of work so as to give effect to such decision. In case the Contractor shall fail so to do, or to pay to any employee or employees for any services performed or for any hours of labour, wages according to the rates fixed therefor by the Minister of Labour, the Minister of Labour may authorize and direct the Minister to pay any such wages at the rates so fixed and to deduct the amount thereof from any moneys owing by the Government to the Contractor and any such payment shall for all purposes as between the Contractor and the Government be deemed and taken to be payment to the Contractor, and the Contractor shall be bound in every particular by any such authority, direction and payment as aforesaid. The powers of the Minister of Labour hereunder shall not be exercised as to any employee or employees where it is established to his satisfaction that an agreement in writing exists and is in effect between the Contractor and the class of employees to which such employee or employees belong or the authorized representatives of such class of employees fixing rates of wages, overtime conditions and hours of labour.

2. The Contractor shall post and keep posted in a conspicuous place on the premises where the contract is being executed, occupied or frequented by the workmen, the Fair Wages Clause or Schedule inserted in his contract for the protection of the workmen employed, also any decision of the Minister of Labour under the preceding paragraph.

3. The Contractor shall keep proper books and records showing the names, trades, and addresses of all workmen in his employ and the wages paid to and time worked by such workmen, and the books or documents containing such record shall be open for inspection by the Fair Wage Officers of the Government at any time it may be expedient to the Minister of Labour to have the same inspected.

4. The Contractor shall not be entitled to payment of any money which would otherwise be payable under the terms of the contract in respect of work and labour performed in the execution of the contract unless and until he shall have filed with the Minister in support of his claim for payment a statement attested by statutory declaration, showing (1) the rates of wages and hours of labour of the various classes of workmen employed in the execution of the contract; (2) whether any wages in respect of the said work and labour remain in arrears; (3) that all the labour conditions of the contract have been duly complied with; nor, in the event of notice from the Minister of Labour of claims for wages until the same are adjusted. The Contractor shall also from time to time furnish the Minister such further detailed information and evidence as the Minister may deem necessary in order to satisfy him that the conditions herein contained to secure the payment of fair wages have been complied with, and that the workmen so employed as aforesaid upon the portion of the work in respect of which payment is demanded have been paid in full.

5. In the event of default being made in payment of any money owing in respect of wages of any workmen employed on the said work and if a claim therefor is filed in the office of the Minister and proof thereof satisfactory to the Minister is furnished, the said Minister may pay such claim out of the moneys at any time payable by His Majesty under said contract and the amounts so paid shall be deemed payments to the Contractor.

6. These conditions shall extend and apply to moneys payable for the use or hire of horses or teams, and the persons entitled to payments for the use or hire of horses or teams shall have the like rights in respect of moneys so owing them as if such moneys were payable to them in respect of wages.

7. With a view to the avoidance of any abuses which might arise from the sub-letting of contracts it shall be understood that sub-letting, other than such as may be customary in the trades concerned is prohibited unless the approval of the Minister is obtained: sub-contractors shall be bound in all cases to conform to the conditions of the main contract, and the main Contractor shall be held responsible for strict adherence to all contract conditions on the part of sub-contractor; the contract shall not, nor shall any portion thereof be transferred without the written permission of the Minister; no portion of the work to be performed shall be done at the homes of the workmen.

8. All workmen employed upon the work comprehended in and to be executed pursuant to the said contract shall be residents of Canada, unless the Minister is of opinion that Canadian Labour is not available or that other special circumstances exist which render it contrary to the public interest to enforce this provision.

DEPARTMENT OF PUBLIC WORKS

Contracts in Group "A" (Construction, etc.)

Construction of a rock embankment at Woodwards Island, B.C. Name of contractors, The Fraser River Pile Driving Company, Limited, of New Westminster, B.C. Date of contract, October 19, 1927. Amount of contract, approximate expenditure, $32,334.70.

Trade or Class of Labour	Rates of wages not less than	Hours per day	Hours per week

Tarvia layers	4 25	8

Deepening inner berth at deep water wharf at Campellton, N.B. Name of contractor, Felix Michaud, Buctouche, N.B. Date of contract, October 17, 1927. Amount of contract, approximate expenditure, $4,800.

Construction of a public building at Kensington, P.E.I. Names of contractors, Major Schurman and Ambrose McInnis, Summerside, P.E.I. Date of contract, October 5, 1927. Amount of contract, $9,223.

Construction of a wharf at Sydney, N.S. Name of contractors, Cooke Construction Corporation, Montreal, P.Q. Date of contract, October 21, 1927. Amount of contract, unit prices, approximate expenditure, $59,755.

Construction of a breakwater wharf at Petite Rivière St. François, Charlevoix County, P.Q. Names of contractors, Aristide Maltais and Adjutor Simard, La Malbaie, P.Q. Date of contract, October 21, 1927. Amount of contract, unit prices, approximate expenditure, $16,370.

Deepening entrance channel at Valleyfield, P.Q. Name of contractors, "Les Chantiers Manseau," Sorel, P.Q. Date of contract, September 28, 1927. Amount of contract, approximate expenditure, $40,000.

Dredging areas A. B, C, at Verchères, P.Q. Name of contractors, "Les Chantiers Manseau," Sorel, P.Q. Date of contract, September 27, 1927. Amount of contract, approximate expenditure, $7,842.

Construction of a guide pier at Muskoka Narrows, District of Muskoka, Ont. Name of contractor, Walter C. Brough, Toronto, Ont. Date of contract, October 20, 1927. Amount of contract, unit prices, approximate expenditure, $3,060.14.

Construction of a wharf at Ile-Aux-Coudres, P.Q. Names of contractors, Aristide Maltais and Adjutor Simard, La Malbaie, P.Q. Date of contract, October 22, 1927. Amount of contract, unit prices, approximate expenditure, $10,437.30.

Repairs to the wharf at Deschaillons (St. Jean Deschaillons) Lotbinière County, P.Q. Name of contractor, Alfred Gigoire, Shawinigan Falls, P.Q. Date of contract, October 14, 1927. Amount of contract, $6,800.

Reconstruction of the Pontbriand Wharf at Sorel, Richelieu County, P.Q. Name of contractors, Jackson Construction Company, Limited, Sorel, P.Q. Date of contract, October 10, 1927. Amount of contract, unit prices, approximate expenditure, $29,509.63.

Construction of a wharf at St. Simon, Gloucester County, N.B. Name of contractors, John W. McManus Company, Limited. Memramcook, N.B. Date of contract, October 15,

1927. Amount of contract, unit prices, approximate expenditure, $25,245.

Construction of a wharf at Cap de la Madeleine, Champlain County, P.Q. Name of contractors, Napoléon Trudel and Joseph Trudel, Ste. Irénée, P.Q. Date of contract, October 15, 1927. Amount of contract, unit prices, approximate expenditure, $10,937.

Docking, cleaning, painting and repairing of dredge P.W.D. No. 305 (King Edward). Name of contractors, Burrard Shipyard and Engineering Works, Limited, Vancouver, B.C. Date of contract, October 11, 1927. Amount of contract, $7,875.

Repairs and improvements to, and the reconstruction of a portion of the wharf at Grande Rivière, County of Gaspé, P.Q. Name of contractor, Arthur Nadeau, Chandler, P.Q. Date of contract, October 11, 1927. Amount of contract, unit prices, approximate expenditure, $18,395.20.

Construction of breakwaters and breastworks at Tracadie Harbour, N.B. Names of contractors, J. W. McMulkin and F. R. Fox, Upper Gagetown, N.B. Date of contract, October 11, 1927. Amount of contract, unit prices, approximate expenditure, $16,307.

Construction of a breakwater at Blue Cove, Gloucester County, N.B. Name of contractor, Charles L. Comeau, Caraquet, N.B. Date of contract, October 4, 1927. Amount of contract, unit prices, approximate expenditure, $21,393.20.

Construction of an extension to the wharf at Cap Chat, Gaspé County, P.Q. Name of contractors, Ludger Lemieux, Limitée, Ste. Marie de la Beauce, P.Q. Date of contract, October 8, 1927. Amount of contract, unit prices, approximate expenditure, $31,800.

Construction of a public building at Rockland, Ont. Names of contractors, Ferdinand Houle of Rockland, Ont., and Edouard Brunet, Ottawa, Ont. Amount of contract, $16,990.

Reconstruction of the wharf at Choisy, Vaudreuil county, P.Q. Names of contractors, Louis Lamarre and Hormidas Gravel, St. Lambert, P.Q. Date of contract, September 29, 1927. Amount of contract, unit prices, approximate expenditure, $4,580.

Contracts in Group "B" (Interior Fittings).

Alterations and additions to interior fittings, Post Office at Kenora, Ont. Name of contractors, The J. T. Schell Company, Alexandria, Ont. Date of contract, October 4, 1927. Amount of contract, $925.

Supply and installation of line conveyors in Terminal Postal Station "A", Toronto, Ont. Name of contractors, The Robert Mitchell Company, Limited, Montreal, P.Q. Date of contract, October 22, 1927. Amount of contract, $28,100.

Alterations to the heating equipment in the Examining Warehouse, Post Office and Winch Building, Vancouver, B.C. Names of contractors, Barr and Anderson Limited, Vancouver, B.C. Date of contract, September 2, 1927. Amount of contract, $13,950.

Post Office Department

The following is a statement of payments made in October, 1927, for supplies ordered by the Post Office Department, under contracts which are subject to the Fair Wages policy:—

Nature of Orders	Amount of Orders
Making metal dating stamps and type, also other hand stamps and brass crown seals	$1,148 01
Making and repairing rubber stamps, daters, etc.	177 19
Making up and supplying letter carriers' uniforms, etc.	8,017 93
Stamping pads, ink, etc.	382 65
Bag fittings	12,679 35
Scales	673 95
Mail bagging	9,663 21
Letter boxes	2,278 49
Rural mail boxes	17,777 00

International Congress on Industrial Relations

The International Association for the Study and Improvement of Human Relations and Conditions of Industry, a new organization having its headquarters at The Hague, Holland, will hold its first triennial congress at Girton College, Cambridge, England, from June 28 to July 3. The subject of the congress will be: The Fundamental Relationship between All Sections of the Industrial Community. The aim of this association is indicated by its title. Membership is open to all who are engaged in any undertaking involving the employment of persons, or who are occupied in work of scientific research or social significance bearing on industry, and who are in sympathy with the aims of the association.

At the present time the association draws its members from 26 countries, thus giving a wide scope to its studies and findings. The program of the congress containing all particulars will be published early in the New Year. Persons desiring to receive a copy should communicate with the secretariat headquarters now situated at The Hague, Holland (Javastraat 66).

PRICES, RETAIL AND WHOLESALE, IN CANADA, OCTOBER, 1927

Cost of Living, Prices of Staple Articles and Index Numbers

PRICES moved to slightly higher levels during the month, both the weekly family budget in terms of retail prices and the Dominion Bureau of Statistics index number of wholesale prices being somewhat higher than in September.

In retail prices the cost per week of a list of twenty-nine staple foods for an average family of five in terms of the average retail prices in some sixty cities was $10.99 at the beginning of October, as compared with $10.87 for September; $10.93 for October, 1926; $10.89 for October, 1925; $10.31 for October, 1924; $10.65 for October, 1923; $10.23 for October, 1922; $11.48 for October, 1921; $15.83 for October, 1920; $16.92 for June, 1920 (the peak); $13.54 for October, 1918; and $7.99 for October, 1914. The increase was due mainly to seasonal advances in the price of eggs, milk and butter, although the prices of rolled oats, rice, beans, mutton, pork, bacon and lard were somewhat higher. Potatoes were considerably lower, with less important decreases in the prices of beef, veal, flour, evaporated apples, prunes and yellow sugar. Including the cost of fuel and rent with that of foods the total budget averaged $21.18 at the beginnig of October, as compared with $21.05 for September; $21.14 for October, 1926; $21.11 for October, 1925; $20.67 for October, 1924; $21.16 for October, 1923; $20.87 for October, 1922; $22.01 for October, 1921; $26.46 for October, 1920; $26.92 for July, 1920 (the peak); $21.48 for October, 1918; and $14.48 for October, 1914. Fuel was slightly higher, due mainly to an increase in the price of anthracite coal. An increase in rent was reported from Nelson.

In wholesale prices the index number calculated by the Dominion Bureau of Statistics, based upon the average prices of 236 commodities in 1913 as 100, and weighted according to the commercial importance of the commodities, advanced to 152.4 for October, as compared with 151.4 for September, 151.3 for October, 1926; 156.0 for October, 1925; 157.0 for October, 1924; 153.1 for October, 1923; 148.1 for October, 1922; 155.6 for October, 1921; 236.3 for October, 1920; 256.7 for May, 1920 (the peak); and 206.9 for October, 1918. Thirty-eight prices quotations were higher, forty-five were lower, while one hundred and fifty-three were unchanged.

In the grouping according to chief component materials two of the eight main groups advanced, two declined, while four were practically unchanged. The Animals and their Products group and the Textiles and Textile Products group advanced; the former due to increases in the prices of butter, milk, eggs, sole leather, mess pork and cattle, which more than offset declines in the prices of fresh meat, fowl, bacon and muskrat skins; and the latter due to increases in the prices of cotton textiles, raw wool and hessian, which more than offset declines in the prices of raw cotton, raw silk and jute. The Vegetables and their Products group was lower, due mainly to lower prices for grains, flour, shorts, raw sugar, rosin, turpentine and straw, which more than offset higher prices for foreign fruits, rubber, cocoa beans, coffee and potatoes. A decline in steel sheet prices was mainly responsible for the decline in the Iron and its Products group. The level of the Non-Ferrous Metals group was unchanged, the prices of lead, tin, spelter and solder declining, while the prices of silver and some copper products advanced. The Wood and Wood Products group, the Chemicals and Allied Products group and the Non-Metallic Minerals group were practically unchanged.

In the grouping according to purpose consumers' goods were somewhat higher, declines in the prices of flour, oat products, beef and bacon being more than offset by higher prices for milk, butter, eggs, foreign fruits, potatoes and canned vegetables. Producers' goods were slightly lower, materials for the textile and clothing industry, for the leather industry and for the meat packing industries advancing, while materials for the fur industry, for the metal working industries, for the milling and other industries, as well as miscellaneous producers' materials, declined.

In the grouping according to origin raw or partly manufactured goods advanced, higher prices for eggs, milk, potatoes, foreign fruits, wool and silver more than offsetting lower prices for grains, raw sugar, silk, cotton and some non-ferrous metals. Fully or chiefly manufactured goods were unchanged, advances in the prices of mess pork, butter, cotton goods and hessian being offset by declines in the prices of flour, rolled oats, oat meal, bacon and no-ferrous metal products. Domestic farm products and articles of marine origin advanced. Articles of mineral origin were slightly lower and articles of forest origin were unchanged.

The Canadian Bank of Commerce index of wholesale prices of about 80 commodities, based upon prices in 1923, and weighted according to the physical volume of production of each commodity advanced slightly, being 96.06 for October, as compared with 95.76 for September.

EXPLANATORY NOTE AS TO WHOLESALE PRICES

The index number calculated by the Dominion Bureau of Statistics is based upon the prices of 236 commodities, price levels in 1913 being taken as the base, that is equal to 100, the figures being weighted according to the commercial and industrial importance of each article included. The index number has been calculated by years back to 1890, being unweighted, however, for the period of 1890 to 1913 and has been calculated by months from 1919 to date for all groupings and from 1913 to date for the principal grouping. Summary tables of the Bureau's index number may be found in the supplement to the LABOUR GAZETTE for January, 1925, January, 1926, and in greater detail in the Report on "Prices and Price Indexes 1913-24," issued by the Bureau. A description of the methods used in the construction of the index number appears in the LABOUR GAZETTE for June, 1923.

The accompanying table gives the index numbers of the Dominion Bureau of Statistics by the principal groups in the three methods of classification and with those of the classification according to purpose or use in detail for the current month and for certain preceding dates.

EXPLANATORY NOTES AS TO RETAIL PRICES

The table of retail prices and rentals shows the prices at the beginning of October of seventy-one staple foodstuffs, groceries, coal, wood and coal oil and the rent for six-roomed houses in some sixty cities throughout Canada. All prices are for delivered goods. The exact quality, for which the quotation is given is set forth in the case of each commodity, and every effort has been made to ensure that the quotations in each case refer to the same class of commodity in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The prices of foods and groceries in each city, except milk and bread, are the averages of quotations reported to the Department and to the Dominion Bureau of Statistics by a number of representative butchers and grocers in each. The prices of fuel and the rates for rent are reported by the correspondents of the LABOUR GAZETTE.

Statistics similar to these were published each month from 1910 to 1920, the figures during this period being secured at the middle of each month by the correspondents of the LABOUR GAZETTE resident in each locality from dealers doing a considerable business with workingmen's households. From 1910 to 1915 the table contained a list of only the twenty-nine foods included in the family budget, with laundry starch, coal, wood, coal oil and rent. In 1915 when monthly publication of the budget in the LABOUR GAZETTE was begun, it was decided to extend the list of foods to 40, and in 1920 the list of foods and groceries was still further extended to include over 100 items.

Beginning with October, 1922, a number of commodities were dropped from the list, and in the case of a number of articles the average prices of the grades most sold have been given, owing to the impossibility of securing prices for uniform grades for the various cities from month to month.

Oleomargarine was dropped in March, 1924, the provision for its manufacture and sale since 1917, notwithstanding the Dairy Act, expired at the end of February, 1924.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workingmen. The first class is of houses in good condition, favourably located in such districts with good modern conveniences. The second class is of houses in fair condition less desirably located, but still fairly central, without modern conveniences.

The weekly budget of a family of five, calculated in terms of the average prices in the cities for which reports are received, includes twenty-nine staple foods, laundry starch, coal, wood, coal oil, and rent, these being the items for which statistics have been obtained each month and published in the LABOUR GAZETTE since January, 1910. The quantities of each commodity included are modifications of those employed in similar calculations by various authorities. For some articles comparatively large quantities are included owing to the absence of other important items of the same class. For instance, the only fruits are evaporated apples and prunes, and the only fresh vegetable is potatoes. But as market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportions of expenditure on the various classes of foods tends to be maintained. At times when the price of an article heavily weighted for this purpose rises, or falls (abnormally) the increase (or decrease) in food prices so indicated is exaggerated, and this should be taken into account in using the budget as an indicator of changes in the cost of living. In fuel and lighting the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the differences in the heating value of the various fuels. It was estimated, when the budget was first published in 1912 in the report on wholesale prices in Canada for 1911, that these calculations represented from sixty to eighty per cent of the expenditures of an ordinary family, according to the total income. For the average family of five the expenditure on these items of food, fuel, light and rent would be perhaps two-thirds or about sixty-five per cent of the total income.

While the budget serves to show the increase or decrease from time to time in the cost of the items included, it does not purport to show the minimum cost of food and fuel supplies for an average family in the Dominion or in any one province. The quantities of meats, dairy products, cereals, etc., included were adopted as affording a liberal supply for the healthy family of a man at hard physical work. On the other hand an average family with an income sufficient to do so would buy less meat, etc., but more fruit, fresh and canned vegetables, etc., so that comparative expenditure would be little changed.

Index Number of Changes in the Cost of Living

In March, 1921, the Department published in the LABOUR GAZETTE a table of percentages of changes in the cost of living since 1913 as a tentative cost of living index number, using the figures of the above mentioned budget for the calculation for food, fuel and rent, with preliminary figures for clothing and sundries added and this table has been brought down to date at intervals since. The calculation of a comprehensive cost of living index number covering all items of working men's family expenditure in progress since 1918 has been sufficiently advanced to enable the publication of preliminary figures by groups in a supplement to the LABOUR GAZETTE for January on Prices in Canada and in Other Countries, page 9. This table gives figures for June and December each year from 1914 to 1926, inclusive. Figures are now available also for March and September each year since 1917 and the accompanying table gives figures for December each year from 1914 to 1917, quarterly figures 1918 to 1926, and monthly figures for 1927. As stated in the above mentioned supplement the figures in the food group in the family budget are still used to show the changes in food prices but in the other groups the percentage changes in the prices of each article have been weighted according to workingmen's average family consumption, and in the fuel and light group, gas and electricity have been included.

Cost of Electric Current and Gas for Householders

With rates in 1913 as 100, index numbers of electric light rates were 1900, 141.4; 1905, 135.6; 1910, 118.1; 1911, 113.4; 1912, 109.1; 1913, 100.0; 1914, 96.5; 1915, 90.8; 1916, 87.6; 1917, 87.2; 1918, 85.8; 1919, 85.8; 1920, 84.2; 1921, 84.9; 1922, 82.7; 1923, 79.5; 1924, 79.2; 1925, 75.6; 1926, 75.6.

The above figures were arrived at by converting to the base of 1913 as 100, an index number of electric current costs from 1900 to 1913 constructed for the Board of Inquiry into the cost of living in Canada, 1914-15 (Report, Vol. 2, page 318) and bringing the figures down to 1926. The figures are unweighted. The Dominion Bureau of Statistics has recently issued an index number of electric current rates for household consumption as follows: 1923, 73.8; 1924, 72.2; 1925, 69.9; 1926, 68.7. This index number is weighted according to consumption in each city. When the above index number, 1900-1926, is weighted according to population in each city covered for the years 1923, 1924, 1925 and 1926, the figures are substantially the same as those recently issued by the Bureau.

The following are index numbers of rates for manufactured and natural gas for the years 1913 to 1926 issued by the Dominion Bureau of Statistics (revised, Prices and Price Indexes, 1913-1926): Manufactured gas, 1913, 100; 1914, 98.3; 1915, 98.1; 1916, 96.3; 1917,

(Continued on page 1255)

‡The budget is intended to show the changes in the cost of the items included, not to show the minimum cost for an average family. See Text. †December only. §Kind most sold. *For electric light see text.

‡‡An allowance for the cost of clothing and sundries would increase the figures by about 50 per cent; see text.

lows: 1900, 125.8; 1901, 125.8; 1902, 125.8; 1903, 125.2; 1904, 123.9; 1905, 120.1; 1906, 107.5; 1907, 108.8; 1908, 106.9; 1909, 105.7; 1910, 103.8; 1911, 99.4; 1912, 100.6; 1913, 100.0.

Retail Prices

Beef prices were again generally lower sirloin steak being down from an average of 31.7 cents per pound in September to 30.8 cents in October; round steak from 26.0 cents per pound in September to 25.4 cents in October; rib roast from 23.9 cents per pound in September to 23.7 cents in October; and shoulder roast from 17.4 cents per pound in September to 17.2 cents in October. Veal also declined slightly, averaging 20.5 cents per pound. Mutton was up from an average of 28.8 cents per pound in September to 29 cents in October. Both fresh and salt pork were slightly higher, the former averaging 28.5 cents per pound and the latter 26.6 cents. Bacon was slightly higher, being up from an average of 38.5 cents per pound in September to 38.8 cents in October. In fresh fish cod steak, halibut and white fish advanced slightly. Salt cod fish and finnan haddie were somewhat lower.

Eggs advanced in practically all localities, fresh averaging 52.6 cents per dozen in October, as compared with 46.3 cents in September and 40.3 cents in August, and cooking averaging 47 cents per dozen in October, 42.2 cents in September and 36.7 cents in August. Milk was up from an average of 11.7 cents per quart in September to 11.9 cents in October. Higher prices were reported from Sorel, Montreal, Toronto, Brantford, London, Port Arthur, Fort William, Saskatoon, Edmonton and Lethbridge. Butter showed a general advance, dairy averaging 41.6 cents per pound in October, as compared with 39.3 cents in September, and creamery averaging 46.3 cents per pound in October, as compared with 44.1 cents in September. Cheese increased slightly to 31.3 cents per pound.

Bread and soda biscuits were unchanged in the average. Flour was slightly lower averaging 5.3 cents per pound in October, as compared with 5.4 cents in September. Rolled oats and rice were slightly higher. Canned vegetables were unchanged. Onions were substantially lower at an average price of 4.8 cents per pound. Declines occurred in most localities. Potatoes were lower in practically all localities and averaged $1.58 per ninety pounds in October, as compared with $1.78 in September. Prunes fell from 14.7 cents per pound in September to 14.6 cents in October. Coffee and tea showed little change. Anthracite coal averaged $16.32 per ton in October, as compared with $16.26 in September. Higher prices were reported from Windsor, N.S., Moncton, St. John, N.B., Quebec, Oshawa, Orillia, St. Catharines and Kitchener. Bituminous coal showed little change at an average price of $10.16 per ton. Coke advanced slightly averaging $13.14 per ton. Wood showed little change, hard averaging $12.07 per cord and soft $8.98. Matches were down from an average of 11.6 cents per box to 10.9 cents. An increase in rent was reported from Nelson.

Wholesale Prices

The following is a summary of a statement on wholesale prices changes during the month issued by the Dominion Bureau of statistics.

Slightly lower levels for wheat prevailed during October, No. 1 Manitoba Northern cash wheat, Fort William and Port Arthur basis, averaging $1.44 per bushel as compared with $1.45 in September. The low price for the month was $1.38⅞ reached at the beginning and the high $1.51⅛ reached about the middle of the month. Favourable weather conditions during the latter part of October contributed to the downward movement. Coarse grains also were somewhat lower, western barley at Winnipeg being 78¼ cents per bushel in October, as compared with 79 cents in September; western oats 63¾ cents per bushel in October and 64¾ cents in September; flax seed $1.88 per bushel in October and $1.95 in September; American corn $1.02 per bushel in October and $1.13 in September; and Ontario peas $1.50 per bushel in October and $1.55 in September. Ontario rye advanced from 89 cents per bushel to 93 cents. Flour moved in sympathy with wheat, the price at Toronto being down from $8.25 per barrel to $7.94. Shorts at Toronto fell from $36.25 per ton to $33.05. Lemons were up from $6-$6.50 per case to $10-$12. Bananas advanced from $3.50 per bunch to $4.75-$5.25. Oranges were also slightly higher at $9.50 per box as compared with $9.25 in September. Raw sugar at Montreal was down from $4.33 per cwt. to $4.26. Potatoes were slightly higher in most localities, the price at Montreal being up from $1.19 per bag to $1.20, at Toronto from $1.33 per bag to $1.49, and at St. John from $2.89 per barrel to $3-$3.25. Cotton seed oil rose 1 cent per pound to 14½ cents. Turpentine was down from $1.02 per gallon to 93 cents. Rosin declined 50 cents per barrel to $13.50. Western cattle at Winnipeg showed little change from the levels in September. Choice steers at Toronto were up from $8.02½ per hundred pounds to $8.14. Hogs at Toronto fell from $11 per hundred pounds in September to $10.31 in October. Bacon was down from 25-26 cents per pound to 24½ cents. Beef, hindquarter, declined from $18 per hundred pounds to $17.60, while mess pork advanced from $33.50 per barrel to

$35.50. At Montreal the price of milk to producers advanced from 21 cents per gallon to 29 cents. Finest creamery butter at Montreal rose from 41 cents per pound to 42 cents. Fresh eggs at Toronto were up from 52-56 cents per dozen to 55-60 cents, and storage from 41½ cents per dozen to 42¼ cents. Raw cotton at New York was down from 21.9 cents per pound in September to 20.9 cents in October. The high price for the month was 21.8 cents at the beginning and the low 19.9 cents reached on the 24th. The higher prices prevailing for raw cotton during recent months was reflected in advances in manufactured cottons. Blue denim was up from 46 cents per pound to 58 cents, ticking from 49½ cents per pound to 59 cents, shirting from 61 cents per pound to 64 cents, and saxony from 68½ cents per pound to 72½ cents.

PRICES IN GREAT BRITAIN AND OTHER COUNTRIES

THE following notes give the latest information available as to the movements of prices in Great Britain and other countries. The index numbers of retail prices are from official sources unless otherwise stated. The authorities for the wholesale prices index numbers are named in all cases.

Great Britain

WHOLESALE PRICES.—The Board of Trade index number, on the base 1913=100, was 142.1 for September, an advnce of 0.8 per cent over the August level. Foodstuffs rose 1.4 per cent owing to an advance in meat and fish. Non-foods rose 0.5 per cent, the chief change being an advance of 5.5 per cent in cotton. Other groups showed only slight changes. On the base average prices in 1924 =100, the index number for September was 85.5.

The *Statist* index number (in continuation of Sauerbeck's figures) was 121.5 in September, being 1.1 per cent below the level of the previous month. Foodstuffs declined 1.8 per cent owing chiefly to a decline of 4.6 per cent in vegetable foods. Materials declined 0.5 per cent with slight declines in all groups.

The *Economist* index number, on the base 1901-05=100, was 183.5 in September, showing a decline of 0.8 per cent for the month. A decline in foods was due to favourable crop reports in all cereals, but there were rises in potatoes, mutton and pork and in butter and tea. Textiles and minerals declined and the miscellaneous group showed a slight advance.

COST OF LIVING.—The index number of the Ministry of Labour, on the base July 1914= 100, was 167 at October 1, as against 165 at September 1. Foods rose 4 points to 161 and other groups showed no change.

Denmark

WHOLESALE PRICES.—The index number of the Department of Statistics for September was 153, showing no change from the previous month. Advances in animal foods, textiles and clothing and hides, leather and footwear were offset by declines in vegetable foods, fuel and oil, metals and metal products, while the groups fodder, fertilizers, lime, cement bricks and glass, wood and paper and chemicals were unchanged.

France

WHOLESALE PRICES.—The index number of *Statistique Générale,* on the base July 1914= 100, was 613 in September, showing a decline of 2.9 per cent from the August level. Both native products and imports declined 1.8 per cent. Foods declined 4.7 per cent with declines in all groups and industrial materials declined 1.5 per cent, also with declines in all groups.

COST OF LIVING.—The official index number of cost of living, Paris, on the base 1914= 100, was 507 for the third quarter of 1927, a decline of 3.4 per cent from the previous quarter. Foods declined 6.1 per cent, heat and light and rent advanced, clothing declined slightly and sundries were unchanged.

Germany

WHOLE.ALE PRICES.—The index number of the Federal Statistical Office, on the base 1913 =100, was 139.7 for the monthly average for September, an advance of 1.3 per cent over the August level. Agricultural products advanced 1.5 per cent, colonial products 1.1 per cent, industrial raw materials and semi-manufactured goods 0.8 per cent, and manufactured goods 1.6 per cent.

COST OF LIVING.—The official index number for September, on the base 1913-14=100, was 147.1 as against 146.6 for August, an advance of 0.3 per cent with slight advances in all groups with the exception of rent, which remained unchanged.

Italy

WHOLESALE PRICES.—The index number of the Chamber of Commerce, Milan, on the base 1913=100, was 483.88 for September, showing a decline of 0.3 per cent from the July level. Foods fell 0.7 per cent with a

decline in vegetable foods and an advance in animal foods; industrial materials fell 0.2 per cent with declines in chemical products, minerals and metals, structural materials and miscellaneous industrial materials and advances in textiles and miscellaneous vegetable products.

Switzerland

COST OF LIVING.—The official index number on the base June 1914=100 was 161 for September, an advance of one point over the previous month. Of the 70 articles in the budget, 32 showed no change, 22 rose and 16 declined from the previous month. There was no change in the index number for rent.

New Zealand

WHOLESALE PRICES.—The index number of the Census and Statistics Office, on the base average annual aggregate expenditure, four chief centres, 1909-13=1,000, was 1,540 for August, a decline of one point from the July level. Textile manufactures and animal products rose, while foodstuffs of vegetable origin, wood and wood products, metals and their products, non-metallic minerals and products and chemicals declined.

COST OF LIVING.—The index number of the Census and Statistics office on the base July 1914=1,000 was 1,610 for August, 1927, a decline of 7 points from the May level. In the food group groceries and dairy products declined while meat rose. Rent increased while fuel and light, clothing and the miscellaneous groups declined.

United States

WHOLESALE PRICES.—The United States Bureau of Labour Statistics has issued a revision of its index numbers of wholesale prices. The base has been changed to 1926 = 100, and the basis of the weighting used is the average quantity of each commodity entering into the market for the years 1923 to 1925. The number of articles has been increased from 404 to 550. The following table gives the revised index numbers of wholesale prices, by groups of commodities, semi-annually, for 1923 to 1925, quarterly for 1926 and monthly for 1927. The revised figures are to be carried back for earlier years.

The *Annalist* index number of wholesale commodity prices, on the base 1913 = 100, was 148.8 for October, showing an increase of 0.7 per cent over the September level. There were advances in farm products, food products and the miscellaneous group, with declines in textile products, fuels, metals and building materials, while chemicals remained unchanged.

COST OF LIVING.—The index number of the National Industrial Conference Board, on the base July 1914 = 100, was 162.0 for August, a decline of 0.2 points from the July level. Food and the sundries group declined one point, while shelter, clothing and fuel and light rose one point.

The index number of the Massachusetts Special Commission on the Necessaries of Life, on the base 1913=100, was 158.4 for September, as compared with 158.0 for August. There were slight increases in food, clothing, fuel and light, while shelter and sundries were unchanged.

U.S. BUREAU OF LABOUR STATISTICS—REVISED INDEX NUMBERS OF WHOLESALE PRICES, BY GROUPS OF COMMODITIES 1923 TO 1927 (1926=100)

FATAL INDUSTRIAL ACCIDENTS IN CANADA DURING THE THIRD QUARTER OF 1927

THE number of fatal industrial accidents, and such fatalities from industrial diseases as are included with fatal accidents by workmen's compensation boards, etc., recorded in the Department as occurring during the third quarter of 1927, was 431, there being 122 in June, 198 in July and 111 in August. In the third quarter of 1926, 435 fatal accidents have been recorded. In this report it is the custom to record industrial accidents under the dates of the occurrence of the accidents, and fatal industrial diseases under the dates on which they prove fatal.

Reports were received from the Workmen's Compensation Boards, the Board of Railway Commissioners, and certain other official sources; from certain large employers of labour and from the correspondents of the LABOUR GAZETTE. Reports of accidents were also recorded from local newspapers.

By industrial groups, the fatalities occurred as follows: agriculture, 60; logging, 33; fishing and trapping, 96; mining, non-ferrous smelting and quarrying, 45; manufacturing, 27; construction, 58; transportation, 67; trade, 7; service, 38. Of the mining accidents, 14 were in metalliferous mining, 22 in coal mining, 6 in non-metallic mineral mining and 3 in structural materials. Of the accidents in manufacturing, 2 were in the group, vegetable foods, 3 in animal foods, one in boots and shoes, one in pulp, paper and paper products, 7 in saw and planing mills, 2 in wood products, 8 in iron, steel and products, and 3 in non-metallic mineral products. In construction, there were 23 accidents in buildings and structures, one in shipbuilding, 11 in bridge and highway, 6 in railway, and 17 in miscellaneous construction. In transportation and public utilities, there were 33 fatalities in steam railways, one in air transportation, 15 in water transportation, 7 in local transportation, one in storage, 7 in electricity and gas and 3 in telegraphs and telephones. In trade, there were 7 fatalities, 4 in wholesale and 3 in retail. There were 38 fatalities in service, of which 26 were in public administration, 10 in personal and domestic and 2 in professional service.

Of accidents involving a number of fatalities, the most notable was that of the crews of the Nova Scotian fishing schooners lost in the storm of August 24. Four large schooners were lost, the "Joyce Smith" with a crew of about 19, of whom 3 were from Nova Scotia and 16 from Newfoundland, the "Mahalla" with a crew of 20; the "Clayton Walters", with 20, and the "Uda Corkum" with 21; ten other fishermen on several small boats were lost in the same storm. In addition to these, 18 other Nova Scotian fishermen, part of the crew of the "Columbia", a Gloucester, Massachusetts schooner, were lost in this storm, but are not included in the statistics.

In logging, at Cowichan Lake, B.C. on September 10, two loggers who were attempting to strengthen the support of a skyline, were instantly killed when the tree gave way and the skyline swung free, crushing them against the next tree. Three loggers were drowned near Latchford, Ontario, on September 21, when the improvised scow in which they were moving from one camp to another, capsized. In construction, at Cottonwood Flats, B.C. on September 26, two steam shovel operators were killed, and two other workers injured when the steam shovel overturned, owing to a landslide. On a bridge under construction near Entrance, Alberta, on July 23, the superintendent of the construction gang and 3 structural iron workers were killed. While they were lowering a girder, the derrick car overturned, crushing one man beneath it; the other three men were thrown from the bridge and drowned. At Limoilou, Quebec, on July 27, two labourers were drowned when a tower on the concrete mixing barge on which they were working fell over, thereby overturning the barge. In railway transportation, at Dalemead, Alberta, on September 7, an engineer and a fireman were killed in a head-on collision of two passenger trains. In service, public administration, near Hilbre, Manitoba, on July 11, a pilot, a mechanic and a surveyor were victims of an explosion of a government hydroplane in mid-air, the plane crashing to the ground and the three men being instantly killed. An explosion on the Canadian Government Merchant Marine steamer, "Canadian Carrier" off Halifax, N.S. on September 24 resulted in the deaths of three oilers. A main stop valve blew off, filling the compartment with steam; one man died immediately and the other two within a few days.

Supplementary lists of accidents.—The supplementary lists of accidents occurring in 1926, to be found after the main table of accidents, contains only one fatality, that of a metal miner in British Columbia, who was injured in an explosion in December, 1926, and died in May, 1927. The supplementary list of accidents occurring in the first half of 1927 includes 18 fatalities, of which 6 were in logging, one in fishing and trapping, 5 in mining, 3 in manufacturing, one in construction and 2 in transportation and public utilities. One accident occurred in February, one in March, 2 in April, 4 in May and 10 in June.

FATAL INDUSTRIAL ACCIDENTS IN CANADA DURING THE THIRD QUARTER OF 1927

Trade or Industry	Locality	Date	Age	Cause of Fatality
AGRICULTURE AND STOCKRAISING—				
Farmer	Shawville, Que.	July 2	49	Struck by lightning.
Farmer	Arkona, Ont.	" 2	.....	While driving load of hay into barn, beam struck his head. Died July 5.
Farmer	Viking District, Alta.	" 5	.....	While making repairs beneath car engine, it dropped on his head.
Farmer	St. Malachie, Que.	" 8	46	Struck by falling tree.
Fruit grower	St. Catharines, Ont.	" 8	66	Fell from cherry tree.
Farm labourer Farm labourer	Near Wetaskiwin, Alta.	" 8 " 8	....	Crushed when gale blew down granary where they slept.
Farm hand	Osaca, Ont.	" 10	21	Attacked by bull while driving cows.
Farmer's son	Port Hope, Ont.	" 11	21	Gored by bull.
Farmer	Near Brantford, Ont.	" 12	47	Pulling on hay fork trip rope, which parted and threw him off load of hay to ground.
Farmer's son	Becton, Ont.	" 13	28	Struck by lightning.
Farmer	Bayham Tp., Ont.	" 15	45	Struck by a tree while felling same.
Farmer's wife	Nesbitt, Man.	" 15	68	Trampled by cow.
Farm hand	Camrose, Alta.	" 18	22	Crushed by tractor which sank in mud and turned over.
Farmer	Brompton Tp., Que.	" 19	39	Struck by falling trees.
Farmer's son	Rolau, Sask.	" 20	19	Struck by lightning while ploughing.
Farmer's son	Elphinstone, Man.	" 20	15	Took refuge from rain in barn which was struck by lightning and collapsed, crushing boy.
Farmer's son	Willowbrook, Sask.	" 20	19	Struck by lightning while driving team.
Farmer	St. Gabriel de Brandon, Q.	" 24	52	Electrocuted as he touched fence through which current from near-by short circuit was passing.
Farmer	Near Innisfail, Alta.	" 25	.....	Struck by lightning while driving team.
Farmer	Near Camlachie, Ont.	" 26	59	Fell from binder, owing to heart attack; dragged by horses.
Farmer's son	Near Lakeside, Ont.	" 27	18	Struck by lightning .
Farm labourer	South Dumfries, Ont.	" 28	.....	Owing to dizziness he fell from a hay-mow.
Farmer	Townsend, Ont.	" 29	38	Struck by lightning while driving tractor.
Farmer	Gananoque, Ont.	" 31	72	Trampled by cows.
Farmer's son	St. Sulpice, Que.	Aug. 1	18	Was moving obstruction from blade of mower, when horses started to move and he was caught in knives.
Farmer	Near Sperling, Man.	" 1	50	While turning into gate on load of hay, team ran away; was thrown to ground and run over.
Farmer	Alberni, B.C.	" 1	70	Kicked by cow.
Truck driver	Near Oshawa, Ont.	" 2	66	Struck by motor car.
Farmer	Hantsford, N.S.	" 3	46	While operating a mowing machine, horses ran away, throwing him beneath machine.
Farmer	Roslin, Ont.	" 4	50	Injured when horses on hay rake ran away.
Farmer's son	Enterprise, Ont.	" 4	.....	Pierced by fall of hay fork while repairing same.
Farm hand	Inverary, Ont.	" 5	48	While hoeing was crushed by horse.
Truck farmer Farm hand	Near Hamilton, Ont.	" 8 " 8	 17	Truck struck by radial car. Boy died of injuries Aug. 10.
Farmer	Echo Bay, Ont.	" 10	69	Fell from hay rake, striking head on a wheel.
Farmer	Near Arthur, Ont.	" 11	.....	Was helping to tear down barn, which collapsed, crushing him.
Farmer Farmer's son	Near Braddock, Sask.	" 12 " 12	....	Asphyxiated by gas while drilling well.
Farmer	Chicoutimi, Que.	" 16	.....	Unloading milk cans, which fell, crushing him.
Farmer	Maple Creek, Sask.	" 20	32	Struck by lightning while loading hay.
Farmer	St. Isidore de Prescott, Que.	" 23	.....	While repairing hay presser was kicked in face by the horses and caught in machine when horses ran away.
Farm hand	Near Belleville, Ont.	" 25	51	Carried to roof of barn by grain carrier rope; fractured skull. Died Aug. 28.
Farmer	Fenwick, N.S.	Sept. 6	80	Was on load of hay leading horse which bolted, dragging him to ground. Died Sept. 9.
Farmer	Near Weyburn, Sask.	" 7	32	Struck by lightning in grain field.
Farmer	Linacy, N.S.	" 8	65	Fell from wagon when seat broke. Died Sept. 10.
Farmer	Wilsonville, Ont.	" 12	62	Kicked by horse while unhooking cultivator.
Farmer	Saltcoats, Sask.	" 12	.....	Overcome by gas while repairing well; drowned.
Farmer	Vernon, Ont.	" 14	63	Fell from load of hay when wagon struck rut.
Farmer	Frome, Ont.	" 15	.....	Burned while lighting natural gas jet.
Farmer	Colborne, Ont.	" 15	.....	Crushed between tractor and threshing machine when the former slid down grade.
Farmer	Gananoque, Ont.	" 23	28	Wagon struck by truck.
Farm labourer	Lewvan, Sask.	" 23	29	Caught in threshing machine. Died Sept. 24.
Farmer	St. Phillippe de Prairie, Que.	" 25	76	Going to milk, was trampled by cows, which were frightened by dog.
Farmer	Near Woodstock, N.B.	" 26	.....	Thrown from wagon when brake handle broke, and run over. Died Sept. 28.
Farmer	Didsbury, Alta.	" 26	.....	Fell from binder and run over.
Farmer	Near Moose Jaw, Sask.	" 26	.....	Thrown from wagon when horses bolted.
Girl on farm	Near Bengough, Sask.	" 27	15	Dragged by runaway horse.
Farmer	St. Ours, Que.	" 28	60	Bolt breaking on hay wagon, horse ran away.
Farmer	Glenavon, Sask.	" 29	.....	Fell from top of separator.

FATAL INDUSTRIAL ACCIDENTS IN CANADA DURING THE THIRD QUARTER OF 1927—*Continued*

Trade or Industry	Locality	Date	Age	Cause of Fatality
LOGGING—				
Hand logger	Near Britannia Beach, B.C.	July 1	50	Struck by rolling log.
Hook tender	Canoe Pass, B.C.	" 4	34	Struck by falling tree.
Logger	Alert Bay, B.C.	" 6	21	Hit by log in swinging sling. Died July 11.
Riverman	White Court, Alta.	" 8	21	Fell off raft. Drowned.
Logger	Jervis Inlet, B.C.	" 9	.....	Fell from a gasoline boat; drowned.
Logger	Golden Lake, Ont.	" 11	.....	Crushed by tree; died July 14.
Logger	Magnetewan, Ont.	" 15	36	Logs rolled over workman.
Chaser	Myrtle Point, B.C.	" 20	30	Struck by log.
Proprietor of Logging camp	Bute Inlet, B.C.	" 20	20	Struck by truck.
Logger	Cloud Bay, Ont.	" 21	40	Struck by falling tree.
Timber cruiser	Near Chicoutimi, Que.	" 25	41	Drowned.
River driver	Ste. Geneviève de Batiscan, Que.	" 27	20	Fell from logs; drowned.
River driver	Grande Anse, Que.	" 29	.....	Drowned while driving logs.
Logger	Near Chicoutimi, Que.	Aug. 1	19	Carrying bag of dynamite which exploded.
Mechanic	Casey, Que.	" 6	.....	Crushed by tractor.
River driver	St. Mary's River, N.S.	" 11	24	Drowned.
Boom-man	New Westminster, B.C.	" 12	26	Drowned.
Chokerman	Theodosia Arm, B.C.	" 24	26	Hit by top of sapling.
Loader	Englewood, B.C.	" 27	.....	While spotting cars, caught between brow log and bunk; died Aug. 29.
Foreman with lumberman	Charlton Station, Ont.	" 31	29	Drowned.
Boom-man	Port Haney, B.C.	" 31	.....	Lost footing and fell from boomstick.
Chokerman	Theodosia Arm, B.C.	Sept. 1	27	Struck by log.
Logger	Near Tadoussac, Que.	" 2	18	Fell from logs; drowned.
Chokerman	Port Neville, B.C.	" 8	19	Struck by swinging choker.
Logger	Cowichan Lake, B.C.	" 10	44	Caught in skyline when tree gave way and skyline whipped through the air, crushing them against the second tree.
Logger		" 10	27	
Truck driver for logging contractor	Cowichan Bay, B.C.	" 14	20	Jumped from truck when axle broke, and was run over.
Lumberman	Blind River, Ont.	" 19	.....	Felling tree, was struck on head.
Logger	Near Latchford, Ont.	" 21	.....	Drowned in lake when improvised scow capsized.
Logger		" 21	.....	
Logger		" 21	.....	
Logger	Near Ste. Anne de Beaupré, Que.	" 24	51	Crushed by falling tree.
Logger	Near Squamish, B.C.	" 28	.....	Struck by branch disloged by falling tree.
FISHING AND TRAPPING—				
Trapper	Lac St. Joe, Ont.	July —	.....	Shot; violence.
Trapper	White Mud River, Alta.	" —	.....	Drowned while attempting to cross river.
Fisherman	Lake Winnipeg, Man.	" 19	.....	Stumbled over box in his boat, becoming entangled in nets; drowned.
90 fishermen (including 16 from Newfoundland)	Off coast of Nova Scotia	Aug. 24	.....	Crews of Nova Scotian fishing schooners lost in storm.
Hunter	Lac a Tortue, Que.	Sept. 12	.....	Accidentally shot by own rifle.
Fisherman	Whonnock, B.C.	" 16	27	Drowned.
Fisherman	Off Dunville, Lake Erie, Ont.	" 18	.....	Washed overboard; drowned.
MINING, NON-FERROUS SMELTING AND QUARRYING—				
Metalliferous mining—				
Load man	Timmins, Ont.	July 4	36	Descending shaft in swinging bucket which overbalanced on striking some timbers, throwing him out.
Miner	Rouyn, Que.	" 5	.....	Hurled through air by blast owing to short fuse.
Miner	Near Stewart, B.C.	" 15	.....	Explosion of delayed charge of dynamite.
Miner	Britannia Beach, B.C.	" 18	.....	Bench fell into glory hole; victim fell to rock pile beneath.
Driller	Creighton, Ont.	" 20	33	Skull punctured.
Miner	Alice Arm, B.C.	" 23	.....	Fell into canyon from path.
Helper	Kirkland Lake, Ont.	Aug. 13	33	Crushed under rock.
Foreman	Rouyn, Que.	" 31	.....	Slipped on mud and fell into mine well.
Skiptender	Britannia Beach, B.C.	Sept. 3	27	Struck by chute gate.
Assayer	Trail, B.C.	" 7	.....	Drowned.
Metal Miner	Kimberly, B.C.	" 9	Over 21	Fell from ladder.
Labourer	Schumacher, Ont.	" 11	45	Crushed by rock.
Prospector	Bird Lake, Man.	" 18	50	Canoe swamped; drowned.
Miner	South Porcupine, Ont.	" 27	28	Fracture of skull.

FATAL INDUSTRIAL ACCIDENTS IN CANADA DURING THE THIRD QUARTER OF 1927—*Continued*

Trade or Industry	Locality	Date	Age	Cause of Fatality
MINING, ETC.—*Con.*				
Coal Mining—				
Miner	Sydney Mines, N.S.	July 5		Crushed between two coal boxes.
Loader	Stellarton, N.S.	" 11	22	Caught by fall of coal.
Carpenter	Bevan, B.C.	" 26	55	Fell in flume; drowned.
Miner	New Waterford, N.S.	" 28		Injured in mine. Died Aug. 1.
Miner	Sydney Mines, N.S.	" 29		Fall of stone; crushed.
Miner	Glace Bay, N.S.	Aug. 2	45	Killed by fall of stone.
Contract miner	Cassidy, B.C.	" 4	40	Fall of coal.
Miner	Florence, N.S.	" 8		Fall of stone.
Miner	Coleman, Alta.	" 15	33	Caught by slide of coal; crushed. Died Aug. 18
Mine electrician	Cassidy, B.C.	" 22	22	Caught by trip which left track.
Shooter and loader	Glace Bay, N.S.	" 23		Fall of stone.
Chain runner	Reserve, N.S.	" 23	20	Clothing caught in machinery.
Miner	Glace Bay, N.S.	" 24		Struck by fall of coal. Died Aug. 28.
Miner	Michel, B.C.	" 26		Pushed to ground by a loosened timber; paralysis; died Sept. 2.
Long wall machine operator	Little Bras d'Or, N.S.	" 27	38	While seated on machine, he touched signal wire which had come in contact with tension cable as result of fall of stone; electrocuted.
Miner	Luscar, Alta.	" 27	19	Fall of coal struck end of crowbar pinning victim under beam.
Miner	Glace Bay, N.S.	Sept. 6	44	Fall of stone.
Miner	Glace Bay, N.S.	" 7	45	Fall of stone.
Miner	New Waterford, N.S.	" 9	25	Fall of stone.
Miner	Glace Bay, N.S.	" 17		Run over by train when returning home from work.
Horse trainer	Glace Bay, N.S.	" 24		Kicked by horse. Died Sept. 25.
Miner	Coalmont Mines, B.C.	" 27	53	Fall of coal.
Non-metallic mineral mining and quarrying, n.e.s.				
Chief electrician	Thetford Mines, Que.	July 16	52	Run over by electric train at mill while inspecting trolley.
Miner	Black Donald Mines, Ont.	" 26	30	Both legs fractured.
Employee of mining company	Galetta, Ont.	" 27	32	While driving load down hill, rein snapped and he fell beneath wheels.
Driller	Asbestos, Que.	Aug. 23	29	Fall of rock and earth; head crushed by drill.
Miner	Thetford Mines, Que.	Sept. 3	26	Caught in belt and thrown on to a revolving shaft
Engineer with salt company	Courtright, Ont.	" 28	60	Fracture of skull.
Structural Materials:				
Quarry worker	Côte St. Michel, Que.	July 26	38	Caught in pulley belt while placing same on pulley.
Quarry worker	St. Vincent de Paul, Que.	Aug. 10		Crushed between a wall and load of stone.
Engineer on quarry railway	Durham, Ont.	" 29	38	Scalded by steam when engine left track and overturned.
MANUFACTURING—				
Vegetable foods, drink and tobacco:				
Labourer with jam manufacturers	Hamilton, Ont.	Aug. 17		Cut on elbow; infection.
Miller	Marlboro, Alta.	Sept. 13	28	While climbing revolving shaft, clothing caught in shaft; skull fractured.
Animal foods:				
Packing plant employee	Edmonton, Alta.	Sept. 1		Car in which he was being driven home from work struck by train.
Owner of butter factory	St. Barnabé, Que.	" 7	65	While taking bolt off a bar he was impaled on iron bar.
Inspector of fish cannery	Ucluelet, B.C.	" 9		Fell into vat of hot fish oil and died from burns, Sept. 11.
Boots and shoes:				
Office employee of factory	Quebec, Que.	" 20	24	Fall of elevator.
Non-metallic mineral products:				
Labourer with brick company	Port Haney, B.C.	July 13	59	Cave-in at clay pit.
Labourer with crushed stone company	Hagersville, Ont.	Aug. 4	29	Jammed by locomotive train.
Labourer with cut-stone company	Thistletown, Ont.	" 19	23	Crane fell on workman.
Pulp, paper and paper products:				
Labourer	Port Arthur, Ont.	Sept. 27	28	Crushed under tons of wet pulp.

FATAL INDUSTRIAL ACCIDENTS IN CANADA DURING THE THIRD QUARTER OF 1927—*Continued*

Trade or Industry	Locality	Date	Age	Cause of Fatality
MANUFACTURING—*Con.*				
Saw and Planing mill products:				
Sawyer	Nanoose Bay, B.C.	July 4	31	Fell from log shoot on to rocky beach.
Millman	Milltown, N.B.	" 5	60	Struck on head by winch handle.
Labourer	Prefontaine, Que.	" 21	35	Burned in fire in sawmill. Died Aug. 6.
Stationary engineer	Fossmill, Ont.	Aug. 1	58	Fell between cars.
Trimmer operator	Vancouver, B.C.	" 6	22	Struck by timber caught in belt. Died Aug. 7.
Oiler	Farlinger, Ont.	Sept. 3	19	Burned in fire which followed explosion in sawmill.
Sawmill worker	Braeside, Ont.	" 27	64	Infection.
Wood products:				
Boom man at shook mills	New Westminster, B.C.	Aug. 15	.....	Fell from boom; drowned.
Labourer	Curran, Ont.	Sept. 22	24	Rupture of tibial artery.
Iron, steel and products:				
Machinery expert	St. Jean, Man.	July 27	30	Riding on plow to adjust same, fell under discs.
Machinery expert	Near Armena, Alta.	Aug. 8	.....	While inspecting tractor was caught in wheels and crushed.
Labourer at steel works	Sydney, N.S.	" 9	46	Slipped from gangway, falling to wharf.
Millwright	Sackville, N.B.	" 20	33	Crushed when water tank collapsed.
Sheet metal worker's helper	Winnipeg, Man.	" 22	23	Fixing pipe to dust collector, leaned against building, causing swinging stage to swing out; fell to ground.
Employee of implement firm	Regina, Sask.	Sept. 13	.....	Caught under pile of steel pipes, which collapsed
Painter at steel works	Lachine, Que.	Sept. 23	59	Plank, on which he was standing, broke, throwing him to bottom of tank.
Labourer in machine shop	Kentville, N.S.	" 24	68	While dismantling engine, flywheel fell on plank, the other end of which flew up, striking victim.
CONSTRUCTION—				
Buildings and structures:				
Labourer	Smokey Falls, Ont.	July 4	.....	Explosion.
Labourer		" 4	.....	
General contractor	Mersea Tp., Ont.	" 5	55	Truck wheel loosened, causing crash into ditch.
Bricklayer's labourer	Windsor, Ont.	" 6	32	Fell from seventh floor down shaft while moving staging.
Painter	Montreal, Que.	" 14	57	Fell from scaffold. Died July 16.
Labourer	Thorold, Ont.	" 15	.....	Drowned.
Bricklayer	Waterloo, Ont.	" 20	56	Lost balance and fell from scaffold.
Assistant foreman	Kapuskasing, Ont.	About July 31	59	Infection.
Paperhanger	Toronto, Ont.	Aug. 3	80	While hanging paper, accidentally disconnected gas pipe; asphyxiated.
Labourer	Sorel, Que.	" 10	.....	Fell to ground from high buidling.
Painter	Lauzon, Que.	" 17	66	Fell from roof owing to collapse of eaves-trough.
Foreman with contractor	Hamilton Beach, Ont.	" 20	26	Drowned.
Labourer	Kapuskasing, Ont.	" 23	40	Kicked by horse.
Labourer	Donnacona, Que.	" 24	34	Fell from roof when support gave way.
Roofer	Vancouver, B.C.	" 30	.....	Fell from roof.
Roofer	Ottawa, Ont.	Sept. 7	47	Fell to ground from roof.
Labourer	North Gower, Ont.	" 9	38	Jumped on a scaffold, which collapsed; struck by falling log.
Bricklayer	Winnipeg, Man.	" 14	30	Fell from a scaffold.
Plumber	Montreal, Que.	" 20	42	Asphyxiated by illuminating gas.
Labourer	Quebec, Que.	" 23	18	Missed footing and fell from scaffold.
Lathesmith	Montreal, Que.	" 23	66	Was looking down shaft for freight elevator, which descended from above, crushing him.
Electrician	Winnipeg, Man.	" 26	24	Fell to pavement from window when stud of safety belt gave way.
Carpenter	Kingston, Ont.	" 30	58	Fracture of skull.
Railway:				
Labourer	Youbou, B.C.	July 24	55	Loading steel on scow, was knocked into lake by angle bar and drowned.
Labourer	Hudson Bay Ry., Man.	" 27	58	Uncoupling cars on an incline, caught between cars.
Labourer	Near Middleton, N.S.	" 29	41	While throwing large rock into gully, lost balance and fell with it.
Labourer	Near Vancouver, B.C.	Sept. 21	.....	Struck by gravel slide.
Steam shovel operator	Cottonwood Flats, B.C.	" 26	.....	Landslide caused overturning of steam shovel, crushing operators.
" "		" 26	.....	
Shipbuilding:				
Labourer	Collingwood, Ont.	July 22	48	Found lying dead on staging.

Trade or Industry	Locality	Date	Age	Cause of Fatality
CONSTRUCTION—*Con.*				
Bridge and highway:				
Road builder	Sheet Harbour, N.S.	July 6	30	After lighting fuse, returned to get his lunch box and was struck by boulder from blast.
Supt. of bridge construction gang	Near Entrance, Alta.	" 23	.....	Derrick car overturned on bridge. Three men thrown from bridge and drowned; fourth man crushed by derrick.
Struct'l iron worker		" 23	.....	
" "		" 23	.....	
" "		" 23	.....	
Labourer	Leaside, Ont.	" 25	23	Caisson disease.
Contractor	Grimshaw, Alta.	" 25	41	Opening can with can opener; cut hand.
Foreman, highway construction	New Glasgow, N.S.	Aug. 18	.....	Struck by auto which swerved from roadway.
Labourer	Dolbeau, Que.	" 24	.....	Struck by falling piece of wood.
Bridge worker	Montreal, Que.	Sept. 30	.....	Fell from bridge, breaking arm; infection. Died Oct. 4.
Riveter on bridge	Montreal, Que.	" 30	31	Missed footing, fell between girders, striking pier.
Miscellaneous:				
Electrician	Near Clova, Que.	July 8	18	Fell from horse into lake; drowned.
Labourer	Paugan Falls, Que.	" 18	18	Knocked down by detached bucket, he fell to the ground.
Mucker	South Slocan, B.C.	" 21	28	Crushed by collapse of derrick owing to breaking of steel pier holding same together.
Labourer	Paugan Falls, Que.	" 23	.....	While loading after blast, was struck on head by falling piece of rock.
Labourer	Paugan Falls, Que.	" 23	25	Fell from top of rock cut.
Water boy	Port Weller, Ont.	" 26	15	Fell off lock into Welland Ship Canal; struck bottom of lock.
Labourer	Limoilou, Que.	" 27	.....	Drowned in river when barge turned turtle.
Labourer		" 27	.....	
Brakeman with construction company	Welland Ship Canal, Ont.	" 28	20	Engine jumped track so that next car ran into engine, crushing victim.
Foreman	Boucherville, Que.	Aug. 1	65	Slipped from loose bridge planking into water; drowned.
Sewer digger	Trail, B.C.	" 4	.....	Buried in cave-in of sewer trench.
Labourer	Welland Canal — Thorold, Ont.	Aug. 7	.....	Was under spreader repairing it, when crane bumped by locomotive ran into spreader.
Labourer	Midland, Ont.	" 12	19	Fell 85 feet into bin.
Bargeman	Quebec, Que.	" 20	.....	Caught in windlass cable; crushed by engine.
Labourer	Gananoque, Ont.	Sept. 3	43	Buried in cave-in.
Labourer	Great Duck Island, Ont.	" 12	52	Fractured skull.
Cook with construction company	Sault Ste. Marie, Ont.	" 19	.....	Drowned.
TRANSPORTATION AND PUBLIC UTILITIES—				
Steam railways:—				
Extra gang labourer.	Kaministikwia Siding, Ont.	July 10	30	Attempted to board moving train. Run over.
Yardman	Winnipeg, Man.	" 10	58	Foot caught in guard rail; was run over by switching cars.
Section hand	Kamloops, B.C.	" 10	.....	Struck by freight train. Died July 15.
Railway shopman	London, Ont.	" 14	47	Was bending down at work, when car settled and handle of jack flew up striking victim under chin.
Extra gang labourer.	Hazelbridge, Man.	" 18	.....	Jumped from moving train.
Chainman with engineering crew	Near North Bay, Ont.	" 19	53	Struck by train while working on bridge.
Lineman	Gladwin, B.C.	" 21	38	Velocipede struck by train.
Section foreman	Chester Siding, N.S.	" 26	57	Power trolley collided with way freight.
Extra gang labourer.	Lancaster, Ont.	" 26	26	Struck by train while walking on track.
Sectionman	Windsor, Ont.	Aug. 1	.....	Drowned.
Trainman	Near Moberley, B.C.	" 1	37	Died from injuries received in derailment following head-on collision.
Track patrolman	Cherry Creek, B.C.	" 10	56	Speeder struck by train.
Fireman	Near Lasarre, Que.	" 15	28	Run over by derailed freight train.
Engineer		" 15	40	
Car checker	Winnipeg, Man.	" 16	68	Caught by moving cars. Died Aug. 26.
Sectionman	Mile 12; E.D. & B.C. Rly., Alta.	" 16	35	Speeder jumped track.
Sectionman	Morrinville, Alta.	" 18	.....	Speeder left track crashing into ditch.
Brakeman	Long Lac, Ont.	" 25	.....	Found lying between station platform and main line rail.
Labourer	Tionaga, Ont.	" 28	.....	Struck by train.
Extra gang labourer.	West Lorne, Ont.	" 30	55	Slipped in front of train and was struck.
Switchman	North Regina, Sask.	" 30	27	Crushed when box car overturned owing to split switch.
Yardman	Pointe St. Charles, Que.	Sept. 2	65	Fell from door of car to ground. Died Sept. 4.
Engineer	Dalemead, Alta.	" 7	51	Head on collision.
Fireman		" 7	36	
Brakeman	Winnipeg, Man.	" 10	35	Apparently attempted to board train.

Lineman	Near Blue River, B.C.	" 26	32	Getting motor-car off track, struck by engine.
Water transportation:—				
Sailor	Burlington, N.S.	July 11	.....	While in a row boat was struck by lumber falling from wharf.
Sailor on tug	Port Dalhousie, Ont.	" 18	40	Fell overboard; drowned.
Sailor	Sailing from Vancouver, B.C.	" 27	.....	Drowned in Colon harbour.
Mess boy	St. Lawrence River, Que.	Aug. 1	16	Drowned when boat, on which they were returning to steamer, capsized in current.
Mess boy		" 1	16	
Captain of boat	Inverness, B.C.	" 2	41	Explosion of gas while filling tanks.
Sailor	Quebec, Que.	" 8	17	Received shock while handling cable to tie barge. Fell to deck striking head.
Lamp trimmer	Montreal, Que.	" 15	42	Caught foot in iron mooring ring which threw him into water.
Sailor	Montreal, Que.	" 16	.....	Run over by railway on dock while attempting to return to ship.
Second engineer	Burrard Inlet, B.C.	" 16	40	Stepping to dock, missed footing and fell into water.
Captain of tug boat	La Seine, Ont.	Sept. 8	41	Drowned.
Labourer on wharf	Quebec, Que.	" 13	24	Fell off wharf; drowned.
Cook on a tug	Sault Ste. Marie, Ont.	" 18	45	Drowned while boarding boat in dark.
Longshoreman	Montreal, Que.	" 23	35	Fell into hold of vessel, after stumbling against hatch in dim light.
Longshoreman	Montreal, Que.	" 24	31	Fell into hold of vessel.
Air transportation:—				
Mechanic	Hudson, Ont.	Aug. 4	31	Drowned.
Local transportation:—				
Taxi driver	Near Huntingdon, Que.	July 17	.....	Murdered.
Truckman	Chicoutimi, Que.	Aug. 9	.....	Crushed by falling cask. Died Aug. 24.
Teamster	Hamilton, Ont.	" 12	74	Thrown to ground when horses ran away.
Truck driver	Ottawa, Ont.	Sept. 6	34	Cranked truck while in gear. Run over and crushed.
Truck driver	Brookfield, Ont.	" 8	24	Struck by train.
Truck driver	Duncan, B.C.	" 13	24	Run over by truck trailer.
Truck driver	Grand Forks, B.C.	" 24	25	Blinded by headlights, drove truck over embankment and was thrown from it.
Storage:—				
Elevator employee	Fort William, Ont.	Sept. 19	27	Fell from top storey of elevator.
Telegraphs and Telephones:—				
Telegraph lineman	Lytton, B.C.	July 20	32	Run down by freight train.
Lineman's helper	St. Lambert, Que.	Aug. 23	20	Fell from pole. Died Sept. 13
Cable splicer	Hamilton, Ont.	" 23	.....	Fractured skull.
Electricity and gas:—				
Electrical worker	Amos, Que.	July —	30	Electrocuted.
Electrical worker	Three Rivers, Que.	" 12	39	Electrocuted. Died of burns July 20.
Operator at electric plant	Oxford, N.S.	" 23	25	Caught and crushed in power wheel.
Lineman	Liverpool, Ont.	" 27	40	Contact with live wire; electrocuted.
Lineman	Kingston, Ont.	Aug. 6	48	Backed against transformer; electrocuted.
Employee of Power Commission	Near Lakefield, Ont.	" 10	39	Was electrocuted by high voltage wire while changing fuses.
Labourer at power dam	Chelsea, Que.	Sept. 15	30	Electrocuted when broom came in contact with high voltage wires.
TRADE—				
Wholesale:—				
Elevator man	Montreal, Que.	Aug. 9	25	Was crushed by elevator which was out of control owing to breaking of pulley.
Travelling salesman	Cranbrook, B.C.	" 18	.....	Automobile went over bank.
Salesman with brewing company	Belle River, Ont.	Sept. 21	.....	Automobile hit by train.
Woodcutter	Orillia, Ont.	" 24	23	Fractured skull.

Steam railways:				
Brakeman	Yahk, B.C.	May 4	34	While moving fallen tree out of way was struck by branch; septicaemia. Died June 28.
Electric railways:				
Bonder	Vancouver, B.C.	June 24	49	While cutting holes for bonding, was struck by auto. Died June 27.

For the purpose of establishing uniform and reasonable standards of safety in the erection, equipment and maintenance of public buildings and places of employment in Wisconsin, the Industrial Commission has prepared and issued codes covering the important general and special features of buildings. The codes deal with the following branches of the industry:— Building (construction and equipment) Code; Heating and Ventilation Code, General Orders on Safety in Construction, Boiler Code, Elevator Code, Electrical Code, Industrial Lighting Code, School Lighting Code, Refrigerator Code, General Orders on Existing Buildings, General Orders on Fire Prevention, General Orders on Sanitation and General Orders on Spray Coating.

RECENT LEGAL DECISIONS AFFECTING LABOUR

Injunction in Building Trades' Strike at Toronto

UPON the application of eight building contractors, Mr. Justice Orde issued an interim injunction on October 27, to restrain William Varley on behalf of the Building Trades Council of Toronto, and other representatives of international trade unions, from calling out on strike employees of the plaintiffs, in connection with the sympathetic strike to assist the United Brotherhood of Carpenters and Joiners. (Particulars of this dispute are given on page 1162 of this issue.) The representatives of the following international unions were named in the order:—

United Brotherhood of Carpenters; International Union of Electrical Workers; United Association of Plumbers and Steamfitters; International Sheet Metal Workers' Union; International Plasterers' Union; International Hoisting Engineers.

On October 31 Mr. Justice Logie dissolved the temporary injunction, declaring that he could see nothing illegal or malicious about the action of the workmen in joining the sympathetic strike. The evidence showed a threat by the defendants to withdraw the different trades if the Amalgamated Carpenters were allowed to continue to work on the plaintiffs' jobs.

"But this in my opinion does not constitute an illegal act," his Lordship said. "There was a threat, of course, but the object of the threat was to protect the component parts of the Building Trades Council, and that, in my opinion, was not illegal; it was only threatening to do something—the acts of the defendants were only threatening what they had a right to do. There was no malicious intent either from the definition of malice and spite or from the definition in 1925 appeal cases, and therefore there was no ulterior motive or indirect motive which would give the plaintiffs cause for action. And there is also doubt as to the power of the court. It may be at the trial that the plaintiffs can establish that an actionable wrong was done, but the material before me shows that the injunction in the form in which it was granted is quite foreign to English courts. There is no decided case that I know of which applies."

Owing to the settlement of this dispute early in November no further action was taken towards issuing a formal order, and the entire action was subsequently withdrawn.

Application to Enjoin all Members of A. F. of L.

Early in November the Interborough Rapid Transit Company of New York served notice that later in the month it would ask for an injunction restraining William Green, president of the American Federation of Labour, and each of the members of that organization, from all action tending to interfere with their employees who are members of a company union, and from conspiring to induce employees of the company to join the Amalgamated Association of Street and Electric Railway Employees, in violation of the agreement entered into between these employees and the company to join no labour organization other than the company union. This application is stated to represent the first attempt ever made to enjoin all the members of the American Federation of Labour. The bill of complaint includes a history of strikes of employees of the Interborough Company, and cites various resolutions adopted by the Federation as showing an intention to eliminate company unions and individual contracts.

New York Court Defines Lawful Picketing

The limits of lawful picketing were stated in a recent judgment given in the Court of Chancery of New Jersey in the case of *Forstmann and Huffman versus United Front Committee of Textile Workers.* The court stated that "picketing itself, for all its militant name, may be legal or illegal in a dispute between employer and employee, according to the manner in which it is carried on." No question exists, it was declared, as to the right of workmen to associate for bettering their living or working conditions, or as to the right to strike as an inducement to secure from the employer the desired concessions. Workmen unable to picket in a labour market such as existed in the locality would be reduced to a futile and absurd condition. Under these circumstances, and so long as they do not resort to interdicted conduct, every dictate of reason and fair play requires that they be given an opportunity to lawfully discuss their grievance, or supposed grievance, with either their fellow employees or others who offer themselves to take their place, unless, indeed, labour is to be returned to that state of bondage that succeeded legal serfdom in England. On the other hand, the court declared that the mass picketing indulged in

by the defendants in this case could not be permitted to continue, so that while "there should be a material modification of the terms of the restraining order," an injunction would nevertheless be allowed to limit picketing in accordance with the theory of persuasion and imparting information, but without intimidation, even by mere numbers.

Federal Injunction Against Mine Workers in United States

The account of the proceedings of the recent convention of the American Federation of Labour on page 1195 of this issue mentions an announcement made to the convention that one of the most sweeping federal injunction orders in the history of labour disputes in the United States had just been issued. This injunction was granted to the Pittsburgh Terminal Coal Corporation, an employer of non-union labour, on September 30 at Pittsburgh by Judge F. P. Schoonmaker, restraining the United Mine Workers of America, its officials and members, from its activities directed against the plaintiff company. The union was restrained from seeking to maintain union men in houses owned by the company; from violence of any sort against company employees or prospective employees, or against company property (the union however being permitted to establish a single picket post on each road leading to the mines for purposes of "peaceful persuasion"); from molesting or interfering with corporation employees or their families, or agents of the company. Any act which might interfere with the production, mining, transportation or shipment of coal was prohibited. Trespassing on company property, loitering near such property or parading in the vicinity of the mines was forbidden, except picket posts on roads leading to the workings; such posts must be 100 feet from the nearest company building, and must be marked to show it is a union picket point.

The court, in signing the injunction decree, upheld the contention of the corporation that the union, by its activities against the plaintiff, had hampered inter-state shipment of coal, in violation of the Sherman and Clayton Acts. The Terminal Corporation was a union stronghold until April 1, when the company posted a wage scale lower than the union scale, and union miners suspended work. Since that time the corporation has sought to operate with non-union miners.

Seniority of Grand Trunk Railway Employees

Mr. Justice Curran, in the Manitoba Court of King's Bench, recently dismissed with costs an action brought against the Canadian National Railways by William Ross, an engineer, and George C. Jordan, a fireman, former employees on the Grand Trunk Pacific Railway, which now forms part of the Canadian National Railway system. The plaintiffs took this action on behalf of themselves and of all engineers and firemen employed on the Grand Trunk Pacific Railway, and on that part of the Canadian Government Railways extending from O'Brien, Ontario, to Transcona, Manitoba. They sought to restrain the railways from giving effect to an agreement made on May 1, 1926, between the Canadian National Railways, on the one part, and the Brotherhood of Locomotive Engineers and the Brotherhood of Locomotive Firemen and Engineers and the Brotherhood of Locomotive Firemen and Enginemen on the other part. This agreement consolidated the seniority lists of the engineers and firemen on the Grand Trunk Pacific system, the western lines of the Canadian Northern Railway, and the western portion of the Canadian Government Railways; and also established two new seniority districts.

The plaintiffs claimed that under the existing schedules governing their employment, agreements concerning seniority rights could only be made by the General Committee of Adjustment of the engineers and the General Grievance committee of the firemen employed on their respective lines and that the agreement was ultra vires of the Grand Lodges.

Among other defences raised, the railways pleaded that all parties interested in the agreement were not before the court, particularly the Brotherhood Grand Officers, and the Canadian Northern engineers and firemen had not been made parties; that the agreement had been constitutionally authorized by the Grand Lodges of both brotherhoods who had supreme jurisdiction in the matter and that the plaintiffs were bound by its terms.

Mr. Justice Curran, in the course of his judgment said: "It is quite evident that if these railways were to be operated as one system, under one management, as the Canadian Government contemplated and directed, the former seniority districts enjoyed by the men of the three separate systems must be in some way readjusted, and the separate rules, rates and working conditions previously in force in each independent system, as evi-

denced by then existing schedules, brought into harmony or consolidated in such a way as to be workable and uniform for all the men on the whole co-ordinated system. The defendants, as I understand the matter, are not interested in the seniority rights of employees further than to respect such rights as established and admitted among the men themselves, and do not desire to interfere in this very delicate subject incident to railway operation. The men must settle that themselves when a change in districts becomes necessary as was the case when these systems were placed under one management."

The judgment held that the Grand Lodges had jurisdiction to deal with this matter: "I conceive it possible," Judge Curran said, "that the general committees of adjustment on each system could by mutual consent and agreement, bind the members of the brotherhood they represent in a matter of seniority rights by merger, change of districts, or otherwise, in such an event as happened when those systems were placed under one management as before mentioned, and from my understanding of this very complicated matter that is exactly what they tried to do, but failed to reach an agreement, at all events on behalf of the Grand Trunk Pacific and Canadian Northern men. What then was to be done? It is unthinkable that the operation of this vast system of railway in the public interest should become dislocated or interrupted through a domestic quarrel and disagreement of the employees, who had no cause of complaint, against the common employer, the Canadian National Railways. They, the men, through their duly appointed representatives in this emergency, turned to the Grand Lodge as the supreme governing body for a settlement of the dispute which they could not settle amongst themselves. An appeal to this body was the ultimate and only recourse left. The men themselves selected this forum, and I do not see how any of them can have any legal ground of objection to the agreement made on their behalf by the Grand Lodge officers with the railway company."

The plaintiffs gave notice of appeal in this case.

Constitutional Amendments in Nova Scotia

The Judicial Committee of the Privy Council on October 18 handed down a judgment in favour of the Government of Nova Scotia in regard to the right claimed by the government to increase the number of members of the Legislative Council, and to dismiss members, with a view to bringing about the abolition of the upper house. In October, 1926, certain questions were submitted by the provincial government to the Nova Scotia Supreme Court to determine the tenure of office of members of the Council and the powers of the Lieutenant Governor in regard to the appointment of members. These questions, together with the opinions of the several judges of the Supreme Court, were noted in the LABOUR GAZETTE, December, 1926, page 1256. As the Nova Scotia Supreme Court failed to agree, the government resolved to submit the same series of questions to the Judicial Committee of the Privy Council. The committee which heard the appeal was composed as follows:—

Viscount Cave, Lord High Chancellor; Lords, Haldane, Warrington, and Wrenbury; and Mr. Justice Lyman P. Duff, of the Supreme Court of Canada.

The judgment of the judicial committee is epitomized in Their Lordships' answers to the questions originally submitted to the Nova Scotia supreme court as follows:—

1. Has the lieutenant governor power of appointing so many members of the council that the total number holding office would exceed 21 or exceed the total number who held office at the time of the union under the British North America Act?

Answer—Yes.

2. Is membership of the council limited in number?

Answer—At present a full house is 21, but the number can be increased by the lieutenant governor in council.

3. Is tenure of office of members appointed prior to May, 1925, during pleasure or during good behaviour for life?

Answer—During pleasure.

4. If such tenure is during pleasure is it during the pleasure of His Majesty or during the pleasure of His Majesty represented by the lieutenant governor acting by and with the advice of the executive council?

Answer—During the pleasure of His Majesty represented by the lieutenant governor.

Legal Decisions in United States in 1926

The United States Bureau of Labour Statistics recently published a bulletin (number 444) entitled "Decisions of Courts and Opinions affecting Labour, 1926." Annual bulletins

on this subject have been published by the Bureau since 1912, with the exception of the years 1919-20, and 1923-24 when the bulletins were biennial. The present bulletin summarizes the decisions rendered by State and Federal Courts during the year in labour and industrial cases, including opinions of the Attorney General of the United States construing federal labour laws. Workmen's Compensation continued to be the most fruitful source of actions at law, the courts being still called upon in numerous cases to construe legislation on this subject. The report comments on the continuance of litigation even under the recent forms of workmen's compensation, showing that employers' liability is not entirely superseded. On the other hand many of the cases reviewed relate to railway employments, to which the compensation acts generally do not apply. Another important group of decisions relates to labour organizations. On these decisions the report remarks that "the development of a harmonious and intelligible body of laws with regard to labour organizations continues even though the progress cannot be regarded as a straight one or the progress steady;" nevertheless, "trends of growth and tendencies towards a recognition of legal personality seem to be manifest."

DEPARTMENT OF LABOUR

CANADA

Minister—THE HONOURABLE PETER HEENAN
Deputy Minister—H. H. WARD

Functions of the Department

Labour Gazette.—The monthly publication of the "Labour Gazette" containing a review of the industrial situation throughout Canada, a record of proceedings under the Industrial Disputes Investigation Act, statistics of wages and hours, wholesale and retail prices in Canada and other countries, strikes and lockouts, industrial accidents, summaries of laws and legal decisions affecting labour and other information on current matters of industrial and labour interest.

Labour Statistics and Information.—The collection, compilation and publication of statistics of wages, hours, prices, cost of living, strikes and lockouts, industrial accidents and industrial agreements; also of reports on labour organization and organization in industry, commerce and the professions; the conduct of investigational and research work bearing on industrial relations and labour conditions; the publication of bulletins of information on these subjects.

Industrial Disputes Investigation Act, 1907.—The administration of the Industrial Disputes Investigation Act, 1907, which provides for the establishment of Boards of Conciliation and Investigation in cases of disputes affecting mines and public utilities.

Conciliation.—The maintenance of a staff of officers at various points whose services are utilized in the adjustment of labour disputes.

Fair Wages.—The administration of Fair Wages policy of the Government of Canada which provides for the observance of the current wages rates and hours of the district on Government contracts and on railway construction towards which financial aid has been voted by Parliament.

Employment Service of Canada.—The administration of the Employment Offices' Co-ordination Act under which, in co-operation with various provincial governments free public employment offices are maintained in 64 centres; statistical information relative to employment conditions is also collected and published.

Technical Education.—The administration of the Technical Education Act which provides for grants to the provinces for the purpose of promoting technical education; the collection and publication of information in the form of bulletins and otherwise.

Dominion Government Annuities.—The administration of the Government Annuities Act, 1908, whereby provision may be made for old age by the purchase of annuities by individuals, or associations on behalf of their members, or by employers on behalf of their employees.

Combines Investigation Act, 1923.—The administration of the Combines Investigation Act, 1923, which provides means for investigation of alleged combines.

Labour Legislation in Canada.—The compilation and publication of reports containing the text of the labour laws of the Dominion and of the Provinces.

Library.—The maintenance of a library of publications on labour and economic subjects.

International Labour Organization (League of Nations).—The collection and transmission of information required by the International Labour Conference and Office; correspondence with Federal and Provincial Government departments and with organizations of employers and employees relative thereto; the representation of Canada at the International Labour Conference and on the Governing Body of the International Labour Office.

51297—1

Publications of the Department of Labour

Labour Gazette—
Published monthly, in English and French. SUBSCRIPTION RATES: Canada, United States and Mexico, 20 cents per annum, postage prepaid; all other countries, $1 per annum, postage prepaid. Subscriptions are payable in advance, and should be addressed, with postal note or money order, to Circulation Manager, Department of Labour, Ottawa. Bound volumes for 1926 and for earlier years are available at $2 each.

Annual Report of the Department of Labour—
An outline of the activities of the Department during the fiscal year ended March 31, 1926. PRICE, 25 cents.

Employment Service of Canada—
Annual Report of the Director. FREE ON APPLICATION.

Technical Education—
Annual Report of the Director. FREE ON APPLICATION. Occasional Bulletins. FREE ON APPLICATION.

Dominion Government Annuities—
Annual Report of the Superintendent. FREE ON APPLICATION. Booklets, Table of Rates, etc. FREE ON APPLICATION.

Combines Investigation Act, 1923—
Report of Commissioner on Alleged Combine in the Distribution of Fruit and Vegetables in Western Canada, Feb. 18, 1925. PRICE, 20 cents.
Report of Commissioner on Alleged Combine amongst Coal Dealers at Winnipeg and other places in Western Canada, Feb. 28, 1925. PRICE, 25 cents.
Report of Registrar on Alleged Combine Limiting Competition in the marketing of New Brunswick Potatoes, June 9, 1925. PRICE, 20 cents.
Report of Registrar on Alleged Combine in the Manufacture and Sale of Bread in the City of Montreal, March 25, 1926. *Out of print.*
Report of Commissioner on Alleged Combine in the Distribution of Fruits and Vegetables Produced in Ontario, July 31, 1926. PRICE, 15 cents.
Interim Report of Registrar on the Proprietary Articles Trade Association, an Alleged Combine of Wholesale and Retail Druggists and Manufacturers, established to fix and maintain Resale Prices of Proprietary Medicines and Toilet Articles, Sept. 6, 1926. PRICE, 10 cents.
Report of Commissioner on the Proprietary Articles Trade Association, Oct. 24, 1927. PRICE, 10 cents.

Labour Organization in Canada—
Published annually. Contains full information on trade unions, their origin, organization, officers, etc., with outlines of chief events in each year in connection with labour activities. PRICE, 50 cents.

Organization in Industry, Commerce and the Professions in Canada—
Published annually. Gives information regarding associations of employers in industry and commerce, and professional and scientific organizations. PRICE, 25 cents.

Labour Legislation as existing in Canada on December 31, 1920 (with Annual Supplements to 1926)—
Contains text of Dominion and Provincial labour laws, each supplement containing a cumulative index to the series. PRICE OF MAIN VOLUMES, 50 cents; supplements, 15 cents.

Reports on Wages and Hours of Labour in Canada, 1900-1926. FREE ON APPLICATION.

Report on Prices in Canada and Other Countries, 1926. FREE ON APPLICATION.

Strikes and Lockouts in Canada and other Countries, 1926—FREE ON APPLICATION.

Bulletins of the Industrial Relations Series:—
PRICE, 10 cents each.

No. 1—Joint Councils in Industry.

No. 2—Report of a Conference on Industrial Relations held at Ottawa, Feb. 21-22, 1921.

No. 3—Joint Conference of the Building and Construction Industries in Canada, held at Ottawa, May 3-6, 1921.

No. 4—Employees' Magazines in Canada.

No. 5—Canada and the International Labour Conference.

No. 6—The International Labour Organization—Laws of Canada bearing on Draft Conventions and Recommendations. (Out of print.)

No. 7—Canadian Railway Board of Adjustment No. 1—Report of Proceedings of Board from Sept. 1, 1920 to Sept. 30, 1923.

No. 8--National Conference regarding Winter Employment in Canada, Sept. 3-4, 1924—Report of Proceedings and Discussions.

No. 9—Canadian Railway Board of Adjustment No. 1—Report of Proceedings of Board from Oct. 1, 1923, to Sept. 30, 1927.

Government Intervention in Labour Disputes in Canada.—FREE ON APPLICATION.

Report of Judicial Proceedings respecting Constitutional Validity of The Industrial Disputes Investigation Act, 1907, and Amendments of 1910, 1918 and 1920—PRICE 50 cents.

Report of Select Standing Committee of the House of Commons on Industrial and International Relations, 1926—FREE ON APPLICATION.

Bulletin entitled "The Legal Status of Women in Canada"—FREE ON APPLICATION.

Report of National Industrial Conference, 1919—PRICE 25 cents.

Report of Royal Commission on Technical Education, 1913—
(In four parts, Part 3 out of print.) PRICE, 50 cents.

THE LABOUR GAZETTE

PREPARED AND EDITED IN
THE DEPARTMENT OF LABOUR, OTTAWA, CANADA

VOLUME 27] DECEMBER, 1927 [NUMBER 12

NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

Monthly Summary

THE usual seasonal contraction in industrial employment in Canada was evident at the beginning of November, but the losses this year were smaller than in 1926, and activity continued at a higher level than at the corresponding date in the last eight years. The Dominion Bureau of Statistics tabulated statements from 6,221 employers each with a minimum of fifteen employees, in all industries except agriculture, fishing, hunting and highly specialized business, showing that the payrolls of these firms were reduced from 903,099 persons on October 1, to 891,105 at the beginning of November. Reflecting this decrease of nearly 12,000 workers, the index number (with January, 1920, as the base = 100), declined from 109.0 in the preceding month to 107.5 on the date under review, as compared with 102.8, 97.1, 93.0, 98.8, 95.8 and 90.2 on November 1, 1926, 1925, 1924, 1923, 1922 and 1921, respectively. Reports received from the offices of the Employment Service of Canada indicated a marked decline in the volume of business transacted in October as compared with the preceding month, owing to the lessened demand for harvest workers. A substantial increase, however, was noted in the comparison with the figures for October, 1926, due to increased placements in logging and farming. At the beginning of November the percentage of unemployment registered among the members of local trade unions was 3.9 in comparison with percentages of 3.1 at the beginning of October and 2.6 at the beginning of November, 1926. The percentage for October is based on reports received by the Department of Labour from 1,641 local trade unions with a combined membership of 172,737 persons.

The average cost of a weekly family budget of twenty-nine staple foods was $11.07 at the beginning of November, as compared with $10.99 for October; $11.01 for November, 1926; $11.23 for November, 1925; $10.46 for November, 1924; $10.69 for November, 1923; $10.29 for November, 1922; $11.08 for November, 1921; $15.32 for November, 1920; $16.92 for June, 1920 (the peak); $13.65 for November, 1918; and $7.96 for November, 1914. In wholesale prices the index number calculated by the Dominion Bureau of Statistics, based upon prices in 1913 as 100, was slightly lower for November at 152.2 as compared with 152.4 for October; 151.4 for November, 1926; 161.2 for November, 1925; 157.7 for November, 1924; 153.3 for November, 1923; 151.9 for November, 1922; 153.6 for November, 1921; 224.5 for November, 1920; 256.7 for May, 1920 (the peak) and 207.4 for November, 1918.

The time loss due to industrial disputes in November, 1927, was less than during October, 1927, but greater than during November, 1926. Sixteen disputes were in existence at some time or other during the month, involving 1,868 workpeople and resulting in a time loss of 11,718 working days. Corresponding figures for October, 1927, were: twenty-one disputes, 4,058 work people, and 46,844 working days; and for November, 1926, thirteen disputes, 1,133 workpeople and 9,892 working days.

Industrial Disputes Investigation Act, 1907

During November, the Department received reports from two Boards of Conciliation and Investigation, the first in connection with the dispute between the Canadian National Railways and members of the Canadian Brotherhood of Railroad Employees, and the second in connection with the dispute between the British Columbia Electric Railway Company, Limited, and members of the local devisions of the Amalgamated Association of Street and Electric Railway Employees of America. A minority report also was received in the second case. One new application for a Board was received during the month. A full account of the proceedings under the Act during the month will be found on page 1284.

An American view of Industrial Disputes Investigation Act

The Industrial Disputes Investigation Act of Canada is the subject of a study by Mr. Ben. M. Selekman, under the title "Postponing Strikes," and recently published by the Russell Sage Foundation for the Improvement of Social and Living Conditions (New York). It is intended to supply an answer to the question whether the act has

accomplished its purpose, and whether a similar law should be enacted in the United States. A pamphlet by the same writer appeared in 1916, containing conclusions that were not wholly favourable to the act. Subsequent events and further study, however, have inclined Mr. Selekman to regard it as a successful method of "postponing strikes" through its machinery for conciliation. Canada's experience under the Industrial Disputes Investigation Act, according to this observer, has proved the "futility of compulsion" as compared with conference and negotiation between the parties to a dispute. Boards established under the act have dealt with the cases presented to them, "not as judges called upon to render decisions, nor as investigators to discover the relevant facts for the education of the community, but as peace makers called upon to create a friendly and informal atmosphere that will help to bring about amicable settlements." The policy of conciliation pursued by the Canadian Government is contrasted with "the policy of coercion sometimes pursued by government bodies in the United States." The result, he says, has been that labour in Canada has been won to co-operate in the administration of the Industrial Disputes Investigation Act, while in the United States it has often been in opposition to laws having a similar purpose. The act is regarded as particularly successful in its application to disputes on railways, where conditions are fairly stable, but as less effective in connection with disputes affecting the mining industry, in which employment is unstable and irregular.

Mr. Selekman's book gives a full outline of the provisions of the act, followed by statistics summarizing the results obtained by the act during the twenty years of its operation. The methods employed in its administration are next described. Succeeding chapters deal with the attitude of labour, including the period prior to 1918, when it was unfavourable, and the later period, when it was friendly to the act; the attitude of employers; the constitutionality of the act; other agencies for the adjustment of industrial disputes in Canada; and finally, the significance of Canadian experience for the United States.

Appointment of Chief Conciliation Officer

Mr. M. S. Campbell, of Dryden, Ontario, has been appointed Chief Conciliation Officer of the Department of Labour, to be responsible for the investigation of industrial disputes and of mediation between employers and employees. The Department of Labour has for many years maintained a staff of officers at various points whose services are utilized in the adjustment of labour disputes. Mr. Campbell will be in general charge of this work.

Progress of Dominion Government Annuities

The Government Annuities Branch of the Department of Labour states that with a total of 8,574 government annuitants on the rolls on November 30, the increase for the first eight months of the current fiscal year of those who have contracted with the Federal Government for this system of protection against old age was 737, as compared with the corresponding period last year. The 737 new contracts are an increase of 132 per cent over the same period of 1926, while the sum of $2,174,400, received from all annuitants during the year, represents an increase of 83 per cent over the amount received during the eight months period last year.

Within the past month the province of Quebec has adopted the Federal Government's annuity system, incorporating it as a pension plan for technical school teachers. Hon. Athanase David, provincial secretary, approved the project and at the moment the teachers and professors of the Montreal Technical School, the Quebec Technical School, the Hull Technical School and L'Ecole Polytechnique of the University of Montreal have come within scope of this scheme. It is intended to extend the plan so as to embrace the other technical schools of the province as soon as possible. Five per cent of the teachers' salaries is deducted, with the provincial government contributing an additional sum equal to this five per cent to go for premium payments. The annuity is to commence at the age of 65.

Presentation of first Old Age Pension in Canada

The picture on page 1273 of this issue represents the payment, at Alberni, B.C., of the first Old Age Pension in Canada. As already noted in the LABOUR GAZETTE (April, 1927, page 382) British Columbia was the first province in Canada to enact legislation giving effect to the Federal Old Age Pensions Act passed by the Parliament of Canada at its last session (LABOUR GAZETTE, April, 1927, page 374). The British Columbia Act is administered by the Workmen's Compensation Board of the province. In this case the presentation was made to William Henry Derby, a pioneer of Vancouver Island, the ceremony taking place in the office of the provincial Government Agent at Alberni. Interested spectators of the event were Mr. A. W. Neill, M.P., Comox-

Child welfare in New Brunswick

Miss Charlotte Whitton, executive secretary of the Canadian Council on Child Welfare, and assessor for Canada on the Child Welfare Commission of the League of Nations, recently delivered an address in Saint John, N.B. at a meeting held under the auspices of the Saint John Health Centre. According to press reports, after touching on the international aspect of child welfare and describing her work on the League of Nations Child Welfare Commission, Miss Whitton stressed the fact that as the right of the provinces was supreme in welfare legislation, Canada's place among the nations was determined by the most backward of her provinces. She stated that the Canadian Council on Child Welfare had sent her to New Brunswick to draw attention to the particulars in which that province fell below Canadian standards. She said that in New Brunswick she found three different standards. The School Attendance Act placed upon the local authorities the responsibility of putting its compulsory clauses in force, and urban districts had the privilege of raising the compulsory age to 16 years from the required 14 years, while in rural districts it might be reduced to 12 years. She found that some districts had no compulsory law. If a uniform school attendance act would put too great a strain on the people of the Province she pleaded for an age limit under which children might not enter gainful occupations.

Press dispatches indicate that a resolution is now before the Women's Institutes of New Brunswick calling on the Provincial Government to amend the School Attendance Act so as to remove the clause which gives the school trustees the option of enforcing compulsory school attendance regulations, and to make compulsory attendance effective throughout the Province.

Extension granted to Canadian "commuters"

On the eve of the day when effect was to be given to the new rule on the subject of Canadian-born "commuters" residing in Canada and crossing the international boundary to work, the United States government granted an extension of time before its enforcement (the new regulation on the subject was noted in the last issue of the LABOUR GAZETTE, page 1164). It was stated that the postponement was granted after negotiations between the Canadian legation and the government at Washington. Six months ago the United States Department of Immigration issued a ruling that the terms of the immigration law of 1924 would be strictly enforced against "commuters" across the border under this law. Native-born Canadians were to be required to obtain non-quota visas and pay a head tax, and non-native Canadians to apply for quota visas as "foreign born." Six months were allowed to Canadians living on the Canadian side and working on the United States side to become qualified as immigrants. The period of grace was to expire on November 30, but this is now extended for a period not yet specified.

Nova Scotia Coal Workers' Relief Association

The employees' relief association in connection with the Dominion Coal Company of Nova Scotia is described in the course of an article in the *Canadian Mining Journal*, November 4, 1927, outlining the coal mining operations of the British Empire Steel Corporation Limited. (Further reference to this article is made in the Notes on Industrial Safety and Health on another page of this issue). Each of the subsidiary companies of the Corporation has some form of relief association, but that of the Dominion Coal Company particularly deserves mention. Under this scheme all the employees contribute 30 cents per week, or $1.30 per employee per month. The company contribute 25 per cent of the amount of the employee's contributions, or 32½ cents per employee per month. The provincial government supplements these payments by contributing three-tenths of one cent per ton on coal sales. The contributions to the fund from these three sources amount to about $1.71 per employee per month.

Relief.—Members who are disabled from working receive relief from the fund as follows: For the first six months $9 per week, for the second six months $4.50 per week, for the following two years $2.25 per week. In cases of extreme necessity special grants are made, such special grants not to exceed in any one case the sum of $100 in any one year.

Death Allowances.—In cases of death the widows and children receive $150 ($100 from the association and $50 from the provincial government); the widow further receives for five years a monthly payment of $8, with a

monthly payment of $3 for each child until the age of 14 years is reached. Disabilities due to occupation, however, are dealt with by the Workmen's Compensation Board, and are not paid for by the association.

Pension Fund.—Following the merger of the various companies now forming the British Empire Steel Corporation, a pension fund was, in 1923, voluntarily established by the corporation for the benefit of employees superannuated or incapacitated under long service. The amount of pensions paid monthly to persons retired is at the rate of one per cent of the average monthly pay received by them during the last ten years of service, multiplied by the number of years of their entire service, limited to $75 monthly as a maximum. Any employee who has been 25 years in the service, and who has reached the age of 65 years in the case of a male, or 55 years in the case of a female, is eligible for a pension. It is stated that the value of this fund in the four years of its existence has been well proven and is appreciated by many of the older employees who in this period have been superannuated.

Progress of Family Allowances

At a conference of representatives of the Australian Commonwealth and State Governments, held at Melbourne in June, 1927, it was decided to set up a Royal Commission "to investigate the general question of the institution of a system of child endowment or family allowances in Australia, with particular reference to its social and economic effects." This commission was set up in September. The appointment directs attention once more to a social experiment which has attracted widespread interest in recent years. The International Labour Office published two or three years ago an extensive study of the problems involved in the adoption and operation of a system of allowances, by way of supplement to wages, in respect of dependants, and those who desire a general or a detailed knowledge of the question are referred to that volume. One of the fundamental issues involved in the establishment of such a system is whether the allowances should be contingent on the good will of employers or should be the subject of legislative enactment. In France and Belgium, where highly developed systems have been introduced by the initiative of employers, the latter are opposed to any compulsory or supervisory measure; they prefer to maintain the private and voluntary character of the institutions which they have created. In some other countries, however, the intervention of the Government for the purpose of regulating, if not actually establishing, systems of allowances is under discussion. In this connection, it is interesting to note that, in the event of the Australian Commission deciding to recommend the institution of a system of allowances, it is instructed to report, among other specific questions relating to the organization and administration of the scheme, as to whether the necessary funds should be provided out of public revenue.

The subject of family allowances has been dealt with in the LABOUR GAZETTE during the past two years, the last reference being in the issue for May, 1927, page 517, when the provisions of the Family Allowances Act of New Zealand were outlined. In several European countries, notably in Belgium, France and Germany, systems of family allowances have been in operation for a number of years. In Great Britain, the Royal Commission appointed in 1926 to investigate the British coal strike, recommended the adoption of a scheme of family allowances in the coal mining industry (LABOUR GAZETTE, May, 1926, page 426). In June of the same year the convention of the Women's Co-operative Guild of Great Britain urged the adoption of family allowances on a state basis. More recently, a conference on family allowances was held at the London School of Economics on October 15 and 17, 1927. This conference, convened under the auspices of the Family Endowment Society, adopted a resolution asking the government to appoint a royal commission to make an inquiry into the question of family allowances in all its aspects, and to make recommendations as to whether a system of family allowances should be introduced and if so by what methods.

Among those who contributed to the discussion was Mr. H. N. Brailsford, of the Independent Labour Party whose paper, "The State and Family Allowances," described the prepared scheme which had been incorporated into the party's official program.

Mothers' Allowances in North America

The November issue of the *International Labour Review*, the monthly magazine published by the International Labour Office, contains a comparative survey by Elsinore Haultain of the laws relating to mothers' allowances in North America. Legislation to this effect has been in force on this continent since 1911. Miss Haultain's survey of the laws of forty-two States of the United States, as well as of Alaska, Hawaii, and the District

of Columbia, and five of the nine Canadian provinces (Alberta, British Columbia, Manitoba, Ontario and Saskatchewan), sets out the principles on which the grant of allowances is made, the conditions for the grant of allowances, and the financial and administrative provisions adopted in each case.

The writer observes that "if the granting of mothers' allowances is not a final act of social justice, it is yet a move in the right direction. It is a move which has met with the unqualified approval of social thinkers and social workers wherever it has been tried, which has given to thousands of mothers the courage and the means to continue what must otherwise have been a losing struggle, and to thousands of children a chance to grow up without the stigma which attaches to an 'institutional' child, or the many temptations which assail the youngster who 'carries the key' all day while his mother is away working."

Comparative earnings of male and female workers in New York

The Department of Labour of the State of New York, in a special bulletin (No. 143) lately published, gives the results of a comparison of men's and women's employment and earnings over the two-year period, June, 1923-5. Separate details as to the employment of men and women is said to be presented for the first time in this report. It is found that in the matter of employment women furnish a large proportion of the workers employed in irregular or less highly organized industries. They form also the larger part of the irregular forces in the more highly organized industries. Women receive, on an average, only a little more than half the earnings of male factory workers in New York. They are usually in different occupations from men, and for this reason it is difficult to ascertain the exact reason for the inequality of wages as between men and women, and "whether women are paid only about half as much as men workers because their skill and strength are worth only half as much, or because their wages are influenced by social pressure and lack of bargaining power." Women's average wage, by industries, ranged in 1924-5 from $12.50 a week in the canneries to $24 in women's clothing. The averages for men started at almost $26 in the candy factories and went up to $44.50 in women's clothing. Earnings as high as $40 or $45 a week for women were found in a few industries with strong organizations. The divergence was less marked in New York city than in factories elsewhere in the State. The report states that "perhaps the most impressive fact brought out in the whole study is the large reserve of labour necessary to maintain the working force that appears on the pay rolls of each industry.....In this outer circle of the half-employed the proportion of women is relatively greater than that of men."

Inquiry into Alberta mining disaster

The judicial inquiry into the McGillivray Creek mine disaster of November 23, 1926, at Coleman, Alberta, which resulted in the death of ten mine workers, commenced its sessions on November 15. As stated in the April, 1927, issue of the LABOUR GAZETTE, page 377, the Legislature of Alberta, at its last session appointed the Hon. Chief Justice Harvey as a commissioner to conduct an inquiry under the Public Inquiries Act into the explosion. The delay in commencing the inquiry was due to repeated slides, which blocked some of the main passages in the mine, thus preventing an early investigation.

During the proceedings a written report was submitted to the Commission by the miners' committee. Mr. Frank Wheatley, president of the Mine Workers' Union of Canada, in presenting the report stated that following the disaster this committee had carried on its own investigation, and that when the mine was pumped out careful examination was made of the wrecked portion to determine if possible the cause of the explosion. The committee's report attributed the disaster to the ignition of gas or coal dust, following blasting with an explosive known as Gelpermite No. 1, which was alleged to have given off a flame (this particular class of explosive is understood to have been taken off the list of permitted explosives since the disaster). The report also deplored the fact that "no Government testing station exists in Canada for the purpose of testing explosives, permitted or otherwise, which are now in use in the mining industry in Canada," and stated that the attention of the federal and provincial governments should be drawn to this fact, adding that "Canada should not be obliged to draw on sources outside of this country for important and necessary information on which rests the preservation of both life and property."

Another recommendation of the miners' committee was that in future mine explosions, when it is considered necessary to flood a mine in which there are human beings who are presumed to be dead, the representatives of the miners should first be consulted by the mine officials before such flooding is commenced.

In admitting the report as evidence, Chief Justice Harvey commented on the useful nature of the statements submitted by the miners' committee, but stated that he could not make any recommendations based on the report, as whatever action might be taken would be determined by the government following the findings of the commission inquiry.

The findings of the commission had not been announced as this issue went to press.

Protective legislation for women

The Standing Joint Committee of Industrial Women's Organizations of Great Britain, representing over one million women, recently declared itself as being in favour of special protective laws for women, and as opposed to certain feminist groups which have condemned such discriminating legislation. (References to this controversy, which has arisen both in Great Britain and the United States, were made in the Labour Gazette, September, 1927, page 926, and in the previous issues). The committee states that protective legislation for women can be divided into three classes:—

"1. Provisions that would be good for men as well as women, but which can be obtained for women and not for men at the present time. Legislation regarding hours of work comes under this heading. Not all the efforts of labour, and of agreements at International Labour Conferences, have been sufficient to secure 48-hour legislation for all workers. We prefer to take what regulation we can get rather than to delay it.

"2. Regulations that are more needed for women than for men, because women are less fitted than men for certain dangers and specially heavy muscular work. Under this heading comes the exemption of women from all forms of active service; their prohibition in dangerous industrial processes, such as work in underground mines, outside window cleaning, the cleaning of dangerous machinery; also regulations as to the lifting of heavy weights, exposure to excessive heat, and the handling of poisonous substances which may be specially injurious to women. The prohibition of nightwork, in so far as night work is necessary, may be placed in the same category. If women could be relieved of domestic duties, it may be that their resistance to industrial fatigue would approximate more nearly to that of men, but legislation has to deal with things as they are.

"3. Some forms of protection are necessary for women because of their functions as mothers. Under this heading come the provisions proposed by the Maternity Convention adopted by the International Labour Conference in 1919. This convention, which has not yet been ratified by our country, declares that women workers should be prohibited from working for six weeks after childbirth, should have the option of not doing so for six weeks before, and have adequate maintenance during the whole period.

"Our position, therefore, is that we take whatever we can get under all three heads, and if we cannot get it for men, or it is not necessary for them, we endeavour to secure it for women alone."

Cost of hospital treatment for compensation cases

The various provincial Workmen's Compensation Acts make provision for the rendering of medical and surgical aid to workmen who sustain injuries in the course of their employment, payment for such treatment being generally furnished or arranged for by the boards and paid for out of the accident funds. The Acts stipulate that the fees or charges for medical aid must not be more than would be properly or reasonably charged to the workman concerned if he himself were paying the bill. The question of the amount of the hospital charges was discussed at a conference held in 1925 between the Ontario Board and the legislative committee of the Ontario Hospital Association, and as a result of this discussion the board decided, where the services supplied by the hospitals are satisfactory, to make an increase of 50 cents per day in the fees for Workmen's Compensation Board resident patients, making the allowance thereafter $2.50 per day for hospitals receiving government grant and $3 per day for hospitals not receiving government grant, together with a reasonable allowance for operating room when necessary, not in any case to exceed $5. These rates have applied to services rendered since that date. The board's rules provide that patients are to be accommodated in semi-private or surgical wards where possible, that outside surgeons are to be permitted to have charge of cases, and that the per diem allowance includes dressings, laboratory fees, and emergency room on admittance, except in extreme cases.

Money and unemployment

An article entitled "Money and Unemployment" is contributed to the November *International Labour Review*, the monthly publication of the International Labour Office, by Henri Fuss, Chief

of the Unemployment Service. The close correspondence in most countries during the past few years between the alternate rises and falls in the general level of prices and the fluctuations of employment and unemployment is explained by the author to be not mere coincidence but really cause and effect. Mr. Fuss's article states that public opinion in Europe, as in the United States, is becoming increasingly and more definitely in favour of the view that the purchasing power of money must be stabilized, and that the problem to be solved is not merely that of stabilizing the exchanges, which is now practically settled, but rather and above all that of stabilizing the purchasing power of the monetary standard itself. He concludes the article with a reference to the declarations adopted by the International Association for Social Progress at its last assembly held at Vienna in September, 1927, as follows:—

"Anarchy must not be allowed to prevail with respect to money and credit. By the influence that the central banks of issue should be able to exercise on the credit market; by the supervision which the States themselves should exercise over the banks of issue, while refraining from abusing their powers in order to sustain an unbalanced budget; finally, by an international agreement between the banks of issue, the circulation of money and of all other credit instruments which are substitutes for money should be governed in such a way as to keep step with the changes in production and trade. Although the evil of unemployment will not have disappeared entirely on the day this end is achieved, at least it will be largely reduced, for one of its most important causes will have been eliminated."

Employers' ideal labour union

The December number of *Facts for Workers*, the monthly review published by the Labour Bureau, Incorporated (New York), quotes a statement recently made by Mr. Staunton B. Peck, chairman of the Open Shop Committee of the National Association of Manufacturers, describing the features of an "ideal labour union." This statement is declared by the review to represent "the honest convictions of decent employers of labour the country over at the present time." According to the statement there are seven features of a trade union which would be acceptable to employers:

First, while seeking to enrol the fullest possible membership, it would in no way discriminate against anyone who for any reason preferred to remain outside.

Second, in the discussion of all differences with the management the representatives of the union, if not actual employees, would at least be thoroughly conversant with all conditions of the particular plant or company and have no outside interests to serve.

Third, settlement of all differences concerning conditions and terms of employment would be by conference, and with arbitration as a final resort in case of failure to reach agreement.

Fourth, strikes, whatever may be the outcome, cause irreparable loss to all parties concerned, and are a most uneconomic and unsatisfactory way of settling differences. They would not be permitted. This would be especially true of so-called 'sympathetic strikes' or those arising from jurisdictional disputes. With such a principle in active force, boycotts and lockouts would become things of the past.

Fifth, violence and injury to persons or property would be sternly prohibited and punished. As a corollary to this, though needless if the principle were lived up to, labour associations should be given power to sue and accept the right to be sued.

Sixth, indolence and incompetence would be discouraged, and if persisted in, lead to forfeiture of union membership. On the other hand compensation which insured increased wages to the better men in proportion to their skill and industry, would be approved and encouraged.

Seventh, union membership, to say nothing of leadership, would be forfeited to any man convicted of a crime or penal offense.

The city councils of Nanaimo and other cities in British Columbia have requested the provincial government to promote legislation to provide for health insurance within the province.

The Hon. George Spence has been appointed as minister in charge of the administration of the Bureau of Labour and Industries Act of the Province of Saskatchewan, succeeding the Hon. T. C. Davis.

The Alberta Association of Municipal Districts passed a resolution at its 19th annual convention, held last month at Edmonton, asking that the Mothers' Allowance Act of the province be amended to extend the payment of allowances to the sister of a widow or other person caring for the children of a mother after her death.

GENERAL REVIEW OF THE INDUSTRIAL SITUATION

THE employment situation throughout Canada was reported by the superintendents of the Employment Service of Canada at the end of November to be as follows:—

In the Province of Nova Scotia the agricultural industry was seasonally quiet. Fishermen reported fairly good catches. Building and construction, particularly at Halifax, appeared very active for the season: the activity at this centre was accounted for by the large projects recently put in hand, including two new hotels. The manufacturing industry was rather brisk, including the iron and steel groups. Coal mining production for the time of year was very satisfactory. Demands for workers for the logging industry had hitherto been quiet, but prospects were fair. Transportation, both by water and rail, was reported as good. Trade was satisfactory. With a fair demand for women domestic workers, sufficient applicants were registering at the different employment offices.

In New Brunswick the fishing industry likewise reported fairly good catches. Logging was quiet, and very few demands for workers were being received. Manufacturing lines were normal, only minor fluctuations being reported. Although fairly busy at Moncton, the building and construction industry was gradually closing down at most points. Trade was stated to be very good, while transportation was fair. A satisfactory number of placements of women domestic workers were being made.

The demands for farm workers registered at the Quebec employment offices were few in number. Placements in the logging industry throughout this Province were gradually falling off, as the camps had been fairly well supplied with workers during preceding weeks. Practically all lines of manufacturing were normally busy except the leather trades, which were singled out as being fairly quiet. While construction at some centres, notably Montreal, was being curtailed for seasonal reasons, Hull and Quebec reported the placement of several building tradesmen. Transportation was active and the usual heavy demand for longshoremen, preparatory to the closing of navigation at Montreal, was experienced. While trade showed some fluctuation in a downward direction, a good holiday business was anticipated. Contrary to past experience, a surplus of women applicants for domestic work was reported.

From Ontario it was reported that the demands for farm hands were very light, and orders were easily filled. While the position of the manufacturing industries throughout the Province varied from place to place, it appeared that most factories were working at capacity, while overtime was reported from one or two centres; some seasonal contractions in this group were reported, but they were not of a serious nature. While building and construction showed a general curtailment, a number of centres reported continued activity on substantial works, and it would not appear that unemployment among building workers had yet attained very large proportions. There were fair demands for bush workers, but no shortage of capable applicants had yet developed. With operations in the mining industry healthily normal, an actual surplus of workers was reported in different districts. Except for cooks general there would not seem to be any demand for women domestic workers which could not be met locally.

In Manitoba the demands for farm workers were very small. Fairly heavy placements were being made in the logging industry, and while some slight shortages of experienced workers existed the camps were rapidly filling up. Construction work in general was quiet. However, the development of the Flin Flon mine promised very considerable work, as a vast amount of money is to be expended on railway, mining and auxiliary development. Already a million dollar development on a cement plant in connection with this project has been announced, and a branch line railway contract has been let. The effect of this work on the employment situation throughout the province for the next several months will be quite considerable, although at the present time there would not appear to be any shortage of labour for such of the work as will be undertaken immediately. Trade throughout the Province was reported as improving. There was a fair demand for women houseworkers.

With a fair demand for farm workers in Saskatchewan, no shortage of applicants was reported. The weather was causing the usual seasonal curtailment in the construction industries. From the Estevan district the coal mining industry was reported to be busy. There was a fair demand for logging workers. With no noticeable shortage of women houseworkers, the demand for them remained rather stationary. While applicants at the employment offices throughout Saskatchewan were on the increase, conditions for the season remained fairly satisfactory.

Demands for farm hands in Alberta were fairly heavy, many being engaged for the conclusion of harvest work: however, weather conditions had seriously interfered with the winding-up of the threshing, and it was doubtful that all of it could be finished. From the Lethbridge district it was reported that several thousand tons of sugar beets had been frozen in the ground and would amount to a loss. Building and construction activity continued well for the season. There were fair demands for logging workers. With the coal mines rather busy, some placements were being made, but a surplus of workers was reported, especially at Drumheller. There were the usual demands for women domestics, with fair supplies of applicants. The general situation was rather favourable.

In British Columbia the logging industry showed fair activity, but generally speaking there was a surplus of workers. Metal mining remained normal. Construction was stated to

be fairly good for the season. Manufacturing was likewise fairly good, but there was no demand for workers. While unemployment was undoubtedly on the increase in the Coast Province, this situation being somewhat aggravated by the influx of workers from the Prairies, the general situation might be summed up by the statement that it was not unfavourable for the time of year.

EMPLOYERS' REPORTS.

Employment at the beginning of November showed the customary contraction but the losses were smaller than in 1926, and activity continued at a higher level than on the corresponding date in any other year since 1920. The Dominion Bureau of Statistics tabulated statements from 6,221 employers, whose payrolls were reduced from 903,099 persons on October 1, to 891,105 at the beginning of November. Reflecting this decrease, the index number (with January, 1920, as the base equal to 100) declined from 109.0 in the preceding month to 107.5 on the date under review, as compared with 102.8, 97.1, 93.0, 98.8, 95.8 and 90.2 on November 1, 1926, 1925, 1924, 1923, 1922 and 1921, respectively.

Curtailment was registered in all provinces except Quebec, where there was a minor gain. In the Maritime Provinces there were continued reductions, particularly in construction, but also in manufacturing, mining and transportation, while logging reported important seasonal increases. In Quebec, manufactures and trade showed moderate improvement, and there were marked seasonal advances in logging, while construction, transportation and services recorded curtailment. In Ontario, the declines were smaller than on November 1, 1926, when employment was not so active as on the date under review. The most extensive recessions were those of a seasonal nature in construction, canning and saw-milling plants and transportation, while logging, textiles and trade were decidedly busier. In the Prairie Provinces, steam railway operation afforded considerably more employment, and coal mining, and logging and trade were also more active; manufacturing on the whole was unchanged, but construction and services showed contractions. In British Columbia, the greatest losses were in lumber mills, construction and transportation, while logging and mining were much more active.

Additions to staffs were registered in Montreal, Quebec and Hamilton, while in Toronto, Ottawa, Windsor and the other Border Cities, Winnipeg and Vancouver there were reductions. In Montreal, manufactures, shipping and stevedoring and trade reported increased activity, while seasonal losses were recorded in construction and services. In Quebec City, construction showed most improvement; other industries reporting only slight changes. In Toronto, the bulk of the shrinkage was in construction, while manufacturing was busier, particularly in textile factories. In Ottawa, practically all the curtailment took place in sawmills, but construction was also seasonally slacker; on the other hand, trade showed heightened activity. In Hamilton, the most marked advances were in trade, although manufactures also showed improvement. In windsor and the other Border Cities, seasonal dulness in automobile plants and in construction caused the decrease. In Winnipeg, trade reported considerable advances, but manufacturing, transportation and construction released help. In Vancouver, construction and transportation showed most of the reduction.

Further and more pronounced shrinkage of a seasonal character was noted in manufactures, chiefly in the lumber and food-canning industries, while textile, rubber, tobacco and some other factories registered considerable advances. There were large increases in logging and trade, but construction and maintenance and services showed decided seasonal losses, and the tendency was also downward in communications and transportation.

An article elsewhere in this issue gives in some detail the employment situation as at the beginning of November, 1927.

TRADE UNION REPORTS.

The situation among local trade unions at the close of October as was shown by the returns tabulated from 1,641 labour organizations with a combined membership of 172,737 persons was slightly less favourable than that registered at the end of September, the percentage of idleness on October 31st standing at 3.9 as compared with percentages of 3.1 in the previous month and 2.6 in October last year. In comparison with the September returns Quebec, Ontario, Manitoba, Alberta and British Columbia unions reported lessened employment, and the other provinces small increases. When comparing with the October, 1926, conditions, Nova Scotia, New Brunswick and British Columbia Unions alone registered heightened activity, and the remaining provinces greater unemployment.

A more detailed report of the situation among local trade unions at the close of October will be found on another page of this issue.

EMPLOYMENT OFFICE REPORTS.

During the month of October, 1927, the offices of the Employment Service of Canada referred 47,079 workers to positions and effected a total of 45,365 placements. Of these the placements in regular employment were 33,461, of which 29,632 were of men and 3,829 of women. The placements in casual work numbered 11,904. Employers notified the Service of 48,678 vacancies, of which 38,311 were for men and 10,367 for women. Applications for work were received at the offices from 43,848 men and 12,752 women, a total of 56,600. A marked decline is noted in the volume of business transacted when the above figures are compared with those of the preceding month, but a substantial increase is shown in the records when compared with October last year, the reports for September, 1927, showing 88,426 vacancies offered, 86,797 applications made and 77,242 placements effected, while in October, 1926, there were recorded 44,120 vacancies, 50,838 applications for work, and 40,453 placements in regular and casual employment. A report in detail of the work of the offices for the month of October, 1927, may be found elsewhere in this issue.

PRODUCTION IN CERTAIN INDUSTRIES.

Some figures indicating the recent movements of trade and industry are given in the table on page 1280.

The Dominion Bureau of Statistics reported that the physical volume of production in Canada was slightly larger during October than in the preceding month, according to the *Monthly Review of Business Statistics*, published by the Dominion Bureau of Statistics. A comprehensive index of the physical volume stood at 144.9 in October, compared with 143.6 in September. The moderate increase was due to greater activity in construction, carloadings and the paper industry. Favoured by easy money conditions, building operations, after adjustment for seasonal tendencies, were at a higher level in October than in any other month of the present year.

A further decline in manufacturing activity was shown in October. Of the sixteen items which are included in the index of the physical volume of manufacturing, maintained in the Dominion Bureau of Statistics, eight showed expansion, but the increases were more than counter-balanced by the greater declines of the remaining factors. Automobile production declined sharply in October, and the primary iron and steel industry was at a low level of operation, although the output of steel was somewhat greater than in the preceding month. The imports of raw cotton and wool were in greater volume, and newsprint production was the largest on record.

The output of coal from Canadian mines during September increased 1 per cent over the production for the preceding month, and 4 per cent greater than the average for September in the past five years. The figures were 1,339,422 tons in September as against 1,317,332 tons in August and an average of 1,280,405 tons during the five preceding years. All the coal-producing provinces, except Nova Scotia, showed increases in production as compared with the preceding month, and the provinces of Nova Scotia, Alberta and British Columbia showed increases as compared with the average for the month in the five preceding years.

Men employed in the coal mines of Canada during September numbered 28,093, of whom 21,689 worked underground and 6,404 on surface, as compared with a total of 27,210 in August, of whom 20,917 worked underground and 6,293 on the surface. Production per man was 47.7 in September as against 48.2 tons in August. During September the production per man-day was 2.3 tons, being the same as in August. The tonnage lost was largely due to "lack of orders."

BUILDING PERMITS AND CONTRACTS AWARDED.

According to a report prepared by the Dominion Bureau of Statistics, the value of the building permits issued by the municipal authorities in sixty-three cities in Canada during the month of October, 1927, amounted to $18,838,558, as compared with $14,410,212 in September, 1927, and with $14,738,402 in October, 1926.

The *McLean Building Review* estimates the total value of the construction contracts awarded in Canada in November, 1927, at $30,260,500. Of this amount, $11,422,500 was for residental construction; $10,619,400 for business buildings; $4,614,600 for public works and utilities, and $3,604,000 for industrial undertakings. The apportionment of contracts awarded by provinces, during November, 1927, was Quebec, $13,442,300; Ontario, $10,087,600; British Columbia $3,162,800; Prairie Provinces, $2,869,300 and the Maritime Provinces $698,500.

The total value of construction contracts awarded in the Dominion during the January-November period, 1927, was $382,269,600, and was classified as business buildings, $140,212,100; residential, $118,288,800; engineering work, $85,094,500 and industrial work, $38,674,200. The distribution by provinces during the same period was: Ontario $169,306,900; Quebec, $129,063,600; Prairie Provinces, $45,143,600; British Columbia, $29,439,900 and the Maritime Provinces, $9,315,600.

The "contemplated new construction" in Canada during November, 1927, according to the same *Review*, totalled $76,554,600, $14,798,500 of this amount being for residential building; $54,927,900 for business building; $2,729,500 for industrial building, and $4,098,700 for engineering (including bridges, dams and wharves, sewers, watermains, roads, streets and general engineering).

EXTERNAL TRADE.

A summary of Canadian trade prepared by the Department of National Revenue shows that in October, 1927, the merchandise entered for consumption amounted to $93,935,872, as compared with $91,802,777 in September, 1927, and with $88,127,214 in October, 1926. The chief imports in October, 1927, were: iron and its products, $18,491,787; fibres, textiles and textile products $15,227,441, and agricultural and vegetable products, mainly foods, $11,931,685.

The domestic merchandise exported amounted to $103,884,933, in October, 1927, as compared with $97,412,316 in September, 1927, and with $130,279,870 in October, 1926. The chief exports in October were in the group of agricultural and vegetable products, mainly foods, $38,019,391; wood, wood products and paper, $23,791,277, and animals and animal products, $18,406,251.

In the seven months ending October, 1927, exports of domestic merchandise totalled $666,707,492, and imports totalled $645,413,889.

Strikes and Lockouts

The time loss due to industrial disputes in November, 1927, was less than during October, 1927, but greater than during November, 1926. There were in existence during the month sixteen disputes, involving 1,868 workpeople, and resulting in a time loss of 11,718 working days, as compared with twenty-one disputes in October, involving 4,058 workpeople, and resulting in a time loss of 46,844 working days. In November, 1926, there had been recorded thirteen disputes, involving 1,133 workpeople and resulting in a time loss of 9,892 working days. Six of the strikes and lockouts commencing prior to November terminated during the month and two of the strikes and lockouts commencing during November also terminated during the month. At the end of November, therefore, there were on record eight strikes and lockouts affecting 216 workpeople, not including those strikes and lockouts in which employment conditions were reported to be no longer affected but which had not been formally called off.

Prices

The cost per week of a list of twenty-nine staple foods for an average family of five in terms of the average retail prices in some sixty cities was $11.07 at the beginning of November, as compared with $10.99 for October; $11.01 for November, 1926; $11.23 for November, 1925; $10.46 for November, 1924; $10.69 for November, 1923; $10.29 for November, 1922; $11.08 for November, 1921; $15.32 for November, 1920; $16.92 for June, 1920 (the peak); $13.65 for November, 1918; and $7.96 for November, 1914. The increase was due mainly to seasonal advances in the prices of eggs, dairy butter and milk. Less important advances occurred in the prices of cheese, potatoes, lard, and evaporated apples. Slight declines occurred in the prices of beef, mutton, pork, bacon, bread, flour, beans and prunes. Including the cost of fuel and rent with that of foods the total budget averaged $21.27 at the beginning of November, as compared with $21.18 for October; $21.24 for November, 1926; $21.51 for November, 1925; $20.81 for November, 1924; $21.19 for November, 1923; $20.89 for November, 1922; $21.60 for November, 1921; $26.13 for November, 1920; $26.92 for July, 1920 (the peak); $21.52 for November, 1918; and $14.36 for November, 1914. Fuel was practically unchanged. No changes were reported in rent.

In wholesale prices the index number calculated by the Dominion Bureau of Statistics was slightly lower at 152.2 for November, as compared with 152.4 for October; 151.4 for November, 1926; 161.2 for November, 1925; 157.7 for November, 1924; 153.3 for November, 1923; 151.9 for November, 1922; 153.6 for November, 1921; 224.5 for November, 1920; 256.7 for May, 1920 (the peak); and 207.4 for November, 1918. In the grouping according to chief component materials four of the eight main groups declined, two advanced and two were unchanged. The groups which declined were: the Vegetables and their Products group, due to lower prices for corn, oats, oatmeal, rolled oats, sugar, foreign fruits and potatoes, which more than offset advances in the prices of wheat, barley, rice, flour, rubber, coffee and tea; the Fibres, Textiles and Textile Products group, due mainly to lower prices for raw cotton, cotton yarn, raw silk and jute; the Iron and its Products group, due to slight declines in the prices of tin plate, wire and in steel bars; and the Chemicals and Allied Products group. The Animals and their Products group advanced, the prices of cattle, eggs, dry codfish, mackerel, calf skins and harness being higher, while the prices of hogs, sheep, beef, ham and lard were lower. The Non-Ferrous Metals group also advanced. The Wood and Wood Products group and the Non-Metallic Minerals group were unchanged.

PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907, DURING THE MONTH OF NOVEMBER, 1927

DURING the month of November the Department received reports from two Boards of Conciliation and Investigation established to deal with disputes between (1) the Canadian National Railways and certain of its employees, being sleeping car conductors, dining car stewards, chefs, cooks, waiters, porters, etc., as represented by the Canadian Brotherhood of Railroad Employees; and (2) the British Columbia Electric Railway Company, Limited, and certain of its employees, being members of Divisions 101, 109 and 134, Amalgamated Association of Street and Electric Railway Employees of America.

Application Received

An application for the establishment of a Board of Conciliation and Investigation was received during the month from workmen employed in the mines of the Canadian Collieries (Dunsmuir), Limited, at Extension, Wellington and South Wellington, Vancouver Island. The dispute arose in connection with negotiations concerning a new wage agreement, the employees making certain demands which were identical with those of the underground employees of the Western Fuel Corporation of Canada, Limited, concerning which a board was established during October, namely, the restoration of a daily bonus of 60 cents which had been deducted in 1925, and the readjustment of wage rates and working conditions. The Minister of Labour established a Board in the present case and appointed Mr. Wm. Fleet Robertson, Victoria, B.C., and Mr. Joseph Hitchen, Vancouver, B.C., Board members on the recommendation of the company and employees respectively. The Board had not been completed at the close of the month.

CORRECTION

In connection with the application of the clerks employed in the mechanical departments of the Canadian Pacific Railway Company, to which reference was made in the last issue of the LABOUR GAZETTE (page 1157, 1st column), the words "by the Canadian Pacific Railway Company" should have been inserted after the word "employed" on the 12th line from the foot of the column.

Report of Board in Dispute Between Canadian National Railways and Sleeping and Dining Car Employees

A report was received from the Board which dealt with a dispute between the Canadian National Railways and certain of its employees being sleeping car conductors, dining car stewards, chefs, cooks, waiters, porters, etc., as represented by the Canadian Brotherhood of Railroad Employees. The dispute related to the employees' demand for improved working conditions, increased wages and other changes, and some 1,100 employees were stated to be directly affected. By mutual agreement this dispute was on April 6 brought within the jurisdiction of the Board already established to deal with a dispute between the same company and its clerks, freight handlers, etc., members of the Canadian Brotherhood of Railroad Employees, composed as follows: Mr. W. J. Donovan, Winnipeg, Manitoba, chairman, appointed by the Minister in the absence of a joint recommendation from the other Board members; Mr. Peter White, K.C., Toronto, Ont., the employer's nominee, and Mr. H. S. Ross, K.C., Montreal, the employees' nominee. The board convened in Montreal early in April to deal with the dining and sleeping car case, and, with the concurrence of both parties to the dispute, adjourned to allow direct negotiations to be resumed. After allowing three weeks' time for negotiations, the chairman consulted with representatives of the disputing parties and arranged for a resumption of the board's sessions commencing on May 30. Sittings of the board were also held on June 1 and 2 and on several occasions during the first half of July. At the last session a verbal agreement, covering all matters in dispute, was reached between the parties and it was arranged that the details of the new schedule would be completed and a copy furnished the board. This was received by the board during November and was attached to the board report.

The agreement, which consolidates the schedules of wages, rules and working conditions on the various sections of the railway system previously covered by four agreements, provides for equalization of rates over the system, resulting in increases in wages ranging from $3 per month to $25 per month, and standardization of working conditions. Provision is made for free meals and uniforms throughout the system, and for improvement

in conditions as to overtime pay, detention and turn around runs. Schedules of runs were drawn up providing for the assignment of employees with the object of standardizing hours of work per day and per month.

Report of Board

November 25, 1927.

H. H. WARD, Esq.,
Registrar and Deputy Minister of Labour,
Ottawa, Ontario.

Re Canadian National Railways and Dining and Parlour Car Employees and Industrial Disputes Act.

DEAR SIR,—We beg to enclose herewith copy of agreement of settlement and schedule furnished us by the representatives of the Canadian National Railways and the Canadian Brotherhood of Railroad Employees who appeared before the Conciliation Board appointed herein under the order of the Honourable the Minister of Labour, under date the 6th of April, 1927.

The differences between the parties to the dispute were substantially agreed upon at the last sittings of the Board held in Montreal on or about the 15th of July last, and it was then understood that the parties to the dispute would go over all the details of the new schedule, and when finally arranged, they would furnish the Board with a copy of the agreement.

The said agreement, we understand from both parties to the dispute, represents an amicable settlement of all matters referred to the Board.

Yours faithfully,
(Sgd.) W. J. DONOVAN,
Chairman.
(Sgd.) HOWARD S. ROSS,
Board Member.
(Sgd.) PETER WHITE,
Board Member.

CANADIAN NATIONAL RAILWAYS

Schedule of Rules and Rates of Pay for Employees in Sleeping, Dining and Parlor Car Service

Rates of Pay effective July 16, 1927.
Rules effective September 1, 1927.

ARTICLE 1
SCOPE

(*a*) The following rates and rules shall govern the service of train employees of the Sleeping, Dining and Parlour Car Department in positions enumerated in the Wage Schedule set forth herein.

(*b*) For the purpose of this Schedule the word "employee" shall be understood to mean any employee filling any position incorporated in these rules, regulations and rates of pay.

ARTICLE 2
PROMOTION AND SENIORITY

(*a*) Promotion and seniority of employees will be confined to Districts and Groups as shown below, namely:—

Under Superintendent, Halifax

1. Dining, Cafe and Buffet Car employees and Sleeping Car Conductors, as one group.
2. Buffet-Sleeper, Parlor, Sleeping Car, and Observation Car Porters, as one group.

Under Superintendent, Montreal

1. Dining, Cafe and Parlor-Buffet Car Employees and Sleeping Car Conductors on former C.N.R. Lines, and Dining and Cafe Car Stewards and Waiters on former G.T.R. Lines, as one Group.
2. Sleeping Car, Parlor Car and Observation Car Porters on former C.N.R. Lines, former G.T.R. Dining Car Kitchen employees, Parlor and Parlor Buffet Car Cooks, and Porters on former G.T.R. Lines, as one group.

Under Superintendent, Toronto

1. Dining, Cafe and Parlor Buffet Car employees and Sleeping Car Conductors on former C.N.R. Lines, and Dining and Cafe Car Stewards and Waiters on former G.T.R. Lines (except Waiters on Trains 7 and 8 Port Huron-Chicago), as one group.
2. Sleeping Car, Parlor Car and Observation Car Porters on former C.N.R. Lines, former G.T.R. Dining Car Kitchen employees, Parlor and Parlor-Buffet Car Cooks and Porters on former G.T.R. Lines, as one group.

Under Superintendent, Winnipeg

1. Dining, Cafe and Buffet Car employees and Sleeping Car Conductors, as one group.
2. Buffet-Sleeper, Parlor, Sleeping Car and Observation Car Porters, as one group.

(*b*) All vacant positions and new positions covered by this Schedule shall be bulletined for fifteen (15) days on their respective Superintendents' Division, and senior applicants shall be given preference in filling vacancies, providing merit, fitness and ability are satisfactory. Bulletins will show location, classification of position, layover and home terminal. Employees desiring such positions, will file their applications with the designated officer within the time specified above, and the appointments shall be made as promptly as possible. When an appointment has been made the name of the appointee shall also be bulletined.

Exception—The foregoing rule (b) will not entitle employees to bid for positions on Summer runs when the rates for the vacant positions are equal to or lower than the rates they receive for their permanently assigned positions.

(*c*) Employees accepting promotion, and who fail to qualify, will be returned to their former positions without loss of seniority.

(*d*) Seniority of employees governed by this Schedule shall count from the date of last entry into the service in a position covered by this Schedule.

(*e*) Employees who have been discharged, shall, if not re-employed within one year, be regarded as new employees, except that an employee who has been discharged more than one year, may be reinstated when mutually agreed between the proper officer and the General Chairman of the Employees' Committee.

(*f*) Within sixty (60) days after the adoption of this Schedule, seniority lists showing names, positions and dates of last entry into positions covered by this Schedule will be posted in a place accessible to those affected. Such lists will be revised and posted in January of each year, and will be open for correction for a period of sixty (60) days from date of posting. On presentation of proof of error by an employee or his duly accredited representative, such error shall be corrected. Copies of seniority lists will be furnished the Local and General Chairman on request.

Example—The seniority of a Pantryman shall date from the time of his employment as a Pantryman, and when promoted to the position of Waiter his seniority as a Waiter shall date from the time he first starts to work as a Waiter.

The principle set out in this example is the one upon which the seniority of all employees shall be established, except for porters who for seniority and promotion purposes shall be considered as one class, also in respect to dining and cafe car stewards and chefs the present practice on each Region with regard to seniority and promotion will be continued.

(*g*) The rules for promotion and seniority do not apply to employees having less than six (6) months accumulated service.

(*h*) An employee not wishing to accept promotion becomes junior to the employee accepting such position, but for that position only. This will not debar any employee not wishing to accept promotion from applying for any vacancy occurring thereafter.

(*i*) Employees now filling or promoted to official positions with the Railways and employees elected as representatives of the employees covered by this schedule (who shall be considered as on leave of absence) will retain their seniority rights and rank and continue to accumulate seniority provided that same are asserted within thirty (30) days after release from such employment.

(*j*) In the event of reduction of staff, senior qualified employees shall be given preference of employment, and employees laid off will be given preference of re-employment when staff is increased. Employees desiring to avail themselves of this rule must file their names and addresses with the proper officer. Employees failing to report for duty or to give satisfactory reasons for not doing so, within ten (10) days of notification, will be considered out of the service.

(*k*) All employees will be given their choice of runs according to seniority, fitness and ability, when Fall General Change of Time Schedule goes into effect. After two (2) years' service Sleeping Car Conductors, Dining Car Stewards, Steward-Waiters, Buffet-Porters and Porters will also be given their choice of runs when Spring General Change of Time Schedule goes into effect, seniority, fitness and ability to govern. The runs shall be bulletined for a period of fifteen days and employees will be required to submit their choice within that time. Employees who fail to submit their choice within that time will forfeit their rights to a choice of run for that general change of time schedule only.

(*l*) Any employee failing to take up his run within ten (10) days of being assigned to same shall forfeit his rights to the next senior claimant unless he can show just cause to the Superintendent and Employees' Committee for failure to take up same.

ARTICLE 3

DISCIPLINE AND GRIEVANCES

(*a*) No employee shall be suspended (except for investigation), discharged or disciplined until given a fair and impartial hearing. The decision in such cases is to be arrived at by the Superintendent within fifteen (15) days from date of suspension. An employee found blameless in the matter under investigation, will be reinstated and paid Schedule Wages for the time so lost (one day for each twenty-four hours so held); if away from home will be reimbursed reasonable travelling expenses upon production of receipts. An employee may have the assistance of one or two employees during an investigation, if such employee so desires, and on request shall be furnished a copy of his own statements if made a matter of record at the investigation. The employee so affected will be given one day's notice of an investigation, but this shall not be construed to mean that a proper officer who may be on the ground at the time when the cause for investigation occurs shall be prevented from making an immediate investigation.

(*b*) If the decision is considered to be unjust an appeal may be made in writing to a higher officer by an employee or his accredited representative within fifteen days of the date the decision is rendered; such appeal shall set forth the grounds upon which it is made. The hearing shall be granted within ten (10) days from date appeal is received and the decision shall be rendered within five (5) days after completion of hearing.

(*c*) If a further appeal is taken it must be filed as provided in rule (*b*) within twenty (20) days of the date of the decision appealed from. On such appeals hearing shall be given and decision rendered as promptly as possible.

(*d*) Should final decision result in dismissal of employee, he shall be furnished transportation to the point at which he was engaged, but request for this transportation must be made by the employee within ten (10) days from the date the final decision was issued.

(*e*) The procedure for adjustment of grievances shall be as follows:—

First by the employee personally or through the Local Committee to his Superintendent or Officer immediately in charge.

After this appeal may be made through the General Chairman to the General Superintendent of the Department.

If the decision is still considered to be unjust, an appeal may be made in writing by the General Chairman to the highest officer of the Department within fifteen (15) days of the date decision is rendered.

(*f*) The Time Limits as provided in this Article may be extended by mutual agreement.

ARTICLE 4

ASSIGNMENT OF EMPLOYEES

(*a*) The assignment of Dining, Cafe and Buffet Car Crews, Sleeping Car Conductors and Porters, will be as follows:—

1. Trains 1 and 2, Halifax-Montreal, 6 days per week and one trip Saturday-Monday

between Montreal and Mont Joli, 5 crews, 6 Sleeping Car Conductors and 6 Sleeping Car Porters; between Montreal and Mont Joli, 3 Parlour Car Porters; between Moncton and Montreal, 4 Sleeping Car Porters.

2. Trains 3 and 4, Halifax-Montreal, 5 crews, 6 Sleeping Car Conductors, 6 Sleeping Car Porters, 6 Observation Car Porters; between Levis-Campbellton, 3 Sleeping Car Porters, Montreal-Moncton (Winter), 4 Sleeping Car Porters.
3. Trains 3-14 and 14-4, Halifax-Saint John, 3 Sleeping Car Conductors and three Parlour Car Porters.
4. Trains 1-411 and 20-8, Halifax-Saint John, 3 Sleeping Car Porters.
5. Trains 7-8, Halifax-Sydney, 3 Sleeping Car Conductors and 3 Sleeping Car Porters.
6. Trains 11-7 and 8-12, Truro-New Glasgow-Sydney, 3 Sleeping Car Porters.
7. Trains 45-28-51-52-27-46 Saint John-Edmundston, tri-weekly 2 buffet Sleeping Car Crews.
8. Trains 5 and 6, Halifax-Sydney, 3 crews.
9. Trains 19-20, Moncton-Saint John, one crew.
10. Trains 39-13 and 14-40, Saint John and Cape Tormentine (Summer) 2 crews. Trains 14-43, Saint John-Moncton (Winter) 1 crew.
11. Trains 85-86, Halifax-Yarmouth, 3 crews.
12. Trains 1-2, Montreal-Vancouver, 16 Observation Car Porters; Montreal-Winnipeg, 7 crews, 8 Sleeping Car Conductors, 9 Sleeping Car Porters, 9 Tourist Car Porters, Montreal-Cochrane, 5 Sleeping Car Porters (Winter).
13. Trains 11-12, Quebec-Cochrane, 4 crews, 5 Sleeping Car Porters.
14. Trains 16-11 and 12-15, Montreal-Cochrane, 5 Sleeping Car Porters.
15. Trains 12-11, Montreal-Island Pond, 1 crew.
16. Trains 21-22, Quebec-Chicoutimi, 2 crews.
17. Trains 23-24, Quebec-Chicoutimi, 6 Sleeping Car Porters.
18. Trains 15-24 and 16-23, Montreal-Rivière-a-Pierre-Chicoutimi, 1 crew, 4 Sleeping Car Conductors, 8 Sleeping Car Porters.
19. Trains 51-53-48-50, Montreal-Ottawa, 3 crews.
20. Trains 47-52, Montreal-Ottawa, 1 crew.
21. Trains 47-52 and 55-56, Ottawa-St. Albans, 1 crew.
22. Trains 16-17, Montreal-Portland (Summer Service) 2 crews; (Winter Service) 3 crews.

Assignment of Employees

23. Trains 14-15, Island Pond-Portland (Winter) 1 crew.
24. Trains 33-34, Montreal-Quebec, 3 Sleeping Car Conductors, 6 Sleeping Car Porters.
25. Trains 16-118-45, Montreal-Quebec, 2 crews, Trains 45-46, Montreal-Quebec (Winter) 2 crews, 2 Parlour Car Porters, (Summer), 2 Parlour Car Porters, Train 46, Montreal-Quebec, (Summer) 1 crew.
26. Trains 35-36, Montreal-Napanee, 1 crew.
27. Trains 51-52, Quebec-Edmunston, 2 buffet sleeping car crews.
28. Trains 15-14-21-16, Montreal-Windsor, 5 crews.
29. Trains 15-115-16-17-21-14, Montreal-Toronto-Detroit, 6 Parlour Car Porters.
30. Trains 3-4, Toronto-Winnipeg, 6 crews, 8 Sleeping Car Conductors, 8 Observation Car Porters, 8 Tourist Car Porters, 8 Sleeping Car Porters.
31. Trains 7-8, Toronto-Ottawa, 3 Sleeping Car Conductors, 3 Compartment Club Car Porters, 6 Sleeping Car Porters.
32. Trains 7-21-101-108-8, Ottawa-Hamilton, 3 Sleeping Car Porters.
33. Trains 39-40, Toronto-Sudbury (Summer), Trains 3-4 (Winter) 3 Sleeping Car Porters.
34. Trains 8-7 and 1-2, Toronto-Ottawa-North Bay, 6 Sleeping Car Porters.
35. Trains 5-6 Toronto-Ottawa (Summer), 3 crews, 2 Parlour Car Porters, (Winter) 2 crews, 2 Parlour Car Porters.

NOTE.—Trains 5-6, Toronto-Ottawa, 3 crews assigned during summer to protect week-end service trains 35-40 and 37-38, Toronto-Parry Sound.

36. Trains 17-15-14-6-18, Toronto-Chicago, 4 crews.
37. Trains 17-4 Toronto-Chicago, 3 Parlour Car Porters.
38. Trains 16-116-11, London-Hamilton, 1 Parlour Car Porter.
39. Trains 21-6 Toronto-London, 1 crew.
40. Trains 83-11-18 Daily, Trains 83-11 Sunday, Toronto-Detroit, 2 crews.
41. Trains 28-37, Toronto-Goderich, 1 crew.
42. Trains 42-45, Toronto-Huntsville, 1 crew.
43. Trains 103-104-105-106, Toronto-Niagara Falls, 1 crew.
44. Trains 93-94-103-104, Toronto-Buffalo, 1 crew.
45. Trains 168-184, 189-175, Toronto-Owen Sound, 1 crew.
46. Trains 15-115 and 12-6, Toronto-Detroit, 3 Parlour Car Porters.
47. Trains 27-30, Toronto-Belleville, 1 crew.
48. Trains 95-6 and 89-90, Toronto-Buffalo, 1 crew.
49. Trains 101-102 and 107-108, Toronto-Buffalo, 1 crew.
50. Trains 101-102 and 91-92, Toronto-Niagara Falls, 1 crew.
51. Trains 87-Daily, 80-Daily, ex Sunday Toronto-London, Train 6, Sunday only, London-Hamilton, 1 crew.
52. Trains 29-36 Daily, Trains 25-24 Sunday only, Toronto-Stratford, 1 crew.
53. Trains 80-6-36 and 36-5, London-Montreal, 3 Parlor Car Porters.
54. Trains 21-20, Detroit-Grand Haven, 2 crews.
55. Trains 7-8, Port Huron-Chicago, 2 crews, 2 Parlor Car Porters.
56. Trains 1 and 2, Winnipeg-Vancouver, 11 Standard Car Porters, 11 Tourist Car Porters.
57. Trains 1 and 2, Winnipeg-Edmonton, 4 crews, 5 Sleeping Car Conductors, 7 Sleeping Car Porters.
58. Trains 1 and 2. Vancouver-Edmonton, 5 crews, 6 Sleeping Car Conductors.
59. Trains 5-6, Winnipeg-Saskatoon, 5 Sleeping Car Porters, Trains 5-6, Winnipeg-North Battleford, 4 crews.
60. Trains 5-6, Saskatoon-Edmonton, 4 Sleeping Car Porters.
61. Trains 5-6, Edmonton-Prince Rupert, (Summer), 6 crews, 3 Sleeping Car Conductors, 7 Sleeping Car Porters, 3 Observation Car Porters (Winter), 3 crews, 4 Sleeping Car Porters.
62. Trains 5-6, Jasper-Prince Rupert, (Summer), 3 Sleeping Car Porters.

63. Trains 7-8, Regina-Prince Albert, 3 Buffet Sleeping Car Crews. Trains 7-8, Saskatoon-Regina, 3 Sleeping Car Porters.
64. Trains 9-10, Winnipeg-Dauphin, 3 Sleeping Car Porters; Trains 9-10, Saskatoon-Calgary-Dauphin, 4 crews; Trains 9-10, Winnipeg-Saskatoon, 4 Sleeping Car Porters, Saskatoon-Calgary, 4 Sleeping Car Porters.
65. Trains 15-16, Winnipeg-Le Pas, 3 Sleeping Car Porters; Trains 15-16, Winnipeg-Prince Albert, 2 crews, 3 Sleeping Car Porters.
66. Trains 20-19, Winnipeg-Duluth, 2 crews, 4 Sleeping Car Porters.
67. Trains 29-30, Winnipeg-Saskatoon, 4 Buffet Sleeping Car Crews.
68. Trains 14-13, Edmonton-Calgary, 2 crews.
69. Trains 25-26, Calgary-Warden, 1 crew.
70. Trains 34-33, Winnipeg-Port Arthur (Summer) 2 crews, 2 Sleeping Car Conductors, 2 Sleeping Car Porters, (Winter) 1 crew, 2 Sleeping Car Porters.
71. Trains 59-60, Prince Albert-Saskatoon, 1 crew.
72. Trains 79-80, Port Arthur-Longlac, 3 Buffet Sleeping Car Crews.
73. Trains 105-106, Kamloops-Kelowna, 1 crew.

(*b*) In the event of the Railways deciding to make any changes in the service as set up in the foregoing Schedule of Runs, or in the event of new runs being established, the number of employees or crews required to operate the service shall be arranged by mutual agreement between the Superintendent and Employees' General Committee.

(*c*) On Summer Runs the assignment of Car Conductors and Porters, and Dining, Cafe and Buffet Car Crews shall be arranged from time to time to meet requirements, and will be in accord with agreement to be reached between the Superintendent and the Employees' General Committee; provision being made for adequate rest at home terminal, the established hours of rest to be a basis on which this is to be determined.

(*d*) On runs where relief is now given to employees by putting relief men in service, this practice will be continued so long as the runs affected are not changed.

(*e*) Except in cases of emergency employees will not be used off their assigned runs; if so used they will be restored to their assigned runs at the earliest practicable opportunity.

ARTICLE 5

REPORTING FOR DUTY

Crews will report for duty one hour and thirty minutes before Schedule time of departure of trains, unless the Superintendent decides that less time will be sufficient, except that Porters who are required to make down berths, and Dining Car Crews who are required to serve a meal before departure of trains, will report one hour and thirty minutes before time set for receiving passengers.

ARTICLE 6

OVERTIME AND CALLS

Parlor, Sleeping and Dining Car Employees running on regular trains shall be paid overtime on the following basis:

(*a*) *"Late Arrival"*—When employees arrive at home or distant terminal station over three hours late and less than five hours, one-half day: five hours up to and including twelve hours, one day's pay: over twelve hours pro rata on the minute basis.

To arrive at the rate for overtime in road service (Late arrival time as covered by Rule "A") divide the monthly rate by two hundred and forty.

(*b*) *Terminal Detention*—Sleeping and Dining Car employees when held on duty after arrival of train at Home or Distant Terminal will be paid overtime for time so held (thirty minutes or less not to be counted) at pro rata rates on the basis of a twelve hour day.

(*c*) *Doubling Time*—When employees in regular line service are doubled en route delaying their return to their home terminal thereby losing part or all of the layover they would have received if they had returned to their home terminal without interference, they shall be paid overtime on the minute basis at pro rata rate for all time on duty in excess of their regular monthly assignment. The pro rata hourly rate will be determined by dividing the daily rate by twelve.

When an employee accumulates excess hours of service due to doubling en route on a run other than his regular assignment he will be paid for such overtime on the basis of the regular hours for such run.

(*d*) When employees in regular line service are doubled out from home or distant terminal, thereby losing part or all of the layover they would have received if they had completed their regular layover, they shall receive additional compensation for each hour of layover so lost at time and one-half on a twelve hour day basis with a maximum of twelve hours for each twenty-four hours period.

(*e*) When dining, cafe or buffet car employees are required to report for duty prior to regular time set they shall be paid for such time at pro rata rate on the basis of a twelve hour day.

(*f*) When employees are called upon to equip, strip, stock or transfer cars during their layover period they shall be paid pro rata for such time so lost on a twelve hour day basis with a minimum of one-half day.

(*g*) When employees assigned to a regular line service are assigned to Special Service, they shall be allowed proportionate layover for the period of their special service, on the same basis as for regular service, except that in the case of Porters and (or) waiters, it shall be optional with them to accept either the proportionate layover or payment on basis of Loss of Layover as per "Doubling from Terminals", Rule (d) of this Article.

ARTICLE 7

RELIEF WORK AND PRESERVATION OF RATES

(*a*) Employees temporarily assigned to higher rated positions shall receive the higher rates while occupying such positions; employees temporarily assigned to lower rated positions shall not have their rates reduced.

(*b*) When a Waiter is assigned to a Buffet Car, the Steward-Waiter or Buffet-Porter shall be paid the rate of a first year Steward.

ARTICLE 8

EXTRA SERVICE

(*a*) When a regular train starts from a terminal with more than five (5) Sleeping Cars in service, an extra conductor will be put on, when available.

(*b*) In cases of emergency, Porters called upon to perform Porters' duties in two (2) cars shall be paid extra to the monthly rate at the pro rata hourly rate for the time actually worked in such emergent service.

(*c*) Any Porter who performs the duty of a Porter-in-Charge on any portion of a trip shall be rated and paid the "In-Charge" rate for the entire trip. Collecting transportation at Stations or returning same in transit or end of run shall not be considered as doing the work of a "Porter-in-Charge."

A Porter shall not be required to handle "In-Charge" more than one car.

ARTICLE 9

LODGING AND LIVING EXPENSES

(*a*) Employees of this Department while on duty on trains to which Dining, Cafe or Buffet Cars are attached will be served meals free.

(*b*) Employees deadheading on Railway business will be provided with free meal and berth orders.

(*c*) Sleeping Car Conductors and Porters called upon to do stand-by duty at intermediate points not being home terminals, will be allowed $1.50 per day after the expiration of twenty-four hours, to defray living expenses.

(*d*) Any employee temporarily performing duties away from home terminal will be allowed reasonable living and travelling expenses on presentation of proper receipts when obtainable. This rule will not apply to employees in the exercise of their seniority rights nor to employees who have been temporarily laid off on account of reduction in staff.

(*e*) Sleeping, Dining and Parlor Car employees will be provided with free sleeping accommodation at layover points away from home station.

ARTICLE 10

ATTENDING COURT OR INVESTIGATIONS

Employees attending Court or Investigations as witnesses, at the request of the proper officer of the Railways, will receive their Schedule Wages and if away from home will also be allowed their actual reasonable expenses. If called during Rest Period employees will be compensated for rest time so lost. In Court cases the witness fees to go to the Railways, except in cases of Porters and Waiters, who may retain the Court fees.

ARTICLE 11

UNIFORMS

(*a*) Employees required to wear uniforms shall be furnished with same free of charge.

(*b*) Parlor and Sleeping Car Conductors, Porters, Cafe Parlor Car Stewards and Steward-Waiters, shall be furnished with overcoats when necessary, free of charge.

(*c*) When a uniform or overcoat is lost through negligence on the part of the employee, the cost of replacement will be charged to the employee responsible.

(*d*) During the Summer Season, June 1 to September 30, Porters will wear clean white coats throughout the days, and while receiving or discharging passengers at all Stations.

ARTICLE 12

FREE TRANSPORTATION AND LEAVE OF ABSENCE

(*a*) Members of the General Committee shall be relieved when required for Committee Work, and shall be furnished necessary transportation. Sufficient notice must be given to Superior Officer so that the interests of the Railways will not suffer.

(*b*) Employees will, if circumstances permit, be relieved not exceeding four (4) times each year, and furnished transportation for the purpose of attending their meetings, such transportation to extend only to the limits of the Superintendent's Division on which they are employed.

(*c*) Employees, at the discretion of the Railways, will be granted, not to exceed sixty (60) days, leave of absence, permission to be obtained in writing, and unless employees so furloughed report for duty on or before expiration of such furlough, his name shall be taken from the seniority roster, and if he returns to work thereafter, such employee shall rank as a new employee, provided, however, such furlough may be extended by application in writing to the proper officer in ample time to receive permission or return to duty at the expiration of leave or absolute proof furnished as to bona fide sickness preventing such return.

Leave of absence, under this rule, shall not be granted for the purpose of engaging in work outside the Railway Service, except in cases involving sickness or other exceptional circumstances.

ARTICLE 13

SERVICE LETTERS

(*a*) When an employee is dismissed or leaves the service after giving due notice required by the rules, such employee shall be given the usual certificate of service, showing the capacity in which employed and whether discharged or leaving of own accord, if discharged, cause of dismissal to be stated.

(*b*) Persons entering the service of the Railways will, within thirty (30) days from date of employment, have returned to them all service cards and letters of recommendation which have been taken up for inspection by the Railways, except those addressed to or issued by the Railways.

ARTICLE 14

EQUIPPING, STORING AND STRIPPING CARS

(*a*) All linen, clean and soiled, and Porters' equipment boxes will be placed on and removed from cars by the Linen Porter.

(*b*) Line Sleeping Car Porters will not be required to put on headrest tidies, excepting that each day between terminals, they will be applied in sleeping cars by the porter immediately after beds are put away.

ARTICLE 15

COMPOSITION AND ADJUSTMENT OF CREWS

(*a*) Dining, Cafe and Buffet Car Crews will be adjusted to meet conditions; the adjust-

ment to be agreed upon between the Superintendent and the Employees' Committee.

(*b*) Under normal conditions the crews on dining, cafe and buffet cars shall be as follows:

(1) The crew of a standard dining car shall consist of eight men, namely: Steward, Chef, Second Cook, Third Cook, Three Waiters and a Pantryman.
(2) The crew of a Cafe Car shall consist of five men, namely: Steward, Chef, Cook and two Waiters, except when cafe car is used for buffet service, the crew will consist of three men, namely: Steward, Buffet-Cook and Waiter.
(3) The crew of a Buffet-Parlour Car shall consist of two men, namely: Steward-Waiter and Cook, or Buffet-Porter and Cook.
(4) The crew of a Buffet-Sleeper shall be two men, namely: two porters.

(*c*) In the event of any new runs being established, the number of employees or crews required to operate same shall be arranged to the mutual agreement of the Superintendent and Employees' Committee.

ARTICLE 16

GENERAL

(*a*) Employees who do not handle the Railways' revenue, when discharged or resigning shall be given their time within forty-eight (48) hours of their discharge, Sundays and holidays excepted; providing all the railways' property is promptly turned in. Employees handling the railways' revenue will be paid immediately Audit Office clearance is received.

(*b*) When an employee is transferred by order of the proper officer to a run which necessitates a change of home terminal, such employee will receive free transportation for himself and dependent members of his family and household goods over C.N.R. lines when it does not conflict with the law, and will suffer no loss of time in consequence thereof.

(c) When an employee exercises his seniority rights to a run which necessitates change of home terminal he will receive free transportation for himself and dependent members of his family and household goods over C.N.R. lines when it does not conflict with the law, but free transportation under these circumstances need not be allowed more than once n each twelve month period.

NOTE.—Free Billing Orders to cover transportation of furniture and effects must be applied for and issued before shipment is arranged by employee.

(*d*) No fines will be imposed on employees.

(*e*) Unless negligence is established, employees will not be required to pay for lost, broken or damaged equipment.

(*f*) When employees are required to clean cars at layover points where regular car cleaning facilities are not available, employees will be paid seventy-five (75) cents for each car cleaned. When there is more than one employee on car, superintendent will decide to whom this work will be assigned.

(*g*) Any employee who may be quarantined while on duty shall be paid his regular schedule rate of pay while under quarantine.

(*h*) On cars provided with Porters, the linen, towels and other similar equipment will be placed in the immediate charge of the Porter. Other equipment will also be checked to the Porter, and in cases of loss, both the Conductor and the Porter will be held responsible. If the Conductor is ordered from his car short of destination on account of accident or other emergency, the Porter will be held solely responsible for the equipment after the Conductor leaves the car.

(*i*) Employees will be subject to the General Rules of the Railways in regard to leave of absence and free or reduced transportation.

ARTICLE 17

RATES OF PAY

	1st year	*2nd year*	*3rd year*
Dining Car—			
Stewards	$145 00	$160	$170
Chefs	140 00	150	165
2nd Cooks	110 00	120	—
3rd Cooks	95 00	—	—
Waiters	87 50	—	—
Pantrymen	77 00	—	—
Buffet Parlour Car Steward-Waiters	105 00	—	—
Buffet Parlour Car Cooks	115 00	—	—
Cafe Car Stewards	140 00	150	165
Cafe Car Chefs	138 00	148	160
Cafe Car Second Cooks	110 00	120	—
Sleeping Car Conductors	160 00	171	—
Sleeping Car Porters	80 00	85	90
Sleeping Car Porter in charge	105 00	—	—
Observation Car Porters	97 50	—	—
Buffet-Sleeping Car Porters (Two (2) Porters per Car)	100 00	—	—
Buffet-Sleeping Car Porter-Cook (one (1) man per car)	108 00	—	—
Buffet Parlour Car Porters	105 00	—	—
Parlour Car Porters in Charge	100 00	—	—

It is agreed that an employee at present receiving a higher rate than that specified in the Wage Schedule shall not have his rate reduced while occupying that position.

MONTREAL, October 1, 1927.

Report of Board in Dispute Between the British Columbia Electric Railway Company, Limited, and Its Employees

The findings of the Board of Conciliation and Investigation established to deal with a dispute between the British Columbia Electric Railway Company, Limited, and certain of its employees, being members of Divisions 101, 109 and 134, Amalgamated Association of Street and Electric Railway Employees of America, were received on November 30. The Board was composed as follows: The Honourable Mr. Justice D. A. McDonald, Vancouver, B.C., chairman, appointed by the Minister in the absence of a joint recommendation from the other two members, Messrs. A. G. McCandless and Percy R. Bengough, Vancouver, B.C., nominees of the employing company and employees respectively. The dispute related to wages and working conditions, 1,700 employees being directly affected. The report was signed by the chairman and Mr. McCandless and contained recommendations as to means of settlement of the dispute. A minority report was received from Mr. Bengough on December 3. The text of the majority and minority reports of the Board follows.

Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and of a Dispute between the British Columbia Electric Railway Company, Ltd. (employer) and certain of its employees, being members of Divisions 101, 109 and 134, Amalgamated Association of Street and Electric Railway Employees of America (employee).

To the Honourable
The Minister of Labour,
Ottawa, Canada.

SIR,—The Board of Conciliation and Investigation appointed in the above matter, consisting of Mr. Justice D. A. McDonald, chairman, Mr. A. G. McCandless (representing the company) and Mr. Percy R. Bengough (representing the employees) begs to submit the following report:—

The members of the Board met at the city of Vancouver, British Columbia, on the 23rd September, 1927, and were sworn by Mr. H. O. Alexander, Stipendiary Magistrate, and proceeded to organize and arrange for hearings.

The Board pursuant thereto met on 27th, 28th and 30th September, 3rd, 6th, 7th, 10th, 12th, 13th and 17th October, and 14th, 15th, 17th, 18th, 21st and 23rd November, 1927, when the company was represented by Mr. W. G. Murrin, Vice-President, and Mr. Wm. Saville, General Secretary of the company, while Mr. W. H. Cottrell, Mr. F. A. Hoover and others appeared for the employees.

According to records in our hands, the employees made application for a Board of Conciliation and Investigation on August 18th, 1927, for the purpose of considering the following:—

A request by employees for approximately 10 per cent increase in wages and certain alterations in working conditions, including request for two weeks' holidays, per year, with pay.

During the several adjournments which took place while the proceedings were in progress the representatives of the company and of the employees were able to meet and to adjust many of the differences which existed regarding working conditions. After the evidence had been completed and arguments submitted the Board adjourned for consideration of the matters involved and again took several adjournments to allow further negotiations for settlement to take place. In this regard the company finally made an offer to renew the agreement for three years from 1st September, 1927, upon the following terms:—

(1) That motormen and conductors receive an increase in pay of 2 cents per hour in lieu of Sunday overtime.

(2) That operators of one-man cars, including those in Victoria, be paid 70 cents per hour, being an increase in Victoria of 6 cents per hour and in Vancouver of 2 cents per hour.

(3) That track-men in the city receive an increase of 1 cent per hour and on interurban lines of 1½ cents per hour.

(4) That payment for over-time on Sunday be eliminated.

(5) That on trains running on interurban lines 30 minutes be allowed over 8 hours per day without the payment of over-time.

This offer was submitted to the representative of the employees, with the result that it was met by a counter-offer that one-car men in Victoria be paid on the same basis as similar men in Vancouver; that all employees receive an increase of 2 cents per hour with an equivalent increase to all salaried men; no change to be made as to interurban lines or Sunday over-time, and 1 cent per hour additional to be paid during the third year in consideration of the men signing a three-year agreement.

As it was evident there was no hope of either offer being accepted by the other side it became necessary for the Board to make an award. The proceedings and deliberations and conferences of the members of the Board were throughout very amicable, but in the end Mr. Bengough was not able to join the majority report which is hereby made.

The chief arguments of the employees in asking for an increase in wages were:—

(1) That they felt themselves entitled to adopt a higher standard of living than their present wages would permit, in which connection they filed a statement showing that the average cost in Vancouver of adopting a reasonable standard of living for a family of five was $1,891.48.

(2) That motormen and conductors were not paid as high a wage as was paid to policemen, firemen, letter-carriers and postal clerks in Vancouver.

(3) That other street railway employees of Canada had received greater increases since 1919 than men employed in Vancouver.

(4) That employees in various trades in Vancouver had received increases since 1923, which increases had not been granted street railway employees.

(5) That increases had been granted to motormen and conductors since 1923 in some 77 places in Canada and the United States.

(6) That the wages of motormen and conductors in Seattle (where the street railway company is operated by the municipality) amount to 70 cents per hour, and in San Francisco (upon the railway operated by the municipality) the wages are 75 cents per hour.

(7) That the cost of living in Vancouver had increased proportionately to that of other cities in Canada since 1923.

(8) That the principle of granting holidays to workmen is gradually being adopted, particularly for motormen and conductors whose work is becoming more strenuous as street traffic has increased. They pointed out that in Detroit, Mich., Helena, Montana, San Francisco, Cal. (municipal), Edmonton, Alta. (municipal), Seattle, Wash. (municipal), Calgary, Alta. (municipal), Regina, Sask. (municipal), Buffalo, N.Y., Saskatoon, Sask. (municipal), Great Falls, Montana, Fort Wayne, Indiana, Brantford, Ont., and Tulsa, Oklahoma, holidays of varying duration, with pay, are granted to motormen and conductors.

The company, on the other hand, contended and offered evidence to show:—

(1) That the cost of living in Vancouver, Victoria and New Westminster had not increased since the present agreement had been entered into, but on the contrary had decreased.

(2) That all employees of the company are paid a higher wage than street railway employees in any other city in Canada, and, with the exception of the municipally owned systems of Seattle and San Francisco, higher than the employees of any system on the Pacific coast save Oakland and save Portland where the rates are the same.

(3) That aside from motormen and conductors employees of the company in other branches are paid wages as high and in many cases higher than those paid by other employers in and about Vancouver.

(4) That the principle of granting holidays with pay to an employee who is paid by the hour and is paid over-time for every extra minute employed is based on a wrong foundation and ought not to be introduced; that, while it is quite in order to grant holidays with pay to employees who are paid by the month and who are required from day to day to work over-time without pay, the rule should not be applied to men who work by the hour and are paid over-time for every extra hour they work.

The company further contended that the present agreement, if renewed, should be altered in two important particulars:—

(1) That over-time, which is now paid for Sunday work at the rate of time and a quarter, ought to be eliminated for the reason that it is an essential and necessary part of the work to be done in operating the street railway system that some men work on Sunday and that the motormen and conductors, all of whom receive a holiday of one day in eight, ought to treat Sunday, in regard to pay, the same as any other day of the week and particularly for the reason that those who work on Sunday are only called upon to work from 4 to 6 hours, which they may take either in the forenoon or afternoon, giving them liberty to attend church at least once a day with their families.

(2) The arrangement by which motormen and conductors on interurban trains charge over-time in cases where the schedule cannot be arranged to allow a man to work exactly an 8-hour day ought to be eliminated and that 30 minutes ought to be allowed to enable the company to make its schedule coincide with the trips necessary to be made, on the same principle that 20 minutes are allowed in the case of city cars.

We are of opinion on all of the evidence adduced that the company has established that the cost of living in Vancouver, Victoria

and New Westminster has not increased since the present agreement was entered into, but the weight of evidence would go to show that such cost of living has decreased.

We are further satisfied that the employees of the company are paid as high a wage as in the city of Portland and (save as to Seattle, Oakland and San Francisco) higher wages than in any other city in Canada or in the Pacific coast cities, and we are also satisfied that the concessions granted to the employees of the company are of greater value than any concessions granted by any other company brought to our attention. These include free passes, and light and gas and electrical supplies at reduced rates, and are, according to the figures offered by the company, worth approximately 3 cents per hour to every employee.

Holidays.—As to holidays with pay, we are of opinion that the granting of same is contrary to principle; that while men working by the month, who are obliged to work overtime from day to day without pay, are entitled to holidays, this does not apply to men who work by the hour and are paid for every hour over-time worked. We are unable, therefore, to recommend that the men's request for holidays to men paid by the hour be granted.

Sunday Over-time.—With regard to the company's request that payment for Sunday over-time be eliminated, while we are of opinion that such over-time ought not to be allowed in an employment in which Sunday work is a necessity, nevertheless this principle having been once recognized we are not disposed to recommend any change at this time.

Conclusions.—Taking all matters into consideration we recommend, in the interest of both the company and the employees and with a view to obtaining stability in the employment, that an agreement be entered into for a term of three years from the 1st September, 1927, in the terms of the present agreement with the following exceptions:—

(1) That Paragraph 51A of the present agreement be amended by inserting the words "and 20 minutes" after the words "8 hours" in the second line thereof. We are quite unable to see why the same rule should not apply to the men engaged on interurban passenger trains as applies to men on city lines.

(2) That track-men on city lines be allowed an increase of 1 per cent per hour and on interurban lines 1½ cents per hour. While we recognize that these men are paid a higher wage than is usually paid to men doing this class of work, nevertheless we feel that, having regard to the conditions under which they are called upon to work, the company might well grant the increase suggested.

(3) That motormen and conductors operating one-man cars in Victoria be paid at the same rate as men doing similar work in Vancouver, viz., 68 cents per hour. While it appears that the company is operating in Victoria without a profit, nevertheless we are unable to see why under any principle men doing the same work in Victoria ought not to be paid the same wage as those employed in Vancouver.

(4) That in consideration of the men entering into a three years' agreement, thereby giving stability to the company's operations, the company ought to pay for the third year an increase of 1 cent per hour to all motormen and conductors.

(5) That motor bus operators (Grandview line) be paid $130 per month.

All of which is respectfully submitted this 24th day of November, 1927.

(Sgd.) D. A. McDONALD,
Chairman.

(Sgd.) A. G. McCANDLESS,
Member of Board.

Minority Report

The Honourable PETER HEENAN,
Minister of Labour,
Ottawa, Ont.

DEAR SIR,—In accordance with your appointment of the 30th of August, 1927, I served on the above Board of Conciliation, and finding myself not in agreement with the other members of the Board, respectfully submit the following as my report:

That the evidence submitted by the employees justified their requests for improved conditions and entitled them to receive a substantial increase of wages. It was clearly established that wages in the majority of industries and in the districts throughout which the company operates have increased on an average of 13 per cent during the life of the last agreement made between the company and the employees. Wage increases being received by fellow-citizens have a more direct bearing, and should have precedence of consideration over comparative wages being paid in distant localities.

That the increases in speed and volume of passengers being transported in conjunction with the increased density and speed of other street traffic, in like proportion has increased the responsibility of those operating the street cars, and in my opinion fully justifies their requests for improvements to their standard of living.

(Sgd.) PERCY R. BENGOUGH,
Commissioner Representing the
November 26, 1927. *Employees.*

CANADIAN NATIONAL RAILWAYS EMPLOYEES' BOARD OF ADJUSTMENT No. 2

REPORTS have been received of five cases recently settled by the Canadian National Railways Employees' Board of Adjustment No. 2.

This Board was established towards the end of 1925 for the purpose of adjusting disputes arising between the management of the railways and the clerks and certain other office and station employees. The classes of employees coming under the Board are those given in the schedule of rules governing these classes which is contained in the existing agreement between the railways and the Canadian Brotherhood of Railway Employees. Board of Adjustment No. 2 is composed of the following members:—

Representing the railways—Messrs. H. Morton, Moncton, N.B., J. F. Aitchison, Toronto, Ontario, George Turvey, Toronto, J. M. Grieve, Toronto, Ontario.

Representing the employees—Messrs. A. R. Mosher, Ottawa, Ontario, M. M. McLean, Ottawa; N. L. Preston, Winnipeg, Manitoba; and C. H. Minchin, Calgary, Alberta.

An outline of earlier cases dealt with by the Board was given in the December, 1926, issue of this GAZETTE, and in previous issues.

Case No. 22.—Accounting Department—Atlantic Region.

This case, concerning the claim of an employee to the position of timekeeper and distribution clerk, was presented to the Board last March. Shortly afterwards a sub-committee of the Board was appointed to interview the parties to the dispute for the purpose of securing a settlement, and a settlement having been reached by this means, the case was closed on the docket of the Board.

Case No. 23.—Accounting Department—Montreal.

An employee in the Auditor of Agencies' Office, Accounting Department, Montreal, complained that promotion to a certain position for which he claimed to be the senior qualified applicant, was awarded to a junior employee. The company contended that the appointment was made under the "grade to grade" rule under which a position is awarded to the applicant having sufficient merit and ability, and with the longest service in the next succeeding grade. The evidence indicated that this case related to the same question as was involved in case No. 15 (LABOUR GAZETTE, July, 1926, page 646). The Board decided that the senior qualified applicant should be awarded the position.

Cases Nos. 24 and 25.—Accounting Department—Montreal.

These cases, concerning the claim of employees in the Auditor of Agencies' Office, Accounting Department, Montreal, had been presented to the Board last March, when consideration of them was deferred. A satisfactory settlement being reached later, the cases were withdrawn with the Board's consent.

Case No. 27.—Stores Department—Western Region.

Certain employees in the Stores Department at Transcona, Manitoba, submitted an alleged grievance to the Board, who appointed a sub-committee to interview the parties concerned for the purpose of securing a settlement. A settlement was accordingly reached, and the case was withdrawn.

Reference was made in last month's issue of the LABOUR GAZETTE (page 1176) to the pension scheme applicable to the police force of the city of Calgary. According to later press reports, Mayor Osborne, of Calgary, has announced that owing to the cost involved (estimated at $50,000 annually) there would not be at present any general extension of a pension scheme to include all civic employees.

STRIKES AND LOCKOUTS IN CANADA DURING NOVEMBER, 1927

THE number of strikes and lockouts in existence in Canada during November was sixteen, as compared with twenty-one the preceding month. The time loss for the month was greater than during November, 1926, being 11,718 working days as compared with 9,892 working days during the same month last year.

Date	Number of disputes	Number of employees involved	Time loss in working days
Nov. 1927	16	1,868	11,718
Oct. 1927	21	4,058	46,844
Nov. 1926	13	1,133	9,892

The record of the Department includes lockouts as well as strikes, but a lockout, or an industrial condition which is undoubtedly a lockout, is rarely encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout, included as such in the records of the Department, is a cessation of work involving six or more employees at its commencement and lasting at least one working day. Disputes of less than one day's duration, and disputes involving less than six employees, are included in the published record only when ten days' or more time loss is caused, but a separate record of such disputes is maintained in the Department, and the figures are given in the annual review.

The figures printed are inclusive of all disputes which come to the knowledge of the Department, and the methods taken to secure information practically preclude probability of omissions of a serious nature. Information as to a dispute involving a small number of employees, or for a short period of time, is frequently not received until some time after its commencement.

Eleven disputes, involving 1,679 workpeople, were carried over from October. Six of the strikes and lockouts commencing prior to November terminated during the month, and two of the strikes and lockouts commencing during November also terminated during the month. At the end of November, therefore, there were on record eight strikes and lockouts, as follows: bakers, Montreal, P.Q.; ladies' clothing factory workers, Toronto, Ont.; blacksmiths, Saskatoon, Sask.; stonecutters, Montreal, P.Q.; plasterers, Vancouver, B.C.; men's clothing factory workers, Montreal, P.Q.; cap factory workers, Hamilton, Ont.; and elevator erectors, Toronto, Ont.

The record does not include minor disputes such as are described in a previous paragraph, nor does it include disputes as to which information has been received indicating that employment conditions are no longer affected, although the unions or organizations concerned have not yet declared them terminated. Information is available as to four such disputes, namely, fur workers at Winnipeg, Man., September 25, 1926; plumbers at Windsor, Ont., April 5, 1927; electrotypers at Toronto, Ont., December 20, 1926; and sheet metal workers at Montreal, P.Q., September 1, 1927, the last two being put on the list in November.

Of the disputes which commenced during the month, three were to maintain union wages and working conditions, one for union shop and reduction in hours, and one against dismissal of employees. Of the eight strikes and lockouts which terminated during the month five were in favour of the employers, one in favour of the employees and two resulted in a compromise.

The following paragraphs give particulars in regard to certain disputes, in addition to information given in the tabular statement.

PULPWOOD CUTTERS, NORTHERN ONTARIO.—Pulp wood cutters in a number of lumber camps in various parts of northern Ontario ceased work in September, demanding increases in wages and improvements in working conditions or living conditions in the camps. In some cases the demands were granted, but in others the employees who ceased work secured employment elsewhere. Exact information as to the number of workers involved and as to the time lost has not been available. The reports indicate, however, that these disputes began about September 7, 1927, and were over early in November, one employer involved not having completely replaced the strikers by the end of October.

BAKERS, MONTREAL, P.Q.—In this dispute which commenced in May two out of the six employers involved had settled with the union but during November it was reported that these employers had broken the agreement so that the number of strikers involved increased from 22 at the end of October to 73 in November.

LADIES' CLOTHING FACTORY WORKERS, TORONTO, ONT.—In this dispute, an alleged lockout commencing in June, 1926, the workers involved all secured work elsewhere by the end of November. The dispute is not recorded as lapsed, however, as the union has initiated proceedings against the employer for violation of contract and the case is set for trial in December.

MEN'S CLOTHING FACTORY WORKERS, MONTREAL, P.Q.—This dispute, commencing June 4, 1927, was called off by the union in November, all the workers involved having secured work elsewhere.

STRIKES AND LOCKOUTS DURING NOVEMBER, 1927

Industry, occupation and locality	Number of employees involved	Time loss in working days	Remarks
(a) Strikes and Lockouts occuring prior to November, 1927.			
LOGGING—			
Pulpwood cutters, Northern Ontario	10	50	Commenced September 24, 1927, for increase in wages. Lapsed early in November.
MANUFACTURING—			
Vegetable Foods—			
Bakers, Montreal, P.Q.	73	1,300	Commenced May 1, 1927, for increase in wages. Unterminated.
Clothing (including knitted goods)—			
*Ladies' clothing factory workers, Toronto, Ont.	4	50	Alleged lockout, commenced June 30, 1926; enforcement of non-union conditions. Unterminated.
Men's clothing factory workers Montreal, P.Q.	.....	.....	Commenced June 4, 1927, against change to piecerate system and to maintain union conditions. Terminated November 1, 1927, in favour of the employers.
Printing and Publishing—			
Electrotypers, Toronto, Ont.	3	50	Commenced December 20, 1926, against discharge of employees for union activity. Employees secured work elsewhere by the end of November.
Iron, Steel and Products—			
*Blacksmiths, etc., Saskatoon, Sask.	9	225	Commenced May 17, 1927, for increase in wages and recognition of union. Unterminated.
Non-Metallic Mineral Products—			
Stonecutters, Montreal, P.Q.	40	750	Commenced June 10, 1927, for increase in wages. Unterminated.
CONSTRUCTION—			
Buildings and Structures—			
Sheet metal workers, Montreal, P.Q.	3	50	Commenced September 1, 1927, for increase in wages. Employees secured work elsewhere by the end of November.
Plasterers, Vancouver, B.C.	10	250	Commenced October 3, 1927, to enforce employment of union helpers. Unterminated.
Carpenters, Toronto, Ont.	927	4,635	Commenced October 5, 1927, for closed shop; terminated November 8, 1927. Compromise.
Building trades, Toronto, Ont.	600	3,000	Commenced October 24, 1927, in sympathy with dispute of carpenters; terminated November 8, 1927. Compromise.
(b) Strikes and Lockouts commencing during November, 1927.			
MINING—			
Non-ferrous Smelting and Quarrying—			
Coal miners, Drumheller, Alta	90	270	Commenced November 3, 1927, against dismissal of certain employees; terminated November 8, 1927, in favour of employer.
MANUFACTURING—			
Clothing (including knitted goods)—			
Men's clothing factory workers, Montreal, P.Q.	15	120	Commenced November 4, 1927, to maintain union wages and working conditions; terminated November 14, 1927, in favour of employees.
Men's clothing factory workers, Montreal, P.Q.	40	800	Alleged lockout, commenced November 8, 1927; union conditions as to overtime. Unterminated.
Cap factory workers, Hamilton, Ont.	9	63	Commenced November 23, 1927, for union shop and reduction in hours. Unterminated.
CONSTRUCTION—			
Buildings and Structures—			
Elevator erectors, Toronto, Ont.	35	105	Commenced November 29, 1927, to maintain union wages and working conditions. Unterminated.

* Reports indicate that the strikers have been replaced, but there are still a number of employees out and on the strike benefit list of the union.

ELECTROTYPERS, TORONTO, ONT.—The workers involved in this dispute, commencing December 20, 1926, owing to the discharge of employees for union activity, having secured work elsewhere the dispute is recorded as terminated and is transferred to the list of disputes not called off by the union although employment conditions are no longer affected.

STONECUTTERS, MONTREAL, P.Q.—The number of workers involved in this dispute, commencing June 10, increased from 20 at the end of October to 40 at the end of November, as, out of the eighty employees who had secured work elsewhere since the strike began, twenty had again become unemployed.

SHEET METAL WORKERS, MONTREAL, P.Q.—The workers involved in this dispute, which commenced in September, having secured work elsewhere, the dispute is recorded as terminated and transferred to the list of those strikes and lockouts which the union had not yet called off although employment conditions are no longer affected.

CARPENTERS AND SYMPATHETIC STRIKE OF BUILDING TRADES, TORONTO, ONT.—The dispute involving carpenters who demanded a closed shop for the union to which they belonged, the United Brotherhood of Carpenters and Joiners of America, and the sympathetic strike of other building trades commencing October 24, were settled early in November through the mediation of the Minister of Labour as described in the issue of the LABOUR GAZETTE for November, it being agreed that the contractors would enter into an agreement with the United Brotherhood of Carpenters and Joiners to be in effect from January 1, 1928, when the agreement between the contractors and the Amalgamated Carpenters of Canada expires, all carpenters employed by the contractors to work under the wages and working conditions of such agreement. A wage increase from 85 cents to $1 per hour had previously been agreed to by the contractors.

COAL MINERS, DRUMHELLER, ALTA.—The employees in one of the mines at Drumheller ceased work on November 3 because the company had refused to employ three of the leaders in the strike which had terminated October 31, these men being among the leaders. On November 8 the strikers resumed work, their demands not having being granted.

CLOTHING FACTORY WORKERS, MONTREAL, P.Q.—In one of these disputes, commencing November 4, the employees ceased work to maintain the 44-hour week and the wage rates provided for by the union agreement, the employer having proposed to lengthen the hours and reduce the wages from $2 to $5 per week. On November 14 the employer having agreed to restore the union conditions, work was resumed.

In the other dispute, commencing November 8, it was reported that the employer had dismissed workers who refused to work overtime unless paid at the rate of time and one-half. At the end of the month the dispute had not been terminated.

CAP FACTORY WORKERS, HAMILTON, ONT.—The employees involved in this dispute ceased work on November 23 to secure a union shop and a reduction in hours from forty-nine per week to forty-four. Early in December it was reported that work was resumed, the demands of the employees having been substantially granted.

ELEVATOR ERECTORS, TORONTO, ONT.—Elevator erectors employed by an establishment in Toronto ceased work on November 29 as their employer was alleged to have violated the union agreement in settlement of a strike which terminated on October 3, 1927. The management having agreed to adhere to the terms of the agreement, work was resumed on December 2.

Population of Australia

The Australian Commonwealth Statistician and Actuary has made available an estimate of the population of Australia of 6,167,429 as at June 30, 1927, comprising 3,154,121 males and 3,013,308 females. The total increase for the year was 123,505. Of the increase, the excess of births over deaths accounted for 75,442, while the excess of arrivals over departures accounted for 48,063.

The figures indicate that since the census of April, 1921, the population of Australia increased by 731,695, made up of 502,186, due to natural increase, or 69 per cent of the total increase, and 229,509, or 31 per cent, due to excess of arrivals over departures. The increase represents an average of slightly more than 2 per cent per annum.

STRIKES AND LOCKOUTS IN GREAT BRITAIN AND OTHER COUNTRIES

THE latest available information as to strikes and lockouts in various countries is given in the LABOUR GAZETTE from month to month, bringing down to date that given in the issue for February, 1927, as an addendum to the review of strikes and lockouts in Canada during 1926. The latter review included a table summarizing the principal statistics as to strikes and lockouts since 1918 in the several countries for which such figures were available. Many countries publish these statistics only once each year, the figures being issued in some cases after an interval of as much as two years, so that for such countries the latest figures are not for relatively recent dates.

Great Britain and Northern Ireland

The number of disputes reported as beginning in October was 27, involving 7,800 workpeople. In addition, 16 disputes were carried over from the previous month, making the total number of disputes in progress during the month, 43. The total number of workpeople involved in all disputes was 10,500 and the time loss 40,000 working days.

Of the 27 disputes beginning in October, 6 arose out of proposed reductions in wages, 6 over other wages questions, 8 on questions respecting the employment of particular classes or persons, 2 on details of working arrangements and 5 on other questions.

Settlements were reached in 24 disputes, 9 in favour of workpeople, 6 in favour of employers and 9 ended in compromise.

A strike of coal miners near Glasgow took place from October 5 to 8 for the reinstatement of workmen dismissed for loading alleged excessive amounts of dirt with the coal. A settlement was reached on October 8 when the workmen in question were reinstated and a dirt scale was fixed by mutual agreement.

United States

Preliminary figures for the month of September show 39 disputes beginning during the month, with 44 disputes in effect at the end of the month. The number of workers involved in disputes beginning in the month was 12,514, and the number involved in disputes at the end of the month was 197,101. The number of man-days lost during the month in all disputes was 4,959,509.

Bituminous Coal Miners' Dispute.—The situation with regard to this dispute was practically unchanged during November. In Ohio the miners appealed to the courts against eviction orders, but were unsuccessful, the Superior Court handing down the opinion that mining companies had the right to evict strikers from company houses. Disorders continued both in Ohio and Pennsylvania. In Pennsylvania, the Governor agreed to investigate charges of abuse of strikers by coal companies' police. On November 21, the President of the American Federation of Labour, the President of the United Mine Workers and a delegation of labour leaders requested President Coolidge to call a conference of the two parties to the dispute. The President however was of the opinion that under present economic conditions he did not consider that a conference would be of any value at the moment, but the matter was referred to the Department of Labour which would offer its conciliation services if the opportunity presented itself.

Lignite Coal Miners' Dispute, Colorado.—This strike, which began on October 18 for an increase in wages, was still in progress at the end of November. Picketing was resumed and grave disorders occurred. On November 21, a skirmish between strikers and state police at one mine resulted in the death of five strikers, several others being wounded. At the end of November, the Governor of the State was attempting to bring about a settlement.

Belgium

During September, 20 disputes began and 11 disputes were still in progress from August. The number of workers involved in all disputes was 8,505 and the time loss 124,545 working days. Of the 20 disputes beginning in the month, 13 were over wages questions, 4 over discharge of workers and the remaining 3 over other questions. Settlements were reached in 19 disputes, 5 in favour of workers, 10 in favour of employers and 4 by compromise.

Denmark

During the year 1926, there were 32 disputes involving 1,050 workers and resulting in a time loss of 23,000 working days.

Finland

During September, 16 disputes were in progress involving 95 establishments and 10,570 workers.

Germany

During the second quarter of 1927, 246 strikes and 28 lockouts terminated, involving 4,331 establishments. The total number of workers affected was 95,870, of whom 94,302 were directly and 1,568 indirectly affected. The time loss for all workers involved in disputes was 1,085,816 working days. Classified according to causes, 92,419 workers were involved in disputes concerning wages, 44,651 in disputes concerning hours and 37,493 in disputes over other questions. Classified by results, 45,671 workers were involved in disputes which ended in favour of workers, 38,216 in disputes which ended in compromise and 10,415 in disputes which ended in favour of employers.

In the textile industry, a lockout of 63,000 workers in the Rhineland was declared on November 9, following demands for a new agreement involving wage increases of 20 per cent. A board of arbitration succeeded in bringing about a settlement, granting increases of from 4 to 10 per cent and a 48-hour week, and work was resumed on November 15.

Netherlands

During August, 11 disputes began, 9 of which involved 745 workers. During September, 18 disputes began, 14 of which involved 1,932 workers.

Poland

During the first quarter of 1927, 121 disputes began, involving 1,392 establishments and 114,536 workers. The time loss in this period was 1,186,312 working days.

Sweden

During the year 1926, 206 disputes began in Sweden, of which 191 were strikes, 4 lockouts and 11 unclassified disputes. The numbers involved were 504 employers and 52,891 workers. The time loss was 1,711,200 working days. Of the 206 disputes, 124 were over wages questions, 3 over union questions and 51 for various or unknown causes. The results of the disputes were: 32 in favour of employers, 35 in favour of workers, 116 ended in compromise and in the case of 23 disputes, the result was unknown.

Australia

A dispute involving all shipping companies (with the exception of the Commonwealth Line and the Tasmanian Service) and about 50,000 longshoremen and other workers is reported to have tied up all shipping at Australian ports from December 1 to 6. The cause of the dispute was the decision of the Arbitration Court regarding overtime work. A settlement was reported to have been reached on December 6, the terms of which were not published.

Rent Control in Italy

Measures have been taken in Italy to prevent an excessive rise in rents in consequence of the re-establishment of freedom of agreement by a Ministerial Decree dated January 1, 1926. As a final appeal for moderation launched some time ago by the Landlords' Association failed to produce the desired results, the government recently decided to revive the system of rent control in a modified form. The rent of dwellings with not more than five rooms was reduced to four times the pre-war level, a decrease of 15 per cent; that of dwellings with six to eight rooms by 10 per cent; and that of shops and business premises by 10 to 20 per cent. The reductions apply to premises wholly or partially sub-let, but small apartment houses of the 'cheap housing' type managed by co-operative or cheap housing societies are exempt from the provisions of the Decree. Disputes arising in connection with the enforcement of the Decree are to be submitted to a justice of the peace who will give his services without cost in all such matter.

In Government circles it is hoped that the reduction in the rent of retail shops will result in a further decrease in the price of articles sold, and that this in turn will contribute to the success of the campaign against the high cost of living undertaken by the Government.

At the session of the Italian Cabinet which opened on October 17, the Prime Minister gave an account of the internal situation of the country, stating among other things that as a result of the measures taken to reduce rents, 346,375 suits had been brought; on October 10 there remained only 10,527 to be heard. As regards the question of farm-leases, the Government had not thought it necessary to legislate, but had encouraged the establishment of joint committees in each province. These two important problems, added Mr. Mussolin, could be considered as solved.

DRAFT CONVENTIONS AND RECOMMENDATIONS OF EIGHTH AND NINTH SESSIONS, INTERNATIONAL LABOUR CONFERENCE

Order in Council Adopted Determining Questions of Jurisdiction Involved Therein

THE Draft Conventions and Recommendations adopted by the International Labour Conference of the League of Nations at its Eighth and Ninth Sessions in 1926* were referred to the Law Officers of the Crown in Canada with a view to determining whether, and to what extent, the subject matters involved were within the competence of the Parliament of Canada or of the Provincial Legislatures, in order that the Draft Conventions and Recommendations might be brought before the authority or authorities within whose competence the matters in each case lay for the enactment of legislation or other action, in conformity with the requirements of Article 405 of the Treaty of Peace with Germany and the corresponding article of the other peace treaties. The Law Officers' report was submitted to the Privy Council by the Minister of Justice and an Order in council approving of the same was adopted on November 16th in the terms following:—

P.C. 2153

November 16, 1927.

The Committee of the Privy Council have had before them a report, appended hereto, from the Minister of Justice, stating that he has had under consideration, upon reference from the Honourable the Minister of Labour, the authentic texts of the draft conventions and recommendations adopted by the International Labour Conference at its eighth and ninth sessions (26th May, 5th June, 1926 and 7-24th June, 1926) with a view to determining whether, and to what extent, the subject matter of these several draft conventions and recommendations lies within the competence of Parliament or of the provincial legislatures, in order that the said draft conventions and recommendations may be brought by the Dominion Government (in discharge of its obligation under Article 405 of the Treaty of Peace with Germany and the corresponding article of the other treaties of peace) before the authority or authorities within whose competence the matter in each case lies for the enactment of legislation or other action.

The Committee concur in the opinions of the Minister as set out in the said report and advise that a copy hereof and of the report of the Minister of Justice, if approved, together with authenticated copies of the said draft conventions and recommendations, be transmitted to the Lieutenant-Governors of the respective Provinces, for the consideration of their respective Governments, with a view to the enactment of legislation or such other action upon the parts of the subject matter of the several draft conventions and recommendations within the provincial sphere of jurisdiction, as each Government may be advised to take.

All of which is respectfully submitted for Your Excellency's approval.

E. J. LEMAIRE,
Clerk of the Privy Council.

To His Excellency the Governor General in Council:

The Undersigned has had under consideration, upon reference from the Honourable the Minister of Labour, the authentic texts of the draft conventions and recommendations adopted by the International Labour Conference at its eighth and ninth sessions (26th May, 5th June, 1926 and 7-24 June, 1926) with a view to determining whether, and to what extent, the subject matter of these several draft conventions and recommendations lies within the competence of Parliament or of the provincial legislatures, in order that the said draft conventions and recommendations may be brought by the Dominion Government (in discharge of its obligation under Article 405 of the Treaty of Peace with Germany and the corresponding article of the other treaties of peace) before the authority or authorities within whose competence the matter in each case lies for the enactment of legislation or other action.

The different subjects dealt with by the several draft conventions and recommendations above mentioned are indicated by their respective captions, as follows:

I. Draft Convention concerning the Simplification of the Inspection of Emigrants on Board Ship.
II. Recommendation Concerning the Protection of Emigrant Women and Girls on Board Ship.
III. Draft Convention concerning Seamen's Articles of Agreement.

* The text of these Draft Conventions and Recommendations was given in the LABOUR GAZETTE, July, 1926, pages 678-690.

IV. Draft Convention concerning the Repatriation of Seamen.

V. Recommendation concerning the Repatriation of Masters and Apprentices.

VI. Recommendation concerning the General Principles for the Inspection of the conditions of Work of Seamen.

The several draft conventions and recommendations may conveniently be dealt with in the order of their enumeration above.

1. The provisions of this convention look to securing simplification of the inspection of emigrants on board ship in accordance with the principles thereby enunciated. The only obligation which ratification appears actually to involve is acceptance, subject to certain qualifying provisions, of the general principle that the official inspection carried out on board an emigrant vessel for the protection of emigrants shall be undertaken by not more than one government; but, practically, the obligations which will result from ratification appear to be of a wholly contingent nature. Article 3 provides, in part, that "If an Official Inspector of emigrants is placed on board an emigrant vessel, he shall be appointed, as a general rule, by the Government of the country whose flag the vessel flies." The principal duties of the official inspector, if appointed, are to ensure the observance of the rights which emigrants possess under the laws of the country whose flag the vessel flies or such other law as is applicable or under international agreements or the terms of their contracts of transportation: Articles V, and VI.

Only in the event of the appointment of such an inspector would any obligation appear to follow upon the ratification of the convention. Ratification, however, would be without practical utility unless it were intended to provide for such a system of inspection, and, therefore, it is necessary, for the purpose of considering the question of legislative competence in relation to the subject matter of the convention to treat the convention as if it affirmatively required the establishment of such a system of inspection on board emigrant vessels.

As between the Dominion and the provinces, the Parliament of Canada has exclusive authority to make laws relating to "Navigation and Shipping" (s. 91, ss. 10, B.N.A. Act, 1867); "Ferries between a Province and any British or Foreign Country or between two Provinces" (s. 91, ss. 13); "Lines of Steam or other ships.. .. ..extending beyond the Limits of the Province" (s. 91, ss. 29 and s. 92, ss. 10 (*a*)); "Lines of Steam Ships between the Province and any British or Foreign Country" (s. 91, ss. 29; s. 92, ss. 10 (*b*)); and also a concurrent but paramount legislative authority in relation to "immigration into all or any of the Provinces" (s. 95). The Parliament of Canada is therefore, as between the Dominion and the provinces, the competent authority to deal with this convention, but that consideration does not dispose of the question of legislative competence in relation to the subject matter of the convention. The proposals of the convention are substantially to be carried out on board emigrant vessels "by the Government of the country whose flag the vessel flies." Moreover, they involve in respect of such vessels extraterritorial effect of the legislation required for the proposed system of inspection. The power of the Canadian Parliament in relation to shipping is much circumscribed by the Imperial Merchants Shipping Act, 1894, which, as to many of its provisions, is expressly extended to the British Dominions. The modified power to repeal the provisions of the Merchants Shipping Act, 1894, given to Colonial legislatures by section 735 of that Act, does not extend to the provisions of Part I, which relate to registry, or Part III, which relate to emigrant ships. The only registration possible in Canada is registration as a British ship under said Part I of the Imperial Act, but by Admiralty warrant of the 2nd February, 1892, issued under the authority of section 73 of the Merchants Shipping Act, 1894, and by Order in Council (Can.) P.C. 843 of the 26th April, 1922, merchant ships registered in Canada were authorized to wear the red ensign defaced in the fly by the Dominion coat of arms—i.e., the Canadian red ensign. These vessels may, no doubt, be said to fly the Canadian flag. The provisions of Part III, relating to emigrant ships, apply to all voyages from the British Isles to any port out of Europe (sec. 364) and, subject to certain modifications, to every ship carrying steerage passengers on a colonial voyage as defined in the Act (secs. 365 and 270). There does not, however, appear to be any provision in Part III for the appointment of an inspector of emigrants to travel on board an emigrant vessel and to be charged with the duties mentioned in Articles 5 and 6 of this Convention. Consequently, legislation upon the subject matter of the convention, as regards vessels registered in Canada, is not incompetent to the Parliament of Canada by reason of any repugnancy to existing Imperial legislation. The legislation of Parliament is, however, subject to the limitation that its laws can have no effective operation beyond the territorial limits of the

Dominion, except possibly as to persons domiciled or resident within the Dominion and only temporarily absent therefrom.

Upon these considerations, the undersigned is of the opinion that, in the absence of Imperial legislation dealing with the subject matter of this convention as regards all British ships generally or enabling the Parliament of Canada to give effect to the proposals of the convention as regards all ships registered in Canada, wherever they may be, legislative action to carry out this convention is within the competence of Parliament in relation only to such vessels registered in Canada as are controlled or operated by persons domiciled or resident within the Dominion whilst they are outside the territorial limits of Canada, but in relation to all vessels registered in Canada whilst they are within the territorial limits of the Dominion. The Immigration Act (Dom.) contains several provisions relating to inspection abroad and on board ship and provides certain protection for emigrants (vide, secs. 25, 56, 57, 58 sub-s. 4, and 59). There does not, however, appear to be any provision for the appointment of an official inspector to travel on board emigrant ships for the purpose of insuring the enforcement of any laws or regulations or agreements for the protection of emigrants on board.

II. The proposal of this recommendation is that where fifteen or more women or girls, unaccompanied by a responsible person, are carried as emigrants on board an emigrant vessel a properly qualified woman who has no other duty to fulfil on board shall be appointed to give such emigrants any material or moral assistance of which they may stand in need without in any way encroaching upon the authority of the master of the vessel, and that she shall report to the authority making the appointment and her report shall be available for the use of the Governments which may be concerned.

Although the recommendation is silent upon the point, it is presumably contemplated that the appointment mentioned shall be made, as in the case of the official inspector of emigrants, by the Government of the country whose flag the vessel flies, and if that be the case, then the proposal of the recommendation is, in the opinion of the undersigned, within the competence of Parliament to the same extent as are the proposals of the above convention.

The undersigned is informed that some years ago the Government appointed Government conductresses on board ships carrying women emigrants from the British Isles to Canada, but subsequently discontinued these appointments in favour of the appointment by the shipping companies of a conductress attached to the ship's crew. It was found that the work of such conductress was more satisfactory. At the present time, by arrangement between the Department of Immigration and Colonization and the different British steamship companies, a conductress is carried as part of the crew on board all British passenger ships engaged in carrying emigrants to Canada. They afford the women emigrant passengers all needed assistance. They co-operate with the Department of Immigration and Colonization and form the connecting link between the work of the Department's women officers overseas and their women officers at ports of entry in Canada and other places in the Dominion.

III. This convention is applicable to all seagoing vessels registered in the country of any member ratifying the convention, and to the owners, masters and seamen of such vessel, subject to certain specified exceptions. It contains a variety of provisions respecting the articles of agreement entered into between the shipowner or his representatives and the seamen, the manner in which these articles shall be executed, the particulars to be contained therein respecting the conditions of his employment, the mode and causes by which the agreement shall be terminated, the circumstances in which a seaman may be discharged or may demand his discharge, and other cognate matters.

The undersigned is of the opinion, for the reasons given in relation to the convention first above enumerated, that Parliament is competent to give effect to the proposals of this convention with regard to all ships registered in Canada to which they are intended to apply in relation to articles of agreement entered into within Canada, but only with regard to such registered ships as are controlled or operated by persons domiciled or resident in Canada in relation to articles of agreement entered into outside of Canada. Provisions touching the subject matter of this convention are contained in Part III of the Canada Shipping Act, but additional legislation would appear to be necessary to give effect to the provisions of the said convention.

IV. This convention has the same application as that last mentioned, and for the same reasons the undersigned is of the opinion that the Parliament of Canada is competent to give effect to the proposals of this convention as regards all ships registered in Canada in relation to the repatriation of seamen within

the limits of the Dominion, but only with regard to such registered ships as are controlled or operated by persons domiciled or resident within Canada in relation to the repatriation of seamen outside of Canada. Legislation upon the same subject matter is contained in sections 203 to 209, 215 and 217, and 265 to 268 of the Canada Shipping Act, and, with some necessary adaptations by way of amendment, will be adequate to give effect to the proposals of this convention.

V. The proposal of this recommendation is that the national government shall take steps to provide for the repatriation of masters and duly indentured apprentices who are not covered by the terms of the draft convention on the repatriation of seamen.

The undersigned is of the opinion that the subject matter of this proposal lies within the competence of Parliament to the same extent as the subject matter of the convention last above mentioned. The provisions of the Canada Shipping Act cited above in connection with the Convention on the Repatriation of Seamen apply, with one exception, only to seamen or apprentices. Section 215 provides, however, for the repatriation of sick masters as well as seamen or apprentices, but this provision has no application in cases of shipwreck or distress. Additional legislation will be required to give effect to the proposals of this recommendation.

VI. The undersigned is of the opinion that Parliament is competent to give effect to the principles set forth in this recommendation with regard to vessels registered in Canada, subject to this qualification, that no rights of inspection or compulsory powers could be asserted or exercised with respect to such vessels whilst outside the territorial limits of Canada, except possibly in the case of such vessels registered in Canada as are controlled or operated by persons domiciled or resident in Canada.

The undersigned recommend that a copy of this report, if approved, together with authenticated copies of the said draft conventions and recommendations, be transmitted to the Lieutenant-Governors of the respective provinces, for the consideration of their respective Governments, with a view to the enactment of legislation or such other action upon the parts of the subject matter of the several draft conventions and recommendations within the provincial sphere of jurisdiction, as each Government may be advised to take.

Humbly submitted,

(Sgd.) ERNEST LAPOINTE,
Minister of Justice.

LEAGUE OF NATIONS INTERNATIONAL LABOUR ORGANIZATION

The Ratification of Draft Conventions

ON September 30 the total number of ratifications of Draft Conventions registered with the Secretary-General of the League of Nations was 236.

At the same date, the number of Draft Conventions of which ratification had been authorized by the competent authority in the country concerned, but had not yet been registered with the Secretary-General of the League, was 34.

During the past month, six new ratifications have been registered. The Minister of Foreign Affairs of the Netherlands has deposited with the Secretary-General of the League of Nations the instruments of ratification of the three following International Labour Conventions:

(1) The Convention concerning equality of treatment for national and foreign workers as regards workmen's compensation for accidents, adopted by the International Labour Conference at its Seventh Session (Geneva, 1925).

(2) The Convention concerning workmen's compensation for accidents, adopted at the same Session.

(3) The Convention concerning the simplification of the inspection of emigrants on board ship, adopted at the Eighth Session of the Conference (Geneva, 1926).

The Government of Finland has informed the International Labour Office that it has deposited with the Secretary-General of the League of Nations the instruments of ratification of two Conventions voted by the International Labour Conference:

(1) The Convention concerning equality of treatment for national and foreign workers as regards workmen's compensation for accidents;

(2) The Convention concerning workmen's compensation for occupational diseases.

Finally, the Government of Great Britain has ratified the Convention concerning the simplification of the inspection of emigrants on board ship, on condition that this ratification shall only take effect when the Conven-

51297—3½

tion has also been ratified by France, Germany, Italy, Norway, and Spain.

Canadian Member of Consultative Committee

The Council of the League of Nations has created a permanent consultative committee, composed of 47 specially qualified members to study methods whereby effect might be given to the resolution adopted by the World Economic Conference held at Geneva last May (LABOUR GAZETTE, July, 1927, page 769). Among the appointments approved by the Council was that of Dr. Adam Shortt, of Ottawa. Dr. Shortt was formerly professor of Political Science at Queen's University, Kingston, Ontario, and is regarded as one of the foremost authorities in Canada on economic subjects. He was a member of the committee which prepared the agenda for the World Economic Conference, and subsequently attended the conference. M. Theunis, formerly premier of Belgium, who presided over the Economic Conference, is to act as chairman of the consultative committee.

The League of Nations and the International Labour Organization

In the course of its last Session the Assembly of the League of Nations examined a number of questions which affect, directly or indirectly, the International Labour Organization and its work.

In the first place, it approved the various recommendations adopted by the International Economic Conference relating to certain steps to be taken in regard to the agricultural, industrial and commercial organization of the world. It will be the task of the International Labour Office to study the application of these recommendations in so far as it may have an influence on the standard of living and stability of employment of the workers. One of the recommendations requests the Economic Organization of the League of Nations to collect periodically comprehensive but definite and up-to-date information concerning the sources and supplies of raw materials, production, stocks, prices, wages, hours of work, conditions in the labour market, etc. It stipulates that the collation of the last-mentioned data is to be entrusted to the International Labour Office. Finally in setting up the Consultative Committee whose duty it will be to apply the recommendations of the Economic Conference, the Assembly recognized that the International Labour Office should assist in the constitution of this Committee and should be invited to submit the names of three members representing labour.

The Assembly adopted several resolutions relating to Russian and Armenian refugees. It is common knowledge that the responsibility for finding employment for these refugees rests with the International Labour Office and particularly with the Refugee Service under Mr. T. Johnson, Assistant High Commissioner for Refugees. In the course of the discussions in the Fifth Committee on this subject, Dr. Nansen, High Commissioner for Refugees, Mr. Albert Thomas, Director of the International Labour Office, and other speakers, drew attention to the financial problems involved in the settlement of refugees. Governments were urged to increase the revolving fund by the issue of the special Nansen stamps, to ratify the agreements recommended by the Intergovernmental Conference of 1926, and to facilitate the use of the Nansen passports. The importance of speedy action in these matters was emphasized.

In the course of the discussion in the Fifth Committee and in the plenary meeting, Major Elliot (British Empire) referred to the problem of the 4,000 Russian refugees in Turkey who were threatened with expulsion. He pointed out that the Chief of the Refugee Service of the International Labour Office had succeeded, during a visit to Angora, in obtaining from the Turkish Foreign Minister the suspension of a decree requiring that everyone should take up Turkish nationality or leave Turkey before August 1 last.

The tenor of the resolutions adopted and the number of appeals made on behalf of the refugees, whatever their nationality, testify to the constantly increasing interest which is taken throughout the world in the work accomplished in this sphere by the League of Nations and the International Labour Organization jointly.

The discussions which took place on the question of slavery were of the greatest interest to the International Labour Office. The office is studying the various forms of forced labour which, in certain of its aspects, is indistinguishable from slavery. The ratification of the Slavery Convention urged in the resolution of the Assembly will go far to bring about the abolition of forced labour. The Committee of the Assembly which dealt with the Convention refrained from making any pronouncement on the question of forced labour pending the conclusion of the inquiry which is being concluded into this subject by the International Labour Office.

On the proposal of the Fifth Committee, the Assembly adopted a resolution expressing appreciation of the work accomplished by the Child Welfare Committee.

The report of the Committee stated that it has decided to pursue, in collaboration with the International Labour Office, its inquiry into the effects of family allowances on the welfare of children. It also mentioned that, in connection with the inquiry into the mental and physical recreation of children, the International Labour Office had been requested to communicate to the Secretariat the information in its possession on the utilization of workers' spare time in its relation to child welfare.

In the same connection attention may be drawn to discussions in the Second Committee on the instruction of youth in the ideals and work of the League of Nations. In the course of a resolution on intellectual co-operation submitted by this Committee and adopted by the Assembly, approval was given to the recommendations made by a sub-committee of experts for the instruction of children and youth in the existence and aims of the League, and the Secretary General was instructed to request Governments, so far as possible, to give effect to the recommendations.

The International Labour Office, as one of the constituent institutions of the League of Nations, is included by implication in the resolution adopted.

In the course of a discussion in the Second Committee on the work of the Health Organization, Mr. Veverka (Czechoslovakia) recalled a proposal made by his Government to the Fifth Assembly, that a comparative study should be undertaken of the health administrations of the various countries, with a view to their keeping in touch and collaborating with the health insurance organizations and public health services. He was glad to note that the Health Committee had dealt with this question by appointing a mixed committee with a secretariat composed of members of the Health Section and members of the Social Insurance Service of the International Labour Office. That example had been immediately followed in Czechoslovakia, where a similar committee had been set up with the most encouraging results.

Finally, the Assembly approved the budget of the International Labour Organization, for the financial year 1928, together with those of the Secretariat of the League and of the Permanent Court of International Justice, after careful examination by the Fourth Committee.

The Deputy Director's Visit to South Africa

In response to an invitation from the Government of South Africa, Mr. H. B. Butler, Deputy Director of the International Labour Office, recently left for the Cape. During the autumn he will visit the four provinces of the Union and will discuss with the authorities the ratification of the Conventions adopted by the International Labour Conference, and will have interviews with representatives of workers' and employers' organizations.

The primary object of Mr. Butler's visit is to disseminate in the Union more precise information as to the International Labour Organization, the principles on which it is based, and the activities in which it engages.

Mr. Butler intends to stop in the principal industrial and mining centres and to take advantage of his visit to acquire first-hand information of the living conditions of white and coloured workers.

Visit to Northern Europe of Director of the International Labour Office

At the recent session of the Governing Body of the International Labour Office, held in Berlin in October, Mr. Albert Thomas, Director of the International Labour Office, submitted a report on his visit to the Scandinavian and Baltic States during August last. In spite of the time of year, the Director was able to meet the Prime Ministers and responsible authorities in practically every case. He came into contact with the most representative workers' and employers' organizations in each country. Finally, his visits enabled him to investigate on the spot, in company with the competent authorities, the situation of each of the countries visited with reference to the Conventions adopted by the International Labour Conference, and to discuss with them the possibility of new ratifications. A warm reception was accorded him in every capital, and the press voluntarily gave him the publicity which always forms one of the advantages of these journeys from the point of view of the Office.

Denmark.—Denmark has ratified six Conventions. The Socialist Government which preceded the present Government had introduced Bills providing for the ratification of all the Conventions adopted at the Sessions of 1919, 1920 and 1921. The Director discussed the difficulties involved with the Minister of the Interior (the Ministry of Labour having been abolished). The difficulties are of two kinds. The first is the economic situation, which is generally believed to have been adversely affected by the rapid restoration of the currency; secondly, apprehension and mistrust on the part of the group in power and public opinion with regard to several Conventions. It is possible that the highly developed system of collective agree-

ments may be an obstacle to the development of international, or even national, labour legislation.

The Government is very anxious to demonstrate its desire to collaborate closely with the Office. It is prepared to support in Parliament the ratification of certain agricultural and maritime Conventions.

In Denmark the Director was confronted with a difficulty which he subsequently found in all the Scandinavian countries: the question of night work for women. Scandinavian women, adopting the motto "Equality first", refuse to accept special protection for their sex, which, in their opinion, would place them at an economic disadvantage. The Director everywhere upheld with some success the principles of the Washington Convention, but there still exists a strong opposition in this matter.

Norway.—At the time of the Director's visit Norway had ratified only two Conventions, those concerning unemployment and the employment of seamen. A report adopted by the Chamber of Deputies in May, 1927, formulated definite objects to a considerable number of Conventions. Nevertheless, the Prime Minister agreed to the Director's submitting to him his observations on the report in question. The same report authorized the Norwegian Government to ratify two further Conventions, those concerning the minimum age for employment at sea and the minimum age for employment as trimmers and stokers. These ratifications were promised. The Norwegian Government also proposed to draft a Bill for the ratification of the Convention concerning equality of treatment as regards workmen's compensation for accidents.

In spite of the difficult economic situation, similar in its causes and effects to that of Denmark, some immediate progress may be looked for in Norway in the matter of international social legislation.

Sweden.—In spite of changes in the Government, Sweden has always shown a strong desire for sincere co-operation in the work of the International Labour Organization. Eleven Conventions have been ratified.

A Bill is being drafted for the amendment of the Workers' Protection Act of 1912, which may bring about further progress as regards the minimum age for admission to work in industry, the night work of women, childbirth, and the night work of young persons. Ratification concerning compensation for occupational diseases seems likely to take place in the near future.

Finland.—Finland endeavoured to become a Member of the International Labour Organization even before belonging to the League of Nations, and has continually made sincere efforts to co-operate in international social policy. At the time of the Director's visit, however, only seven Conventions had been ratified. At an official Conference with the Minister of Social Affairs, two of his colleagues, officials and representatives of employers and workers, the Director discussed the situation as regards each Convention. In the case of the Hours Convention, a Bill providing for ratification has been announced by the Government in Parliament and will perhaps be introduced during the autumn. Considerable progress has been made in the matter. The Convention concerning night work for women is obstructed by the same psychological difficulties as in the Scandinavian countries. Since the Director's visit ratifications have been registered of the Conventions concerning compensation for occupational diseases and equality of treatment, and there seems to be a good prospect of ratification of the Conventions concerning articles of agreement, repatriation of seamen, white lead, and the minimum age for admission to employment in industry. In accordance with the Convention adopted by the Session of 1927, a Bill concerning compulsory sickness insurance in industry will probably be introduced very soon. Great efforts for social progress are being made by the Finnish Government.

Esthonia.—Esthonia has ratified all the Conventions of the first three Sessions of the Conference, with the exception of the Childbirth Convention and the Hours Convention; in the case of the latter a Bill has been drafted providing for conditional ratification. The Conventions adopted in 1925 have also been submitted to Parliament. The Director was assured by the Minister for Social Affairs that the achievements of recent years will be followed up. The Conventions adopted in 1926 will perhaps be introduced in Parliament in the near future.

Latvia.—Latvia is also very devoted to the work of labour protection. Ten Conventions have been ratified, and all the rest, without exception, have been submitted to Parliament. The present Government is anxious to accomplish further progress and to form still closer contact with the International Labour Office.

Lithuania.—Lithuania has not shown the same interest in international labour legislation as the other Baltic States. Nine Bills were introduced at the time of admission to the Organization, providing for ratification of the Washington and Genoa Conventions, but no

further action was taken. Since then no Convention has been brought before Parliament. The Director discussed the situation with the Prime Minister. He reminded him of the general principles of the Treaty of Peace and of the measures of elementary humanity which all States, even the poorest and most backward economically, are eager to realize. It was agreed that closer and more energetic relations should be established. The Director also emphasized the necessity of renewed representation of Lithuania at the Conference.

The general impression received by the Director during his long and rapid journey was that, while internal political changes have a considerable effect on the progress of ratifications, international labour legislation is now of such importance that it forms an integral part of the life of States, and no Government can neglect the work that has been undertaken. The visit paid by Mr. Thomas to the Scandinavian and Baltic States will doubtless have an excellent effect on the relations of the Organization with these peoples.

Ratification by Germany of the Eight-Hour Day Convention

The ratification by Germany of the Washington Convention concerning the employment of women before and after childbirth was registered by the Secretary-General of the League of Nations on October 31. Germany has thus made herself, as the Federal Minister of Labour claimed during the recent session of the Governing Body in Berlin, "the first of the chief industrial countries to ratify this Convention, after bringing her legislation into conformity on all points with its provisions." She is actually the eighth country which has ratified it, the previous ratifications being those of Bulgaria, Chile, Greece, Latvia, Rumania, the Serb-Croat-Slovene Kingdom, and Spain.

How Germany has brought her legislation into harmony with the terms of the Convention is described in an article published in the November issue of the *International Labour Review* (the monthly publication of the International Labour Office), from the pen of Ministerial Councillor Goldschmidt, of the Federal Ministry of Labour. The article points out that, by an Act of July 9, 1926, for the amendment of the Federal Insurance Code, the protection formerly provided for women before and after childbirth was extended and provision was made for the payment of maternity benefit; further, by an Act of July 16, 1927, relating to the employment of women before and after childbirth, such other steps were taken as were necessary to adapt German legislation to the requirements of the Convention.

In some respects, such as by the inclusion of workers in family undertakings within the scope of these measures, it is stated that the new legislation even goes substantially farther than the Convention. "Germany," adds the writer, "need fear no comparison with the laws of other countries on maternity protection. In fact, so far as concerns the provisions just described" (relating to immunity from employment during the period before and the period after confinement) "most of the States, including the great industrial countries, are still below the level of the new German law."

Industrial Accidents

The prevention of industrial accidents is one of the items on the agenda of the eleventh session of the International Labour Conference which is to open in Geneva on May 30 next. In preparation for this session the International Labour Office has drawn up a general report on the subject and has recently submitted a draft of the same to a sub-committee of experts on industrial safety which met in Geneva on November 3-5. The sub-committee expressed a desire to see attention focussed on the scourge of industrial accidents, and incidentally that efforts should be made to establish uniform and comparable accident statistics. Physical pain, impoverishment, privations for wives and children, a lowering of earning capacity—these represent for the victims some of the deplorable results of accidents. While these sufferings may to some extent be relieved by systems of compensation, the loss to the community remains the same.

In the United States, in 1924, it is estimated that there were 21,232 fatal industrial accidents, and 2,324,829 non-fatal.

In Germany, in 1925, official reports recorded 5,265 fatal accidents, and 50,769 accidents entailing permanent incapacity, partial or total; the number of injured persons in receipt of compensation was 428,421.

In Great Britain, in 1926, 139,963 accidents (806 fatal) were reported, apart from accidents in mines, which in the previous year numbered 169,223.

In Italy, in 1923, the compensation paid in respect of 357,322 industrial accidents (1,253 fatal, and 25,084 resulting in permanent disability) amounted to 169,903,000 lire.

In Germany, in 1926, the expenditure on compensation amounted to 260,000,000 marks. In the United States, the number of days lost by accidents in 687 plants alone amounted in 1926 to 3,012,757.

Information in regard to measures which are being taken in Canada for the avoidance of industrial accidents has been furnished to the International Labour Office for inclusion in its report. The Department of Labour of Canada has maintained and published statistics of industrial accidents since October, 1903. The Workmen's Compensation Boards which are in existence in various provinces are engaged also in the prevention of accidents. The co-operation of employers and workers is also being employed to the same end.

LABOUR'S NEW CO-PARTNERSHIP

Part of an Address on "Interpretations of Costs—Erroneous and Other", by David S. Kerr, Chartered Accountant, Montreal, delivered before the Canadian Society of Cost Accountants, in McGill University, Montreal, November 10, 1927

AT the Annual Convention of the American Federation of Labour, held at Los Angeles in October, 1927, Labour decided that "unless workers are to be put at a disadvantage in maintaining the advancing wages, Unions must gather their own statistics and make their own interpretations of the statistics compiled by Statistical Bureaus and employers." In other words, if the outlook indicates profits warranting it, labour wishes a share of these profits by way of an increase in wages.

Any plan that may be adopted in order to minimize the number of strikes and resultant loss in wages to labour, loss in profits to capital, and inconvenience to the public in general, is well deserving of receiving a most careful study, and of being given sympathetic support from all quarters.

To most of the demands made for increases in wages, the reply has been that profits do not warrant the complying with the requests. So that Capital first raised the question of ability to meet demands being based upon profits of the industry concerned. Now Labour will endeavour to see what can be accomplished by being guided, to a greater extent than formerly, by considering the earnings question before deciding upon strike measures, if the spirit of the new plan be properly construed. The importance of this new attitude, and its far-reaching effect, must not be under-estimated.

One of the greatest, if not the greatest, deterrent in effecting speedier settlement of differences between Capital and Labour has been a decided lack of confidence in the arguments, etc. put forth by Capital when negiotiating with Labour. And there has been an abundance of justification for this distrust when questions of earnings have been brought into the discussions.

What are the important points that will require careful attention in carrying out the new policy of Labour? Some of them are as follows:—

1. All cards, of Capital and of Labour, must be put on the table when discussing questions: frankness and honesty must prevail at all times.
2. Labour cannot be asked to consider any return on watered capitalizations: calculations of earning returns must be on capitalization excluding inflation.
3. Methods of valuation of fixed assets of Corporations will require to be carefully reviewed by Labour, in order to ensure just dealing.
4. Labour will have to appreciate that fair and reasonable average annual returns must be allowed on actual investments in industry, based on risks involved.
5. "Window dressing" of accounts and other statements, by way of erroneous distribution of expenditures, or otherwise, must be eliminated.
6. Labour must endeavour to give its best efforts, reduce absenteeisms, and otherwise assist for the mutual benefit.
7. Labour must not conclude that wages will be either maintained or increased. They must be prepared for necessary reductions.
8. Statistics are not sufficient to conclude as to the future of corporations, as they refer to past history only. In judging whether or not future business is likely to warrant maintaining or increasing wage standards, other factors, besides statistics, must be considered.
9. Subsidiary companies, as well as Parent or Holding Companies, must reveal their operations, and these must be on the basis of conducting business as separate independent units, irrespective of how the controlling Capital Stocks are owned. The control of the Capital Stocks should not affect what price should be received for goods sold, work done, etc.
10. Fluctuations of the market value of shares of Capital Stocks of Corporations do not afford a reliable business "yard-stick" or gauge to guide negotiations. The wide range of Stock Market fluctuations during the present year is quite sufficient to

clearly demonstrate this, there having been no corresponding variations in business conditions.

11. Labour will not contribute to past losses of corporations or agree to take very low wages even if profits cannot be obtained by Capital. The so-called, but undefined, "living wage" must always be paid to Labour, no matter what happens to Capital.

The working of Labour's new co-partnership plan will be watched with considerable interest.

Nor must the fact be overlooked that many of the largest, as well as other, corporations are constantly encouraging, by energetic selling campaigns, their employees to become stockholders.

If there is sincerity behind the incessant ostentatious appeals for the application of the "Golden Rule", there is now offered one of the greatest opportunities for its practical demonstration in minimizing the difficulties between Capital and Labour.

RECENT MOVEMENTS IN GREAT BRITAIN TOWARDS PEACE IN INDUSTRY

DURING recent months several movements have been evident in Great Britain, arising out of a general desire for peace in industry. Some of these movements are described in the following paragraphs.

Trades Union Congress.—At the fifty-ninth annual Trades Union Congress, held at Edinburgh, commencing September 5, the subject of industrial peace was more or less prominent. In his presidential address, Mr. George Hicks raised the question in the form of a tacit invitation to the employers. Urging the wider use of joint consultation, the chairman of the T. U. C. stated that much fuller use could be made of the machinery for negotiation between employers and employed, declaring that "practically nothing has as yet been done to establish effective machinery of joint conference between the representative organizations entitled to speak for industry as a whole." Advocating a direct "get-together" form of negotiation rather than a conference under Government or other auspices, Mr. Hicks proceeded:—

"Such a direct exchange of practical views between representatives of the great organized bodies who have responsibility for the conduct of industry and know its problems at first hand would be of far greater significance than the suggestion which has been made in certain quarters for a spectacular national conference, under Government or other auspices, to discuss a vague aspiration towards 'industrial peace.'"

This suggestion in the presidential address was substantiated by the General Council's report to the convention, which concluded:—

"The extent to which the Confederation of Employers' Organizations controls questions of general policy . . . points to the necessity for centralized negotiations to deal with general questions for the whole movement. The General Council therefore recommends that this necessary co-ordination should be in the hands of the T. U. C. through the medium of the General Council."

These overtures were repeated on October 19 in a speech delivered at Battersea by Mr. W. M. Citrine, secretary of the Trades Union Congress, who was reported to have declared that "the trade unions believe that they can make a constructive contribution to industry and are ready to meet the employers for a discussion of the terms and conditions upon which co-operation is possible for the improvement of conditions in industry." Referring to the decision of the T.U.C. at Edinburgh he said:—

"That decision was perfectly clear. It was that if anything is to be achieved in the establishment of better relationships between employers and workers, it could only be done through representative organizations of the employer and the trade unions."

On the same evening, speaking at Birmingham, the Minister of Labour said he hoped that the employers would respond to the offer, and endorsed the statement of the T. U. C. secretary that the willingness to co-operate should be expressed by representative bodies on both sides.

Employers' Proposals.—The employers' body which replied to these overtures was the National Confederation of Employers' Organizations, which represents federations in industries employing 7,000,000 workpeople. This organization in its official declaration welcomed and endorsed the sentiment expressed at the Edinburgh convention of the Trades Union Congress in furtherance of peace in British industry, and agreed with the unions that political intervention was unnecessary. However, the Confederation differed as to the method of effecting industrial peace, and considered that such co-operation could best be sought in individual industries. This section of the employers' reply was as follows:—

"It is in the individual works that that spirit of mutual understanding must find its ultimate

expression in practical results. The methods for attaining these results must vary from industry to industry according to the problems which the particular industry has to face, and the Confederation would therefore wish to record its view that it is in the individual industries—in their organizations and in the day-to-day contact in the works—that the most ready and effective means present themselves for developing and applying the spirit of industrial good-will which is so vital to the future welfare of this country, and which the Confederation will at all times be anxious to further and support."

Mansion House Conference.—Another move toward industrial peace was made at the "Mansion House Conference". At the invitation of the Lord Mayor of London, a conference of British employers, labour leaders and officials of the Brotherhood Movement was held at the Mansion House, London, on October 17, to consider what could be done to secure peace in industry. At this conference, over which the Lord Mayor presided, one of the most notable addresses was that made by Sir Alfred Mond, M.P., in which he again emphasized the establishment of a League of Industrial Peace, composed of all classes, having a definite program, a definite policy and definite sanctions. In asserting the need for such a scheme, modelled apparently upon the League of Nations, he declared that "the whole of our industrial future would be jeopardized unless we could obtain a steady continuous program of production and development in this country." He stated that in the company with which he was associated the (Brunner-Mond Company) there had not been a labour dispute during 53 years, and his experience was that the operation of works councils was all to the good. Continuing, he urged that the scheme be kept entirely out of party politics, and insisted that it must be something so strong that every party would have to accept it; something so sound that the common feeling of the nation would insist on its being implemented. In conclusion he stated that the policy of low wages and long hours as a remedy for industrial depression, was a retrograde step, and in lieu thereof he urged high production, cheap costs and high wages.

Copartnership.—Another organization which is working in somewhat the same direction but by different methods is the Industrial Copartnership Association—a body whose objective is to bring about an organization in industry based upon the principle of labour co-partnership. At a conference of this association, held on October 14 in Manchester, aspects of copartnership and profit-sharing were discussed. One of the features of the conference was the contribution of Mr. R. Lloyd Roberts, of the Imperial Chemical Industries, Limited (formerly the Brunner-Mond Company). This corporation, which is a combine of chemical manufacturers, had adopted a scheme calculated to improve industrial relations. Mr. Roberts stated that there was danger, both nationally and internationally, unless it was emphasized that public service was the object of industry. Industry, he declared, was becoming a joint affair, and he believed that all the worker wanted was to be regarded as a human being, to be recognized as an essential partner in industry, and to be accorded the status that one partner had the right to expect from another. The scheme of copartnership which is being put into operation by the Imperial Chemical Industries, Limited, makes provision for a workman to buy shares at 2s. 6d. below the market price and pay for them by instalments spread over two years. If he died before he had completed payment, even if he died after he had paid only one instalment, the company paid all the rest, and the widow or next of kin received the benefit. The man was entitled to dividend from the date of his first payment. He could spend 20 per cent of his wages or salary annually on these shares. A man whose wages amounted to £200 a year or less would be given a share for every four shares he bought. Employees receiving higher wages or salaries would have to buy more shares than four before being entitled to receive one free—the number they would have to purchase to qualify them receiving a free share would vary with the amount of their pay.

Mr. Roberts emphasized the fact that the shares would be the men's own—to be sold if desired. The scheme was intended to encourage investment and not speculation, and the corporation was hoping that as a result of it the great majority of their 35,000 employees would become practically interested in the affairs of the company.

In addition, the employees would, under the scheme, be given (through the operation of a central labour department and a system of committees) that status in the concern and that "contact" and confidence which was designed to create a feeling of real partnership. It was also intended to effect a co-partnership basis by according information to the worker as to the progress of the business, and to inaugurate a "staff-grade" of workers, affording more stable and remunerative conditions for men of five years service.

EMPLOYEES' STOCK OWNERSHIP IN INTERNATIONAL PAPER COMPANY

THE International Paper Company, through its president, Mr. A. R. Graustein, recently announced the third offering of its cumulative seven per cent preferred stock to those now actually in the employ of the company or any of its wholly owned subsidiaries. The number of Canadian employees to whom this subscription plan will apply is approximately 7,726. There are 30 subsidiary corporations affiliated with the International Paper Company, and among the Canadian subsidiaries are the following: Canadian International Paper Company; St. George Pulp and Paper Company; High Falls Pulp and Paper Company; Miramichi Lumber Company, Limited; Dalhousie Lumber Company, Limited; Gatineau Power Company; Saint John River Power Company; Hull Electric Company; Ottawa-Montreal Power Company, Limited; Maniwaki Power and Telephone Company, Limited; Papineauville Electric Company, Limited; Quebec Southern Power Corporation; Laurentian Hydro-Electric Limited; Napierville Electric Company, Limited; International Fibre Board Company, Limited.

The first offering of this stock to the employees of the International Paper Company was in 1925, when 2,001 employees subscribed to a total of 7,189 shares. When the second offering was made in 1926, 2,668 employees subscribed to a total of 8,449 shares.

The subscription price of this stock to employees is $100 per share, and may be paid in full or by instalments deducted from the salaries or wages of employees. If payment is on the latter basis, each instalment is $1 per share for subscribers who are paid weekly; $2.25 per share for subscribers paid twice a month, and $4.50 per share for subscribers paid monthly.

Deductions from weekly payrolls will commence on the first pay day after January 2, 1928, and deductions from monthly and semi-monthly will commence on payrolls due and payable on December 31, 1927. If payment is made in full it must be made on or before January 6, 1928.

If stock is subscribed on the instalment basis, interest will be charged at 5 per cent a year on the balance due, but the dividends will be paid direct, unless it is directed that such be applied on account of the purchase price.

The dividends on this stock are $7 a share a year—$1.75 a share on January 15; $1.75 a share on April 15; $1.75 a share on July 15; and $1.75 a share on October 15.

Bonuses—As an incentive to subscribers to complete their purchase agreements and to retain the purchased stock and remain in the service of the company, the company agrees to pay each subscriber on January 1 of each year, for five years commencing with January 1, 1929, for each share of stock purchased, a bonus as follows:—

On January 1, 1929, ... $1 per share.
On January 1, 1930, ... $2 per share.
On January 1, 1931, ... $3 per share.
On January 1, 1932, ... $4 per share.
On January 1, 1933, ... $5 per share.

This bonus is conditional upon the subscriber then being in the employ of the company or one of its wholly-owned subsidiaries. He must have paid in full all instalments due thereon to the date of such bonus payment, and still hold the stock.

If the subscriber keeps his stock and remains continuously in the employ of the company or its wholly-owned subsidiaries for five years from the date of his original subscription, the company intends that he shall receive, as soon as practicable after January 1, 1933, a special bonus, the amount of which could not at present be determined or fixed.

Voting Rights.—After the stock is delivered it carries full voting rights. In the meantime, whether the stock has been paid for in full or is being paid for in instalments, arrangements will be made to give each subscriber the right to say how the stock subscribed for by him should be voted.

An employee is free to sell his stock shares any time after it has been paid for, but the selling of such stock stops the bonus.

The number of shares that may be applied for by each employee is limited to three shares if salary or wages are $30 per week or less; four shares if it is $40 per week or less, but more than $30 per week; and five shares if it is $50 per week or less, but more than $40 per week, and so on.

Cancellation of Subscription.—Subscriptions will be cancelled for the following reasons: (1) By request of subscriber; (2) by subscriber voluntarily leaving the service or by his being discharged or failing to resume employment when requested; (3) by subscriber falling in arrears upon the payments due for the stock.

The cancellation of a subscription forfeits all interest and benefits which the subscriber would have received if he had continued such subscription, and there will be repaid to the subscriber the full amounts of payments made on the subscription so cancelled with interest at five per cent, no credit being given for dividends or for bonuses.

Death or Disability.—If a purchaser of stock under this plan dies while rendering faithful service during such five year period, payment will be made to his estate, or to a named beneficiary as follows:

(1) If his subscription is fully paid and he has received and not disposed of his certificate of stock, the company will pay a sum equal to the total of the respective amounts per share.

(2) If the subscription has not been paid in full, the company will pay the money theretofore paid in by the subscriber on account, and the bonuses for the entire five years period, the company retaining the stock.

If a purchaser is permanently disabled while rendering faithful service during such five years period, payment will thereupon be made to him upon the above basis.

NOTES ON LABOUR UNION ACTIVITIES

Legislative Demands of Ontario Executive of the Trades and Labour Congress of Canada

THE legislative program of the Ontario provincial executive of the Trades and Labour Congress of Canada was submitted to Premier Howard Ferguson and his cabinet on November 29 by a delegation composed of H. S. Mitchell, J. Watt, S. Bush and C. R. Nichols, members of the Provincial executive of the Trades and Labour Congress of Canada, accompanied by Tom Moore, president, and Jas. Simpson, vice-president, of the Trades and Labour Congress, and by a number of representatives of affiliated unions.

One of the requests presented was that definite action be taken by the government to give effect to such Draft Conventions and Recommendations of the conferences of the International Labour Organization as come within the jurisdiction of the provincial legislature. These include in particular: (1) Enactment of an eight-hour day law for industrial and commercial undertakings; (2) Legislation for the further protection of women and children in industrial and commercial undertakings and in agriculture; (3) Co-operation with other provinces so as to make possible ratification, by Canada, of these draft conventions and recommendations; (4) Bringing of all young persons, irrespective of sex, under the Minimum Wage Act.

Other requests made were as follows:—

(1) Amendments of the Ontario Mothers' Allowance Act;

(2) Amendments of the Minimum Wage Act;

(3) Legislation providing for compulsory right-of-way for fire fighting apparatus;

(4) An investigation into alleged conditions in trade schools;

(5) Protesting against military training in schools;

(6) Unemployment relief measures and unemployment insurance;

(7) Legislation for licensing and sanitary laws to govern barbers and barber shops;

(8) More rigid inspection of paint-spraying machines;

(9) Amendments to the Minimum Wage and Factory Acts so that there may be uniformity in regard to hours of labour, and age and wages of the workers;

(10) Amendments to the Factory, Shop and Office Building Act so as to define more clearly the provisions of the law, and to provide for the extension of the scope of the Act by including lines of manufacture not now covered;

(11) Protesting against the issuance of injunctions in cases of peaceful picketing;

(12) Discontinuance by the Ontario Government of the practice of subsituting prison-made products, for grants, where requests are made for government support, and that the use of these products be limited to non-productive government institutions;

(13) Legislation to prohibit the manufacture or making of clothing in the homes of the wage earners;

(14) An investigation into the working conditions of linemen and others in the electrical industry;

(15) Legislation providing for an eight-hour work day on all provincial public works;

(16) Provision for the strengthening and enforcing of the Fair Wage Regulations of the Ontario government;

(17) Legislation to provide for uniformity of building by-laws in all municipalities within the province;

(18) Extension of the powers of the steam boiler inspection department and adoption of standard regulations for general use throughout the province, with proper supervision and inspection of all installations;

(19) Uniform standard plumbing regulations for the province;

(20) Extension of the scope of the Factory Act to take in garage employees;

(21) Legislation making it compulsory for employers to give public notice of a strike when advertising for employees;

(22) Health regulations requiring all bread to be wrapped before leaving the bakeries and abolition of night work in bakeries;

(23) Legislation compelling municipalities with a population of 10,000 or over employing a regular fire force to provide a superannuation and pension fund for the members of such force;

(24) Amendment to the Fire Marshals' Act providiing that every municipality with a population of 50,000 or over shall have a fire marshal or fire marshals, whose salary shall be paid by the Ontario Government and the Fire Underwriters' Association, each paying an equal amount;

(25) Legislation by the province to make effective the provisions of the Old Age Pensions Act;

(26) Amendments to the Ontario Liquor Control Act whereby each municipality would be granted local autonomy for the sale of beer and wine in licensed places for beverage purposes;

(27) Legislation requiring all motor car owners to carry public liability insurance and that the granting of licenses be more stringent;

(28)* That the Minimum Wage Board issue orders on behalf of the female help in hotels, etc., outside the city of Toronto;

(29) That companies operating street cars be compelled to place on their cars the best available safety fenders;

(30) That bus owners and companies be designated common carriers and placed under the jurisdiction of the Federal and Provincial Railway Boards;

(31) Investigation into the system followed in banks and financial institutions of compelling or allowing employees to labour unlimited hours;

(32) Legislation for the regulation of the use of the pneumatic hammer so as to safeguard the health and life of the operator.

Additional requests were as follows: (1) That all placements of immigrants be made through the Provincial Government Employment Service and that Canadian citizens be given equal opportunity in any provincial colonization scheme; (2) Amendments to the Election Act to provide for: (*a*) Proportional representation, (*b*) Election day a public holiday, (*c*) One man, one vote, (*d*) Abolition of property qualifications for voting on money by-laws; (3) Appointment of more inspectors under the Stationary and Hoisting Engineers' Act, and compulsory registration of steam plant owners; (4) Appointment of more inspectors under the Factory Act so that the law may be properly enforced; (5) Fullest possible vocational guidance for those leaving school to become wage earners; (6) That the facilities of the Ontario Savings Office be extended to all parts of the province and that the four per cent rate of interest be restored to the depositors; (7) Compulsory imprint of name of publishing house on all printing for public circulation; (8) Government aid for the development of co-operative societies; (9) Amendments to the Mechanics Lien Act; (10) Prohibiting of employment of white girls by orientals; (11) Abolition of private employment bureaus, and private detective agencies; (12) Enactment of a law to regulate public automobile garages and service stations in the province of Ontario, and to govern employment and examination of automobile mechanics employed therein; (13) That the care of the unemployed be undertaken by the Federal and Provincial Governments; (14) Amendments to the Factory Act making forty-eight the maximum work hours for women and children; (15) Enforcement of the Building Trades Protection Act; (16) Regulation of electric wiring construction; (17) Labour representation on appointed commissions, especially on the Ontario Hydro-Electric Commission and the Provincial Parole Board; (18) Public ownership and operation of all public utilities; (19) That the political right of civic employees and civil servants be guaranteed; (20) Legislation to give all employees, who have been employed at least ten months in each year, two weeks' holidays with full pay.

* Order No. 40 of the Minimum Wage Board, governing restaurants and refreshment rooms in cities over 30,000 population (excepting Toronto) does not apply to hotels.

Mine Workers' Union of Canada

President Frank Wheatley presided over the second annual convention of the Mine Workers' Union of Canada, which opened in Calgary on November 21, 1927, and was attended by twenty-four accredited delegates, together with seven other delegates from local unions unaffiliated with the organization. The delegates were informed by the president of the efforts put forth during the past year to organize the miners in the various mines throughout Alberta and southeastern British Columbia, and also in Northern Ontario. He told of the difficulties experienced in endeavouring to gain recognition for the union and to have the "check-off" system established. When these requests were made to the various companies in the Drumheller district they were refused, with the result that a strike took place. At the end of two weeks the miners returned to work without having gained their objective, the following reasons being given by the president for such failure: (1) Efforts on the part of the United Mines Workers of America to set up locals at Hy-Grade and Monarch; (2) Employers visiting the houses of their workmen soliciting them to return to work, one operator offering to open his mine if he could get twenty men to start work; (3) The workmen being informed that they must return to work at once or immediately vacate their homes.

In referring to organization work in Northern Ontario, president Wheatley stated that "some difficulty is encountered in the establishment of these locals, causing the work to be carried on in a very secretive manner, but progress is being made." The president further stated that "inquiries have been made from two different sources in Nova Scotia, and constitutions supplied; also from Vancouver Island. We feel it is essential to first establish this district fully before undertaking to organize outside." The president made mention of the formation of the All-Canadian Congress of Labour and the establishing by this body of labour councils in Vancouver, Calgary, Winnipeg, Toronto and Edmonton. The delegates were informed that certain recommendations for amendments to the Mines Act and Compensation Act of Alberta originating in local unions were submitted by the district officers to the provincial cabinet prior to the last session of the legislature. Some amendments were made to the Compensation Act of Alberta by the provincial government, which appointed a committee to make further recommendations to the next session of the legislature for the purpose of stabilizing the Act and eliminating the need for yearly amendments. In closing president Wheatley stated that "it will be the serious duty of this convention to outline a policy to deal with the coming wage negotiations, as well as to set out a policy for the future conduct of our organization."

According to the financial statement submitted by the secretary-treasurer the total receipts were $33,589.81; expenditures, $27,258.86, leaving a balance of $6,330.95. The secretary also stated that the average paid up membership for the sixteen month period ending October 31, 1927, was 3,350.

Recommendations of the committee on resolutions adopted by the convention were: (1) Requesting the Alberta government to so amend the law that the "check-off" may be made a legal assessment; (2) Urging the organization to do all in its power to further the purposes of the All-Canadian Congress of Labour; (3) Recommending that before a certificate of competency be granted a miner, the examination board shall have some proof, as to his ability, in writing, other than from the applicant himself, preferably from the secretary of the local union or from his last employer; (4) Instructing the executive to circularize all locals to get in touch with their federal representative, and also to circularize the All-Canadian Congress of Labour and all other organizations, with a view to eliminating the present restrictions placed upon peaceful picketing.

Journeymen Barbers' Federation of Ontario

The twelfth annual convention of the Journeymen Barbers' Federation of Ontario was held in Toronto on November 7, 1927, president M. J. Gainey, Peterboro, Ont., presiding. After the appointing of the regular committees, addresses were delivered by Wilfred Harrison, president, Canadian Master Barbers' Association; Leon Worthall, honorary president of the Federation and Organizer of the Journeymen Barbers' International Union of America, and H. J. Halford, vice-chairman of the Ontario Compensation Board.

Secretary-treasurer Albert Call told of the efforts put forth to have the proposed barbers' license law placed on the statute books of Ontario. Further efforts, he stated, would be made to have this bill introduced at the coming session of the legislature. Secretary

Call urged all locals to do all in their power to shorten the working hours, which could be accomplished by municipal by-law. By this means, he stated, "you will gradually eliminate the cheap shops because they cannot exist on short hours."

Resolutions were passed recommending: (1) Co-operative advertising for barbers; (2) The appointing of a permanent organizer for Canada; (3) Re-indorsing the proposed Barbers' License Law.

Officers elected were: President M. J. Gainey, Peterboro, Ont.; firse vice-president, P. C. Hollier, Hamilton, Ont.; second vice-president, Geo. Lewis, Toronto, Ont.; third vice-president, W. H. Davis, Windsor, Ont.; fourth vice-president, E. D. Hunt, Brantford, Ont.; fifth vice-president, W. Maxwell, Ottawa, Ont.; secretary-treasurer and press agent, Albert Call, St. Catharines, Ont.

The next convention will be held on the first Monday in November, 1928, in Toronto, Ont.

NOTES ON VOCATIONAL EDUCATION AND APPRENTICESHIP

Apprenticeship in the Printing Trade—Great Britain

THE first of a series of seven reports, incorporating the results of an inquiry made by the Ministry of Labour in 1925 and 1926 into apprenticeship and training for the skilled occupations, has just recently been published. The information contained in these reports was obtained from schedules issued to some 44,000 employers in Great Britain and Northern Ireland and also to the principal trade unions, after consultation respectively with the National Confederation of Employers' Organizations and with the General Council of the Trade Union Congress. The first report deals with the printing and allied industries.

The industry employs in Great Britain and Northern Ireland about 169,000 males and 98,000 females. Apprenticeship is the usual method of recruitment. "Proportionately fewer apprentices," the report notes, "are employed in daily newspaper work than in other branches of the industry. This is due partly to the statutory restrictions placed upon the employment of lads under 18 years of age on night work, and partly to a general reluctance to employ lads on high-speed newspaper work. Another important cause is the agreed maximum of apprentices allowed in the large provincial daily newspaper establishments, which tends in the aggregate to reduce the proportion of apprentices in provincial newspaper printing."

Apprentices usually enter the printing occupation at 14 years of age, about two-thirds commencing at that age, but 16 years of age is the now usual age of commencement for apprentices to process work and journalism. Only about 2 per cent of apprentices enter at ages over 16 years, and these are found mainly among stereotypers, electrotypers, journalists, and warehousemen. The period of apprenticeship is predominantly seven years. Periods of improvership following apprenticeship are unusual in the trade as a whole, full journeymen's rates being paid to 88 per cent of the apprentices employed immediately on completion of their apprenticeship. Where facilities are available, employers usually allow the attendance of apprentices and learners at technical or trade classes, but only a small number make attendance at such classes a compulsory term of the employment. The Joint Industrial Council has formulated a scheme of apprenticeship for the trade to improve education and training and ensure recruitment of the right kind of boys.

Apprentices Limited.—Analysis of returns from 4,043 employers employing 115,250 male workpeople brings out the fact that the proportion of apprentices or trainees to workpeople varied with the kind of firm and decreased regularly with its size. "While firms with less than ten male workers had one apprentice to about four workpeople, and firms with ten and under 30 had one apprentice to six workpeople, the proportion was one to nine in firms of from 50 to 100 workers, and one to about 20 when the size of the firm is 500 workers or over." Thus it is clear that among the firms taking apprentices it is the small rather than the large firms which are the more actively engaged in training boys for the skilled occupations. As far as apprentices in the composing-room are concerned, the smaller proportion of apprentices in large firms is in some part an automatic consequence of the limitation of the number of apprentices in the provinces to a maximum of eight in any one establishment. This limitation, it is elsewhere explained, is embodied in joint agreement and trade union rules and regulations.

In the daily newspaper printing industry "firms employing 20 to 30 workers had apprentices in the proportion of one to seven workers; in firms employing 50 to 100 workers the proportion was one to ten, 200 to 500 workers one to 30, 500 to 1,000 workers one to 65, and over 1,000 workers one to 160 . . . . In the work of daily newspapers the returns furnished by individual firms during the inquiry showed that there were 671 apprentices and learners, as against a total employment of 22,957 male workpeople—a proportion of only 3 per cent in comparison with 10 per cent among the general printing firms."

Shortage of Stereotypers.—The report continues: "Although not unduly perturbed concerning the supply of skilled workers for the future, newspaper proprietors consider that, in the composing room at all events, it would be to the advantage of the industry if the number of apprentices were increased. It is probable, however, that they can satisfy their requirements in all occupations except those of stereotypers by taking into newspaper printing men who have been trained in general printing. The fact of this supply having been available has enabled some newspaper establishments to dispense with the number of apprentices who could have been employed under agreements with trade unions. But the conditions in respect of stereotypers are somewhat different. This is an occupation in which the supply of craftsmen cannot be maintained from those trained in general printing, and for which newspapers must train their own men. The employers' associations state that under present arrangements a sufficient number of these workers, who hold a key position in newspaper work, is not available. This condition of affairs is reflected in the facts ascertained in the inquiry, which show that in this occupation the proportion of apprentices on newspaper work, the entering age, and the wages, were all alike higher than in any other printing occupation."

Employers' Views.—"In every main occupation in the printing industry the numbers in training are governed by limitation of apprentices to journeymen employed, the proportion being specified under trade union rules or established by agreement between employers' associations and trade unions. The proportions specified are . . . usually simple proportions (e.g. 1 apprentice to every 3 journeymen, etc.), but in some cases, especially on newspaper work, the proportion is subject to an overriding limitation of numbers of apprentices to be employed in any one department. Of the employers furnishing information on the subject of difficulties encountered in obtaining apprentices, 87 referred to the restrictive influence of the limitations imposed.

"Although these criticisms were mainly directed against the restriction in any form of the number of apprentices, the objections to simple proportionate limitation were held less strongly than the objections to the additional limitation imposed in the occupations of compositors, stereotypers, and electrotypers which prevents the employment of more than a certain number of apprentices or learners (varying from four to eight) in any one section or establishment, irrespective of the number of journeymen employed therein. In other words, it is mainly the employers employing large numbers of workpeople with establishments well equipped for the purpose of training, and only to a lesser extent those in a relatively small way of business, who consider that they are adversely affected by the rules restricting the numbers of apprentices or learners who may be employed. These employers maintain that they have to give to adults work which could be, and should be, done by apprentices in their later years, and which so far from delaying the training of the apprentices would materially advance it.

"On this subject the Federation of Master Printers states that the limitation of apprentices in the large establishments debars such firms, having the latest types of machinery and the best methods of production, from training the craftsmen they could employ; in such establishments, consequently, skilled workers have to be recruited from other places in order to maintain or increase the number of journeymen employed."

Education and Industry

The following extracts are taken from a report, appearing in the Educational Supplement of the *Times* (London), of a recent meeting of the Education Section of the British Association held in Leeds, under the presidency of the Duchess of Atholl. Mr. J Wickham Murray spoke on "New Outlooks and Tendencies". He stated that there was no adequate national policy under which education and industry could be brought together for the mutnal benefit of each. No such policy could be formulated without a revision of some of those ideas which made up our educational philosophy. It could not be done by adding to the present system of education a few odds and ends and scraps of what were called vocational subjects. It was necessary to review the extraordinary changes that had taken place since our educational ideas were shaped.

Industry definitely asked now, he said, for a close co-operation between those responsible for industry and for technical education. It believed technical education was necessary to industry and it believed that the time was ripe for an advance. The lines of advance suggested fell within the following parts:— The grouping of places in which technical education should be available so as to reduce the cost in places where only small classes would otherwise be held; the extension of the scope of technical education; the supply of an efficient staff; research; and facilities for closer contact with industrial opinion. As to staff, it was found that minimum rates of pay became maxima, and excellent men were frequently not to be attracted from industry by the present scale.

Mr. E. Walls, managing director of Messrs. Lever Brothers, dealt with the educational needs of industry. He said that the great task of education was the sorting out of each new generation so that each individual might receive the appropriate training and then be relegated to the appropriate employment. What the enlightened industrialist looked to education for was: (1) moral character and especially the simple virtues of truth and honesty, discipline and courage; (2) power of judgment; (3) creative ability. With reference to elementary education, he found that 50 per cent of the children had forgotten almost everything they had learned within 12 months of leaving school. They retained just enough facility in writing and reading to get along. Were the secondary scholars much better? Of these 33 per cent never reached the first school examination and of the remainder one-third failed, leaving just over 40 per cent who made good in that particular examination. He would like to see the quantity of knowledge imparted in elementary education reduced rather than increased. He would make the whole course a training in thinking for themselves. He would give them the simplest history, geography and calculations, driven in so as to be ineradicable; the simplest facts of everyday science, economics and citizenship, but a great deal of handling things, measuring, weighting, and checking; hand and eye training. He would give them a great deal of literature, both prose and poetry, so as to create a real habit of reading for pleasure; of drawing and music. He would simplify elementary education and so make it a real training in intelligence provided there was a free avenue open on grading to further education, and provision for post-school vocational training.

51297—4

Vocational Education and Apprenticeship —South Africa

In the November issue of the LABOUR GAZETTE page 1187, reference was made to the conference of apprenticeship committees at Johannesburg in September. A summary of the main decisions and recommendations of the conference has since come to hand.

Mr. A. B. Linscott, inspector of vocational training, outlined the basis of the system of technical education which the Union Department of Education advocated for adoption in connection with the training of apprentices in the Union, the following being the guiding principles involved:—

(1) General (so-called "cultural") education to be a part of the system throughout the period of class attendance;

(2) training to be provided in the industry as a whole; and

(3) training to be given in the special trade which the apprentice intends to follow.

Without passing a formal resolution, the conference indicated that the feeling was generally in favour of the principles enunciated by Mr. Linscott. It was announced on behalf of the Union Department of Education that it was intended to recast the whole of the existing courses and syllabuses in conformity with these principles.

Attendance at Classes.—The conference accepted the following proposals in reference to attendance at classes:—

(1) The minimum period to be six hours per week with at least 50 per cent in the employer's time, and the remainder in the apprentice's time, the distribution to be arranged in co-operation with the technical institutions;

(2) whatever the number of years for which attendance is prescribed, the period should be uniform throughout the industry, and it should be left to each industry to settle its own period, in consultation with the technical authorities.

Syllabuses.—The conference endorsed the principle that uniform syllabuses of technical education be adopted for each industry throughout the Union, and approved of a suggestion that syllabuses should be framed with the co-operation of, and in consultation with, recognized representatives of trade organizations. The conference recommended to the technical education authorities that the vocational bias should be introduced in the training of apprentices as early as possible in the courses.

A suggestion that committees might consider the provision of positive inducements to better attendance of apprentices at classes was approved by the conference, which also endorsed a recommendation to the effect that apprentices attending classes, as required by the terms of their contract, should be granted railway concessions when travelling for the purpose.

Correspondence Courses.—The conference recommended the Union Department of Education to establish correspondence courses for all areas where adequate facilities did not exist for the training of apprentices.

The conference accepted a motion recommending that apprenticeship committees be empowered summarily to fine any apprentice who, after due warning, fails to attend classes regularly, or who is guilty of any other serious breach of the contract of apprenticeship, and also to deal in a similar way with employers who have committed a serious breach of the apprenticeship contract.

In a review of the work of the conference in the October issue of the *Social and Industrial Review* the Department of Labour of South Africa points out the advantages to be gained from such a gathering and expresses the opinion that the conference should be the starting-point of a far-reaching forward movement in industrial training in South Africa. It is stated that the concrete decisions and recommendations of the conference give ample warrant for such a belief, but that even more suggestive of future developments is the spirit of co-operation and constructiveness which characterized the conference.

NOTES ON INDUSTRIAL SAFETY AND HEALTH

Safety Work in Nova Scotia Mines

THE coal mining operations of the British Empire Steel Corporation Limited were described in an article in the *Canadian Mining Journal* for November 4. This company, through its subsidiaries, the Dominion Coal Company, the Nova Scotia Steel and Coal Company, the Acadia Coal Company, and the Cumberland Railway and Coal Company, operates in the three major coal fields in Nova Scotia, in the counties of Cape Breton, Pictou and Cumberland. About 125,000 people, or more than one-fifth of the total population of the province, depend for their livelihood on the activities of this industrial group. The Safety and First Aid work of the corporations are described as follows:—

"A special department is maintained by the corporation for the promotion of safety first. Weekly meetings of the officials of each colliery are held to discuss past performance, seek remedial measures and plan for the future. A spirit of competition for the least number of accidents is fostered. Campaigns are constantly put on and valuable prizes, e.g., standard gold railroad watch, offered for best suggestions.

"All moving parts of machinery both on the surface and underground are guarded to the greatest possible degree. Special classes in first aid to the injured are conducted and a very large number of the workmen have availed themselves of the opportunity to secure certificates.

"As regards the safe operation of the mines, everything thought of is being done to this end. Supplementing the Coal Mines Regulation Act, the corporation has in force a set of special rules by which every employee must guide himself. A special staff of safety inspectors is maintained by the corporation, whose sole duty it is to visit the collieries continuously in the interests of safety. This is formed of capable and experienced men, all of whom hold certificates as colliery managers.

"The provincial government maintains a permanent resident staff of deputy inspectors of mines for the same purpose. Before men enter the mines for work, officials known as 'examiners' visit every working place and either pass or forbid it as being safe for men to work in. In addition to the above, the workmen have the right, which they are invited to and do exercise, of appointing a committee to examine all or any sections of the mine."

The writer describes the various safety devices in use in the mines, the rescue apparatus, the control of explosives, overwinding prevention, precautions in the use of electric safety lamps, stone dusting and watering; ventilation; underground electric installation, etc.

Safety Work in Logging Camps in British Columbia

Major H. Steere-Clark, safety director for the British Columbia Loggers' Association, in an address delivered before the woodworking section of the 16th annual safety congress of the National Safety Council (U.S.A.), described the safety conditions and operations in the British Columbia woods. This paper is given

with illustrations, in the November issue of *National Safety News*. Describing the origin of the safety movement, the writer says:—

"Increasing assessments levied by the Workmen's Compensation Board upon the logging industry in British Columbia (at present 4½ per cent of an operator's payroll) made it imperative that something be done to offset this waste of man-power and money. During the five years ending 1925, the cost of accidents increased out of all proportion to the increased labour employed. With few exceptions the methods of modern logging, with the high lead, skidder, sky line, etc., were in use in 1921 as they are to-day. The average length of disability, however, for total temporary disabilities increased each year from 37 days in 1921 to 42 days in 1925. But in 1926 this was reduced to 40 days, showing that safety work was having its effect throughout the entire industry. The accident cost for 1926 was $50,000 less than for the previous year. In May, 1925, the British Columbia Loggers' Association, comprising forty-one operators employing some 6,000 men in their sixty-seven camps, and accounting for 85 per cent of the production on the coast, realized that sound safety work should be introduced and the writer was asked to organize a safety department within the organization."

Before 1925 the only safety supervision (and that only from the mechanical side) that the industry received was a periodical inspection of camps by government boiler and railroad inspectors. This inspection was effective within its limits, less than one per cent of injuries in the camps being due to faulty equipment. General accidents, however, were on the increase during the five years ending 1925, and the need for an educational campaign among the workers became evident. Special difficulties in this work arise from the character of employment in the woods.

"There is no more transient population," Mr. Clark states, "than found in the Pacific logging industry, many men being veritable nomads. No less than 18,000 men were shipped from our own employment office to our camps, which employ normally 6,000 men, making a complete labour turnover three times a year; and yet, while these men are at camp, they are in the main good workers, using the experience gained in many camps, and 'spreading the tricks of the trade,' including safety. Therefore it was found necessary to form a committee in two parts, namely a 'permanent one' composed of part management and part reliable old timers, say to the number of four, to which is added a 'floating committee' of six, making a total committee of ten or twelve. To avoid favoritism, the floating committee is changed each month and fresh men invited so that safety thought and active interest will spread as quickly as possible and thus men may have a chance to take an active part. We encourage our camp foremen to be present at all committee meetings, which are held at least once a month. All formality is completely done away with. The discussions then practically become round table talks. Any suggestions brought forward are thoroughly discussed and recommendations made for their adoption or rejection. Each accident or near accident that may have occurred since the previous meeting is carefully gone over and the committee's opinions quoted on their report. These reports are made in duplicate, one copy sent to the association safety department, the other displayed on the camp bulletin board and kept for record. This enables the whole crew to see how their committee functions, how their interests are studied, and keeps my office in constant touch with safety work in camps. Many sound and constructive criticisms are made on these reports, which are disseminated by circular from our department. Such items as 'carelessness,' 'should have known better,' 'it was his own fault,' etc., are often quoted by the committees and are having their effect on the camp crews, who realize that they are being criticized and helped by their fellow men. To further encourage the safety spirit, a number of operators put up cash prizes and prizes in kind, to be drawn for at the end of each month, during which the crew should be free from a compensable claim. All camps are visited as often as possible, when safety committees are interviewed and a general safety meeting of all employees with the management is held. These safety meetings, supplemented by motion pictures are held in the evenings, are invariably responsible for a 100 per cent attendance, which is voluntary, and really forms an entertainment that logging crews look forward to."

The paper describes in detail the methods used in handling the heavy timber and the precautions taken to ensure safety in the manifold operations carried on in the lumber camps.

Safety Organization of Pittsburgh Coal Company

The November issue of the *Coal Age* (New York) contains details of the methods followed by the Pittsburgh Coal Company in developing their property, which consists of 150,000 acres of coal in western Pennsylvania,

and 20,000 acres in Ohio and eastern Kentucky. The safety and personnel manager describes the company's "safety" methods:

"The Pittsburgh Coal Company," he says, "is devoting a great deal of attention to safety, and is practising it, not perfunctorily as a benevolent measure, but in a decidedly practical sort of way. Its approach to safety follows three distinct channels: (1) Training of men in their jobs, or occupational training; (2) teaching of safety methods; and (3) establishing safe working conditions.

"Occupational training, naturally, is delegated for the most part to plant officials. As conditions and procedures are somewhat varied as between mines, and as practices are gradually being changed by the introduction of new methods and equipment, the training of men for their jobs must be adjusted accordingly. In general, the best place for this training is 'on the job' and the best teachers are the bosses. But for those who seek higher training a vocational course has been established. It is in charge of men experienced in this field.

"It is the aim of the company to train every employee in first-aid methods and at least ten per cent of them in the use of mine-rescue apparatus. First-aid is also being taught in the schools. Teams are being organized and trained in recovery operations. Two fully-equipped rescue stations are maintained at strategic points. A schedule has been developed covering procedure and use of equipment in the event of a mine fire or explosion. Mine-rescue and first-aid contests will be held each year and representation in state and international meets will be continued. First-aid and mine-rescue classes are being conducted with the co-operation of the United States Bureau of Mines.

"Mine safety meetings are held monthly at each plant for the discussion of accidents and their prevention. At these meetings, also, safety suggestions are acted upon. The company is a member of the National Safety Council and circulates the literature of this organization among its employees. Safety-slogan inserts are placed in each pay envelope. At each plant is hung a white flag, measuring 4 by 6 feet on which appears in green letters the words 'No Accident Today.'

"First-aid stations are being established in the several sections of each mine and will be re-located as necessary so that no working place will ever be more than 1,500 feet away from one of them. The station is an opening in coal, and is furnished with a wooden platform, electric lights, a canister containing a stretcher, two blankets and a complete set of splints; also a first-aid cabinet. An up-to-date first-aid station is being installed outside, adjoining the mine foreman's office, at each plant.

The writer next refers to the company's early adoption of rock-dusting on a large scale. In mechanical mining, blowers and tubing are used, not as a primary agent to ventilation but merely for quickly removing smoke after shooting. "Inspection of mines is in charge of a chief inspector and two assistants. Inspections are made periodically and the findings recorded on designated forms, these being supplemented by reports. These provide a means of comparing conditions in one mine with those in another, all inspections being reported on the basis of predetermined standards."

Canadian Pacific Railway's 'First Aid' Organization

The results of the St. John Ambulance Association's 1927 competition for Canadian railway first aid teams was given in the September issue of the LABOUR GAZETTE, with special reference to the successes of the Canadion National teams in some of the competitions. The Canadian branch of the Association was established in 1910. In 1909 the Canadian Pacific had commenced giving instruction to its employees in First Aid to the Injured. Since that time instruction has been given by the company to more than 28,000 employees, scattered from the Atlantic to the Pacific. The class attendance at present is approximately 2,500 per annum, of which number approximately 1,700 pass examination at the hands of an examining surgeon and qualify for the certificate or higher award of the St. John Ambulance Association.

Team competitions commenced on the Canadian Pacific in the year 1911 and the company provided a trophy for each district, representing the championship of the district. The team winning the championship of the various districts then compete for the championship of eastern lines or western lines as the case may be, and the winner is awarded the Shaughnessy Shield. The final contest is then held between the championship teams of the eastern and western lines for what is known as the Grand Challenge Cup, representing the All-Lines Championship.

Dr. H. A. Beatty, M.R.C.S., the company's chief surgeon and medical officer, donates a gold medal to each member of the winning team.

The company's First-Aid teams this year won all Dominion trophies of the St. John Ambulance Association for the competition for which they were eligible: The Montizambert Trophy, The Wallace Nesbitt Railway Trophy, The Sherwood Police Trophy.

Treatment of Industrial Rheumatism

It is proposed to establish in London a clinic for the treatment of industrial rheumatism. Mr. Henry Lesser, vice-president of the National Association of Insurance Committees, explained at a recent conference that the clinic would follow the lines of a similar institution in Germany. He stated that on the invitation of the German Minister of Health, a representative party of British industrialists recently attended a conference in Berlin of the Central International Committee on Rheumatism, appointed by the Society of Medical Hydrology. His general impression of the visit was that the Germans, by means of these ambulatoriums, or out patient clinics, were exploring a special field of investigation on a scale which had not yet been attempted in England. All who are concerned with the problem, whether as patients, physicians, employers, or State Insurance officials, appear to be agreed on the advantages to be derived from hydrotherapeutic treatment. The British Committee of the International Society of Medical Hydrology have put forward a scheme for the establishment of an experimental clinic for rheumatic diseases in London. The clinic will offer all the most approved methods of external or physical treatment which had proved efficacious in other places for the cure or alleviation of rheumatic diseases. The proposal has been sponsored by the British Red Cross Society, which proposes to launch an appeal for £40,000 as a foundation fund. Should the experiment prove successful similar clinics will be established in other parts of the country.

Spinners' Cancer in Lancashire

Sir Gerald Belhouse, Chief Inspector of Factories of Great Britain, is to confer with the Compensation Department of the Master Cotton Spinners' Federation on the question of the prevention of spinners' cancer.

Dr. Robertson, Medical Officer of the Health for Darwen, Lancashire, has come to the conclusion that the cause of cancer in the majority of cases is not oil, as previously supposed, but friction.

Inquiries show that spinners' cancer is practically unknown in France and in the United States, where spinning is carried on under similar conditions. The difference, Dr. Robertson states, is due to the fact that whereas spinners should work in loose clothing, Lancashire spinners wear underclothing which is braced up in such a fashion that every time a spinner leans forward at his work there is very decisive friction. This repeated hundreds of times each day amply explains the irritation which Dr. Robertson holds brings about cancerous conditions.

Compensation for Fishermen in Massachusetts and Nova Scotia

The *Halifax Chronicle* recently compared the benefits received by fishermen or their dependants under Workmen's Compensation in Massachusetts and in Nova Scotia. Referring to the recent loss of two fishing vessels sailing from Gloucester, Mass., the *Chronicle* said:—

"The Columbia was lost with twenty-three men and the Avalon with eleven men. Both these Gloucester schooners were manned by men with families, in several instances with large families. But compensation is an admiralty matter and does not come within the jurisdiction of the state. Nor is it easy to obtain mortgage loans on ships. How very different were the cases of Lunenburg vessels lost a few weeks ago. They were under the Compensation Act of Nova Scotia, and provision has ben made out of the disaster fund for the widows and dependent children of the men who were lost in these tragic disasters. In this respect, leaving aside all economic problems, our fishermen are much better off than the men of Gloucester."

During November there were 6,175 accidents reported to the Workmen's Compensation Board of Ontario, as compared with 5,959 for November last year. Death cases numbered 46 this year, while last year there were 54 reported in November.

The number of accidents reported to date this year are 66,324, being 408 more than the number for the whole of 1926. The fatal cases this year number 382 for the 11 months, as compared with 366 for the same period last year.

The benefits awarded during November were $499,565.61, $407,976.48 of this being for compensation, and $91,589.13 for medical aid. This brings the total benefits this year to date to $5,526,206.85, as compared with $5,233,027.11 for the corresponding period of 1926.

CENSUS OF INDUSTRIES IN CANADA FOR THE YEARS 1924 AND 1925

THE Dominion Bureau of Statistics under the Statistics Act of 1918 takes annually by mail an industrial census, covering statistics of fisheries, mines, forestry and general manufacture in Canada. The annual census is in addition to the Bureau's decennial census and the statistics of population, finance, education, etc. Preliminary reports on various industries have been reviewed in previous issues of the LABOUR GAZETTE. The Bureau has issued summary figures for all manufacturing industries in Canada for the years 1924 and 1925, and these are presented in this article in tabular form.

Comparisons of the leading industries in the Dominion for 1925, indicate some interesting details. In regard to the number of employees the statistics show that the Sawmill industry leads with 35,458 employees, followed by pulp and paper in which 28,031 are employed. Cottons are in third position with 20,497 employees, while in fourth place is Railway Rolling Stock, employing 20,202.

The Butter and Cheese industry heads the list on the basis of the number of establishments, with 2,988. In second place is the Sawmill industry with 2,700 establishments. Bread and Other Bakery Products follow with 2,176 establishments, while in fourth place is the Flour and Grist Milling industry with 1,310 establishments.

The Electric Light and Power industry leads in regard to the amount of capital employed with $726,721,087. It is followed by the Pulp and Paper industry with $460,397,772 capital invested. Sawmills are in third place with $204,134,003 capital employed, with Castings and Forgings fourth in the list, having $84,812,441. A close fifth in this rating is Cotton, Yarn and Cloth with an invested capital of $83,610,686.

When rated according to the total amount of salaries and wages paid during the year 1925, the Pulp and Paper industry leads all others with $38,560,905. The Sawmill industry is second with $34,097,066. In third place is Railway Rolling Stock which expended $26,580,356, while Castings and Forgings are listed fourth with an expenditure of $21,039,510.

As regards cost of materials, the Flour and Grist Milling industry is rated in first place with $163,164,668. The Slaughtering and Meat Packing industry is second with $132,329,355. In third place come Butter and Cheese with $97,843,334, followed by Sawmills with $78,219,728.

When compared on a basis of the gross value of products, Pulp and Paper is again in the lead with a total valuation of $193,092,937. In second place is the Flour and Grist Milling industry with $187,944,731. Occupying third place is the Slaughtering and Meat Packing industry with $163,816,810, followed by Sawmills with $134,413,845.

The accompanying tables give detailed figures for the manufacturing industries.

TABLE I.—PRINCIPAL STATISTICS COMPARED FOR 1922, 1923, 1924 AND 1925.

Items		1922	1923	1924	1925
Establishments	No.	22,541	22,642	22,178	22,331
Capital invested	$	3,244,302,410	3,380,322,950	3,538,813,460	3,808,309,981
Average capital per establishment	$	143,929	149,295	159,564	170,538
Employees on salaries	No.	76,040	78,273	76,230	77,623
Salaries	$	136,219,171	142,738,681	139,614,639	143,056,516
Average salary	$	1,791	1,824	1,831	1,843
Employees on wages	No.	398,390	446,994	432,273	466,602
Wages	$	374,212,141	428,731,347	420,269,406	452,958,655
Average wages	$	939	959	972	971
Cost of materials	$	1,283,774,723	1,470,140,139	1,438,409,681	1,587,665,408
Average cost of materials per establishment	$	56,953	64,930	64,858	71,097
Value of products	$	2,482,209,130	2,781,165,514	2,695,053,582	2,948,545,315
Average value of products per establishment	$	110,120	122,832	121,519	132,038
Value added by manufacture	$	1,198,434,407	1,311,025,375	1,256,643,901	1,360,879,907

Safety Campaign in Nova Scotia Coal Mines

The *Canadian Mining Journal* of December 9 stated that "the campaign waged during the year to reduce the number of accidents at the British Empire Steel Corporation collieries met with varied success. While the number of fatal accidents are slightly higher than last year yet there is a large decrease in number of non-fatals compared with last year.

"Colliery 1-B, the most modern colliery, cut its accident rate by sixty-four per cent, number two, the largest colliery, by forty-six per cent and number twenty-two by sixty-seven per cent, number four colliery, which for some years past had a very good record, showed a still further improvement this year again, while number twenty-four reduced the rate by twenty-nine per cent.

"The Scotia and Pictou collieries showed slight improvement. Cumberland was the only district which failed to do as well as last year.

"Number twenty-two colliery established a record of no accidents for four months in one year.

"There is cause for satisfaction in such a large reduction at some collieries. It proves what can be done by co-operation, and determination to succeed.

"The accident rate is on the down grade at most of the British Steel Corporation collieries, and before the year is yet closed every colliery may be in line eagerly working to give the greatest safety to every employee."

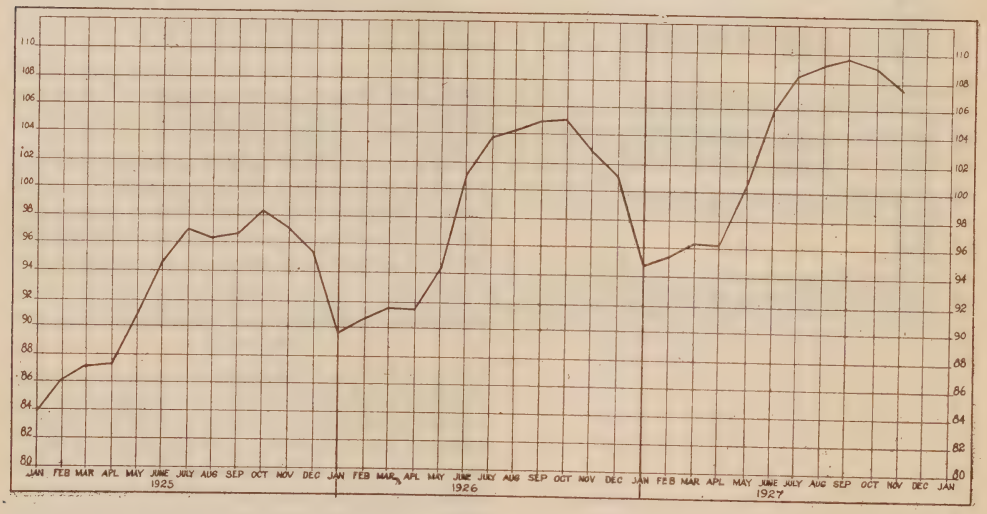
American Federation of Labour College at Pittsburgh

The American Federation of Labour, through the Pittsburgh Central Labour Union, is making arrangements to establish a "union labour college" at Pittsburgh, Pennsylvania. The new institution will have two divisions, classroom instruction and open forum mass meetings. The classroom curriculum will include courses in trade union and labour problems, economics, parliamentary law, public speaking, English, journalism and history of the American labour movement. Permission has already been obtained from the school authorities for the use of the public school rooms at night, and instructors will be delegated from the Workers' Educational Bureau whenever a group of people desires only one particular subject. The decision to establish the college was finally reached during November when the central labour union officials organized an executive board for the new institution. At the first of the open forum meetings the mining industry and the coal strike were discussed by prominent union officials.

EMPLOYMENT SITUATION AT THE BEGINNING OF NOVEMBER, 1927, AS REPORTED BY THE EMPLOYERS MAKING RETURNS TO THE DOMINION BUREAU OF STATISTICS

THERE was the customary contraction in employment at the beginning of November, but the losses were smaller than in 1926, and activity continued at a higher level than on the corresponding date in any other of the last eight years. The Dominion Bureau of Statistics tabulated statements from 6,221 employers, whose payrolls were reduced from 903,099 persons on October 1 to 891,105 at the beginning of November. Reflecting this decrease of nearly 12,000 workers, the index number declined from 109.0 in the preceding month to 107.5 on the date under review, as compared with 102.8, 97.1, 93.0, 98.8, 95.8 and 90.2 on November 1, 1926, 1925, 1924, 1923, 1922 and 1921, respectively.

The most pronounced curtailment again took place in construction, and manufactures also showed seasonal dulness, while logging and trade reported considerable improvement, also of a seasonal character.



Employment by Economic Areas

Reduced employment was registered in all provinces, except Quebec, where there was a minor gain. The greatest losses were in the Maritime Provinces.

Maritime Provinces.—Continued reductions were noted in these provinces, particularly in construction. There were also further large decreases in manufacturing, notably in sawmills, and in mining and transportation, while logging reported important seasonal gains. The contraction involved the same number of workers as that indicated on Nov. 1, 1926, when the index, as on the same date in 1925 and 1924, was lower. Returns were received from 521 employers, with 66,208 workers on payroll, or 5,266 less than at the beginning of October.

EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

NOTE.—The curve is based on the number of employees at work on the first day of the month, as indicated by the firms reporting, in comparison with the number of employees they reported in January, 1920, as 100.

Quebec.—In contrast with the shrinkage shown on November 1 in most years of the record, a slightly favourable tendency was in evidence in Quebec, where the 1,394 co-operating firms enlarged their staffs by 598 employees, bringing them to 259,626. Manufactures and trade reported moderate improvement, and there were marked seasonal advances in logging, while construction, transportation and services recorded curtailment, that in the first named being especially noteworthy. Employment was in much greater volume than on the corresponding date a year ago, when declines were noted.

Ontario.—In Ontario, the reductions were smaller than on November 1, 1926, when employment, as in the autumn of earlier years of the record, was not so active as on the date under review. The most extensive recessions were those of a seasonal nature in construction, canning and sawmilling plants and transportation, while logging, textiles and trade were decidedly busier. A combined working force of 367,785 persons was registered by the 2,834 employers whose data were tabulated, and who had 371,599 on payroll in the preceding month.

Prairie Provinces.—The falling-off in the Prairie Provinces involved a smaller number of workers than that noted in the same month of 1926, while the situation continued to be more favourable than in the autumn of any other year since the record was commenced in 1920. Returns were compiled from 807 firms having 119,127 employees, against 120,086 at the beginning of October. Steam railway operation afforded considerably more employment, and coal mining, logging and trade were also more active; manufacturing on the whole was unchanged, while construction and services showed contractions.

British Columbia.—Further and larger declines in personnel were recorded by the 666 employers furnishing returns in British Columbia; their staffs aggregated 78,359 workers, compared with 80,912 in the preceding month. The greatest losses were in the lumber mills, construction and transportation, while logging

NOTE.—Number employed by the reporting firms in Jan. 1920=100 in every case. The "Relative Weight" shows the proportion of employees in the indicated area to the total number of employees reported in Canada on the date under review.

and mining were much more active. Conditions were rather better than on November 1 last year, when the trend was also unfavourable.

Table I gives index numbers by economic areas.

Employment by Cities

Additions to staffs were registered in Montreal, Quebec and Hamilton, while in Toronto, Ottawa, Windsor and the Other Border Cities, Winnipeg and Vancouver there were reductions.

Montreal.—The trend of employment in Montreal continued to be upward, 1,090 persons having been added to the staffs of the 742 co-operating firms, who employed 124,186. Manufactures, shipping and stevedoring and trade reported increased activity, while seasonal losses were recorded in construction and services. Considerable curtailment had been indicated on November 1, 1926, when the index was several points lower.

Quebec City.—Employment in Quebec again increased, according to 101 employers of 11,528 persons, compared with 11 461 on October 1. Construction showed most improvement, while other industries reported only slight changes. The situation was much more favourable than on the corresponding date last year.

Toronto.—There was a falling off in the number of workers on the payrolls of 805 firms in Toronto, who had 106,816 in their employ, or 663 less than in the preceding month. The bulk of the loss was in construction, while manufacturing was busier, particularly, in textile factories. Additions to staffs had been noted at the beginning of November a year ago, but the index then was lower.

Ottawa.—Practically all the curtailment in Ottawa was in sawmills, although construction was also seasonally slacker; on the other hand, trade showed heightened activity. The 138 employers furnishing data reported 11 384 workers, as against 11,903 on October 1. Employment was in greater volume than on the same date in 1926, when contractions were indicated.

Hamilton.—Continued and larger gains were noted in Hamilton, 846 persons being added to the staffs of the 202 firms whose returns were received and who had 30,558 employees. The most marked advances were in trade, although manufactures also showed improvement. The movement on November 1 last year was unfavourable and the index then was lower.

Windsor and the Other Border Cities.—Employment in the Border Cities showed a further decrease; 97 employers reported 9,090

persons on payroll, compared with 9,397 at the beginning of October. Seasonal dulness in automobile plants and in construction caused the decrease, which was on a smaller scale than that indicated on the corresponding date a year ago. Conditions then, however, were better than during the present autumn, when curtailment of production in a large motor factory has for some months greatly affected the situation.

Winnipeg.—Small losses were again noted in Winnipeg, where the forces of 291 firms de-

TABLE III.—INDEX NUMBERS OF EMPLOYMENT IN CANADA BY INDUSTRIES (JAN. 1920=100)

[1]The "Relative Weight" column shows the proportion that the number of employees in the indicated industry is of the total number of employees reported in all industries by firms making returns on the date under review

clined from 29,561 on October 1 to 29,517 workers at the beginning of November. Trade reported considerable advances, while manufactures, transportation and construction released help. More pronounced losses had been recorded on November 1, 1926, and employment then was at a lower level.

Vancouver.—Repeating the downward movement indicated on the same date last year, there was a falling off in employment in Vancouver on November 1; 241 employers had 25,306 persons on their staffs, or 752 less than in the preceding month. Construction and transportation showed most of the reduction. The situation was not quite so favourable as at the beginning of November last year.

Index numbers by cities are given in Table II.

Manufacturing Industries

Further and more pronounced shrinkage of a seasonal character was noted in manufactures, chiefly in the lumber and food-canning industries, although there were also losses in pulp and paper and iron and steel works. On the other hand, textile, rubber, tobacco and some other factories registered considerable advances. The declines on the whole involved fewer workers than those shown on November 1 in the last three years, in all of which the index was lower. The 3,864 co-operating manufacturers reported 479,991 operatives, as against 486,519 at the beginning of October.

Animal Products—Edible.—Dairies and fish canneries reported seasonal curtailment, while meat-packing plants afforded more employment. Statistics were received from 198 manufacturers, employing 17,738 persons, as compared with 18,060 in the preceding month. This contraction, which took place chiefly in Ontario and British Columbia, was smaller than that registered on the corresponding date last year, when the index number was several points lower.

Leather and Products.—Tanneries and leather clothing factories reported heightened activity, but miscellaneous leather goods plants were slacker. The result was an increase of 88 workers in the staffs of the 192 establishments furnishing returns, which employed 17,784 on November 1. Rather more extensive improvement was noted at the beginning of November, 1926, when the index was the same as on the date under review.

Lumber and Products.—Further reductions in personnel involving much the same number of employees as in the autumn of last year were indicated in the lumber group, in which employment then was in greater volume than on November 1, 1927. The losses took place almost entirely in rough and dressed lumber mills, while furniture, match and some other divisions were busier. A combined working force of 48,409 persons was reported by the 710 co-operating manufacturers, as compared with 53,756 at the beginning of October. There were large contractions in all provinces.

Musical Instruments.—Continued additions to staffs on practically the same scale as on November 1, 1926, were registered in musical instrument factories, in which the situation was much the same as during last autumn. Thirty-nine establishments had 3,461 employees as compared with 3,285 in the preceding month. Ontario and Quebec reported almost the entire gain.

Plant Products—Edible.—Fruit and vegetable canneries made large seasonal reductions in their payrolls, while flour mills and biscuit factories showed an increase. The forces of the 313 reporting firms aggregated 29,906 persons, or 3,034 less than in this last return. Employment was better in Quebec and the Prairie Provinces, while in Ontario and British Columbia there were important seasonal losses. This decrease involved rather more workers than that registered on the corresponding date in 1926, when the index number was slightly lower than on the date under review.

Pulp and Paper Products.—There was another reduction in the number reported by employers in this group, 473 of whom had 60,095 workers on payroll, as compared with 60,836 at the beginning of October. Pulp and paper mills released employees, but the printing and publishing group showed an advance. The tendency was unfavourable in all except the Prairie Provinces, the largest declines being in Quebec and Ontario. Smaller losses had been indicated at the beginning of November a year ago, but the index number then, as well as in the autumn of earlier years since the record was commenced since 1920, was lower.

Rubber Products.—Employment in rubber goods showed considerable expansion on November 1, in contrast with the decrease registered on the same date in 1926. Data were compiled from 33 firms with 15,067 employees, as against 14,050 in their last report. This increase of over 1,000 persons, which took place chiefly in Quebec and Ontario, brought employment to its maximum since 1920.

Textile Products.—Garment and personal furnishings, hosiery and knitting, cotton and silk factories reported increased activity, but

the production of headwear showed a falling off; 515 manufacturers enlarged their payrolls from 75,398 workers on October 1 to 76,695 on the date under review. A large proportion of the increase took place in Ontario, although the tendency was generally favourable except in the Prairie Provinces. An insignificant improvement had been noted at the beginning of November last year, but the situation then was not so good.

Tobacco, Distilled and Malt Liquors.—There was an important increase in employment in these industries, 436 persons being added to the staffs of the 106 establishments furnishing statistics, which employed 13,159. Quebec and Ontario registered most of the gain, which greatly exceeded that noted on the corresponding date last year, when the index was lower.

Clay, Glass and Stone Products.—Heightened activity was indicated in building material plants, but employment was at a slightly lower level than on November 1, 1926. The forces of the 121 employers from whom information was received, declined by 207 persons to 10,568 at the beginning of November. Improvement was shown in Quebec and Ontario, while elsewhere the trend was downward.

Electrical Appliances.—Further additions to staffs were made in electrical apparatus works, 39 of which had 11,255 employees, or 162 more than in their last report. This advance was not so pronounced as that noted on the same date last year, when the index number was slightly lower.

Iron and Steel Products.—The crude, rolled and forged, agricultural implement, iron and steel fabrication and some other divisions of the iron and steel group registered increases in employment, while there were large reductions in automobile, railway car, shipbuilding and a few other branches. Statements were received from 647 manufacturers, whose payrolls aggregated 123,990 persons, as compared with 124,459 in the preceding month. Employment declined in Ontario and British Columbia, while in the Maritime and Prairie Provinces improvement was noted. Rather greater curtailment had been indicated at the beginning of November last year, but the situation then was practically the same as on the date under review.

Logging

Statistics were tabulated from 239 firms employing 32,083 men, or 9,396 more than in the preceding month. This advance was the largest recorded at the beginning of any November in the last eight years, and brought employment to a higher level than in the autumn of any other year since 1920. All provinces shared in the upward movement, which, however, was most noteworthy in Ontario.

Mining

Practically no change on the whole was shown in mining; 214 operators reported 47,745 employees, as compared with 47,740 in the preceding month. Of the former number, 26,841 were engaged in coal mining, which showed an insignificant decrease, 13,457 in metallic ores, in which employment advanced, and 7,447 in non-metallic minerals, which afforded slightly less employment. In the Maritime and Prairie Provinces and British Columbia there was some curtailment of operations. The index in this group on November 1 was at a higher point than during the autumn of any other year since the record was commenced in 1920.

Communications

Telephones and telegraphs showed the reductions in personnel usual at the time of year, according to 185 companies and branches, with 25,689 workers in their employ, a loss of 286 since October 1. Conditions continued to be better than the autumn of any other year of the record.

Transportation

Street Railways and Cartage.—There was a diminution in employment in local transportation, according to 116 firms whose staffs decreased from 21,222 employees on October 1 to 20,930 at the beginning of November. Small declines were reported in the Prairie Provinces and Quebec. Activity was greater than on the corresponding date in 1926, when the movement was also unfavourable.

Steam Railways.—Statistics were tabulated from 100 employers in the railway operation group, in which payrolls rose by 396 persons to 80,344 on October 1. This gain contrasts with the reduction recorded on the same date last year, and the index then was slightly lower. The improvement was largely confined to the Prairie Provinces, while elsewhere seasonal contractions were registered.

Shipping and Stevedoring.—Seasonal reductions in personnel were noted in water transportation, 60 companies employing 15,631 workers, as compared with 15,786 in the preceding month. Quebec reported increased activity, while in the Maritime Provinces, On-

tario and British Columbia there were losses. Rather more extensive shrinkage was recorded on November 1 last year, but employment then was at a slightly higher level.

Construction and Maintenance

Building.—There was a further falling off in building, 5,184 persons being released from the forces of the 483 co-operating contractors, who had 39,279 employees, a number considerably greater than that reported at the beginning of any other November in the last eight years. The largest losses took place in Ontario, but the trend was generally unfavourable as the building season drew to a close.

Highway.—Work on highways and streets again declined seasonally, but the reduction involved a smaller number of workers than in the autumn of 1926, when employment was in less volume. Statements were tabulated from 166 employers, whose staffs, standing at 26,174, were smaller by 4,010 persons than on October 1. All provinces shared in the downward movement, which was most pronounced in the Maritime Provinces.

Railway.—Further curtailment of railway construction was reported, especially in Ontario and the Prairie Provinces, although there were general losses. The forces of the 41 companies and divisional superintendents furnishing returns declined from 46,116 persons on October 1, to 40,268 at the beginning of November. This shrinkage was more extensive than that registered on the corresponding date of 1926, when the level of employment was higher.

Services

There were continued decreases in the personnel of hotels and restaurants as the tourist and vacation season closed; 171 firms in the service division employed 16,001 persons, as against 17,098 at the beginning of October. The index was considerably higher than on November 1 in any other year of the record.

Trade

The trend of employment in trade continued to be upward, 1,609 workers being added to the forces of the 582 retail and wholesale establishments furnishing returns, whose staffs aggregated 66,970. Most of the advance was made in the former division. The number of persons reported was higher on November 1, 1927, than in any other month since this series was instituted in 1920, and further pronounced gains may be expected during the next few weeks, in preparation for the Christmas and holiday trade. The advances recorded on the corresponding date last year gave employment to practically the same number of additional workers.

Tables I, II and III give index numbers of employment by economic areas, leading cities and industries, respectively. The columns headed "Relative Weight" show the proportion that the number of employees reported in the indicated area or industry is of the total number of employees reported in Canada by the firms making returns on November 1, 1927.

UNEMPLOYMENT IN TRADE UNIONS AT THE CLOSE OF OCTOBER, 1927

UNEMPLOYMENT as used in the following report has reference to involuntary idleness due to economic causes. Persons who are engaged in work other than their own trades, or who are idle because of illness are not considered as unemployed. Unions involved in an industrial dispute are excluded from these tabulations. As the number of unions making returns varies from month to month with consequent variation in membership, upon which the percentage of unemployment is based, it should be understood that such figures have reference only to the organizations reporting.

There was a minor increase in the volume of unemployment reported among local trade unions at the close of October as was manifested by the returns tabulated from 1,641 labour organizations whose membership aggregated 172,737 persons. Of these 6,743, or a percentage of 3.9, were without work on October 31, in contrast with percentages of 3.1 in the previous month and 2.6 in October last year. The changes in the various provinces in comparison with September were not particularly outstanding, Quebec, Ontario, Manitoba, Alberta and British Columbia unions registering reductions in employment, ranging from 3 per cent in Alberta to .8 per cent in Quebec, and Nova Scotia. New Brunswick and Saskatchewan slight increases in the volume of work afforded. The Alberta change was for the most part attributable to the less favourable conditions prevailing in the coal mines of

that province, while the Manitoba reduction of 1.8 per cent, which followed next in line to that of Alberta, was almost wholly due to inactivity in the building and construction trades. When making a comparison with the returns for October of last year all the provinces with the exception of Nova Scotia, New Brunswick and British Columbia reported a lower level of employment and the gains in these three provinces were but nominal.

A separate compilation is made each month of trade union conditions existing in the largest city of each province except Prince Edward Island. In Vancouver, 7.2 per cent of the members were reported idle on October 31, a decline in employment of 1.5 per cent over September, but a slight gain in comparison with October last year. Montreal, with 5.7 per cent of inactivity registered a less favourable situation, both as compared with the returns of the previous month and October last year, and Winnipeg with 5.0 per cent of idleness also registered declines in employment in both comparisons. The best conditions for October were reflected by Regina, where the percentage of inactivity recorded was but nominal, as in both the previous month and in October last year.

The accompanying chart records the unemployment trend by months from 1921 to date. Contrary to the course followed by the curve in September, the trend during October was in an upward direction, indicating a somewhat greater volume of inactivity. The level of the curve was also above that of October of last year.

The manufacturing industries with 439 organizations reporting 47,189 members, showed an unemployment percentage of 5.0 at the end of October, as compared with 4.0 per cent in September. Fluctuations occurred within the manufacturing groups, the iron and steel, wood, pulp and paper, brewery, bakery, and hat and cap divisions indicating reductions in the amount of work afforded, and the metal polishing and glass divisions considerable improvement. The level of employment in the garment trades remained practically the same as in the preceding month. In comparison with returns for October last year when 3.7 per cent of inactivity was recorded, the iron and steel trades reported reductions in activity, involving the greatest number of workers, followed by declines of lesser magnitude among papermakers, wood, leather, and glass workers, and among printing tradesmen.

PERCENTAGE OF UNEMPLOYMENT AS REPORTED BY TRADE UNIONS

From the coal miners' unions 38 returns were tabulated, including a membership of 16,330 persons, 462, or a percentage of 2.8, of whom were idle on October 31, in contrast with percentages of .7 in the previous month and .4 in October last year. The situation for Nova Scotia coal miners improved slightly over September but remained almost stationary when compared with the October, 1926 conditions. In Alberta over 8 per cent of idleness was recorded in October as compared with no inactivity in both the previous month and October last year, while in British Columbia all the members were reported at work in the three months used here for comparative purposes.

The building and construction trades with 181 unions having a membership of 18,552 persons at the close of October reported declines in employment incidental to the slacker

TABLE I—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY GROUPS OF INDUSTRIES

Month	Fishing	Lumbering and logging	Mining	Manufacturing industries	Vegetable products	Pulp and paper products	Pulp and paper mill workers	Printing, publishing and lithographing	Wood products	Fibres, textiles and textile products	Textile and carpet workers	Garment workers	Hat, cap and glove workers	Animal products	Iron and its products	Non-ferrous metals	Clay, glass and stone products	Mineral products	Miscellaneous manufacturing industries	Building and construction	Transportation	Shipping and stevedoring	Steam railway operation	Local transportation	Communication	Telegraph operation	Telephone operation	Trade (retail shop clerks)	Services	Government	Miscellaneous	All occupations

autumn and winter seasons, 10.0 per cent of the members being idle on October 31, as against 8.3 per cent in September. A substantial share of the unemployment involved was attributable to inactivity among bricklayers, masons and plasterers, followed by smaller declines for electrical workers, painters, decorators and paperhangers, granite and stonecutters, steam shovel and dredgemen, and tile layers, lathers and roofers. Considerable improvement was evidenced by bridge and structural iron workers and hod carriers and building labourers, whose membership, however, is but a small part of the total for the group and not sufficient to sway perceptibly the group percentage. Small gains were also recorded by carpenters and joiners, and plumbers and steamfitters. In comparison with the returns for October last year when 7.8 per cent of inactivity was registered, bricklayers, masons and plasterers, electrical workers, granite and stonecutters, tile layers, lathers and roofers and hod carriers and building labourers all reported lessened employment and the remaining trades some improvement.

TABLE II.—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY PROVINCES

Oct. 1927	1·1	·9	5·6	3·2	4·2	1·8	4·4	4·9	3·9

The transportation industry indicated little variation during October from the September level, the small change registered, however, being slightly adverse. Returns were tabulated during October from 668 unions of transportation workers, comprising a membership of 59,163 persons, 1,764 of whom were idle, or a percentage of 3.0, as against percentages of 2.5 in September and 1.6 in October last year. Navigation workers, steam railway employees, and teamsters and chauffeurs all contributed in slight degree to the increase in unemployment over September, while among street railway employees there was no change in the situation. All divisions of the transportation industry shared in the decline in employment recorded over October last year, the shipping division reporting the most substantial change.

A separate tabulation was made for longshore workers from whom 11 reports were received, with a membership of 6,983 persons, 1,090 of whom or a percentage of 15.6 were without work at the close of October. This was an increase in employment of nearly 3 per cent in comparison with September, but a decline of almost 3 per cent over October last year.

From the government service group reports were tabulated from 137 unions with 12,470 members showing a practically negligible percentage of unemployment compared with nominal percentage of idleness in September and in October last year. In the Federal employment group there was no inactivity recorded in any of the months used here for comparison, while among civic employees the changes throughout were very small.

Reports were received from 110 unions in the miscellaneous groups of trades with 4,872 members, 5.7 per cent of whom were without work on October 31, as compared with percentages of 5.2 in September and 5.3 in October last year. Hotel and restaurant employees were slacker than in September, and stationary engineers and firemen and barbers also reported slight reductions in the work afforded. Theatre and stage employees, however, indicated slightly improved conditions. In comparison with the returns of October last year hotel and restaurant and theatre and stage employees, barbers and stationary engineers and firemen all reported a less favourable situation.

Among fishermen there was 3.5 per cent of idleness reported in October, as compared with 2.6 per cent in September, and 5.2 per cent in October last year. Lumber workers registered

no unemployment in October as in September, but in October last year 2.4 per cent of the members were without work.

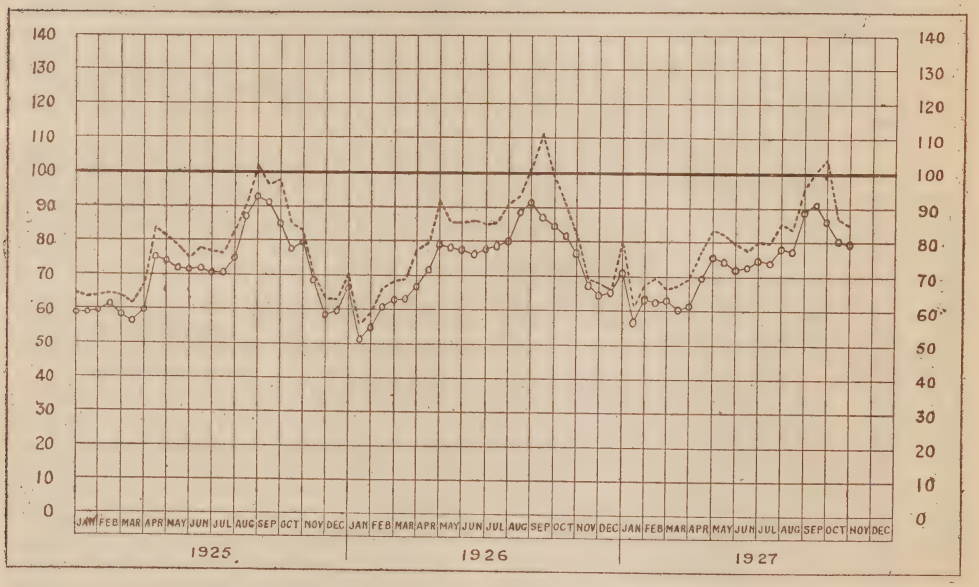

Table II on page 1337 summarizes the returns by provinces for October of each year from 1919 to 1924 inclusive, and for each month from January, 1925, to date, and table I on page 1336 records the percentages of idleness registered in the different groups of industries for the same months.

EMPLOYMENT OFFICE REPORTS FOR OCTOBER, 1927

THE volume of business transacted by the offices of the Employment Service of Canada during the month of October, 1927, showed a decrease of over 43 per cent in the average daily placements from that of the preceding period. This large reduction, due to seasonal curtailment in the demand for harvest workers in the west, was offset in part by a substantial gain in logging, while throughout Canada, computations being made semi-monthly. It will be seen that the curves of vacancies and placements in relation to applications declined throughout the month, though at the close of the period under review both curves were about three points higher than the level attained at the close of October, 1926. The ratio of vacancies to each 100 applications was 86·9 and 85·1 during the

POSITIONS OFFERED AND PLACEMENTS EFFECTED FOR EACH ONE HUNDRED APPLICATIONS FOR EMPLOYMENT

Applications ——— Vacancies - - - - - - - - - - - - Placements o—o—o—o—o—o

in comparison with last year an increase of 12 per cent was recorded, being chiefly due to increased placements in logging and farming. Services and trade also registered gains, though in a minor degree, all other groups showing declines.

The accompanying chart shows the trend of employment since January, 1925, as represented by the ratio of vacancies offered and placements effected for each 100 applications for work registered at the offices of the Service first and second half of October, in contrast with ratios of 90·5 and 82·0 during the same periods in 1926. The ratios of placements to each 100 applications during the periods under review were 80·6 and 79·7, as compared with 81·8 and 76·8 during the corresponding month last year.

The average number of applications reported daily during the first half of October, as shown by a summary of the reports from the offices, was 2,135, compared with 2,710 during the

preceding period, and with 2,192 daily during the corresponding period in 1926. Applications for work during the latter half of the month registered 2,220 daily, in contrast with 1,720 daily during the latter half of October a year ago.

A daily average of 1,856 vacancies was reported by employers during the first half and 1,890 vacancies the latter half of the month under review, as compared with daily averages of 1,984 and 1,410 vacancies during the half monthly periods in October, 1926. Vacancies offered to the Service during the latter half of September, 1927, averaged 2,829 daily.

An average of 1,722 placements daily was effected by the offices during the first half of October, of which 1,246 were in regular employment, and 476 in work of one week's duration or less, as compared with a total average placement during the preceding period of 2,331 daily, and with 1,792 daily during the first half of October, 1926. During the latter half of the month under review placements averaged 1,769 daily (1,329 regular and 440 casual), as compared with an average of 1,320 daily during the corresponding period a year ago.

During the month of October, 1927, the offices of the Service referred 47,079 persons to vacancies, and effected a total of 45,365 placements. Of these the placements in regular employment were 33,461, of which 29,632 were of men and 3,829 of women, while the placements in casual work totalled 11,904. The number of vacancies reported by employers numbered 38,311 for men and 10,367 for women, a total of 48,678, while applications for work totalled 56,600, of which 43,848 were from men and 12,752 from women.

The following table gives the placements effected to date by the offices of the Employment Service of Canada.

Year	Placements		Totals
	Regular	Casual	
1919 (10 months)	268,001	37,904	305,905

1927 (10 months)	269,287	92,771	362,058

NOVA SCOTIA

During the month of October, 1927, positions offered through employment offices in Nova Scotia were 25 per cent higher than in the preceding month and nearly 4 per cent above the corresponding month last year. There was an increase of 29 per cent in placements over September, and of over 1 per cent more than in October, 1926. Increased placements over October last year were shown in farming and services, while declines were recorded in manufacturing, logging, trade and construction and maintenance. Industrial groups in which most of the placements were effected during the month were: manufacturing, 69; logging, 46; construction and maintenance, 43; trade, 40; and services, 357, of which 279 were of household workers. During the month 109 men and 103 women were placed in regular employment.

NEW BRUNSWICK

There was an increase of 3 per cent in the number of positions offered in New Brunswick during October when compared with the preceding month, but a decline of nearly 13 per cent when compared with the corresponding month last year. Placements showed a nominal gain only over September, but were 6 per cent lower than in October, 1926. Reduced placements in logging, services and transportation were responsible for the declines from last year, being offset in part by gains in manufacturing, construction and maintenance and trade. Industrial divisions in which most of the placements were effected during the month were: manufacturing, 41; logging, 91; construction and maintenance, 108; and services, 496, of which 353 were of household workers. Placements in regular employment numbered 176 of men and 81 of women.

QUEBEC

Orders listed at employment offices in the Province of Quebec during October called for nearly 13 per cent less workers than in the preceding month, but for over 2 per cent more than in the corresponding month last year. There was a nominal decline in placements when compared with September, but a gain of nearly 8 per cent in comparison with October, 1926. Logging and services showed the only gains of importance in placements over October last year, and manufacturing the only decline. Placements by industrial groups included: manufacturing, 182; logging, 1,300; farming, 56; construction and maintenance, 1,056; trade, 93; and services, 575, of which 406 were of household workers. During the month 2,758 men and 521 women were placed in regular employment.

ONTARIO

Opportunities for employment as indicated by orders listed at employment offices in Ontario during October were nearly 4 per

cent better than in the preceding month, and nearly 3 per cent more favourable than in the corresponding month last year. There was a decline of nearly 1 per cent in placements from September, but a gain of over 1 per cent when compared with October, 1926. The logging industry showed a substantial gain in placements over October last year, and smaller increases were registered under services and trade, but these gains were considerably offset by fewer placements in manufacturing, farming, transportation and construction and maintenance. Industrial groups in which most of the placements were effected during the month were: manufacturing, 1,446; logging, 2,932; farming, 1,040; mining, 126; transportation 530; construction and maintenance, 2,404; trade, 481; and services, 4,061, of which 2,554 were of household workers. Placements in regular employment numbered 7,204 of men and 1,430 of women.

MANITOBA

The number of positions offered through employment offices in Manitoba during October was nearly 52 per cent less than in the preceding month and over 13 per cent less than in the corresponding month last year. Placements declined about 42 per cent when compared with September, and were nearly 2 per cent less than in October, 1926. Logging was the only industry to show marked improvement in placements over October last year, and these gains were more than offset by fewer placements in farming, construction and maintenance, services and trade, of which farming showed the largest decline. Placements by industrial groups included: manufacturing, 153; logging, 1,333; farming, 1,639; construction and maintenance, 385; trade, 269; and services, 2,246, of which 1,682 were of household workers. There were 2,879 men and 522 women placed in regular employment during the month.

SASKATCHEWAN

Employment opportunities as indicated by orders received at employment offices in Saskatchewan during October were over 71 per cent less than in the preceding month but over 73 per cent better than in the corresponding month last year. There was a decline of nearly 67 per cent in placements when compared with September, but a gain of over 65 per cent in comparison with October, 1926. These large percentages of change were due to harvesting being nearly one month later this year than last, which resulted in farm placements during the month under review being more than twice as heavy as October, 1926. Placements in services and logging were larger than last October, while all other industrial divisions showed very little change. Industrial groups in which most of the placements were effected during October were: manufacturing, 153; logging, 217; farming, 5,497; transportation, 94; construction and maintenance, 701; trade, 167; and services, 1,109, of which 794 were of household workers. Regular employment was secured for 6,171 men and 461 women during the month.

ALBERTA

Alberta orders during October called for over 52 per cent less workers than in the preceding month, but were nearly 13 per cent in excess of the corresponding month last year Placements were 40 per cent below September but nearly 19 per cent higher than in October, 1926. Farming was the only industry to show any appreciable gain in placements over October last year, and accounted for most of the increase in the province under this comparison. The only reduction worthy of note was in construction and maintenance. Industrial groups in which most of the placements were effected during the month were: manufacturing, 235; logging, 99; farming, 7,508; mining, 267; transportation, 101; construction and maintenance, 680; trade, 273; and services, 850, of which 622 were of household workers. During the month 8,669 men and 389 women were placed in regular employment.

BRITISH COLUMBIA

There were declines of nearly 15 per cent and over 3 per cent respectively in the number of positions offered through offices in British Columbia during October when comparison is made with the preceding month and with the corresponding month last year. Placements were nearly 59 per cent less than in September and nearly 3 per cent fewer than in October, 1926. Comparing placements in each industry during the month under review with October of last year, increases were recorded in logging, farming, construction and maintenance and trade, but these gains were more than offset by declines in manufacturing, mining, transportation and services. Industrial groups in which most of the applicants were placed were: manufacturing, 397; logging, 541; farming, 412; mining, 66; transportation, 178; construction and maintenance, 753; trade, 201; and services, 874, of which 553 were of household workers. Regular employment was secured for 1,666 men and 322 women during the month.

Movement of Labour

During October, 1927, the offices of the Employment Service of Canada made 33,461 placements in regular employment, of which 25,192 were persons for whom the employment found was outside the immediate locality of the offices at which they were registered. Of the latter 5,243 were granted the Employment Service reduced transportation rate, 2,859 travelling to points within the same province as the despatching office and 2,384 to other provinces. The reduced transportation rate which is 2.7 cents per mile, with a minimum fare of $4, is granted by the railway companies to bona fide applicants at the Employment Service who may desire to travel to distant employment for which no workers are available locally.

Persons benefiting by the Employment Service reduced rate in Quebec numbered 525, of whom 111 were for provincial centres and 414 for other provinces. Provincially Montreal transferred 33 bushmen and 6 sawmill labourers to employment within its own zone and 10 bushmen to lumber camps in the Quebec zone. The logging areas around Quebec also received 62 bushmen who were granted certificates by the Quebec city office. The greater part of the movement outside the province was from Hull and entirely toward logging regions, 214 bushmen travelling to Sudbury, 103 to North Bay, 37 to Cobalt and 8 to Sault Ste Marie. In addition 52 bushmen went from Montreal to the district surrounding Sault Ste. Marie.

Ontario offices issued reduced rate certificates to 896 workers, 853 for points within the province and 43 for other provinces. The majority of those going within the province were bushmen, 721 travelling to Northern Ontario logging districts, principally from Fort William, Port Arthur, Toronto, Sudbury and Pembroke. Fort William in addition despatched 35 building construction labourers and Port Arthur 3 building construction labourers to employment within their respective zones. From Sudbury 3 carpenters went to Timmins, 19 miners to Fort William and 5 carpenters within its own zone. Pembroke also transported 2 millwrights to Sudbury. From North Bay 22 carpenters, 4 painters, 1 bricklayer, 1 labourer, 1 plasterer, 1 steamfitter and 1 mechanic were transferred to Timmins and 22 railroad construction labourers, 5 carpenters and 3 cookees to Cobalt; from London 1 plumber was sent to Peterboro and from Cobalt 1 blacksmith travelled to Sudbury, 1 steel sharpener to Timmins and 1 hoistman to Port Arthur. Of the interprovincial transfers Hull received 20 dam construction labourers, 4 mechanics, 2 cooks, 2 flunkies and 2 cookees from North Bay, 1 miner from Sudbury and 1 bushman from Ottawa. For employment within the Winnipeg zone 10 metallic miners and 1 mine foreman received certificates of transportation from the Cobalt office.

The number of special transportation rate certificates granted by Manitoba offices was 1,726, of which 126 were provincial and 1,600 interprovincial. Of the provincial certificates 29 were issued to bushmen going from Brandon to employment in the Dauphin zone and the remainder were granted by Winnipeg to 7 hotel workers and 1 farm general for the Brandon zone, 6 bushmen and 2 porters for the Dauphin zone and 79 farm labourers and 2 farm domestics for various agricultural districts throughout the province. Of those going to other provinces, Winnipeg transferred 1,257 bushmen, 2 construction labourers, 1 farm general, 1 fisherman, 1 town general, 1 cook and 1 cookee to the Port Arthur zone, 1 cook to Fort William, 1 fisherman to Prince Albert, 3 hotel cooks to Regina, 2 female hotel workers to Estevan, 208 farm labourers and 10 farm domestics to points in Saskatchewan, and 67 farm workers and 1 farm domestic to Alberta centres. From Brandon 1 coal miner was sent to Estevan and 31 farm labourers travelled to various points in Saskatchewan, while from Dauphin 10 harvesters and 1 cook were despatched to the Prince Albert zone.

Of the 1,272 persons who took advantage of the Employment Service reduced rate from Saskatchewan offices, 1,016 were going to points within the province and 256 to other provinces. Among the former were included 8 coal miners travelling to Estevan, 3 bushmen to Prince Albert and 1 waitress to Moose Jaw, all from Regina and from Saskatoon 28 bushmen went to Prince Albert and 8 teamsters and 1 cook to districts within the saskatoon zone. The Moose Jaw office shipped 1 waitress and 1 chambermaid and the Prince Albert office 2 bushmen and 1 cook to points within their respective zones. The balance of the movement provincially totalling 962 was of harvest hands and farm domestics for the rural districts of the province. One hundred and sixty-eight of the transfers outside the province were of bushmen for regions in the vicinity of Dauphin who were transported at the reduced rate from Prince Albert, Regina and Saskatoon. From Regina in addition, 31 beet workers went to employment in the Lethbridge zone, and from Saskatoon 1 carpenter was conveyed at the special rate to Winnipeg. The remaining 56 certificates were

granted to farm hands and harvest workers for various Alberta points.

The Alberta offices transferred 593 persons at the special transportation rate, 592 of whom were for employment within the province. Of these, Edmonton despatched one coal miner to Drumheller, 7 mill hands, 7 building labourers, 6 carpenters, 4 cookees, 14 mine workers, 3 bushmen, 2 bricklayers, 1 blacksmith, 1 edgerman and 7 hotel and household workers to points within its own zone, and 454 harvesters and 3 farm domestics to various agricultural districts within the province. Included in the number receiving certificates from Calgary were 1 building labourer and 1 hotel worker going to Drumheller, 2 linemen and 1 building labourer to Edmonton, 1 bushman to a point within the Calgary zone and 75 harvesters and 1 farm domestic for farms within the province. The interprovincial transfer was of a cook who went from Calgary to employment in Saskatoon.

Vouchers for transportation issued by British Columbia offices were 231 in number, 161 for provincial stations and 70 for outside points. From the offices in Vancouver 12 carpenters were granted certificates to Nelson, 23 bushmen, 5 flunkies and 2 cooks to Kamloops, 6 miners, 1 engineer and 1 cook to Prince George, 8 miners, 2 railway construction labourers and 1 electrician to Penticton, 1 engineer to Vernon, 1 cook to Revelstoke and 16 carpenters, 21 construction labourers, 2 miners, 1 construction foreman, 2 cooks, 2 flunkies and 1 blacksmith to points within the Vancouver zone. Prince Rupert shipped 16 bushmen to the Prince George zone and 14 bushmen and 2 miners within its own zone. From Nelson 1 farm hand and 1 bushman, from Penticton 1 farm labourer and from Prince George 17 bushmen and 1 bridge foreman went to employment within their respective zones. Of those transported to other provinces 69 were farm labourers, 63 for Alberta districts and 6 for Saskatchewan farms, and the one remaining transfer was of a housekeeper sent from Vancouver for work in Drumheller.

Of the 5,243 persons who benefited by the Employment Service reduced transportation rate, 2,847 were carried by the Canadian National Railways, 2,298 by the Canadian Pacific Railway, 45 by the Timiskaming and Northern Ontario Railway, 51 by the Pacific Great Eastern Railway, 1 by the Edmonton, Dunvegan and British Columbia Railway and 1 by the Kette Valley Railway.

RECENT INDUSTRIAL AGREEMENTS AND SCHEDULES OF WAGES

A SUMMARY is given below of the more important industrial agreements and schedules of wages and working conditions that have recently been received by the Department. Such agreements are summarized each month in the LABOUR GAZETTE. In the majority of cases the agreements are signed by both the employers and employees. Verbal agreements, which are also included in the records, are schedules of rates of wages and hours of labour and other conditions of employment agreed upon between the parties concerned, and in effect though not signed. In addition to these, important schedules of wages are summarized, including civic schedules. In the case of each agreement or schedule, the rates of wages for principal classes of labour are given, with other information of general interest.

Manufacturing: Vegetable Foods, Drink and Tobacco

CALGARY, ALBERTA.—THE CALGARY BREWING AND MALTING COMPANY, LIMITED, AND THE INTERNATIONAL UNION OF THE UNITED BREWERY, FLOUR, CEREAL AND SOFT DRINK WORKERS OF AMERICA, LOCAL NO. 124.

Agreement to be in effect from June 1, 1927, to June 1, 1928.

This agreement is similar to that of last year which was summarized in the LABOUR GAZETTE for October, 1926, with minor changes in working conditions, and with no change in wages except that second class engineers now are paid 80 cents per hour and third class engineers 73 cents, whereas by the previous agreement all engineers were paid 73 cents per hour.

Construction: Buildings and Structures

HALIFAX, N.S.—ABOUT THIRTY EMPLOYING PLUMBERS AND THE UNITED ASSOCIATION OF PLUMBERS AND STEAMFITTERS, LOCAL NO. 56.

Union schedule of wages and working conditions verbally agreed to by master plumbers and in effect from August 1, 1927, to May 1, 1928:

Minimum rate of wages: 65 cents per hour.
Hours: 8 per day, 4 on Saturdays.
Overtime, time and one half; Sundays and holidays, double time.

TORONTO, ONTARIO.—THREE EMPLOYERS AND THE INTERNATIONAL UNION OF ELEVATOR CONSTRUCTORS, LOCAL NO. 50.

Agreement in effect from May 1, 1927, to April 30, 1928.

This agreement was signed at the conclusion of the strike reported in the LABOUR GAZETTE for November.

Hours: 8 per day and 4 on Saturdays.

All overtime including Saturday afternoons, Sundays, legal holidays, double time.

Only union members to be employed, but if none are available other workers may be employed temporarily.

The total number of helpers not to exceed the number of mechanics except in certain specified cases. No restriction placed on the character of work which a helper may perform under direction of a mechanic.

Transportation to be paid for work out of the city and travelling time up to five hours overtime at the regular rate.

Each employer may employ one apprentice and an additional apprentice for each eight mechanics. Apprentices to be 18 years or over and shall be paid $3.20 per day for the first year, $4.20 per day for the second year and $6 per day for the third year.

Any dispute between parties to be referred to an arbitration board, each party selecting two members and these selecting a fifth. If this board fails to settle any dispute, it shall be referred to the National Arbitration Committee, consisting of an equal number of representatives of the International Union of Elevator Constructors and representatives of the Elevator Manufacturers Association which committee shall be formed for this purpose and whose decision shall be binding.

No strike to be called unless authorized by the Local Building Trades Council and with the approval of the Executive Board of the International Union of Elevator Constructors, but in case of men engaged on maintenance contracts, where the contractor has a contract for the complete maintenance of elevators, these men shall not go out on strike.

Wages to be the average wage rate of the five highest paid of the seven principal specified building trades. The wage rate for helpers to be 70 per cent of the mechanic's rate. In this case, the wage agreed on was $1 per hour for mechanics and 70 cents for helpers. Wage rates not to be changed oftener than every 6 months and 30 days' notice must be given of change.

VANCOUVER, B.C.—CERTAIN CONTRACTORS AND THE SHEET METAL WORKERS INTERNATIONAL ASSOCIATION, LOCAL NO. 280.

Agreement to be in effect from January 1, 1928, to May 1, 1929, and thereafter until 90 days' notice of opening the agreement is given by either party.

The employers agree to employ union members or those willing to become such, but if none are available, other help may be temporarily employed.

Parties to this agreement are not to accept or do work on any building on which sheet metal work and roofing is not supplied and erected by a sheet metal contractor, nor on any building upon which the union employees of said building have withdrawn, nor on any building where sheet metal work has previously been done and an indebtedness remains to the sheet metal contractor or to any member of the union for wages due until such indebtedness is satisfactorily adjusted.

No union member to do any sheet metal work, roofing, etc. except as a journeyman employee, and contractors to divide work satisfactorily among union members. Union members not to do any sheet metal work for any person or persons until obtaining a permit from the union. Employers will not request employees to install material considered unfair, unless same is covered by patent rights.

Minimum wages: $1.06¼ per hour for union members, and for junior members three quarters of the journeyman's rate.

Hours: 8 per day, 44-hour week.

Overtime, time and one half to 9 p.m. After 9 p.m., Saturday afternoons, Sundays and Government holidays, double time.

All differences between the two parties to this agreement to be settled by a permanent Joint Committee, consisting of three members appointed by each party. If this committee fails to adjust any dispute, same will be referred to the general office of the Sheet Metal Workers' International Association before any definite action is taken.

If notice of change in wages be given by either party, both parties will meet and try to adjust the matter, making known their decision within 30 days.

Any union members laid off work before noon shall receive 4 hours' pay, and any laid off before 5 p.m., 8 hours' pay.

On work outside the city, transportation to be paid and if it is not practicable for men to travel every day, room and board to be paid.

One apprentice allowed to every three journeymen and one junior member to every four journeymen.

Transportation and Public Utilities: Local Transportation

VANCOUVER, B.C.—THE YELLOW CAB COMPANY, LIMITED AND THE INTERNATIONAL BROTHERHOOD OF TEAMSTERS, CHAUFFEURS, STABLEMEN AND HELPERS OF AMERICA, TAXI CAB DRIVERS (METERED CABS) LOCAL NO. 151.

Agreement in effect from September 8, 1927, to June 21, 1928.

This agreement cancels all previous agreements including that summarized in the LABOUR GAZETTE for September, 1927.

Wages: for first thirty working days, 33⅓ per cent of gross cab earnings; after said thirty days, $2.75 per day or 35 per cent of gross cab earnings, whichever is greater over the period of six days.

The company agrees to recognize this union and to recognize any properly elected representative or representatives of its employees at any time to discuss grievances.

Any driver called out after regular shift or on regular day off to be paid 50 cents per hour or 35 per cent commission whichever is greater during such time worked.

The following to be considered misdemeanours: failure to report for duty, or absent when supposed to be on duty for any non-legitimate reason; jumping boxes (driver to book in at nearest box); not making out accident reports; not wearing uniform when on duty without a legitimate reason; not turning in the day's takings on completion of day's work; failure to turn in receipts for the full amount collected; being intoxicated while on duty.

First cab on stand to have preference on pick-ups and first man on down town stands to be in driver's seat or standing by cab on alert for business.

All positions considered as promotions to be bulletined by Company and seniority to be considered in filling them.

The Company does not encourage nor condone any of its employees handling intoxicating liquor in any form.

If necessary to reduce the number of drivers, seniority and efficiency to be considered.

Any difference as to the interpretation of this agreement to be submitted to a Board of Arbitration, consisting of two members appointed by the company and two members representing the union. If these four cannot agree, they shall elect a fifth disinterested party and the decision of this Board shall be binding. During such arbitration there shall be no suspension of labour.

BUILDING PERMITS ISSUED IN CANADA DURING OCTOBER, 1927

THE value of the building permits issued by 63 cities during October was $18,838,558; this was an increase of $4,428,346 or 30.7 per cent as compared with the September total of $14,410,212, and of $4,100,156 or 27.8 per cent over the aggregate of $14,738,402 for October, 1926. The value in the month under review was greater than in October of any other year for which statistics of these centres are available, while the cumulative total for the months of 1927 exceeds by almost $26,000,000 that for the same months in 1926, the previous high level of this record, which was commenced in 1920.

Some 50 cities furnished detailed statistics, showing that they had issued nearly 1,600 permits for dwellings estimated to cost approximately $8,800,000 and over 3,200 permits for other buildings valued at almost $9,800,000. During September, authority was granted for the erection of about 1,500 dwellings and 3,000 other buildings estimated to cost approximately $7,000,000 in each case.

Quebec, Ontario, Alberta and British Columbia registered increases in the value of authorized building as compared with September, 1927, those of $1,384,283 or 35.7 per cent in Quebec, and $2,981,952 or 41.7 per cent in Ontario being most noteworthy.

As compared with October, 1926, there were gains in New Brunswick, Quebec, Ontario, Manitoba, Saskatchewan, Alberta and British Columbia. In this comparison also, Ontario recorded the greatest gain of $3,172,902, or 45.6 per cent.

Montreal and Toronto showed improvement over September, 1927, but declines as compared with October last year; in Winnipeg, the reverse was the case, as there was a reduction in comparison with the preceding month and an increase over the same month in 1926, while in Vancouver the total was higher than in either. Of the other centres, Quebec, Westmount, Belleville, Brantford, Chatham, Fort William, Galt, Hamilton, Niagara Falls, Ottawa, York Townships, Sandwich, Moose Jaw, Regina, Calgary, Edmonton, Lethbridge, Medicine Hat, Kamloops, Nanaimo, New Westminster and Prince Rupert registered increases both as compared with September, 1927, and with October, 1926.

Cumulative Record for First Ten Months, 1926.—The following table shows the value of the building authorized by 63 cities during October and in the first ten months of each year since 1920. The January-October average index numbers of wholesale prices of building materials in those years are also given (1913=100).

Year	Value of permits issued		Average indexes of wholesale prices of building materials in first ten months
	In October	In first ten months	
	$	$	
1927	18,838,558	160,858,088	147·6
1926	14,738,402	134,902,338	149·5
1925	11,312,644	109,676,825	153·9
1924	13,089,588	109,906,921	160·6
1923	9,999,187	118,319,159	166·8
1922	10,737,525	127,515,975	162·0
1921	10,491,228	99,064,670	187·0
1920	10,401,041	106,547,319	215·5

The aggregate for the first ten months of this year was 19.2 per cent greater than in 1926, the previous high level of the record, while the average index numbers of wholesale prices of building materials continued to be lower than in any other year since 1920.

International Federation of Trade Unions

The International Federation of Trade Unions has recently published the second part of its fifth Yearbook. It contains brief reports from the national centres affiliated with the International Federation of Trade Unions, and from the International Trade Secretariats, for the two years 1925 and 1926. The first part of the 1927 Yearbook contains only statistical information; the second supplements these by indicating the chief incidents in the history of the Trade Union Movement during these two years, and further, by giving explanations of the fluctuations in membership which have marked this period. It will be evident therefore, that each volume is incomplete alone; both are needed to enable the reader to obtain a comprehensive idea of the progress of international trade unions.

The second part contains, as previous Yearbooks have done, full accounts of the most important conflicts in the period under review; and these include, in this case, the great struggle in Denmark in 1925, and the national strike and miners' lockout of Britain, in 1926, both of which are outstanding events in international trade union history. We need not emphasize the usefulness of compact summaries of this kind, for reference and for many other purposes, etc.

Copies of the publication may be obtained from the Publication Department of the Trades and Labour Congress of Canada, 172 McLaren street, Ottawa, Ontario, price 50 cents.

Correction

In the introductory note to the 3rd report of the Canadian Railway Board of Adjustment No. 1, published as a supplement to the last issue of the LABOUR GAZETTE it was stated in error that this Board was established under an Order in Council, dated July 11, 1918, while the war was still in progress, etc. This Order in Council contained a declaration of certain principles and policies for the avoidance of industrial unrest during the war, but the Board was established as the result of a voluntary agreement between the various railway brotherhoods and the railways.

FAIR WAGES CONDITIONS IN DOMINION GOVERNMENT CONTRACTS

THE Department has recently received information regarding certain contracts executed by the Government of Canada which included among their provisions the fair wages conditions sanctioned by Order in Council for the protection of the labour to be employed. The contracts (Group "A") awarded in connection with the works of construction contained the following fair wages clause:—

1. All mechanics, labourers, or other persons who perform labour in the construction of the work hereby contracted for, shall be paid such wages as are generally accepted as current from time to time during the continuance of the contract for competent workmen in the district in which the work is being performed for the character or class of work in which they are respectively engaged, and if there be no current rates in such district, then fair and reasonable rates, and shall work such hours as are customary in the trade in the district where the work is carried on, or if there be no custom of the trade as respects hours in the district, then fair and reasonable hours, unless for the protection of life and property, or for other cause shown to the satisfaction of the Minister of Labour, longer hours of service are required. The Minister of Labour may at any time and from time to time determine for the purposes of this contract, what are the current or fair and reasonable rates of wages and the current or fair and reasonable hours, and may from time to time rescind, revoke, amend, or vary any such decision, provided that his determination and any amendment or variation shall not be operative prior to the period of three months immediately preceding the date thereof.

Two of the contracts above mentioned contained schedules of rates and hours based on the current standards of the district in these respects. The schedules are given below.

One contract was awarded for interior fittings (Group "B") containing the general fair wages clause and other conditions for the protection of the labour employed, as sanctioned by the Fair Wages Order in Council which reads as follows—

All workmen, labourers, or other persons who perform labour in the construction of the work hereby contracted for, shall be paid such wages as are generally accepted as current from time to time during the continuance of the contract for competent workmen in the district in which the work is being performed, and if there be no current rate in such district, then a fair and reasonable rate, and shall work such hours as those fixed by the custom of the trade as respects hours in the district where the work is carried on, or if there be no custom of the trade as respects hours in the district then fair and reasonable hours, except for the protection of life and property, or on due cause shown to the satisfaction of the Minister of Labour. In the event of a dispute arising as to what is the current or a fair and reasonable rate of wages or what are the current hours fixed by the custom of the trade or fair and reasonable hours it shall be determined by the Minister of Labour, whose decision shall be final; payment may also be withheld of any moneys which would otherwise be payable to the contractor until the Minister of Labour's decision has been complied with.

By the term "current wages" and the term "hours of labour fixed by the custom of the trade" in the foregoing are meant respectively the standard rates of wages and hours of labour either recognized by signed agreements between employers and workmen in the district from which the labour required is necessarily drawn or actually prevailing, although not necessarily recognized by signed agreements.

A statement was also received as to supplies ordered by the Post Office Department subject to the regulations for the suppressing of the sweating system and the securing of fair wages, etc.

The general labour conditions sanctioned by the Fair Wages Order in Council are as follows:—

Where there are special circumstances which in the judgment of the Minister of Labour make it expedient that he should do so, he may, in the manner and subject to the provisions hereinabove set forth, decide what are the current or fair and reasonable rates of wages for overtime, and what is the proper classification of any work for the purposes of wages and hours. Immediately upon receipt of notice of any decision of the Minister of Labour hereunder the Contractor shall adjust the wages and hours and classification of work so as to give effect to such decision. In case the Contractor shall fail so to do, or to pay to any employee or employees for any services performed or for any hours of labour, wages according to the rates fixed therefor by the Minister of Labour, the Minister of Labour may authorize and direct the Minister to pay any such wages at the rates so fixed and to deduct the amount thereof from any moneys owing by the Government to the Contractor and any such payment shall for all purposes as between the Contractor and the Government be deemed and taken to be payment to the Contractor, and the Contractor shall be bound in every particular by any such authority, direction and payment as aforesaid. The powers of the Minister of Labour hereunder shall not be exercised as to any employee or employees where it is established to his satisfaction that an agreement in writing exists and is in effect between the Contractor and the class of employees to which such employee or employees belong or the authorized representatives of such class of employees fixing rates of wages, overtime conditions and hours of labour.

2. The Contractor shall post and keep posted in a conspicuous place on the premises where the contract is being executed, occupied or frequented by the workmen, the Fair Wages Clause or Schedule inserted in his contract for the protection of the workmen employed, also any decision of the Minister of Labour under the preceding paragraph.

3. The Contractor shall keep proper books and records showing the names, trades, and addresses of all workmen in his employ and the wages paid to and time worked by such workmen, and the books or documents containing such record shall be open for inspection by the Fair Wage Officers of the Government at any time it may be expedient to the Minister of Labour to have the same inspected.

4. The Contractor shall not be entitled to payment of any money which would otherwise be payable under the terms of the contract in respect of work and labour performed in the execution of the contract unless and until he shall have filed with the Minister in support of his claim for payment a statement attested by statutory declaration, showing (1) the rates of wages and hours of labour of the various classes of workmen employed in the execution of the contract; (2) whether any wages in respect of the said work and labour remain in arrears; (3) that all the labour conditions of the contract have been duly complied with; nor, in the event of notice from the Minister of Labour of claims for wages until the same are adjusted. The Contractor shall also from time to time furnish the Minister such further detailed information and evidence as the Minister may deem necessary in order to satisfy him that the conditions herein contained to secure the payment of fair wages have been complied with, and that the workmen so employed as aforesaid upon the portion of the work in respect of which payment is demanded have been paid in full.

5. In the event of default being made in payment of any money owing in respect of wages of any workmen employed on the said work and if a claim therefor is filed in the office of the Minister and proof thereof satisfactory to the Minister is furnished, the said Minister may pay such claim out of the moneys at any time payable by His Majesty under said contract and the amounts so paid shall be deemed payments to the Contractor.

6. These conditions shall extend and apply to moneys payable for the use or hire of horses or teams, and the persons entitled to payments for the use or hire of horses or teams shall have the like rights in respect of moneys so owing them as if such moneys were payable to them in respect of wages.

7. With a view to the avoidance of any abuses which might arise from the sub-letting of contracts it shall be understood that sub-letting, other than such as may be customary in the trades concerned is prohibited unless the approval of the Minister is obtained: sub-contractors shall be bound in all cases to conform to the conditions of the main contract, and the main Contractor shall be held responsible for strict adherence to all contract conditions on the part of sub-contractor; the contract shall not, nor shall any portion thereof be transferred without the written permission of the Minister; no portion of the work to be performed shall be done at the homes of the workmen.

8. All workmen employed upon the work comprehended in and to be executed pursuant to the said contract shall be residents of Canada, unless the Minister is of opinion that Canadian Labour is not available or that other special circumstances exist which render it contrary to the public interest to enforce this provision.

DEPARTMENT OF PUBLIC WORKS

Contracts in Group "A" (Construction, etc.)

Reconstruction of the roof and fourth floor of the old examining warehouse at Montreal, P.Q. Name of contractors, Munn and Shea Limited, Montreal, P.Q. Date of contract, October 31, 1927. Amount of contract, $36,000.

Trade or Class of Labour	Rates of wages not less than	Hours per day
	$ cts. per hour	
Masons	1 12½	9
Bricklayers	1 12½	9
Plasterers	1 12½	8

Driver (two horses and cart)	1 00	10

Construction of a laboratory building at the fuel testing plant, Ottawa, Ont. Name of contractor, Alex. I. Garvock, Ottawa, Ont. Date of contract, November 16, 1927. Amount of contract, $48,659.

Trade or Class of Labour	Rates of wages not less than	Hours per day
	per hour	
Bricklayers and masons	$1 20	8
Carpenters and joiners	85	8
Sheet metal workers	85	8
Structural steel erectors	75	8
Roofers	70	8
Painters and glaziers	65	8
Concrete workers	45	8
Labourers	45	8
Drivers, two horses and wagon	1 00	8
Driver, horse and cart	70	8

Construction of a shelter shed for the disinfecting plant at the Grosse Isle, P.Q., quarantine station. Name of contractor, Henri Lemelin, St. Romuald, P.Q. Date of contract, October 8, 1927. Amount of contract, $17,000.

Dredging areas A, B, C, D and E, in Courtenay River, B.C. Name of contractors, North Western Dredging Company, Limited, Vancouver, B.C. Date of contract, October 24, 1927. Amount of contract, approximate expenditure, $3,600.

Construction of two ice breakers on the shore of the St. Lawrence River at Lanoraie, Berthier County, P.Q. Name of contractors, Munn and Shea, Limited, Montreal, P.Q. Date of contract, October 25, 1927. Amount of contract, unit prices, approximate expenditure, $3,481.

Partial reconstruction of the government ice-breaker in the Ouareau River at Crabtree Mills, P.Q. Names of contractors, Munn and Shea Limited, Montreal, P.Q. Date of contract, October 25, 1927. Amount of contract, approximate expenditure, $6,094.

Construction of a wharf at Doucet's Landing, Nicolet County, P.Q. Name of contractors, Arthur E. Farley, Ottawa, Ont., and Percy R. Grant, Hazeldean, Ont. "Farley and Grant." Date of contract, October 29, 1927. Amount of contract, unit prices, approximate expenditure, $120,285.

Repairs to the wharf at Deschambault, Portneuf County. Name of contractor, Dave Devito, Neuville, P.Q. Date of contract, November 2, 1927. Amount of contract, unit prices, approximate expenditure, $8,872.75.

Reconstruction of the breakwater at Roberval County Lake St. John, P.Q. Name of contractor, Cyprien Gagnon, Jonquières, P.Q. Date of contract, November 4, 1927. Amount of contract, unit prices, approximate expenditure, $13,466.

Construction of a breakwater at Grass Cove, N.S. Name of contractor, Thos. P. Charleson, Ottawa, Ont. Date of contract, November 24, 1927. Amount of contract, unit prices, approximate expenditure, $36,896.40.

Contract in Group "B" (Interior Fittings)

Construction and installation of interior fittings (in oak) in the public building at Mont Laurier, P.Q. Name of contractors, the Canadian Office and School Furniture Company, Limited, Preston, Ont. Date of contract, November 15, 1927. Amount of contract, $1,210.

DEPARTMENT OF RAILWAYS AND CANALS

Contract in Group "A" (Construction, etc.)

Supply and erection of a 40,000 Imperial Gallon Steel Water Tank at St. Charles Junction, Quebec. Name of contractors, Horton Steel Works, Limited, Montreal, P.Q. Date of contract, August 29, 1927. Amount of contract, $5,200.

POST OFFICE DEPARTMENT

The following is a statement of payments made in November, 1927, for supplies ordered by the Post Office Department under contracts which are subject to the Fair Wages policy:

Nature of Orders	Amount of Orders
	$
Making metal stamps and type, also other hand stamps and brass crown seals	2,127 81
Making and repairing rubber stamps, daters, etc.	192 07
Making up and supplying letter carriers uniforms, etc.	12,133 93
Stamping pads, ink, etc.	540 13
Bag fittings	3,311 89
Scales	731 38
Mail bagging	7,175 74
Letter boxes	466 29
Rural mail boxes	9,723 00
Satchels	480 00

The thirteenth annual report of the Commissioner of Co-operation and Markets of Saskatchewan for the year ending April 30, 1927, gives particulars of the activities of the various agricultural co-operative associations in the province. The co-operative activities promoted by the provincial Department of Agriculture include live stock marketing; co-operative creameries; co-operative wheat producers; co-operative poultry marketing; community sales days; potato marketing; beef rings; community halls; stallion associations and registered seed growers. The report mentions two events of outstanding importance which affected the co-operative movement in Saskatchewan during the past year. The Saskatchewan Co-operative Elevator Company, Limited, ceased to exist when the entire business was purchased by the Saskatchewan Co-operative Wheat Producers' Limited (the Wheat Pool) and the Pool Elevators, Limited. The second event was the amalgamation of the Saskatchewan Grain Growers' Association with the Farmers' Union of Canada, resulting in the formation of what is known as the U.F.C. Saskatchewan section. The report states that while the larger co-operative trading associations are holding their own, some of the smaller bodies are ceasing to exist. The paid-up capital invested in co-operative associations in Saskatchewan amounts to $546,601. Live stock marketing receipts amounted to $756,804. The total sales of the associations amounted to $3,974,751, the net savings being $120,409.

The report of the Factory Inspection Branch of the Province of Ontario for the month of November indicated that there were 482 industrial accidents during that period, four of these being fatal. Of this total, 191 accidents occurred in the metal trade, 106 in the pulp and paper trades, 68 in transportation, 31 in rubber and rubber goods, and the balance in other classes of industry.

HOURS OF LABOUR IN MANUFACTURING ESTABLISHMENTS, CENSUS OF INDUSTRY, 1925

IN the annual census of industry the Dominion Bureau of Statistics ascertains the hours per day worked by employees, that is, the number of persons working 8 hours per day or less, nine hours, ten hours and over ten hours per day. The accompanying tables give the figures for 1925 in manufacturing establishments by sub-groups, together with a summary table. Figures are included for some sub-groups for which none were available in 1924. Employees in non-ferrous smelters are included in the figures for 1925, whereas for 1924 they were not included in the statistics for manufacturing being classified with mining, and these are all on a working day of 8 hours or less.

Similar figures were published for 1924 in the LABOUR GAZETTE for January, 1927 (pages 102-106), with summary tables as to hours of labour in other industries as well as manufacturing, ascertained in special inquiries in June, 1919, and October, 1923. These special inquiries covered only about 8,000 representative establishments and were made to ascertain the extent to which the 8-hour day prevailed in Canada. The figures secured indicated that approximately half of the employees in industry (excluding agriculture, fishing, trapping, etc.) were on the 8-hour day or less, there being in Mining about 75 per cent, in Transportation about 85 per cent, in Communication over 80 per cent and in Trade nearly 80 per cent.

The Industrial Census of 1925 shows 37.2 per cent of employees on the 8-hour day or less as compared with 33.5 per cent in 1924, on 9 hours per day 32.8 per cent as compared with 35.5 per cent, on 10 hours 26.1 per cent as compared with 26.9 per cent in 1924, on more than 10 hours 3.9 per cent as compared with 4.3 per cent in 1924. These changes are partly due to the inclusion of figures for sub-groups for which no data were available for 1924.

The manufacturing industries showing the greatest percentage on the 8-hour day or less are Non-Ferrous Metal Products with 57.6 per cent, Iron and its Products 43.1 per cent and the Miscellaneous Group 46.0 per cent, the other groups being all under 40 per cent. The 9-hour day (with 32.8 per cent for all groups) predominates with Vegetable Products at 39.2 per cent, Animal Products at 44.2 per cent and Chemical and Allied Products at 47.1 per cent. The 10-hour day does not predominate in any group and the percentage of employees on more than ten hours is not large in any group, the highest being in Vegetable Products where a substantial number of employees in sugar refineries work over ten hours on account of the continuous operations involved. There are also substantial percentages of numbers of employees working over ten hours in Fruit and Vegetable Canneries, a seasonal industry, and in Pulp and Paper Manufacturing, Rolled Iron, Steel Products, Pig Iron, etc., and cement, gas and coke where continuous processes are carried on night and day.

NUMBER AND PERCENTAGES OF EMPLOYEES ON WAGES IN MANUFACTURING INDUSTRIES IN CANADA WORKING SPECIFIED HOURS PER DAY, DURING 1925, CENSUS OF INDUSTRY

COMPARISON OF PURCHASING POWER OF WAGES IN TERMS OF FOOD AND RENT IN CITIES IN VARIOUS COUNTRIES

SINCE July, 1924, the International Labour Office has maintained the record of the comparative real wages in various countries, compiled and published by the British Ministry of Labour in the *Ministry of Labour Gazette* since 1923. Summaries of these figures were given in the LABOUR GAZETTE in August, 1923, June, 1924, December, 1924, November, 1925, and February, 1927. The accompanying table shows the index numbers of real wages as on the date July 1, 1927, and is taken from the *International Labour Review* for October, 1927.

As before, the purpose of the calculations is to show the comparative amounts of food which can be purchased in the various cities with the wages of forty-eight hours' work. For this purpose index numbers were calculated by taking 100 to represent the amount of each article of food which forty-eight hours' normal wages in each of eighteen trades would purchase in London, and then finding what ratio of 100 would represent the corresponding amount for each article of food and each trade in each other city included. These ratios or "index numbers" were then averaged for each city for all trades included. The International Labour Office in calculating the averages has continued the practice of the British authorities in weighting the figures according to British standards of consumption, but has also produced averages weighted according to standards in various groups of countries with more or less similar standards of living.

In addition by taking an average of the results according to the six standards so adopted, a general average is produced which stands as an international average by means of which the standard of living in each city can be compared to that in London.

A calculation has also been made as to the comparative purchasing power of the wages if an allowance is made for rent payments as well as for food costs and this appears in the last column of the table of index numbers.

It is pointed out that the data used for the comparisons are not strictly comparable owing to differences in consumption in the various countries, that the wages data are for only four industries, building, metal, furniture and printing trades, that the prices data are for only eighteen items of food, and that while a percentage allowance of the cost of food is made for rent no allowance is made for fuel, clothing and miscellaneous items.

Figures for Sydney, Australia, were not available for the accompanying table, but in the table published in February, as for other dates for which they were available, the figures for Sydney were relatively nearly as high as for Ottawa and for some dates they have been higher.

INDEX NUMBERS OF COMPARATIVE REAL WAGES IN VARIOUS CITIES AT JULY 1, 1927[1]

(Base: London, July 1, 1927=100)

Warsaw[4]	34	40	32	35	43	39	37	38

[1] These index numbers are subject to the important reservations indicated in the article.

[2] The figures for Rome and Lisbon are relatively low. This may be accounted for in part by the difference in the items of food consumption in the Southern European countries from those ordinarily consumed in most of the other countries included in the table.

[3] The figures are based on wages in the building, furniture-making, and printing industries only. For other cities the metal industry is also included.

[4] Based on a weighted average wage, instead of certain particular trades as in the other cities.

Mr. Bert Merson, of the Amalgamated Association of Street and Electric Railway Employees of America, who last year submitted his resignation as member of the Mothers' Allowance Commission of Ontario, has now returned to his place on the board. His resignation was not accepted at the time by the provincial minister of labour.

A scheme for concerted action has been drafted by Yorkshire, Nottinghamshire and Derbyshire mine owners, aiming at the limitation and regulation of the coal output in order to counteract the prevailing depression in the industry. The mines in these counties produce one-third of the coal mined in Great Britain.

The British Columbia government has appointed Messrs. E. B. Perry, representing employers, and Harry Wood, representing employees both of Vancouver, as members of the Board of Adjustment under the "Hours of Work Act," in place of Messrs. F. V. Foster and T. F. Paterson, resigned. This Board is entrusted with the administration of the Male Minimum Wage Act. Mr. J. D. McNiven, deputy minister of labour, is permanent chairman.

The Ontario Mothers' Allowances commission report for October shows $171,959 expended during the month, 4,729 mothers and 14,075 dependent children participating. During the fiscal year ending October 31, $2,007,557 was disbursed by this commission.

PRICES, RETAIL AND WHOLESALE, IN CANADA, NOVEMBER, 1927

Cost of Living, Prices of Staple Articles and Index Numbers

THE movement in prices during the month was slight, the weekly family budget in terms of retail prices being somewhat higher, while the Dominion Bureau of Statistics index number of wholesale prices declined slightly.

In retail prices the cost per week of a list of twenty-nine staple foods for an average family of five in terms of the average prices in some sixty cities was $11.07 at the beginning of November, as compared with $10.99 for October; $11.01 for November, 1926; $11.23 for November, 1925; $10.46 for November, 1924; $10.69 for November, 1923; $10.29 for November, 1922; $11.08 for November, 1921; $15.32 for November, 1920; $16.92 for June, 1920 (the peak); $13.65 for November, 1918; and $7.96 for November, 1914. The increase was due mainly to seasonal advances in the prices of eggs, milk, butter and cheese, with slight increases also in the prices of potatoes, evaporated apples and lard. The prices of beef, mutton, pork, bacon, bread, flour, rice, beans and prunes were somewhat lower. Including the cost of fuel and rent with that of foods the total budget averaged $21.27 at the beginning of November, as compared with $21.18 for October; $21.24 for November, 1926; $21.51 for November, 1925; $20.81 for November, 1924; $21.19 for November, 1923; $20.89 for November, 1922; $21.60 for November, 1921; $26.13 for November, 1920; $26.92 for July, 1920 (the peak); $21.61 for November, 1918; and $14.36 for November, 1914. Fuel was slightly higher, due to somewhat higher prices for anthracite coal and wood. No changes were reported in rent.

In wholesale prices the index number calculated by the Dominion Bureau of Statistics, based upon the average prices of 236 commodities in 1913 as 100, and weighted according to the commercial importance of the commodities, declined slightly to 152.2 at the beginning of November, as compared with 152.4 for October; 151.4 for November, 1926; 161.2 for November, 1925; 157.7 for November, 1924; 153.3 for November, 1923; 151.9 for November, 1922; 153.6 for November, 1921; 224.5 for November, 1920; 256.7 for May, 1920 (the peak); and 207.4 for November, 1918. Fifty-seven prices quotations declined, thirty-eight advanced and one hundred and forty-one were unchanged.

In the grouping according to chief component materials four of the eight main groups declined, two advanced and two were unchanged. The Vegetables and their Products group declined, lower prices for corn, oats, oatmeal, rolled oats, sugar, foreign fruits and potatoes more than offsetting higher levels for wheat, barley, rye, flour, rubber, coffee and tea. The Fibres, Textiles and Textile Products group and the Iron and its Products group declined, the former due mainly to lower prices for raw cotton, cotton yarn, raw silk and jute, and the latter due to declines in the prices of tin plate, wire and in steel bars. The Chemicals and Allied Products group was also slightly lower. Higher prices for cattle, eggs, dry cod fish, mackerel, calf skins and harness more than offset declines in the prices of hogs, sheep, beef, ham and lard, and caused an advance in the Animals and their Products group. The Non-Ferrous Metals group also advanced, increases in the prices of copper, silver and lead offsetting declines in tin and spelter. The Wood and Wood Products group and the Non-Metallic Minerals group were unchanged.

In the grouping according to purpose consumers' goods declined, while producers' goods advanced. In the former lower levels for potatoes, fresh meat, oat products, foreign fruits and sugar more than offset higher levels for flour, eggs, tea and coffee: in the latter group slight declines in painters' materials caused a fall in building and construction materials, while in manufacturers' goods, materials for the textile and clothing industries, for the leather industry, for the metal working industries, for the meat packing industries, as well as miscellaneous producers' materials, advanced. Materials for the fur industry and for the chemical using industries declined.

In the grouping according to origin raw or partly manufactured goods showed little change. The prices of grains, rubber, tea, coffee, cattle, hides and skins, eggs, copper, silver, lead and wool advanced, while potatoes, foreign fruits, hogs, meats, cotton, silk, tin and spelter declined. Fully or chiefly manufactured goods declined, mainly because of lower prices for sugar, lard, turpentine, cotton seed oil, linseed oil, glycerine, tin plate, wire, lead pipe and solder. Domestic farm products advanced, while articles of marine origin declined and articles of forest origin and articles of mineral origin were unchanged.

EXPLANATORY NOTE AS TO WHOLESALE PRICES

The index number calculated by the Dominion Bureau of Statistics is based upon the prices of 236 commodities, price levels in 1913 being taken as the base, that is equal to 100, the figures being weighted according to the commercial and industrial importance of each article included. The index number has been calculated by years back to 1890, being unweighted, however, for the period of 1890 to 1913 and has been calculated by months from 1919 to date for all groupings and from 1913 to date for the principal grouping. Summary tables of the Bureau's index number may be found in the supplement to the LABOUR GAZETTE for January, 1925, January, 1926, and in greater detail in the Report on "Prices and Price Indexes 1913-24," issued by the Bureau. A description of the methods used in the construction of the index number appears in the LABOUR GAZETTE for June, 1923.

The accompanying table gives the index numbers of the Dominion Bureau of Statistics by the principal groups in the three methods of classification and with those of the classification according to purpose or use in detail for the current month and for certain preceding dates.

EXPLANATORY NOTES AS TO RETAIL PRICES

The table of retail prices and rentals shows the prices at the beginning of November of seventy-one staple foodstuffs, groceries, coal, wood and coal oil and the rent for six-roomed houses in some sixty cities throughout Canada. All prices are for delivered goods. The exact quality, for which the quotation is given is set forth in the case of each commodity, and every effort has been made to ensure that the quotations in each case refer to the same class of commodity in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The prices of foods and groceries in each city, except milk and bread, are the averages of quotations reported to the Department and to the Dominion Bureau of Statistics by a number of representative butchers and grocers in each. The prices of fuel and the rates for rent are reported by the correspondents of the LABOUR GAZETTE.

Statistics similar to these were published each month from 1910 to 1920, the figures during this period being secured at the middle of each month by the correspondents of the LABOUR GAZETTE resident in each locality from dealers doing a considerable business with workingmen's households. From 1910 to 1915 the table contained a list of only the twenty-nine foods included in the family budget, with laundry starch, coal, wood, coal oil and rent. In 1915 when monthly publication of the budget in the LABOUR GAZETTE was begun, it was decided to extend the list of foods to 40, and in 1920 the list of foods and groceries was still further extended to include over 100 items.

Beginning with October, 1922, a number of commodities were dropped from the list, and in the case of a number of articles the average prices of the grades most sold have been given, owing to the impossibility of securing prices for uniform grades for the various cities from month to month.

Oleomargarine was dropped in March, 1924, the provision for its manufacture and sale since 1917, notwithstanding the Dairy Act, expired at the end of February, 1924.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workingmen. The first class is of houses in good condition, favourably located in such districts with good modern conveniences. The second class is of houses in fair condition less desirably located, but still fairly central, without modern conveniences.

The weekly budget of a family of five, calculated in terms of the average prices in the cities for which reports are received, includes twenty-nine staple foods, laundry starch, coal, wood, coal oil, and rent, these being the items for which statistics have been obtained each month and published in the LABOUR GAZETTE since January, 1910. The quantities of each commodity included are modifications of those employed in similar calculations by various authorities. For some articles comparatively large quantities are included owing to the absence of other important items of the same class. For instance, the only fruits are evaporated apples and prunes, and the only fresh vegetable is potatoes. But as market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportions of expenditure on the various classes of foods tends to be maintained. At times when the price of an article heavily weighted for this purpose rises, or falls (abnormally) the increase (or decrease) in food prices so indicated is exaggerated, and this should be taken into account in using the budget as an indicator of changes in the cost of living. In fuel and lighting the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the differences in the heating value of the various fuels. It was estimated, when the budget was first published in 1912 in the report on wholesale prices in Canada for 1911, that these calculations represented from sixty to eighty per cent of the expenditure of an ordinary family, according to the total income. For the average family of five the expenditure on these items of food, fuel, light and rent would be perhaps two-thirds or about sixty-five per cent of the total income.

While the budget serves to show the increase or decrease from time to time in the cost of the items included, it does not purport to show the minimum cost of food and fuel supplies for an average family in the Dominion or in any one province. The quantities of meats, dairy products, cereals, etc., included were adopted as affording a liberal supply for the healthy family of a man at hard physical work. On the other hand an average family with an income sufficient to do so would buy less meat, etc., but more fruit, fresh and canned vegetables, etc., so that comparative expenditure would be little changed.

‡The budget is intended to show the changes in the cost of the items included, not to show the minimum cost for an average family. See Text. †December only. §Kind most sold. *For electric light see text.
‡‡An allowance for the cost of clothing and sundries would increase the figures by about 50 per cent; see text.

(Continued from page 1356)

Index Number of Changes in the Cost of Living

In March, 1921, the Department published in the LABOUR GAZETTE a table of percentages of changes in the cost of living since 1913 as a tentative cost of living index number, using the figures of the above mentioned budget for the calculation for food, fuel and rent, with preliminary figures for clothing and sundries added and this table has been brought down to date at intervals since. The calculation of a comprehensive cost of living index number covering all items of working men's family expenditure in progress since 1918 has been sufficiently advanced to enable the publication of preliminary figures by groups in a supplement to the LABOUR GAZETTE for January on Prices in Canada and in Other Countries, page 9. This table gives figures for June and December each year from 1914 to 1926, inclusive. Figures are now available also for March and September each year since 1917 and the accompanying table gives figures for December each year from 1914 to 1917, quarterly figures 1918 to 1926, and monthly figures for 1927. As stated in the above mentioned supplement the figures in the food group in the family budget are still used to show the changes in food prices but in the other groups the percentage changes in the prices of each article have been weighted according to workingmen's average family consumption, and in the fuel and light group, gas and electricity have been included.

Cost of Electric Current and Gas for Householders

With rates in 1913 as 100, index numbers of electric light rates were 1900, 141.4. 1905, 135.6; 1910, 118.1; 1911, 113.4; 1912, 109.1; 1913, 100.0; 1914, 96.5; 1915, 90.8; 1916, 87.6; 1917, 87.2; 1918, 85.8; 1919, 85.8; 1920, 84.2; 1921, 84.9; 1922, 82.7; 1923, 79.5; 1924, 79.2; 1925, 75.6; 1926, 75.6.

The above figures were arrived at by converting to the base of 1913 as 100, an index number of electric current costs from 1900 to 1913 constructed for the Board of Inquiry into the cost of living in Canada, 1914-15 (Report, Vol. 2, page 318) and bringing the figures down to 1926. The figures are unweighted. The Dominion Bureau of Statistics has recently issued an index number of electric current rates for household consumption as follows: 1923, 73.8; 1924, 72.2; 1925, 69.9; 1926, 68.7. This index number is weighted according to consumption in each city. When the above index number, 1900-1926, is weighted according to population in each city covered for the years 1923, 1924, 1925 and 1926, the figures are substantially the same as those recently issued by the Bureau.

The following are index numbers of rates for manufactured and natural gas for the years 1913 to 1926 issued by the Dominion Bureau of Statistics (revised, Prices and Price Indexes, 1913-1926): Manufactured gas, 1913,

CHANGES IN THE COST OF LIVING IN CANADA FROM 1913 TO 1927*

*The figures for "all items" were calculated by giving the following weights to each group: Food 35%; Fuel 8%; Rent 18½%; Clothing 18½%; Sundries 20%.

100; 1914, 98.3; 1915, 98.1; 1916, 96.3; 1917, 100.7; 1918, 107.4; 1919, 111.1; 1920, 125.4; 1921, 143.6; 1922, 140.6; 1923, 135.7; 1924, 134.6; 1925, 131.6; 1926, 131.1. Natural gas, 1913, 100; 1914, 109.6; 1915, 112.8; 1916, 112.8; 1917, 113.6; 1918, 114.2; 1919, 116.2; 1920, 123.8; 1921, 143.0; 1922, 163.1; 1923, 162.9; 1924, 162.6; 1925, 178.7; 1926, 172.2. For the years 1900 to 1913 two index numbers of gas costs calculated for the Cost of Living Inquiry in 1914-1915, have been averaged and converted to the base of 1913 as 100, as follows: 1900, 125.8; 1901, 125.8; 1902, 125.8; 1903, 125.2; 1904, 123.9; 1905, 120.1; 1906, 107.5; 1907, 108.8; 1908, 106.9; 1909, 105.7; 1910, 103.8; 1911, 99.4; 1912, 100.6; 1913, 100.0.

Retail Prices

The decline in beef prices continued, sirloin steak being down from an average of 30.8 cents per pound in October to 30.4 cents in November; round steak from 25.4 cents per pound in October to 25 cents in November; rib roast from 23.7 cents per pound in October to 23.2 cents in November; and shoulder roast from 17.2 cents per pound in October to 17.1 cents in November. Prices in the maritime provinces were somewhat higher, but these advances were more than offset by declines in most other localities. Mutton fell from an average of 29 cents per pound in October to 27.8 cents in November. Fresh pork was lower in most localities, averaging 27.5 cents per pound, as compared with 28.5 cents in October. Bacon was down from 38.8 cents per pound to 38.4 cents. In fresh fish cod steak and halibut advanced. Finnan haddie was slightly lower. Lard rose from an average price of 21.9 cents per pound in October to 22.1 cents in November.

Eggs were substantially higher, fresh averaging 57.7 cents per dozen in November, as compared with 52.6 cents in October, and 46.3 cents in September; and cooking averaging 49.7 cents per dozen in November, 47 cents in October and 42.2 cents in September. Milk averaged 12.1 cents per quart in November, as compared with 11.9 cents in October. Higher prices were reported from New Glasgow, Quebec, Sherbrooke, St. Hyacinthe, St. John's, Thetford Mines, Hull, Ottawa, Timmins, Winnipeg, Brandon, Prince Albert and Victoria. The seasonal advance in the price of butter continued, dairy averaging 42.4 cents per pound in November, as compared with 41.6 cents in October, and creamery averaging 46.5 cents per pound in November, as compared with 46.3 cents in October. Cheese was up from an average of 31.3 cents per pound in October to 31.9 cents in November.

A decline in the price of bread was reported from New Westminster and Vancouver. Soda biscuits were unchanged in the average. Flour was slightly lower, averaging 5.2 cents per pound. Canned vegetables showed little change. Beans were down from an average of 8.1 cents per pound in October to 7.9 cents in November. The price of onions continued to decline, averaging 4.6 cents per pound in November, as compared with 4.8 cents in October. Potatoes were slightly higher, the price per ninety pounds being up from $1.58 in October to $1.65 in November. Prices in most localities in the prairie provinces and in British Columbia were lower, but these declines were more than offset by advances in the eastern provinces. Evaporated apples rose from an average of 18.8 cents per pound in October to 19.4 cents in November. Prunes were lower at an average price of 14.3 cents per pound. Raisins and currants were unchanged. Granulated sugar was unchanged in the average, slightly higher prices in some localities being offset by declines in others. Coffee and tea showed little change. Anthracite coal averaged $16.35 per ton, as compared with $16.32 in October. Higher prices were reported from Moncton, Three Rivers, Thetford Mines and Sarnia. Hardwood was up from an average of $12.07 per cord to $12.13. Coal oil averaged slightly lower at 31.1 cents per gallon. No changes were reported in rent.

Wholesale Prices

The following is a summary of a statement on wholesale prices changes during the month issued by the Dominion Bureau of Statistics.

The movement in grain prices during the month was mixed. Wheat advanced slightly from an average of $1.44 per bushel in October to $1.45 in November. The low price for the month was $1.39½ reached on the 4th and the high $1.52 on the 22nd. Lower crop estimates and good export demand, together with reports of poor Australian and Argentine crops, were said to be the factors tending toward higher prices. Western barley rose from 78¼ cents per bushel to 81¼ cents and rye from 93¾ cents per bushel to 99 cents. Corn declined from $1.02 per bushel to 99¾ cents; oats from 63¾ cents per bushel to 59½ cents; and flax from $1.87¾ per bushel to $1.83. Flour followed the trend in wheat, advancing from $7.94 per barrel to $8.02. Rolled oats at Toronto fell from $4.25 per

bag to $3.85. Sugar was lower, granulated at Montreal being down from $6.12¾ to $6.03, and yellow from $5.74¾ to $5.65. Cotton seed oil was down from 14½ cents per pound to 14 cents and raw linseed oil from 92 cents per gallon to 88 cents. A grade of Indian tea advanced 1 cent per pound to 53 cents. Coffee was also higher, Santos advancing from 23½ cents per pound to 27 cents. The price of potatoes, for the most part, was lower, Quebec grades at Montreal being down from $1.20 per bag to $1.04, Manitoba potatoes at Winnipeg from 86 cents per bushel to 75 cents, and New Brunswick potatoes at St. John from $3-3.25 per barrel to $2.75. The price at Toronto was somewhat higher, being $1.59 per bag in November, as compared with $1.48½ in October. Raw rubber advanced, Ceylon being up from 34¼ cents per pound to 37¾ cents. Western cattle at Winnipeg advanced from $7.37 per hundred pounds to $8.54 and choice steers at Toronto from $8.14 to $8.81. Hogs at Toronto were down from $10.31 per hundred pounds to $8.99 and sheep from $6.37½ per hundred pounds to $6.12½. In dressed beef fore-quarters at Toronto fell from $11 per hundred pounds to $10.75, and hindquarters from $17.60 per hundred pounds to $15.75. Dressed hogs were down from $16.50 per hundred pounds to $14.25. Smoked ham fell from 26-29 cents per pound to 26½-27½ cents. Best creamery butter at Montreal fell from 42 cents per pound to 40 cents, and solids at Toronto from 41½ cents per pound to 41 cents. Cheese at Toronto was 1 cent per pound lower at 23 cents. Lard declined from 15½ cents per pound to 14½ cents. Fresh eggs were substantially higher, extras being up from 55-60 cents per dozen in October to 70 cents in November. Calf skins rose from 19-20 cents per pound to 22-23 cents. Harness leather was up from 50 cents per pound to 53 cents. Raw cotton at New York was down from 21 cents per pound to 20¼ cents, due, it was said, to lessening demand and probable curtailment of cotton goods output. Raw silk declined from $4.95 per pound to $4.85. Wool showed an advance of from 1 to 2 cents per pound. Jute was down from $9.05 per cwt. to $8.44. In non-ferrous metals copper rose from $15.05 per cwt. to $15.30; copper sheets from 21 cents per pound to 21¼ cents; copper wire from 18 cents per pound to 18¼ cents; lead from $6 per hundred pounds to $6.15; and silver from 56 cents per ounce to 57¾ cents. Tin declined from 61⅞ cents per pound to 61 cents; spelter from $7.65 per hundred pounds to $7.22½; and tin plate from $4.90 per box to $4.60.

PRICES IN GREAT BRITAIN AND OTHER COUNTRIES

THE following notes give the latest information available as to the movements of prices in Great Britain and other countries. The index number of retail prices are from official sources unless otherwise stated. The authorities for the wholesale prices index numbers are named in all cases.

Great Britain

WHOLESALE PRICES.—The Board of Trade Index number, on the base 1913=100, was 141.4 for October as compared with 142.1 for September. Foods declined 0.5 per cent, showing declines in cereals, meat and fish and an increase in other foods. Non-foods also declined 0.5 per cent with declines in iron and steel, other metal products and cotton and advances in other textiles and other articles.

The *Economist* index number, on the base 1901-05=100, was 181.6 for October, a decline of one per cent from the September level. Cereals and meat declined 2.6 per cent, other foods 2 per cent, textiles one per cent while minerals advanced 0.6 per cent and the miscellaneous group 0.8 per cent.

The *Statist* index number (in continuation of Sauerbeck's figures) was 120.6 for October, showing a decline of 0.7 per cent on the previous month and being the lowest recorded since 1915. Foods declined 3.5 per cent with a decrease of 9 per cent in animal foods and slight increases in vegetable foods and sugar, coffee and tea. Industrial materials were 1.2 per cent higher with increases in minerals and sundries and a slight decline in textiles.

COST OF LIVING.—The index number of the Ministry of Labour, on the base July 1914=100, was 169 at November 1, as against 167 at October 1. Foods rose two points, owing to a seasonal increase in the price of eggs and slight increases in milk, potatoes, cheese and fish. The other groups, rent, clothing, fuel and light and sundries showed no change.

Belgium

WHOLESALE PRICES.—The index number of the Ministry of Industry, Labour and Social Affairs, on the base April, 1914=100, was 837 in September, a decline of 1.5 per cent from the previous month. All groups showed de-

clines or no change with the exception of hide and leather products which advanced 1.7 per cent.

COST OF LIVING.—The official index number of the cost of living of a working class family of moderate income, on the base 1921=100, was 206.30 for October as compared with 204.11 for September, a decrease of one per cent. Foods, rent and lodging, clothing and sundries advanced while heat and light declined.

France

WHOLESALE PRICES.—The index number of the *Statistique Générale*, on the base July, 1914=100, was 600 for October, showing a decline of 2.1 per cent from the September level. Foods declined 4.9 per cent with decreases in all groups. Industrial materials declined 0.3 per cent with declines in minerals and metals and textiles and an increase in the various industrial materials group.

Germany

WHOLESALE PRICES.—The index number of the Federal Statistical Office, on the base 1913 =100, was 139.8 for the monthly average for October, an advance of 0.1 per cent over the September level. Colonial products advanced 0.9 per cent and manufactured goods 1.5 per cent while industrial raw materials and semi-manufactured goods declined 0.1 per cent and agricultural products 0.9 per cent.

COST OF LIVING.—The official index number for October, on the base 1913-14=100, was 150.2 for October, an advance of 2.1 per cent over the September level with advances in all groups, the most marked being in rent which rose 8.9 per cent over the previous month.

Italy

WHOLESALE PRICES.—The index number of the Chamber of Commerce, Milan, on the base 1913=100, was 484.44 for October, showing an increase of 0.1 per cent over September. Foods rose 2.1 per cent with increases in both animal and vegetable products. Industrial materials declined 0.7 per cent with declines in all groups, with the exception of vegetable products and the sundries group which showed advances.

New Zealand

WHOLESALE PRICES.—The index number of the Census and Statistics Office, on the base average annual aggregate expenditure, four chief centres, 1909-1913=1000, was 1,543 for September, an advance of 0.2 per cent over August. In consumers' goods, foodstuffs rose while non-foods declined slightly. In producers' materials, materials for farming industry rose, materials for building and construction declined and materials for other industries rose.

United States

WHOLESALE PRICES.—The index number of the Bureau of Labour Statistics, on the base 1926=100, was 97.0 for October as compared with 96.5 for September and 95.2 for August, showing an advance of ½ of one per cent over the September level. Farm products declined while foodstuffs rose. There was practically no change in textile products and house-furnishing goods while slight decreases are shown for fuel and lighting, metals and metal products, building materials and miscellaneous commodities.

The *Annalist* index number of wholesale commodity prices, on the base 1913=100, was 148.2 for November, showing a decline of 0.4 per cent from the October level with declines in all groups with the exception of farm products which rose slightly.

Dun's index number showing the cost *per capita* of a year's supply of commodities rose to $191.715 on November 1, a gain of 0.8 per cent over the October 1 level, with slight increases in all groups with the exception of breadstuffs which declined 2.1 per cent.

COST OF LIVING.—The index number of the National Industrial Conference Board, on the base July 1914=100, was 163.7 for October as compared with 162.8 for September. Food, fuel and light and sundries advanced while shelter and clothing each declined one point.

The index number of the Massachusetts Special Commission on the Necessaries of Life, on the base 1913=100, was 158.0 for October as compared with 158.2 for September, the decline being accounted for by slight decreases in the food and the clothing groups. Other groups showed no change.

The International Harvester Company is said to have carried out successful tests of mechanical cotton pickers. The machines this year picked from 80 to 90 per cent of the open cotton in this state. Each machine displaces about 20 hand pickers. The mechanism is so finely adjusted that no harm is done to the plant. It is hoped that the new device will eventually eliminate the employment of children in the cotton fields in the Southern States.

RECENT LEGAL DECISIONS AFFECTING LABOUR

Action for Damages in Dominion Court not Barred by Provincial Act

A SEAMAN employed as a boat puller on a fishing boat died as the result of a collision between the boat and the steamer *Catala* in the territorial waters of Canada on the Pacific Ocean. Action for damages was brought against the owners of the steamship by the widow and infant children of the deceased. The Exchequer Court of Canada (British Columbia Admiralty District) found that the man's death was caused by the negligence of the ship, and awarded damages to the amount of $20,000. Apart from the questions of fact, objections were taken in law against the jurisdiction of the court because of an "adjudication and determination" by the Workmen's Compensation Board of British Columbia in the exercise of its supposed powers under the Workmen's Compensation Act, (Revised Statutes of British Columbia, 1924, chapter 278, section 12 (3)) which reads as follows:—

> Where an action in respect of an injury is brought against an employer by a workman or a dependant, the Board shall have jurisdiction, upon the application of any party to the action, to adjudicate and determine whether the action is one the right to bring which is taken away by this Part, and such adjudication and determination shall be final and conclusive; and if the Board determines that the action is one the right to bring which is taken away by this Part the action shall be for ever stayed.

On the application of the owners the Board declared that the right of the applicants to take action against them was taken away by this section of the Act. The court, on the other hand, held that the provision of the Compensation Act quoted above does not extend to an action for damages in Admiralty, first because the province has no power to deprive a litigant of a cause of action given by Dominion legislation in a Dominion Court; and second, because an action for damages in admiralty is not barred by an election to take a remedy in respect to personal injury outside the Admiralty Court.

—(Exchequer Court of Canada, B.C. Admiralty District—Dagsland versus "Catala.")

Compensation Based on Average Wage

A longshoreman employed by a steamship company in the Province of Quebec sustained injuries in the course of employment, involving a reduction in his earning power by one-half. He claimed compensation at the rate of $19.50 per week, and a capital sum of $2,500, alleging that his wages with the company were at the rate of 65 cents an hour, or $39 for a week of six days of 10 hours each. The company questioned the amount of the claim on the ground that longshoremen rarely worked full time or regularly earned $39 per week, and contended that the amount of the compensation awarded should be based on the actual earnings of the men in the class of labour to which the claimant belonged.

The section of the Workmen's Compensation Act governing the rate of compensation is as follows:—

> 7328. The wages upon which the rent is based, shall be, in the case of a workman engaged in the business during the twelve months next before the accident, the actual remuneration allowed him during such time, whether in money or in kind.
>
> In the case of workmen employed less than twelve months before the accident, such wages shall be the actual remuneration which they have received since they were employed in the business, plus the average remuneration received by workmen of the same class during the time necessary to complete the twelve months.
>
> If the work is not continuous the year's wages shall be calculated both according to the remuneration received while the work went on, and according to the workman's earnings during the rest of the year.
>
> In the case where the workman receives a fixed wage, he shall not be found, in calculating the year's wages, to take into account any remuneration he may have received for overtime work.

Interpreting these provisions, Mr. Justice Bond, who heard the case at Montreal, stated as follows: "I hold that, in the case of a variable salary based upon a fixed rate of wage, as distinguished from a fixed wage, in order to ascertain the daily wages which shall form the basis of the calculation of compensation to which the injured party is entitled, recourse must be had to the average of normal days, as near as possible to the day upon which the person was injured. For it is to be observed that the Act does not say 'on the day of the accident,' but 'at the time of the accident,' and the word 'time' is broad enough to include a period extending over the days preceding the accident."

Upon this basis the amount of compensation ordered to be paid to the workman was fixed at $1,246.60, with interest and costs.

—(Quebec - Laporte versus Cunard Steamship Company, Limited).

Title of Doctor Illegal for Drugless Practitioner

A drugless practitioner who had obtained a degree of Doctor of Osteopathy in the State of Missouri was prosecuted in a police magistrate's court under the Medical Act of Ontario (Revised Statutes, 1914, chapter 161, section 49, re-enacted 1925, chapter 48), on the ground that he assumed and used the title "doctor" in the course of his practice. The magistrate discharged the accused, holding that the title was not employed as an occupational designation but only in a scholastic sense. On appeal, the Ontario Supreme Court reversed the magistrate's decision, holding that the term doctor had been used in an occupational sense, contrary to the Act, which prohibited its use by a person not registered under the Ontario Medical Act.

—*(Ontario - Rex versus Pocock).*

Wages Governed by Contractor's Place of Domicile

A New York painting company had a contract for the interior painting of a hotel at Washington, D.C. The wage scale for painters is $10.50 a day for five days a week in New York, and $9 for 5½ days a week in Washington. When the company attempted to hire painters on the Washington scale the local officials of the Brotherhood of Painters and Paperhangers insisted that the higher scale should be paid. The Brotherhood was enjoined by a lower court from interference in the matter, but when the case was heard on its merits the injunction was dissolved and the company appealed. The District of Columbia Court of appeals sustained the rule of the union that a contractor domiciled in one city and having a contract in another city must adopt the scale which calls for the highest wages and the shortest week. The court held that this rule was not arbitrary or illegal and that the enforcement of these rules by brotherhood officials was not a conspiracy in restraint of trade or in violation of the anti-trust laws.
